elder, maintained the opinion that "the churches of Rome were true churches," and in this opinion the Rev. Mr. Phillips, the pastor, seemed to have concurred. In order to put an end to the controversy which such an avowal then caused, Governor Winthrop, Deputy-Governor Dudley and Mr. Nowell, the elder of the Boston congregation, came to Watertown to confer with the Rev. Mr. Phillips and Mr. Brown. No satisfactory conclusion resulted from the conference. A day of humiliation and prayer was recommended; but the disturbance ended only when Mr. Brown ceased to be the ruling elder.

After the destruction of the Catholic settlements of Minas and Grand Prè, many of the unfortunate Acadians were scattered over these regions.

"Friendless, homeless, helpless, they wandered from city to city."

It is certain that some of these Acadians were among the first Catholics within the limits of Watertown. For two years one of their priests, Rev. Justinian Durant, resided in Boston.

In 1775 invitations were sent by Washington to the Catholic Indian tribes in Maine—the Penobscots, Passamaquoddies and St. John's—to join in the cause of freedom. Delegates from these tribes came to confer with the Massachusetts General Assembly, which received them at Watertown. Ambrose Var, the chief of the Indians of the St. John's tribe, was the spokesman, and his salutation was "We are thankful to the Almighty to see the council." The Indians promised to espouse the cause of the patriots, and their only request was: "We want a black-gown or French priest." The General Court of Massachusetts expressed its satisfaction at their respect for religion, and declared itself ready to procure a French priest; but truly added that it did not know where to find one.

The Indians earnestly joined the American cause, and how useful their accession, under Orano, was to the cause of freedom we may judge from facts recorded in Williamson's "History of Maine."

So few were the Catholics in this section of Massachusetts one hundred years ago, that the Rev. John Thayer, the pastor of the Catholic Church in Boston, in 1790, declared that their number did not exceed 100 souls. In the early years of the present century multitudes of the oppressed people of Europe flocked to these shores to enjoy the peace and freedom proffered by the Constitution of the new Republic. By this influx the number of Catholics was increased to such an extent that it became necessary to establish independent parishes in the district attended by the priests from Boston.

In the year 1830, Watertown, Waltham, the Newtons, Weston, Concord and other neighboring towns were formed into a distinct "mission," and a frame building, 50x35 feet, was erected on the land now known as the "Old Catholic Cemetery," in Waltham. The pastor of this new congregation continued to reside in Boston until 1839, when the Rev. F. Fitzsimmons took charge of the parish. At that time the

congregation numbered 300 members. The successors of the Rev. F. Fitzsimmons were: Revs. M. Lynch, Jas. Strain and P. Flood.

Shortly after Rev. P. Flood assumed the care of the parish the little church at Waltham was burned; and as the majority of the worshippers were in Watertown, it was deemed expedient to erect a church in that town. In 1846 Fr. Flood endeavored to secure a temporary place for holding services, and, after many vain efforts, succeeded in obtaining the use of what was known as the "Whig Reading-room," located on Watertown Square. Here the little congregation continued to assemble until it purchased the old Methodist meeting-house, which, being remodeled, was the first Catholic Church in Watertown. The rapid increase in membership soon made it necessary to secure better accommodations, and on the 27th of September, 1847, Bishop Fitzpatrick, of Boston, assisted by Rev. Fr. Flood and Rev. P. O'Beirne, laid the corner-stone of the present St. Patrick's Church, which is a brick structure, having sittings for more than 800 people.

In 1851 Rev. Bernard Flood, a young priest from the Grand Seminary of Montreal, was sent to assist the Rev. Patrick Flood. During the years of their administration the parish increased rapidly. New churches were built at Waltham, West Newton and Concord. After the death of Rev. P. Flood, in 1863, the sole charge of the parish devolved upon Rev. Bernard Flood, who, in 1864, removed to Waltham and left the remaining portion of the Watertown parish to the care of Rev. John W. McCarthy. This clergyman resided in Watertown until September, 1871. He was assisted by Rev. Edward S. Galligan. During their administration Newton Upper Falls was separated from the parish and became a distinct congregation. In September, 1871, Rev. M. M. Green was appointed pastor, and in the following June Rev. R. P. Stark was commissioned to assist him. Fr. Green's greatest work was the building of the large Catholic Church at Newtonville. After the completion of this church, in 1879, Newton became a separate parish, of which Rev. Fr. Green assumed the charge.

The present pastor, Rev. R. P. Stack, then began to direct the Watertown parish. Under his energetic administration, great improvements have been made. The church has been enlarged and decorated, the beautiful parochial residence on Chestnut Street erected, a cemetery purchased, and an elegant brick school-house, costing about \$35,000, built upon Church Hill. Fr. Stack has been assisted by Rev. T. A. Metcalf, John Gibbons and T. W. Coughlan.

In the towns comprised within the limits of the original St. Patrick's Parish of Watertown there are today about 20,000 Catholics, possessing church property valued at half a million of dollars. The old church is fast becoming too small for the number of worshippers, and a splendid new edifice is among the probabilities of the near future.

CHURCH OF THE GOOD SHEPHERD. In the summer of 1881, Rev. Edward A. Rand, who had recently become a member of Watertown, conducted services of the Episcopal Church at several private houses in the town. So much interest was developed that a committee, consisting of Messrs. Thomas G. Banks, George H. Gregg and William J. Bryant, was appointed in the fall of 1883 to consider and report as to the advisability of holding services each Sunday. As the result of this committee's report, Grand Army Hall was secured and regular services were held in that hall from October 21, 1883, to Christmas, 1888.

With the hope that, in the course of a few years, funds could be obtained for building a church, a bond of a desirable lot of land on the corner of Mt. Auburn Street and Russell Avenue was secured in the spring of 1885. March 12, 1886, the Parish of the Church of the Good Shepherd was duly organized, and in May of that year purchase was completed of the lot of land previously bonded, containing 16,000 square feet. In 1887 vigorous measures were adopted to secure funds for building a church. The enterprise was cordially approved by Bishop Paddock. Residents of Watertown belonging to other religious denominations, and friends living elsewhere, generously aided the parish; and on Christmas Day, 1888, the first service of the Episcopal Church was held in the new structure. The building is an ornament to the town. It is a tasteful specimen of English rural church architecture. The walls are of field-stone, with brown-stone trimmings. The pews, roof and wood-finish are of cypress. The walls are plastered inside and are tinted a warm brown. The cost of the building was about \$12,500. It will seat 232, exclusive of the Sunday-school room, which is separated from the church proper by sliding sashes, and can be utilized to seat 100 more persons. The structure is so planned that it can be enlarged, at moderate expense, to a seating capacity of over 500. The seats are free, the expense of maintaining public worship being met by voluntary contributions. Women, as well as men, are eligible to membership in the parish, and about one-half of the members are ladies. The treasury of the parish has often been replenished by their earnest and judicious efforts.

The parish now owns over 30,000 feet of land. It is gradually gaining in numbers and in strength. From its first organization Mr. Thomas G. Banks has been the Parish Clerk, and Miss Ethel Cushing the organist. To them and to Mr. William J. Quincy, the treasurer, the parish is under much obligation. The rector is the Rev. E. A. Rand, to whose earnest labors the parish is chiefly indebted for its beautiful church. There are now (1890) upwards of seventy-five communicants. Among the donors to the building fund was the Bishop of Montreal. The officers of the parish for 1890 are as follows:

Senior Warden, John E. Abbott; Junior Warden, H. A. Scranton; Parish Clerk, Thomas G. Banks;

Treasurer, William J. Quincy. Other Vestrymen—John Baker, J. A. French, George F. Robinson.

CHAPTER XXXI.

WATERTOWN—(Continued).

Early People—Land Grants—The Proprietors' Book—Town Government—Schools—The Woods—The South Side.

EARLY PEOPLE OF WATERTOWN.—The people who first settled the town of Watertown came in June, 1630, with Sir Richard Saltonstall and the Rev. George Phillips. The mere names of these hardy, hopeful adventurers form no unmeaning list. Most of them became proprietors of the soil. They came with this expectation. The names are found among the honored and active men of the present day in every part of the United States, and may be traced on every page of the nation's history. Not necessarily always famous for great deeds, for there are those who look back to Watertown for their lineage, who now people towns scattered through every State from Maine to Florida, and across the continent to the far-away shores of the Pacific. No book of genealogies is more studied than Dr. Bond's genealogies of the families of Watertown.

A martyred President found a progenitor in a Garfield whose early home was in Watertown. The present head of our armies, likewise a celebrated Senator who engineered successfully the finances of the nation through a great crisis, find in a Sherman the first of their line in the list of our early settlers. The Lawrences had their first home on the banks of Fresh Pond, although they early pushed farther into the country, and found the beautiful slopes at Groton, in the valley of the Nashua. Here the Bigelows started. The cause of freedom could not have spared a Phillips; or the South, or the North, for that matter, in manufactures, the cotton gin of a Whitney. America's latest great attempt in philology and dictionaries is under the charge of a Whitney, as was the great geological survey of California under another. The race of Saltonstall is not extinct, nor is the high, noble and independent character of the great leader abated.

Upham and Warren and Stowe and Stearns and Coolidge and Mason and Hoar and Curtis are familiar names. But it is better to give the simple lists of names as they are found in the early records. There is no complete list of those who came the first year, in 1630, with Winthrop, or those who had arrived before 1636, although, as Bond says, "It is most probable that their number was greater than that of the settlers of any other town planted in 1630; and there is reason to suppose that, with the exception of Boston, Watertown continued to be more populous than either of them for twenty years. The population

became so crowded, that the people began very early to disperse and form new plantations." We have shown why they felt *crowded*. This term is correct when we think of farms joining each other, and compare them with the boundless expanse of delightful country beyond. Some towns were settled from Watertown before the earliest list of proprietors was prepared, which is still preserved to us. Some of those who pushed on to found other towns still retained their ownership of lands here; the names of these are preserved. Many left no trace behind them in the town's records. Some settled Wethersfield, Connecticut. Some settled Stamford, Milford and Branford. Dedham, of this State, was founded by Watertown people, as was Concord, and Sudbury, and Lancaster, and Groton largely, so Worcester, Framingham, Rutland and Spencer, largely Westminster on the slopes of Wachusett, Harvard, the most northeasterly town of Worcester County, and most of the towns of Middlesex County, contained among their settlers many from the old hive at Watertown.

In Dr. Bond may be found "an alphabetical list of persons known to have been proprietors or residents of Watertown prior to the end of the year 1643; compiled chiefly from the lists of grantees and proprietors, embracing also some names derived from wills, deeds, settlement of estates, and descriptions of possessions." This list occupies a dozen pages closely printed in fine type, and gives, with each name, some description, evidence of residence or change of residence or other valuable notes.

This may be a good place to say that the New England Historic Genealogical Society received as a bequest the several hundred remaining copies of Bond's Genealogies and still holds them, most of which are in an imperfect condition. The whole number might be made perfect by reprinting twelve or sixteen signatures at an expense of from five hundred to a thousand dollars, which, in time, purchasers of the volumes would gladly repay to the society. If the society does not feel called to make this expenditure from funds already in its possession, it is to be hoped some one may be moved to make a gift to the society for this purpose, which in time should return to the society to assist it in doing other similar work.

A careful comparison of this work of Doctor Bond with the original authorities increases the wonder that one man could have collected such a vast amount of varied information so accurately as this has been done. I have found a few glaring mistakes, as the members of almost any family may have found in the minute arrangement of family names. Many of these could be corrected, after invited correspondence with the society, in an appendix. But let not a book dealer do the work for money; let the society, or some society, finish the work in the interests of truth and history. The commercial value even of a copy in a good condition is now nearly five times

the price at which it in former years was offered without purchasers.

A few names will be given for the benefit of the many who do not possess a copy of Bond.

Daniel Abbott, applied to be admitted freeman in Oct., 1630, before New Town (Cambridge) was settled, and he was admitted the next May. In April, 1631, the Court ordered a military watch of four to be kept every night at Dorchester and Watertown. About five weeks afterwards, (May 18th), Daniel Abbott was "fined 5s. for refusing to watch, and for other ill behavior showed towards Captain Patrick." As Captain Patrick belonged to Watertown, and as no watch was ordered to be kept at New Town, there can be little doubt but that Daniel Abbott was one of the first settlers of Watertown. He may have settled within the limits afterwards assigned to New Town [see Lockwood, page 854]. His fine was remitted Sept. 8, 1638; and the Colonial Records (June 4, 1639) say, "Daniel Abbott is departed to New Providence."

Edmund Angier, a freeman 1640, proprietor of three acres, east of Mount Auburn, in 1644, but probably never a resident of Watertown.

Thomas Arnold, embarked from England in 1635; a freeman in 1640; grantee of eight lots and purchaser of one lot; moved to Providence about 1665; two homesteads Orchard Street, near Lexington Street.

John Bachelor grantee of six lots, some, if not all, of the first were purchased of Norcross. He probably moved to Dedham in 1637; a freeman in 1640.

John Ball (?)—On the list of Winthrop [II page 340], supposed to be the names of those intending to come over in 1630, is the name of "Mr. Ball." If this was the John Ball, of Concord, he may have arrived before Concord was granted; settled first in Watertown, and moved to Concord, in 1635, prior to the date of the earliest list of proprietors of Watertown.

William Barsham, embarked from England, 1630; freeman, 1637; grantee of five lots, and purchaser of one lot; died 1684. His homestead was west of Mount Auburn, between Cambridge Road and Bank Lane.

Michael Bainslow, of Charlestown, 1635; a selectman; probably moved to Watertown 1637 or 1638; freeman, 1636; not a grantee, but a proprietor of eight lots; died 1674. His homestead of fourteen acres, probably on the southwest corner of Belmont and School Streets.

Joseph Bemis, selectman of Watertown, 1640; died 1684; grantee of a farm and of a meadow at Nonesuch; purchaser of seven other lots. His homestead of twelve acres, on the south side of Warren Street, was made up of two lots in the town plot, granted to Simon Stone and J. Firmin.

John Benjamin, embarked from England, 1632; a freeman, 1632; first of Cambridge, afterwards Watertown, where he died 1645. The circumstance that his name is not in any list of grantees renders it

probable that he did not move to Watertown before 1637 or 1638. His homestead of sixty acres was situated east of Dorchester Field, and bounded south by Charles River. He had three other large lots, grants to Robert Feake.

Robert Betts ("Best," "Beast"), a grantee in the Great Dividends and in the Beaver Brook plowlands; an original grantee of Sudbury, where he died 1655, *s. p.*, bequeathing his estate to his brother-in-law, William Hunt, and other relatives of this name.

John Biscoe, selectman; freeman, 1650; died 1690; grantee of twenty-seven acres in lieu of township; proprietor of at least fourteen other lots, amounting to 509 acres. From the number and value of his possessions, in 1642-44, he then being only twenty-one or twenty-two years of age, it seems probable that the lands were held in his name for his father, Nathaniel, the "rich tanner." His homestead was at the northwest corner of Belmont and Common Streets, bounded north by the homestead and meadow granted to John Lawrence.

Elder Richard Browne, left England, 1630; freeman, 1631; a selectman in 1635, '38, '39, '41 and 42; a grantee of thirteen lots in the town, besides 200 acres granted by the Court out of town. In 1642 he had disposed of not less than seven of these grants. His homestead was on the south side of Mt. Auburn Street, probably a short distance west of the Old Graveyard, with the three-acre lot of J. Prescott between his and the street. It is probable that this was his second residence. He had a seven-acre lot on the east of Mount Auburn, bounded south by Bank Lane. Between this and the river he had two and one-half acres of marsh. He sold these to R. Wellington. It is probable that he first settled there, and that it was while he lived there that he was licensed to keep a ferry.

So far as these names go, taken in order, but with the omission of many others, we have a specimen of Bond's manner of treating the whole list of settlers. Many significant facts are mentioned which suggest much to the student of early Watertown history. To the casual reader it must seem little more than a catalogue, as it professes only to be.

Following are a few interesting names and events culled from the remainder of the list:

Ensign Thomas Cakebread: freeman 1635, grantee of seven lots, which he sold to John Grant; an early grantee of Dedham; went thence to Sudbury, where he died 1644.

Elder Thomas Carter, left England 1635; a freeman in 1637; died in Woburn in 1684; grantee of a homestead of ten acres, also had a farm of ninety-two acres and a lot in the town plot.

Thomas Coker, left England 1637, grantee of sixty acres in the Great Dividends; also thirteen acres homestead sold to W. Paine. The above grant implies that he did not move to Connecticut until after July, 1636.

Wm. Clarke, left England 1630; a freeman 1631; constable of Watertown, 1632; went to Ipswich in 1633.

John Coolidge, freeman 1636; a selectman thirteen different times between 1638 and 1682; died 1691, aged eighty-six; grantee of nine lots; purchased two other lots before 1644.

Henry Cuttris (Curtis), grantee of five lots and purchaser of two lots. His homestead of sixteen acres was east of Dorchester Field. He moved to Sudbury.

Gov. Thomas Dudley purchased the mill in Watertown in April, 1640, and his lands are mentioned as boundaries; but his name is not on the list of proprietors.

Simon Eire, surgeon (surgeon), embarked at London, 1635; a freeman, 1637; a selectman, 1636-43; town clerk and clerk of writs for several years; moved to Boston in 1645; died 1658; was a grantee of twelve lots amounting to 350 acres; had purchased four other lots, one of which was his homestead of sixteen acres west of the pond and next the Cambridge line.

Robert Feake, came in 1630; freeman 1631; a son-in-law of Gov. Winthrop; a selectman in 1636, '38-39; homestead on Bank Lane.

Samuel Freeman, applied to be admitted freeman in 1630; admitted in 1639.

Edward Garfield, freeman 1635; died 1672; a grantee of eight lots before 1644; selectman in 1637, '55, '62.

Elder Edward How, freeman 1634; died 1644; was a selectman 1636, '38, '40-42; grantor of fifteen lots, and purchaser of seven lots before '44. [Probably with Governor Cradock through his agents and under the direction of the engineer, Thomas Graves, who came over at the expense one-half of the Massachusetts Bay Company, and one-half at the expense of Governor Cradock, built the mill, the "water-mill," and probably the dam.]

Thomas King, came 1634; pioneer of the first planting of Nashaway (Lancaster).

John Knight, freeman 1636; grantee and purchaser of 392 acres.

John Lawrence, freeman 1637; of Groton 1662; died 1666; grantee of ten lots; who sold, when he moved to Groton, his homestead to Bisco.

Capt. Hugh Mason, embarked at Ipswich 1634; freeman 1635; died 1678; grantee of six lots, purchaser of two lots; a selectman twenty-eight times in forty, and town clerk many years.

Thomas Mayhew, freeman 1634; went to Martha's Vineyard about 1644; six large grants by the town; a selectman 1636-42; [purchaser of the "mill" from How & Cradock, whose sons served as missionary teachers to the Indians of Martha's Vineyard.]

John Oldham, arrived in Plymouth in 1623; freeman 1631; went to Wethersfield; killed by the Indians at Block Island July, 1636, which murder led to the Pequot War.

Capt. Daniel Patrick, freeman 1631; killed at Stamford 1643; selectman and captain of train band.

Rev. George Phillips, 1630; freeman 1631; died July, 1644; grantee of eight lots, purchaser of one. Probably resided always on his lot next homestall of Sir Richard Saltonstall, at the east of Mount Auburn.

John Prescott, 1641; freeman 1660; a first settler of Lancaster; a grantee of a farm of ninety acres; purchased five other lots.

Sir Richard Saltonstall, founder of the town 1630; returned to England 1631; grantee of about 558 acres, which passed to his sons Samuel and Henry. Robert probably settled in Boston 1642, where he died 1650.

William Shattuck, of Watertown, 1642; died 1672, aged fifty. In 1644 he was the proprietor of two small lots on the east border of Piquisset Common, (Waverly).

Capt. John Sherman, 1634, came from England; a freeman in 1637; died 1691; selectman and town clerk many years, 1636 to 1682; had three grants of over 190 acres, purchased ten lots, had homestall on both sides of Bowman's Lane (Common Street), immediately south of Strawberry (School-house or Meeting-house) Hill.

Rev. John Sherman, 1634; dismissed to Wethersfield, 1635; went to Milford 1641; dismissed then to Watertown 1647; freeman 1669; died 1685. Supposed to have lived on the east side of Grove Street, on the forty acre meeting-house lot between Mount Auburn and Belmont Streets.

Isaac Sterne (Stearns), came 1630; freeman 1630; died 1671; was a selectman 1659, '70, '71.

Having given so many names from this catalogue, which abundantly illustrate the character of the catalogue, the variety of lots owned by most in different parts of the town,—illustrations of the fact that Watertown furnished settlers for many other towns,—we have done as much as we have space for in this place and have shown how indispensable the list, and especially the full genealogies of Dr. Bond, are to any student of the history of Watertown, I might say of almost any local history.

FREEMEN.—I cannot do better, perhaps, than give Dr. Bond's list of the freemen of Watertown, admitted previous to the union of the Colonies of Plymouth and Massachusetts Bay, with the date of their admission. To become a freeman it was necessary to be a church-member, and so it happened that men in respectable social positions were not admitted till advanced age, or never admitted. It was not necessary, however, to be a freeman, or even a church-member, in order to hold office in the town, or appointments from the Court, although the rule allowed none but freemen to hold office or vote for rulers. This rule was so far modified, in 1664, that individuals might be made freemen who could produce certificates from some clergyman that they were correct in doctrine and conduct.

Bond gives some exceptions to the rule. Thomas

Mayhew held a responsible appointment from the Governor and Assistants two years before he was admitted freeman. Joseph Bemis and Thomas Flagg were never admitted, although they were both selectmen and held other offices. John Bigelow, Sr., took the oath of fidelity in 1652, but he was not admitted freeman until April, 1690, at the age of seventy-three. William Bond was admitted freeman in 1682, more than twenty years after he had been selectman, juror, constable, and likewise town clerk, and only a short time before he was elected magistrate.

Some of the settlers and proprietors, or natives of Watertown, were admitted freemen after they had removed to other towns. This mark (?) is prefixed to the names of freemen who were early proprietors, where there is an uncertainty or improbability as to their having ever been residents.

Every freeman was obliged to take the freeman's oath: "I, A. B., being by God's providence an inhabitant and freemen within the jurisdiction of this Commonwealth, do freely acknowledge myself to be subject to the government thereof, and, therefore, do hereby swear, by the great and dreadful name of the everlasting God, that I will be true and faithful," etc. etc.

LIST OF FREEMEN OF WATERTOWN, 1630-90.

1631, May,	George Phillips	Nathaniel Foote
	Richard Brown	Robert Reynolds
	Capt. Daniel Patrick	1635, Mar., Hugh Mason
	Sgt. John Strickland	George Munning
	John Oldham	Edward Dix
	Edmund Lockwood	Thomas Bartlett
	John Page	1635, Mar., John Prince
	John Doggett	John Wolcott
	Ephraim Child	May Barnabas Wines
	Robert Seeley	John Reynolds
	Wm. Clarke	Henry Bright
	Robert Feake	Thomas Hastings
	Samuel Hozer	John Livermore
	Charles Chadwick	John Batchelor
	Jonas Weede	John Tompson
	R. Saltonstall, Jr.	John Gay
	William Jennison	Richard Kemball
	Daniel Abbott	Daniel Morse
	John Warren	Edward Garfield
	Daniel Finch	1635, Sept., Richard Woodward
	John Masters	1636, Mar., Nicholas Jacob
	Isaac Sterne	John Whitney
	John Firman	William Swain
	John Gosse	John Kingsbury
	Francis Smith	Michael Barstow
1632, Mar.,	Abraham Browne	1636, May, John Knight
1632, Nov.,	John Benjamin	William Hammond
1633, Mar.,	John White	Nathaniel Miles, [Lives]
1634, May,	Thomas Cakebread	Edward Goffe
	Edward How	Edmund Lewis
	John Hayward	John Stowers
	Andrew Ward	John Smith (? Jr.)
	Thomas Mayhew	John Eaton
1634, Sept.,	Bryan Pendleton	Edmund Sherman
	Anthony Perce	John Collidge
	John Bernard	Gregory Stone
	Martin Underwood	Simon Stone
	(?) Samuel Smith	John Loveran
	John Browne	(?) William Wilcocks
	John Eddy	(?) Edward White
	Robert Abbot	Thomas Brooks
	Robert Coo	1637, Mar., Abraham Shaw

freemen, that two Hundred Acres of upland next to the Mill shall be reserved as most convenient to make a Township." There were also other reservations.

The Court of Assistants also made a few grants within these bounds—these certainly: First, "In November, 1632, the Court granted to George Phillips, thirty acres of land up Charles river, on the South side," etc., probably meadow opposite the United States Arsenal. Second, "On the first of April, 1634, the Court granted Mr. John Oldham five hundred acres lying near Mt. Feake, on the North-west of Charles river." This was before the western boundary was settled, and before the freemen had made any grants besides "the small lots." Third, March 3, 1635-36, the Court "agreed that Sir Richard Saltonstall shall have one hundred acres of meadow." This lot is described as remote meadow, bounded with the farm land. This lay near the farm of two hundred acres and the one hundred acre lot in the Great Dividends, both granted soon after by the town. Bond says that these three grants appear as the only ones made by the Court within the limits of the town, and none was thus made after the western boundary was determined.

The homesteads and home-lots assigned to the first planters comprised from one to sixteen acres, seldom more; probably, as is seen by the list in the town lot, averaging about six acres. Where much larger homesteads are found, especially later, it is where certain persons were able to purchase the lots of several others. In some cases the persons to whom lots were assigned in the quite equal division,—although it was understood and agreed before the colonists came that the amount of land received by each should be determined by the amount of money each adventured,—were servants to others, and doubtless many preferred to retain this relation to their neighbors and so parted with their lots for a consideration. In the map of 1720, now preserved in the State archives, a copy of which we should be glad to exhibit, the location of 150 houses is given, very few being given where the group of houses must have been made at first, in what was known as "the town," near the landing; and compact groups of houses in the lot set aside for the town just west of Lexington Street, where very few houses are found to-day; while over beyond Beaver Brook, next to the northern limit of the town, were clustered about twenty houses, forming quite a compact village. Not more than twenty-five houses were then to be found in what is now the entire village of Watertown. As the change has gone on in the industries of the town, from agriculture to manufactures, there has been a gradual withdrawal of the smaller houses and absorption of the smaller lots by the larger holders and a concentration of interests about the manufactories, which now so largely predominate in importance.

THE GREAT DIVIDENDS.—The first division of lands after the small lots, few of which exceeded sixteen acres, generally one to five or six acres, was

recorded in the old town book, and is dated July 26, 1636.

This list contains 120 names, all the townsmen then inhabiting. It is headed with these words:

"The grant of the Great Dividends [allotted] to the freemen, to all the townsmen then inhabiting, being 120 in number. The land being divided into four divisions, every division being 160 rods in breadth, beginning next to the small lots, and bounded with Cambridge line on the North side, and with the plowlands on the South, to be laid out successively one after another (all the meadows and cartways excepted) for them to enclose or feed in common."

This record is in the first original book of records of the town, preserved as well as may be, but fast going to decay. Much of the paper is worn away, is much discolored, but the hand-writing is still clear and distinct, written in a very regular, almost print-like hand.

Bond, in speaking of this list, says that "These four divisions were sometimes called the Squadrons, and the lines dividing them, the squadron lines." These divisions are said "to begin next to the small lots," but it is difficult to determine this line exactly. Pequotet Meadow is described as bounded on the north by the Cambridge line, and on the west by the Great Dividends. It is conjectured that the Dividends began not far from the present boundary between Watertown and Waltham, and that for some distance these were bounded by the road (now Warren Street), which was the western boundary of the town plot.

The first Great Dividend, beginning next the small lots at the east, was bounded on the south by the Beaver Brook Plowlands, as follows:

[These are taken from the original lists, or certified copies, in the town archives.]

Lot	Acres	Lot	Acres
1 John Goodidge	39	17 John Kingsbury	40

And so on to No. 36, when the records are illegible to No. 77, the number 110 being the last in the list with name, George Phillips being included with 30 acres.

In April 9, 1638, "A division of land at ye Townplatt:

"NUMBER 40—George Phillips, 12 acres; Robert Fike, 9 acres; Richard Browne, 9 acres; Daniel Patrick, 9 acres."

On the same date another list is given, in which thirty-six names (persons) are assigned 6 acres each in the town-plot, except that one, Edward Howe, is granted 9 acres, and five others 3 or 4 acres each. They are—

Winifred Walcott, 6 acres; John Firmin, 6a.; Samuel Hosier, 6a.; Simon Stone, 6a.; John Smith, Jr., 6a.; Simon Eire, 6a.; Edmund James, 6a.; John Doggett, 6a.; Nicholas Busby, 6a.; Richard Beers, 6a.; John Coolidge, 6a.; Edmund Lewis, 6a.; John Stowers, 6a.; Barnaby Winses, 6a.; Hugh Mason, 6a.; Francis Ouge, 6a.; Samuel Freeman, 6a.; Henry Bright, Jr., 6a.; John Nicarsen, 6a.; David Fiske,

6a.; Henry Dow, 6a.; Gregory Taylor, 6a.; John Tomson, 6a.; Thomas Hastings, 6a.; Daniel Pers, 6a.; Charles Chaddwick, 6a.; Edward How, 9a.; John Eaton, 3a.; John Smith, Jr., 3a.; Isaac Mixer, 6a.; Edmund Blois, 6a.; John Baker, 3a.; Abram Browne, 6a.; William Potter, 4a.; Thomas Filbrick, 3a. Thomas Carter, -a.

If one acre is allowed Carter, there would be allotted 200 acres reserved for a township, the 39 acres above being in addition, probably extra, or outside of this allotment.

In 1642, 3d month, 10th day, it was ordered that "all the Townsmen that had not Farms laid out formerly, shall take them by ten in a division, and to cast lots for the several divisions; allowing 13 acres of upland to every head of persons and cattle."

These names are not entirely legible in the town records, but Dr. Bond copied them from the files of the County Court. The lots range from thirty-four acres (the smallest farm) to 287 (the largest farm—to John Bernard), and comprise in all ninety-two farms of an aggregate of 7674 acres. This copy was taken from the town-book before it was worn out, and signed by John Sherman.

The Proprietors' book, giving the grants, apparently, to 1644, and signed by Simon Eire, Michael Bairstow, Thomas Bartlett, William Jennison, John Bernard, Richard Beers, John Sherman.

"FROM THE PROPRIETORS' BOOK. This Book belongs to The Proprietors of the Common and undivided Land in Watertown."

The following are from the "List of Proprietors," with a numbered list of lots assigned to each, with a description and the bounds of each. We give a few specimen pages only. For example, the first is:

SIR RICHARD SALTONSTALL.

1. An homstall of sixteen acres, by estimation, bounded the northeast with Thomas Brigan and Robert Kois, the southeast with the River, the southwest with the highway & the northwest with George Phillips, granted to him.
2. Lower acres of upland, by estimation, bounded the northwest with George Phillips, the south with Isaac Hart, and the east with Joseph Cooke, granted to him.
3. Twenty acres upland, by estimation, bounded the southeast with the highway, Southwest with Pequusset meadow, the northwest with William Hammond and Thomas Boyden, granted to him.
4. One hundred acres of remote meadow, by estimation, bounded with the Farm land granted to him.
5. One hundred acres of upland, by estimation, being a great Divident adjoining to his meadow, and bounded with the farm and land granted to him.
6. Two hundred acres of upland, by estimation, adjoining to his great Divident & bounded with the farm land granted to him.
7. Twenty acres of Plowland, by estimation, bounded the south with Edward How, the north with the highway, the west with John Whitney, and the east with John Knights, granted to him.
8. Ten acres of meadow in Plaine meadow, by estimation, bounded the east with the Brook, the west with William Pains, the north with the highway & the south with common land, granted to him.
9. Thirty acres of Remote meadow, by estimation, bounded with ye great Dividents, and the seventy and lot granted to him.
10. Thirty acres of plowland, by estimation, in the hither Plaine, bounded the south with the River, the north with the highway, the east with Simon Eire and the west with John Traine, granted to him.
11. Twenty-eight acres and a half of upland, by estimation, beyond the further Plaine, and the thirty-nine lot granted to him.

GEORGE PHILLIPS.

1. An homstall of twelve acres, by estimation, bounded the east with Thomas Arnold, the west and north with the highway, and the south with Edward How, granted to him.
2. Seven acres of upland, by estimation, bounded the north with Cambridge line, the south with Samuel Saltonstall, and the west with Isaac Hart, granted to him.
3. An homstall of five acres, by estimation, bounded the southwest and northwest with the highway, and the east with a drift way, granted to him.
4. Forty acres of Plowland, by estimation, in the hither Plaine, bounded the east with Edward How, the west with the drift way, the north with the highway & ye south with the way betwixt ye lots granted to him.
5. Thirty acres of Remote meadow, by estimation, bounded with ye farm land and ye ninety-third lot granted to him.
6. Eight acres of upland, by estimation, being a great divident in the second Division & the twenty-eight lot granted to him.
7. Fifteen acres of upland, by estimation, upon ye meeting-house common, granted to him.
8. Thirty acres of meadow, by estimation, bounded ye west with ye River, the southeast with Cambridge line, granted to him.

EDWARD HOW.

[The first resident owner of the "Mill," probably with Mathew Craddock, the builder.]

1. An homstall of twenty acres
2. Nine acres of upland.
3. Twelve acres of upland, in the hither plaine.
4. Seventy acres of upland, a great divident, in 3d division
5. Thirty acres of upland, in further Plaine.
6. Fifteen acres of plowland, in the further Plaine.
7. Six acres of Remote meadow.
8. Eighteen acres of Remote meadow.
9. Ten acres of upland.
10. Five acres of upland.
11. Two acres of meadow.
12. Twelve acres of upland in the hither Plaine.
13. Six acres of meadow, next his own.
14. Eight acres of meadow in Plaine meadow.

ROBERT FERE.

1. A homstall of 14 acres.
2. 15 acres of upland.
3. 6 acres of marsh.
4. 80 acres of upland.
5. Twenty fewer acres of Plowlands.
6. 40 acres of remote meadow lying beyond Stoney Brook.
7. 9 acres of upland.
8. 6 acres of upland.
9. 6 acres of meadow in Plaine meadow.

WILLIAM JENNISON.

1. An homstall of 50 acres.
2. Three acres of meadow.
3. Six acres of upland with a pond.
4. Sixteen acres & half of upland beyond the further plaine.
5. Fewer acres of meadow at Bever brook.
6. Six acres of upland in Dorchester field.
7. Eight acres of upland.
8. Ten acres of Remote meadow.
9. Sixty acres of upland.
10. Ten acres of Plowland in the hither plaine.

RICHARD BROWNE.

1. An homstall of twelve acres.
2. 3 acres of meadow.
3. 9 acres of plowland in the further plaine.
4. 9 acres of Remote meadow.
5. 12 acres of Remote meadow lying next the turn of the river.
6. 15 acres of upland upon the meeting-house Common.
7. 12 acres of upland.
8. 9 acres of upland in the town plott.
9. 7 acres of upland.
10. 2½ acres of marsh.
11. 50 acres of upland.
12. 3 acres of marsh.

These are enough to show the kind of records that were kept, and to show how valuable it would be to historical students to have the entire book published with the other records of the town. The bounds are given here only with the first two lists. From the full lists it might be possible to reconstruct the full map of the town, and to show to the eye the possessions of each proprietor.

Meanwhile it suggests the necessity of consulting, for certain purposes, the records themselves.

TOWN GOVERNMENT AND RELATION TO THE LEGISLATURE.—Dr. Bond has shown how weak the town stood after the departure of Sir Richard Saltonstall to England, in 1631, in all civil affairs, and, by inference, accounts for the insignificant part assigned to Watertown when we consider her wealth and numbers, except that of bearing her full share of taxes. Nothing has been said concerning the relations existing between Sir Richard himself and Dudley or Winthrop and the rest, but doubtless the town was as well served by Sir Richard in England as it could have been by him here without an open rupture.

As it was, all was smooth on the surface, although he was lined by his associates, at least, on two occasions, insignificant amounts, which many years afterwards were remitted, not having been paid. Little is said of the large sums due him for money advanced, nothing of the great sacrifices he must have made in disposing of his large estates in order to come here with nearly all his family. We do not care to try to read between the lines any causes of disagreement between the somewhat narrow Dudley, ready for a contest, who sat down so near Sir Richard's choice of lands, with his attempt to force even the Governor to build the capital city where there were not the best conditions for a capital, or to draw the theological line more taut than it had been drawn on them, even before they left their homes; for Sir Richard Saltonstall, every inch a noble as he was, preferred to retire, with most of his family, from the undertaking, rather than disturb the general peace, and though he afterwards wrote a protest to Mr. Cotton and Mr. Wilson against the spirit of religious persecution which he had seen some signs of before he left the Colony.

At all events, the spirit shown by Parson Phillips and Elder Brown, and others, his chosen associates, resulted, as has been shown by Mr. Savage in a great gain in the struggle for entire freedom of opinion and larger local powers in government.

Names of magistrates, selectmen and representatives are given in full in Dr. Bond's indispensable work, to a certain time in the present century.

Below we continue the lists to the present time.

MEMBERS ELECTED TO THE GENERAL COURT OF MASSACHUSETTS.—*Continued from the list of Dr. Bond.*
—These were elected on the November of the year set opposite their names, to serve for the year ensuing.

When no year is given no representative was then elected:

1840.	Greenville T. Wentthrop.	1864.	F. M. Stone.
1841.	Thomas Livermore.		Edward Bangs.
1848-49.	John H. Richardson.	1865.	Emory W. Lane.
1850-51.	Seth Eaton.		Jesse A. Locke.
1854.	George Frazer.	1866-67.	Henry M. Clarke.
1855.	Levi Thaxter.	1869-70.	A. L. Richards.
1856.	Joseph B. Keyes.	1871.	Geo. W. Ware.
1857.	Thomas L. French.	1872.	Henderson J. Edwards.
	James C. Moore.	1873.	Samuel S. Gleason.
1858.	Josiah Rutter.	1874.	Rev. F. G. Morris.
	Joseph Crafts.	1875-76.	Edward Whitney.
1859.	Joseph Crafts.	1877.	Robert L. Davis.
	F. M. Stone.	1878-79.	W. H. Ingraham.
1860.	Daniel French.	1880.	J. V. Fletcher.
	F. M. Stone.	1881.	Samuel Walker.
1861.	F. M. Stone.	1882.	Daniel Butler.
	Josiah Bond.	1883.	Francis E. Whitcomb.
1862.	F. M. Stone.	1884-85.	J. Varnum Fletcher.
	W. H. Ingraham.	1886.	Jonathan Bigelow.
1863.	F. M. Stone.	1887-88.	Charles Q. Pierce.
	John R. Stickney.	1888.	J. Henry Fletcher.

SELECTMEN AND TOWN CLERKS OF WATERTOWN FROM THE YEAR 1809-1890.
(Supplementing the list of Dr. Bond.)

Amos Bond, 1809-10.	Newell Brown, 1842-43, '44-45.
Thomas Clark, 1809-16, '20-22.	Dennis P. Hooker, 1842, '47, '51-52.
Joseph Bright, 1809-15.	Abraham Lincoln, 1843, '47.
Edward Lowd, 1809-10.	Thomas L. French, 1843, '45-46, '50, '53, '56-57, '59, '66-67, '70, '72.
Jonas White, 1810-15.	Sylvester Priest, 1843.
Nathl. R. Whitney, T. C. 1809-12.	Thomas Livermore, 1844-46, '57-59.
Nathl. R. Whitney, 1811-12, '17.	William A. White, 1846, '48.
Nathl. Bemis, 1811-12.	William White, 1860.
Gilbert Nichols, T. C. 1813-16, '20, '27-29.	Royal Gilkey, 1848, '53-54.
Daniel Bond, 1813-16, '18-20, '22.	Leonard Whitney, 1848.
Enoch Wiswall, 1813-14.	Seth Bemis, Jr., 1849-52, '59.
Gilbert Nichols, 1815-16, '23, '25-26.	John H. Richardson, 1849.
Moses Cheney, 1816, '18, '22-23.	William H. Ingraham, T. C. 1849-54, 1880-81.
William White, 1816.	Leonard Stone, 1851-52.
Nathl. R. Whitney, Jr., T. C. 1817-19, '23.	Marshall Hingham, 1853-55.
Luke Bemis, 1817, '19, '21-22.	James Brown, 1854.
Amos Livermore, Jr., 1817, '19.	J. Hittenger, 1855.
Marshall B. Spring, 1817.	Edward Bangs, 1855-56, '60.
Jonathan Stone, 1817.	Joshua G. Gooch, 1856-58, '62, '64-66.
Peter Clark, 1818, '24.	Henry Derby, 1858.
Levi Thaxter, 1818-21, '27-28, '31-34, '43.	Jeremiah Russell, 1860-61.
Charles Whitney, 1818-20.	Francis Kendall, 1860-61, '80.
John Fowle, 1820.	Nathaniel Whiting, 1862.
William Whitney, T. C. 1821-22.	Geo. H. Sleeper, 1862-63, '90.
Joshua Coolidge, Jr., 1821-26.	George W. H. H., 1862-63.
Joshua Coolidge, Jr., 1859-61, '63.	Geo. B. Willbur, 1864-65.
Abijah White, 1823-24.	Thomas N. Hooper, 1864-65.
Amos Livermore, 1823-26.	Geo. L. Noyes, T. C. 1864-65.
John Clark, T. C. 1824-26; Sel. 1829-30.	John K. Stickney, 1866-72.
James Robbins, 1824.	Joel Barnard, T. C. 1866.
Walter Hamwell, 1827.	Joseph Crafts, T. C. 1867-76, died in 1876.
John Hunting, 1827-28.	Luke Perkins, 1867-68.
Edward Stone, 1828-31.	Samuel S. Gleason, 1869, '73-74.
Charles Eaton, 1830-31.	Oliver Shaw, selectman from 1870-84, inclusive.
William May, 1829-30.	Lyman P. Gerould, 1871, '73.
Isaac Robbins, T. C. 1830-49.	Hayes W. Macurdy, 1872-76.
Josiah Bright, 1831-34, '45, '47.	George N. March, 1872-74.
Isaac Robbins, Sel. 1835, '68-69.	Nathaniel C. Singer, 1874-76.
David Stone, 1835-36.	William H. Ingraham, 1875-76, '90.
Benjamin F. Farrar, 1835-37.	Ward M. Otis, 1875-76.
George Robbins, 1836-39, '42.	Tilden G. Abbott, T. C. 1876-80.
John Coolidge, 1837-41.	James W. Magoe, 1877-78, '81-84.
Luke Robinson, 1838-41.	
Andrew Cole, 1840-41, '43.	

Samuel Walker, 1877-79.
Jeremiah J. Sullivan, 1880-84.
Charles Brigham, 1885-88.
James F. Lynch, 1888-86.
Julius R. Hartwell, 1885.
Charles W. Stone, 1886.

Edward F. Porter, 1887-89.
Hiram D. Skinner, 1887-89.
Horace W. Otis, 1889.
Frederick E. Critchett, T. C. 1890.
Abraham L. Richards, 1884, '90.

T. C., Town Clerk.

Dates above are dates of selectmen.

SCHOOLS.¹—It is not certain how soon after the settlement of Watertown in 1630, provisions were made for the education of her youth, but the earliest recorded date of a school-house is September 17, 1649. This was a small, one-storied building situated on Strawberry Hill, which afterwards bore the name of School-House Hill, now thought to be identical with Meeting-House Hill. The first record of a school-master is November 7, 1649, when the selectmen ordered that "David Mechell of Stamford, Conn., be certified of the town's desire for him to keep school."

The next teacher was Richard Norcross, who served the town from 1651 to 1675, and, between that date and 1700, was recalled several times.

As the exact words of the records will give a better idea of the nature of the school and the instruction given, than a summary, a few of the votes are quoted.

In 1650, "It was voted and agreed upon that Mr. Richard Norcross was chosen schoole-master for the teaching of children to reed and write, and soe much of Latin according to an order of Court as also if any of the sd. Towne, have any maidens that have a desire to learn to write, that the sd. Richard should attend them for the learning of them, as also that he teach such as desire to cast acmpt and that the Towne did promise to allow the said Richard for his imployment thirty pounds for this yeare."

In 1651, "It was voted that Mr. Richard Norcross shall attend the keeping of a scoole within the bounds of Watertown, where the Towne shall appoynt. That he shall use his best Indeavors to instruct all such psons as shall be sent unto him, in English writing or Latten, according to the Capassity of the psons; and that it is in the Liberty of any inhabitant to send his Sonnes or Servant for a weeke or two and to take them away agayne at his pleasure. And therefore the sayd Mr. Norcross is to keep a strict account of the number of weekes that every one doth continew, and that every pson that learneth English only, shall pay 3d. a weeke, and such as write or Latin shall pay 4d.; and that Mr. Norcross is to give notice to the pertickler parents of their just due, according to this order—and if any pson shall neglect to bring unto his house his full due by the 29th of the 8th month in (52) that then he shall bring the names and the sum of their debt unto the 7 men who are hereby required to take some speedy course to bring him to his due; and for the other halfe yeares pay he is to take the same course and what the

pttickelers doe want of the full some of 30 pounds the Towne dooth hearby ingage to make a supply."

In 1670 "It was agreed that the selectmen should goe through the towne in their severall quarters to make tryall whether children and servants be educat-ed in learninge to reade the English tongue, and in the knowledge of their capital laws according to the law of the country, also that they be educated in some othadox catacise."

The result of this investigation seems to be contained in the following statement, 1674. "Thomas Fleg, John Whitney and Joseph Bemus gave in an account of what they had found consarning children's eddication; and John Fisk being found wholly negligent of edducating his children as to reading or catticising, the seleckt men agreeede that Joseph Bemus should warn him in answer for his neglect at the next meeting of the selekt men.

With reference to the daily sessions, the following vote is recorded.

In 1677 "Agreed with Leftenant Shearman to ceep an inglish scoole this yeare, and to begin the 9th of Eaprril at the scoole house, and the Town to alow him twenty pounds in the Town reat that shall be raised in the year 77. And if the Leftenant desireth to lay down this employment at the years end then he shall give the Town a quarter of a yeares warning. And if the Town desireth to change their scoole masters they shall give the like warning. The Selectmen agree also that the said scoole shall be cept from the first of May till the last of August, 8 owers in the day—to wit—to begin at seven in the morning and not to break up until 5 at night, noontime excepted and from the last of August untill the last of October 6 owers in the day; so also in the Munths of March and Aprill and the 4 winttur munths, to begin at tenn of the clock in the morning and continue untill 2 o'clock in the afternoon."

Of the other early masters, Mr. Nathaniel Harrington and Mr. Samuel Coolidge receive the most attention in the records. The former was engaged in 1750 "to keep the Grammar and English School, to begin the second Monday in August, and to keep said school from thence till the last day of March following, except so much time as to take care of getting in his Indian Harvest, and the time he take thereat he to give account of." He was to receive £30 a year and board himself. The latter was engaged at £40 a year, but "was so disorderly as not fit to keep y^e school." Another master was obtained for a short time, then "the major part of the selectmen agreed to try Mr. Samuel Coolidge again in the school, and to pay him according as he should perform." The salary seems not to have been ample, for several statements are made with reference to providing Mr. Coolidge with clothes.

In 1767 is the first mention of lady teachers when it was voted "to have four women's schools for the instruction of children in the remote parts of the

¹ By Miss Ellen Crafts and the editor, Solon, F. Whitney.

Town, the schools to be kept twelve weeks, the dames to provide their rooms or pay the rent, the salary to be forty shillings each."

In striking contrast to the modern methods of heating the school-houses are the following votes for furnishing fuel:

1670—"Thear have ben a complaint by Mr. Norcross that the schooling of children is like to be hindered for want of wood to keep a fire, and for the preventing of such an inconvenience, the school being the Town's, It is ordered by the selectmen, therefore, that the inhabitants that send their children to the school shall send in for every scholar a quarter of a cord of wood, by the fifteen day of this instant December, or 2s. in money to buy wood withal."

In 1701, "Voted that those who send children to school should send one-fourth cord of wood."

In 1747, "Voted that those persons who send their children or servants to school shall supply the school with fire-wood when there is occasion for the same."

In 1748, "Voted that 8 shillings per head be charged for wood."

In 1750, "The selectmen proposed that Mr. Nathaniel Harrington, present school-master, for the support of a fire in the school, he should send to parents and masters that send your children or servants to school, to send six shillings per head to procure wood for said fire."

The first mention of a school committee is in 1766. Henceforward, the school records, previously kept by the selectmen with the other business of the town, belong to that newly-organized body.

The exact location of the early school-houses, from 1649 to 1796, cannot easily be determined. When Watertown included Waltham, Weston, Lincoln and Belmont, the districts must have been large and the school-houses far apart.

As early as 1683 "it was agreed that all those who dwell on the west side of Stony Brook be freed from the school-tax, that they may be the better able to teach among themselves."

In 1796, "Voted an alteration in the school districts. One district to begin at Waltham line, on the great county road, including the inhabitants on both sides of the road until you come to the meeting-house, and all south of that road."

This seems to bring the districts within the present limits of the town.

Voted, also, in this year, "that the money granted for the support of schools be equally divided between the three schools."

These school-houses were in the West, East and Middle Districts. The location of the first is not certain; the second was situated at the junction of School and Belmont Streets; the third was "built on the parsonage land, between the Ministerial House and Thomas Patten's house." This is still standing and is the brick building on Mt. Auburn Street near the Baptist Church. This was, at first, only one story

high, but, in 1816, a vote is recorded that "instead of a new school-house in a separate place, the Town should build an addition to the old school-house by raising the same another story." Among the teachers who taught in the Brick School-house were Abner Forbes, Moses Gill, Nathan Ball, Wm. Henshaw, Gardner Aldrich, Mr. Dustin, John Kelly, Wm. White, George Frost, Leonard Frost and a Mr. Allen. David Packard taught in a little building near it.

The amount appropriated for schools had slowly increased from £30 to \$1200 and, in 1816, \$300 was voted to the East, \$300 to the West, and \$600 to the Middle District, "each district to keep their windows and seats in repair out of their own money." The accommodations of this Middle District were soon outgrown, and, in what proved to be a very unwise way, a small one-story building was erected near the brick school-house, on the southwestern side, for the use of the highest class. In a few years a much larger house was needed, so the present Francis School was built.

In 1847, "Voted that the town do hereby abolish the school-district system and adopt the General system and that a committee be chosen, to consist of three persons from other Towns, to appraise the several school-houses and district property in Town whenever either of the Districts wish to have the Town take the same, and that the Town do hereby agree to take said district property and pay the District the amount of said appraisal."

What private schools there may have been before 1800 can, perhaps, never be known; but, within the memory of the oldest inhabitants, many such schools existed and seemed to suit the needs of all ages of children, and of both sexes.

The schools for little girls made sewing and embroidery a specialty, and sometimes great strictness attended the instruction. But from schools such as these came the fine sewers and menders of half a century ago, when thrifty and useful housewives were the rule.

Miss Ruth Wellington, Miss Catherine Hunt, Miss Eliza Stratton taught schools for little girls.

Miss Martha Robbins, Miss Lydia Maria Francis¹ and Miss Hill taught schools for older girls; and French and drawing were leading features of the instructions.

In April, 1832, Theodore Parker came to Watertown in search of pupils for a private school. He boarded in a house still standing next beyond the

¹ Assistant of Dr. CONVERSE FRANKS, better known later as Mrs. Lydia Maria Child, an author of considerably renown; wrote, 1st, "Hobnobsk, or Boston Story," 2d, "The Rebels, a Tale of the Revolution," then "Devotions Miscellany," "Girls' Own Book," "Mothers' Book," and later "An Appeal in Behalf of that Class of Americans called Africans." In 1841 she became editor of the *National Anti-Slavery Standard*, In 1843-44 two volumes of "Letters from New York."

In 1885 she wrote the "Life of Isaac T. Hopper." Her principal work, to which she gave many years, was the "Progress of Religious Ideas." She lived until 1880.

South District or Parker School. On the premises was a building whose upper story had, only a short time before, been used for a boys' school, taught by a Mr. Wilder, of Brighton. This room Mr. Parker leased, and opened a school with two pupils.¹ The number, however, increased, and kept increasing, until at the end of the year he had thirty-five, and afterwards fifty-four pupils. He kept this school for two years, teaching all the common branches, besides those studies necessary for admission to college. A fuller account of his labors at this time can be found in Weiss's "Life and Correspondence of Theodore Parker."

"In the early part of the year 1822, a number of the families in Watertown who wanted a higher education for their children than the public schools afforded, established a private school for pupils of both sexes, which they called an 'Academy.' They built a school-house and engaged a master. The property was held in shares; the right to send pupils to the school being limited to the share-holders. It was intended that this school should be able to fit boys for college; and so far as the Association could do what was needful, it was an excellent plan. But the course of studies was left altogether with the master; and none of the masters remained long.

"The first one who opened the 'Academy' was a divinity student from the Cambridge Theological School, Warren Burton, of Tilton, N. H., afterwards a Unitarian clergyman, and an author of some little repute. He was unsuccessful. Went away at the end of a year. Meant to do his duty. Did not know how to manage children." (Geo. T. Curtis, one of the children.) Mr. Burton wrote "The Village Choir," and "The District School as it was," the latter of some note. Mr. Kendall, a graduate of Bowdoin College, followed him for a short time; then Joseph H. Abbot for a short time. Mr. Abbot kept afterwards for many years a well-known school for young ladies in Boston. Mr. John Appleton, the fourth master, a good teacher, and a person of superior mind, left before 1824. He was afterward an eminent lawyer, and chief justice in Maine. This academy was built on ground belonging to Mr. James Robbins, situated on the hill near where the Catholic Church now stands, and was in charge of a great variety of teachers; some of them, for instance Mr. Adams, Mr. Townsend, Mr. Samuel Howard, Mr. Winslow Marston Watson (who died in 1889 in the Garfield Hospital at Washington), are remembered by some yet living. The last teacher in this school, Mr. Oliver Wellington, built another "Academy," still standing on Church St., opposite the new Unitarian Building, and occupied as a private house by the family of the late Wm. Sherman. This academy was a flourishing young ladies' school for many years under Mr. Wellington. The first academy building was sold, first to the new

Methodist Society; afterwards it was bought for the Catholic Society.

From the time that the district-school system was abolished, when Watertown possessed three school-houses and raised \$2800 for the schools, the town has so increased in population that, in 1890, there are seven school-houses and a corps of thirty-two teachers, and the town raises over \$25,000 a year for their support.

The abolition of the district-school system in Watertown was strongly advocated by the School Committee of 1849 in an admirable report, which gives the names of all the teachers, with a variety of statistics of use in determining the condition of the schools. The report for 1851 by "The Superintending Committee of the public schools of Watertown" names only one teacher in town, Mr. Littlefield, of the Centre District, who has been well-known in the schools of Charlestown and Somerville.

The report of 1852-53 is a very interesting and suggestive document. The name of the writer is not given, although it must have been one of the three signers, B. A. Edwards, D. T. Huckins and Marshall Kingman. It is true that it was written four years after the last of Horace Mann's twelve annual reports, as secretary of the State Board of Education. It was written when the town was still struggling in the folds of the district system, and without a central high school. It was a patient, noble plea to people who had not yet come to value schools for their children, and after giving four good reasons for establishing a high school, and advising the adoption of the general system in place of the district system, closes with a plea for more money for educational purposes, "believing that, if judiciously applied, it will yield to the town a better percentage by far than banks or railroad stocks." It says of the objection to the High School that "it would cost money;" "It ought to cost money. It is worth money."

In 1853, in April, at an adjourned meeting, the school district system was abolished. The committee previously elected resigned and a new committee was elected. This consisted of Marshall Kingman, Nathaniel Whiting, Joseph Coolidge, Jr., D. T. Huckins, Moses Stone, William Lathrop and Oliver Edwards. "In order to place, if possible, all the schools upon an equality, the tutorship in each was declared vacant, and the vacancies thus made thrown open to competition to all. Three gentlemen and eight ladies were appointed. In October, Mr. William Webster was elected principal of the High School, which opened with fifty-two pupils, the full course of study prepared being for three years.

In 1855 the course of study in the High School was extended through four years, and the future committee was recommended to retain scholars another year in the grammar schools, that the standard of all the schools might be raised one year. In 1856-7, Miss A. L. Pierce was appointed assistant teacher. She was followed

¹ It is said that one of these was a charity pupil.

in 1857-58 by Miss Abby T. Giddings. The town was advised to build another school-house in place of the one in the west part of the town, "located so close to the railroad as not only to endanger the lives of the children while at play, but six or seven times a day the recitations are brought abruptly to a stop by the warnings of the engineer," etc. The appropriations for schools in 1855 had risen to \$6000, or 168 2-5 cents on each \$1000 of valuation of property from \$1700, in 1840, (which was only 116 1-5 cents per \$1000). It is now over \$3 per \$1000. In the various reports of successive committees are found the painful and necessary confessions of the natural results of the condition of schools overcrowded with crude materials,—“resistance to ordinary school influence...usual evil habits of the school...taught with a degree of success equaling that attained by any other school...failure of his health, and his speedy and sudden death,” etc. The picture of faithful work under overwhelming obstacles, often resulting in the physical wreck, sometimes death, of the teacher, leads one having any knowledge of the science of teaching, to wonder if ever the time will come when such sacrifices will not be required or expected. In 1857, the High and Centre Grammar School-house was partially destroyed by fire. In 1858, Mr. Henry Chase was appointed master of the West Grammar School. In 1860, Mr. Joseph Crafts took charge of the Centre Grammar School, having served for the preceding four years on the School Committee. Mr. Webster, after teaching the High School seven years, resigned to take a position in the Boston Latin School, and Henry Chase was transferred from the West Grammar, which position he resigned within a year, and, by unanimous vote of the committee, accepted the mastership of the West Grammar School again. Mr. Geo. R. Dwelley was elected principal of the High School in the spring of 1862. In 1864, Levi W. Russell was made master of the Centre Grammar School, which position he held until 1868, when he was appointed master of the Brigham School, in Providence, R. I., where he with success continues in charge at the present time. In 1866, James M. Sawin was appointed master of the East Grammar School, where he taught two years, since which time he is the master of the Point Street School, of Providence, R. I.

In March, 1866, the committee appointed Solon F. Whitney, then first assistant in the Bridgewater Normal School, principal of the High School, and in September, Miss Mary F. Porter, of one of the Cambridge schools, assistant. Mr. Whitney served until the fall of 1871, when the new committee reinstated Mr. Dwelley in the school. Mr. Whitney was soon appointed a teacher in the Cambridge High School, where he taught nearly fourteen years, although continuing to reside in town. Miss Porter, after three years' very acceptable service, went to the Dorchester High School, and Miss Charlotte E. Wheeler, from the New Bedford High School, took her place. In

1870, Miss Susan Porter was appointed a second assistant, but after winning the confidence of all by her devotion and ability, she, in April, 1871, was obliged from ill health to resign, and Miss Ellen M. Crafts was transferred from a grammar school to fill her place. In October, 1871, Caroline S. Cushing became first assistant, followed in September, 1873, by Alice Worcester.

The High School building was, during the summer and autumn of 1873, remodeled, so that for three months or more the school was kept in the town hall.

In 1874, Mr. Dwelley resigned the second time, and Mr. Groce, of Peabody, was elected master, and in September, 1875, Prof. George I. Dippold, first assistant. Miss Anna M. Gregory had been elected teacher of drawing in all the schools in 1871, and Mr. Henry G. Carey, teacher of music.

In 1877, the committee declared all positions of teachers vacant at the close of the year, and invited all who wished to retain the same “to make application,” with the understanding that those who “should pass an examination, such as the law of the Commonwealth contemplated,” might be appointed. All applied but one. Three did not pass, and the committee were in doubt about eight others.

Mr. Groce, master of the High School, did not apply, and Prof. Selah Howell, of Union College, N. Y., was appointed to the position. Mr. Groce has taught in one of the Boston high schools most of the time since. B. F. Nutting, an artist, long resident in Watertown, was employed in 1878 to teach drawing in the High School. In 1879 Miss Anna M. Gregory was employed at a smaller salary, and she continued to teach with success for several years, until her resignation in 1882. In September, 1877, Miss Ellen M. Crafts was made first assistant. In April, 1878, Miss Lilla Frost was appointed second assistant. She was followed in 1879 by Miss Almira P. Goss, in 1822 by Mr. Elmer E. Wentworth, in 1883, Mr. Sumner Coolidge, in 1884, by Miss Alice G. Patton, and in 1887 by Anton Marquardt, Ph.D. In September, 1888, Wm. K. Norton was appointed teacher of science. He was followed in September, 1889, by Wm. M. Newton.

The present (1890) teachers of the High School are: Geo. R. Dwelley, of Arlington, principal; Ellen M. Crafts, first assistant; Dr. Anton Marquardt, modern languages; Joseph Coolidge, sciences, etc.; Miss Blanch I. George, drawing for part of the time; S. Henry Hadley, music, for part of the time.

In 1881 a superintendent, Mr. John F. Prince, of Waltham, was appointed, who made the position a necessity by the new views of its usefulness, which he exemplified in his treatment of the schools and by his able reports. This position he occupied for three years, until appointed an agent of the State Board of Education, since which time, the master of the High School has been called on to perform the duties of the office.

Watertown was complained of about 1690, to the County Court, for deficiency in schools; in 1696 was fined for not having a school, not being willing to repair the school-house and pay the person asked to teach, the £20 a year which he demanded. Bond gives a long list of Harvard graduates who taught in town for very short periods, the salaries offered being small, and the amount of training received in college probably not much in excess of that given in our high schools of the present time, and probably with no idea of teaching as a science or an art. Young men were willing to teach a short time while preparing for a profession.

Since the days of Horace Mann, more attention has been given to the art of teaching, schools have been vastly improved, and it is hoped that the time may sometime come when all citizens of the town may have such complete confidence in the excellence of her schools that none will feel willing to tax themselves doubly to find better ones outside her limits for their children, or think of helping to support private schools within her borders. To show the character of the schools and the intent of the town to have the best, we can do no better than give a list of the persons who have served on the School Committee of the town since 1849, when the district school system began to be abolished (abolished in 1853):

Rev. Charles K. Colver, 1849.
Horace Bird, 1849.
Rev. J. Augustus Adams, 1849.
Rev. Hasbrouck Davis, 1850.

LIBRARIES.

SOCIAL.—That the early settlers brought books with them when they came, is evident. George Phillips was "a prime scholar," "mighty in interpretation."

His widow gave "to son Samuel all the Latin, Greek and Hebrew books now in the house." Yet we have no record of libraries of any magnitude, or of any collections of books for common use for the first century or more.

In 1779 there was formed, in the east part of the town, near where the first settlement was made in 1630, a social library. It was called, at first, "The Union Library," afterwards the "Union Social Library," of Watertown. The old record-book, still existing—a precious legacy to the present library—begins with the following:

"SUBSCRIPTION.

"We, the subscribers, being desirous of promoting learning, do hereby agree to form ourselves into a society for that purpose, and, as it will be needful for to have a sum of money for to purchase the books for a library, we hereby do agree to pay per share a sum not exceeding three dollars, said money to be paid at the time the society hold their first meeting, and appoint some person or persons to receive it, or a collector that shall be appointed for the purpose of collecting it; said money to be laid out to purchase such books for our use as the Majority of the society shall agree upon; we also agree that when twenty shares shall be subscribed for, that some five of them (the subscribers) shall apply to a justice of the peace for a warrant to warn the first meeting for to choose all officers and making such by-laws for the governing said Library as shall then be thought needful."

The following names were appended in the same handwriting as the above:

Christopher Grant,
Peter Clark,
Joshua Grant,
Joseph Bright,
Amos Livermore, Jr., 3 shares,
Elisha Livermore,
William Stone,
Jonathan Stone,
Leonard Bond,
David Livermore,
Elijah Learned,
Simon Whitney,
Samuel Harrington,
Moses Coolidge, 2 shares,
Thomas Bisco,
Benj. Hastings,
Samuel Solin,
Thomas Clark,
Jonas Bond, 3 sh.,

Daniel Whitney, Jr.,
Francis Bright,
Nathaniel Bright,
James Barnard,
William Cheney,
Moses Cheney,
Elizabeth Bernard,
Samuel Coolidge,
Peter Harrington,
James Simmonds,
Nathaniel R. Whitney,
Jonathan Bird,
Nathaniel Stone,
Joshua Coolidge, with *Jur* added in
different ink.
David Stone,
Abijah Stone,
Josiah Sanderson.

So far the names seem to have been copied in one hand, with the same ink, from same paper. The following may be actual signatures of a later date:

each member pay three shillings to purchase additional books, and that the librarian be paid for his services one shilling a night (or month). Evidently, great confidence was felt in the librarian or other officers, for the directors or society seldom met, except at the annual meeting at Bird's tavern.

At the next annual meeting, called with all the formalities of a regular town-meeting, held January 25, 1802, Moses Coolidge was chosen moderator, Samuel Coolidge, clerk; Thos. Clark, Nathaniel R. Whitney, Nathaniel Stone, David Stone and Thomas Bisco, directors. "Voted, that the money which is not collected may be collected & laid out for such books as shall be thought necessary by the Directors. Voted, that the fines arising for not returning the books at the time, the past year, be appropriated for the covering, with leather, such books as the Directors shall think necessary."

So the records run on with some changes of names, with the annual purchase of books, collection of fines and assessments, and it is fair to believe, for after a few years the name of the library was changed to the Union Social Library, with a good social meeting at Mr. Bird's tavern, with such literary discourse as the batch of new books would naturally suggest.

After awhile, about the time of the last war with England, it was decided to pay the librarian for his services (two dollars) and also the clerk for his, and the only records are of the annual meetings which were then held at the house of Samuel Bellows (the same tavern). In the year 1818, Joshua Coolidge gave his share to Joshua Coolidge, Jr.; Col. Moses Coolidge, still chosen moderator nearly every year, is now made librarian; Joseph Bird is made collector and assistant librarian. The records are very legibly written by Elisha Livermore, clerk.

In 1842, at a legal meeting, the warrant for which was issued by Tyler Bigelow, one of the justices of the peace, a report was received from a committee appointed to report on the state of the library, and proposing a union with the North District, was accepted and entered at length on the records.

As this report was prepared with evident care, partly by men who, twenty-six years afterwards, interested themselves in the Free Public Library, and as it recommended an immediate union with the *North District*, thus endorsing the plan of Horace Mann for furnishing the whole State with good reading in the District School Libraries, we think it of importance not only to the history of the library in this place, but as showing the results of both of these steps—the society library and the district school library—in the gradual development of a system of free public libraries, probably nowhere excelled in the world, and now quite generally patterned after by England.

We therefore make free extracts from the report, which was signed by Charles Stone, Daniel Learned, Joseph Bird, Jr., Thomas Livermore and Joshua

Coolidge, Jr. They report: "That the subject upon mature consideration seems more feasible and likely to produce good results to most of the proprietors and particularly to the district. A large number of the books are valuable, and only want more attention directed to them and also an introduction to a new class of readers to still be permanently useful." They complain that the books are not read; that the neglect of them even seems to increase; give as a reason that not books enough can be bought to keep up the interest; that personal assessments are too apt to be neglected, and the committee deplore the evident result to which all is tending, for several reasons: "First, that this Library, founded by our fathers many years since, should not be destroyed by their children, but continued to our children with increased energy and usefulness. Second, that many of the books could not now be purchased, and which, united with new books, would make a valuable library. Third and more important, that if the library should now be broken up, the taste for reading which is now with us, would lie dormant and perhaps be extinguished, instead of which it needs, by every proper means, encouragement."

The plan of union with the District School Library seems advisable. First, because of the new books added to the library; second, that the "children, as they are plodding through the dull routine of education,"—it must have been a dull routine before the days of Horace Mann,—“will be forming a taste for correct reading, which cannot fail to increase their usefulness in society; and still another reason is that parents also will be able to increase in useful knowledge and thus be better prepared to educate their children. This is no new idea. Many districts in our State already have libraries, one even in our own town. Of so much importance was it deemed by our Legislature, that it was proposed to form one in every District in the State, and it is probable, but for the pecuniary difficulties of the times, it would have been done.” The report goes on to say that the Board of Education have begun to prepare a number of books to be sold as cheap as possible to encourage their adoption. Indeed it would seem that there should be no objection to a plan of this kind if properly managed, and they would hope that every one will see the importance of either aiding the present plan or proposing a better one. They recommend a union with the North District, the library to be called “The North District Union Social Library.” Minute and wise conditions are appended which were substantially adopted.

The remnant of this North District Union Social Library, after thirty-six years more of partial usefulness and natural neglect, came, in 1875, by the hand of Joseph Bird, together with the old and precious record-book, as a gift to the town, to the care of the Free Public Library, the natural successor to such and all other institutions for the education of the people through books.

CIRCULATING LIBRARIES.—Before speaking more explicitly of the experiment mentioned as District School Libraries, attention should be given to the work of *circulating libraries* in the town. Several have existed at different periods, well cared for by their owners, always open to those who were willing to pay the small fee for the daily or weekly use of the books, and furnishing such books as the taste or the selfish interests of their owners dictated. In some cases these books have given an impulse to study, and have laid the foundations of learning.

Such a library was kept by Mrs. Curtis, in the Robbins house, near the Great Bridge. Mrs. Curtis was the daughter of "an intelligent, prominent and much respected citizen of Watertown, Mr. James Robbins, who carried on various branches of manufacturing," and had also a country store. When he died, in 1810, having been less successful in the latter part of his life, and having left a numerous family, with rather scanty means, this daughter, a person of energy and education, not wishing to be dependent upon friends, opened this library as one means of support. Here her two boys, Benjamin Robbins Curtis and George Ticknor Curtis, laid the foundation of their love of books for which the world has since been richer. We may never know how much good was done by that collection for the mass of its readers; but one grateful son has thrown a little light on the subject which is encouraging to those who, from any motives, are trying to bring good books to the attention of those who may be benefited thereby. Of course, "It was chiefly a collection of novels and poetry; and when I name the period during which my mother kept this library, as from about 1818 to 1825, the reader will see that Scott's novels from 'Waverley' to 'Redgauntlet,' and all his principal poems; Byron's works; Southey's 'Thalaba' and 'Roderick'; Irving's 'Sketch-Book,' Bracebridge Hall' and 'Tales of a Traveler;' Cooper's 'Spy,' 'Pioneers' and 'Pilot' and many other books, new at that period, might have been, as in fact they were, included in this collection. The books were much sought for by the surrounding families.

"My aunt's books were not embraced in the circulating library; but she possessed, among others, an excellent edition of Shakespeare—of whose works she was a constant reader—Milton's 'Paradise Lost,' Young's 'Night Thoughts,' Thomson's 'Seasons,' Cowper's 'Poems,' Johnson's 'Rasselas,' Jeremy Taylor's 'Holy Living and Dying,' and the 'Spectator.' I am quite sure that my brother's first knowledge of these authors was derived from her books. In a home so furnished with the lighter and some of the more solid materials of intellectual development, my brother became a great reader at an age when most boys care for nothing but their sports. At first he read novels incessantly,"—this young judge! and why should he not?—"and I can well remember the sorrowful resignation with

which he would surrender a volume of Scott, or Cooper, or Irving, when a call for it came into my mother's little parlor, from the 'shop.' From novel-reading he passed to some of the historical plays of Shakespeare, and afterwards to 'Paradise Lost.'"

George Ticknor Curtis, in thus speaking of his brother's experience, says nothing of his own; but as we know of his great ability in letters, and the fact that he was three years younger in the same circulating library, we are at liberty to draw our own inference.

Many years ago there was a circulating library in the north part of the town, and, until quite recently, there has been quite a prosperous one for many years on Main Street.

THE DISTRICT SCHOOL LIBRARIES planted by Horace Mann in almost every town in the State, have left the evidence of their existence in several districts of this town. A few of the books scattered among the families have come into the Public Library. There are less than a dozen of them from all sources. It were an ungracious task to show why such collections of the wisdom of the ages should have so short a life and be dissipated so soon. The very conditions under which they were located, without permanent responsible care, being in charge of the teacher, who was changed each term, made their usefulness, as collections, of very short duration. Then, we believe, there were some grave difficulties of choice of books among the State authorities; and the conflicting interests of publishers were, in this State, however they may have been managed in other States, very near insuperable.

They gave many a youth, however, a taste which helped in mature life to develop that larger knowledge of books which demands for all, the more permanent public library.

BOOK CLUBS.—Since 1843, soon after Mr. Weiss came to town, there has been a very flourishing *book club*, composed of some of our most appreciative people, who pass their books and periodicals from one to another in some prearranged order. More recently other book and magazine clubs have been formed.

Dr. Francis says, in his historical sketch of Watertown: "In 1829 a Lyceum was established. Connected with the Lyceum is a scientific and miscellaneous library; there are two libraries besides this—one a Religious Library, the other a Juvenile Library." What has become of the Lyceum Library? The second one mentioned is probably what afterwards became the Parish Library, given to the Public Library in 1870 by the First Parish. This gift was an accession of over three hundred volumes, "rich in works of scholarly and devout thinkers."

FREE PUBLIC LIBRARY.—The Free Public Library of Watertown was first opened to the public on the 31st of March, 1869, with 2250 volumes on the shelves, and \$3000 in cash and subscriptions to be expended for books.

By the conditions of the original gift of \$6000 in

money to the town, given by quite a large number of residents and former residents of the town, in the year 1868, the town agreed "to accept the gift to establish a Free Public Library, provide a convenient place to receive it, and make it useful to the citizens. The said Library shall belong to the town, be cared for, and enlarged as circumstances will permit by annual votes of the town, in meeting assembled."

When the first catalogue was published, in March, 1870, the original subscription of \$6000 having been expended and several considerably large contributions of books having been included, there were five thousand (5401) volumes, and nearly two thousand (1956) pamphlets and papers. When the second catalogue was published, in 1881, there were over twelve thousand (12,447) volumes, and nearly twelve thousand (11,830) pamphlets and paper. At present, in 1890, there are about 20,000 volumes and over 25,000 pamphlets and papers. The library is located in a handsome building which, with improvements introduced since its erection, has cost, with the lot on which it stands, about \$45,000.

The town has not in these twenty-two years failed to do its part in preserving, in maintaining, in enlarging, and in making useful this noble trust.

The history of the formation and growth of this library is creditable to the public spirit of the town. It was not, as we have seen, the first attempt in town to make a collection of books for public use; it was the first attempt, as far as we know, to make a collection *for the use of the entire town without expense to any reader.*

The history of this library, perhaps not unlike the history of the public library in many another town, is full of interest. It is creditable to the public spirit, the energy and zealous self-denial of many of its citizens. What they did others can do, so that no town or community, following their example, need be without some kind of a public library. In the first steps, regard was had for what had been accomplished elsewhere, particularly in the neighboring town of Brookline, and in New Bedford.

In the movement for a public library in this town, it was accepted as a fundamental principle that people would pay for what they considered of real worth. That those who had enjoyed peculiar advantages of education, or by wealth had the necessary leisure for reading and acquaintance with books, would naturally know their value. Then, that those who from being associated with these would be influenced by them, would like to appear to prize what the others prized, and help what the others helped. In a word, that if a certain number could be found who knew the value of a library to themselves, and so by inference to a community, who also to their knowledge could add a certain amount of Christian benevolence sufficient to enable them to make a sacrifice of the ownership or immediate possession of books that they called their own, and had themselves enjoyed, or were

willing to transfer the investment of a portion of the funds which stood or might stand in their own name, to the charge of public trustees to be chosen for the purpose, in order that they might be invested in books for the public use; in short, if there could be found a sufficient number of people who could see that the wealth in their possession was something held in trust, and could see that by transferring a portion of their money for this specific purpose of a public store of books, they would more certainly advance the common good by this treasury of learning, to which all alike might go for information, and transfer their care to those to be benefited, and so relieve themselves so far from further care; if, in a word, an appropriate appeal were made to the better educated and more benevolent members of the community, the foundation of a library would be secured. The appeal was made. The result more than established the correctness of the assumption. At each decided step in the direction of greatly increased expense, during the more than twenty years of experimental life of the library, such people have been asked to contribute of their means as an evidence of faith in the value of things asked for, and then the town has been asked to complete the appropriation.

Any community can have a public library if the more intelligent and benevolent will personally from their own means contribute one-half of the cost, and then will assist the rest of the community according to their rates by taxation to bear their share by public appropriation of the other half. The mass of any community can be brought to see that thus they, the principal gainers of the advantages of such an appropriation of funds, and only contributors to a part according to their amount of property, do a good thing for themselves and their town by voting the other half. The mass, I say. Alas! there are some stubborn exceptions to the truth of so natural and obvious an assertion.

The time will come when towns will vote libraries as they do schools, directly. When the experimental, missionary stage of the work has passed, then supplies for libraries will be voted as for roads, for public lighting, for schools, as a matter of necessity. For they will see that by creating a taste for reading among the children, for instance, who, growing up in idleness and vice, would form the criminal classes, they will be merely transferring a part of the expense of police and police courts and jails to other and better forms of restraint. In getting the idle and ignorant into reading-rooms, they are forming habits that will lead to knowledge and thoughtfulness and desire of personal independence and useful employment, and thus so far do away with the necessity of police machinery. The cost of insurance of the safety of property in a community decreases as the common estimate of the desirability and use of a public library becomes more universal. The productive energies of a people are increased by increase of knowledge. The

quency of the skill of a community improves with the improvement of the minds of the workers and with the elevation of their taste and artistic sense. It is not necessary to predict converts to some particular idea or sect as the result of opening to a people the fountains of all knowledge. To one who believes that all knowledge, all truth in its vast ramifications, proceeds from and tends to one vast origin and end, and is a part of the great cosmos, there can be no fear as to the final result of opening all the flood-gates of light for the benefit of the seeker after truth. There will be limitations enough left in the capacity of men, in the willingness of human beings to consider the more desirable forms of truth.

We have indicated in a general way some of the peculiar conditions in this town favorable for the growth of the public library when once planted. The spirit of independence of thought and action, exemplified in its entire history, from the foundation by Sir Richard Saltonstall and George Phillips, and the somewhat broad-minded Deacon Brown, like the light of a vestal lamp has never been allowed to be quite extinguished. In looking over the history written by the successive School Committees, one is almost oppressed, it must be confessed, with the fear of the near approach of some fatal extinguisher of policy or parsimony. But it is only that the selfishness perhaps of those who bore the lamp, or their short-sightedness for the time, allowed the flames to burn low. Again and again the flame rekindles. In the report of 1850 we read "thrift, thrift, Horatio," "it would be easy to show that good schools would pay us in good dollars," although the committee sadly, one would think, and with fear, recommended the raising of \$850 for each of the three school-districts with their total of 500 scholars. Now they cheerfully and confidently ask for \$26,000 for 917 scholars. The committee of 1852, when an additional school-house was imperative, "respectfully suggests the establishment of a High School." In 1856, "If Watertown wishes to grow in numbers and in wealth, let her continue as she is now doing, appropriating liberally for the education of her children."

In 1865, "Mr. Jesse A. Locke proposed a set of prizes for actual improvement in demeanor and scholarship; so that industry, patience and a sense of duty received the stimulus." In 1866, "The committee have determined, by aid of private subscription, to create the nucleus of a High School Library." In 1867, "There has been established a good [High School and Teachers'] library, which contains 276 volumes." "This Teachers' Library is a novelty, and the habit of using it has not yet become general among those whom it is intended to benefit." "The pupils have come to depend upon the library."

The very man who as a boy attended those meetings of the Social Union Library Association in his father's tavern, Mr. Joseph Bird, who afterwards was a

Seated second from right with Horace Mann at West Newton,

and at home was a hearty supporter of the scheme for District School Libraries, the custodian of the Union District Social Library of which we have already spoken, himself an omnivorous reader, obtained the first contributions for a "Teachers' Library," which were so generous as to inspire the hope that with similar effort extended through the town, a fund of sufficient amount could be obtained to make the establishment of a town library—a free public library for the whole town—possible. The lesson was a good one, the hope has been fully realized.

It was "At a meeting of the School Committee called by Dr. Alfred Hosmer, chairman, May 7, 1867, voted to choose Messrs. Alfred Hosmer, John Weiss and Joseph Crafts a committee to consider the subject of a town library, and report at the next meeting." On July 2d it was "Voted, that the secretary transmit to the donors of the books that now compose the High School Library, the thanks of the committee, in behalf of the town, for such a generous contribution to the cause of education in Watertown." "Voted that the thanks of the School Committee be cordially expressed to Joseph Bird, for his personal interest and effort in securing the valuable books that now compose the High School and Teachers' Library in Watertown."

Within a few weeks after the appointment of the committee named above, namely, on the 3d of June, 1867, the School Committee issued the following invitation:

"The School Committee of this town, convinced of the importance of establishing here a Free Public Library (these last three words were printed in large letters, which extended across the whole page), and wishing to have some plan devised by the citizens, invite you to attend a preliminary meeting, at the vestry of the Unitarian Church, on Thursday evening, June 6, at 8 o'clock, to assist in the discussion of the subject. Per order of the committee. D. T. Huckins, Secretary."

The meeting was held, the subject discussed by Rev. John Weiss, Mr. Miles Pratt, Capt. Joseph Crafts, Mr. Joseph Bird, Mr. Jesse A. Locke, Rev. J. M. Bell, all in favor; a plan was adopted, and a committee was chosen to raise funds. Mr. Locke offered to give the \$600 which he had received for his salary as representative of the town to the Legislature of the former year.

The committee chosen were, Dr. Alfred Hosmer, the chairman of the meeting, Rev. John Weiss, Joseph Bird, Miles Pratt, Jesse A. Locke, Leonard Whitney, Jr., Joseph Crafts, Rev. J. M. Bell, Rev. W. F. Stubbart, Dr. D. T. Huckins, Mr. James Sharp and Solon F. Whitney.

This committee met with a generous response, both from citizens and from former residents of the town. It was able to offer, at a meeting called to consider and act upon the subject, on the 28th of January, 1868, within about seven months, the sum of six

thousand dollars; which it did on the following conditions: "That the town accept the gift of six thousand dollars,¹ to establish a Free Public Library, provide a convenient place to receive it, and make it useful to the citizens. The said Library shall belong to the town, and be cared for, and enlarged, as circumstances will permit, by annual votes of the town in meeting assembled."

The town, at this meeting, appointed as committee to report a plan of organization, Messrs. Jesse A. Locke, Edward Bangs, Henry Chase, Alvin Adams, David B. Flint, and the chairman, Rev. John Weiss, and the secretary, Solon F. Whitney, of the former committee.

At a town-meeting held July 22, 1868, this committee reported and the town adopted as a plan of organization the rules and regulations, which, with some amendment, remain in force to this day.

The town at this meeting appointed ten trustees to serve till March, 1869, viz.:—

John Weiss,	Alfred Hosmer,
Josiah Stickney,	David T. Hucksin,
James M. Bell,	Abiel Abbott,
Joseph Bird,	Joshua Coddige,
Jesse A. Locke,	Charles J. Barry.

At the same meeting the town voted that the trustees be authorized to take the room under the town-hall, then occupied as a store, "or any other portion of the Public Buildings which they may select for the use of the Library."

Also "Voted that the Library shall not be open on Sundays."

This Board of Trustees organized by making John

¹ The contributions from non-residents to the original fund of six thousand dollars were:—

In 1868-1869.	
Seth and George Bemis, of Newton	\$500
Heirs of Abijah White, Cam- bridge	500
George T. Bigelow, Boston . .	100
George C. and Abby Francis, Cambridge	100
Mrs. G. W. Lyman, Waltham .	50
In 1872.	
William Cole, Baltimore . .	\$100
In 1873.	
Heirs of Jonas White, Cam- bridge	\$100

Besides numerous contributions of \$1, \$5, or \$10 each, from residents, there were also the following:—

Alvin Adams	\$1000
Jesse A. Locke	600
Josiah Stickney	250
Adolphe Lewando	150
David B. Flint	100
Miles Pratt	100
B. B. Titcomb	100
John Templeton	100
Harrison P. Page	100
George N. March	100
George K. Snow	100
Dr. Samuel Richardson . . .	25
Joseph Crafts	25
Solon F. Whitney	25
Samuel L. Batchelder . . .	25
Dr. Alfred Hosmer	50
George F. Meacham	\$50
Rev. John Weiss	50
Andrew J. Ross	50
Mrs. Mary Pratt	50
Charles J. Barry	50
John Trickey	50
Charles Bemis	50
Edward Bangs	50
George B. Wilbur	50
Caleb Ladd	50
Royal Gilkey	50
Joshua G. Gooch	25
Thomas L. French	25
Jesse Wheeler	20
John K. Stickney	20
Oliver Shaw	15

Weiss, chairman, and Alfred Hosmer, secretary, and chose Solon F. Whitney, librarian.

They proceeded at once to prepare lists of books, appropriated a vacant room under the High School room for their reception and preparation for use. After occupying this room about seven months, they moved the books to the town-hall, and, as was stated in the first lines of this sketch, were able to open the library to the public on the 31st of March, 1869.

The eagerness with which the people accepted the proffered privileges is witnessed by the fact that the circulation rose at once to ten thousand volumes the first year, and has gone on increasing till the number of nearly forty thousand volumes has been attained during the past year.

OPENING OF THE PUBLIC LIBRARY.—The first evening the trustees were all present; the people came in great numbers and business at once began.

There was then no time wasted in speech-making, no band of music, no display of flags, neither orator or poet who, in grand and stirring periods or glowing rhymes, sounded the praises of the authors whose works were displayed on the shelves, or of the persons who had been instrumental in collecting the library; no speech-making except the cheery conversation of the trustees as they took the signatures of those desiring to become takers of books, the few words of librarian and assistants as they helped each to a new book; no sounds of music except the busy tones of all as they passed through the alcoves and praised the collection or criticised the absence of some loved author; no flags except the long written lists that served at first as catalogues of books. The blooming periods of orators and the musical and flowing rhymes were indeed there, but bound between pasteboard covers, asleep till some touch of the hand of the prince should come to wake them from sleep; the solid principles of philosophy and of conduct were, indeed, offered, and no taste too delicate and no moral condition too enfeebled to drink else but health and inspiration from some of the pages written by the master spirits of this and all past ages there offered free to all.

The opening of this library to the people of Watertown we may acknowledge, at this distance of time, when most of the principal actors have passed on to other fields and are beyond reach of praise or blame of our poor words, was an occasion the wisdom, the magnitude of which far transcends in character and importance most of those occasions that are marshaled in with so much display and circumstance, when all are moved to contribute their presence and their aid in magnifying the event.

Our children in some future time shall gather to lay the corner-stone of some grand temple of learning and rational enjoyment, when they will recall the simple and business-like proceedings at this opening, and calling to their aid the muses of music and of painting, of architecture and of sculpture, will rouse

the kindled souls of a more sensitive and appreciative people to the full significance of the opening event, when the few, by the sacrifice of books from their own stores, by the gift of funds from their own small incomes, aided by larger gifts from those who had opportunity to test the benefits of stores of books, from some who, perhaps, saw this a cheaper way to police the town and protect their own abundant wealth, had been brought to unite in such an undertaking in those early days when not more than one-eighth of the towns and cities of the Commonwealth had taken the first step to establish that long list of libraries now almost equal in number to the number of the separate municipalities in the State.

These lame words can only make this attempt to record the beginning of the march of this company in the grand army now covering the whole land, whose onward and majestic tread shall, in its own time, exalt the lowly and break down the proud, shall offer to every appreciative soul the help of the choicest spirits of earth, and breaking down every barrier of power or wealth or social distinction, bring together in the kingdom of intelligence and moral worth those who begin to catch some glimpse of those shores of the blessed lands where all shall find full scope for the best of which he is capable, and all circumscribing hindrances to full development be removed. Emerson says when you find some fine piece of statuary that you greatly enjoy or some picture that stirs your soul, place them where the public may enjoy them and your pleasure shall be all the greater.

In this spirit many were led to begin this library. Continued in this spirit, it will ever grow in magnitude, in richness of adornment, as well as in the resources it will accumulate to give pleasure to the latest generation of a happy posterity.

The wealth of our language is too poor to give full credit to the clear intuitions, the noble motives of some of those engaged in laying the foundations of this Watertown Free Public Library. John Weiss made the larger part of the first selection of books. That selection challenges the scrutiny of all opponents of public libraries. Some of the books in the collection, it is true, were such as our people felt moved to give from their own stores. Some of these were not what more intelligent people, with ample means, would have selected from the shelves of publishers when choice was free. The trustees wished to encourage all to give according to their means and according to their knowledge. All good books are useful,—some to some people, others to others. They desired to avoid giving offence to any by rejection of gifts of any books which any person felt moved to offer to the common good, while exercising the greatest care and discrimination in spending the money which was the free offering of the best of the entire people.

John Weiss, looking up to the spire of one of the churches, and thinking of the exclusiveness which in

the name of religion bars out all who can not pronounce a certain shibboleth, was moved to say that the time will sometime come when the work of the public library will be sustained with hope and with honor when all such narrowness shall be despised and forgotten. With the keen eye that looks through shams and the clouds that beset ignorance and selfishness, he saw with that piercing vision the weakness in the harness of other men, while feeling with humility the mortal weakness of his own.

John Weiss was aided on the board of trustees, by men, who, being yet above the sod and liable to still greater efforts, to show still greater works, had better not be praised too openly. But one large, noble fellow, whose faults as well as virtues are still vividly before his companions, "Jo Bird," as he was familiarly known and called, "who read every book that came under his hand and remembered every book he read;" who made the man who had no music in his soul feel like a child to begin the humble steps to musical appreciation if not musical performance, who roused the wealthy to the first gifts for the teachers' library and gained the aid of the ablest followers of Horace Mann in a wise selection of books for the same; who had in his younger days co-operated with Horace Mann himself in his noble work at Lexington and West Newton, came to some of the others one day with his big soul, too big for his big body, all aglow with the enthusiasm which success had begun to kindle in him, to express his joy and thankfulness that his appeals had been heard and that this larger prospect of a town library seemed possible. Joseph Bird, the music teacher, the man whose voice never failed to be heard when he thought the truth or the justice or even the fitness of things required his help, was at the first one of the most outspoken friends of the library. Too quick to see the advantages to be gained by a forward movement, too rash to protect his flanks by outlying or his rear by reserve forces, he failed to accomplish alone what a more careful and better disciplined man would have accomplished. But take the ten first trustees as a body of men who were selected to lead the weak hope, to pioneer a new undertaking in a new field, for what they were, with their peculiar surroundings, and success was well assured from the beginning.

There were John Weiss, the keen eye, the facile tongue, the wise leader; Josiah Stickney, full of years and good taste; Jesse A. Locke, whose generous and grateful heart made the first pledge of his winter's services in the legislature to the project; Joseph Bird, big with hope and fertile in expedients; Abiel Abbott, the conscientious lawyer, and Charles J. Barry, prompt in every duty, all gone to their reward. Then among those still living there were Alfred Hosmer, the general who had the courage of his convictions; Joshua Coolidge, who knew when to hold back and when the crucial hour required his utmost effort; David T. Huckins, who held not too long on the funds needed

for supplies, and James M. Bell, the large and liberal-minded clergyman—these were the men to pioneer this noble undertaking.

It may not be unwise to reflect that they were well sustained by the people. Miles Pratt, who would not hold office himself, gave freely of his counsel, and helped to gather the sinews of war; Joseph Crafts, the daring captain whose raids brought in the last subscriptions to complete the required \$6000, Henry Chace, who said the few must always take the lead; and others whom time fails to allow us to enumerate—these served on committees during those preliminary months when the enterprise wavered and further progress was in doubt, and when one of the committee, Rev. Mr. Stubbett, thought "there was a radical unpreparedness in the public mind for the library;" and another and a wealthy member of the committee withheld for a time the aid he never could quite give to the project. These were the times of doubt and delay. The time is yet too soon for most to see what the effect in the end shall be. But your historian must, as in duty bound, record the advance already made.

THE NEW PUBLIC LIBRARY BUILDING.—The room on the first floor of the Town-House answered very well the purposes of the library for several years. Beginning by taking the room long occupied first by William Sherman, then William H. Ingraham, and last by Joel Barnard as a dry-goods store, it was soon found necessary to take the other side, occupied for many years by Samuel Noyes for medicines and groceries. Then, by changing the position of partitions, taking in an engine-room, certain rooms were obtained for town offices. The location was admirable for the uses of the library, but the growing collection could with difficulty be managed, and the room seemed to grow closer and closer. The question of a new building was discussed in the annual reports and in the local press, until in 1882 the way seemed clear to obtain a new building. In the librarian's report for that year he said, "We have looked forward with longing eyes for several years to the possession of a proper building for this library." In the report for 1881 he said, "Fortunate is the town, too, it seems to us, that others feel this need so pressing that they are willing to offer to the town, dollar for dollar, the means needed to put the library in a sufficiently large, well-ventilated, well-lighted, fire-proof building."

The attempt was made to raise \$20,000 by subscription, and then ask the town to raise as much more for a suitable building. The trustees themselves subscribed, showing their good faith, and Hon. Hollis H. Hunnewell, son of Dr. Walter Hunnewell who once lived on Main Street and practiced the healing art in our village, generously offered to give \$10,000, one-half of this. Mr. Samuel Walker offered over \$4000 if the library were located on Main Street,¹ and other

large amounts were quickly pledged² so that even more than the amount stipulated was secured. The town then came together and appropriated \$20,000, and appointed a building committee to proceed at once to obtain plans and estimates, and then to prosecute the work until the building was completed and turned over to the Board of Trustees. The architects chosen by this committee were Shaw & Hunnewell, of Boston; the contractor, David Perkins, also of Boston.

The plans were shown at the March meeting of 1882, and during the summer the work was pushed on vigorously. It was wholly enclosed before cold weather, finished during the early winter, and on the 12th of February the books were moved in, the venerable Joshua Coolidge helping in person to make the transfer from the old rooms to the new.

Following is a general description of the public library building. Its plan, viewed from Main Street, is like an inverted T, being of two principal divisions. Standing about eighty feet from the line of street, the building presents a frontage of sixty-two feet, broken by a central projection, gabled, twenty-six feet wide and ten feet deep, containing the main vestibule and basement stairway. The front main division is 24 x 62 feet, divided into a distributing room, 30 x 18 feet, on the right of which is a reading room, 18 x 21 feet, with the addition of a large half-circle window, and on the left a reference and study room of the same size. Works of art can be displayed in either of these rooms. Back of these, forming the stem of the T, is a structure 36 x 49 feet, containing a book room 34 x 48 feet, while a projecting portion provides a librarian's room, 9 x 14 feet, opening out from the book-room.

Large arches form the dividing lines between these several apartments, so that really the whole interior, except the librarian's room, is exposed to sight, the effect being to present an interior of generous proportions to the eye of the observer. If it is found desirable to divide off more closely the study-room, or reading-room, curtains may be hung between the arches. A unique effect is produced by finishing the internal walls

church, a troublesome one. The church-lot on Church Street had many advocates, but had also the odd passageage lot on Mt. Auburn Street, but this gift of Mr. Walker, and the promised opportunity for a public park adjoining carried the day.

² The amounts subscribed and the names of the subscribers who did so great a service to the Public Library and to the town are here given:

H. H. Hunnewell	\$10,000	Charles B. Gardner	\$100
Samuel Walker	4,200	Rev. R. P. Stock	100
Edward Whitney	1,000	Geo. K. Snow	100
Sam Benas	1,000	Samuel Noyes	100
Mrs. Lucy W. Titcombe	1,000	J. H. Conant	100
D. B. Thayer	500	Wm. H. Ingraham	50
Charles J. Barry	500	E. B. Eaton	50
S. R. Payson	500	Wm. H. Badman	25
Mrs. P. C. Brooks	500	Mrs. R. A. Bradford	25
Solon F. Whitney	200	Mrs. A. L. Richards	25
J. K. Stockney	100	T. G. Abbott	50
Mrs. Thoe. Chase	100		

¹ The question of location was, as early in the history of the first

with faced and moulded brick, upon which the fresco decorations are made, while panels, formed by bands of cement on the corners and angles, are also decorated. Large brick fire-places finished above with terra cotta further embellish the study and reading-rooms. All ceilings are open timbered, divided into panels, and lathed, plastered, and frescoed between the beams. The book-room will hold 30,000 volumes, is sixteen feet high on the walls, and slanted up to twenty feet in height to ceiling. Galleries can be put in when required, doubling the book storage capacity. The height of the distributing room is fifteen feet on walls, arched up to eighteen feet six inches, for central ceiling. The side-rooms are fifteen feet high, level ceiling. In the basement, finished in 1888, ten feet in clear, are a large, well-lighted reading-room, a patent office report room, a trustees' room, besides rooms for the steam heating apparatus, toilet and other conveniences. The floor is concreted with cement and overlaid with hard wood, with air-spaces between; the ceiling and walls are decorated with taste, the work having been done by Haberstroh of Boston. A good supply of water and proper drainage are also provided.

French Renaissance is the style of architecture chosen, the basement being constructed of Roxbury rubble stones, the walls above of brick with New Brunswick red freestone trimmings, and the hipped roofs are covered with red slates. The front is dressed quite freely with stone columns, pilasters and window decorations, and present a bold appearance. A large half-circle bay on the southeasterly side forms a beautiful feature of the design and increases the size of the reading-room. A flight of stone steps leads to the vestibule, the door of which is at one side of the front projection, and not directly exposed to view from the street. The outside walls have an average height of twenty feet from grade, and the brick walls are fourteen inches thick, having a two-inch air space. The trusses and floor timbers are hard pine, the objects in view being strength, durability and safety. For arch columns and other wood finish of the interior, ash, stained, is used. Large windows of plain glass furnish abundant light. Finials, ridges and conductors are made of copper.

The basement was not finished before the building was delivered to the Library Trustees in 1884. It was not supposed that there would be need of more space than given on the upper floor. Few of the Building Committee had had experience with libraries. One of the best librarians of the country, Mr. Cutter, of the Boston Athenaeum, said, "It was a good rule to build five times as large as would be needed at once." The area of the single floor was but a little larger than the space in the town-house. In less than ten years from the occupancy of the building, additional room will need to be asked for. The shelves in 1890 are so full that inconvenience is experienced, in some departments, in presenting an orderly ar-

range of books. The reading-rooms were felt to be limited.

THE PRATT GIFT.—*The "Asa Pratt" Fund.*—In 1888, after some correspondence with Mr. Charles Pratt, of Brooklyn, New York, son of Mr. Asa Pratt, late of Watertown, as to the details of a scheme in which he wished to benefit the working people particularly, of his native town, he offered to give for the Asa Pratt heirs the sum of \$5000 for the establishment of a fund to furnish periodicals of use particularly to the industrial portion of the community, on condition that the town would fit up the lower rooms for reading-rooms in an appropriate and substantial manner. The following is an exact copy of the offer of the gift and the attending conditions:

Mr. Asa Pratt lived in Watertown for over sixty years. He died November 9, 1878, leaving his widow a life interest in his estate. She having recently died, the children, in closing up the estate, are desirous of commemorating as a worthy example one of whom it was said, "He conducted business as a manufacturer of furniture in Watertown in his own name for nearly fifty years. Many pieces of furniture have been in constant use for more than half a century and are still in good condition, thus giving evidence of the integrity of his work. He raised a large family and although in humble circumstances he always paid one hundred cents on the dollar and taught his children to follow his example." All who knew him said: "Asa Pratt was an honest man."

Learning from your published report, and otherwise, that the establishment of an additional reading-room has been proposed which shall be particularly for the benefit of the industrial portion of the people, and knowing it would be consistent with the memory of his life (he was for many years a member of the Board of Public Education), and to aid the efforts of her people for such education as tends specially to make all men more useful citizens, the executors of his estate, on the behalf of his children, hereby offer to give to the town of Watertown the sum of five thousand dollars (or its equivalent, five thousand-dollar fifty-year five per cent. gold bonds), for the establishment of a fund to be known as the "Asa Pratt Fund," upon the following terms and conditions, viz.: that

"1. The town shall finish the basement room of the library building, or provide another similar suitable room, with an independent entrance from the outside, properly supplied with sufficient light and heat and the necessary appropriate furniture, and keep the same open and accessible to the public, not less than the library above, of which it shall form a part.

"2. Said fund shall be kept safely invested, and a part of the yearly income thereof as stated below shall every year be paid over to the trustees of the public library and by them be applied to the purchase of such periodical literature, including papers, as in their opinion shall be of particular interest and use to the industrial portion of the community, and which consequently may be of use to all. The part of said yearly income to be thus paid over and applied every year, shall be for each of the first five years the sum of one hundred and fifty dollars; for each of the second five years, one hundred and seventy-five dollars, and for each of the third five years, two hundred dollars, and so on; that is

to say, at the beginning of every period of five years after the first five years, the yearly allowance for said purchase shall be increased twenty-five dollars over such allowance during the preceding period of five years. The balance of said yearly income in excess of what is paid over to said trustees and expended under the foregoing provision shall be added to and become a part of said principal.

"3. No sectarian influence shall govern in the selection of reading matter purchased with any portion of the income of said fund.

"4. The care, control and investment of said fund, and all additions thereto, and the general supervision of the trust hereby created and the power to carry into effect its purposes and spirit, shall be vested in a permanent board composed of three reputable freeholders of the town, one of whom shall be Mr. H. W. Otis, the other two to be appointed by the trustees of the Free Public Library and the Selectmen of the town acting jointly. All vacancies on account of death, removal from town, resignation, or otherwise occurring in the Board, may be filled in like manner by the joint action of the Trustees and Selectmen. Members of the Board may hold their membership during their pleasure, provided they comply with the terms and spirit of this trust.

"5. The town auditor shall have the right whenever the town, the selectmen, or the trustees wish it, to inspect the securities in which said fund may be invested, and report as requested.

"H. W. OTIS, *Executor.*

"I engage to be responsible for the payment of the above sum as soon as the town shall take satisfactory action.

"CHAS. PRATT,

"22 Clinton Avenue, Brooklyn, N. Y., March 3, 1888."

The town, at the regular annual March town-meeting, after very full discussion, took the following action:

"Voted, That the town accept the gift of the heirs of Asa Pratt with thanks, and will gladly comply with the conditions of the gift.

"Voted, That the trustees of the Public Library and the Selectmen be a committee to take into consideration the whole matter of providing for a reading room, and, if thought expedient, a trustees' room, and that a sum not exceeding \$3000 be put at their disposal to accomplish the ends in view."

The following obituary notice copied from the *Boston Journal* of November 12, 1878, acquires additional interest to our readers, in view of the action of the town at its annual meeting in accepting the proceeds of Mr. Asa Pratt's estate increased by the generosity of his sons, to establish a fund for furnishing reading matter for a new reading-room in the Free Public Library building for the benefit of workingmen:

"ASA PRATT.—Asa Pratt, one of the most venerable and esteemed citizens of this section, died in Watertown on Friday last, in the eighty-fifth year of his age. He was the son of Jacob Pratt, who was born in Malden in 1754, where he lived until his death in his ninety-first year. His son Asa, at the age of fourteen, was put out to learn a trade. After serving an apprenticeship of seven years in Boston in learning the trade of cabinet-making, he removed to Watertown and started business on his own account, September 18, 1813. For about fifty years he continued his business on substantially the same spot where he started it, until old age compelled him to rest. He was an honest man and did honest work. His dealings with men were true; he feared debt, and amid the many struggles of maintaining a large family, he would never contract debts that he could not meet to the last dollar. He never made changes, but stuck to his trade in the same place. He bought his little home where he took his bride as a young man, and it was the home of his children until he had to build larger, but within two hundred feet of the same spot he lived for sixty years until his death. He had remarkable health. He was a kind father and singularly unselfish in all his relations of life. He could not brook a mean or selfish thing of any kind. He had a large family. Seven of his children survive him, displaying the same traits of industry, honesty and generosity. He was a charter member of the Pequot Lodge of Freemasons, and before his death was the oldest member of that order. The social, genial, faithful ways which first won him esteem among his fellow-Masons continued to the end. For the past ten or fifteen years, since he gave up his business,

Asa Pratt has lived a quiet, meditative life. He had neither poverty nor riches. His wants, which were simple, were all supplied, and he had a little for every call of charity. He leaves his widow, now in her seventy-eighth year, in comfortable circumstances, and with a good name, which is better than riches."

Several of the workingmen of the town who felt a deep interest in the project of a free reading-room, addressed the following letter to Mr. Chas. Pratt, who represents the Pratt heirs. It secured a large number of signatures:

"WATERTOWN, March 12, 1888.

"TO CHAS. PRATT, ESQ., Brooklyn, N. Y.

"Dear Sir,—The undersigned citizens of Watertown, and householders whose homes represent the earnings of their own hands in some form of productive industry, desire to thank you for the gift that has come through your kindness to the class we represent.

"We are workmen, and we think that we appreciate the united and social condition of a large class of our people somewhat more directly and fully than those conditions can be understood by persons who see them only from the outside, and we have long felt the pressure of a public need that, up to this time, has not been met. But now your generous remembrance of your former home opens the way to a good we have hoped for, but which has been beyond our reach. We confidently expect to see the most beneficial results from your bequest, and we wish to assure you that our best endeavors shall be given to turn our experiments into facts.

"The list of names at the end of this note will not be a long one, but each name will stand for a man who sends you greeting and the thanks of a grateful heart.

"Hoping that you will long live to see the good that will come from your gift, we remain sincerely and faithfully yours."

The selectmen of the town meeting with the trustees of the Public Library, according to one of the conditions of the trust, appointed with Horace W. Otis, Charles Brigham and Albert O. Davidson, trustees of the Asa Pratt Fund.

It should be stated that Mr. Pratt has done more than he promised. He placed the funds (\$5000) in the hands of the special Board of Trustees, he sent the librarian money to furnish the reading-rooms entire with fitting and durable furniture, and as an earnest of his pleasure in the first year's administration of the fund, sent the library a check for a hundred dollars for reference books, which has been expended for valuable works that have been much called for by students of art and manufactures and history. It is the express direction that these be all credited to the "Asa Pratt Fund" in honor of his father, whose useful life was spent in this place.

It may be too soon to record the influence of this gift in enlarging the effectiveness of the public library. That it is gladly and thankfully used by many young men and women is apparent to those constantly in the rooms.

CATALOGUES, AND USE OF THE LIBRARY.—

As a new card catalogue is being prepared for the use of the public, it may be well to state the fact that a card catalogue of the whole library was begun in 1868, long before there was any Library Bureau, and consequently when few card catalogues were known outside of Harvard College. The Boston Public Library had begun one for the use of the librarian and assistants, not yet for the public; the Boston Ath-

enueum pasted its titles into great blank-books like scrap-books.

This catalogue was begun as the aid of the librarian in doing his work, and was written mostly nights and holidays. It was patterned after the catalogue of Mr. (afterwards Prof.) Ezra Abbott, assistant librarian of Harvard College Library, with of course simplification of the subject portion of the catalogue, with more specific subjects as adapted to a smaller library. The work done twenty years ago is the basis of work done now.

All other lists and catalogues, as shelf-lists, accession catalogue and bulletins have been kept up from the beginning, every title thus being written five or six times in different relations for different purposes in the manuscript lists. No labor of this kind has been spared to make the library a well-organized and effective instrument.

The library has had good direction from trustees and experts in the choice of books, so that for the purposes to which this has been put, in the education of this town, it may be said to be fairly equipped with good books of good authors.

Considerable attention has been given to assisting pupils of the schools and other learners to the use of the materials which the library contains.

Its life seems to be comparatively active. It has nearly three volumes for every man, woman and child in town, and these are read on the average twice each year. This rate would give Boston a library of a million and a half of volumes, and a circulation of about three millions annually.

Its friends expect it to do much better than this. A love of reading, and the habit of thinking by the aid of the printed page, seems not to be the natural inheritance of all people. Doubtless the new era of progress which started in Europe with the invention of printing and the use of the printed page, the emergence of universal intelligence from the gloom of the Dark Ages, has to be wrought over again in the personal history of each individual of the race. Agassiz traced in the successive beds of fossil rocks the zoological history of the world; this he found again repeated in like order of development in each individual of the higher species of the present time, by tracing the progress from the first signs of life in the embryo to the condition of maturity. It is clearly within the province of the historian to note the successive stages of growth of use and usefulness of public libraries, to note both the early and successive stages in the growth of the public library as a complete organism, and to note the early and successive stages of growth in the minds of individuals brought or coming within the sphere of its activities. This large view helps to clear the air of much confusion of ideas in understanding the nature of the life of a public library, and prepares wonderfully to settle intelligently the many questions constantly arising in regard to the proper administration of these great public trusts. For instance, the

ever-recurring question as to what books should be allowed in a public library. Should they be selected with reference to a certain standard of literary excellence? Should they accord with certain political or religious creeds? Should they treat only of facts of science or history? Should they ignore all that has misled or deceived the expectations of the past? Is it best or to be allowed to try to catch the eye and excite the imagination of the thoughtless by something within the scope of their minds? In the administration of this library, the experiment of trying Mrs. Southworth and Oliver Optic for those who else would not, perhaps could not, read Scott and Dickens, Irving or Bancroft, has been made. Science and philosophy have on the other hand been given out to babes. The effects have been noted. This is a field for intelligent experiment. It should not be expected that the results of modern culture can be gained by relapsing into the freedom of that accidental untrained life which our fathers found among the aboriginal savages. Christian science and Christian philosophy, aided by the best literary product of the world to the latest day are no more than equal to the best results desired and possible.

The history of this library, to gather up the experience of twenty years in a single statement, has shown that the best books, the most carefully selected and sometimes the most costly, brought at the opportune moment when the want had been created, the assimilative powers being in condition, have supplied the material for the want of which perhaps a life failure would have resulted rather than the laying of a foundation for future growth.

The great need of a young man or a young woman who finds that it takes most of his time and strength to live, whose whole life and energy is absorbed in the material and mechanical conditions of existence, is to catch some glimpse of the world of mind, of imagination above him. Doubtless other libraries than this have been able to catch such an one's attention by a printed page not too obscure for his enlightenment and his enjoyment.

Not to spend too much time in describing individual cases in the history of the library, it may be claimed, doubtless without fear of contradiction, that some in every condition of mental development, the more the higher we go, have found it a garden of delight and of refreshing, the open door to new views and more effective labors. Such will prove their grateful appreciation by leading others to still greater help, still higher and wider, and more constant mental activity.

In this town, a model New England town, with its full share of dull material existence, the library has been evolved in the course of progress as the representative of the best intellectual forces, as that connecting link, if one can excuse the figure, which binds this toiling, busy life to the onward car of progress. It is for the masses what the schools are to

the young, what the university is to the scholar. It is, in fact, the university of the masses.

It requires men yet on its board of control. It requires administration with firmness, freedom to try new means and measures, and intelligence to observe results and draw conclusions.

OFFICERS OF THE WATERTOWN FREE PUBLIC LIBRARY,

1868-1890.

TRUSTEES.

Rev. John Weiss, 1868-72 (chairman, 1868-69); Alfred Hosmer, M.D., 1868-70 (secretary, 1868, '69, '70, chairman, 1871, '73-'76); Josiah Stickney, 1868-72; Joseph Bird, 1868-69; Jesse A. Locke, 1868-71 (chairman, 1870); Abiel Abbott, 1868-69; Rev. Jas. M. Bell, 1868-69; David T. Hucking, M.D., 1868-69 (treasurer, 1868); Charles J. Barry, 1868, '69, 1873-83 (secretary, 1875, '76, chairman, 1877-83); Joshua Coolidge, 1868-88 (treasurer, 1871, chairman, 1872, '83-'87); George N. March, 1869-87 (secretary, 1871, treasurer, 1869, '70, '72-'84, '85-'87); Geo. K. Snow, 1872-84 (secretary, 1877-84); A. C. Stockin, 1872-84; (secretary, 1872-74); Charles F. Fitt, 1879-81; Rev. Robert P. Stack, 1882 (treasurer, 1884); William Cushing, 1884 (secretary, 1884); Rev. Edward A. Rand, 1884-87; Edward E. Allen, 1885- (secretary, 1885, '86, treasurer, 1890-); A. O. Davidson, 1885-90 (secretary, 1888); Chas. S. Ensign, 1887-90 (secretary, 1887, chairman, 1888, '89); Horace W. Otis, 1888 (treasurer, 1888); Charles Brigham, 1889- (treasurer, 1889, chairman, 1890); Geo. E. Priest, 1889- (secretary, 1889); Herbert Coolidge, 1890-; Wm. H. Hustin, 1890-.

LIBRARIANS.

Solon F. Whitney, librarian, 1868-; M. Agnes Gribble, assistant librarian, 1872-73 (now Mrs. Geo. H. Chapin); Nelly Bradford, assistant librarian, 1873-77 (now Mrs. Solomon B. Stebbins); Jane Stockwell, assistant librarian, 1877-; Ella Sherman, assistant librarian, 1885-88 (now Mrs. James Norcross); Helen Cushing, assistant librarian, 1888 (now teacher in Philadelphia); T. E. Macurdy, assistant librarian, 1889 (now in Boston Public Library); M. Louise Whitney, cataloguer, 1889-; Mabel Learned, assistant, 1890-.

THE WEARS.—THE SOUTH SIDE.—MORSE FIELD.
—History narrates that Captain John Smith, when exploring the Massachusetts coast, in 1614, proceeded up a river which he named the Charles, landed on the south bank, probably within a few rods of the present Watertown Bridge, and his party refreshed themselves from the pure springs located in this vicinity.

When the settlers of the town located within its territory they considered themselves the *sole* proprietors of the territory on both sides of this river, but preferred to settle on the north bank, as it was better adapted for immediate cultivation, and safer from the Indians, who frequented the opposite shore for hunting and fishing, and who had a settlement at a place called Nonantum. The land on the south side was marshy, back of which extended bluffs heavily timbered, or high bluffs rising abruptly from the shore.

For home-lots the south side was too inconvenient and too remote from the main settlements in case of danger from the neighboring Indians.

When the settlers in Newtown (Cambridge, from 1638) crossed the river and settled in "Little Cambridge" (Brighton), and extended to New Cambridge (Newton), they were gladly welcomed by the planters

in Watertown. So, when in May, 1634, the colony, under Rev. Thomas Hooker, who had, under the order of the General Court, in 1632, removed from Mount Wollaston to Newtown, complained to the General Court for lack of room, particularly meadow land, Watertown and Boston offered them land, which was accepted. This offer included a part, if not all, of the thirty acres of land granted by the Court, November, 1632, to Mr. George Phillips (the minister in Watertown), "on the south side, beginning at a creek a little higher than the pines, and so upwards towards the wears." Bond says that the plot was nearly opposite the United States Arsenal; but it may have extended beyond and reached nearly to the present Watertown Bridge. The Court, in September, 1634, "ordered that the ground about Muddy river (Brookline), belonging to Boston, and used by the inhabitants thereof, shall hereafter belong to Newtown, the wood and timber thereof, growing and to be grown, to be reserved to the inhabitants of Boston: provided, and it is the meaning of this court, that if Mr. Hooker and the congregation now settled here, shall remove hence, that then the aforesaid meadow grounds shall return to Watertown, and the grounds at Muddy river to Boston."

By the permission of Governor Winthrop, granted in April, 1632, without the order of the General Court (for which he was severely condemned by his unfriendly deputy, Dudley), the inhabitants of Watertown were allowed to construct a fish-weir. May 9, 1632, "it was ordered" by the General Court, "that the town of Watertown shall have that privilege and interest in the wear they have built up Charles river, according as the court hereafter shall think meet to confirm unto them."

Johnson, in his "Wonder Working Providence," says, "This town (Watertown) abounds with several sorts of fish at their seasons, bass, shad, salmon, brook fish and smelts."

Wood, in his "New England Prospect," 1633, narrates, "A little below the fall of waters" (the present dam across the river) "the inhabitants of Watertown have built a wear to catch fish, wherein they take great store of shads and ale-wives. In two tides they have gotten one hundred thousand fishes."

Historians say that the leading spirit in the building of the wear was Mr. John Oldham, a freeman in 1631, "whose house near the wear at Watertown was burnt in August, 1632." Sept. 4, 1634, the General Court "ordered that no man shall fish with a net nearer the wear at Watertown, than the further part of the island in the river, and there also never to cross the river wholly with any net except it be at high water or after."

In April, 1635, a committee was appointed by the General Court to determine the bounds between Newtown and Watertown, and reported, "It is agreed by us whose names are under written, that the bounds between Watertown and Newtown shall stand as they

¹ By Charles S. Ensign, LL B., a life member of the New England Historical Genealogical Society; member also of the Historical Society of Watertown.

are already, from Charles river to the Great Fresh pond, and from the tree marked by Watertown and Newtown, on the northeast side of the pond, and over the pond to a white poplar tree on the northwest side of the pond, and from the tree up into the country, northwest by west, upon a straight line by a meridian compass; and further, that Watertown shall have one hundred rods in length above the wear, and one hundred rods beneath the wear in length and three-acre rods in breadth from the river on the south side thereof, and all the rest of the ground on that side of the river to lye in Newtown. William Colbron, John Johnson, Abraham Palmer."

This tract contained by estimation, on the south side, about seventy-five acres, afterwards called the Wear lands. In town-meeting, Jan. 3, 1635-36, it was "agreed that there shall be four rods in breadth on each side of the river, and in length as far as need shall require, laid (out) to the use of the wear so it may not be prejudicial to the Water Mill. Also, one hundred and forty acres of ground to the wear upon the other side of the river, to be laid out in a convenient place."

"Agreed, that there shall be laied out to the use of the Water Mill twenty acres of ground near to the Mill & foure rods in breadth on either side the Water, and in length as farre as need shall require, so it be not preduciall to the Ware."

Mr. Hooker and his company never settled upon the grants of land made by Watertown and Boston, and continuing dissatisfied and complaining, finally were permitted to remove to Connecticut and settle upon land which later was called, Hartford. My direct ancestor, James, was one of that colony.

The General Court thereupon appointed a committee to settle the boundaries between Newtown and Muddy River (Brookline), which made the adjustment in April, 1636. Newtown retained the large territory gained in 1635, comprising Brighton, Arlington, Lexington, Billerica, part of Bedford, part of Tewksbury, extending to the Merrimack River, while Watertown never recovered the territory which it had originally granted. The reason for this may be accounted for in the fact, "it was not a shire town, nor place for much trade, no shipping-port, only reached by small vessels, and no resort for official men and capitalists." "After Sir Richard Saltonstall's departure, until 1686, there were no resident assistants or magistrates. The people were devoted to agriculture and some mechanical trade in the intervals of farming," plain in their habits and simple in tastes, and had no interest or pride in municipal aggrandizement.

In 1679 when the boundaries between Cambridge and New Cambridge or Cambridge village, (that is, Newton,) were fixed, it was stipulated "that this Watertown reservation on the south side of Charles River, two hundred by sixty rods, should be maintained and held by Watertown for the protection of her fish wears."

The boundaries not being satisfactory, were in 1705 again readjusted so that this territory was increased by estimation to eighty-eight acres. It is stated that the lines have been since rearranged so that the total number of acres, including that covered by water, is one hundred and fifty, and is surrounded by Newton, except on its northern boundary, which is the Charles River.

From the orders of the General Court it would seem that the wear built by the town in 1632 was public property. But soon after it became private property and was held in shares.

The General Court had granted the "Oldham farm," on the north side, to Mr. John Oldham, April 1, 1634. He mortgaged this grant to Mr. Matthew Cradock. The land was not ordered laid out until June 2, 1641, after Oldham had been murdered by the Pequot Indians at Block Island, July, 1636. But Oldham had soon after sold this grant subject to the mortgage of Thomas Mayhew, and this plot included the wear. For the General Court confirmed the town's grant of one hundred and fifty acres with the wear (Jan. 3, 1635-36) on June 2, 1641, when it was "agreed that Mr. Mayhew shall enjoy the one hundred and fifty acres of land on the south side of Charles River by Watertown wear."

Thomas Mayhew, a freeman in Medford, May, 1634, came to Watertown in 1635. He received six large grants from the town. He was a townsman or selectman from 1636 to 1640 inclusive; also in 1642; also representative to the General Court from 1636 to 1644. He is described as a merchant in his deeds. From 1638 to 1642 he was a commissioner for Watertown "to end small causes." On October 10, 1641, Nantucket and two other adjacent islands, and on the 23d of October, Martha's Vineyard and Elizabeth Islands were granted to him and his son Thomas by James Foret, agent of the Earl of Stirling, who constituted him Governor. He removed to Martha's Vineyard in the spring or summer of 1645.

He built the first bridge, a foot-bridge, in 1641 over Charles River, and one record states that this was the reason for the grant of 150 acres on the south side of the river.

In 1643 the General Court granted to him "three hundred acres of land in regard to his charge about the bridge by Watertown Mill and the bridge to belong to the County."

Thomas Mayhew Sept. 29, 1638, granted to Simon Bradstreet, of Ipswich (Governor of Massachusetts, under the first charter from 1679 to 1686), for six cows worth about \$200 each. "All that his farm containynge by estimation 500 acres lying in Cambridge wth all the buildings thereto belonging."

Sept. 23, 1646, Simon Bradstreet, Andover, gent, for £140, conveyed this tract to Edward Jackson, Cambridge, naylor, described as "his farm of 500 acres, which was lately in the tenure of Thomas Mayhew, adjoining the wear lands."

This tract commenced near the division line of Newton and Brighton, and included the present Newtonville.

His mansion-house, the first dwelling-house in Newton, was located only a few rods from Washington Street, near the Catholic Church.

Feb. 27, 1639-40, Mayhew conveyed to Governor Dudley for £90 the rent of his wear for the last four years, leased to Robert Lockwood, Isaac Sternes and Henry Jackson for six years. Also the river side and inheritance of the wear forever, subject to a certain mortgage (referring to that made to Cradock).

March 2, 1643-44, Dudley sold to Edward How for £59 10s. 2d. all right and income to the wears in Watertown, except £22 15s. 2d. due from Stearnes and Lockwood.

Elder How, by his will June 3, 1644, conveys to his heirs "the wears with all their privileges thereto belonging," which continued in the possession of his sons-in-law, Nathaniel Treadway and John Stone for many years.

Treadway, with Sufferanna (How), conveyed one-half interest, May 30, 1662, to Nathaniel Coolidge, Sr., and Stone the other half, May 25, 1663.

At a town-meeting held April 12, 1671, "Upon consideration that the Indians being like to buy the privilege of the wears and fishing at the river, which the town apprehended will be much to the damage of the town, they (the Indians) being like to be bad neighbors, the town voted, all, as one man, that they were altogether against their having the wears, or that they should set down so near the town." It was voted to purchase the same for the town's use, and a committee chosen to negotiate with the owner, Nathaniel Coolidge, Sr.

Since this period the wears have been the town property, and rented every season for the highest price to be obtained as regulated by law.

In 1738 complaints were made to the General Court by the people of Newton, Needham, Weston, Medfield, Sherburne and the Indians at Natick against the inhabitants of Watertown for stopping the course of the fish in Charles River.

In 1745 an act was passed making it an offence to raise the dam of the mill between the breaking up of the ice in winter and the 1st of May so as to prevent the fish from passing over, with a penalty of £5 for each offence.

In 1798 an act was passed authorizing the inhabitants of Watertown, Weston and Waltham to regulate the fishing within the said towns, the proceeds to be divided among said towns as each paid towards the expenses of maintaining the Watertown bridge.

Weston and Waltham becoming in later years freed from this charge, lost all rights under the law.

In 1805 an act was passed authorizing Newton to regulate the fishing within its town limits.

In 1815 and 1856 acts were passed constituting Brighton and Watertown one fishery, and regulating

the same. This interest, once valuable to the town, has ceased on account of the pollution of the stream by the numerous factories established along the banks of the river. Possibly it may be re-established as soon as the projected sewer system shall become in use and the stream of water again fresh and pure.

Mayhew sold the Oldham farm, March 18, 1647-48, to Nicholas Davidson, Charlestown, attorney of Rebecca Cradock, *alias* Glover, with the mortgage canceled for 1000 acres in Martha's Vineyard. Soon after it was seized on execution granted to Richard Dummer against Mayhew, and on March 21, 1648-49, it was appraised at £70. It is sometimes called the "Dummer farm" in the early records, but is not that tract on the south side generally known as such.

Possibly this Dummer claim arose from this transaction: "Tho. Mayhew of Watertown March^t granted to Rich. Dummer Newberry Gent^l. and his heirs (in consideration of fower hundred pou (nds) in hand paye^d) his farme in Watertown, w^{ch} he bought of Sim (on) Broadstreet Gent^l. containing five hundred ac. And all the Weire and one hundred and forty ac. of land thereto belonging wth certaine provisions by way of mortgage in the same expressed, and this was by indenture dated the 29th of the 7th (September) 1640."

Mayhew mortgaged to Dummer in 1640 the parcel he had sold to Bradstreet in 1638, unless he only intended to mortgage the farm to secure the payment for the six cows, while Bradstreet treated it as a valid sale. When Bradstreet sold it to Jackson in 1646, he gave a "warranty and bond of £2 to secure it from any claim, either against himself or Thomas Mayhew."

The Court of Assistants made Bradstreet a special grant of 500 acres of land on the south side of Charles River, condition that "he was to take no part of it within a mile of Watertown wear, in case the bounds of Watertown shall extend so far on that side of the river," which gave him a confirmation of title.

Through this territory were laid out two roads,—one designated the "Country or County road"—constructed in 1635-37, the present Galen Street, and the great thoroughfare from Boston over Boston Neck, Roxbury, Brookline, New Cambridge (Newton) and over the Mill Bridge through Watertown to Waltham and Weston, and by this road Roxbury people went to the Watertown grist-mill. This was the only road leading to the west until the Worcester turnpike was built. It was probably laid out by or through the wear lands, under the town votes of September 14, 1635: "Agreed that John Warren and Abraham Browne shall lay out all the highways and to see that they be sufficiently repaired," and that of 1637: "Ordered, that there shall be eight days appointed for every year for the repairing the highways; and every man that is a soldier or watchman to come at his appointed time with wheelbarrow, mattock, spade or shovel, and

for default hereof to pay for every day 5s. to the town, and a cart for every day to pay 13s."

The other highway was laid out in 1725-26 and forms the present Watertown Street, it having originally commenced at the corner of the present California Street and Fifth Avenue. Through this territory, from its sources near Newtown Centre, runs "Cold Spring" Brook, in early history called "Smelt Brook," by reason of the fish of that name that used to pass up the water, which flows through Boyd's and Cook's Ponds into the Charles River.

Presentment was made against the town in 1695 and 1700 for want of a bridge over Smelt Brook. In behalf of the town in 1705 Jonas Bond, Esq., (known as the "marrying squire") answered it was a shallow place, and a good bottom, and needed not a bridge. The Court ordered that the said way be forthwith mended on pain of paying £5.

In 1632 Newtown (Cambridge) had granted to Thomas Shepard, late pastor, 300 acres of land beyond Watertown mill, adjoining that which was Thomas Mayhew's, also 200 acres more near Samuel Shepard's farm.

The Rev. Mr. Shepard died in 1649 and this land passed to Richard Park, although there is no record of such transfer. Some authorities state that a small part of the northeasterly portion of this tract along the Charles river or weir lands was in Watertown. Excepting this small portion the residue of the territory of the south side came into the possession of Richard Dummer as has been shown, which was confirmed by a grant from the General Court.

Richard Dummer sold to William Clements of Cambridge for £60, twenty-five acres bounded southerly by the highway from Watertown to Roxbury, (present Washington street, Newton), — northeasterly on Charles river, and partly in Watertown and partly in Newton. Clements sold the same to Daniel Bacon of Bridgewater, tailor, for £60 in 1669. Daniel's sons, Isaac and Jacob, settled on this tract, Isaac having in 1681, bought five and one-half acres from his brother Daniel of Salem. Jacob's house was situated on the present Galen Street, probably on the site of the hill; while Isaac's house was located farther towards Newton, probably near Williams Street. Isaac's part subsequently was conveyed to Oaks Angier, who kept a tavern on the site where the Nonantum house now stands. March 13, 1692-93 Jacob sold seven acres for £39 to John Barton, and John Barton, Jr. and James, sold their interest in 1742, to Jonas Coolidge, of Newtown, a house-carpenter.

In 1672, Jeremiah Dummer, son of Richard (?) of Boston, sold to Gregory Cooke, shoemaker, Cambridge, 112 acres lying partly in Cambridge (Angier's corner, Newton) and partly in Watertown, with house and barn thereon, for £145; bounded on the east by the highway, north by the Charles river, south by Edward Jackson and Daniel Bacon, and west by Thomas Park's land, and this included the

weir lands. The old Gregory Cooke mansion stood on the southerly side of the site of Mr. Henry Fuller's house in Newton.

Abraham Williams of Watertown, freeman in 1652, purchased in 1654 a house and six acres of John Callon or Callow, and married Joanna Ward about 1660, and in 1662 purchased a house from Wm. Clements situated on the Country Road, (Galen Street) southerly from Gregory Cooke's farm. The present Williams Street leading from Galen, was named from him, as he dwelt near it on the west side of the main-road. James Barton, a rope-maker, in Boston, of large means, in 1688 bought 103 acres in Newton, a portion of which bounded on the Mayhew farm. He bought other lands extending over the Watertown line, and erected his dwelling-house on the south side of Charles river, probably situated not far from the present Watertown Street.

He and his wife Margaret were buried in Newton. His daughter Ruth married John Cooke, the grandson of Gregory. His son John sold the homestead to Daniel Cooke.

Gregory Cooke died in 1690-91 and his only son Stephen administered upon his estate, appraised April 7, 1691, at £191.11s. His second wife, the widow Susanna Goodwin, married September 15, 1691, Henry Spring, who died 1695. He was from 1680 to 1695 the town "prizer" of Watertown.

Stephen Cooke was born 1647, married November 19, 1679, Rebecca, the daughter of Thomas and Mary Flagg of Watertown; admitted into full communion in Mr. Bailey's church March 4, 1687-88, and possibly chosen deacon June 30, 1697; died in Newton, 1738, aged ninety-one. He built a grist-mill on his land near Smelt Brook, which he conveyed to his son Stephen in 1733.

Stephen Cooke's large estate came into the possession of his grandsons, Stephen and Daniel.

Daniel, who married in 1722, for his second wife Mary, the daughter of Abraham and Elizabeth (Biscoe) Jackson, died in 1754, his three children having died before him. In 1735 his father deeded to him the homestead, probably the house being the one occupied by Gregory, his grandfather. Daniel left his large estate to his nephew, Captain Phineas, the son of his brother Samuel, of Windham, Connecticut.

Captain Phineas built in 1760 the house at present standing on the corner of Centre and Pearl Streets, over the Newton line. He married in 1759, Abigail Durant, by whom he had seven children, and died in 1784. One daughter, Mary, married Captain John Fowle, and another, Sukey, the youngest, married Dr. Walter Hunnewell.

Stephen, the brother of Daniel, had an interest in the mill on the north side of the river, which he subsequently sold. He received the mill built by his grandfather on the Cooke lands, and on September 1, 1749, he deeded it to his son John, with forty acres, with dwelling-house, barn, mill-house and corn-mill.

This tract was bounded easterly by County Road, or road to Boston, Galen Street, seventy-seven rods, and Southerly by Daniel Cooke's land.

January 10, 1782 John conveyed to his son John ninety feet of land on the Boston Road, bounded southerly by Daniel Cooke's.

Stephen's house remains standing on California Street. Close by it is that of John, the latter being a frame building with brick sides. John's son's house was a small red house on Galen Street, removed to the rear of the present frame block. A greater portion of the Cooke estate still remains in the possession of the family.

In a chamber in the John Cooke house, Paul Revere engraved the plates, and assisted by John Cooke, struck off Colony notes, ordered by the Provincial Congress.

It is stated that Benjamin Edes first stopped at this house when he escaped from Boston with his printing press, and that the first number of "*The Boston Gazette and Country Journal*" was issued from here, before he established himself near the Great Bridge. While others dispute this fact, yet like the would-be president in 1884, the south side "claim everything."

On the easterly side of Galen Street, near the Bridge, stands what has long been known as the "Coolidge tavern," built in 1740-42 by William Williams, a ship builder.

Stephen Cooke claimed all the land upon the river in the town as being within limits of the weir lands and as he had an undisputed title to all land westerly of the Bridge, he purchased in March, 1722-23, from John Phillips, a grandson of the first minister, for £60, three acres by estimation (of the old grant) to strengthen his title. The land is described as within the bounds and limits of the "Township of Cambridge."

James Barton in March, 1727, had sold to William Williams in Newton a "house-right," for £440, twelve acres of land near the Great Bridge. Its boundary line on the west and north-west was the county road.

In 1728 Stephen Cooke sold to William Williams, described as of Newton, for £16 15 s. twenty-six rods of land on the southerly side of the Charles River, bounded northerly and easterly by the county road, and westerly by the town land now laid out for a road.

The old road referred to began at the south side of the bridge at a point about opposite to the square on the north side of the river, the present Beacon square, from which the present Riverside place commences, and ran in a southwesterly direction through the present Water Street into the present Galen Street, and possibly a little southwesterly before entering the country road.

In 1742 William Williams sold his mansion house and barn with seven acres to Ebenezer Thornton of Watertown, a ship builder, who was living on

the premises. Mention is made of the "Ancient Country road running from said river between the aforesaid mansion house and said barn, across and aslant near the north-west corner of the premises into the new country road to be excepted and reserved out of this deed for said Town's use." Mention is made of a wharf twenty-feet square and a gangway leading thereto. The gangway is the present Water Street, and the wharf adjoining the line of H. Barker & Co.'s starch factory at the foot of old Factory Lane (Water Street) by an old elm tree, was owned by Samuel Hunt, a trader of Watertown. He had purchased the same in 1739 of Thornton and Williams with four acres of land for £400. In the deed he is described as a ship-builder of Boston.

Ebenezer Thornton, a trader in Boston, in 1738 removed to Watertown and engaged in the business of procuring timber for house and ship-building. The south side and adjacent territory being heavily timbered offered him ample opportunity for carrying on the business. Moreover, it was considered safer than Boston which was poorly protected from a sudden attack by an enemy.

In April, 1716, he purchased "a mill-stream, dams, etc." in Dunstable, near the New Hampshire line, and he had valuable timber interests in Dracut on the Merrimac River. The town of Boston, March 8, 1734, voted to erect fortifications within its limits and Ebenezer Thornton with Elisha Cooke, Esq., Edward Hutchinson, Edward Winslow and others were chosen a committee under this vote. They erected the fortification at, "North Battery Wharf," and "Fort Hill."

He married in 1721 Elizabeth Gilbert, the daughter of Capt. Thomas, a famed shipmaster and navigator of Boston, and son of Jonathan Gilbert, of Connecticut, (an ancestor of mine) who was Colony Marshal from 1636 until 1676-77. She died in Watertown, June 10, 1740, aged 38 years, 4 months, 3 days. After her death he married the widow of Matthias Cussens.

Possibly Thornton and Williams were engaged for a short time in the business of procuring lumber for household and shipping purposes, though he had removed to Mansfield, Conn., when he sold to Thornton.

In 1740 Richard King had settled in Watertown, and in 1742 Thornton sold him a piece of land on which he erected a shop and engaged in the same business with Thornton. In 1745 Gov. Shirley appointed him a commissary of the troops destined for Annapolis Royal. October, 1746, he mortgaged his shop and lot to Jonas Coolidge "for surety in consideration the within named Jonas was my surety for money due to the Govt. when I went on the service to Annapolis Royal." February 16, 1740, he petitioned the selectmen for leave to erect a sawpit or scaffold at the south end of the Bridge, which was denied. In 1746 he removed to Scarboro', Maine, engaged in trade, became a large exporter of lumber,

and the wealthiest man in town. His son, Rufus, who died in 1829, aged 74, was the celebrated jurist, and William, who died in 1852, aged 84, known as General King, was the first governor of Maine, and at one time one of the largest ship owners in the United States.

There is no doubt that ship building to a limited extent was carried on at this point, and that the old bridge slip was used for that purpose, and probably Hunt's wharf, known latterly as Coolidge's wharf.

Ebenezer Thornton's eldest daughter, Elizabeth, born March 4, 1722, married Jonas Coolidge, the house carpenter, in 1742-43. Ebenezer sold him this house with three acres of land for £300 in August of that year. Jonas sold a moiety in the dwelling-house, and about five acres of land to his nephew Nathaniel Coolidge, Jun., in 1762.

Becoming "non compos" and placed under guardianship, in 1764 a partition of their interests was legally made, by which Nathaniel obtained the northerly part of the home lot and dwelling-house and subsequently control of the remaining half.

Jonas Coolidge died in the spring of 1767.

Jonas Coolidge's elder brother Samuel, known as "Sam, the schoolmaster," a graduate of Harvard in 1724, was appointed town school-master in 1725. He was librarian of Harvard College 1734-35. Also chaplain for a short time on Castle Island. He became intemperate and mentally deranged. He was accustomed to wander from home as a vagrant, sleeping in barns and out of doors, and the selectmen were continually in trouble about him by complaints coming from these selectmen of Roxbury, then from Charlestown, then Dorchester, to be repeated continually. Nov. 4, 1743, Thanksgiving day, a collection was taken during church service to be laid out in clothing for him.

In 1751 he was again appointed school-master, but soon wandered off according to his custom. "At a meeting of the selectmen at Mr. Jonathan Bemis', on the 4th of December, 1752, Mr. Samuel Coolidge was present, and the selectmen gave him a thorough talk relating to his past conduct, and what he might expect if he did not behave well in the future they declared unto him that they put him into the school as a punishment, and if he behaved well he should not be wronged, and that he was to begin the school the 11th day of this December. Mr. Coolidge complained that he wanted a winter coat; desired Mr. Bemis to get him a bear skin coat, and get Mr. Mead to make it, and to give the selectmen an account thereof."

The demented man when walking along the way was continually muttering and talking to himself in Latin, and once passing an apothecary shop, drenched by a pouring rain, was addressed by some one from within in these words: "Domine Coolidge! pluit tantum nescio quantum. seisme tu"? (Master Coolidge, it has rained very hard, I don't know how hard, do you know?) Quick as a flash the angry man seized a stone, sent it crash-

ing through the window, breaking glass and show bottles, and said: "Fregi tot nescio quot, seisme tu"? (I have broken a great many things, I don't know how many, do you?)

He died January, 1767, aged sixty-three years, and was buried at the town charge.

Nathaniel Coolidge, Jr., kept a tavern, here as a licensed inn-holder from 1764 to 1770 when he died, and was succeeded by his widow, Dorothy (Whitney).

By the town records, it appears that the widow Ruth Child, daughter of Caleb Church the miller, was licensed as an inn-holder in 1717-18 near the bridge on the south side of the river, but where, cannot be located; possibly on or near this spot.

While there had been for some years a great deal of commercial life in Watertown, still in the early part of the Revolutionary war it was a very important and busy town, for within its limits the Provincial Congress and the "Committee of Safety" were holding continual sessions. The town was crowded with temporary residents and tradesmen from Boston, who were often entertained by private hospitality. The public schools were closed as the buildings were used for armories and the streets daily resounded with the noise of life and drum and marching men.

This tavern known as "The Sign of Mr. Wilkes near Nonantum Bridge," was a popular resort for gatherings, for town and social meetings were often held within its doors. In the winter of 1775, the Massachusetts House of Representatives held a session in it while workmen were engaged in putting up stoves in the meeting house. Here, in 1775, it was agreed, was to be the rendezvous for the "Committee of Safety" in the case of danger. On its northerly side along the river, was the road leading from the ferry that for many years was used between the north and south shores.

In front of the tavern door once stood a post upon which was a swinging decorated sign board upon which was the portrait of King George III., where it hung until the news of the Declaration of Independence was received, when it was taken down and afterwards raised to its former position with the portrait of George Washington upon it.

Here during the war, many distinguished persons in the colonies, as well as officers in the American and British armies, were entertained. The bar-room was the middle room, facing Galen street, and British officers stifled their shame at the continued American success in steaming hot flip, for which they paid in gold, which the government compelled Madam Coolidge, much to her disgust, to exchange for colonial currency.

The selectmen paid "widow Dorothy Coolidge for Rum, the 19th day of April, for the men in the Lexington battle, 12s. 8d.," the town records mention.

The Rev. J. F. Lovering in his centennial oration, delivered July 4, 1876, stated that "General Washington stopped here on his way to take command of

the army at Cambridge, July 2d, 1775 and ate breakfast, Mrs. Coolidge making for him journey-cake, i. e., Johnny-cake." While Leathe's version is, that on Sunday, July 2d, at 12 o'clock the Commander-in-Chief with General Lee arrived and reached the meeting-house where after divine service, Congress assembled to receive him. He dismounted and was presented at the door of the broad aisle with an address by the Speaker, James Warren. After an hour and a half spent he proceeded to Cambridge where he arrived at 2 o'clock. On the next day under the elm tree near the Common he formally took command of the American army.

On December 11th, at noon Mrs. Washington attended by her son John Custis and wife reached Watertown in her own carriage drawn by four horses, colored postillions in scarlet and white liveries, military escort and a guard of honor. Two hours were spent at the Fowle house as the guest of Mrs. Warren, and the party arrived in Cambridge at 3 o'clock.

During the winter season, dinner and evening parties were given in town, which were attended by the General and Mrs. Washington, and probably the town has never witnessed such social gaiety since that time.

October 17, 1789, President Washington again visited Watertown on his way to Boston, and was received with great enthusiasm, the ringing of the meeting-house bell and royal salutes, quite in contrast to his first reception, when powder and shot were too scarce and valuable to be thus used. On his return, November 5, he came from Lexington to Watertown over the same road that the minute men had taken April 19, 1775; rode quietly without escort to the Coolidge tavern for supper and rest. He took supper in the public dining-room which extended the entire length of the south end of the house. At the table he was served by attendants who wore white dresses and neat checked aprons. He lodged in the northwest chamber next to the river.

This property latterly came into the possession of the late Mr. John Brigham, who lived here while he had a lumber yard near by along the river.

Across the lane, the present Water street, was situated the house of Samuel Sanger, then Daniel, later Abraham Sanger, the boatman, who early in the present century, twice or more each week, was accustomed to row upon the river to and from Boston as a passenger and express carrier.

A few rods south upon the same side of the road once stood an old house, the mansion house of John Hunt, representative from the town to the General Court in 1741, 1751 to 1758; a farmer of the excise in 1752, and retail trader from 1740 to 1770. Jonas Coolidge in 1745 sold him eleven acres with the old mansion built and occupied by James Barton. It was built about 1715. It was from the windows of this house flashed the light long past midnight that told that Adams, Warren and Gerry were in counsel, an-

swered back from a score of farm-houses where the women were busily engaged in baking and cooking for the soldiers in camp. Here Major General Joseph Warren lodged, and in the southwestern corner room on the first floor ate his breakfast, June 17, 1775, going directly to Bunker's Hill, where he gave his life for his country. Before he started he urged upon the ladies of the household to prepare lint and bandages, saying "That the poor fellows would want them all before night." Slowly on horse-back he went down the hill to the bridge but galloped back and again bade them all farewell.

Had he a premonition that he should never see them again?

William Hunt, son of John, a graduate from Harvard in 1768, a lawyer and justice of the peace, representative in 1784-1794; 1800-1801, had married Mary Coolidge, the daughter of Nathaniel and Dorothy. When Washington first came to Watertown, she was about twenty-one years old, and probably charmed him with her handsome face and maidenly ways, for in 1789, after supper, he mounted his horse, galloped across the bridge into the square, where Mistress Hunt then lived, on the west side opposite the Spring Hotel, and as the sick matron appeared at the window of her mansion he politely raised his hat as she courteously saluted him.

John Hunt was a distiller having his still next to the wharf of Samuel Hunt, with a store, and did a successful business. He had a stone wharf further to the east upon the river, not far from the bounds of Newton. In 1768 he sold his homestead and distillery to his eldest son Samuel.

The Hunt property finally came into the possession of Nathaniel R. Whitney, Jr., and was the birth-place of Miss Annie Whitney, the sculptress; of Mr. Edward Whitney, who has done so much for the Public Library of Watertown, and the Society of the First Parish, although he found himself in Belmont after the incorporation of that town. In fact, this was the birth place of all Mr. Nathaniel R. Whitney's children, and was occupied by him until his removal to East Cambridge on being appointed clerk of the Court. A few years ago the property was purchased by the late Mr. F. E. Howard and the building removed to Water Street, where it is now devoted to tenants of a humbler class.

The death of Washington was greatly mourned in this town and a funeral service to his memory performed with great pomp and solemnity. A negro slave, who, when Washington had been a guest at his master's house, had served him, wore as his emblem of mourning an old scarlet coat worn at the Battle of Bunker Hill, trimmed with crape, and stood thus arrayed in the meeting house during the service on successive Sabbaths to the great amusement of the worshippers.

Watertown square and the main street for many years was a lively spot and the merchants did a thriv-

ing trade. Money was scarce, but barter and exchange was carried on with the farmers for miles around.

"Angier's Corner," (Newton) was named from Oakes Angier, the son of the Rev. Samuel Angier, a saddler by trade.

In 1742 he met with Samuel Jackson and Daniel Cooke, purchased from Jonas Coolidge 11 acres with an old house. He erected a tavern on the site of the present Nonantum House which he kept for many years.

It was a small hamlet with about a dozen houses, two taverns and a small store. It was nicknamed "Hell's Corner" from the disreputable orgies that frequently took place in one of the taverns. Some of the more progressive citizens deemed it would be more advantageous if the territory was annexed to Watertown, and in March, 1779, a committee was chosen on the part of the town to join with some of the inhabitants of Newton in a petition for the annexation to Watertown, but the movement was unsuccessful. In March, 1782, the attempt was again undertaken with like result.

The records show that in April 1781, the town voted to establish a poor-house upon the south bank of the river, but this vote was never carried out.

A few years later Esquire Wm. Hull, afterwards General Hull, undertook the scheme of having a large town or village at Newton Corner to include the greater part if not all the territory on the south side.

In September, 1794, he purchased from Stephen Cooke some fifty acres with dwelling-house and barn—including the Phineas Cooke house, with the right to improve the upper mill-pond (Boyd's), for fish-ponds, baths, etc., and mortgaged the same to Cooke for £1211. He was living in the Phineas Cooke house, while building the Nonantum House which he afterwards occupied, and had a wharf on the Charles river near the Watertown line. The present William Street leads direct to the spot, near which was his malt-house. He became somewhat financially embarrassed and in 1805 conveyed all his interest in this Cooke tract to Eliakim Morse, a wealthy merchant in Boston, who paid the mortgage and released the Phineas Cooke homestead.

Dr. Eliakim Morse studied medicine with his uncle in Woodstock, Conn., came to Boston, engaged in foreign trade and accumulated a large estate. He built the colonial mansion that stands upon the most elevated spot of the Cooke estate. It was built by days' work and when finished was the finest mansion in style and situation for miles around. It was through his efforts the country road was named Galen Street in honor of the father of medicine among the ancients, the road having been widened and made more uniform and beautified with trees. After his death the homestead passed into the hands of Mr.

Harrison Page, while the meadow-land near Newton was mapped out into building plots. Morse and Chestnut (now Boyd) Streets, were laid out, and the land thrown into market, and settled upon mostly by persons allied in all respects to Newton. On this tract formerly stood a fine grove of handsome chestnut trees. Back of the Morse estate near Watertown Street, stands the homestead built by Capt. Samuel Somes who married one of the daughters of Stephen Cooke. Somes was a handsome, vivacious man of free and convivial habits and the captain of a "crack" military company in Boston known as the Fusiliers. Once the company had a field day on this territory which attracted a great crowd from the surrounding villages.

Next northerly to the Dr. Morse estate stands the Abraham Lincoln house built 1824-26 by Stephen Cooke. On the easterly side of Galen Street, adjoining Water Street, the early portion of this century was built what is at present known as the "Stone house." It was built before 1768 by John Hunt, either for himself or his son John, who was his business partner. He sold it to Josiah Capen in 1772.

In 1832 it was kept by Nathaniel Broad, as a tavern, who died there. Rev. Theodore Parker in the month of April of that year opened a school in an old bakery that stood in the rear of this mansion, formerly Hunt's shop, but since removed to the corner of Maple Street, (opened within a few years) and Galen. Having leased it he personally assisted in flooring it, made a rude wainscot, a dozen desks, and opened school with two pupils one of whom was a charity scholar. Here he met Lydia D. Cabot, his future wife, who was boarding in the same family. He taught school for two years with great success until he had earned money enough to permit him to pursue his theological studies. He preached occasionally on Sabbaths in the town-hall and elsewhere during this time, and enjoyed the friendship of the Rev. Convers Francis.

Close by the division line, on the corner of Galen and Williams Streets, stands the old Segar house, built by Ebenezer Segar in 1794. Connected with it in the rear was an extensive building and a brick shop where, in 1820, the New England Lace Company had their factory. The street was called Lace Factory Lane. In 1823 the factory was removed to Ipswich. The originators of the factory with some of the workmen came from Nottingham, England, as their factory there had been broken up by those who were opposed to lace being made by machinery instead of by hand, under the Heathcoat patent. Many of the leading young ladies found pleasant and congenial work in the factory and the departure of the works from the town was regretted.

Subsequently the property belonged to Stephen Perry, and was the boyhood home of William Stevens Perry, the present Episcopal Bishop of Iowa. In this house were held the first services of that denomina-

tion gathered in Newton, and the parish of Grace Church organized.

On the opposite corner stands the house of Rev. A. B. Earle, the well-known evangelist, occupied during his life-time by lawyer Alfred B. Ely, of Newton, known in civil and military life, who died July 30, 1872.

In March, 1827, the Newton and Watertown Universalist Society was organized, and on August 15th it dedicated a house of worship, situated on the corner of Galen and Water Streets.

It was dissolved in 1866 and the town purchased the building for a school-house, the present Parker School, named in honor of the late Rev. Theodore Parker. The people of the town of that time remember the frequent town-meetings necessary to secure this building to the use of the schools. The tactics of 1695 and of many another time, when public improvements have been finally voted against the wishes of conservative opponents were used, yet without an appeal to the Governor.

From Galen Street by the bank of the Charles River next to the Coolidge tavern is an ancient way, a little lane, a gangway as called in early deeds, running a short distance to Hunt's wharf, then turning abruptly into Factory Lane, running westwardly up the steep hill to Galen Street by the Parker School—now known as Water Street. By and upon the river bank there have been and are located many industries. Besides the ship building before mentioned, was the potter's shop of Samuel Sanger in 1771.

Beyond Brigham's lumber yard and wharf was formerly a hat-factory,—afterwards a wire-factory,—now occupied by the Warren Soap Works, commenced in 1868. Next are the works of the Newton and Watertown Gas Light Company, with the electric plant lately located. Beyond was the wharf and warehouse of Samuel Hunt, which came into the possession of John Hunt. At the end of this lane stood the distillery and store of John Hunt, which he sold to his son Samuel, with his wharves and dwelling-house, in 1768. Some fifty years later it was changed into a starch-factory, which business still thrives under the management of H. Barker & Co., though the buildings are of later date. Factory Lane was a private lane that led by the distillery through Mr. Hunt's estate to the Samuel Hunt wharf.

Among the other factories may be mentioned the wool factory of Capt. Joseph Crafts, later John W. Hollis's on Galen Street; the knitting-factory of John W. Tuttle, succeeded by the Porter Needle Company, later by the Empire Laundry Machinery Company, on California Street; the bicycle factory of Sterling Elliott and the Stanley Dry-plate Company on the river bank south of Maple Street.

This ice business of Howard Bros. is located on California Street. The White and the Derby type factories, no longer in existence, were in the vicinity of Watertown Street. On Morse Street, near the

ponds, still remains an old silk-mill, now a paint-mill, and the factory of knit and woolen goods of Mr. Thomas Dalby, while on the same street near Galen is Sanger's sash and blind factory.

In 1871, by Chapter 184, the Legislature granted the right to the Massachusetts Central Railroad Company, to extend its tracks from Weston through Waltham, Newton, Watertown, Cambridge and Brighton, or any of them to some point adjacent to the location with the Boston and Albany Railroad Company, and it was expected that the site would be laid out along Water Street to Faneuil to connect with the Boston & Albany Railroad.

In 1868, Chapter 151, the "Nonantum Horse Railroad Company" was chartered by the Legislature. Miles Pratt, Nathaniel Whiting and James F. Simons, Jr., were the incorporators, and they were empowered to build and maintain a track from the flag-staff opposite the Spring Hotel, Watertown, to Lowe's apothecary store in Newton; the capital stock being fixed at \$50,000.

In 1874 commenced the agitation and petitioning for various causes, for the annexation of the whole or part of this territory to Newton, and ten times has this effort been made without success, though in 1889, fifty-nine out of one hundred and twenty voters were petitioners, with only eleven neutrals.

This territory financially is valuable to the town as it consists of ninety-four acres, valued with the factories and buildings for taxable purposes at eight hundred and fifty thousand dollars.

In 1888 there was completed in conjunction with the City of Newton, a system of surface drainage for Morse Field. The sewer system known as "Charles River Valley," adopted in 1889 by the State Legislature, will pass through this territory along the banks of the Charles River through Faneuil and Brighton into the main sewer in Boston and out into the harbor.

This territory well drained, supplied with pure water, electric lights, good municipal privileges at low taxation, in a few years will be covered with the homes of law abiding citizens attracted by its superior advantages.

Whatever in the future may be its municipal government—town or city—one thing is certain, the south side of Watertown has been no unimportant factor in the history of the old town of Watertown.

CHAPTER XXXII.

WATERTOWN—(Continued).

MILITARY HISTORY.

Indians.—The Revolutionary Period.—The Civil War.

THE military history of this town has never been written. Perhaps it is yet not time to separate this

important part of our common history and trace from Captain Patrick of the early train bands to Commander Edward E. Allen of the Ancient and Honorable Artillery, all that brilliant list of names of men who were so essential to the mere existence of society and who so abundantly filled the important civil posts of duty. The pages of our history are thickly strewn with military titles.

The original danger from the Indians, and during the first 150 years, is shown in the following article on the Indians by Rev. Mr. Rand. Something of the condition of military affairs can be seen in the article on the Revolutionary Period by Mrs. Bradford. The contribution of our town to the great Civil War is seen in Mr. Ingraham's record.

But the war of 1812, the Mexican war of 1845-48, and the dread of war at other times have kept alive the military spirit and brought out and trained those fitted to command or willing to serve their county in this way. These always have the respect and the gratitude of their more quiet neighbors.

THE INDIANS OF WATERTOWN.¹—Cotton Mather who is never dull says of the Massachusetts Indians: "Know then that these doleful creatures are the veriest ruins of mankind which are to be found anywhere upon the face of the earth. . . . One might see among them what an hard master the devil is, to the most devoted of his vassals. These abject creatures live in a country full of mines; we have already made our entrance upon our iron; and in the very surface of the ground among us, there lies copper enough to supply all this world; besides other mines hereafter to be exposed. But our shiftless Indians were never owners of so much as a knife till we came among them. Their name for an Englishman was a knife-man. . . . They live in a country where we now have all the conveniences of human life. But as for them, their housing is nothing but a few mats tied about poles fastened in the earth, where a good fire is their bed-clothes in the coldest seasons. . . . In most of their dangerous diseases, 'tis a powwow that must be sent for; that is, a priest who has more familiarity with Satan than his neighbors. This conjurer comes and roars and howls and uses magical ceremonies over the sick man, and will be well paid for it when he has done. If this don't effect the cure, the man's time is come, and there's an end. . . . Their way of living is infinitely barbarous. The men are most abominably slothful, making their poor squaws, or wives, to plant and dress and barn and beat their corn, and build their wigwams for them."

One other thing this versatile pen has placed on record, that the Indians in their wars with the English, finding inconvenient the yelling of the English dogs, "sacrificed a dog to the devil; after which no English dog would bark at an Indian for divers months ensuing. This was the miserable people

which our Eliot propounded unto himself the saving of." [Life of Eliot].

The inquiry arises when in Watertown's history do we first meet with Indians?

If Professor E. N. Horsford be correct, it was in that memorable battle which Thorfinn and his brother Norsemen fought with the Skraelings, this side of Cambridge Hospital, a battle-field which justly can never belong to any other than the children of Norumbega. It was then about the year 1000 that the Watertown Indians loomed up above the misty horizon-line of history.

We have, however, in the seventeenth century a sight of the Indians that cannot be questioned.

Capt. Roger Clap (so printed in Shurtleff's "Boston") came to this country in the year 1630. He arrived at Hull May 30th, in the ship "Mary and John," which "Great Ship of Four Hundred Tons," as he calls it, did nothing the colonists any farther than "Nantasket Point." There the hard-hearted Captain Squeb left them to shift for themselves, "in a forlorn place in this Wilderness." The colonists, though, "got a Boat of some old Planters" and toward the west they went sailing. They came to Charlestown, which had "some Wigwams and one House," and may have been a mighty city, but all in embryo.

This did not satisfy their ambition. Capt. Clap says that they "then went up Charles river, until the river grew narrow and shallow, and there we landed our goods with much labor and toil, the bank being steep, and night coming on, we were informed that there were hard by us Three Hundred Indians. One English Man that could speak the Indian language (an old Planter) went to them and advised them not to come near us in the Night; and they hearkened to his Counsels and came not. I myself was one of the Sentinels that first Night. Our Captain was a Low Country Souldier, one Mr. Southcot, a brave Souldier.

"In the Morning some of the Indians came and stood at a distance off, looking at us, but came not near us, but when they had been a while in view, some of them came and held out a great Bass toward us; so we sent a Man with a Bisket and changed the Cake for the Bass. Afterwards they supplied us with Bass; exchanging a Bass for a Bisket Cake, and were very friendly unto us.

"O Dear Children! Forget not what Care God had over his dear servants, to watch over us, and protect us in our weak beginnings. Capt. Squeb turned ashore Us and our Goods like a merciless Man, but God, even our merciful God, took pity on us; so that we were supplied, first with a Boat, and then caused many Indians (some Hundreds) to be ruled by the Advice of one Man, not to come near us; Alas, had they come upon us, how soon might they have destroyed us! I think we were not above Ten in Number. But God caused the Indians to help us with fish at very cheap rates."

In this account which Capt. Clap addressed to his

¹Quoted from Rev. EDWARD E. RAND.

children a short time before his death, he proceeds to say that the party did not stay there on the banks of the Charles many days. They had "orders to come away from that Place (which was about Watertown) unto a place called Mattapan (now Dorchester)."

When Capt. Clap told his simple, touching, reverent story, little did he think that his item about the bass would suggest to some ingenious mind a scene for our picturesque town seal.

The inquiry arises who were these Indians found on the banks of the Charles?

A part of the aboriginal population called the Massachusetts Indians. Drake, in his work on the Indians, tells us that it has been affirmed that Massachusetts means, "An hill in the form of an arrow's head." Roger Williams said that the Massachusettses were called so from the blue hills.

Gookin, in his Historical Collections, says :

"The Massachusetts, being the next great people northward, inhabited principally about that place in Massachusetts Bay, where the body of the English now dwell. These were a numerous and great people. Their chief sachem held dominion over many other petty governors. as those of Weechagaskas, Neponsett, Punkapaog, Nonantum, Nashaway, some of the Nipmuck people, as far as Pokontakuke, as the old men of Massachusetts affirmed. This people could, in former times, arm for war about three thousand men, as the old Indians declare. They were in hostility very often with the Narragansetts; but held amity, for the most part, with the Pawkunnawkuts, who lived on the south border, and with the Pawtucketts, who inhabited on their north and southeast limits. In An. 1612 and 1613, these people were also sorely smitten by the hand of God with the same disease before mentioned in the last section; which destroyed the most of them, and made room for the English people of Massachusetts colony, which people this country and the next called Pawtucket. There are not of this people left at this day above three hundred men, besides women and children."

The Indian names occurring in these "collections" have all the peculiarity of Indian pronunciation. Some of the words have a sound as easy, sonorous and musical as a brooklet's flow, and to pronounce others, one fears he must lose his teeth before he gets through.

We recognize Nonantum in the quotation as a name preserved to-day in this neighborhood.

The Indians, naturally, would be attracted to the Charles River Valley. Here they found a water-way for their canoes. Here in this neighborhood were unfailing and abundant fisheries. It was a loamy land for their corn. It sparkled with springs. We then can readily imagine how its smoke from their fires were mingled with the haze hanging above our beautiful fields. I recently visited the land in the rear of Mr. Cassidy's residence and on the banks of the Charles River. That industrious historical student, Mr. Jesse Fewkes, has told me of a bluff once in that neighborhood, but now removed. His testimony is that "the verge of the bluff about 300 or 400 feet to eastward from the southeast corner of Mason's land" contained many Indian relics. "After the black loam had been removed," there were found by him "nearly one hundred implements of stone."

Indians once peopled all this land, as has been

shown. What was our beautiful winding Mount Auburn Street but an ancient Indian trail? That trail, with its picturesque turns through forest and across meadow, only needed to be widened and leveled that our ancestors might use it.

We have an Indian name associated with the town in the title Pequossette, or as in the town records, Pequussett.

One summer day in 1630, into this Indian land came the head of that long column of civilized life that has been streaming through Watertown for over two hundred and fifty years. Those first settlers came up the river in boats, landing somewhere on the present Arsenal grounds, it has been asserted, but more recent opinion favors the old landing-place in the rear of Cambridge Hospital. They must speedily have come in contact with Indian life, and it is a very interesting question whether there may have been any meeting for a land-trade with the old occupants of the soil, and whether the men paid anything for the land they took. As far as we have any written evidence, it was squatter sovereignty of a very bad, bold kind that was practiced, and to-day we are living on ground that, in one sense, has never been paid for. It will interest us to know that in the early history of the Colony an interesting controversy raged on the subject of the purchase of land from the Indians. Roger Williams was a storm centre of that controversy.

He differed with the General Court of the Colony in several particulars. In one he questioned and denied the right of the civil power to say what a man should believe, or how he should worship, or whether a man should worship at all. That very convenient assumption of power on the part of the King to grant and distribute Indian territory as he might please, Roger Williams also disputed. He prepared a document in which he defined his views on ownership and soil.

No Indian, though, ever closed his wigwam door on Roger Williams. Providence Plantation was paid for when the exile started his new home.

If the first Watertown settlers, unlike Roger Williams, took the land they found, but made no payment for it, the conscience of the public was not entirely at ease upon the subject. We find a spasm of repentance in an act of the General Court, Sept. 6, 1638: "It was agreed that the Court of Assistants should take order for the Indians, that they may have satisfaction for their right at Lynn and Watertown." This seems to have been only a preface to other action. March 12, 1638-39, "the Court desired Mr. Gibbons to agree with the Indians for the land within the bounds of Watertown, Cambridge and Boston." Still again on May 13, 1640, the Court took action: "it was ordered that the £23-8-6 laid out by Captain Gibbons shall be paid him, vidt. £13-8-6 by Watertown and £10 by Cambridge; and also Squa Sachem a coat every winter while she liveth."

Whether Squa Sachem went round every winter

gay and comfortable in Cambridge's new or second-hand finery, I cannot say. The matter of greater interest to us just now is how much land that piece of Cambridge dry goods may have helped to pay for. This is Bond's interpretation of the whole transaction: "it was probably the Indians' claim to the 'ware lands' and Nonantum on the south side of the river. This conjecture is favored by the circumstance that Cambridge (Newton) and Boston (Muddy River) were embraced in the commission, and that Watertown and Cambridge paid the expense."

In 1671 the Indians tried to buy back the previous fishing property and privileges in Watertown with which they had parted.

All the above attracts our curious attention. Here in this beautiful Charles River valley abounded the Indians, owning all these lands, and in arrow-tip, spear-point and hammer-head they have left along the green river banks, by pond, and spring, and brook, the chirography of their ownership. And of any payment for that territory as a whole, what evidence have our ancestors left behind?

The Charles River valley was traversed by Indian raids, as when King Philip's warriors swept their swath of fire through that little Medfield hamlet by the winding river. Indians though did not fire Watertown, which was so far down the picturesque valley. Our town was rather a garrison-house to which the settlers of other towns might flee. It became, too, a reservoir from which went out streams of aid to those in distress.

It is true there was friction accompanying the intercourse of Watertown people with the Indians. There was too much human nature on both sides to assure smooth running of all the machinery. The very first year of the young colony's life, trouble broke out among the servants of that Sir Richard who headed the Watertown colonists.

There is in the colonial records an item proving this: "Upon a complaint made by Sagamore John and Peter, for having two wigwams burnt, which upon examination appeared to be occasioned by James Woodward, servant to Sir Richard Saltonstall, was therefore ordered that Sir Richard should satisfy the Indians for the wrong done to them (which he did by giving them seven yards of cloth), and that, his said servant should pay unto him for it at the end of his term, the sum of £ 5 0 0."

Gov. Winthrop in his history makes reference to a Watertown man who was guilty of putting temptation in the way of the Indians. This is Winthrop's reference to it made under the date of Sept. 4, 1632, in the Governor's famous diary-history:

"One Hopkins of Watertown was convict for selling a piece and pistol with powder and shot to James Sagamore for which he had sentence to be whipped and branded in the cheek. It was discovered by an Indian, one of James' men, upon promise of concealing him (for otherwise he was sure to be killed)."

Savage, in his notes on the text of Winthrop's history, adds this quotation from the colony records:

"Hereupon it was propounded if his offence should now be punished hereafter by death." The raising of this question shows how serious an evil in the mind of somebody was this traffic in ammunition with the Indians. The proposition though, was not allowed to embarrass the men in council, for they put in practice what has proved to be a convenient device nowadays: "Referred to the next court to be determined." One escape from any perplexity to-day is to bequeath its settlement as a thorny inheritance to the people coming after us.

Watertown Indians were not involved in a bloody war to which I am about to make reference, the Pequot War, but it is a singular fact that a Watertown man was the innocent occasion of it. That was John Oldham. This is Francis' version of Oldham's fate: "He became a distinguished trader among the Indians, and in 1636 was sent to traffic with them at Block Island. The Indians got possession of Oldham's vessel, and murdered him in a most barbarous manner. The boat was discovered by one John Gallop, who on his passage from Connecticut was obliged by change of wind to bear up for Block Island. He recognized Oldham's vessel, and seeing the deck full of Indians, suspected there had been foul play. After much exertion and management, he boarded this and found the body of Oldham cut and mangled and the head cleft asunder." Winthrop's account of the discovery is very realistic. You can seem to see the little pinnacle off on the blue water, while John Gallop courageously dashes in upon them, scattering them like a lot of ship rats that were swarming on the deck. It was a foul, bloody murder they had committed.

When the news was carried home, flying from hamlet to hamlet, it aroused an intense excitement. The fighting men of the towns were quickly on the march. In August ninety men were sent off to find and punish the savages. One of the commanders was Ensign William Jennison. He acquired glory enough from that campaign to be made a captain, the next month of March. George Munnings, another Watertown man, was not so fortunate. He came home again, but left an eye behind him, so that the Court gave him five pounds and "the fines for one week," whatever those may have been. This campaign only made another necessary. The succeeding spring, Massachusetts resolved to equip and send to the war one hundred and sixty men, and Watertown was directed to raise fourteen.

The now Capt. William Jennison was on the committee to marshal and furnish that force, and also on a committee to divide a quota of fifty additional men among the towns. Watertown's share of glory this time was four men. These figures would prove that our town contained about one-twelfth of the fighting force of Massachusetts. Prominent in this Pequot campaign was Capt. Patrick, of Watertown.

Connecticut had a hand—a bloody one—in this war. Her forces were commanded by Capt. John Mason. It is thought the Robert Seeley next in command to Mason may have been a Watertown man who had moved to Connecticut. Bond says, "probably." I would that it might be shown that no Watertown man had a hand in that part of the fight. Winthrop says, "Our English from Connecticut, with their Indians and many of the Narragansetts, marched in the night to a fort of the Pequods at Mistick, and besetting the same about break of the day, after two hours' fight they took it (by firing it) and slew therein two chief sachems and one hundred and fifty fighting men, and about one hundred and fifty old men, women and children, with the loss of two English, whereof but one was killed by the enemy."

This fort was surprised at an early morning hour. After the astonished sentinel's cry, "Owanux! Owanux!" (English! English!) came a volley from Mason's men. These now forced their way into the enclosure, finding sixty or seventy wigwams and a foe bewildered and in their power. The cry of frightened savages confused by this fierce, abrupt assault rent the air. How suppress them? "Fire the wigwams!" some one must have cried. The fire-brand was adopted as a weapon.

"This decided the battle," says Barry. "The flames rolled on with terrific speed, crackling and flashing upon the stillness of the morning air, and mingling with shouts and groans of agonizing despair, as body after body disappeared and was consumed."

With such an awful holocaust was John Oldham, of Watertown, avenged. A defence of the cruelty of this reparation has been attempted. What defence can be maintained? Oldham was savagely murdered, and the Indians were savagely punished. The only thing that can be said is that Capt. Mason's men in an hour of awful excitement, fearful lest the enemy might be too strong for them, confused and bewildered, appealed to a power which, once in motion, feels neither fear nor pity. It is a relief to know that Massachusetts, which afterwards brought up its forces and helped finish the war, did not apply the torch to any "old men, women and children."

It has been said that Watertown territory was not invaded by hostile Indians. Neither was there any insurrection raised by resident Indians. Alarms doubtless were frequent. A tremor of fear very soon agitated Watertown's early history. Francis speaks of a trouble which was misinterpreted, but shows that the early settlers of Massachusetts were apprehensive; "Among the wild animals, the wolf was a very common annoyance, and against him they were obliged to keep special watch. On one occasion in the night, we are told, the report of the musket discharged at the wolves by some people of Watertown, was carried by the wind as far as Roxbury, and excited so much

commotion there, that the inhabitants were, by beat of drum, called to arms, probably apprehending an attack from the Indians." A less formidable creature than the wolf was the occasion of an alarm recorded by Winthrop, the responsibility for which, I judge from the context, was shouldered by outsiders upon the Indians. This was one early spring-day after the settlement of our beautiful valley-town, and the alarm was succeeded by a visit from the Indians. "John Sagamore, and James, his brother, with divers sannops, came to the Governor," says Winthrop. "James Savage has some reason, though slight, for assigning the residence of these Indians to the neighborhood of Watertown, or between the Charles and the Mistick Rivers."

Concerning the alarm connected with this visit, Winthrop says, "The night before alarm was given in divers of the plantations. It arose through the shooting off some pieces at Watertown by occasion of a calf which Sir Richard Saltonstall had lost: and the soldiers were sent out with their pieces to try the wilderness from thence till they might find it."

Would that behind all the shiverings of fright there had been only a poor little calf astray in the Charles River wilderness. I have referred to the Pequot War, one season of alarm that had serious foundation. I have noticed the fact that its occasion was a Watertown man. It was in 1675 that all New England was shaken by King Philip's War as by an earthquake. It is singular how deep a dent in New England's history this war made, and yet not so strange when we remember that the combatants on either side were actuated by a grim purpose, that of extermination. To-day, any historical trace of that war is viewed with strangely fascinating interest.

Our Watertown Indians were not involved in that war. Geographically its source was too far to the south of us. The spirit of the Indians in this neighborhood made a still greater separation. This was the neighborhood of the "praying Indians," to whom I shall make reference hereafter. It was an Indian whose home had been in Watertown, Waban, who was prominent in friendly warnings to the English that the dreadful war was contemplated and was surely coming. The war cloud had risen and was growing and blackening steadily, day by day. "In the mean time several of the Christian Indians had expressed their belief that a plan was on foot for the general destruction of the English in the colonies; and among these was Waban, a Nipmuck, at whose tent, amongst that people, Mr. Eliot had first preached to them in their own tongue. Waban, himself, having been the first of his tribe to be converted, became afterwards the principal ruler of the Christian Indians at Natick. In April, 1675, Waban came to General Gookin and warned him of Philip's intention shortly to attack the English; and again in May he came and urged the same, and said that 'just as soon as the

trees were leaved out, the Indians would fall upon the towns.

I shall give reasons later why this Waban may be classified as at one time a Watertown Indian. His spirit was doubtless an exponent of the motives and purposes of others in this neighborhood, his loyal heart reflecting the temper of many of his race in the Charles River Valley.

Watertown then had no conflict with its dusky-faced neighbors, as the war dragged along its bloody course. It felt the war, though, in the persons of those whom this mother of towns had sent out to people other valleys, or through those it hurried away as combatants into this awful, savage shock of arms.

Watertown people participated in the Sudbury town celebration last year, and while there a visit was made to the famous battle-ground where Captain Samuel Wadsworth, of Milton, and his brave forces so stoutly contended with the Indians—a contest that ended in a massacre of the whites. We remember what a lonely spot the battle-ground was, with its outlook on the swelling hills and across the green Sudbury valleys. Sudbury would have been a sorer sufferer in that Indian invasion had it not been for Watertown men. The Indians first attacked the settlement on the east side of Sudbury River, making pitiful bonfires of most of the houses. The people, though, made a stout opposition, and who should appear for their defense but the stalwart Captain Hugh Mason. He and other sturdy fighters from Watertown so punished the Indians that they were forced to retreat to the west side of the river. Across the wide meadows we can see them fleeing, scowling in wrath at the Watertown men, who gave them such a drubbing.

King Philip's War closed in 1676. The decisive blow was given by the English at the destruction of the Narragansett fastness in the great cedar swamp southwest of Kingston, Rhode Island. It was a blow that meant demolition, destruction, the utter collapse of the Indians, and forever, as an organized race-power here in New England. The English forced an entrance into the Indian fort, and, like their predecessors who closed the Pequot War, they summoned to their aid the same merciless weapon of fire.

We, of this day, cannot appreciate the bitter feeling aroused on both sides of the strife in King Philip's War. It developed into a process of extermination. What the Indians planned for the English, the awful barbarity of the former attested. On the side of the English there was a lamentable process of hardening. It would sometimes seem as if an Englishman put his sensibilities into an iron-clad suit of armor when the case of an Indian came before him. When we place those days in the scales and weigh them, we must not forget that there was in every direction a rough way of dealing with offenders.

Edward Eggleston incidentally brings this out in an article on pre-Revolutionary times in New England; "The New England reverence for the Sabbath tended to repress social enjoyment in the accidental encounters of Sunday, but the week-day lecture suffered from no such restriction, and was for a long time much more in favor than even the Sunday service. From all the country round, in spite of the poverty and difficult conditions of pioneer life, people flocked to those week-day assemblages. Cotton's lecture in Boston was so attractive that it was found convenient to establish a market on the same day; punishments in the stocks, in the pillory, at the whipping-post, or on the gallows, were generally set down for lecture time, perhaps in order that as large a number of people as possible might be edified by the sight of a sinner brought to a just retribution. Nor did these exhibitions of flogging, of cutting off ears, and of men sitting in the stocks, or dangling from a gallows, tend to diminish the attendance." We are not surprised when this is added: "At one time during Philip's War scarcely a Boston lecture-day passed for a number of weeks without the congregation being regaled with sight of the execution of one or more Indians."

The question here arises with fitness, Why were not any Indians in this vicinity more interested in the schemes of King Philip? The Indian nature was enough of a hot-bed to develop seeds of discontent. It has been thought that Philip's war "spread a contagion of hostility far to the southward by means of that quick intelligence which existed between the tribes."² Were our Charles River Indians less intelligent than those to the south of us? King Philip's War makes in my story a dark back-ground on which I can paint with all the more vividness and effectiveness a beautiful scene of an embassy of peace and good will by some of our English ancestors—an embassy that sounded its first message near us in this very valley, and whose growing influence developed all through this region a different kind of an Indian from the one that swung the tomahawk and shrieked the war-whoop in King Philip's War. I mean the work started by John Eliot, the famous Indian missionary.

Although pastor of a church in Roxbury, his sympathies could not be bounded by the walls of that fold. His affections went out to the great, unshepherded flock in the forests and by the rivers, and he resolved to reach these children of another color and another race. The first step was a knowledge of the Indian tongue. It has been told of him that "he hired an old Indian named Job Nesutan to live in his family and to teach him his language. When he had accomplished this arduous task, which he did in 'a few months,' he set out upon his first attempt."³

¹ *The Century*, "Nathaniel Bacon," by Edward Eggleston. Vol. 40, p. 141.

² "Biography and History of the Indians of North America," by S. G. Drake. Book 2, p. 111.

Eliot himself, in "A true Relation of Our Beginning with the Indians," which at the time he modestly kept anonymous, has told this story: "Upon Oct. 28, 1646, four of us (having sought God) went unto the Indians inhabiting within our bounds, with desire to make known the things of their peace to them. A little before we came to their Wigwams, five or six of the chief of them met us with English salutations, bidding us much welcome; who leading us into the principal Wigwam of Waaubon, we found many more Indians, men, women, children, gathered together from all quarters round about, according to appointment, to meet with us and learn of us."¹

Eliot spent three hours with his Indian hearers, very plainly talking to them about their duty. They declared they were not weary, "but wee resolved," he adds, "to leave them with an appetite; the chief of them seeing us conclude with prayer, desired to know when we would come again, so we appointed the time, and having given the children some apples and the men some tobacco and what else we then had at hand, they desired some more ground to build a town together."

The interesting point comes up where occurred this first meeting destined to have such an effect, to be a little spring from which would gush out the beginnings of a wonderful river.

Gookin in his reference to Eliot declares, "The first place he began to preach at was Nonantum, near *Watertown mill*, upon the south side of Charles River, about four or five miles from his own house, where lived at that time Waban, one of their principal men, and some Indians with him."² How near Watertown mill did Eliot begin his labors? Inside the boundaries of the old town? Nonantum was an indefinite patch of Indian territory, and stretched on toward the busy rumbling mill, and "near the mill" naturally leads one to locate the wigwam of Waban inside of that hazy, old-time Watertown line. As a Watertown-man, I may not have the least doubt in the world that the little spring with its wonderful outflow was on Watertown ground. I have called Waban a Watertown-man. As a student seeking historical evidence, I can only say that "near the Watertown mill" leads me to infer that Waban probably built his wigwam in old Watertown, which, as a man of wisdom, he would surely do.

It would take a long paper to hold inside its limits the story of John Eliot's wonderful work. The "praying Indians" became a distinct and large class in New England life. They had their villages at Natick, at Pakemitt or Punkapaog (Stoughton), Has-sanamsitt (Grafton), Okommaamesitt (Marlboro'), Wamesit (Tewksbury), Nashobah (Littleton), Magunkaquoq (Hopkinton).

Gookin calls these "the seven old towns of praying Indians." There were others in Massachusetts, but I mention only these. Waban's history is that of an interesting character and of an old neighbor. He moved finally to Natick. "When a kind of civil community was established at Natick, Waban was made a ruler of fifty, and subsequently a justice of the peace. The following is said to be a copy of a warrant which he issued against some of the transgressors: 'You, you big constable, quick you catch um Jeremiah Offscow, strong you hold um safe, you bring um, afore me, Waban, justice peace.' A young justice asked Waban what he would do when Indians got drunk and quarreled; he replied, 'Tie um all up, and whip um plaintiff, and whip um fendant, and whip um witness.'"³

Waban was a good friend of the English. From his class the praying Indians came sympathetic neighbors in peace, and active allies in war. They were a bulwark to our interest in the colonial life. If there had been ten John Eliots or a less number even in New England, peace everywhere would have been regnant. As it was, the Indian character in the Charles river valley which includes so much of old Watertown, was powerfully influenced.

That Watertown was not insensible to the gauntlet of trials that other towns were called upon to run, has been already noticed. Hubbard commenting on a case of difference of opinion between Watertown and the government in the earliest days of our town-life, uses this language of Watertown, "they stood so much upon their liberty." Watertown always had an independent way, and would not permit unchallenged any encroachment upon its rights. It can also be said that it did not see unmoved an invasion of the interests of others. When other towns might echo with the whoop of plundering, firing savages, it marched out its fighting men to the rescue. I have spoken of the fight at Sudbury; I give only one more instance here.

When Groton was attacked in March, 1676, what action did Watertown take? Over the spring roads tramped forty of our ancestors to the relief of the assaulted town. Lancaster, like Groton, was a place indebted to Watertown for help in its early settlement. Lancaster was not forgotten when the Indians raided it. William Flagg, John Ball and George Harrington by their graves proved that Lancaster was remembered by Watertown men. Among the forms of other combatants rising out of the turmoil or the dark days of Indian strife, various Watertown men could be named who were "faithful unto death."

But Watertown in its connection with the history of the red men appears in another and still more honored character. This neighborhood not only witnessed the coming of the Gospel of Life to the Indians, but this neighborhood sent out a like embassy

¹ Collections of the Mass. Hist. Society. Vol. 4 (3d series), p. 3

² Collections of the Mass. Hist. Society for the year 1792. Vol. I, p. 198.

³ General History of New England, by Wm. Hubbard, p. 144.

elsewhere. It is an interesting coincidence too that the south side of the river witnessing the preaching of the Gospel to the Indians, gave preachers who ~~should~~ take the same Good News elsewhere. I refer to Thomas Mayhew who lived on the historic "south side," and also to his son, Thomas Mayhew, junior.

Bond in his pains-taking genealogical list refers to the very honorable relation the name of Mayhew sustained to our infant town, and speaking of Thomas Mayhew's probable arrival in 1631, says: "For the ensuing 13 years, it appears by the colonial records that few, if any other persons so often received important appointments from the General Court."¹

Watertown early lost this shining light on the other side of the river. Where it shone next and how beneficially, I will let Gookin tell out of his ancient Historical collections of the Indians in New England: "Martha's Vineyard, or Martin's Vineyard, called by the Indians Nope, which we have in the former book described hath been through the grace of Christ, a very fruitful vineyard unto the Lord of hosts, and hath yielded a plentiful harvest of converted Indians.

"The first instruments that God was pleased to use in this work at this place, was Mr. Thomas Mayhew and his eldest son, Mr. Thomas Mayhew, junior. The father was a merchant, bred in England, as I take it, at Southampton, and he followed the same calling in New England, at his first coming over which was in the beginning of the settlement of Massachusetts colony. His abode was at Watertown, where he had good accommodations of land, and built an excellent, profitable mill there, which in those first times brought him in great profit. But it pleased God to frown upon him in his outward estate; so that he sold what he had in Massachusetts to clear himself from debts and engagements, and about the year 1642 transplanted himself to Martha's Vineyard with his family. . . . His eldest son Thomas, being a scholar and pious man, after some time was called to be minister unto the English upon that Island. It pleased God strongly to incline the two good men, both the father and the son, to learn the Indian tongue of that island; and the minister especially was very ready in it; and the old man had a very competent ability in it. These two, especially the son, began to preach the gospel to the Indians about the year 1648 or 1649, as I best remember and had set appointed times to meet with them."

It was a scene of most attractive interest, these two men thus closely united as father and son, coming together in this effort to reach those so spiritually distant. The work was not only pushed upon the Vineyard, but it was carried to Nantucket and prosecuted there. These efforts met with encouraging success. In 1657, the younger Mayhew sailed for England, but reached another ~~country~~ "even a heavenly." The vessel was

wrecked, and thus the work of evangelizing the Indians at the Vineyard and Nantucket received a serious blow. It is touching to notice how this death of the son affected the noble father. It came to him as a call to a new consecration of his energies to the beloved work of reaching the Indians. Gookin testifies, "But old Mr. Mayhew his worthy father, struck in with his best strength and skill, and hath doubtless been a very great instrument to promote the work of converting many Indian souls upon these islands."

It would be a work of fascinating interest to spread out here a letter from this old Watertown miller giving the details of his work in reply to "fifteen queries" from his friend Gookin. I will only say that the Vineyard had its "praying towns" of Indians, and of Nantucket, Thomas Mayhew said, "Upon that island are many praying Indians." He testified that he had "very often, these thirty-two years, been at Nantucket." It is an interesting Mayhew-fact that not only father and son but two grandsons became identified with work for the Indians. Long and goodly and golden was this Mayhew-line reaching out from Watertown to the Indians at the Vineyard and Nantucket. When Gookin wrote his account, Mayhew was "about eighty years of age," his head white with age as ever were his miller's clothes with dust at the famous "Watertown mill." He died in the ninety-third year of his age. He is reputedly the first builder of any bridge over the Charles, and that has been classed as a foot-bridge. Dr. B. F. Davenport, in a summary of notes of official record about mills, bridges, etc., includes this from the old colonial books: "June 2, 1641, Mr. Mayhew to have 150 acres of land on the south side of Charles river of Watertown weire. The tole of Mr. Mayhew's bridge is referred to the governor and two magistrates to settle for seven years."²

That old foot-bridge built by Thomas Mayhew across the Charles? Standing in the dusty doorway of his mill and watching some red men tripping across the humble bridge, little did he then think how crowned with loving work for the Indians would be his after years. Over waters many and troublous, his own hands stretched the bridge by which his dusky brethren safely passed to the green fields of perpetual peace and joy.

Watertown thus appears in two characters; in the Mayhew family as a missionary to the Indians, and in the days of the invasion as a protector of its white brethren in peril.

The red man long ago passed away from our border. His canoe no more glides on our glassy waters, and the smoke of his fires no more clouds the painted forests of autumn. A romantic interest in him though lingers among us. This may be owing in part to a twinge of conscience that justly may visit us as we

¹ Bond, *History of the Early Settlements in New England*, 1891, 31 D., p. 87.

² Paper before the Watertown Historical Society, by Dr. B. F. Davenport, Sept. 17, 1889.

recall certain old-time dealings with him. As our ancestors and their ancestors cannot meet in this world, certainly, to settle old claims, we, the children of the white settlers, can do something, to secure for all the dusky race alive to-day, fair, impartial, even-handed treatment.

In the beautiful valley of the Charles, in the old Indian camping-ground, may this spirit of justice ever have its home.

THE REVOLUTIONARY PERIOD.¹—Watertown stood second to none in her independent spirit during the early days of the Colonists.

In 1774, when a Provincial Congress was formed, Watertown sent Jonathan Brown, its town clerk and treasurer, as its representative. At that meeting, October 3d, it was voted that "the collector of taxes should not pay any more money into the province treasury at present." On the 17th of the same month, the town voted to mount and equip two pieces of cannon. At this time the inhabitants were thoroughly awake to the dangers that menaced the country.

The port of Boston was closed, and many of the citizens had removed into the country, Watertown receiving a large share of them. They had resisted the tea-tax and submitted to many personal discomforts to maintain their principles. The women had been counseled to forego the joy of their Bohea, and we read that a number of patriotic gentlemen in this town "who used to regale themselves with the best of liquors have determined to drink only cyder and small beer for the future."

At the junction of what is now Belmont and Mount Auburn Streets, stands an old house whose aspect speaks of ancient days; it is known as the Bird Tavern. This same house, in Revolutionary days, was occupied and used as an inn by Edward Richardson. Here, under guard, were deposited arms and military stores; but for many years there had been little use for them, and the sixteen pieces of cannon belonging to the Colony proved to be quite useless when the call was made for action.

Feeble attempts towards a military organization had been in operation since the time when the quota of men from Watertown was four—in the war against the Pequods—till the years 1691–92, when the town was divided into three military precincts, under the command of Captain William Bond, of Watertown, for the First Precinct; of Lieut. Garfield, for the Second Precinct (now Waltham); of Lieut. Josiah Jones, for the Third Precinct (or the Farmers, now Weston), till the present call to arms.

The fires of patriotism were not quenched, they only slumbered on the hearthstones of the people to be kindled at need. The rusty matchlock and powder-horn, had long hung unused upon the rafters, and the fertile fields and pleasant homes bore witness that

they had beaten their swords into ploughshares and their spears into pruning-hooks.

Early in September, 1774, the town ordered that its militia should be exercised two hours every week for the three autumn months, and that its stock of arms and ammunition should be inspected.

November 21, 1774, a committee of nine was appointed to carry into effect the association and resolves of the General Congress held at Philadelphia, and likewise those of the Provincial Congress; the latter had been presided over by the Hon. John Hancock, but he had been chosen delegate to Philadelphia, and Dr. Joseph Warren, of Boston, was elected to succeed him.

Town and country were now thoroughly awake, and the call to arms was felt to be imperative, at least the call to be in readiness, and January 2, 1775, it was voted in town-meeting "that a minute company should be formed for military exercises, each man being allowed for his attendance once a week four coppers (for refreshment).

Its officers were: Captain, Samuel Barnard; First Lieutenant, John Stratton; Second Lieutenant, Phineas Stearns; Ensign, Edward Harrington, Jr.; Sergeants, Samuel Sanger, Abner Craft, Christopher Grant, Jr., Josiah Capen, Jr., Stephen Whitney; Corporals, Moses Stone, Jr., Isaac Sanderson, Jr., and Nathaniel Bright.

Two of these officers had already shown their patriotism by assisting at the Boston Tea Party, December 16, 1773,—

Captain Samuel Barnard, son of Samuel Barnard and Susanna Harrington, who was baptized June 19, 1737, and married Elizabeth Bond, daughter of Daniel Bond and Hannah Coolidge. He afterwards received the rank of major and died August 8, 1782.

Second Lieutenant Phineas Stearns, a farmer and blacksmith, son of Josiah Stearns and Susanna Ball, born February 5, 1735–36. He became a Captain in the Continental Army, and led his company at Dorchester Heights, and served at Lake George in 1756. He was offered a colonel's commission, but declined it on account of family cares, and after the evacuation of Boston he discontinued in the public service. He married Hannah Bemis, eldest child of Captain Jonathan and Huldah (Livermore) Bemis. Second he married Esther Sanderson, a cousin of his first wife. He died March 27, 1798.

Another Watertown citizen assisted at the destruction of the tea,—John Randall, son of John and Love (Blanchard) Randall. He was born October 2, 1750. He married Sarah Barnard, daughter of Jonas and Abigail (Viles) Barnard. He also served in New York one year.

On the morning of the memorable 19th of April, 1775, the Middlesex regiment under Col. Thomas Gardner assembled at the Watertown meeting-house.

Rumors had reached the town, through the messenger Paul Revere, of the advance of the British, and

¹ By Ruth A. Bradford.

Gardner in the command, and his regiment was hereafter styled the Twenty-fifth Regiment of the Continental Army, and belonged to Gen. Green's brigade, which was stationed at Prospect Hill. Early in March of the following year Col. Bond received marching orders for New York, where they arrived on the 30th of that month. On the 20th of April next they were ordered to Canada by the way of the Lakes. This expedition proved disastrous to the Americans, partly on account of the extreme sickness of the season. Col. Bond returned from Canada with his force greatly weakened by disease and death; and encamped on Mount Independence, opposite to Ticonderoga.

In a letter published by the *Boston Gazette* of Sept. 23, 1776, we learn that Col. Bond died from disease in camp, Aug. 31st, and was buried at Camp Mount Independence, Sept. 4, 1776. "His character was honored by a discharge of three 24-pounders and the usual volleys of musketry."

Capt. Edward Harrington, of Watertown, in this same regiment, died in the same place, Sept. 23, 1776, probably from the same cause.

The following is a list of men who served in New York in the fall of 1776: David Whitney, Daniel Cornwall, James Austin, Henry Sanderson, Daniel Sawin, Jr., Abijah Stone, Moses Stone, Jr., Daniel Cook.

The following who served at Ticonderoga for one year, 1778: Samuel Benjamin, John Benjamin, John Whitney, William Jenison, Jonathan Wellington, Elijah Tolman.

These for five months in the same place: Newton Baxter, Francis Brown, Eben Eustis, David Smith, Stephen Hagar.

In Dec., 1776, fifty Watertown men marched to New York.

In March, 1776, the militia were ordered by General Washington to reinforce the army at Dorchester Heights, and the records give a list of ninety-five men, under the command of Capt. Phineas Stearns, with Edward Harrington, Lieut.; Josiah Capen, Jr., and Stephen Whitney, Sergeants; Moses Stone, Jr., and Nathaniel Bright, Corporals; and Nathaniel Coolidge, Clerk.

In 1777 the following men were sent to reinforce the northern troops: Daniel Parker, Samuel Sprague, Henry Bradshaw, Moses Hager, Jonathan Stone, John Sawin, Jacob Sanderson, Zack Shed, Benj. Capen, Jed'h Leathe, Jonathan Livermore, Peter Richardson.

In Nov., 1777, the men who went to Cambridge were: Ruggles Whitney, Jonathan Crafts, David Bemis, Jr., Thaddeus Fuller, Stephen Harris, Thomas Learned, Samuel Wellington, James Mallard, Daniel Mason.

Up to the year 1782 we continue to find paid lists of men who served in the war at Boston, Cambridge New York and in Canada.

The most of these names are familiar as being names of families now living here, while a few others, such as Caesar Wumphy, William Notonksion, Samuel Littleman, given as hunters by occupation, indicate descent from the aborigines of the country.

The hard, dry facts, and lists of names left to us by history upon time-worn and yellowed manuscripts, but feebly express the vigorous and sturdy manhood those names represent. With keen imagination we would try to vivify them, and make those times a living present; one of the most effectual means is through the newspaper. We are fortunate on having in the Public Library the original sheets of the *Boston Gazette* and *County Journal*, the leading organ of the patriots. This paper, which was published by Edes & Gill at Boston, gave offence to the government by its spirited and fearless advocacy of the American cause.

On the 1st of June, 1775, Edes, who had more zeal and courage than his partner, escaped from Boston by night, and in a boat rowed up the Charles River, taking with him a press, and a few types by which he could continue his paper. He landed near the Great Bridge, and deposited his materials in a building near by on the north side.

Until recently this old dilapidated building might have been seen. Now the foundry of Walker & Pratt covers the site. Here, from June 5, 1775, till Oct. 28, 1776, he issued its weekly sheets, and he was made printer to the Provincial Congress and to the Assembly and the paper attained a wide popularity. We clip from its pages the following:

"TO THE PUBLIC."

"General Hospital at Cambridge, Jan. 3, 1776."

"An Appeal from John Morgan, Director General of Continental Hospitals and chief Physician to the army. Returns thanks to Concord, Bedford, Sudbury, Acton, Marlborough, Stow and Lincoln, for gifts of old linen, fine tow, saddlers, or sole leather (for tourniquets), web or quartering, tape, thread, needles and pins, and would further like old sheets and worn linen, and requests that other printers would give this notice a place in their papers."

"P. S. Blankets are greatly needed for the Hospitals, for which a suitable price will be given (and to be forwarded with all possible dispatch)."

It is of interest for us of a later generation to know through ancient documents that the hospital referred to was not one large building, but several private mansions mostly now standing in a good state of preservation,—houses deserted by their Tory owners who, on the evacuation of Boston, fled either to Halifax or England,—one owned by Capt. George Ruggles, a large square house, now called the Wells House, on the north side of Brattle street; from here the men wounded in the battle of Bunker Hill were carried out after their death and buried in the field opposite; another on what is now Arrow street belonging to Col. David Phipps, the grounds extending down to the river; the Maj. Henry Vassal house, which is now known as the Batchelder estate; this being the largest house, Gen. Morgan used it as his headquarters, and his medical staff were quartered

there; the grounds adjoined the estate of Major Thomas Mifflin, afterwards General Mifflin. His garden was the finest in Cambridge, and the wounded soldiers were allowed to walk in it; this place afterwards became the Brattle estate, and is now in part the site of the Riverside Press. The Thomas Oliver house was also used for hospital purposes; this is now the James Russell Lowell place.

Previous to Morgan's position as director-general of the hospital at Cambridge. Dr. Benjamin Church, a grandson of the old Indian fighter, Capt. Benjamin Church, held the office. He had been a prominent Whig and was trusted implicitly by the party, and was one of the deputation sent to meet Gen. Washington and escort him from Springfield to Watertown, thence to Cambridge. It was discovered that he had been carrying on a secret correspondence with the enemy, and a long letter of his was intercepted. In a closing sentence he asks that "the answer be sent to some confidential friend at Newport, to be delivered to me at Watertown."

This letter of his was printed in the *Boston Gazette* at the Watertown office. Church was arrested and imprisoned in the very house where he probably penned the offensive letter. On a door of a room in the Vassal house is the name B. Church, Jr., deeply cut in the wood, which a century's re-painting has vainly tried to obliterate. From this house he was taken in a chaise and to the music of a fife and drum, escorted by General Gates and a guard of twenty men to the place of his trial in the meeting-house at Watertown.

This trial took place November 7, 1775. He was expelled from his seat in Congress and publicly branded as a traitor. The General Court resolved that he be sent to Norwich, Connecticut, and confined in jail "without the use of pen, ink or paper, and that no person be allowed to converse with him except in the presence and hearing of a magistrate of the town, or the sheriff of the county where he is confined, and in the English language."

The following spring, about May, Dr. Church and his friends sent a petition to Congress for his release from prison, as his health suffered from confinement. The plea was granted on condition that he gave his word of honor, with sureties of one thousand pounds, that he would not hold correspondence with the enemy, and that he be brought to Massachusetts to be in charge of this Colony, and not privileged to go out of its limits without a license. This sentence was afterwards commuted to transportation for life. He sailed in a ship for the West Indies, and as it was never heard from afterwards, it was supposed to have sunk with all on board.

Four days before the battle of Bunker Hill the Continental Congress voted to appoint a general for the Continental Army.

At the suggestion of John Adams and on the nomination of Mr. Johnson, of Maryland, George Wash-

ington, of Virginia, was chosen commander-in-chief, and on the 17th of June, 1775, his commission, signed by John Hancock, was reported to Congress and accepted. Four major-generals were also appointed—Artemas Ward, Charles Lee, Philip Schuyler and Israel Putnam. To these were added eight brigadier-generals.

On the 21st of June, Washington left Philadelphia on horseback to take command of the army at Cambridge. He was accompanied by Major-Generals Lee and Schuyler.

At Springfield he was met by a deputation from the Provincial Congress then holding at Watertown. Tradition says that on the evening of July 2d they arrived at the Coolidge tavern, on the south side of the Great Bridge, where they spent the night; that in the forenoon, it being Sunday, they left the house for the meeting-house, where, after divine service conducted by the minister, Rev. Seth Storer, Washington was presented with an address from the assembled Congress by their Speaker, the Hon. James Warren.

After an hour and a half the party proceeded to Cambridge, where, the next day, under a great elm-tree on the Common, he formally took his title as commander-in-chief of the American Army.

On the 11th of December next, at noon, Mrs. Washington, attended by her son, John Custis, and his wife, reached Watertown from the South in her own carriage, drawn by four horses, colored postilions, in scarlet and white liveries, military escort and a guard of honor. Two hours were spent at the Fowle house as the guest of Mrs. Warren, and the party arrived at Cambridge at three o'clock, where she was joined by General Washington.

An extract from "The Diary of Dorothy Dudley," published in 1876, gives this pleasant record: "December 11th, Mrs. Washington, our general's lady, has arrived, and with her many ladies of the families of our officers. She has had a long, tedious journey from Mt. Vernon, with bad roads and trying weather, and has come by short stages, stopping often to rest and change horses. She has gone directly to her husband's headquarters. Mr. Custis, her son, accompanied her with his wife."

The Mrs. Warren, wife of Hon. James Warren, of Plymouth, who entertained Mrs. Washington at the Marshall Fowle house, Watertown, was Mercy Warren. She was the author of "The Liberty Song," written in 1769, beginning,

"Our worthy forefathers, let's give them a cheer
To climates unknown, did courageously steer,
Through a rough to desert for freedom they came,
And dying, bequeathed us their freedom and fame."

October 17, 1789, President Washington again visited Watertown on his way to Boston, and was received with great enthusiasm. The meeting-house bell was rung and royal salutes given quite in con-

¹ Mary L. D. Everett in *New England Magazine* for July, 1890. "Our National Songs."

trast to his first journey, when powder and shot were too scarce and valuable to be thus used.

On his return, November 5, he rode from Lexington to Watertown over the same road the minute-men had taken, April 19, 1775, and without escort went quietly to the Coolidge tavern for refreshment and rest. He took supper in the public dining-room in the south end of the house, and lodged in the north-west chamber next to the river. This house is now standing and is owned by the heirs of the late John Brigham.

A few rods south stood the mansion-house of John Hunt, a town representative, farmer and trader. Here Maj.-Gen. Joseph Warren lodged and ate his breakfast before he started for Bunker Hill, where he gave his life for his country. Before starting he urged the ladies of the household to prepare lint and bandages, saying, "The poor fellows will want them all before night." Slowly on horseback he went down the hill to the bridge, but galloped back and bade them again farewell.

Abner Crafts, who commanded the Watertown company at the battle of Bunker Hill, was an inn-holder before he took up arms. He continued to serve during the war, and had command of the military escort which was granted by Congress to Lady Frankland (Agnes Surragé) on her removal from Hopkinton to Boston during the siege of Boston.

Under all the discouragements of the times, the people of Watertown maintained their independent and patriotic principles, and when, on the 20th of May, 1776, "A resolve of the late House of Representatives, relating to the Congress of the Thirteen United Colonies, declaring them independent of Great Britain being read, the question was put to know the mind of the town, whether they will stand by and defend the same with their lives and estates; and it passed in the affirmative unanimously."

After the capture of Burgoyne's Army, Watertown was selected as one of the places where the officers should be quartered.

To the minds of a majority of the plain and sober citizens this arrangement was quite repugnant; so they called a town-meeting in December, 1777, at which they plainly expressed their views, and through the selectmen their vote was communicated to the deputy quartermaster. However, several officers came and were quartered here, some at Angier's Corner in Newton, and at other places about town.

January 17, 1778, the representative of the town, Jonathan Brown, was instructed to use his influence and give his aid towards ratifying and confirming the Articles of Confederation and perpetual Union among the United States of America, as agreed upon by Congress.

On account of the prevalence of small-pox in Boston, in June, 1778, the meeting-house in Watertown was again opened for the use of the legislative

sessions, and the minister, the Rev. Daniel Adams, was their chaplain, and his fervor and power in discharging the duties of that office were long remembered.

In September of the same year the Legislature resumed its sessions in Boston.

CIVIL WAR.¹—*Roll of Honor.*—As the record I am about to make, agreeable to the statute of the Commonwealth, may be examined by coming generations anxious to know who might be entitled to have their names entered upon this Roll of Honor, I will make such explanation as to me seems desirable for a perfect understanding of all matters relating thereunto. At the opening of the Rebellion the loyal citizens of Watertown felt it incumbent upon them to take such measures as they deemed meet and proper to aid the general government to sustain the institutions of our Fathers and to crush this iniquitous rebellion, not only by word and vote, but by the more powerful weapons of war.

They accordingly met, as the reader may see, by referring to the town records of that date, and took such steps as led to the organization of a military company, which was duly organized May 5, 1861, and which went into camp at "Camp White," Watertown, on the 1st of June. It was accepted by the Governor and ordered to report at Camp Cameron on the 2nd of July following, at which date it was mustered into the service of the United States for three years or during the war. Uniforms for both officers and men were furnished by liberal citizens and the town, and the expenses of drill and organization were paid, and also a bounty of thirty dollars to each of the volunteers in addition to the other expenses incurred.

I shall, therefore, enter upon this roll all the names of that company, with their respective places of residence, whether they composed the quota of this town or not, and also all of those who responded at the subsequent calls of our country, but I shall index those only who, as far as I shall be able to ascertain, went to compose the quota of our town.

(Signed) W. H. INGRAHAM, *Town Clerk.*

This company was attached to the Sixteenth Regiment, commanded by Colonel Powell T. Wyman, of Boston, and was entitled Company K.

Clarke, Charles E.	Waltham.
Stearns, Samuel F.	Lynn, resided at Watertown.
Capell, Jonas E.	Lexington, color bearer.
Coburn, Charles F.	Watertown.
Norcross, Thomas C.	Watertown.

¹ By Wm. H. Ingraham, as recorded in a special volume deposited in the town archives.

² Promoted to 1st Lieut. of Co. D, September 28, 1861, and John Eaton, South Reading, was commissioned September 28, 1861.

Daniel Haggerty, Watertown	35th Regt.
Wm. W. West, Watertown	33d Regt., Co. B.
Parker McCuen, Watertown	33d Regt., Co. B.
John Donally, Watertown	33d Regt., Co. B.
John Crompton, Watertown	33d Regt., Co. B.
John McKinley, Watertown	33d Regt., Co. B.
Emile Evers, Watertown	33d Regt., Co. B.
Joseph Goteib, Watertown	35th Regt., Sergeant Co. B.
Thomas McNeil, Watertown	35th Regt., Private.
Edward N. Pickering, Watertown	35th Regt., Sergeant, Co. B.
Wm. H. Hogan, Watertown	35th Regt., Sergeant.
Robert Atkins, Watertown	35th Regt., Sergeant.
John Davison, Watertown	35th Regt., Sergeant.
Patrick O'Hara	39th Regt., Co. G.

The above were duly mustered into the service of the United States, Camp Stanton, at Lynnfield, and received their bounty as per vote of town.

The following names are residents of Watertown who volunteered for the three years' service and went into other companies, but who served to fill the quota of this town, and were allowed as an offset to the town when the requisition was made for an additional number of 300,000 volunteers:

Rufus Babcock, Watertown	Co. H., 16th Regt.
Terence Rogers, Watertown	Co. I, 16th Regt.
Hugh Rogers, Watertown	Co. I, 16th Regt.
Patrick Rogers, Watertown	Co. I, 16th Regt.
Johnston Atcherson, Watertown	Co. I, 16th Regt.
Augustus Severnse	2d Cavalry.
John F. Bernard, Watertown	2d Cavalry.
George R. Howard, Watertown	89th New York.
Charles F. Sherman, Watertown	Nimms Battery.
Phineas F. King, Watertown	Nimms Battery.
Wm. G. White, Watertown	Co. A, 16th Regt.
Charles Jackson, Watertown	Co. C, 13th Regt.
W. H. Jackson, Watertown	
E. J. Trull, Watertown	Co. A, 13th Regt.
John Conley, Watertown	New Orleans, with Butler.
Patrick Crotty, Watertown	Co. I, 23d Regt.
Edwin H. Brigham, Watertown	Co. A, 13th Regt.
Elijah Norcross, Watertown	Co. L, 14th Regt.
Harrison I. Craig, Watertown	Co. G, 7th Battery.
Wm. Dowling, Watertown	Co. G, 32d Regt.
Raselas Ireland, Watertown	14th Regt.
Rev. Henry A. Hempstead, Chaplain	29th Regt.
Edward S. Rowse, Watertown	St. Louis.
Henry A. Wilkins, Watertown	20th Regt.
Samuel G. Noyes	Sharpshooters 40th Regt.
Wm. H. Johnson, Watertown	Rhode Island Regt.
Adolphus Klous, Watertown	5th Battery.
Owen Dinan, Watertown	30th Regt.
Charles Howard, Watertown	14th Regt.
James Hutchinson, Watertown	3d Regt.
Michael M. Warren, Watertown	9th Regt.
Hugh Grey, Watertown	38th Regt.
James B. Childs, July 29, 1862, Watertown	Co. A, 12th Regt.

On the 4th day of August, 1862, a further call for an additional number of 300,000 more soldiers was made upon the loyal States, and a town-meeting was called, to be held the 13th day of September, and by adjournment to the 17th day of the same month, at which meeting the town voted to pay the sum of one hundred and fifty dollars to each citizen of Watertown who should volunteer for the term of nine months, and be accepted and mustered into the service of the United States as a part of the quota of Watertown, and they also directed the selectmen to open an enrollment list immediately. In response to that call the following persons volunteered, and were

accepted and mustered into service September 19, 1862:

<i>Names.</i>	<i>Residence.</i>	<i>Those were assigned to</i>
Joseph Crafts, Watertown		Co. K, 5th Regt.
Ira J. Osborne, Watertown		Co. K, 5th Regt.
John H. Carter, Watertown		Co. K, 5th Regt.
William F. Baldwin, Watertown		Co. K, 5th Regt.
Charles Brigham, Watertown		Co. K, 5th Regt.
Jacob G. Boyce, Watertown		Co. K, 5th Regt.
Charles Adams, Watertown		Co. K, 5th Regt.
Joseph Lyman, Watertown		Co. K, 5th Regt.
George A. Dexter, Watertown		Co. K, 5th Regt.
James H. Blanchard, Watertown		Co. K, 5th Regt.
Patrick Burns, Watertown		Co. K, 5th Regt.
Judson Bent, Watertown		Co. K, 5th Regt.
Andrew De Wyre, Watertown		Co. K, 5th Regt.
Thomas Dardis, Watertown		Co. K, 5th Regt.
James Dunn, Watertown		Co. K, 5th Regt.
James A. Ellis, Watertown		Co. K, 5th Regt.
Charles Foster, Watertown		Co. K, 5th Regt.
Micajah C. Howes, Watertown		Co. K, 5th Regt.
Charles F. Hill, Watertown		Co. K, 5th Regt.
George E. Harrington, Watertown		Co. K, 5th Regt.
James Wilson, Watertown		Co. K, 5th Regt.
Oliver M. Over, Watertown		Co. K, 5th Regt.
Charles C. Hilton, Watertown		Co. K, 5th Regt.
George W. Horn, Jr., Watertown		Co. K, 5th Regt.
Edward C. Ireland, Watertown		Co. K, 5th Regt.
William Jones, Watertown		Co. K, 5th Regt.
James Kennedy, Watertown		Co. K, 5th Regt.
Austin W. Lindley, Watertown		Co. K, 5th Regt.
George C. Nichols, Watertown		Co. K, 5th Regt.
Ward M. Otis, Watertown		Co. K, 5th Regt.
Peter A. Ober, Watertown		Co. K, 5th Regt.
John A. Pond, Watertown		Co. K, 5th Regt.
Charles H. Priest, Watertown		Co. K, 5th Regt.
Seldon H. Rosebrook, Watertown		Co. K, 5th Regt.
Jeremiah Russell, Jr., Watertown		Co. K, 5th Regt.
Mark N. Sibley, Watertown		Co. K, 5th Regt.
Charles E. Sanger, Watertown		Co. K, 5th Regt.
John S. Stanley, Watertown		Co. K, 5th Regt.
Joseph H. Tyghe, Watertown		Co. K, 5th Regt.
Patrick Toole, Watertown		Co. K, 5th Regt.
Daniel A. Wilson, Watertown		Co. K, 5th Regt.
Amos L. Derby, Watertown		Co. K, 5th Regt.
Horace W. Otis, Watertown		Co. K, 5th Regt.
Edwin A. Stackpole, Watertown		Co. K, 5th Regt.
George L. Rhoades, Watertown		Co. K, 5th Regt.
Thomas Pendergast, Watertown		Co. K, 5th Regt.
F. A. Howard, Watertown		Co. K, 5th Regt.
Edward F. Richardson, Watertown		Co. K, 5th Regt.
Daniel P. Tilton, Watertown		Co. B, 44th Regt.
I. W. Sylvester, Watertown		Co. B, 44th Regt.
C. S. Fields, Watertown		Co. B, 44th Regt.
Henry S. Treadwell, Watertown		Co. B, 44th Regt.
Aaron W. Harris, Watertown		Co. B, 44th Regt.
Frank I. Hutchins, Watertown		Co. A, 47th Regt.
F. D. Chant		Light Artillery, 11th Regt.
George W. Booth, Watertown		Light Artillery, 11th Regt.
Samuel Greenwood, Watertown		Jones' Battery.
Charles F. Degan, Watertown		Co. E, 50th Regt.
Charles Miller, Watertown		Co. E, 50th Regt.
Samuel D. Bodge, Watertown		Assistant in Hospital.
Franklin Coffin, Watertown		Connecticut Regt.
Thomas H. Patten, Watertown		Co. E, 44th Regt.
James A. Robbins, Watertown		Co. E, 44th Regt.
Frank S. Learned, Watertown		Co. E, 44th Regt.
Henry T. Pierce, Watertown		Co. E, 44th Regt.
Joseph G. Wilkins, Watertown		Co. A, 44th Regt.
J. L. Day, Watertown		Co. A, 47th Regt.
John W. Hartford, Watertown		Co. A, 47th Regt.
Daniel C. Hawes, Watertown		Co. A, 47th Regt.
James Kearney, Watertown		Co. A, 47th Regt.
Henry W. Christian, Watertown		Co. B, 43d Regt.
George E. Priest, Watertown		Co. H, 53d Regt.

CHAPTER XXXIII.

WATERTOWN—(Continued).

BUSINESS INTERESTS—BANKS.

THE BUSINESS INTERESTS OF WATERTOWN.—The local business of Watertown has never been very large, but the opportunities for its citizens to supply their wants for food and clothing and other necessities have generally been good. When transportation from Boston to the outlying towns was by wagon—this was long after that first period when transportation was by boat, along the estuaries and up the rivers,—when, in fact, all transportation between Boston and the central and northern parts of Massachusetts, and with New Hampshire and Vermont, was made by teams,—Watertown was on the great road, where six-horse coaches and six-horse wagons were common, passing through her streets as commonly as single teams pass now. Then there were convenient stopping-places—taverns for the entertainment of man and beast. There were at least six taverns, where we have scarcely one now. Then there were stores also where the countrymen could sell their produce and buy their dry-goods and groceries, their hardware, their medicines. In the early days money was scarce, salaries of the minister and schoolmaster were paid in corn and other grain. Of course nearly all trade was barter trade; exchange of produce at the stores. A farmer would come in with his family, making a day of it, to make his purchases for several weeks or months at once.

Trade has changed greatly from what it was sixty or eighty years ago.

Now the farmer, if not supplied at his own door, or in his own village, goes directly to Boston by rail, makes his purchases with the money which has been returned perhaps by the commission dealer for his produce, sees the sights and returns the same day, or after a very short stop.

The stores in Watertown now supply what the ladies or the families do not care to take the time to go to Boston for. It is true that the people, in many cases, would be far better served nearer home, and at cheaper rates; but one cannot expect the average person who wishes to buy a few dollars' worth of dry-goods, say, to refrain from the temptation to overhaul the entire stocks of the large dry-goods stores in Boston. Then "that is as good as a play," and so they have their satisfaction for their time and money, even although they choose poorer and less tasty goods, and at higher prices than they would have given nearer home, but they have seen great quantities of goods and a large number of people buying.

In this way we try to account for this present tendency to rush to the largest places for everything, which is common to the multitude, not reflecting that

they often buy of cheap salesmen who have no name and no care to establish a reputation, when they might have purchased nearer home of the proprietors themselves, it is true of smaller establishments, but yet men who have judgment and taste and everything to gain by serving their customers and neighbors well.

Back in the earlier days, which the oldest now scarcely remember, before 1830, William Sherman, who had as a young man taught a school on the corner of School and Belmont Streets, and for a year in Medford, was engaged in the dry-goods business. He began with Mr. Bigelow and later entered into partnership with Jesse Wheeler in 1834, under the name of Jesse Wheeler & Co. In 1836 Jesse Wheeler went to West Newton and Mr. Sherman formed a partnership with Mr. Bigelow. Later than this he kept a store on the south side of Main Street. When the town-hall was built in 1847, William Sherman was the first occupant on the east side, with his stock of dry goods. In 1849 he sold out to Wm. H. Ingraham, who was for so many years the town clerk and who has occupied so many offices¹ of trust in the service of the town and is in 1890 the chairman of the Board of Selectmen. William H. Ingraham carried on a dry-goods business here for two years, until, in 1861, he was followed by Mr. Joel Barnard, who remained until 1869, when that side was fitted up for the use of the Free Public Library, and Mr. Barnard built the brick block next east of the town-hall, now occupied by the apothecary, James B. Woodward.

In 1838 Mr. Jesse Wheeler returned from West Newton and established a store near the corner of Mount Auburn and Main Streets, where he kept a great variety of goods such as were usually kept in a country store, including dry-goods, crockery, cutlery, boots and shoes, etc.—in fact almost everything except provisions and building materials.

In 1845 Jesse Wheeler bought the building which he occupied for many (twenty) years. In 1846 Mr. Delano March, who had served as clerk with Mr. Wheeler, was taken into the firm. Many prominent business men have begun their business education in this house. In 1853, Mr. March retired to enter the firm of Locke, Chandler & March, Boston, afterwards March Brothers, Pierce & Co., wholesale dealers in gentlemen's furnishings.

Otis A. Train, who had been in the employ of the firm for several years and had formed a matrimonial copartnership with Mr. Wheeler's oldest daughter, entered this house which for a while from this time was Wheeler & Train, until Mr. Wheeler bought him out.

In 1857, Horace W. Otis began as a boy with Mr.

¹ Wm. H. Ingraham, chairman of the Board of Selectmen for 1890, served also in 1875 and 1876, and as town clerk from 1850 to 1863, 1881-1889, twenty-three years, and representative to General Court 1862, 1878, 1879; assessor for 1879-1890, (except 1880) many times moderator, frequently serving on important committees.

Wheeler. Ward M. Otis began in 1860. Both served on the quota of Watertown in the War of the Rebellion, and on their return from the war bought out the stock and stand of Jesse Wheeler, and since that have continued to carry on the business. During the past year, encouraged by their growing success, they have erected on the west corner of Main and Spring Streets the large brick block which they now occupy. Their business in the changed tendency of the times to greater specialization, is more limited in variety of kinds of goods than were kept by Jesse Wheeler in 1853, although they have a very much larger store and a much larger stock of goods. Dry goods and boots and shoes in sufficient variety for a place of this size can probably be found always on their shelves and counters. The second story of their new building is occupied by the Young Men's Christian Association, and the third floor by the Pequossett Lodge of Free Masons, who sub-let to the Odd Fellows, the Young Men's Assembly, and various other organizations. This is one of the finest business blocks yet erected in the town. Its architect was Alberto F. Haynes. Our limited space will not allow us to describe the dry-goods store of Geo. C. Lunt & Co., formerly Lunt & Tarlton, or the apothecary stores of James B. Woodward, or of F. M. Martin for many years known as Sullivan's, or of George F. Taylor, or the new one of E. E. Jennison, all on Main Street.

So we must not stop to describe the stores of the grocer, Benjamin Dana, who built the Dana Block on Main Street, and the large residence on Summer Street, now occupied by the Rev. William H. Savage. He was wise in securing the location of the works of the gas company on the banks of the river, although the government has not yet¹ made the slight expenditure necessary to enable vessels to bring their supplies of coal directly to their wharf. We need not mention the line of grocers who have followed him, improving the methods of doing business until now one beholds an artistic display of all that one can ever need placed out openly so that any one can see the prices plainly marked, to tempt his purse and help him to purchase wisely, as at Benton's Boston grocery, or Hartford's round the corner, or at Hall's in the Noyes Block, or in some others.

The furniture store of Luther Bent, established in 1835, in a small building now within the foundry-yard, then moved to a building now occupied by Page's paint-shop, then to the building he and his son now occupy, when it was on Galen Street, over Mill Creek, where F. H. Martin carries on a similar business. Mr. Leathe, before the great fire of 1841, had a bakery on the corner of Church and Main Streets. After that lamentable fire which destroyed the First Parish Church and much valuable private property besides his own, he put up the building now

standing, and a part of which has since his death soon after its erection, been occupied by his successor, Charles H. Bright, for the same purpose. At the present time there are several other places where bread and other bakers' supplies are furnished to a growing population. Mr. Bright's memory of dates of past events is rather remarkable. In one part of this building, a room is occupied by Charles Lenox, the barber, whose father lived in a small house which stood where the Town Hall now stands, and who was, like the son, a mine of story of the early part of the century. This notice should not close without mention of the office and jewelry store of Hiram Whitney, with its coins and other antiquities in the same building of which he is now the owner.

Builders.—Among the builders whose honorable record has been made during the past fifty years should be mentioned H. W. Macurday, who has erected in this and the adjoining towns more than a hundred buildings of the best class, the first of which is now occupied by some of the heirs of John Coolidge, near the old cemetery at Mount Auburn.

The house of Albert O. Davidson, on the beautiful site of the old David Bemis house, at Bemis, was also one of his construction, as were nearly all of the houses along that parkway called Garfield Street. So also the houses, beautiful for design and beautiful for situation, occupied by the Pierces, father and son, on the descent of Mt. Auburn Street, and the house of the miller, James W. Magee, opposite the cemetery, on the corner of Chester Street.

Chester Sprague, an active builder, has recently built up nearly the whole of "Otisville," and of Irving Park and vicinity, and has begun on a large scale to build on Whiting Park, of which he is part owner, a large number of modern houses, at moderate cost. The beautiful location, the nearness to steam and horse-cars, the desirable neighborhood, have already secured the success of the Watertown Land Company in this enlargement of the residential portion of our town. This company, composed of four persons only—Horace W. Otis, Ward M. Otis, Chester Sprague and Samuel S. Gleason, the real estate agent—has laid out about one hundred lots, of which about one-half are sold; and has reserved several acres of beautiful woodland, on the slope and summit of White's Hill, up which the estate extends. This wooded hill is a pleasant feature of every Watertown landscape. It is to be hoped that this may be joined with some of the land already belonging to the town, and which gay groups of tennis-players occupy every pleasant afternoon, and be converted into a public park for the continued healthy out-door exercises of future generations.

In naming the prominent builders who have done and are doing so much to develop the town, one should not omit the plumber, Charles H. Rollins.

There are several architects in town. Most prominent among these is Mr. Charles Brigham, who,

¹ As we go to press, we hear that Congress has appropriated \$200,000 for this purpose, on certain conditions.

although yet a young man, has done the town good service by designing many of the public and private buildings, while chiefly engaged in much larger undertakings in Boston and other cities. While erecting such structures, for instance, as the Maine State-House, the great extension of the Massachusetts State-House, and other similar buildings, he has found time to serve as chairman of the Board of Selectmen for a number of years, has been a member of the School Committee, is chairman of the Board of Trustees of the Free Public Library, a director of the Union Market National Bank, and is the president of the Watertown Co-operative Bank. His own residence is a model of good taste.

Alberto F. Haynes has also designed many of the better houses of the town, nearly all in "Otisville" and Irving Park, the new Otis Building, and the Church of the Good Shepherd, which, with its walls of field-stone and its beautiful stained-glass windows of delightful tones, is an ornament to one of the best parts of the town. Sanford Phipps has designed houses on Green Street, the new Almshouse, and the Grant Grammar School-house which stands in the Park.

Henry Russell, Sr., now the Jr. of the same name, Geo. A. Page, and B. T. Rundlett, are each ready to paint the new houses that are to be built, in as good style as they have for many years done their work in this and adjoining towns.

Provisions.—One need not go to the city for provisions, for Wm. H. Lyman, and Hackett Bros., and N. B. Hartford, and Field and Melvin are to be found with well-stocked stores near the square, and others will visit your houses with well-filled wagons. James H. Snow will serve you with fish, Howard Bros. with ice, Thomas Gavin or W. H. Pevear & Co., or George H. Sleeper will bring you coal or other fuel, so that life in this beautiful town can hardly be called a burden.

Building Materials.—If one needs to enlarge his buildings or erect new, Gilkey & Stone, as for very many years, have a large stock of lumber and other building materials always on hand. Geo. E. Teel and Rich. H. Paine have each a generous supply of all kinds of building and other hardware in stock. When one's house is done, or before, Wm. H. Ingraham, or Wm. E. Farwell the collector, or S. T. Sharpe, or even Geo. H. Tarleton will give you choice of companies in which to place the risk of loss from fire, thus dividing, at a moderate expense, the anxiety which valuable possessions bring.

Dentists.—In another place will be found a sketch of the physicians of the past and present. This might include the dentists also, whose services are so important in our modern civilization. The name of Dr. D. T. Huckins is found there, and in several other connections among the town officers of the past forty years, and should be given here. His office is in the new Otis Building. Dr. R. H. Horne occu-

pies the second story over the National Bank, while for a short time since J. P. Niles has had a room in Noyes' Block.

Streets and Sidewalks.—The streets of the town have been greatly improved during the past twenty years, partly under suggestions of N. Henry Crafts, the civil engineer, a native of the town, who made a most thorough and exhaustive report on a system of streets, "drainage and sewerage" in 1878, as he had on water supply and drainage in 1874 and in 1875; and partly by his assistants of that time, who have followed up the work as they have had opportunity. Credit is due to the Learned brothers, Waldo and Wilbur, in this direction; as also to Charles F. Jackson, a native resident civil engineer, who served the town and his country in the late war.

The town published a large edition of the valuable reports of Mr. Crafts, and these will furnish the basis of future comprehensive drainage works, which must, in the course of time, be undertaken for the proper disposal of sewage and in the preservation of the good name which the town has ever had,—especially when its population was more scattered,—for healthiness as a place of residence.

The Town Improvement Society has set out trees and called attention to the general appearance of the streets. The town, with the hearty co-operation of individual owners, has, with their assistance, mainly through David F. Tripp and his helpers, put down on almost every street not furnished with brick sidewalks, as on Main Street, good walks of concrete, so that one can walk, even in a rain-storm, from Cambridge to Newton or Bemis, with less danger than even a few rods the other way, to that neat appearance of one's foot-wear, which it is said that George Washington prized so much.

Ship-building and the Navigation of the River.—William Wood, who was here in 1633, says, in his "New-Englands Prospect" (chap. x.), "On the east side (of the Mistick River) is Mr. Cradock's plantation, where he hath impaled a park. . . . Here, likewise, he is at charges of building ships. The last year one was on the stocks of 100 tons. That being finished, they are to build one twice her burden."

That was said of Medford, not of Watertown where Matthew Cradock had, with William How, built a mill. We do not know that any vessels of any considerable size had ever been built in Watertown until 1890. Indeed, most of those living in town have almost forgotten that the river is navigable, or should be, as far as the bridge. Some remember the wharves on the south side, spoken of by Mr. Ensign; some remember when, as boys or girls, they rode in the boats or on the freight flat-boats of Mr. Sanger, who, by propelling by poles with the help of the inflowing and outflowing tides, continued to move the heavier freight up and down the river to and from Boston and Charlestown. At least one remembers when, about the year 1821 or 1822, a vessel laden with lumber

came up to the wharf below the buildings of the Walker Pratt Company, and discharged her cargo on the wharf. This lumber was from trees cut on the farm of Mr. Simon Barrett, of Hope, Maine. This was taken over to Camden, Maine, put into this vessel, under the command of Captain Pendleton, and brought to Boston, and up the Charles River to the bridge, and discharged upon the wharf and land of Mr. Luther Barrett. With this lumber, Mr. Barrett built the large shop on what is now Beacon Square, which he occupied as a paint-shop, the lower story being for the storage of carriages, the painting being done in the second-story to which the usual inclined plane led. (This shop, having been accidentally burned after the death of Mr. Barrett, was replaced by the present structure, which we have said was occupied by Luther Bent in the early days of his furniture business).

A little dredging would make the whole river navigable to the bridge, and be of very great value to the town.

It is hoped that a new era in the navigation of the river has begun. The old condition of the river may be restored and improved.

On the 30th of July, 1890, the first steam vessel was launched by Mr. John Cassidy, from his land, which was once, as shown by specimens found, an old Indian camping-ground, just above the United States Arsenal. This may be followed immediately by the building of others. To make these of such use as they should be, the river, of course, should be cleared of impediments, the draws should be improved, and in the course of time we may hope to see the beautiful scenery along the banks, as in the days of our fathers, enjoyed by those passing up and down, more rapidly now and more easily, by the aid of steam, to where the terraced slopes of Newton and Watertown greet the eye.

This vessel of Mr. Cassidy's, of about 400 tons burden, a double-propeller, named the "Watertown," was launched in the presence of over five thousand people, including the officials of Newton, Waltham, Belmont and Watertown, with a band of music, with speeches and congratulations, and a banquet, to the delight of all. So far, your historian can go. May some future writer record the success of an experiment begun two hundred and sixty years after that of Cradock near his "impaled park" on the Mistick.

Wood, in 1633, said "Ships of small burthen may come up to these two towns (Cambridge and Watertown), but the oyster banks do bar out the bigger ships." It will be possible to avoid the oyster banks, if only the general government do what it should to clear the channel and encourage the formation and maintenance of that commerce that would bless not only the old town of Watertown and the immediate neighborhood of Boston and Massachusetts Bay, but the entire country as well.

Doubtless the policy of England in dredging out and improving the mouths of her rivers and estuaries,

—fitting training courses for supplying her navy with skilled men,—helps to keep alive the spirit of emulation in naval improvements as well as to furnish the practical education required to enable her in any time of need to man her navies with an irresistible force. It is dictated by wisdom and practical economy. It would be pleasant to behold, with the improved condition of usefulness of the Charles River for navigation, also that condition of wholesomeness of its waters, indicated by the presence of the multitudes of fishes found by our fathers. The testimony of science is that this desirable condition is only a question of the application of the proper means, with energy.

BANKS AND BANKING.—The banks, although among the most important agencies through which the business is conducted, have, as a matter of evolution, come late in the growth of the old town. The town of Watertown is now very well accommodated with institutions for the deposit and safe keeping as well as for the loans and collections of money, and the ordinary transaction of monetary affairs.

The Union Market National Bank was organized in 1873. The first meeting of the association for organization was on the 9th of April, 1873. It was voted at first to call the bank the Watertown National Bank, but it afterwards was decided to call it the Union Market National Bank, and that the capital should be \$100,000, with the privilege of increasing to \$300,000.

Those who signed the certificate of organization were John H. Conant, Charles J. Barry, Royal Gilkey, George K. Snow, George N. March, Thomas L. French and James S. Allison.

It was voted that there should be seven directors, and the following were chosen: George N. March, George K. Snow, Royal Gilkey, Thomas L. French, Charles J. Barry, John H. Conant and James S. Allison.

In the choice of president there was at first a tie between Charles J. Barry and George N. March, but at the next meeting one of the directors having returned from Washington, Geo. N. March was elected.

Capt. J. K. Stickney was made cashier. On May 23d, Messrs. Barry and French resigned from the board, and S. F. Woodbridge, of Cambridge, and N. E. Hollis, of Boston, were elected.

A code of by-laws was adopted in June, and on the 7th of July, 1873, the bank opened for business, the board of directors met in their room, and notes were discounted.

George N. March continued to occupy the president's chair till the fall of 1883, when Oliver Shaw took his place.

Tilden G. Abbott was elected assistant cashier in July, 1873. Before 1880 Capt. Stickney resigned his post as cashier, and was elected vice-president, which position he continues to hold. T. G. Abbott was made cashier, which position he held until January, 1884, when he left suddenly with loss to the bank.

HISTORY OF MIDDLESEX COUNTY, MASSACHUSETTS.

Capt. Stickney, as vice-president, performed the duties of cashier until Mr. Noah Swett was appointed cashier on the 20th of February, 1884.

George S. Parker was made assistant cashier in January, 1887, and Harry Brigham clerk in October of the same year.

The capital stock was fixed in 1873 at \$100,000; in May, 1874, increased to \$200,000; December 30, 1876, reduced to \$150,000; May 17, 1881, increased again to \$200,000, and March 5, 1884, decreased again to \$100,000. At this last amount it still stands, although there appears from the books to be a large surplus.

The stockholders were originally wholly in the town, although now probably more than one-half of the stock is held out of town.

The history of the bank was in its earlier days one of varying fortune, but for the past few years, under the conservative management of its present officers, of promise for the future. The bank has proved a great convenience to the business men of the town, never refusing small loans to citizens of the town who can furnish good security, allows more ready transfers, and facilitates the accumulation of ready funds for building purposes, and for the general uses of business.

Its stock is seldom offered in the market; the last sale noticed, which was in 1889, was at about \$140, the par value being \$100. It has paid dividends of five per cent. semi-annually for several years.

The *Watertown Savings Bank* was incorporated by act of the Legislature, April 18, 1870. The persons named in the act of incorporation were Nathaniel Whiting, Charles J. Barry and Joshua Coolidge. The first meeting of the incorporators was held September 1, 1870, when the charter was accepted and twelve associate members were elected. The bank was opened for business in a room on the second floor of Noyes' Block, November 10, 1870, when the deposits of the first day amounted to \$924. At the expiration of five years, the bank was removed to the first floor of McMasters' Block, and opened for business every day in the week from one to four P.M., and on Thursday evenings from seven to nine o'clock. This caused a great increase in its deposits. During the first six years of its existence, before the new law went into effect, dividends of six per cent., computed from the first day of each month, were earned and paid.

With regard to the management of its affairs, it may be said that depositors have never been required to give the legal notice of intention to withdraw funds, not even in the panics of 1873 and 1878. Of all the loans made, the only direct loss sustained from its commencement has been the sum of \$204, and only one foreclosure of a mortgage has been made, and in this the auction sale brought nearly three times the loan claimed by the bank. The interest on every outstanding loan has been paid in full to October, 1889.

This is a record of which the investment committee of the bank should have full credit, their only reward. The unpaid service of successful business men is ren-

dered to the bank as an encouragement to small investments, which may be spared by those earning small amounts, for the building of homes and for provision against the days when sickness or old age require aid.

The number of persons holding books is 3054. The amount on deposit is \$367,781.79.

In 1880 the bank was removed to the Union Market National Bank Building, and in 1887 the bank was removed to the first floor of Barnard's Block, where in the summer of 1890 the room was refitted and improved in appearance. After the death of the president, Charles J. Barry, Dr. Alfred Hosmer accepted the post of president, which he held until March 25, 1890, when Albert O. Davidson was elected to the position.

In Dr. Hosmer's presidency the by-laws were thoroughly revised, a work in which Dr. Hosmer took great interest, and was untiring in establishing the best possible forms of doing business, including a new and model deposit-book for the use of depositors.

A statement of the condition of the bank June 30, 1890, is as follows:

Deposits	\$368,447.03
Undivided Earnings	11,542.42
Guarantee Fund	9,092.00
Real Estate Loans	\$27,540.71
Personal Loans	10,000.00
Railroad Bonds	72,262.50
Municipal Securities	34,315.00
Bank Stock	35,718.87
Expense Account	761.42
Cash	8,482.95

1890-91—OFFICERS.

President, Albert O. Davidson; Vice-President, John K. Stickney; Clerk, Ward M. Otis; Trustees, John K. Stickney, Oliver Shaw, S. S. Gleason, A. O. Davidson, Wm. H. Ingraham, Geo. E. Priest, Ward M. Otis, Chester Sprague, J. B. Woodward, E. B. Eaton, C. D. Crawford, R. P. Stack, C. Q. Pierce, C. W. Stone; Board of Investment, Albert O. Davidson, Wm. H. Ingraham, Calvin D. Crawford; Treasurer, George E. Priest; Book-keeper and Cashier, Wm. E. Farwell; Corporators, Joshua Coolidge, John K. Stickney, Oliver Shaw, D. B. Filat, Francis Kendall, S. S. Gleason, A. O. Davidson, Alfred Hosmer, Wm. H. Ingraham, George E. Priest, Ward M. Otis, J. B. Woodward, T. P. Emerson, Chas. B. Gardner, E. B. Eaton, C. D. Crawford, R. P. Stack, C. Q. Pierce, J. J. Sullivan, Moses Fuller, W. A. Learned, C. W. Stone, Fred. G. Barker, H. W. Otis, F. H. Edgcomb, A. H. Hartwell, A. A. L. Gordon, Julian A. Mead, Chester Sprague, Fred. E. Crawford.

The *Watertown Co-Operative Bank* was organized June 5, 1888; chartered June 23, 1888; began business June 28th, with an authorized capital of \$1,000,000, with regular monthly meetings on each fourth Thursday.

It has already entered on its fifth series of shares, has invested its money among its own shareholders, enabling some to build houses for themselves and providing them a systematic and easy mode of payment, while earning for the shareholders a good rate of interest. The dividends earned so far are at the rate of six per cent., while all the necessary expenses of starting such an institution have been paid, and there is a small surplus in the treasury.

The present officers are Charles Brigham, president; A. H. Hartwell, vice-president; S. S. Gleason, secre-

tary and treasurer; with a board of fourteen directors, including besides the above, G. C. Holt, L. B. Porter, L. S. Frost, H. H. Powell, J. E. Hackett, J. H. Norcross, H. W. Otis, L. S. Cleveland, H. D. Skinner, T. P. Emerson and A. B. Cole. The auditors are G. F. Robinson, J. H. Perkins and E. J. Smith. Attorney, F. E. Crawford.

The purpose of this bank is to help wage-earners to become investors and real property-owners, at least owners of their own houses. The system has a strong advocate in the present Governor of the State, Gov. Brackett, and has proved its capacity for good in many places, notably in Philadelphia, where thousands of houses have been built by its aid.

CHAPTER XXXIV.

WATERTOWN—(Continued).

MANUFACTURING AND MECHANICAL INDUSTRIES.

—For a place of the size of Watertown, its industries are numerous and varied. Situated at the head of tide-water on the Charles River,—a river that might better bear its ancient and appropriate and more suggestive name, Massachusetts River,—it was, when first discovered by our English ancestors, the scene of activity, the home and fishing-ground of a considerable tribe of Indians. Gathered about its fall, where “the sweet waters mingled with the tide” from the ocean, were the more intelligent and active of the red men, busy, at certain times in the year, in harvesting the abundance of fishes that, following the law of nature, were on their way through the rapids or over the dam to their spawning-grounds, or rather waters, in the upper courses of the river and its tributaries.

Civilization and the progress of the arts have brought great changes in the kind of industries here pursued. The abundant supply of water, soft and clear, except when polluted by the increase of population and of manufactures, is still available for other uses. It furnishes by gravity, in its flow to the sea, abundance of power, and when roused to greater activity by Pennsylvania coal, is capable to an almost unlimited extent of turning the wheels of machinery, or of performing those other uses which the inventive genius of man is making so helpful in the life of the world.

The situation of Watertown, so near the sea and so near Boston, now the great centre of trade and manufactures and wealth, the metropolis of New England, and with such abundant facilities for communication with all parts of the country, is particularly favorable for all kinds of manufactures which require to be distributed by railroad or by steam-boat to other parts of the country.

With a little effort on the part of its citizens, and a

fair amount of help from government in dredging the stream, steamers or sailing vessels bearing freight could come to or go from the bridge or the river banks. Considerations of health, as well as the requirements of the æsthetic sense of a half million of people, will demand also that such improvements of very valuable natural advantages of river bed, with its double flow of tides, and its constant outflow of the rain-fall of a large district, shall at no distant day be accomplished.

Thus, all the natural facilities for large manufacturing industries have been furnished, and the natural and beneficial growth in the demands of a large and rapidly increasing people, in the direction of utility and health and beauty, promise constant increase in these facilities. Why should capital be so timid in developing what capital will eventually find so necessary for its own interests in this particular location.

Enterprise here would hasten those changes for the better which the experience of older places has shown to be wise, and which the natural growth of population makes so desirable as to become inevitable, and which could be early made at far less expense than later.

The improvement of the river bed, of the river banks, the arrangement of border streets, so as to facilitate access to the river, the use of the river for transportation and for pleasure, and especially as an ever living, ever changing river park, the voice of great cities and small cities, of London, Paris, Florence and Pisa, for instance, not to mention those nearer home, shows what might be accomplished at an early period with far less expense than later. With this whole region under large municipal control, this improvement would doubtless be undertaken more quickly. In view, however, of the dreaded dangers of such concentration of power as this would imply, our people will probably continue to enjoy in prospect only the water-park of the future and postpone its realization for their children, or their children's children.

The Walker & Pratt Manufacturing Company.—One of the largest industries of this town is conducted by this corporation, which manufacture and sell, both at wholesale and at retail, stoves, ranges and furnaces, hot water and steam heaters, and steam and hotel cooking apparatus. They also make a specialty of apparatus for the ventilation of buildings, and do tin, copper and sheet-iron work as well as tin-roofing.

The company, as at present organized, was incorporated under the general laws of the State, in 1877, with a capital of \$300,000. The buildings occupied here in town extend from the river along the bridge nearly to Main Street, and along Main Street nearly to Beacon Square, with the exception of a narrow line of stores and the grist-mill immediately upon the street, covering an area of about two acres. The principal store-house is on Galen Street, a long, fine

looking brick structure, two stories high, while the principal foundry is on the eastern side of their grounds, nearly opposite the end of Mount Auburn Street. This is also built of brick and, with its high windows, must be well adapted to the needs of the moulders, while it presents a neat and tidy appearance on the street. As one approaches the village of Watertown from either of the Newtons, over the ancient bridge, known in colonial times as the Great Bridge, the first which was thrown across the Charles River, he is struck by the appearance of the massive buildings on the right, with brick walls and their solid stone substructure rising apparently out of the midst of the river, and the extensive wharf extending many hundred feet down the stream, ready, one can see, to utilize the improvements in the river which some future river and harbor bill will make possible.

It is true this wharf is at present partly covered with buildings, some of which are of brick, and by piles of flasks and other useful lumber, such as is necessary in all large iron foundries. If, however, the improvements in the river bed should be extended by dredging as far as the bridge, as Mr. Pratt hoped and labored to have done, and as doubtless will sometime be done, we should see the masts of vessels or the smoke-stacks of steamers at these same wharves, with their cargoes of coal and iron, and the piles of stoves, ranges, and steam and hot-water heaters ready for shipment to all parts of the world.

The officers of the corporation at present, 1890, are George W. Walker, president; George E. Priest, treasurer; Oliver Shaw, general superintendent. There are four directors, George W. Walker, George E. Priest, Arthur W. Walker and Oliver Shaw.

The foremen in charge of some of the principal departments of their manufactory are: F. H. Edgcomb, in the patent-shop; Wm. F. Atwood, in the moulding-room; George B. Moore, in the mounting-shop; John Applin, in the machine-shop.

About one hundred and thirty men are employed at the Watertown factory, and about \$2000 per week is required to pay their wages. In Boston a large building on Union Street, Nos. 31, 33 and 35, is occupied as a wholesale and retail store and for the various purposes of their business, for pipe-work, tin-work, stove-rooms, etc., where forty or fifty men are employed as tin-plate workers, steam-fitters, and salesmen. Of course other salesmen are kept "on the road." There is an agency in San Francisco which sells quite extensively on the Pacific coast. Considerable quantities are sent to Southern Africa, through Boston and New York exporters, although the larger part of their trade is for the New England market.

The company use about 2000 tons of iron and 800 tons of coal and coke each year in the Watertown works. Some idea of the extent of foundry work may be gained by the quantity of moulding sand required for the moulds, which of course is used many times, when we reflect that 400 tons of it are bought

each year. Of course thousands of feet of lumber are required for flasks and patterns, for packing and freighting.

The teaming is in the hands of Mr. George H. Sleeper, who keeps ten horses and three men at work all the time, in trucking between the Watertown works and the Boston store. Large use is made also of the Fitchburg and the Boston and Albany Railroads for iron and coal and for sending away the products of their manufacture.

The \$300,000 stock is held by a few persons, principally by four or five stockholders who have been in the business for years, or who have gained it by inheritance. It is seldom or never quoted on the market.

When this industry started in 1855 it was as a foundry and was established by Miles Pratt, Allen S. Weeks, William G. Lincoln, John J. Barrows and Thomas Barrows, under the firm-name of Pratt, Weeks & Company.

In the spring of 1857 the firm dissolved, and Mr. Pratt carried on the business during the rest of the year alone. Then a company was formed by Mr. Miles Pratt, Mr. Luke Perkins and Mr. Wm. G. Lincoln, under the firm-name of Pratt & Perkins.

The business continued under this name until the autumn of 1862, when Mr. Lincoln and Mr. Pratt bought out Mr. Perkins, and then the business was conducted under the firm-name of Miles Pratt & Company. This firm continued the business, which was somewhat varied and greatly enlarged during the war, until 1874, when it was consolidated with George W. Walker & Co., of Boston, under the firm-name of Walker, Pratt & Company, which combination continued without further change until it was incorporated, in 1877, under the present style as the Walker & Pratt Manufacturing Company. At first the business was small, employing about twenty men, and was confined to the manufacture of parlor and cooking stoves.

When the war broke out, in 1861, the firm went into the manufacture of ammunition and gun-carriage castings. The demands of the nation were urgent, the capacity of the works was increased gradually until about one hundred men were kept constantly employed. The story of the war, especially at the front, is ever filled with interest. It is of a time that tried what there is in man, and frequently called out the noblest traits of character. Not less at home, frequently, was it necessary to strain every nerve and exhaust every device which inventive genius could originate to quickly turn "the plough-share and the pruning-hook," the materials which had been devoted to the quiet purposes of peace, into those effective engines and missiles of war now required to save the life of the nation, suddenly attacked by a desperate enemy who had prepared to wage, in spite of all warnings, a sudden and destructive warfare for the possession of the seat of government and against the very life of the Nation. How the bold spirits, with-

out thought of their own lives, rushed to Washington, and what dangers and difficulties they encountered, we have often heard. While no diminution of honor can be permitted in speaking of their labors, it might be asked what could they have done without being supported and supplied by those at home. Miles Pratt was especially active in every way; a zealous and fervent man, fertile in devices, and of great executive ability, he could be active in serving his country at home. Colonel Rodman, then in command of the Arsenal here in Watertown, and Miles Pratt together talked over the needs of the Nation in arms and missiles of war. Colonel Rodman asked of Mr. Pratt if iron balls could be made by his men engaged in moulding stoves and furnaces. Mr. Perkins, the superintendent in the foundry, entered into the needs of the hour. All the men were ready to try what they could do. Long before any orders could come, or any expenditures could be authorized by Government, without waiting to see if or how they were to be paid, the men were at work moulding shot for canister, for 12-pound guns, for 24-pound guns, even for 13-inch and 15-inch guns—yes, both solid shot and shells. Colonel Rodman, as an effective ordnance officer who knew just what was needed, seconded by the spirit and ingenuity of a large body of men, organized and spurred on by Miles Pratt and his assistants did much to supply the men at the front with the effective implements of war. Those from Watertown had the confidence of men in action. Of course all that could be done here was but a mite compared to the demands of an army which increased to over a million men. But these works were rapidly increased through 1861 and 1862. Two hundred and seventy-five (275) tons of iron per month were used under contract for the manufacture of war materials; 2500 to 3000 tons of iron per year were moulded into shot and shell for the preservation of the Union.

The large store on Galen Street was begun in 1874, and was gradually extended across the race-way to the island where the pattern store-house stood, and this was replaced with a secure and almost fire-proof brick building in 1880.

This building extends 264 feet along Galen Street, is sixty feet wide and practically three stories high, for it has a high basement story. It occupies the site of what have been known for many years as the Blackman house, the Barrett house, and the Major Peirce house. The Blackman house was where Benjamin Edes printed the *Boston Gazette*, when Boston was occupied by the British. The pattern store-room on the island, with a solid wall towards Galen Street,—that is, a wall built without windows, although ornamented with piers and arches,—shows on the south side by its tiers of windows, four stories above a solid stone foundation wall. Here are kept the many thousands of dollars worth of patterns required by the great variety and constant progress of their work. Next to this are the store-rooms for furnaces,

stoves and ranges. Here may be seen at certain seasons of the year, hundreds of ranges packed ready for shipment—in fact, very large quantities of all the variety of goods manufactured by the company, which here accumulate when the demand falls off and which are drawn upon when the season for increased demand approaches.

Next to these store-rooms, and before we reach the large sample and sales-room of the company, comes the large arch-way through which the teams pass to the inner works, the machine-shops, the foundries, the blacksmith-shop and the other parts of this large interior area. Here in the drive-way are ample facilities for loading and unloading from the store-rooms, above and on either side; from which can be lowered into the wagons the heavy freight either for the railroad or for Boston. This is furnished not only with hoisting apparatus, but also with platform scales, for weighing each load or any part of a load.

The entire process of manufacture is and has been for thirty years conducted under the constant supervision of Mr. Oliver Shaw, who watches particularly that all the various departments work harmoniously, and so that the minimum amount of material may do the maximum amount of work—that is, that strength and endurance are secured where required, with the smallest consumption of iron, but with enough to answer the purpose, who, with knowledge of men and with kindly and considerate attention to their peculiar abilities and fitness for their several duties, has, in all these years of growing prosperity of the company, won their confidence and respect. His position, which he seems to hold so easily, has been reached by no favor or chance. The young man may take note that the ability to do every kind of work, to fill any man's place and do any man's work in a superior manner, may naturally constitute one, with modesty in his bearing, a recognized leader among leaders, a master among masters.

The cupola, or furnace, capable of melting fifteen tons of iron at a blast, where skill and knowledge are required to liquefy the iron with no unnecessary loss of fuel, or iron, or time, is under the charge of W. A. Pratt, with his two men to help him.

The moulding department, connected with the furnace-room and situated on either side of it, has an area of about 14,000 square feet. Here one may see fifty or sixty men, at work preparing in the soft and yielding moulding-clay and sand the forms which ornament in iron the homes of the poor and wealthy over the land—men whom no amount of dust and dirt will prevent you from recognizing as the same who in clean linen and neat dress, preside in the chairs of the town fathers, or as orators in town, or parish, or society meetings, who prove that brains are equally effective in the utilities, as in the elegancies of life. It is not necessary in this place to describe the mode of work, the improved appliances for securing the ends desired. This foundry does not

differ from the many foundries in the country, except as one man differs from another. Some of the men earn quite large wages by their skill and celerity. This room is under the charge of Wm. F. Atwood.

The cleaning and mounting-shop, where the rough castings are taken to be dressed, cleaned, and put together, is in charge of Geo. B. Moore, who has seen thirty years' service in this place. Twenty-five or forty stoves or ranges are finished daily, requiring the services of sixteen experienced mounters and six helpers.

Perhaps the most important department, if one department may be said to be more important than another, where each one is essential to the whole, as well as to each other, is the pattern-making room. Here twelve men are employed, with a great variety of tools and machinery, in making patterns, both in wood and in iron. This calls for skill and ingenuity, and in making new designs, some degree of artistic sense. Not only this, but some degree of judgment is required to adapt the pattern, in view of the varied rates of cooling and shrinking of iron, in the lighter and heavier parts of the casting, to produce the desired effects without danger of breaking or change of form. Allowance must be made in the size of the patterns for this shrinkage. Here seven men are employed on wood, and five men on iron, all under the charge of F. H. Edgecomb.

Mr. John Applin has eight men under his direction in the machine-shop, where drills, lathes, planers, and all the usual kinds of tools required in such places, are kept busy in the varied calls for work of such kind.

One of the contrivances patented, by Geo. H. Tainter, a man in their employ, is known as the Tainter Damper. The name Tainter is somewhat famous also, in connection with the mechanical devices, made by a son of Mr. Tainter for Prof. Bell, of Bell's Telephone.

Nickel-plating, required in the present demand for neatness and elegance, even in cook and parlor stoves, is done on the premises under the charge of David Flanders.

All this machinery would be dead and useless without sufficient motive-power. This is supplied by a Campbell & Whittier forty horse-power engine. There is a powerful steam-pump, ready for fire purposes, which is used in testing the strength and condition of boilers and radiators, before they are put into buildings. The steam is produced in two forty-five horse-power sectional boilers, with thirty sections each, manufactured by the company.

The blacksmith-shop is in charge of Mr. Grace.

The tin-shop, where all the varieties of tin, zinc and galvanized iron, piping for furnaces and ventilation, where ware for cooking purposes is made, is in the main building on Galen Street, next to the sales-room, and is in charge of H. A. Philbrook.

The directors and officers of this company manage for their own interests—this goes without saying,—but also with a liberal policy to their men and to the town. George W. Walker, the president, and his son, Arthur W. Walker, one of the directors, live in the city of Malden. George W. Walker has held many offices of trust and honor in his town and has represented Malden in the Legislature.

George E. Priest, the treasurer, and Oliver Shaw, the general superintendent, and nearly all the employees live here in town. Mr. Shaw is also president of the only national bank in town, the Union Market National Bank, and has acted during many years as one of the selectmen, for a good part of the time their chairman. Mr. Priest is one of the board of trustees of the Free Public Library, is treasurer of the Watertown Savings Bank, served the town and his country in the army during the late war, and both are identified with most public movements. The respect with which they are treated by their townsmen mark the high character of work of this company in all it undertakes.

The business of this establishment was at first almost exclusively in supplying New England households with the essential stove for kitchen and sitting-room use. Now contracts are taken for the most extensive and complicated heating apparatus, which they are ready to manufacture and put up, although they do not despise the smaller and humbler class of manufactures. Among the larger contracts which they have executed one might mention the heating apparatus for the Hotel Vendome, Boston, that for the Danvers Hospital for the Insane built by the State, and that in the Madison Square Theatre in New York City. Some of their contracts have amounted to upwards of \$80,000 each.

This company are now manufacturing the celebrated Crawford Range, now known in its improved form as the Crawford Grand, which is selling all over New England. While no great contracts, of course, can be made for so simple and universally employed device for meeting our common needs, probably the success of their business depends as much upon the call for this as for the larger and more extensive, and, therefore, the apparently more important heaters used in the larger institutions. They have recently been getting out a stove or range in which wood will be exclusively used for fuel, known as the Palace Eureka, designed to meet the wants of the Pacific Coast, yet, as they think, adapted to a considerable portion of New England, where wood is still in abundance.

This company manufacture hot-water heaters also, one which they have recently patented, and are prepared to introduce into buildings where they are preferred. Much is said about the economy of hot-water heaters at the present time. The company allege that the most economical heaters used, as all will allow, are stoves in each separate room, if fuel alone

and not the labor of taking care of them or the incidental dirt and discomfort are to be thought of. If good ventilation is also required, with the smallest amount of care, then the question is between hot air furnaces so called, and steam or hot-water heaters. Either steam or hot-water heaters placed in each room may, by direct radiation, supply the required amount of heat without ventilation. If hot-water or steam-pipes are placed in boxes to which a constantly fresh supply of air is admitted and this allowed to pass into and heat the rooms of a house, giving the same results as the hot-air furnace, then a little experimenting will determine which is the more economical and which will give the best distribution of heat, considering all things—the means of egress for vitiated air and the local direction and force of varying winds, for instance.

The requirements of a perfect heater for dwelling-houses and for larger buildings have been the study of this company for years, and as fast as any new ideas are gained, they are, as the company claims, put into substantial and durable form for their own advantage and for the advantage of our large intelligent New England community, to whose wants they chiefly cater in all their manufactures.

Ætna Mills.—The Ætna Mills are situated nearly a mile above the first dam, above tide-water, on the Charles River, and have for the last few years obtained a reputation for producing various woolen and worsted goods for ladies' dresses of the very finest quality. Goods are made with fine broad-cloth and other styles of finish of every variety of shade and in all colors used for dress-goods by the ladies, as well as in stripes, plaids and figured designs.

The Ætna Mills Company was organized in 1862, and in 1867 the present agent, Albert O. Davidson, came from the Tremont Mills, Lowell, to take charge, and "the present extraordinary success of the institution is largely due to his eminent business tact and to the adoption of those systematic methods which are so essential to the welfare of a large corporation."

The capital stock of the company, organized under the general laws of Massachusetts, is \$250,000, the annual product about \$500,000. The directors of the company are: Joseph C. Stephens, of Boston; Arthur Hobart, of Boston; Edmund W. Converse, of Newton; Morrill A. Smith, of Boston; Edwin F. Atkins, of Boston; Edwin A. Hildreth, of Harvard, Mass., and Albert O. Davidson, of Watertown.

Joseph C. Stevens has been president of the corporation for several years, since the death of Nathan Faye. Samuel Smith was treasurer until 1887, and Arthur Hobart, accountant for twenty years, has been treasurer since that time.

The number of persons employed by the corporation is from 275 to 300, two-fifths of whom are women, and the weekly pay-rolls amount to over \$1600.

A new mill was built a few years ago, 117 feet long, 54 feet wide, and three stories high, the walls of

which were made partly of stone, 30 inches thick, partly of brick, 16 inches thick, with heavy hard-pine beams; built thus firm and strong to support the new and improved machinery then introduced, chiefly looms for the weaving of fine cloths, of which over 20,000 yards are produced each week.

These mills occupy buildings on both sides of the river, where water-wheels supply a part of the power required by the mills. The power generated by the wheels on the south side of the river is transmitted 125 feet, across the river to the north mill, by an endless wire rope, passing over wheels in the two buildings. Between these mills is a rolling dam-claimed by some to be the only one in America, the only other dam of the kind being in England, at Warwick Castle.

While the water-power was at first sufficient to do all the work required—and at times there is a large amount of water passing over the dam, apparently to great waste—it is found that steam is desirable for various purposes in the manufacture of woolens, and, in order to have at all times sufficient power for all purposes, a steam-engine is required.

The engine-room is on the ground-floor, is 30 feet wide, by 60 feet long, and contains a fine Corliss engine of 125 horse-power. The steam for this and for heating, drying and other purposes, is furnished by four large boilers, of which three are constantly in use, the fourth being held in reserve in case of accident to either of the others. Two of these are made of steel. About three tons of coal are required each day.

The different departments of the mill are each under competent overseers, who are held responsible each for his part of the work.

The sorting department, under the charge of J. E. Butler, occupies a brick building on the south side of the river, and, with the store-house adjoining, contains at times over 100,000 pounds of wool of the various kinds. Here may be seen the finest Australian wools, with their long, silky fibres; the brilliant Cash, mere; the Alpacca; the finest and softest camels' hair, so delicate, for the finest fabrics. Here are bales of "Ohio clip," some in the natural state, some cleaned to pure white, in contrast with the black Egyptian near by. The more common kinds of wool are used for some purposes.

The scouring-room and the dyeing-room are in charge of Mr. Alfred Pepler, who has in his store-room all the different kinds of dyes required in producing the greatest variety of shades of all the leading colors. Only by long practice and great skill can all the delicate effects be produced which, either in the sunlight or under artificial light, are so much admired by ladies of taste. One unskilled can only look with wonder on the unmeaning compounds which he sees in the dye-rooms; his admiration must be reserved for the finished fabrics.

The dyed wool is passed through the dryers, the

picker-room, the gauze-room, to the carding-room, which is under the supervision of Mr. Loveland. Here the wool is carded, a work our grandmothers used frequently to send their wool for miles to have done at carding-mills. There are few old people who do not remember the soft rolls of wool brought home from the carding-mill, which their grandmothers used to spin into thread and yarns for knitting and weaving. This work is done now in a superior manner by marvelous mechanism, by which the fibres of the wool are gathered together in fine rolls and wound loosely on large spools, ready for the spinning department. The automatic, self-feeding cards, with their thousands of steel fingers to arrange the fibres in line ready for spooling, and the nice mechanical adjustments, wonderful to us, would have greatly surprised our ancestors, yet it is by the gradual improvements in such mechanism that enabled first Seth Bemis to do the work at all, and now these mills to do work of the quality for which they are noted. The capacity of this room is fifteen sets of cards.

The next department in regular order is the spooling department, under Mr. J. H. Clifford, where the wool is spun and wound on bobbins ready for weaving. The immense spinning jennies, capable of doing the work of several hundred women, do it with almost the same motion,—now advancing, now receding, now twisting, now rolling up on the spool,—but with far greater accuracy and evenness of thread.

In the new building is the weaving department, in charge of Henry G. Chapman. Here looms of different degrees of complexity, some capable of utilizing twenty-four frames,—from different manufactories,—each in care of an attendant, push the shuttles with deafening sound through the warp in varying figures according to the fancy of the designer. While here we are inclined to think this the principal process, the most important step of all in the manufacture of cloths, but in the finishing department, in charge of Mr. Watslong, where the inspection of the fulling, which has reduced the width one quarter, and increased the thickness and the closeness of thread since it came from the looms, one may see the "teazeling," the "trimming," pressing, measuring, folding done, and the cloths packed, after being sampled, ready for market.

All rooms in the factory are furnished with gas fixtures for lighting, and automatic fire sprinklers for extinguishment of accidental fires, while there are hydrants with coils of hose in various parts of the mill and the yard, connected with large pumps readily operated by the steam engine or the water-wheels.

The early history of this mill is quite interesting.

This dam it is claimed was first built by David Bemis and Enos Sumner in 1778. David Bemis had bought 39 acres of land on the Watertown side in 1753, and a few years after, 25 acres more, nearly all the land on which the village now stands. This homestead, where his sons were born, afterwards

known as the Ritchie estate, was the old house so beautifully located on the knoll near the mills, which was removed to make room for Mr. Davidson's house in 1880. Dr. Enos Sumner owned the land on the Newton side, but sold out in 1779 to three men who built a paper mill. David Bemis became two-thirds owner of this the next year, and with his son Capt. Luke Bemis carried on the paper mill until 1790, when he died. After his death his sons, Capt. Luke and Isaac Bemis, became sole owners and continued to carry on the business of paper making until the death of Isaac in 1794. The process of manufacturing paper at that time was necessarily very slow and tedious. The sheets were made in moulds imported from England. Each sheet required separate dipping of the moulds in the pulp, which when sufficiently consolidated, was turned on to a sheet of felt where it was allowed to dry. David Bemis had built in 1778 on the Watertown side a grist-mill and snuff-mill, the first mill on this side at this place. At his death, his two sons, Seth and Luke, became full owners. About 1796, Seth bought out the interest of his brother Luke, and began to manufacture chocolate, and to prepare dye-woods and medicinal woods and roots for use. In 1803 he made additions to the old mill; he commenced the spinning of cotton by machinery, making cotton warp, which though prepared by quite imperfect machinery, proved to be so much better than that spun by hand, and therefore, in such great repute, that Mr. Bemis could not supply the demand. The business proved thus very profitable.

To understand the cause of this great demand for cotton warp, we need only to reflect that by many a family through Massachusetts, it was the custom to weave at home cotton cloth, cotton and wool for blankets, and with dyed wool a coarse kind of satinett for home wear, as well as rugs and carpets for the floor. The writer remembers full well the old hand-loom which stood in the capacious attic of his grandmother's house, which was built at this time only a little over twenty miles away on one of the turnpike roads leading off into the country. This house, built of brick, stood near the centre of a large farm which had always been owned, and still is owned in the family, a Watertown family, since it was first purchased of the Indians. Here were the flax and the wool spinning-wheels also. But it must have been a great relief to the over-worked women of the family to find, by Mr. Bemis' introduction of power-machine-spun threads for warps, "Bemis' warp," as it was known, so great a help in their labors.

One is tempted, in speaking of the great improvements introduced by Mr. Bemis in the manufacture of cotton goods, to reflect upon the great change that has finally resulted in the present domestic economy of our New England households. Then the women, both young and old, were taught a multiplicity of occupations that trained both the hands, the eye, and the mind as well.

"The preparation of the cotton for carding was at that time a slow and expensive operation. It was carried out in small parcels, to be picked by hand in families living in the vicinity, at about four cents per pound, exclusive of carrying out and bringing back, which required most of the time of one man and horse. To facilitate the process of picking, such families as were engaged in the occupation were mostly provided with a 'whipping frame,' the bottom of which was woven, or made of strong cords so loosely that the seeds and dirt could pass through; the cotton, being placed thereon, the two sticks, one in each hand, being laid on smartly for two or three minutes, became very much loosened. For several years the business of cotton picking afforded employment to a multitude of persons, enabling them to obtain a comfortable livelihood."

"Mr. Bemis constantly improved and increased his machinery for spinning, etc., discarding the old and adopting that which was new and better. After a few years he caused a machine to be made for preparing cotton for carding, which did not differ materially from the 'cotton pickers' of the present day. This machine bore the grim title of 'the devil'; and though not very attractive in appearance, particularly when in motion, performed in a very expeditious and satisfactory manner the service intended, much to the regret of the numerous laborers, who were obliged, in consequence of the invention, to seek their daily bread by other methods."¹

This Mr. Seth Bemis, the senior of that name, engaged in manufactures at this place, was a graduate of Harvard College, graduating in 1795, and, although his knowledge of Greek roots and Latin poetry was not essential to success in the profitable management of a cotton factory, doubtless the knowledge was no great burden to carry, and as it did not from the pride of possession incapacitate him from entering heartily into the solution of the various practical problems that presented themselves, it might have sharpened his wits so that he was able to improve upon all who had gone before and even to almost unconsciously anticipate one of the greatest inventions of the age, namely Whitney's cotton gin.²

The town of Watertown enjoys the distinction, through Mr. Bemis' inventive and active disposition, of having made the first cotton duck ever manufactured. It was at a time after the embargo of 1807 had been laid by our general government upon all foreign commerce, and great difficulty had been experienced in getting duck for sails, that Mr. Winslow Lewis, of Boston, extensively engaged in commerce,

in conversation with Mr. Seth Bemis, spoke of the difficulty of getting duck, the coarse linen cloth used for sails, asked if he could not make something of cotton that would answer the purpose. Mr. Bemis had been engaged in the manufacture of sheeting, shirting, bagging for the southern market, bed ticking, etc., and had had the aid of some English weavers on hand-loom. He said he would see about it. Mr. Lewis was unwilling to be at the risk alone of providing machinery on the uncertainty of success, but promised to help to find a market for the cotton duck if it could be made, a large quantity of which he himself would require for his own vessels. Mr. Bemis succeeded in having the work done and for some years received a large return for his venture, as much as \$1 per yard being received during the war for duck.

"It was in 1803 that Seth Bemis commenced spinning cotton by machinery.

"In March 1809, he employed a Mr. Douglas to construct a twisting machine of 48 spindles.³

"In October of 1809, he employed six English weavers, paying them fourteen cents per yard for weaving, and in November following made sales of duck in Boston, No. 1 at 65 cents, and No. 2 at 58 cents per yard." "The sheetings and shirtings sold for 42 cents per yard." "This was probably the first cotton sail duck ever made and sold in this country." In consequence of the impossibility of finding a market nearer for all his products, during the war of 1812-15, Mr. Bemis sent his duck and other manufactures, by his own teams to Baltimore, and even further south, bringing back cotton, tobacco, and other southern products, taking several months to make the journey and return.

In 1812-13 with the aid of an Englishman, Mr. Bemis made from coal and used to light his factory, the first illuminating gas used in America. This had, however, to be discontinued after a few years, because of its leaking from the tin tubes through which it was conducted.

During some of the years following, while this was the leading factory for the grinding and preparation of dye woods and dye stuffs by machinery, for the manufacture of cotton goods and woolen yarn, the grinding of glass,—and with which continued to be carried on a grist mill, as also a shop for making and repairing machinery,—the operatives were called to their meals at the house of Captain Luke Bemis, where they found board, by the blowing of a tin horn, from which circumstance the village received and continued to have, even till our day, the rather suggestive title of "Tin Horn."

Mr. Bemis purchased of his brother Luke and his partner, Caleb Eddy, a brother-in-law, in 1811, the mills and water-power on the south side of the river and thus became sole owner of the entire water-power.

¹ From S. F. Smith's "History of Newton," published by the American Logotype Company, Boston, 1880.

² Eli Whitney, a descendant of the Watertown family of that name, had in 1794 obtained his first patents on the celebrated saw gin, that raised a man's effectiveness in cleaning the cotton from the seed, from about six pounds each day to one thousand pounds a day. This was apparently not introduced in the North for several years.

³ From Report of Boston Board of Trade, 1857, quoted in Nelson's "Waltham."

He soon after sold to the Boston Manufacturing Company his right to raise the height of the water by flashboards for \$1000 per inch for twelve inches. Although gaining \$12,000 by the sale, he afterwards regretted this loss of power, or others have who have followed him. In 1822 he built the present stone rolling-dam. In 1827, the Bemis Manufacturing Company was incorporated, in which his brother Luke was interested, for the manufacture chiefly of satinetts and duck. However in 1830 this corporation was dissolved. Mr. Seth Bemis and Thomas Cordis, members of the company, bought the entire property and continued the same business until 1839, when Thomas Cordis sold out to Seth Bemis and Seth Bemis, jr., who continued the business on both sides of the river of manufacturing cotton and woolen goods in part, and at last on the Newton side of the manufacture of drugs and dye woods. In 1847 they sold the dye wood business to William F. Freeman, and Seth Bemis continued to manage the Watertown mills until his death in 1849, when on the settlement of the estate in 1851, Seth Bemis, jr., became the sole owner. From 1848 to 1860 the Watertown property was leased to Hiram Cooper, who manufactured hosiery and domet flannels. The product for a part of this time was about \$100,000 a year, and a hundred men were employed. In 1860, he sold the entire property to William F. Freeman & Company, who having developed the business largely, in turn transferred the property to the Ætna Mill Company, who greatly enlarged the works on this side, and although for many years, certainly until after 1867, continued to grind and prepare dye woods, gradually enlarged and improved their manufacture of woolen goods until at present their products are well known among the finest and best woolen goods for ladies' use to be found in the market.

It was in 1810 that the "Waltham Cotton and Wool Factory Company" was established, although not until 1813 that the "Boston Manufacturing Company," under the lead of Francis C. Lowell, Patrick T. Jackson, and Nathan Appleton began to apply the knowledge of the improved cotton machinery which they had seen in operation in England, and which they greatly improved and put into the new factory two miles above, which turned Waltham from a smaller and an agricultural town to a rapidly growing centre of manufactures. The success of this led in 1822 to the incorporation of the Merrimack Manufacturing Company and the founding of the city of Lowell.

With the advance of improvements it became necessary to specialize, and thus gradually the great variety of kinds of business carried on successfully by Seth Bemis, sr., has come to one of narrower range, but of a magnitude and the product of a quality of which he had never dreamed. We have followed with great brevity, hardly touching here and there the fortunes of these mills, through their possession by the Bemis family, from the date of the first

The character of Mr. Seth Bemis, sr., is treated by another hand elsewhere. His son, Seth Bemis, jr., was always a friend to educational and religious institutions, as he was one of the original contributors, with his brother George, to the fund for the establishment of the Watertown Free Public Library, giving \$500. In 1882 he gave \$1000 towards the building. The family numbers ten students and graduates of Harvard College; one of them, George, gave largely to this college and to the Boston Athenæum, thus showing their own appreciation of the best educational institutions and their willingness to contribute to them for the welfare of others; and proving, in this family at least, the ennobling and liberalizing tendency of successful activity in manufactures. In closing, one might add his testimony of fitness in the change of the old name of "Tin Horn," and even of the later more euphonious and descriptive "Ætna Mills" to the brief, well deserved and suggestive name, Bemis, which the Fitchburg Railroad Company, and the United States Post-office Department, and all by common consent, apply to this village. Long may it honor its name, but may it never forget by its contributions and its commingling in all social and municipal relations, that it is a part of the old town of Watertown.

The Watertown Indurated Fibre Company.—This company, one of the latest formed, incorporated in the year 1888 under the laws of Maine, with a capital of \$100,000, of which Mr. J. H. Conant is at present the principal, if not the sole owner, is engaged in the manufacture of various utensils from wood pulp, ornamental or useful, which are impervious to water.

The buildings are located on a large lot of land near the West Grammar School-house, on Howard Street, and very near the Fitchburg Railroad, which gives with its side tracks, facilities for receiving materials, and for sending away their manufactured products to all parts of the country.

The material used is the ground pulp of spruce wood, which is reduced to a semi-liquid state, and pumped into moulds where, under hydraulic pressure, of some 120 pounds to the square inch, the water is forced out, and the masses of fine wood fibres are consolidated into any desired form.

These forms, when dried, may be sawn, turned, sanded into any more desirable forms like any masses of wood. They are then given a bath of hot linseed oil or of chemicals largely composed of pure linseed oil, then baked in an oven for about eight hours at a temperature of 270° Fahrenheit. Then the process is repeated several times until the compound is entirely impervious to any liquids. The ware is then finished, polished, ornamented, and made attractive for the various purposes for which it may be used.

The number of men at present employed is seventy-five, their wages about \$750 per week, the value of the products of the factory about \$100,000 per year.

These works were started by Mr. Conant in 1885,

have been increased in extent several times, in the same location, until they are now double their former size. They occupy three principal buildings and five smaller buildings. The largest building is 120 feet long and fifty feet wide, and is three stories high. The engine and boiler-house is fifty feet by forty feet, and is two stories high, the upper stories being occupied as a drying-room. The treating building is eighty feet by fifty feet, two stories high. The upper story is used for indurating and water-proofing the product, and consists of a work-room and four ovens. These ovens are thirty feet deep, one seventeen feet wide and nine feet high; the three others have the same depth and height, but are only nine feet wide. They are heated by steam, which is furnished by two boilers of 100-horse power each, which also furnish steam for driving the engine. The engine is one of the Fitchburg Engine Company's manufacture, and has a capacity of seventy-five-horse power.

The buildings are lighted by electricity from a dynamo in the building, are thoroughly protected as far as such buildings can be protected, by a system of pipes and sprinklers throughout the large buildings, the water for this purpose being supplied by the Watertown Water Supply Company. The water for use in the process of manufacture, of which large quantities must be used, is obtained from three or four wells, which give an abundant supply.

Some of the articles now manufactured are water-coolers for ice-water, umbrella-holders, fire-casks, store barrels, pails for ordinary use and for fires, the latter having a peculiar form to fit them for their use and to prevent them from being used for any other purpose, pans, slop-jars, and churns.

In time, utensils required to hold liquids of every kind may be made. The material is much lighter and less brittle than porcelain or other earthen ware, or glass, much less costly, less likely to leak or fall to pieces than wood held together by hoops. The use of this manufacture is increasing each year and its appearance is being constantly improved.

Educated decorative artists are employed to ornament the ware with fitting designs, some of which make one think of the lacquer of the Japanese.

Mr. F. E. Keyes was the first superintendent, and leaving because of ill health, Mr. L. S. Frost took his place in July, 1886, and has had charge of the works ever since. Mr. B. S. Bott has charge of the decorative department. U. S. Dixon is the engineer. Mr. F. C. Goss has charge of the machine-shop and repairs.

The Porter Needle Company.—The Porter Needle Company occupied buildings on the south side of the river on Watertown Street, not far from Galen Street. Their business was established October 1, 1879, but manufacturing was not begun until January 1, 1880. The company was composed of Mr. Edward F. Porter, of this town, president; Mr. Hugh Robinson, of Jersey City, vice-president; Mr. Lewis B. Porter, treasurer; and Mr. W. D. Porter, secretary.

Their business consisted in the manufacture of sewing-machine needles, sewing-machine shuttles, bobbins, tools, and machinery. They employed as many as seventy-five (75) men, and turned out 20,000 needles per day, with a monthly pay-roll of \$2000. They also furnished other manufacturers with blanks. They invented some fine machinery for the manufacture of shuttles and bobbins.

The business was continued with varying success for six or eight years, until 1888, when

The Porter Shuttle and Bobbin Company, managed by Lewis B. Porter, succeeded to a part of the business, the manufacture of needles having been discontinued. This company continue the manufacture of shuttles and bobbins for sewing-machines, also manufacture various kinds of attachments for several kinds of sewing-machines.

The stock in this company is owned entirely by Lewis B. Porter, who carries on the entire business. He employs twenty or twenty-five hands, men and boys, and distributes about \$800 monthly. The sales are wholly from the factory to sewing-machine manufacturers and to large jobbers of sewing-machine supplies. This is at present the only factory devoted wholly to the manufacture of shuttles and bobbins in the country, and the outlook indicates a large industry, as the sewing-machine manufacturers are looking more and more to special factories for their shuttles and bobbins.

The Empire Laundry Machinery Company.—This company now occupy a part of the buildings formerly occupied by the Porter Needle Company. It was formed in 1883, with head-quarters in Boston, to manufacture a combination of inventions developed by the Cambridge Laundry, of Cambridge, and by Porter & Co., of Watertown, and gradually grew to larger proportions as new appliances were manufactured, partly by Porter & Company and tested by the Cambridge Laundry, until since 1888 it has succeeded to the use of all the buildings but one occupied formerly by the Needle Company.

The company is at present composed of George L. Shorey, of Lynn; H. S. Porter, of Roxbury; and L. B. Porter, of Watertown. It was incorporated under the general laws of the State, with a capital of \$10,000, with individual loans of \$40,000 more, from the members, which with the surplus earnings gives a working capital of about \$75,000.

As they are now doing a business of a quarter of a million dollars a year, and require larger buildings they have bought a tract of land containing about 60,000 feet, and are making plans for extensive buildings and enlargements; and they propose to include all the capital used, with an enlargement of the same, into its incorporated stock, making it \$100,000 or more.

The company's special and patented machinery may be found in nearly every country upon the globe, and there are few hotels or large institutions that do

not use some of their machines. About fifty different machines and appliances are now made, of every kind, from boilers and engines that supply the power, to the supplies used either in domestic laundries for family work or the laundries of hotels and larger institutions.

Among the machines and appliances manufactured may be mentioned: washing-machines, both of wood and of metal; extractors for removing water from goods, wringers, centrifugal wringers; starching machines; ironing machines of many kinds, including the mangle, parallel ironer, bosom, neck and wrist-band ironer, shirt body ironer, bosom ironer, universal ironer, collar and cuff dampener, ternary mangles; with a great variety of hand machines, from washers to sad irons; stoves for heating hand-irons, blowers, presses. As Watertown is quite a centre for all kinds of laundry work, these and more may be seen in operation in some of the laundries near the factory. There are at least three such laundries, a visit to which would at almost any time repay any one to see what can be done in this direction by machinery.

These machines are being sold very widely in this and other countries. The new building planned for this factory is to be 250 by 150 feet, one story high, with solid, well-protected floors for heavy machinery, with good light partly from above, well heated by steam and lighted by electricity, and well protected from danger of fire. Its approaches on three sides will be convenient for receiving materials and sending off machines.

Leveson's French Dyeing and Cleansing Establishment.—This establishment cleanses and dyes all kinds of fabrics and materials used as clothing, or as draperies, upholstery, carpets or rugs for floors.

The property is at present owned by George S. Harwood, of Newton, who has about \$150,000 invested in it. Wm. Lincoln Cfosby, 17 Temple Place, Boston, is at present manager.

The superintendent of the works at Watertown for the last two years is Peter Burbank, who has had nearly thirty years' experience in the business. There are employed here during the different seasons of the year from one hundred to two hundred persons, over one-third of them men, the other two-thirds women.

There is distributed in weekly wages from \$1000 to \$3000.

The principal office for the transaction of business is 17 Temple Place, Boston; there are branch offices in other parts of Boston, in New York, Philadelphia, and other cities, with a system of advertising and sending by mail and express that reaches the whole of the United States and the Provinces.

The laundry has been recently refitted and furnished with the improved machinery manufactured by the Empire Laundry Machinery Company of this place, and differs on account of 1200 collars and cuffs, 500 shirts, and a large quantity of other articles each day, at about \$2000 worth each week. Starch made in

Watertown is believed to be the best and is therefore used.

They have a most systematic method of receiving, marking, accounting for and treating each article in each bundle taken into the works, so that each owner is sure to receive his own property when finished. Mistakes seldom occur. Flannels are washed by hand so as to prevent shrinking, but most goods in the huge washers; they are dried in the excelsior dryer, turning 1400 revolutions per minute, and starched and ironed when required, by special machinery for the different kinds of fabrics or garments. Those requiring polishing are, if collars or cuffs, for instance, passed through a parallel ironer; all are dried by steam. A large part of the water required here, as well as in the dye-house, is furnished from six artesian wells, although a large quantity of water is taken by measure from the Watertown Water Supply Company.

In the dye-house experienced chemists and expert dyers are employed. Experienced pressmen and presswomen are required in a part of their works. The requisite knowledge and skill necessary to sustain the reputation which the establishment has acquired, is the result of long experience.

A boiler of 120 and two of forty-five horse-power are used to supply the motive-power and to furnish steam for heating and drying purposes. Three steam-engines of about eight, six, and ten horse-power operate the laundry and other machinery, including a large pump for raising the water from the artesian wells. If we had space to describe the processes in the different departments, and give the names of those who have charge, or have acquired greatest skill, we certainly should begin with the dye-rooms. It is understood, of course, that when an old garment is to receive a new color, it is as far as possible discharged of its former color in order that the dye-stuffs may have their proper effect. Otherwise it must be determined by experiment upon a small part, or by former experience, what peculiar combinations are required to be made in order to produce the exact shade desired. Patrons send with their fabrics or garments, bits of color of the kind ordered, little thinking of the patience or skill acquired by long experience, needed to make it possible to make even an approach, in some cases, to the effects desired. The art is so peculiar, the knowledge so technical, and so beyond the comprehension of the uninitiated, that for most, admission to this room would be only bewildering, and to those prepared to understand the secrets of the workmen, manifestly unpermissible.

There are drying-frames to prevent shrinking, frames and cushions for laces and for drapery curtains, naphtha cleaning rooms for certain kinds of work, a separate department for cleaning and dyeing gloves, of which 10,000 pairs are sometimes done in a month. One might be greatly surprised to see a soiled pair of light-colored gloves come out fresh in

their delicate tints, as if never worn, while black can always be imparted to those that seem to most, hopeless of further usefulness.

In the cleansing house, men's clothing, ladies' dresses and robes, blankets, carpets, curtains, draperies can be thoroughly cleansed by what is known as the dry process. Elaborate ball and stage dresses are thoroughly cleansed without taking them to pieces. Velvets, laces, shawls, are handled with great care, and so skillfully and delicately treated, that they seldom receive injury. One of the new and secret processes on which they pride themselves, and of which they make great use, enables them to remove the disagreeable shiny appearance which smooth woolen cloths take on after a little wear; 5000 garments have been thus treated within a year and a half.

The manager says this business was begun by Mr. Lewando, in Boston, in 1829. Still we find in the *Watertown Enterprise* of 1880 the following statement:

"The *Watertown Dye-House* was founded by Mr. James McGarvey, in a small way, on Pleasant Street, about forty years ago. After a few years Mr. Adolphus Lewando succeeded him. Shortly after, the building was destroyed by fire, and Mr. Lewando decided to remove the business to Saccarappa, Me. The move, however, proved to be an unfortunate one, as the distance to Boston was a serious obstacle in the way of securing orders, and Mr. Lewando decided to remove to Dedham, Mass. There the enterprise was attended with fair success, but for some reason the proprietor deemed another change necessary, and, in 1865, the business came back to its birth-place—Watertown—since which time it has continued to grow in prosperity until it has reached its present magnitude. At the time of Mr. Lewando's death, which occurred, we believe, about 1871, a Mr. Farmer, of Boston, succeeded him and carried on the business for about three years. At the expiration of that time a son of Mr. Lewando's associated with him in business a gentleman by the name of Cate, and this firm remained in occupation for one year. The business then passed into the hands of Messrs. Harwood and Quincy, who erected at different times the large brick block now almost entirely occupied by them for their business, the block of houses on the river-bank above their works, and the buildings on piles in the river above the island, below and on the opposite side of the Galen Street or 'Great Bridge,' and who remodeled the remaining buildings as the enlarged and improved condition of their business demanded.

"In 1886 Mr. Quincy retired from the firm, so that since that the business has been carried on by Mr. Harwood alone.

"This business is now claimed to be larger than that now carried on by any similar establishment in the United States, and is rapidly increasing."

Metropolitan Laundry.—This laundry was started many years ago in connection with the shirt factory

of Mr. Charles J. Hathaway, who began to manufacture shirts in large quantities and to sell them in Boston at wholesale as early as 1848. At first a necessity in the manufacture of white shirts, it was managed as a part of the shirt factory. During its history it has passed through many different hands until at present it has grown into an independent establishment by itself and is now owned and managed by Mr. H. H. Sawyer, who runs it under the above title. It is true that some of its work comes from the adjoining Metropolitan Shirt Factory, but it has with it no necessary connection, except to supply the latter company with steam and power from their large boiler.

The present capacity of the works is 40,000 or 50,000 pieces each week, and employs about forty persons. The building is large enough for a larger business, and will be fully utilized soon, if the present rate of increase of business continues. The goods laundered are partly new from manufacturers, or are from families residing in different places, from whom the work is obtained by a regular system of collections, mostly within New England.

This laundry is newly and very fully furnished with new machinery of every variety from the Empire Laundry Machine Company of this place. It is the aim of the present proprietor to do first-class work; so he spares no effort in trying to provide, with first-class appliances of every kind, the best help this place affords, where work-people have been trained by long experience to do excellent work, and also seeks in other places their most skillful workmen.

Goods can be laundered now in a very short time. While following for convenience the old system of weekly collections and deliveries, work is on occasion done very quickly. As in the large hotels of Europe, here one can have his linen thoroughly laundered while he is taking a nap, or a bath,—a Turkish bath.

As the huge baskets are brought in, filled with parcels from the families, by the collecting wagons, each piece is marked, recorded, sorted, and put into the rotary washers for their first washing. These are, some of them, of wood; some, since copper has fallen from its high price, are wholly of metal, a composite metal, which has strength and endurance and does not ordinarily discolor delicate clothing. About an hour spent in turning and reversing in strong solutions of soap and the following baths of clear water, without wearing by rubbing, is generally sufficient to remove all dirt and leave the clothing white and clean. The clothes, carefully packed in the centrifugal wringer, soon have every drop of water whirled out of them. This machine hums like a top, and by its rising key indicates a very great velocity, it is said 1400 or 2000 revolutions each minute. The clothes are then passed through the starchers, to the dry room, where the last trace of dampness is removed, then to the ironers and the polishers. We have not space to describe all the processes upon the

perfection of which the excellence of the work done depends.

Of course where there are many collars, or cuffs, or shirts, or articles of any one kind to be done, machines, as here, just fitted to a bosom, a cuff, or a collar may be provided for that particular use which will operate almost automatically. By specialization of work, a greater degree of skill is reached.

A woman in any kitchen or laundry, however, might have a self-heating iron, or, in other words, a smoothing or polishing iron with a supply of gas and air to burn inside of it, so as to maintain the uniform temperature required for such purposes.

A forty horse-power boiler supplies the steam for heating and drying purposes, also to the small steam engine of twelve horse power which drives all the machinery with precision and order. The visitor comes away with the feeling that at the present time there is a great advance upon the days of our fathers, and that woman has indeed been relieved of much of the mere drudgery of labor.

The number of persons employed here is between forty and fifty,—eight or ten men, the rest women.

Shirt Factories.—The shirt industry of America was founded in 1832 in New York.

"It was in the Presidency of Andrew Jackson, in 1832, when people were talking of nullification, about disposing of the surplus in the national treasury, about the Abolitionists of Boston, about the right of petition which John Quincy Adams was making a brave fight for, when Boston was a week's journey away from New York, when there was as yet no West, and Cincinnati was a frontier village, St. Louis a trading-post, Chicago a wilderness, no railroads, no telegraphs, no newspapers that printed news, no great factories, no sewing-machines, no machinery for making shoes, hats, clothing, furniture; only rude iron-working tools, rude printing-presses, imperfect steam-engines. There were great planters then, great merchants, but no great manufacturers. What men made, they made with their hands." What a change within sixty years in manufactures! What a change in the condition of the common people, especially of women!

It must have been in the thirties that the first shirt factory was started in Watertown, and that by a woman, not long after the one in New York City, and probably without knowledge of that. Mrs. Silas M. Bates (her name was Mrs. Potter then) began, in a house, on Main Street, that was removed to make place for the present Public Library building, with the help of girls whom she hired for the purpose, the manufacture of shirts for sale by the dozen. She afterward moved to a house on the opposite side of Main Street, farther from the square, and finally, between 1840 and 1845, put up the building now occupied by J. G. Barker as a shirt factory, on Spring Street, nearly opposite Fayette Street. It is said that she had a place for the sale of these shirts in Bos-

ton. Possibly this was so, although it has been said that Mr. Hathaway's store on Milk Street was the first wholesale shirt house in Boston.

Mr. Blackwell followed her and carried on business here for several years. He had already begun in another building near the railway.

Mr. Barker, who followed him in this building, has been in the business about thirty years, and at the present time employs one man and about fifteen women at his works, and as many more outside who do their work at home and bring it to him when finished.

Mr. Barker makes all kinds of shirts, mostly of the better grades, for some of the best firms in Boston.

"Boston was early the seat of shirt manufacturing for the trade, C. F. Hathaway having established himself in that city, with a factory at Watertown, Mass., in 1848. He built up a considerable business, manufacturing mainly for jobbers, and the 'Hathaway shirt' became widely known throughout New England, with a well-deserved reputation for careful, honest workmanship, good material, and full size." This is from a leading journal which treats of the history of this manufacture.

The Metropolitan Shirt Factory is the principal shirt-factory in town. It was bought of Mr. Hathaway some twenty-five years ago and is situated on Spring Street, near the corner of Palfrey Street. With some change of name and in the style of the firm, it is essentially the same, except that it is increased in extent. It is run by Simons, Hatch & Whitten, manufacturers and wholesale dealers in men's furnishing goods, whose place of business is on Winthrop Square and Otis Street, Boston.

This firm have several factories for different kinds of work in different places; at this they manufacture all their "fine grades of white, dress, fancy, and night shirts."

The capacity of these works is about one hundred dozens per week, with an immediate prospect of enlargement. Two men and about fifty women are employed. G. F. Faxon, the superintendent, has been engaged in this work and in this place about thirty years. The power is supplied by an engine in the adjoining laundry, which drives the fifty sewing-machines at a high rate of speed, and the two button-hole machines, one of which is capable of making 1600 button-holes each day.

The cutting-room is 160 feet long. This room has the longest cutting-board in use. It is 120 feet long, is capable of accommodating a full 40-yard web of cloth. Indeed, forty-eight to sixty webs of cloth laid one over the other exactly are stretched out on this cutting-table. The patterns for all the different pieces which go to make up the finished garment are laid upon the outstretched webs, according to the judgment and skill of the cutter, so arranged as to waste no possible portion of the goods, and yet give each part its exact and proper form. These patterns

are made of light wood, or of thick paste-board bound with brass, along the edges of which a sharp knife in the deft hands of the cutter strikes down through all the thicknesses at once.

The goods when received are piled on counters or shelves by the side of the table, from the huge cases which we may see at the end. They are of different materials, each with its great variety of designs and each of different combinations of colors. Some are for *negligee* shirts, for seaside or country-lawns, and beautiful enough for the most fastidious in taste.

In the sewing-room the thirty or more nimble and skillful pairs of hands pass the pieces which have been put together, as they alone know how to do it, under the sewing-machines, where the seams are finished faster than could have been imagined possible a few years ago. The button-holes even are made and finished by improved machines ready for use. See this woman place the band under the machine; the stitching proceeds down one side, turns automatically, returns down the other side, is barred, the hole cut, and is ready for use in much less time than it takes to say it. These shirts have their handkerchief pockets and their watch-pockets, the latter with a barred opening for the watch-chain.

These soft, zephyr-like fabrics surely require no starch. In this next room they are smoothed out, examined, folded ready for the neat boxes in which they are packed, and marked according to style and size, ready for the trade, or are put up with exact reference to orders from various parties all over the country, each with its appropriate numbers and marks. Each dealer has his own name and address woven in colored letters, with a neat design, placed upon each garment which he orders. Thus it would seem from the garments themselves, when finished in this one factory, that they had been made in a hundred different factories, all the way from Maine to California, from Minnesota to Florida, while the dealers know for all the glory they get for this superior manufacture they are indebted to the one firm, Simons, Hatch & Whitten.

One naturally inquires what is the condition of these shirt-makers? Are they like the poor women for whom Hood has enlisted the sympathy of the tender-hearted? Are they

"With fingers weary and worn,
With eyelids heavy and red
Compelled to sit in unwomanly rags,
Plying the needle and thread?"

For my readers surely wish to know whether indeed they cry with mute lips and pleading eyes,

"O men, with sisters dear!
O men, with mothers and wives!
It is not linen you're wearing out,
But human creatures' lives."

Not a bit of it. The steam-engine drives the needles. The introduction of steam-driven sewing-machines into Massachusetts in the manufacture of shirts, we are informed by the superintendent, was first

made by this factory. Seams are sewed up almost quicker than you can wink. The animation of the sewers' faces, and the beauty of the materials with their graceful figures and harmonious blending of shades, the cheerful hum of the sewing-machines, combine to make a sight which it is pleasant to remember. And long before dark the scene changes; the women are released with full freedom

"To breathe the breath
Of the cowslip and primrose sweet,
With the sky above their heads,
And the grass beneath their feet."

Formerly three dollars a week was considered good wages for a smart girl. Now few, even with their nine hours a day, earn less than six to ten dollars a week.

To quote again from a prominent publication on this subject:

"The growth of the factory system, with its accompanying economies, has vastly improved the condition of women employed in shirt-making, shortening their hours, lightening their work and increasing their wages. Before the introduction of the sewing-machine, but few women were employed in factories. The industry was almost exclusively a domestic one, and, like all domestic industries, the wages paid were not sufficient for subsistence."

"Where by hand a woman would do but one shirt in a day, the usual product now is about a dozen shirts to each machine, and the average earnings of machine operatives, good, bad and indifferent, in large country factories, are six to ten dollars per week." "Steady, industrious girls, working full time, will earn more than this." "So the cost of shirts has been reduced somewhat more than one-half, while the average earnings of the workers have been increased about three-fold." This applies to the work done in the factory. Finishing done in the homes still brings the smaller returns. Women will work cheaper in their homes, in the leisure they can get from necessary duties, and with the help of children.

We wish we had the space to inquire, in this connection, a little more fully into the condition of the women employed in factories. "It is said that in large cotton manufacturing towns, where female help is much employed, the condition of the latter is noticeably deteriorating, in social status, morals and wages."

This is said not to be the case in shirt factories. We know it is not the case in our shirt factories. It certainly is not necessarily so. It was not so in the days of the *Lowell Offering*, when factory girls edited and published that paper. It need not be so now, with the store of good books which our Public Library offers free to all who ask for them, with our free evening schools, with the hours of leisure after and before regular work, when the fields can be seen in pleasant weather, when good reading can fill the

hours of storms, and good society in our churches is always open. A hasty run through our shirt factories shows that a still better condition of intelligence, morals and society is possible among wage-earning women, if they themselves will strive more in that direction.

Warren Soap Manufactory.—We have spoken of the shirt factories and the laundries and the machine-shops where the new laundry machinery is made. But these would make poor work of it without soap and starch.

"Soap is a chemical compound of vegetable or animal fatty substances with soda or potash, employed, on account of its properties of loosening and dissolving greasy and other matters, as a detergent or cleansing article for the toilet, for washing clothes, and similar purposes."

"Soap is mentioned in the Old Testament, in Jer. ii: 22 and Mal. iii: 2; but the Hebrew words thus translated mean the lye salt potash, commonly made from the ashes of plants, and the salt soda, better known as a mineral product."—*Appleton's Cyclopaedia*. "Soap, both as a medicinal and as a cleansing agent was known to Pliny, who speaks of two kinds—hard and soft—as used by the Germans. There is reason to believe that soap came to the Romans from Germany."—*Encyclopaedia Britannica*.

Natural alkaline waters are found and used, clays are sometimes used as absorbents of grease, by fullers, in cleansing cloths. Ammoniacal waters are sometimes used for the same purpose. Now these three alkalies,—potash, soda, and ammonia—softened by the introduction of various fatty substances, are the active factors in all soaps.

Watertown early sought to provide itself, and a part of the rest of the world, with so necessary an article.

At present the Warren Soap Manufacturing Company is an incorporated company, incorporated this present year of 1890. The stock is not quoted on the market; it is, in fact, owned entirely by three men: Mr. Albert C. Warren, of Auburndale, a son of the former owner of the works; Mr. George L. Stevens, of Boston; and Mr. Alfred H. A. Groeschner, of this town. Twelve men are employed at the works, four salesmen are employed, who travel through the country, and Crichtett's teams visit the works almost every day, according to their needs.

Soap may be made in the laboratory in great variety, from hundreds, yea thousands of animal and vegetable oils, combined with either of the three alkalies. Some of these products are fragrant and delightful to every sense. In the manufacture of textile fabrics in large quantities, where oil is used freely to assist in the process of manufacture, as well as to reduce the friction of machinery, large quantities of soap must be used to cleanse the fabrics before they are fit for the dyer or for the market. The Warren soaps are known over the country in large cotton and woolen manu-

factories of hosiery and other fabrics, as well as in public and family laundries.

As we approach the works we are struck by the appearance of long lines of barrels and casks and hogheads running across a large yard, and piled under a row of sheds. These are marked Warren Standard Soaps. They are scouring soaps, fulling soaps, finishing soaps, etc., put into casks for ease of handling, and are ready to be shipped to the factories from Maine to Texas as they are ordered. The last half year over two million pounds have been manufactured and shipped, nearly as much as the entire previous year.

Entering the large building beyond, we come first to the office, now refitted for their rapidly increasing business.

The next room is the laboratory, where samples of every barrel of alkali, of tallow, and of oils are accurately tested, as every cask of soap is tested before it leaves the factory. All substances used in making soap are tried by delicate chemical tests, so that just what goes into a batch of fifty tons of soap is thoroughly known, and is recorded for future reference.

The next room is the shipping-room, with its appliances for weighing, marking and recording the description of all packages sent away.

We can look, in the next room which is the boiling-room, at the huge kettles that hold one hundred and fifty barrels of seething, foaming, steaming liquid. Two of these largest kettles have been put in during the past year. "You can call spirits from the vasty deep, but will they come when you call them." The three witches may, with uncanny gesture, walk about these pots, and may cast in their horrid contributions from the four quarters of the globe, and produce a compound that would defy the evil one himself to know or to baffle, but the resident member of this company will prove every inch of this mass when cold, and tell you just what are its powers and how far it can go to the service of man. If unsatisfactory, he will order it back again to stew and stew, and boil and boil, with the addition of many a compound, till it is more ready for the service of man. You and I do not expect to learn the secrets of his art, which it would be worth a fortune to know; we must be satisfied to see and use the results of the knowledge and skill acquired by a score or more of years spent in closest application to secure the results.

The building belongs to the Gas Company. The alkalies are imported. The carbonates and caustic potash come from Germany, caustic soda and its carbonates from England. The freight from Liverpool to East Boston is less than from East Boston to the Watertown works. This building was once used as a hat factory, afterwards as a soap factory by Mr. Robbins, then for wool pulling, then for the manufacture of Johnson pumps, then for making wire fencing. It was first used by Mr. H. M. Warren, who employed Mr. Groeschner, in the manufacture of

magnesium for artificial light in stereopticon exhibitions. This agent is available now, is more easily managed than the calcium light, more convenient than electricity on account of its portability. There is, however, a disagreeable product of smoke of magnesia in fine powder,—which can be taken care of. But the quantity of the article required is not sufficient to make its manufacture remunerative.

In 1868, Mr. Warren began to make family soaps. After three or five years the bulk of the business came to be the production, in constantly increasing quantities, of textile soaps. We said that more than forty different kinds of soaps are made here. These vary, as one would suppose, with the materials used. Just what these are we do not expect to learn.

While these soaps are known to the trade as uniform in character, scientific accuracy requires us to say that each batch of soap requires constant watchfulness: for different materials, or materials supposed to be the same, but really of different qualities, vary and require nice balancing, one with another, to give uniform and constant results. No cask is allowed to leave the factory without being first tried by careful tests. Resins are not used to increase the weight of their soaps.

The sale of soaps to large manufactories requires skilled experts, who, on occasion, can go into the works themselves and prove the quality of the soap offered by showing what work it is capable of doing. This may be vitiated by unskillful treatment. Thus an industry is gradually built up as confidence grows in the constant and uniform character of its products.

It was in 1880, at the death of Herbert M. Warren, the first proprietor, that the present company was really formed. Of this firm, incorporated not till 1890, as we have said, Mr. Groeschner—long a resident of Watertown—has been the superintendent and chemist at the works from the inception of the business. Mr. Warren acts as treasurer for the company, and Mr. Stevens acts as business manager, taking charge of the sales, each doing his part with harmony, energy, success.

Starch Factories.—On the same street, Water Street, along the south bank of the river, is what has been known for many years as the *Starch Factory*. Indeed, this roadway was long since known as Starch Factory Lane. There was formerly a distillery here. When the present proprietors began, only one building was occupied. This, some fifteen or twenty years ago, was burned. Now Messrs. H. Barker & Co. occupy five buildings, which they have successfully erected as the demands of the business have increased. They now employ sixteen men here and ten at a building about a half-mile up the river. This starch is made from wheat flour, is shipped to New York and other places by the ton, packed both in barrels and in boxes. It is used wherever the best starch is required.

Another starch factory, on the north bank of the river, on Pleasant Street, near Bemis, is manufacturing

large quantities of wheat starch. These works, carried on by the Crystal Springs Manufacturing Co., employing ten or twelve men, under the immediate charge of Charles R. Fletcher, are trying a new process, nowhere else employed, by which the *gluten*, separated from the starch, is saved and made a valuable health food product, called *Poluboskos, much nourishing*. This is characterized by its easy digestibility, and is therefore suitable for weak stomachs. Dyspepsia, the curse of our driving, nervous civilization, it is hoped, will find here a foe.

The principal building is fifty feet wide and one hundred and fifty feet long. The capacity of the works is about five hundred barrels of flour each week. The Boston office is at 86 State Street, under the management of F. H. Odiorne, president, and Wm. B. Buckminster, general manager. The new process employed in the works is patented by Herman Barker, who is one of the board of directors of the company.

The starch and the soap made in town would be adequate for the laundries now existing here, were they to be multiplied a hundred-fold.

The Mill and the Dam.—Governor Cradock, the first governor of the Massachusetts Bay Company, who was a wealthy London merchant, who never came to New England, yet owned two of the vessels of Governor Winthrop's fleet, the "Ambrose" and the "Jewel," had sent out in 1628, two years before Sir Richard Saltonstall came to the Charles River, a certain Thomas Graves, who, judging from the words of the contract made with him, was a skillful engineer. "This 10th of March, I, Thomas Graves, of Gravesend, in the county of Kent, gent., and by my profession skilful and experienced in the discovery and finding out of mines, as also of lead, copper, mineral salt and alum, in fortifications of all sorts, according to the nature of the place, in surveying of buildings and of lands and in measuring of lands, in describing country by map, in leading of water [courses] to proper uses for mills and other uses in manufacturing, etc., have agreed," etc., etc. This Graves was to serve the company and Governor Cradock and to be at the expense of both—each one-half; he was to be retained three years if they wished. There is mention of a Thomas Graves admitted freeman twelve years after. It is to be presumed that he remained and made himself useful both to the Massachusetts Company and to Governor Cradock. For this Thomas Graves, admitted freeman, was probably either the engineer himself or his son, then of age.

On the 17th of March, 1628, a warrant was made to pay for iron and steel, also to pay for *buhrs* to make mill-stones:

	£	s.	d.
110 at 2s. apiece, bought of Edward Casson, of London, merchant tailor	11	0	0
11c of plaster of Paris (at 18d. per c.)	1	1	0
Portage, weighing the plaster and casting out of the buhrs, 12d. and 23d.	3	0	
	112	4	0

This shows that before starting the colonists for the new country, that some one of the company, presumably the Governor, the wealthy merchant in London, bought in London— it seems of a *merchant (tailor)* some of the materials necessary for first-class mill-stones.

There is no record of the building of a dam in Watertown or of the building of the mill. The fact is stated that Edward How and Matthew Cradock, the former Governor, the wealthy London merchant, sold, the latter by his agent, each one-half of the mill at Watertown to Thomas Mayhew, in August, 1635.

Perhaps Matthew Cradock's agent, Thomas Graves, the skillful civil engineer by his own profession and by the company's allowance, built the mill and the dam for the same, in the rapids at the head of tide-water, at the expense of his employer, Cradock, and of Mr. Edward How who probably took care of and run it until they sold it to Mayhew.

It is true there might have been a dam built there before by the Norsemen. Even if there had been, it must have been washed away during the chances of heavy floods weighted with fallen trees overthrown by cyclones or with masses of ice piled up by the spring melting, as has frequently been done since.

This Graves built the large house in which the Governor and assistants first met in Charlestown. He built fortifications for the early company.

Hollingsworth & Whitney Company.—The Hollingsworth & Whitney Company occupy a site in Watertown which, for fifty years, has been devoted to paper-making purposes. About 1839 William May had a mill there, and for him worked Leonard Whitney, Sr., who subsequently bought the property, and associated with him his son, under the firm-name of L. Whitney & Son. Mr. Whitney, sr., retiring, sold out to Thurston Priest, and the firm became Whitney & Priest, who, besides making paper, added to their business the manufacture of paper bags by machinery. In April, 1862, the firm changed. Mr. Priest, retiring, sold out to E. A. Hollingsworth, and the firm became Hollingsworth & Whitney. At this time the plant was small, the water-power very meagre, and business rapidly growing.

This led the firm to consider the making of improvements, and in 1867-68 the present building, 60x200, with boiler-house and steam-engine room, was built, to accommodate both branches of the business, and where the production of paper had before been thirty tons per month, it was increased to 120 tons, while the bag department had its facilities doubled. Since the new mill was built, improvements have been made, so that now there is turned out daily eight tons, or 208 tons monthly, and the capacity of the bag department is 2,000,000 daily. Mr. Whitney died July 5, 1881, and Mr. Hollingsworth on January 6, 1882. On the 1st of April, 1882, a corporation was formed under the laws of the Commonwealth, bearing the designation of Hollingsworth & Whitney Company, which now carries on the business.

The works of this company occupy the site of the "ancient grist-mill," the water-mill" of the earliest record, and of many another mill of later date, as, for instance, a chocolate mill which was afterwards moved to Dorchester, and became the Baker Chocolate & Cocoa Mill, now known by its product over the world, an early saw-mill, and others of which there is no distinct record.

The Watertown Mill.—The Grist Mill.—This was originally a grist-mill, the business being at first the grinding of grists for the farmers who came from near and from afar. It is at present conducted by Perkins & Co., has two runs of stone, with a capacity of grinding 600 bushels of corn a day of ten hours. The corn ground comes from the western prairies, the flour sold comes mostly from Minneapolis, the hay and oats from Maine and the Canadas.

The grist-mill was moved down the "mill creek" to the site it now occupies was afterward moved nearer the river to accommodate a cotton-factory which began in 1805, by occupying the stories above the grist-mill, then the whole of it, which finally gave way to the return of the corn-mill, when that property was absorbed by the foundry and stove works now belonging to the Walker Pratt Company.

The building of the original mill and dam we have already ascribed with some degree of certainty to Cradock and How. The time was as early as, or earlier than January, 1634, for on this date a grant of land was made to it by the General Court. This was purchased and for some years owned by Thomas Mayhew. The ownership is traced by Dr. Bond to 1710. We can take up the train again in 1789, when John Remington sold to David Jackson. On some future occasion we hope to present in a satisfactory manner this entire history, which is very complicated because of change of owners of fractional portions, and change of work done at different periods. The grist-mill holds the first right to the use of water for power. In case of failure of water supply, its wheels must be satisfied first. With change of location on the ancient Mill Creek, probably the oldest mill creek in the country, this right has now been suspended or alienated. The first duty of the Charles River in Watertown is to grind corn, and no man now knows how or when it was first imposed. The Mill Creek is thought by some to be a natural water-course. No one can disprove it. Prof. Horsford thinks it was built by the Norsemen.

Newspapers.—The Enterprise.—This paper was established by Samuel S. Gleason, Nov. 5, 1879, under whose management it steadily increased its circulation, its size and its influence. The paper is devoted to local interests, is bright, enterprising, and open to all who try to advance the interests of the town. After seven years given to the interests of this paper, Mr. Gleason withdrew from the paper, giving it wholly into the charge of Fred. G. Barker, who had been its printer for nearly its whole existence. Mr.

Gleason has, for the last few years, given up his time to the real estate business, which he has greatly developed in this place.

Mr. Barker prints several periodicals, employs nine persons on his miscellaneous work. Having taken up printing as a recreation, when a boy in school, he has constantly increased his facilities and his skill, until his office has acquired a reputation for excellent work.

Gas and Electric Light.—The Newton and Watertown Gas Light Company has one of the best gas and electric light plants in this State. It is situated on Water Street, Watertown. The company was organized March 18, 1854, with a capital of \$200,000. The officers of the company are: President, Joseph N. Bacon; treasurer and clerk, Francis Murdock; directors, Joseph N. Bacon, George C. Lord, William Claffin, Francis Murdock, C. C. Walworth, Charles M. Seaver, John K. Stickney, H. L. Hovey, Abraham Avery; general superintendent, Waldo A. Learned. The office of the company is located at No. 421 Centre Street, Newton, and both Watertown and Newton are well supplied with light.

They now consume about 4000 tons of coal, in place of the 400 of the first year, have about sixty miles of pipe, produce about 44,000,000 feet of gas, and are rapidly extending their means of lighting by arc and incandescent electric lights.

Express Business.—T. P. Emerson bought out the express business of F. E. White in 1867, employing at first four men and six horses. He now employs nine men and twenty-six horses.

J. H. Critchett & Sons, do a large express and teaming business.

There are also Allen's Railroad Express, Kenney's Express and Nally's Express. The heavy business of the town requires large freighting and teaming facilities, which are at hand.

Livery Stables.—Horses for driving can be had in almost any number, of Briggs E. Potter, who bought out G. B. Stockwell in 1885, and by purchasing and enlarging his buildings, has increased his number of horses, from eleven of his own with eight boarders, to twenty-three of his own with thirty boarders. Gentlemen are finding that through him a kind of co-operative horse-keeping is both more economical and more convenient than having a stable on their own premises. Telephones make it as easy to order one's horse from Potter's stable, as from his own in his back yard, where its presence is sometimes not desirable.

F. K. Hubbard a few years since bought out Mr. Kelley, and manages his business in a way to win the confidence of the public. An attractive line of carriages tempt people to drive, and his prices are reasonable for the teams furnished. The interests of the community are conserved by this centralization of this industry to a single location.

Machine-Shops.—There are the machine-shops of the

Empire Laundry Machinery Company, machine-shops for their own use and their own repairs in the Walker Pratt Manufacturing Company's works, and in the large paper-mills of the Hollingsworth & Whitney Paper Company, and also within the grounds of the Etna Mills Corporation, where Mr. Mayall's inventive and ingenious mind finds scope in the frequent changes and adaptations required in that factory. So, of course there are machine-shops within the arsenal grounds. The public, however, have recourse to only one machine-shop for general work in this place. This was started in 1886 on Patten Street, near the railroad, by Matthew Pryor. His principal business is the manufacture of small hardware and small novelties, steam fittings, and general jobbing, door-stops, saw sharpeners for carpenters, parts of electric clocks and the like. General repairs of lawn-mowers, sewing-machines, bicycles, in fact, almost anything which an ingenious man or boy can make, will not be turned away. This shop, although small, has quite a variety of machine tools, for it is crowded with machinery which is propelled by a small steam-engine on the premises. Mr. Pryor has gradually increased his business as his ingenuity and good nature have come to be appreciated; his shop is always a good industrial school for boys wishing to learn, and, if your historian is able to judge, is worthy of much larger patronage, a larger shop, with more extensive business.

Ross' Carriage and Wagon Factory.—On Spring Street, near Main Street, is now located the carriage factory of John Ross, which is known for its thorough and substantial work. Heavy express wagons or the lightest pleasure vehicles have been made. Dr. Hosmer's carriage, fitted for protection in bad weather, was made here. So was Dr. Mead's. Mr. Ross does both the iron-work and also the wood-work and the painting and finishing at his shop. He employs four men. Mr. Ross bought out Mr. George Finneley in 1867. Mr. Ross made for the town the hook-and-ladder truck which has seen some service, and promises to do much more. In contrast with this may be mentioned a buggy which he built, that, when complete and ready for use, weighed only thirty-seven pounds.

Boots and Shoes.—*Shoe Manufacture.*—No large manufactories have ever been carried on in town. Little but custom work and repairs have been attempted here. Among those engaged in this business should be mentioned Mr. A. D. Drew, who generally supplies foot-wear for any customer who has the means and the courage to once give him his measure. Although he expects more pay for his boots and shoes at the start, it has been found in the end by some of our shrewdest investors to cost less in the end to be kept whole-footed.

Mr. Drew began in 1849, on the corner of Pleasant and Galen Streets. He was alone for one year, then moved into the upper part of a building that stood where the post-office now is, where he had three men

for three years. Then he occupied a building where Lunt & Co.'s dry-goods store now is. About 1856 he moved into the building on the corner of Galen and Mt. Auburn Streets, where he employed five men. He had also at the same time a small shop in Newton. In 1861 he moved across Galen Street to the opposite corner, where Mr. Sheridan was his apprentice. During the war he moved up-stairs, and employed seven men. Here he did the largest business of his life, too large to be entirely profitable, although it included such jobs as, for instance, thirty-three pairs of cavalry boots at \$30 per pair; and boots for nearly every man in Company K, just before the close of the war. He, himself, enlisted in May, 1865, but did not have occasion to leave Camp White, which was pitched on Main Street, just beyond the West School-house.

Mr. Drew served in the old Fire Department, of which for some years he was chief, and where his name will ever be preserved.

He has done good work enough for the preservation and safety of our homes, for temperance and good order, to say nothing of the stores of good boots and shoes which he has made, to merit an old age of honor and repose.

Painters.—Among the active business men of the past fifty years may be mentioned Henry Russell, painter. He began in Brighton, but became established in this town in 1847. He employed in his business of painting, glazing and papering houses, sometimes as many as thirty men. Many in all the surrounding towns were familiar with his work, which was done according to agreement, with energy and faithfulness. He was chairman of the parish committee of the First Parish for many years, serving with equal energy and faithfulness till his death, in 1889.

John Page has for many years followed with credit the same business which his son George A. Page now follows, occupying the old Barrett building on Beacon Square.

CHAPTER XXXV.

WATERTOWN—(Continued).

SOCIETIES, PHYSICIANS, &c.

AMONG the societies organized in town for work of various kinds, social and benevolent, may be named the following:

FREEMASONRY IN WATERTOWN.¹—The first Masonic body organized in Watertown was Meridian Lodge, chartered Dec. 11, 1797, having a jurisdiction embracing towns between Boston and Concord, and concerning the early history of which little is posi-

tively known. The late Leonard Whitney, sr., of this town, was a member, and related that in the troublous times of Masonry it was customary to vary the place of meetings from town to town, members driving to the appointed place, carrying guns with them to ward off possible danger. Mr. Whitney at that time resided near the Acton Powder-mill. He, with Asa Stone, Asa Pratt, Mr. Dana, and others who were early members of Pequossette Lodge, used to delight in talking over the experiences of the Anti-Masonic period. Meridian Lodge lost its original charter and lodge furnishings by fire, and after several removals became established permanently in Natick, where it has fine lodge-rooms and a large membership, being at the present time one of the leading and best-working lodges of the State.

For many years Watertown had no Masonic lodge prior to the coming of William Webster, as principal of the High School, from Lexington. He had recently taken the degrees in Pettee's Lodge (so-called because its meetings were held in Worshipful Brother Pettee's house), in West Cambridge, and with the assistance of old-time Masons obtained a charter for Pequossette Lodge. He left Watertown several years later, taught school in Rye, New York, and died in that State four or five years ago. He was the first Master of Pequossette Lodge, and the first one of its Past-Masters to die. The original officers and members of Pequossette Lodge were as follows: William Webster, W. M.; Daniel H. Marshall, S. W.; Joseph B. Keyes, J. W.; Henry Derby, Treas.; Warren J. Lindley, Sec.; Henry C. Vose, Chaplain; George Marsh, Marshal; Isaac Watts, S. D.; George K. Hooper, J. D.; Alfred Howes, S. S.; Adolph Lewando, J. S.; Asa Stone, Tyler. Members—Asa Pratt, Daniel Howard, Charles Wilkins, Sewall Hiscock, J. H. Clarke, Robert Murray, David B. Horn, Samuel Richardson, Daniel Marshall, George Hill, William Nichols, Horace Clark, William B. Fowle, Jr., Leonard Whitney and George A. Hicks.

The preliminary meeting was held in Constitution Hall, Dana Block, December 17, 1856. At the next meeting, January 13, 1857, the name was changed to Masonic Hall, and the Grand Lodge dispensation was received and accepted.

The first initiates were George W. Harrington, Luke Perkins and Miles Pratt, February 13, 1857. At the next meeting William W. Russell and John K. Stickney were the first admitted members. The latter is now an honorary member.

May 8, 1857, Robert L. Davis and James W. Magee were given the third degree. Mr. Davis has retained active membership and a lively interest in the lodge ever since, and has contributed more than any other individual member to the success of the lodge.

After working one year under dispensation, in accordance with Masonic custom, Pequossette Lodge was duly constituted, December 23, 1857, with impressive ceremonies, by Grand Master John T. Heard,

and at the close about sixty members and guests were provided with a "bountiful and luxurious" repast, as the records state, at the Spring Hotel, Samuel Batchelder, mine host, being a member of the lodge.

The first death was that of Daniel Marshall, who was buried with Masonic honors, September 3, 1858. The first public installation was held December 29, 1858. October 14, 1864, the lodge attended the laying of the corner-stone of the new Masonic Temple, Boston. December 23, 1864, a public installation was held in the town hall.

The first meeting in the new hall, Noyes' Block, was held September 8, 1870, and the hall was dedicated October 5, 1870, an address being delivered in the town hall by Wor. Bro. John B. Goodrich.

January 9, 1890, the lodge occupied, for the first time, its new and spacious rooms in the Otis building, of which it holds a ten years' lease. These quarters have been dedicated to Freemasonry, and were arranged especially to meet the needs of Pequossette Lodge.

The total membership has exceeded 300. The present membership is about 140. The largest number of members admitted in one year was 24, in 1863. Of the early members, Robert L. Davis is now alone, out of 33 admitted to January, 1858; and of the 151 admitted during the first ten years, less than 30 remain. Among those taking membership or degrees were Rev. Dr. Luther T. Townsend, of Watertown; the late Rev. Bradford K. Peirce, of Newton, editor of *Zion's Herald*; James S. Allison, Jonas Chenery, of Belmont; George K. Snow, Joseph Crafts, George Sleeper, and a large number of the active business men and influential citizens of the town.

List of Past Masters: William Webster, 1858-59; Robert L. Davis, 1860-61, 1870-71; William J. Underwood, 1862; Thomas N. Hooper, 1863-64; Joseph Sanger, Jr., 1865; John B. Goodrich, 1866; William H. Clark, 1867; Charles W. Stone, 1868-69; Charles T. Perkins, 1872; Charles Brigham, 1873-74; Samuel F. Stearns, 1875-76; Robert F. Horne, 1877-78; Charles H. Bradlee, 1879; Benjamin H. Dow, 1880-81; Isaac Harrington, 1882-83; George H. Tarlton, 1884-85; George G. Davidson, 1886; Alberto F. Haynes, 1887-88.

The officers at present are as follows: Herbert H. Sawyer, W. M.; Frederick E. Critchett, S. W.; Benjamin W. Brown, J. W.; Charles W. Stone, Treasurer; George F. Robinson, Secretary; Rev. William H. Savage, Chaplain; Robert L. Davis, Marshal; Charles F. Bustin, S. D.; John M. Johnson, J. D.; James H. Fraser, I. S.; Freeman H. Edgcomb, Tyler. The Treasurer has held the office for twenty years, and the Tyler for twenty-five years.

While Pequossette Lodge has been established only thirty-three years, it is older than any other secret society of this town, although at present there are a dozen or more of these, founded mainly as insurance organizations. The Masonic Lodge has held

a steady, even tenor, and is to-day better situated and enjoying a greater degree of prosperity than ever before. Its record is naturally of an individualized character, representing the social and fraternal phase of men who have left, or are making, their imprint on our growing community. Its regular meeting is held the second Thursday in each month, and there are Saturday evening gatherings of a distinctively social nature in the lodge apartments.

ODD-FELLOWS.¹—*Lafayette Lodge*, No. 31, Independent Order of Odd-Fellows, was instituted and charter granted the 26th of January, 1844. The lodge prospered until 1850, and in 1852 the charter was surrendered. Nothing was done until April 1, 1863, when the charter was returned and the lodge reinstated, since which time it has continually prospered, and has met with considerable success, the membership now being 133. There have been and are now enrolled upon the books the names of men who have been prominent and closely connected with Watertown. It has initiated over 400 men into its ranks, and has the honor of being the mother of three lodges. Of its work little can be said, as the order of Odd-Fellows is a secret organization. But suffice it to say that in all its history there has never been a brother injured or harmed by it, but, on the contrary, many have been benefited by it, and that must mean that it has helped to make better men, better citizens and a better town. Upon the roll-books are the names of Thomas L. French, just deceased, and William H. Ingraham, who have the honor of being members for over forty years, a record which all Odd-Fellows feel proud of. The objects of the order are clearly defined and embodied in these few words, viz.: To visit the sick, to relieve the distressed, to bury the dead and to educate the orphan. This, so far as he can, every Odd-Fellow tries to perform. Officers for 1890: H. H. Powell, N. G.; J. W. Newcomb, Per. Sec.

THE YOUNG MEN'S CHRISTIAN ASSOCIATION.²—The Young Men's Christian Association of Watertown was organized in March, 1887, having for its object the promotion of the spiritual, social, intellectual and physical welfare of young men.

Rooms were secured in W. H. Lyman's new block, then in process of erection, and a lease taken for three years.

The rooms were opened, in a fitting manner, on September 3d, of the same year, with a consecration service in the morning, after which they were open to inspection of the public. At 12 M. an address was delivered in the Town Hall by Rev. L. W. Munhall, D.D., and a reception to the public in the evening, when refreshments were served to 800 people.

Mr. George S. Turner was elected the first president of the association, and served three years. Fred. G. Barker was elected in 1890. The president has been

¹ By Charles H. Rollins.

² By James E. Norcross.

ably supported by an earnest corps of young men, and the Association has prospered, and been the means, by the blessing of God, of doing much good for the young men of the town.

Mr. H. L. Peabody, of Haverhill, Mass., was the first general secretary, and since January 20, 1890, Mr. J. E. Norcross, of Watertown, has been the general secretary. The Executive Committee, alive to the needs of the young men, rented new quarters in the Otis Block and moved into them July 1, 1890.

The unceasing demands of the Association were thus met for a time and great encouragement given to prosecute the work.

The four rooms thus secured are a reading-room, where may be found a choice collection of reading matter, open to young men from 9.30 A.M. to 9.30 P.M.; a lecture room, with an office for the General Secretary, in which are held the various services of the Association, also lectures and practical talks; a small room to be used as a study and library; and a room to be devoted to boys' work.

The Association has a flourishing Ladies' Auxiliary connected with it, under the leadership of its president, Mrs. Alfred Turner; also an orchestra, which contributes a great deal to the attractiveness of the Association's services and socials.

The finances have been ably managed, and the close of each year has found a balance in the hands of the treasurer.

The membership of the Association is, October, 1890, 250; and the officers at present are as follows: President, Fred. G. Barker; Vice-Presidents, F. G. Barker, H. S. Wood, T. G. Banks; Rec. Secretary, B. M. Shaw; Cor. Secretary, W. L. Rockwell; Treasurer, S. Henry Coombs; Gen'l Secretary, Jas. E. Norcross.

"THE SOCIETY FOR THE RELIEF OF THE SICK" was organized in the year 1816, during the pastorate of the Rev. Richard Roswell Eliot, when all the towns-people worshipped in one meeting-house. A severe epidemic had visited the town, after which it was thought wise to have articles on hand for loaning in cases of sickness and also to have a fund which could be drawn upon in cases of need. For those days this was a new departure, and deserves the merit of originality. The following was its first appeal: "Donations in money, old garments, bedding, articles suitable to be made up for children, nourishment for the sick, and fuel, will be gratefully received by the directors and appropriated according to their best judgment." Its officers for the years 1816-1817 were: Mrs. Eliakim Morse, president; Miss Caroline Howard, vice-president; Miss Martha Robbins, secretary; Mrs. N. Bemis, jr., treasurer.

Its directors were: Mrs. R. R. Eliot, Mrs. Luke Bemis, Mrs. Isaac Dana, Mrs. Stearns, Mrs. A. Blake, Mrs. Jonathan Stone, jr., Mrs. Robbins, Mrs. Abijah White, Mrs. Gay, Mrs. Bigelow, Miss Katherine Hunt, Miss H. L. Coolidge.

One hundred and six of the principal ladies in town became members of the society, each paying the annual fee of one dollar.

During the years that have passed since, many have made substantial gifts to the society, and some of the older inhabitants at their deaths have left small legacies to be added to its funds. Among these gifts we may mention that of Lydia Maria Child, which is a pleasant reminder of her tender memory for the people among whom she passed a portion of her earlier life with her brother, Dr. Francis.

Thus this society has grown steadily, down to the present time, doing its work quietly, but efficiently. It assists all deserving poor, irrespective of creed or race, and loans its articles of use for the sick to any who wish them.

Its meetings are monthly, in the afternoon, at the houses of its members. Donations of any amount are always welcomed and will be well applied.

Its present officers are: Ruth A. Bradford, president; Emily Robbins, vice-president; Margaret V. Kendall, secretary; Abby V. Barry, treasurer.

THE WOMEN'S CHRISTIAN TEMPERANCE UNION OF WATERTOWN was the result of prayer and an earnest awakening on the part of Christian women to the sin of the drink habit, and its terrible effects upon the individual and the home.

This Union was organized in 1875, very soon after the organization of the National Union.

The first general officers were Mrs. D. A. Tainter, Mrs. Abbott, wife of Rev. Granville Abbott, who was then pastor of the Baptist Church, Mrs. Joseph Barker, and Mrs. John Hall.

The first year's membership was ninety-nine. The first work was to help the Reform Club, visit the saloon-keepers, and assist the family of the inebriate.

Very soon it was found that preventive work must be done, and efforts were directed towards the formation of a better public sentiment in regard to the social and medicinal use of alcoholic liquors, and concerning the traffic which makes the inebriate.

With this end in view the Union has given great prominence to the distribution of literature showing the effects of alcoholic poisons upon the system, the extent of the drink traffic, and the iniquitous power of the saloon. Many petitions have been circulated, and able speakers have been secured from time to time to present various phases of the Temperance question.

The Union is gratified in having been an instrument in removing wine from the Communion Table of the Methodist, the Congregational and the Baptist Churches; in obtaining hundreds of signatures to the pledge, and the introduction of Scientific Temperance Instruction in the Public Schools. By persistent effort of the Union, Watertown was one of the first six towns of the State to place in the hands of the pupils of the Public Schools text-books giving such instruction.

Among other departments of their work which have received attention from the Union, are Sabbath Observance, Evangelistic work, Police Station and the Almshouse Franchise and Flower Missions.

The present membership is seventy-seven, with fourteen honorary male members.

List of officers: President, Mrs. S. Elizabeth Chase; Vice-Presidents, Mrs. Armina S. Hall, Mrs. Persis H. Tainter, Mrs. Sarah J. Stone, Mrs. Lizzie G. Dimick, Mrs. Helen Greene, Mrs. Mary F. Rand, Mrs. Florence Dutton, Mrs. Sarah H. Berry, Mrs. Eliza M. Teele, Mrs. Alice A. C. Phipps; Recording Secretary, Mrs. Frances D. Niles; Corresponding Secretary, Mrs. Sarah H. Carter; Treasurer, Mrs. Angeline C. Crawford.

THE YOUNG MEN'S ASSEMBLY.—Several gentlemen called an informal meeting in May, 1888, in the hall of the Grand Army, to consider the formation of a society which should have for its object the business and social upbuilding of the town. The invitations to this meeting were given by L. S. Cleveland and Chester Sprague, seconded by the young men who belonged to a Bible class in the Methodist Episcopal Sunday-school, and others to whom they made known their object. The first suggestions of such an organization were perhaps made to this class, known as the Young Men's Assembly of the Methodist Episcopal Church, of which Mr. Cleveland was president. Each member of the class heartily endorsed the proposed plan of enlarged action and agreed to support it earnestly. The plan had also been discussed with others and approved by Samuel S. Gleason, Benj. H. Dow, Chester Sprague, George E. Priest, and Rev. W. G. Richardson, who kindly lent their aid and influence.

By the personal efforts of these and others spoken to, the informal meeting in May proved to be a success, and the organization since known as the Young Men's Assembly was formed with a membership, the first evening, of forty. The first regular meeting was held in June, with a membership limited to sixty. This limit has been raised at successive periods till now it stands at one hundred and seventy-five, with a list of names waiting to be added when there are vacancies. Included in the scope and work of this assembly is the creation of a Board of Trade, now consisting of George E. Priest, Samuel S. Gleason, Ward M. Otis, George C. Lunt and Chester Sprague. This organization has been recognized by the business associations of the State and delegates chosen to represent the same in the State Convention of the Boards of Trade.

This assembly has awakened interest in other towns, for, after visiting this, gentlemen of other towns have formed similar organizations. It was originally proposed to encourage the introduction of matters of business in which any were interested, which seemed important to themselves or to others, or to make suggestions that might prove of value to others, especially to the town. It adopted

an idea embodied in the Chase Banquet Association, which had proved eminently successful—"the betterment of its members," from a business standpoint as well as an educational one. Its object is social and business improvement. Its meetings have been held one evening of each month; they begin with a simple banquet, and an hour spent in social converse, followed by addresses by members or invited guests. So far the spirit most actively developed has been to encourage all kinds of mutual helpfulness both in personal and municipal affairs. It may be too soon to say that the spirit of self-seeking and mutual fault-finding has disappeared from the town, and a habit of self-denying helpfulness of others has taken its place; but your historian should simply acknowledge that this is true of the leader of this assembly, L. S. Cleveland, now re-elected its president for the third year, by a unanimous and most persistent vote.

The officers for 1890-91 are the same as from the first: L. S. Cleveland, president; S. S. Gleason and Chester Sprague, vice-presidents; F. W. Cobb, secretary and treasurer.

MISCELLANEOUS SOCIETIES.—Among the other societies organized in town are the following:

Young Men's Catholic Association, organized in 1889.—Michael J. Green, president; James J. McCafferty, secretary.

Isaac B. Patten Post, 81, *Grand Army of the Republic*.—J. R. Harrison, commander; George F. Robinson, adjutant.

Isaac B. Patten Women's Relief Corps, 59.—Mrs. A. M. Condon, president; Miss Edith M. Smith, secretary.

Arthur B. Fuller Camp, 102, *Sons of Veterans*.—Established in 1889. A. F. Nutting, captain; G. Westley Priest, first sergeant.

Abraham Lincoln Commandery, 67, *United Order of the Golden Cross*.—Instituted in 1879. J. H. L. Coon, N. C.; A. J. Coolidge, K. of R.

Charles River Court, Mass., *Catholic Order of Foresters*, 1883.—James J. Barnes, C. R.; John Hurlihay, secretary.

Local Branch, 393, *Order Iron Hall*, 1886.—E. F. Pratt, C. J.; George S. Parker, accountant.

Franklin Association, 19, *Northern Mutual Relief Association*.—Freeman H. Edgecomb, president; W. H. Pevear, secretary.

Watertown Lodge, 70, *Ancient Order United Workmen*, 1889.—Thomas Perkins, master workman; Appleton Phipps, recorder.

British America Association, 65, 1889.—J. H. Looker, president; G. S. Thomson, secretary.

Watertown Mutual Relief Association, 1880.—M. M. Walsh, president; M. P. Hynes, secretary.

Watertown Non-Partisan Woman's Suffrage League, 1887.—Dr. S. Adelaide Hall, president; Mrs. Alice A. C. Phipps, secretary and treasurer.

Unitarian Club.—Organized in 1888. Julian A. Mead, president; J. C. Brimbleton, secretary.

Wednesday Club.—Started in 1885 by Arthur M. Knapp, its first president. Wm. Cushing, president; Ellen M. Crafts, secretary.

Historical Society of Watertown, established in 1888. Alfred Hosmer, M.D., president; Rev. E. A. Rand, vice-president; Solon F. Whitney, secretary and treasurer. It has at present fifty-two members.

Charles River Council, 36, A. L. of H., 1879.—Com., Henry Stephens; Secretary, Wm. J. Quincy.

Board of Trade, 1889.—S. S. Gleason, George C. Lunt, W. M. Otis, George E. Priest, Chester Sprague.

Ladies' Benevolent Association, connected with the First Parish. Miss Emily Robbins, president; Mrs. J. F. Green, secretary.

St. Luke's Home for Children.—Arlington and Mt. Auburn Streets. Sisters Annie and Mary in charge.

Town Improvement Society, 1883.—Ward M. Otis, president; Wm. H. Ingraham, clerk.

SOURCES OF INFORMATION CONCERNING THE OLD TOWN OF WATERTOWN, MASS.—I have endeavored to collect into the following list the more important sources of information which could be profitably examined by the Historical Society of Watertown, in its study into the history of that ancient township. As a matter of convenience they have been grouped somewhat chronologically, and after the dates of separation, under the headings of Watertown, Waltham and Weston.

The six 4to vols. of *The Records of the Governor and Company of the Massachusetts Bay in New England*, from 1628-86, published by the State in 1853-54, contain much material of the greatest importance. The Massachusetts State Archives on file in the office of the Secretary of State at the State House, contain a mass of original papers, the most of which have never been printed. Here in vol. V, p. 32 of Maps and Plans, is the oldest² known map of the town. This bears the date of 1720, when the town still included Waltham. It shows the location of all the houses of that time, and gives the names of the occupants of some of them. A commission made an extended report in print to the State in 1885, upon the nature and present condition of these archives.

The original records of John Hull, treasurer of the Colony, 1675-80, are in the possession of the New England Historic Genealogical Society. Watertown town records, the earliest extant, begin on page 2 of the record-book, with the date of 1634. From Nov. 28, 1643, to Nov. 9, 1647, the transactions of the town are lost. A faithful transcript of the earlier records of the town were made by Mr. Joseph Crafts. A copy of the records down to 1651, was printed in the *Water-*

town Pequossette, beginning with the number for July 18, 1879.

The town's earliest extant record-book of births, marriages and deaths appears from its title page to have been opened in 1648, although it has had transcribed into it some records of an earlier date. These latter are also upon the Suffolk County Records and have been printed in the sixth and seventh volumes of the New England Historical and Genealogical Register. In preparing his *History of Watertown*, Dr. Bond had faithful copies of all these earlier town records taken, which since his death have been deposited with the New England Historic Genealogical Society in Boston. The Society also have his own personal copy of his history, with his collection of errata and addenda thereto, which would make another volume nearly half as large as the published history.

The records of the Watertown church, organized July 28, 1630, and next to that of Salem, the oldest in the Colony of Massachusetts Bay, are not at present known to be extant prior to those of 1686-92, which were kept by the Rev. John Bailey.

The files of the Suffolk and Middlesex Court, as well as those of Probate and Registry of Deeds, contain a mass of depositions often containing matter of great historical interest. The original volumes of Records of U. S. District Tax of 1798, which are in the library of the N. E. Historical Society, give all taxable polls.

Rev. C. Mather's *Magnalia*, published in 1702, contains many biographies and notes of interest to Watertown, as also Governor John Winthrop's *Journal*, or *History of New England*, 1630-49.

PHYSICIANS.—The information respecting the physicians of Watertown in early times, during the first hundred years, is very scanty, and their number very few. We have not discovered that any of the pastors of Watertown practiced the healing art, which was not unusual in early times. James Sherman, of Sudbury, son of Rev. John Sherman, of Watertown, was a pastor and a physician, and two of his sons, John and Thomas, were physicians, and were said to be some time of Watertown; but in 1708 they resided in Springfield.

The earliest notice of any medical practice was March, 1630-31, when "Nicholas Knapp was (by the court) fined £5 for taking upon him to cure the scurvy by a water of no value, which he sold at a very dear rate." Probably his only medical education had been, like that of his numerous followers, to study the credulity of human nature, and how he might most successfully dupe it. *Mr. Simon Eire*, "chirurgeon," was the first physician of Watertown, where he resided about ten years, 1635 to 1645, when he moved to Boston. As there is no evidence that there was any other physician resident of Watertown for many years afterwards, it is not improbable that he sometimes visited it professionally, as he retained his estate there. But if there were no physicians, their place was supplied by some of the goodwives. Grace, wife of John Livermore, was an obstetrician, and she was sometimes summoned to court as a witness in cases where she had acted professionally.

Daniel Mason, youngest son of Capt. Hugh Mason, graduated at Harvard College in 1666, was a physician, living as late as 1679, but it is not known whether he ever practiced medicine in Watertown. He was captured by an Algerine, and is supposed to have died in Algiers. (Bond's MS. notes to his own history.)

In the County Court files is a petition of the selectmen of Watertown, dated 1690, in which they say that S. G. came from Cambridge to Watertown, "to the home of Ellis Barron whose wife had skill in matters of surgery."

The next physician after Dr. Eire was *Dr. Philip Shattuck*, who probably practiced there from about 1670 to 1722. He resided in the northeast part of Waltham.

Dr. Pullgrave Wellington was his contemporary, being only five years younger than Dr. Shattuck. He

resided on the Cambridge road, on or near the lots of G. Church and W. Woolcot. He died 1715.

Dr. Richard Hooper was a contemporary of Drs. Shattuck and Wellington, and resided at the east of Mt. Auburn. He died early in 1699. His son *Henry* was a physician of Watertown a few years, and about 1723 he moved to Newport, Rhode Island.

Dr. Josiah Convers, from Woburn, settled in Watertown probably about the time of the decease of Dr. Shattuck and the removal of D. H. Hooper. We have not ascertained where he resided, but perhaps it was the residence afterwards occupied by his nephew, pupil, legatee and executor, Dr. Marshall Spring. He died in 1774, after a residence probably of nearly fifty years. (Bond, page 1074.)

The following is the epitaph on the stone resting horizontally upon pillars, over Dr. Convers' grave in the village burying-ground:

To the much honored and respected memory of
JOSIAH CONVERS, Esq.,

who, by divine permission, resigned his valuable life August, 1774, aged 73."

"If real medical abilities, united with every human and social virtue, the most active extensive generosity, universal benevolence and charity, may deserve to outline the Panegyric of a mouldering stone, the envy of the grave, and the devouring tooth of time, certainly the Virtues and mercies which distinguish the character of Dr. Convers are unquestionably entitled to such a peculiar tribute from the grateful Public."

"This honest stone, what few vain marbles can,
May truly say, here lies an honest man."

Dr. Marshall Spring was born in Watertown, Feb. 19, 1741-2, graduated at Harvard College in 1762, and died Jan. 11, 1818, aged seventy-six years. He received great assistance from his maternal uncle, Dr. Josiah Convers, with whom he studied medicine, and whose property he afterwards inherited. Francis says, "Dr. Spring became one of the most distinguished physicians in the country; and perhaps no one can be mentioned in whose judgment and skill a more unreserved confidence was placed. His practice was very extensive, and his house was the resort of great numbers of patients from the neighboring and from distant towns."

Says Thatcher, "His mind was not filled by fashionable theories of the day any further than he accorded with his own views of practice. His natural sagacity or force of judgment led him to deep and critical observations into the causes and nature of diseases, and their remedies. He asked few questions, used his eyes rather than his ears, seemed to gain knowledge of each particular case by intuition. He often effected cures by directing changes of habit, of diet, of regimen. He used little medicine, always giving nature fair play. Though differing from his neighbors politically, being a decided Tory at the time of the Revolution, he was early on the ground at Lexington, skillfully attending the wounded. It was said that he would have been sent out of the country, had not his services been so valuable, so indispensable to his patients.

In 1789 he was a member of the State Convention which adopted the Constitution of the United States, which he opposed, never having believed in the capacity of the people for self-government. He was for several years a member of the Executive Council of Massachusetts, and discharged his duties with talent and fidelity.

Dr. Spring was in his person rather short, but compact and well proportioned; always a fine-looking man; after the age of fifty, till the time of his death, he was spoken of as one of the handsomest men of his time. His habits of living were a model for others. He used food and drink for nourishment, not for gratification of appetite. His meals were frugal, his board, though hospitable, was never spread with luxuries. He was careful in his investments. It is said that he once remarked that real property had always something to show for one's money, while other property might vanish. He built the Spring Hotel for his friend, Col. Richardson, a famous hotel-keeper, whom he wished to retain in town. He left \$200,000 or \$300,000 to his son, but nothing to religious or charitable institutions.

He was a wit, keen and quick at repartee. Chief Justice Parsons delighted to measure weapons with him in the keen encounter of wit. The onsets of the chief justice were rapid, keen and overwhelming. The replies of the doctor were moderate, pungent, successful. Their meetings sometimes happened in the presence of a large company, who remained silent, delighted to see the giants play."

Walter Hunnewell, M.D., the subject of this sketch, was probably descended from Roger Hunnewell, who came to New England not long after the settlement of the Massachusetts Colony. In the early records the name was spelled at various times Hunniwell, Hunnuel, Honywell and Hunnewell. Dr. Hunnewell was born in Cambridge, August 10, 1769, and received his early education in the public schools of that town. Though only six years of age when the Revolutionary War began, he was old enough before its close to receive impressions which enabled him to remember some of its more important events. He graduated at Harvard in 1787, in the class with John Quincy Adams, William Cranch, Thaddeus Mason Harris, James Lloyd and Samuel Putnam. He studied medicine with Dr. Marshall Spring, of Waltham, and settled in Watertown. The medical school of Harvard College had, at that time, scarcely entered on its career and the offices of leading physicians were the schools of instruction for young men preparing for the practice of medicine. The first graduate from the Harvard Medical School was in 1788, and in that and the three succeeding years the graduating class had but one member, and not until 1813 did it contain more than four members. The life of Dr. Hunnewell was for the most part the usual one of medical men of his day. The town in which he settled was small and his practice was scattered, covering a terri-

Walter Hamnwell

tory which included some of the neighboring towns and involving almost incessant rides by day and night and unremitting labor. Like other medical men, too, of his time, his practice included both medical and surgical cases, and involved the treatment of cases of much wider range than are found under the care of a single man to-day since the divorce of surgery from medicine and the division of general practice into specialties. The consequence was that physicians of the period referred to had a more complete medical education than is to be found, especially in the cities and their neighborhood, in our day, and thus Dr. Hunnewell became a thoroughly educated, widely informed and skillful man. In another respect, too, the physician's career of his time differed from that of to-day. Not only were medical fees of smaller proportions if paid in money, but many of them in the country towns were satisfied by country pay, eggs and butter and chickens from the farmer, tea and coffee from the grocer, and preaching from the minister.

The practice of Dr. Hunnewell furnished no exception to the general rule and his cellar and larder were largely supplied by means of no other circulating medium than medicine, the tooth-puller and pills. Upon such a practice, however, he thrived, and in such a practice he continued actively at work until he was eighty years of age. He was for many years the only physician in Watertown, and as his reputation widened he became a frequent visitor to the sickbeds of Newton and Cambridge and Waltham. He was a devotee to his profession, permitting himself to take no active part in the public affairs of either town or State. As a Whig in politics he rejoiced in the success of his party; as a Unitarian in theology he was interested in the welfare of his church; as a Mason he shared the duties as well as the labors of his order. He was a man of unswerving integrity, of commendable liberality, of cultivated tastes, a kind neighbor, a good friend, a thoroughly respected citizen.

Dr. Hunnewell married, May 12, 1800, Susannah Cook, of Newton, and his children were Jane, born June 23, 1801, who married John A. Underwood, and Horatio Hollis, born July 27, 1810. The last-named child, Horatio Hollis Hunnewell, as a merchant has had an eminently successful career. At the age of fifteen he entered the banking-house of Welles & Co., in Paris, France, and there remained until 1839, when he was twenty-nine years of age. Samuel Welles, the head of the firm of Welles & Co., was born in Natick, Massachusetts, April 22, 1778, and graduated at Harvard in 1796. He married, in London, in 1816, Adeline, daughter of John Fowle, of Watertown, Mass., and died in Paris in August, 1841. Arnold Welles, uncle of Samuel, was born in Boston, December 25, 1727, and had a son, John, born in September, 1764, who married, in 1794, Abigail Welles, sister of Samuel. The ninth child of John

Welles, named Isabella Pratt, born September 7, 1812, married, in Paris, December 24, 1835, Horatio Hollis Hunnewell, mentioned above. Mrs. Hunnewell inherited the Welles estate, in that part of Natick which is now Wellesley, and Mr. Hunnewell has made large additions by purchase until it now includes about six hundred acres. This estate, occupied during the summer by Mr. Hunnewell and also in separate houses by his married children, lies on both sides of the road leading from the Wellesley Station to Natick. That part of it occupied by Mr. Hunnewell himself lies on the borders of Wellesley Pond, on the other side of which are the grounds of Wellesley College. The mansion built by him stands out of sight from the road, and is reached by an avenue winding through spacious lawns and shaded by ornamental and forest trees, which reminds the visitor of the approaches to some of the best estates in England. Mr. Hunnewell inherits from his father a taste for horticulture, which his abundant means enable him to gratify, and as he walks through his almost endless green-houses he points out his rare varieties of fruit and flowers with undisguised enthusiasm and fondles them with the tenderness of a parent in his children's nursery. Dr. Hunnewell, of whom this sketch is written, died in Watertown, October 19, 1855, at the age of eighty-six.

Dr. Hiram Hosmer was born in Walpole, N. H., September 4, 1798. He was one of twelve children of Jonas Hosmer (1758-1840), a farmer; Jonas was the son of Jonathan, born in 1712, who had a brother who was a noted surveyor, and was the son of Stephen, who was the son of Stephen (1642), who was the son of James (1607-85), who came from Hawkhurst, in Kent, England, about twelve miles from Dover. James was in Concord, Mass., in 1635, took the oath of freeman in Boston, May 17, 1637, and settled on the right bank of the river north of Darby's bridge, on farm lately occupied by Elijah Hosmer. James, the son of this first James, was killed in the Sudbury fight in 1676.

As a boy he worked on his father's farm, occasionally for neighbors, at a compensation which seemed to him in better days, ridiculously meagre. He learned the trade of cabinet-maker, which he afterwards abandoned for medicine. His education was at first at a district school, one term at an academy, and afterwards with the celebrated Dr. Amos Twitchell, of Keene, N. H. He afterwards spent some months under the tuition of Drs. Hale and Watkins, in Troy, N. Y. He attended lectures in Boston and received his degree from Harvard University in 1824. It was in this very year (1824) that he established himself in Watertown, where he remained until his death, April 15, 1862, which was from abdominal disease. Many living remember the kind face of the old doctor, and say that the portrait recently presented to the Public Library of Watertown, by his nephew, Dr. Hiram Hosmer, is a faithful and life-like picture. Most have an incorrect idea of the cause of his death, for many

years before, "during a convalescence from typhoid fever, he had an incomplete hemiplegia of the right side. In April, 1856, he had a light attack which slightly benumbed the right arm. In February, 1860, he had a cerebral hemorrhage, which two of the most eminent of the profession thought must speedily prove fatal. Contrary to all reasonable expectation, he rallied, instead of sinking, and early in the summer was able to walk and ride out; and two years and two months afterward he died of abdominal disease."

He had a successful career; a large experience, great professional tact, a ready and correct judgment, an appreciation of "Nature in Disease," and a perfect comprehension of, and devotion to the highest interests of medicine, in the best sense of the term.

One writes of him: "He was esteemed wherever he was known. He was not a great book-man, but was a diligent student of nature, and ever studied carefully the diagnosis of his patients, as well as the mode of treatment. He was judicious in the treatment of the sick, not afraid of powerful medicines when such were really needed, but more commonly employed mild remedies."

Dr. Hosmer was married, September 6, 1827, to Sarah Watson Grant, of Walpole, N. H., who died in 1836. Of four children, the youngest only survives all her family, and is now the distinguished sculptress, Harriet Hosmer. She was born October 9, 1830; being naturally of a delicate constitution, her treatment and early education well illustrates the good sense and wisdom of her father, and should be mentioned here. He encouraged her to pursue a course of physical training unusual to her sex. If half the stories current among the people are true, she must have astonished the older people by her daring riding, sometimes standing on her dashing horse as he tore through the street. At an early age she began modeling in clay. Having completed her school education, she took a regular course in anatomical instruction at the Medical College of St. Louis. In the summer of 1851 she returned home, and commenced her bust of "Hesper," which, on its completion in marble in 1852, attracted much attention in Boston; and her father placed her under the instruction of Gibson, the sculptor, in Rome. From here we have her busts of "Daphne," "Medusa," and the statue of "Enone." One of her best works is "Beatrice Cenci," which was made for the St. Louis Public Library. One of her most popular works, which has been copied many times, is "Puck," a charming statue.

She was established for many years as a professional sculptor in Rome, reaping a substantial reward in a large income. In 1859 she finished a statue of "Zenobia in Chains," a work on which she labored so zealously for two years as to impair her health. A statue of Thomas H. Benton, now in St. Louis, which is cast in bronze; "The Sleeping Faun," for the entrance of an art gallery at Ashbridge Hall, England; a full-length reclining figure of a young girl for a

funeral monument in the Church of St. Andrea della Fratti in Rome, and a design for a "Lincoln Monument" in Washington, D. C., are among her works. It is hoped that in her return to Rome, to renew her art work, she has already restored, by her father's wise art, the health which will enable her to still further vindicate the right of woman to strength and usefulness and a most honorable career.

Dr. Samuel Richardson, descended in the sixth generation from Samuel Richardson, who was born in England in 1610, emigrated to America in 1636, and also was one of the founders of Woburn.

The doctor was the only son of Captain Ebenezer and Rhoda (Coolidge) Richardson; born at Newton, Mass., Jan. 13, 1795; married, 1820, to Mary Kidder, daughter of Isaac and Mary Kidder, of Townsend, Mass. He studied medicine with Dr. Moses Kidder, of Dublin, N. H., and Dr. Stephen H. Spaulding, of the same place; afterward with Dr. Amos Mitchell. Dr. Richardson practiced medicine at Peterborough, N. H., until 1833, when he removed to Watertown, Mass. His wife, Mary, died in 1861. In June, 1873, he married Sarah Barnard, of Watertown, who still survives him. Dr. Richardson died here, Feb. 12, 1879, leaving a son, Dr. Coolidge Richardson, of Ware, Mass., and a grandson in this town, Mr. Charles B. Gardner, a gentleman of generous culture, who died the last part of July, 1890, leaving an only son, Roy Richardson Gardner, who having passed his examinations for Harvard College, is to spend a year in European travel, partly for his health.

Alfred Hosmer, M.D., born at Newton Upper Falls September 11, 1832, has the same name as his father, who was also a graduate of the Harvard Medical School, and a member of the Massachusetts Medical Society. His grandfather, Jonas, born in Acton, Mass., in October, 1758, had a brother Abner killed in Concord, in the memorable fight at the bridge, April 19, 1775, while resisting, with other members of Captain Isaac Davis' company, of Acton, the advance of the British regulars. This grandfather married, in December, 1778, Betsy Willard, by whom he had twelve children, and, like many thrifty countrymen of that time, drove, as he had opportunity, a trade, while the rest of his time was spent as a farmer. This trade was that of a mason. His great-great-grandfather, James Hosmer, at the age of twenty-eight, with a wife and two children, left his native Hawkhurst, in Kent, England, for America in 1635, and settled in Concord, Mass., on fields still tilled by descendants of the same name, after these two hundred and fifty years.

His father, Alfred Hosmer, a tenth child, and born at Walpole, N. H., in Nov., 1802, learned the trade of a shoemaker, but with great hope and perseverance entered upon the study of medicine, and at the age of twenty-three was admitted as a student to the office of Dr. Amos Twitchell, of Keene, N. H. He

Saml. Richardson

H. K. Smith.

attended the usual course of lectures in the Medical School of Harvard University, and received the degree of M.D. in 1828. Enfeebled by acute rheumatism in early youth, resulting in a serious organic affection of the heart, he died in 1837, at the early age of thirty-five, leaving his three young children to the care of a courageous, energetic, and judicious mother, whom, as Mary Ann Grahme he had married in December, 1831. Her father, who belonged to an old Scotch family, had come to New York when quite a young man, and there had established himself as a merchant.

Alfred Hosmer, the son, having attended the public schools of Newton until his ninth year, when his mother found it expedient to remove to Walpole, N. H., where he found meagre opportunities for acquiring the thorough preliminary training which is necessary for the liberal education which he desired, was, nevertheless, admitted, without conditions, to Harvard College, and graduated with honor in 1853.

Having early selected, for the work of his life, medicine, which his father pursued, he tenaciously held to his early choice, and, soon after graduating, was admitted to the office of his uncle, Dr. Hiram Hosmer, of Watertown, well known in all this region as a most skilful practitioner, and during the following two winters attended lectures at the Harvard Medical School, the third year being spent as house-officer in the surgical department of the Massachusetts General Hospital. In 1856 he received the degree of M.D. from his *Alma Mater*, and spent a large portion of the following year in professional studies in Paris.

It was the autumn of 1857 when he located in Watertown, from which time he has devoted himself industriously to general practice with a success that proves ability and has secured his reputation of being among the best practitioners of the State. In June, 1860, he married Helen Augusta, the youngest daughter of the late Josiah Stickney, and has two children, a daughter and a son.

Dr. Hosmer became a Fellow of the Massachusetts Society in 1856; has repeatedly been a member of its council; was its anniversary chairman in 1877, and in 1882 its president, one of the youngest who have been elected to this high office. He was made president of the Obstetrical Society of Boston, for two years; was president of the Middlesex South District Medical Society; was medical examiner for the Seventh District of Middlesex County. He took an active part in organizing the Massachusetts Medico-Legal Society, was its first president, holding the office three years; was for many years post surgeon at the United States Arsenal at Watertown.

In 1879 he was made Fellow of the American Academy of Arts and Sciences; and in 1881 he was made a member of the State Board of Health, Lunacy and Charity, and became chairman of the Health Committee.

He has contributed to the pages of the *Boston Medical and Surgical Journal*, papers of which the titles, in part, are "Diagnostic Importance of Examinations of the Urine;" "The Abuse of the Alimentary Canal;" "Life and Disease;" "Increase of Danger incident to the Puerperal State;" "A Case of Vaginal Lithotomy;" "Wounds of the Knee-Joint;" "Introductory Address before the Massachusetts Medico-Legal Society;" "In what Cases shall the Medical Examiner decline to view a Dead Body?" "A Peculiar Condition of the Cervix Uteri which is found in Certain Cases of Dystocia."

But not alone in professional labors has Dr. Hosmer won distinction. In the best work for the education, religious culture and moral up-building of the people by whom he has been surrounded, and for placing men on their own feet financially, by moderating their spending, and stimulating their saving and wisely investing the surplus of health and prosperity for the days of sickness or adversity, he has been always active and will be long remembered. Dr. Hosmer was a member of the School Committee from 1865 to 1871, of which he was chairman during 1866, '67, '68 to April, 1869.

He was a member of the Board of Trustees of the Free Public Library from 1868 to 1878, was secretary from 1868 to 1870, and chairman 1871, 1873 to 1877. He was elected one of the trustees of the Watertown Savings Bank, April 11, 1876; was president from 1874 to 1890; was instrumental in framing the code of by-laws adopted in 1885.

He was one of the originators of the Historical Society of Watertown, and did much to make the formation of the society possible, by arousing an interest in local history, and has been its first and only president.

In the First Parish, familiarly known as the Unitarian Society, he has for many years been moderator of its annual meetings, has always kept up an interest in its doings, has contributed liberally to its support, was greatly interested in the erection of the Unitarian Building for Sunday-school, for society and social uses, for which he solicited and obtained considerable contributions, and to the erection and planning of which he gave most thorough and constant attention.

Dr. David T. Huckins was born the 24th of Feb., 1819, at Meredith, N. H. He did not pass through the regular undergraduate course at college, but is a graduate of the Medical Department of Dartmouth, at Hanover, N. H. He has practiced to some extent as a regular physician, but has been better known for the many years of his residence in this town as a dentist. He has filled several important public offices. He was a member of the School Committee of the town in 1850, 1851 and in 1852—the year when it was decided to abolish the old district school system and establish a High School,—1853, 1855, 1856, 1857, 1865, 1866, 1867 and 1868. He was a member of the

first Board of Trustees of Public Library in 1868, and its treasurer.

He is known in scientific circles for his large and fine collection of shells.

Dr. Luther B. Morse was born in Rochester, Vt., in 1820, August 4th. He taught public school for six years in his native State, prepared for college at seminaries in Castleton, Brandon and Montpelier, Vt. On account of poor health in early manhood, did not pursue a college course, but attended medical lectures at Dartmouth College, at the Vermont Medical College at Woodstock, and at the New York University. He graduated in his native State at Vermont Medical College in 1845, and established himself in his profession at Lowell, Mass. During his residence here he was city physician for two or three years, a director of the City Public Library, a member of the School Committee, and represented the city in the Legislature in the years 1853 and 1854.

He came to Watertown in 1862 and has had extensive practice during his residence in town. He was a member of the School Committee in 1864-67 and in 1878, was town physician for a number of years, and a member of the Board of Health for one year. In 1863, after the second disaster at Bull Run, he, with thirty-three other Massachusetts surgeons and physicians, responded within thirty-six hours and reported themselves ready for duty at Washington for that special service.

While in Lowell and in Watertown he has been an active member of the Orthodox Church, holding the office of deacon for thirty-eight years.

Dr. Julian A. Mead was born in West Acton, Mass., in 1856; was fitted for college at Phillips Academy, Exeter, N. H.; graduated at Harvard College in 1878, and from Harvard Medical School in 1881, and spent two years in Europe at the Universities of Leipsic, Vienna and Paris in fitting himself for his profession.

He came to Watertown in November, 1883, to assist Dr. Alfred Hosmer, whose practice in this and the neighboring towns had become too extensive for one man; and since the illness of Dr. Hosmer in December, 1888, he has succeeded to a large part of his practice.

The present Board of Health was originated by him, and he was its first presiding officer, and, with Lawyer Sullivan, framed the rules and regulations which govern the board. In 1883 he was appointed by Governor Robinson a medical examiner for Middlesex County, which office he still holds. He was for three years assistant surgeon, and for two years surgeon of the Fifth Regiment, under Col. Bancroft.

Outside of his profession he has taken quite a prominent position, having served on the School Committee of the town for six years, for the last five of which he has been chairman. He is a member of the parish committee of the First Parish, and for two years has been the president of the Unitarian Club of this town. He is the member of the Wednesday Club,

and a member of the standing committee of the Historical Society of Watertown.

Other physicians in town at present are Michael J. Kelley, Geo. A. Tower, E. True Aldrich, Charles S. Emerson, S. Adelaide Hall and W. S. Beaumont.

OLD RESIDENTS.—*Mr. Samuel Walker* was born in Langdon, New Hampshire, February 9, 1818. His father, Mr. Gilson Walker, a farmer of five or six hundred acres, raising large numbers of sheep with other stock, hay and grain, found time to serve his town for over thirty years as town treasurer. He was a son of Abel Walker, of Shirley, Massachusetts, whose father, Samuel, one of the eighty who responded to the Lexington alarm on the 19th of April, 1775, an enterprising citizen, treasurer of Shirley for a dozen years, was the great-grandson of Samuel Walker, sr., of Woburn, who was born in England in 1615, came with his father, Captain Richard Walker, to find a home in Lynn, in 1630.

Mr. Samuel Walker, the subject of our sketch, thus preceded by an honorable and trusted ancestry, some of whom distinguished themselves as pioneers in the settlement of New Hampshire, notably of Charlestown and Langdon, came to Boston in 1843, when he was twenty-five years old, and to Watertown for a home in 1854. He was at first engaged in the sale of country produce, say till 1859, since which time he has been engaged in the manufacture and sale of coal-oils. He was the second to import coal from Scotland—Downer was the first—for the manufacture of oil, before the discovery of the oil fields of Western Pennsylvania, which quickly supplied the market with crude petroleum. This had to be distilled and purified and prepared for use, a work for which the previous manufacture had led the way, but it soon came to revolutionize the artificial means of illuminating our homes and our shops, our factories and our streets, and in time, as it already cooks our food, will come to be the source of heat for steam-boilers and locomotives, as in Russia, and will probably drive our dynamos for all electrical work.

Walker's high-test white oil, like Pratt's astral oil, is one of the best for illuminating purposes.

Mr. Walker has served the town of his adoption as selectman in 1877, 1878 and 1879; has represented the towns of Watertown and Belmont in the Great and General Court in 1881 and 1882. He was one of the benefactors of the Free Public Library in 1883, giving the sum of \$4,500 towards the new building while disclaiming any patriotic or charitable motives, giving it, as he said, as "an investment in improvements to his own home." This fronts on the beautiful lawn surrounding the library building, but is separated by a dense line of trees, a street and the railway. He can see this lawn in summer, as any one in town can see it, by going around to the street in front of it.

*Robbins and Curtis Family.*¹—⁴Mr. James Robbins

¹ Compiled by Miss Martha Robbins.

Sam^l Ha (Key)

was a prominent and much respected citizen of Watertown, who carried on various branches of manufacturing, and was also interested in a country store. He died in 1810. He left a widow and a numerous family of children, with but a small estate, for in the later years of his life he was not very prosperous."

"He owned and lived in a large, old-fashioned house which stood on the bank of the river near the 'Square,' and just at the entrance of 'Watertown Bridge,'—an ancient bridge that led toward Newton."

He was a son of Mr. Solomon Robbins, who lived in Brighton.

Mr. James Robbins had three wives. His first wife's name was Warren, his second, Capen; his third Lois White, sister of Jonas White. By his first marriage there were two children—Sarah and Ann Robbins. Sarah married Israel Cook. Ann married Francis Faulkner, who had a chocolate-mill that stood on the Island in Watertown. Then he removed to Billerica and established woolen-mills, which his descendants still own and carry on.

The children by the second marriage were Josiah, Lydia and Jonathan Robbins. Josiah was a man of considerable information, through travel and study acquiring different languages. A good part of his life was spent in Trinidad, where he married the daughter of an English officer. In the declining years of his life he lived in Carrollton, Kentucky, where he and, his wife died. From Mr. James Robbins' last marriage there were nine children. Lois Robbins, Martha, James, George and Isaac Robbins, were the only ones who grew to womanhood and manhood. Of these, Lois Robbins, the eldest of the nine children, married Captain Benjamin Curtis, the son of Dr. Curtis, of Boston. "Of this marriage there were two children,—Benjamin Robbins Curtis (see portrait on opposite page), born Nov. 4, 1809, and George Ticknor Curtis, born Nov. 28, 1812." Capt. Curtis died while his children were in their infancy. To their mother were they indebted for all they attained. Untiring in her devotion, counting upon their success, if by persistent effort and self-denial it could be attained, she had the reward in her old age of seeing all her hopes realized, both sons going through college with honors and excelling as lawyers—Benjamin being made judge of the Supreme Court; George distinguished in law and literature. In the celebrated Dred Scott case, Judge Curtis will ever be associated as deciding that the negro was not a "chattel," but a citizen.

"The dissenting opinion of Judge Curtis, in the Dred Scott case, was greatly praised throughout the Northern States for the clear, learned and able manner in which it maintained the capacity of free persons of color to be 'citizens' within the meaning of the Judiciary Act, and for the power with which he asserted the authority of Congress to exclude slavery from the Territories."

"The first religious impressions of any man of dis-

tinguished are an important item in an account of his life and character. Through life he was a man of very strong religious feelings and principles. They were derived partly from his mother and partly from the Unitarian influences which surrounded his youth."

"From his mother he was taught his sense of responsibility to God, and 'the fear of God was the only fear under which he ever acted.'"

"His mind was enriched by learning, but not overlaid by it; and to aim to appear learned was as foreign to his nature as any other form of pretence."

He began his professional career in Boston in 1834. "His moral sentiments and convictions were very strong; but they lay deep beneath the surface, forming, like conscience, the unseen and silent guide of life."

"In his boyhood he spent much of his time with his uncles, James, George and Isaac. They were all engaged in a manufacturing business. But the eldest, Mr. James Robbins, was very fond of farming, and was a good amateur farmer. Through him, his agricultural tastes were imbibed in his boyhood, in the rural scenes of his native place and on his uncle's lands."

In the impeachment trial of President Johnson, Judge Curtis was regarded as "the one man in the country, by the President, Cabinet and his friends, who might possibly stay what they regarded as an attempt to crush the constitutional independence of a co-ordinate department of the government." To him they appealed. "Twas decided according to the Constitution there should be a 'trial,' that the Senate should be a Court, the members of which should be under the sanction of an oath or affirmation, and there should be a 'judgment.'" By constitutional provision, and by established precedents, the accused was entitled to "the assistance of counsel for his defence." "In the selection of counsel to defend the President, the first name suggested was that of Judge Curtis, and accepted in full Cabinet, and emphatically by the President himself." "Judge Curtis had no personal acquaintance with Mr. Johnson, no interest in his political or personal fortunes, nothing but a sense of duty to lead him to accept the responsible position of leading counsel for the defence on this great trial." "It involved serious pecuniary sacrifices, for the President was unable to offer the smallest compensation, and Judge Curtis had a very lucrative practice." "The President had nothing to which to appeal in the mind of his advocate, but a consciousness that he might be able to do a service to his country, and this was sufficient." "The impeachment trial began before the Senate, on the 30th of March, 1868, the Chief Justice of the United States presiding." "It was believed that a large majority of the Senators were bitterly hostile to the President." Judge Curtis was to open the defence. He shared the anxiety that was felt by others on account of the hostility of so many of the Senators to the President;

but when he rose to speak he manifested no solicitude whatever. He knew that he could place the defence of the President upon unanswerable grounds of law, and that, when this had been done, his acquittal would depend entirely upon there being a sufficient number of the hostile Senators who were capable of rising above party and acting for their country. "That Judge Curtis rendered a great public service, that when he had concluded his address to the Senators, the acquittal of the President was substantially secured, and that nothing needed to be added to an argument which had exhausted the case, is the concurrent testimony of most of those who were present, or who have read the trial."

"He died in Newport, September 15, 1874. In Dr. Robbins' Memoir, read before the Massachusetts Historical Society, is the following tribute to his character. "It does not admit of denial that Mr. Curtis' character bore that genuine stamp of greatness which cannot be counterfeited or disputed, the test of which is the spontaneous recognition and homage of men. Everywhere, and at all times, on the bench, at the bar, in every assembly, whether large or small, in the most select company, and in general society, his presence was impressive and commanding. No man, however great, could look down upon him. Very few could feel themselves to be his peers. Most men, even those of a high order of mind and character, instinctively acknowledged his supremacy."

"In one thing surely it will be allowed that he was great; for throughout life he had been mindful of the prayer, and had received its answer, 'So teach us to number our days, that we may apply our hearts unto wisdom.'"

White Family.—One of the prominent men in Watertown in the early part of the century was Mr. Jonas White, who owned a large farm on which was a lovely wooded hill, which is now standing and is still called White's Hill.

Mr. White, on May 2, 1749, married Lucy Stearns, and had four sons and one daughter. The daughter married Hon. Levi Thaxter, a lawyer in the town, and their son, Levi L. Thaxter, who died in the year 1884, was well-known in the literary circles of Boston and Cambridge, as a man of culture and refinement, and also a very fine reader of the poetry of Robert Browning. His wife, Mrs. Celia Thaxter, is now one of the most prominent literary women in the country, being a beautiful writer of both prose and poetry.

Three of Mr. White's sons died at an early age. William, a young man of great promise, entered Harvard College in the year 1807, but never graduated, as there was a rebellion in his class, and all left or were expelled. He is said to have been a brilliant talker and a delightful companion. Jonas studied medicine but in consequence of an accident, gave up practicing. He died unmarried, as did both William A. and Josiah. Abijah, the eldest son, married Miss Ann Maria Howard, daughter of Samuel Howard, who

was one of the members of the celebrated "Boston Tea Party," 1776, and remained on the farm with his father. In those days the ranches of Nebraska and Colorado were unknown, but Mr. White did a large business in cattle-raising on the farms of Petersham, Hubbardston, Princeton and other towns within fifty miles of Boston. In company with Boston merchants he exported large quantities of beef to the West Indies, and in this way acquired a handsome fortune.

He had six daughters and one son, William Abijah, who graduated at Cambridge in 1838, in the class with James R. Lowell, William W. Story (the sculptor), Nathan Hale, and other men of note.

William was of a most benevolent and philanthropic disposition, and did a great work in Watertown in promoting the temperance cause. So much respected was he that, on his return to Watertown after a long absence, a public reception was given him, and a silver cup presented, as an expression of respect and affection from the citizens. He was also very prominent in the abolition movement. He died in 1856.

Lucy, the eldest daughter, married George Richardson, whose father lived in the fine house which was afterwards converted into the Nonantum House at Newton. One of the daughters, Ann Maria, married James Russell Lowell, the poet, but she did not live long after her marriage. William Abijah married Harriet Sturgis. Lois Lilly married Dr. Estes Howe, of Cambridge. Mary Greene married Charles Wyllis Elliott, from Connecticut. Agnes Howard married Arthur Lithgo Devens. Caroline Gilman married Montgomery Davis Parker.

The old house, from which the most generous hospitality was dispensed by Mrs. White, who was beloved and respected by every one who knew her, is still standing in the village street, just beyond the park.

The Coolidge Family.—This family is of great antiquity, traceable as far back as Edward the First (1300). The name was spelled in various ways, there being no fixed orthographic rules, and the mode was governed mostly by the sound. The practice derived from the Normans, in the tenth or eleventh century, of giving surnames from manors or localities, prevailed. William de Coulinge appeared in the roll of the hundreds as holder of lands in Cambridgeshire. The *de* was generally dropped from surnames about the time of Henry Sixth (before 1450).

The branch of the family from which those in this country descended was settled in Cambridgeshire, was of the landed gentry, and of great respectability. They adopted the name as now usually spelled.

JOHN, the youngest son of William Coolidge, of Cottenham, Cambridge County, England (baptized September 16, 1604), was perhaps one of the first settlers of Watertown, in 1630, although the date of his arrival has not been ascertained. He was admitted

¹ By Austin J. Coolidge, B. C., 1847, and member S. E. H. & G. Society.

Joseph Cookidge

freeman May 25, 1636, but that fact does not disprove a much earlier arrival, as none were admitted freemen until they became members of the church, yet were eligible to office upon taking the oath of fidelity, without admission either as church-members or freemen.

The homestead of John Coolidge was upon the highlands at the northwesterly side of Fresh Pond, and he acquired other lands in different localities. He was representative to the General Court in 1658, selectman thirteen times between 1638 and 1682, and was often engaged in the settlement of estates. His will, dated Nov. 19, 1681, was proved June 16, 1691. He died May 7, 1691, aged eighty-eight years, and his wife, Mary (whose origin is unknown), died Aug. 22, 1691, aged eighty-eight years. In the ancient graveyard, under a stately elm, near the corner of Arlington and Mount Auburn Streets, two modest head-stones of slate, about two feet in height, mark the burial spot of the united head of the family in America.

Their children were sons, *John*, probably born in England about 1630; *Simon*, born 1632; *Stephen*, born October 28, 1639; *Obadiah*, born April 15, 1642; *Nathaniel*, probably born 1644-45; *Jonathan*, born March 10, 1646-47; daughters, (probably) *Elizabeth*, born about 1634-35; and *Mary*, born October 14, 1637. Their father's will omits from mention son Obadiah, who died 1663, unmarried, and Elizabeth, who married Gilbert Crackbone, of Cambridge, June 17, 1656, and, after Crackbone's death, in January, 1671-72, married Richard Robbins, March 26, 1673, and died without issue, probably before date of her father's will. Mary married Isaac Mixer, Jr., and left daughters Sarah and Mary, remembered by the ancestor. Stephen married, but died in 1711 without issue, and his estate descended to his brothers and sister Mary's children. Thus, of the eight children, the perpetuation of the Coolidge name depended upon the four sons, John, Simon, Nathaniel and Jonathan. These men were among the most respectable citizens and left a numerous progeny. John had fourteen children (among them two pairs of twins); Simon had eight, Nathaniel had thirteen, and Jonathan had seven children, averaging more than ten each.

JOHN, the oldest son,¹ was connected with operations in fortifying Brookfield, in King Philip's War in 1676, and was selectman six times between 1684 and 1690. There came very early among the settlers of Watertown, a feeling that there was not room for the population; hence, migrations began. Many of the descendants of this man are found among the settlers of Sherburne, Natick and adjoining parts of Middlesex County. His son, Lieut. Richard, was representative of Watertown in 1722, and selectman eleven times from 1711 to 1728. Samuel, Richard's son was a graduate of

Harvard College in 1724, librarian in 1732, and chaplain at Castle Island. Other descendants—John, born 1753, was soldier in the Revolution; Nathaniel kept a public-house at south side of Watertown bridge, from 1764 to 1770, and was selectman in 1777-78; Grace, daughter of Joseph, of Sherburne, married Joseph Ware, father of Ashur Ware, Harvard College, 1804, LL.D., Bowdoin, 1837, and judge of District Court United States for Maine; Carlos Coolidge was a graduate of Middlebury College, 1811, and was Governor of Vermont.

SIMON, the second son of the settler, appears to have been the progenitor, so far as is known, of all of the name now residing in Watertown, and of the larger proportion of the family here in preceding years. Some of his descendants in the period from 1780 to 1795 migrated to the region of Maine now called Jay and Livermore, and became numerous from that point eastward to Hallowell and Augusta, and southward to Portland. His son Joseph became one of the leading men in Cambridge, and was deacon of the church. The daughter of Joseph (Rebecca) married Rev. Edw. Wigglesworth, first Hollis Professor of Divinity in Harvard College; son Stephen, graduate Harvard College, 1724; daughter Mary, married Rev. Samuel Porter, graduate Harvard College, 1730, and minister of the church in Sherburne.

SIMON, grandson of Simon, born 1704, purchased, in 1728, lands along what is now Grove Street. The house where he lived, demolished before the present century, was a short distance beyond the house known to the present generation as the old Coolidge house, which stood, until within three or four years, opposite to the residence of the late Deacon John Coolidge. The house second named may have been in existence prior to the purchase referred to.

Here lived Simon's eldest son, JOSEPH, born 1730, who was killed by the British troops April 19, 1775. The tradition is, that he was ploughing at the "Vineyard" in the early morning—heard of the march of the King's troops, put up his cattle, took his gun, went to the village, fell in with a small company hastening forward from Needham, and, being more familiar with the way, acted as guide. This small body of men met and was fired upon by the British flank guard at the high rocks in the edge of Lexington. Joseph Coolidge fell! One hundred years after, the family erected a monument in memory of the event in the ancient grave-yard near the place of his burial, and near the spot also where he heard his country's call. Commemorative exercises were held on Decoration Day, May 30, 1875, a more genial day than the 19th of April had proved to be, whose wintry blasts contrasted strangely with the heat of that day a century before. JOSHUA, the eldest son of this man of Lexington fame, helped on the earth-works at Dorchester Heights, where Washington's position suddenly induced the British to leave Boston. The grandsons, Joshua, Josiah, David and John, were

¹ Bond connects John, the grandson of the settler, with King Philip's War, but he was then only fourteen years old; Stephen, a son of the settler, was also a soldier in that war.

large land-holders, and among the best citizens of the generation just departed. A representative man, prominent among those still worthily sustaining the reputation of the family, is JOSHUA COOLIDGE, oldest of the great-grandsons, who has served the town well in the arts of peace, on its School Board, and for many years a trustee of the Public Library.

NATHANIEL, the third son of the settler, was selectman in 1677 and 1692. He became owner of the wear and the fishery at the bridge, and of the tract between the river and Mill Creek, the mill and the dam, where now are the Hollingsworth & Whitney Paper-Mills, the Lewando Dye-House, and the Walker & Pratt foundry; also purchased extensive tracts elsewhere, among them a fifty-acre lot, ninety-three acres and one hundred and seventeen acres, lying possibly on both sides of Mt. Auburn Street, somewhere between Garfield Street and East Watertown. Among his descendants were great-grandsons Samuel, graduated Harvard College 1769, a distinguished classical teacher, and his brother, COL. MOSES COOLIDGE, selectman in 1777, 1792. Persons still living remember his homestead, on what is known as the Frazer place, at East Watertown. Cornelius, a son of Col. Moses, was graduated Harvard College 1798, and a merchant in Boston. Gen. Jonathan Coolidge, of Waltham, selectman from 1791 to 1807, was a great-grandson. David Hill Coolidge, lawyer in Boston, is also a descendant.

JONATHAN, the youngest son of the settler, was born March 10, 1646-47. His son John settled in Boston. His grandson Joseph, born February 10, 1718-19, married Marguerite Olivier, daughter of Antoine Olivier, a French Huguenot. From him were sons Joseph in three generations: Joseph, born 1747; Joseph, born 1773, married Elizabeth Bulfinch; and JOSEPH, born about 1799, graduated Harvard College 1817, and married Ellen Wales Randolph, daughter of Thomas Mann Randolph, Governor of Virginia, and wife Martha, who was daughter of Thomas Jefferson, President of the United States. The wealth and enterprise of this last Joseph were visible in the last generation, and are perpetuated in his family. Among his sons was Sidney, who fell at the battle of Chickamauga, September 19, 1863; living representatives are Thomas Jefferson, a distinguished manufacturer and capitalist; Joseph Randolph, a member of the legal, and Algernon of the medical profession. Thomas Bulfinch (Harvard College 1819) and Rev. James I. T. (Harvard College 1838) were also descendants of the first Joseph. The members of this family have swelled the roll of Harvard graduates by the name of Coolidge, descendants of the first settler, to thirty-four, not to mention those of other names, descendants by intermarriage.

Interwoven with the Coolidge family are the names of Bond, Stone, Bright, Brown, Clarke, Mason, Livermore, Hastings, Jennison, Frost, Whitney, Russell, Stratton, Wigglesworth, Stearns, Richards, Harring-

ton, and many others, through whom it may fairly be computed the descendants of the first settler were as numerous as those bearing his name, and scattered through New England and the Western States. Four towns bear the name of Coolidge, in Kansas, Kentucky, Wisconsin and New Mexico. These children of two hundred and sixty years, dispersed so widely, all regard with patriotic pride and devotion Watertown as their maternal home.

BIOGRAPHICAL.

SETH BEMIS.

Seth Bemis, who was born the 23d January, 1775, was the youngest son of David and Mary Bemis, the latter the daughter of Nathaniel and Ann (Bowman) Bright. He was a lineal descendant in the fourth generation of Joseph and Sarah Bemis, who were in Watertown as early as 1640, and were supposed to have come from London, England, in the "Sarah and John." His ancestors had been substantial citizens and land-owners in Watertown, their names appearing on the early town records among those of the selectmen. His father owned the water-power where now the Etna Mills are established, carrying on a grist-mill and paper-mill, and at his death, in 1790, the mill property came to his sons Luke and Seth. The subject of this sketch fitted at New Ipswich Academy for Harvard College, where he graduated in 1795, taking good rank as a scholar. After graduation he spent about a year in the law-office of Franklin Dexter. At this time the attention of fore-seeing and progressive New England men was turned to the establishment in this country of manufacturing industries, and Seth Bemis was among the earliest to join the movement, buying out his brothers' interest in 1796, devoting much time to experiments with machinery, for the different branches of spinning and weaving yarns and cloth, both of cotton and wool. About 1809, at the suggestion of Winslow Lewis, a large Boston ship-owner, he began to experiment with the manufacture of heavy cotton goods suitable for sail-cloth, and the War of 1812 found him extensively engaged in the manufacture of cotton duck, a large part of which was marketed in Baltimore and the South. After the close of the war he took up other branches of manufactures, and was associated in his enterprises with some of the well-known Boston merchants of the day, among them John Bellows, Thomas Cardis and William H. Boardman. At a late period, in partnership with his son, Seth Bemis, Jr., he carried on a large business in the grinding of logwood, and the preparation of dyestuffs. Besides his industrial enterprises, he was much interested in agriculture, and believing that merino sheep could be profitably raised in this coun-

John Penn

()

Calculation

try, he became largely engaged at one time in breeding them on a farm owned by him in Maine, for this purpose importing some of the finest blooded stock.

He was always an active member of the Unitarian parish, taking great interest in its work. He represented his town in the Legislature, and, although averse to holding office, was an earnest advocate of public improvements. He died on the 4th April, 1851, in the seventy-sixth year of his age.

He married, on the 24th April, 1808, Sarah Wheeler, of Concord, Massachusetts, who belonged to a family, descended from the earliest settlers of that town. His wife died on the 22d of June, 1849.

They had four children, who all survived them:—

Jonathan Wheeler Bemis, born Sept. 17, 1810, who graduated from Harvard in 1830, and from the Harvard Medical School in 1834. He settled in Charlestown, where he followed his profession over thirty-five years. In November, 1859, he married Lucy Wyeth, of Cambridge, and has four children. In 1871 he retired from practice and moved to Cambridge, where he now lives.

Sarah Wheeler Bemis, born 25th of July, 1812, who now lives in Newton, just across the Charles River from the old homestead.

Seth Bemis, Jr., born 18th of September, 1814, who fitted for Harvard College at Exeter Academy, but went into business. He was a well-known manufacturer, and was associated with his father for many years, the success of their dye-stuff business being due, to a large extent, to his energy and capacity. After retiring from active business, about 1860, he moved across the river to Newton, where his sister now lives. Up to the time of his death he continued to hold several positions in manufacturing and other companies. He died 21st of October, 1887, in the seventy-fourth year of his age.

George Bemis born 13th October, 1816, who graduated from Harvard College with high rank in 1835 and from Harvard Law School in 1839. He became a noted lawyer of Boston, where he practiced many years. During the War of the Rebellion he was greatly interested in the success of the National Government, and rendered valuable assistance in the conduct of its diplomatic correspondence both during the war and in the years immediately following its close. His patriotic interest in international law led him to make a study of this subject, in which he became deeply interested, and by his will he left a legacy founding a Professorship of International Law in the Harvard Law School. During the latter years of his life he lived much in Europe, where he died the 6th January, 1878, at Nice, France, in the sixty-second year of his age.

Another branch of the Bemis family who have long been residents of Watertown was Charles Bemis, a son of Nathaniel and Abigail (Bridge), a grandson of David and Mary (Bright), a great-grandson of Jona-

than and Anna (Livermore), a great-great-grandson of John and Mary (Harrington), who were next in descent from Joseph and Sarah, who came to Watertown about 1640. They were believed to have come from London in the "Sarah and John." (See Drake.) Homestall, 10-A.

Said Charles Bemis graduated from Harvard College in 1808, and studied law with Judge Artemas Ward, and practiced his profession during his life in Watertown. He married Annie Vose, of Boston. They had three children—Dr. Charles Vose, of Medford, who married Elizabeth F. Henry, of Keene, N. H. daughter of Hon. Wm. Henry, of Chester, Vt. Dr. Bemis has been for many years one of the trustees of the Massachusetts General Hospital. They have two daughters, Fanny Elizabeth and Alice Goodhue.

Abby Vose married Charles J. Barry, son of William Barry, of Boston, and Esther (Stetson) Barry, formerly of Randolph. Mr. Charles J. Barry, born in 1811, graduated at Boston High School. After spending some time in the office of A. C. Lombard, he engaged in the wholesale coal business, first in Boston and afterwards in Charlestown, where he was known for his punctilious attention to his business. He took up his residence in Watertown in 1852, was elected on the School Committee in 1854, again in 1858, and continuously until 1865, was made one of the Board of Trustees of the Free Public Library in 1868, and again in 1873, serving until his death in 1883, the last six years being chairman of the board. He was one of the three charter members of the Watertown Savings Bank, was its president from the date of its organization in 1870 until his death. Mr. Barry was remarkable for his exact and regular habits as a business man, enjoying the perfect confidence of all, while he gave much of his time the latter years of his life to encourage the young and the poor to save their money while they could for sickness and old age, to save their leisure time by using it in reading good books. He was constant in his attendance at church and liberal in his support of the First Parish, of which he had long been a member.

Isaac Vose, entered Harvard College, but owing to ill health did not graduate. He studied law with Judge Putnam. He is unmarried and lives at the ancestral place on Main Street, near its junction with Lexington Street.

MILES PRATT.

Miles Pratt was descended from Joshua Pratt, who came to Plymouth in the "Ann" in 1623. At a very early date lands were granted to him in that part of Plymouth which is now Carver, and from that time to the present one branch of the family has made that town its place of residence. David Pratt, the father of Miles, lived in Carver, and having secured something more than a common-school education, devoted the earliest years of his manhood to teaching school.

foundry, however, he turned on a foundry in the north part of his native town. He married Sarah, daughter of Thomas Barrows of Carver, a descendant of Luke Perkins, who also received grants of land in Carver at an early date and died in 1800. David Pratt had three children—Mary, who married George Barrows; Sarah, who married Marcus M. Sherman, and Miles, the subject of this sketch. Miles was born in Carver, September 17, 1825, and at the age of fifteen years entered upon the occupation of selling hollow-ware, the product of his father's factory, and from that time until his death his career was one of active industry.

About the year 1850, after being with his father some years as a partner in his business, he entered the store of B. W. Dunklee & Co., dealers in stoves, as salesman, and remained in their employ one year, when, with a son of Mr. Gould, an old president of the Blackstone Bank, he formed a partnership under the name of Pratt, Weeks & Co., with William G. Lincoln, Allen S. Weeks and his uncles, Thomas and John Jay Barrows, as partners. At that time his father, David Pratt, having retired from business, the new firm engaged for a year in the manufacture of castings in Carver, while building a foundry in Watertown for the manufacture of cook and parlor stoves and stove-ware. In 1855 the new foundry was finished and a considerable business was soon built up, mainly for the Eastern market and that of the Provinces.

In 1857, owing to severe financial depression, the firm dissolved, and while its creditors suffered no loss, Mr. Pratt was deprived of the earnings of his previous years, emerging from the wreck of his firm a poor man, but with integrity and business vigor unimpaired. With a determination rarely exhibited in such cases he at once took a lease of the Watertown foundry on his own account, and carried on its business alone with marked success until the following year, 1858, when he formed a partnership with Luke Perkins, also a native of Carver, under the title of Pratt & Perkins, with Wm. G. Lincoln, one of his old partners, as a special partner. In 1863 Mr. Perkins left the firm and the firm of Miles Pratt & Co. was formed, with Mr. Lincoln as the partner. In 1874 this firm was consolidated with that of George W. Walker & Co., of Boston, under the name of Walker, Pratt & Co., with Mr. Lincoln and Horace G. and George W. Walker as partners. In 1875 the company was incorporated under the name of the Walker & Pratt Manufacturing Company, with George W. Walker as president and Miles Pratt as treasurer. After the death of Mr. Pratt, George E. Priest became the treasurer, and the company is still

connected with their store at 31 and 35 Union Streets, Boston. Since 1863 Oliver Shaw, also a native of Carver, has been the superintendent of the manufacturing business, and largely to his fidelity and skill the company owes its success.

Mr. Pratt married, in 1851, Sarah B., the daughter of Zebulon Chandler, of Carver, a descendant from Edward Chandler, who appeared in Duxbury in 1633. Mrs. Pratt died March 25, 1858, leaving no children, and on the 6th of October, 1859, Mr. Pratt married Ellen M. Coolidge, of Watertown, and had an only child, Grace, who married Frederick Robinson, of Watertown, and is still living. He died at Watertown on the 9th of August, 1882, and was buried at Mt. Auburn. His death occurred at a time when his brain and capacity for work appeared to be in their fullest vigor and when, with the threshold of his business enterprises, with its difficulties and embarrassments and obstacles, successfully surmounted, he was enjoying the fruits of his labors and indulging in ambitious and well-founded hopes of enhanced success.

The career of Mr. Pratt portrayed in this sketch demonstrates the most prominent characteristics of the man, singleness of purpose, disturbed by no alluring temptations, a determination to succeed never weakened by obstacles in his path, and an unswerving integrity, without which neither singleness of purpose nor determination to succeed could have been of any avail. Good business man as he was, he permitted no outside schemes and enterprises to distract his mind, and accepted no office except that of trustee of the Watertown Savings Bank, of which he was the most active founder. Brought up in politics as a Whig, he preserved his independence of speech and thought, and abandoned the party of his youth when he believed it untrue to the principles of human freedom. Afterwards a Republican, he was still independent and recognized no authority binding him to its ranks, when he believed that it had outlived its usefulness and purpose. Nor in religious matters, more than in politics, was he bound by traditions. Born in the Orthodox Congregational Church and educated under its influences, he became in the later years of his life a Swedenborgian and died in that faith. In all things he kept his mind free, always open to convictions, and when convictions came to him he was obedient to their commands.

SAMUEL NOYES.

Samuel Noyes was the son of Christopher and Martha (Reed) Noyes, and was born in Plymouth, N. H., June 27, 1804. He attended the district-school in winter, and aided his father in the store in summer. In June, 1827, Mr. Noyes found employment in Boston, where he remained two years, afterwards went to Cambridge and worked in the grocery-store of Deacon Brown four years.

In April, 1833, he came to Watertown and opened

Samuel Taylor

Wm. L. Post.

(what was then called) a temperance grocery-store, corner of Arsenal and Mt. Auburn Streets. Many prophesied at the time that this new project would be a failure, for it was customary in those days for grocers to sell liquors, and they did a thriving business in that line.

Mr. Noyes was a strong temperance man, and did not approve of the use or sale of liquors. There were three stores in town at the time which dispensed spirituous liquors, but Mr. Noyes having the strong courage of his convictions, plodded along in his way, his business slowly but constantly increasing. He was soon in need of a larger store, and moved in 1847 into the town hall building, where he remained for a number of years. In 1870 he built the brick block on the opposite side of the street, known as Noyes' Block. He continued to do business there until 1879, when he sold out and retired, having been in active business in Watertown forty-six years.

In June, 1836, Samuel Noyes married Amanda George, of Plymouth, N. H., and had six children, viz., Mary, Hattie, Samuel G., Sarah B. (who died in infancy), Charles H. and Emma L. Four of these children are now living,—Mary (now Mrs. Noyes), Samuel G. (unmarried), Charles (unmarried), Emma L. (now Mrs. Sidney E. Horne), living in Mendota, Illinois.

Samuel Noyes married for his second wife, Mrs. Mary Horne, and had two children, Wendell and Sidney E.

Mr. Noyes is a Republican in politics, was town treasurer and collector of taxes for twenty years, always attended the Baptist Church, and was treasurer of that society fifty-five years.

THOMAS L. FRENCH.

Capt. Thomas L. French was born in Cambridge, Mass., Sept. 16, 1809. He was the son of Cyrus and Deborah (Learned), and grandson of Isaac French.

Capt. French's father died when he was quite young, and early in life he was obliged to depend upon his own resources. At the age of fifteen years he was apprenticed to Samuel F. Sawyer, of Cambridge, Mass., to learn the trade of mason and builder, and at the age of twenty-one he went in business for himself in Holliston, Mass. He remained in Holliston about four years, then moved to Watertown and continued the same business until within a few years when he retired from active life. Capt. French did a large and lucrative business in Watertown, and during the late war was master mechanic at the United States Arsenal and built most of their large brick buildings.

He was very active in town affairs—selectman fifteen years, in the Legislature one year, and held other minor town offices. The captain was never defeated for any office tendered to him by his townsmen but once. During his active life few men were better posted in town affairs than he. The title of

captain he received from being fire warden in the days of the old volunteer Fire Department.

Capt. French married, for his first wife, Esta Pond, of Watertown. There were three children by this union, two of whom died in infancy.

Georgetta is still living. Mrs. French died Oct. 18, 1852. For his second wife, Mr. French married Mrs. Isaac French. She died Jan. 6, 1854.

Mr. French died Aug. 12, 1890.

CHAPTER XXXVI.

HOLLISTON.

BY ALBERT H. LEACH, HON. M. C.

THE town of Holliston reaches to the southern point of Middlesex County, and forms a large part of its boundary in that direction. The boundary line separates it from Medway and Millis, in the county of Norfolk, and from a portion of Milford, in the county of Worcester. It is a daughter of Sherborn, having been formed entirely from that ancient town. The history of Sherborn is therefore the history of Holliston until the date of incorporation of the latter town, in 1724.

Grants of the land now included in this township were made by the General Court, as early as 1659, to Major Eleazer Lusher, of Dedham, and to Dean Winthrop, son of Governor John Winthrop; and also, from 1664 to 1674, to Lieutenant Joshua Fisher, of Dedham, to John Parker and one Hopper. Lusher's grant of two hundred and fifty acres comprised the present central part of Holliston, and twelve acres of meadow "lying on the brook Wennakeening" (Bogistow Brook); and Winthrop's grant of six hundred acres or more abutted upon Medfield line in one direction and upon a pond (Winthrop's) in the other. Major Lusher sold his grant to Lieutenant Henry Adams, of Medfield, in 1660; and after the death of Lieutenant Adams it was bought by Hon. William Brown, of Salem, and afterwards came into the possession of his son, Colonel Samuel Brown, and Judge Samuel Sewall. Lieutenant Adams took immediate possession and is said to have mowed the meadows the same year. He sent cattle here and some of his sons resided here, especially Jasper, who seems to have had the management of the land and gave his name to "Jasper's hill," now Mt. Hollis, from which, by signal fires, he communicated with his father in Medfield. He lived here, unmarried, for a period of about fourteen years until driven off by the Indians under King Philip in 1676.

The second planter was William Sheffield, who, with his brother Edmund, bought in 1662 the grant of Lieutenant Joshua Fisher, of Dedham, at "Chabboquasset," in the southeast quarter of the present town. He took possession, but did not settle there probably

until 1674. Edmund Sheffield does not appear to have settled there at all. Of this land no deed had been obtained in 1688, Lieutenant Fisher having died in 1672, before he had completed a deed to the Sheffield. William was in much trouble on this account, and, as he did not know what action to take, presented the following petition "on a training day" in Sherborne, November 22, 1688, "to y^e fathers, with all the inhabitants of Sherborn:" "Wm. Sheffield, of Sherborn, the aged, your humble petitioner, doe humbly intreat you to show your love to me, to give, grant or confirm my land which I bought of Lt. Fisher, of Dedham, to confirm to me and mine, I shall be very thankful to you forever; for I am like a man having myself half in the mire, and want to be holpen, help I pray you and damnifye no man with it." In answer to this "request the inhabitants then present did generally by their vote, grant and confirm to him the said land soe far as they had any interest in it." He seems by an order of the Court to have obtained his deed at a later date. He had extinguished the Indian title to his tract in 1675. He became a wealthy man for those days, and in 1686 was rated the third highest in Sherborn. He was a selectman in the early years of Holliston and served on the first board. His son, William Sheffield, bought Hopper's farm of 280 acres in the west part of Holliston.

Winthrop's grant was purchased by Captain John Goulding, and extensively improved by him. He settled there about 1705, and was a man of wealth and of "herculean size and strength," and a principal inhabitant in the early affairs of the town; was town clerk ten years and selectman ten years.

Alexander Marsh also settled on a part of Winthrop's grant, on the north shore of Lake Winthrop.

No other grants appear to have been occupied until 1680, and then only by proprietors of grants made prior to the incorporation of Sherborn, or that were made by the town of Sherborn. Under the latter head, in 1679, "Sherborne granteth to such as shall make a saw-mill on a Brook [Bogistow Brook, where the blanket-mill stands] about half a mile on this side the corner rock that was Natick bounds, the sum of 50 Acres of upland adjoining to that brook, and 3 or 4 Acres of meadow, if it may be found upon that Brook, as may be convenient—also 10 Acres of Swamp, the Cedar timber excepted. This saw-mill to be built by the end of 12 months, and be continued three years, or as the selectmen then in being, and the owners shall agree. So the land to be settled to the owners." Samuel Lind, of Boston, soon accepted this offer and built a "corn-mill" and afterwards a saw-mill upon it. The same privilege was used in later years for a trip-hammer mill, woolen-mill, cotton-mill and machine-shop, and in our day for the manufacture of blankets. The building was burned about 1843, and a new one afterwards erected.

The second division of the common lands of Sherborn was made in 1682, including all of Holliston;

and until then no other settlers were admitted. But soon after that date arrangements were made for taking possession of these lands and purchasing the same of the Indians. All of these settlers were particular to "extinguish the Indian title." They considered that the Indians had a right to the lands, and they bought that right and took deeds therefor. William Sheffield purchased directly of one of the chiefs, John Awosamog; others united in obtaining a common quit-claim deed from several Indians who were authorized to convey the same.

Not many families had settled in Holliston when the year 1700 had arrived. For this there were two principal reasons: the one above-mentioned, that no new settlers were admitted until after the year 1682, and another one, that this territory was several miles distant from the church in Sherborn, a serious matter in those days, when the opportunity to attend the stated services of the sanctuary was considered one of the highest privileges. Even as late as the year 1723 there were only thirteen subscribers to the petition to be set off from Sherborn, and it is believed that all but five heads of families signed the petition.

The inhabitants of Sherborn were about to erect a new meeting-house, and those residing in the western part of the town (now Holliston) were strenuous in their endeavors to have it placed on a spot which should accommodate them. The town endeavored to respond to this reasonable request. On March 6, 1723, the qualified voters met at the meeting-house, and immediately adjourned to meet at "the platt, seventy or six-score rods Easterly from Dirty Meadow bridge, or Thereabouts" (about half a mile east of the railroad station, in East Holliston), when and where it was unanimously voted by all present, "that a meeting-house be built for the town to worship God in, on Lord's Days, upon a certain hill by the road side, . . . so that the town remain together for the strengthening thereof." November 18, 1723, the inhabitants "voted to nullify and make void this vote of March sixth, in consideration that the Form and Situation of the Town is so ill Convenient that one Meeting-House Cannot be so placed as to Suit the Whole town, but that in time there will be need of two to accommodate the Inhabitants." And £160 was granted to defray the cost of a new meeting-house on the old site. This was, without doubt, a sensible decision, and subsequent events have so proved it.

* At said Meeting after sundry votes had passed, relating to the building and rebuilding of y^e publick Meeting house, the following motion was made by sundry of y^e Principall Inhabitants of y^e said town, Who are Dwelleres upon West side of Dopping Brook. The request of us, the Subscribers, in behalf of Our Selves and the Other Western Inhabitants of y^e town; Do desire that the following articles may be put to vote, viz.: Whether they will not be free to Grant us y^e liberty of Having that part of Sheffield's Farm Lying on y^e East Side of Boggestow Brook and Eastern Measses Land and possessions on y^e East side of Dopping brook aforesaid, over and above y^e Dividing line projected between the Eastern and Western parts of the town from Colonel Buckminster's corner, &c. Then We will soall publick Duty to the town as heretofore

till the Genl^l Court Shall Set us off Except in ye Cost of Building or rebuilding the meeting house, as it has been this day voted. And if so We'll ask for a Dividing line no further Eastward.

"Jonathan Whitney,	John Goulding,
"Timothy Leland,	Joshua Underwood,
"Aaron Morse,	Thomas Jones,
"Moses Adams, Jr.,	Isaac Adams,
"Joseph Johnson,	John Twitchell,
"Ebenezer Pratt,	John Larnit."

On the above the following vote is recorded: "The town by their vote do save to the said Western Inhabitants over Doppin Brook, whensoever they are sett off, their proportion in ye £160 this day granted towards ye Building ye publick Meeting House where it now stands." And the remainder of the above motion was also passed, "for the sake of future peace and good Neighborhood." This amicable spirit has been continued even to the present day; and for many years Sherborn and Holliston constituted one of the State districts for choice of Representative to the Legislature.

June 3, 1724, a petition of the inhabitants of the westerly part of Sherborn was presented to the General Court, showing the "great inconvenience they are under by reason of their great distance from the place of Publick Worship, the said town being near 12 miles long, and the meeting-house situated at the Easterly End; That they have applied to the Town to be sett off, but cannot obtain a division by such a line as they think reasonable; and therefore praying that they may be made a distinct and separate township by such boundarys as are in the said petition particularly set forth." In council, read and ordered that Adam Winthrop, Jona Dowse, Esqs., to whom the House joined Ebenezer Stone, John Quincy, Esqs., and Mr. Edward White, be a committee to repair, as soon as may be, to Sherborn, and make inquiry into the matter of this petition, and report what they think proper for this Court to do thereon. The charge of the committee to be borne by the petitioners.

June 16, 1724. A petition of Timothy Leland and others. A committee of the inhabitants of the Westerly part of Sherborn, praying that this Court would direct the said town not to levy any tax on them for building the meeting-house until September next. The committee appointed to consider their former petition, not being able to proceed to Sherborne till the recess of the Court;

In council read and ordered that the prayer of this petition be granted. In the House read and concurred in.

November 20, 1724. Reported and recommended the Western part be erected into a precinct and separated from the First Parish by the line that now divides Sherborn from Holliston and Ashland; that they be obliged within eighteen months to erect and finish, at their own charge, a suitable house for worship; that they provide, as soon as may be, a learned and Orthodox minister; that they be allowed to assess the

lands of non-residents within said precinct 1d. per acre towards the charge of building and settling a minister; that they be freed from paying any part of the £160 lately assessed by said town for building a meeting-house in the easterly part of the town; that they continue to pay their proportion for the support of the present minister of the town until they obtain a minister of their own, and no longer; that they procure and maintain a school-master to instruct their youth in reading and writing.

Their report was accepted in the several articles thereof, "saying that the Western part of Sherborne be a town and not a precinct, and that a bill be brought in to erect the said lands into a township; and that the inhabitants of the western part pay the charges of the committee, viz., £10." This bill passed to be enacted by both Houses, December 3, 1724, and the New town was called Holliston, in honor of Thomas Hollis, Esq., of London, a benefactor of Harvard College; and Mr. John Goulding, a principal inhabitant, was empowered and directed to summon the inhabitants qualified for voters to meet for the choice of town officers, to stand until the next annual election according to law.

Thomas Hollis returned the compliment by presenting the town with an elegant folio Bible for the pulpit, in which is inscribed, "The Gift of Thomas Hollis, of London, Marchant, To the Meeting-house in Holliston, whereof Mr. James Stone is pastor, and his successors." This inscription is supposed to be in the handwriting of Mr. Hollis. Rev. Dr. Tucker gives the following history of this volume: "It was a noble folio printed at Oxford [in the year 1679], and for the first one hundred years of the church's history had been used by its pastor in the service of public worship. Becoming too much worn for that place, the selectmen had given it to the poor-house, where it would have been soon utterly finished, had not the worthy descendant of its donor, Dea. Thomas Hollis, of Boston, got news of its whereabouts, after much search, and secured its possession by giving a new copy of the Scriptures to that institution. The church, on ascertaining this several years after, with some persuasion induced Mr. Hollis to relinquish the valuable relic, which he greatly prized, and which no money could have bought from him, by pledging itself to guard the treasure for all time to come, from harm. The volume was too much dilapidated for rebinding, but by order of the church, a shrine was made for it, resembling a massive book, and in this elegant encasement the venerable heirloom is safe from further harm in the keeping of the Church officers."

There is a doubtful tradition that Mr. Hollis sent also a bell for the meeting-house, but that by fraud on the part of some one through whose hands it passed, a cracked bell was substituted and offered to the church committee here, who refused to accept it. Another report is, that through mistake or connivance,

the bell was sent to the church in Hollis, New Hampshire, or to the Hollis Street Church in Boston.

This incorporation was made about fifty years after the incorporation of Sherborn, the mother town, and seventy-two years after the first settlement west of Charles River, "so slow was the progress of settlement in New England after the first immigrations in 1620-41." The township then comprised 15,086 acres, but in 1826 it sustained a small reduction by an exchange of land with Medway and a larger one in 1846 by the incorporation of Ashland.

The first town-meeting was held December 21, 1724, eighteen days after the incorporation, at the house of Timothy Leland, now occupied by A. J. Travis, about half a mile from the nail factory towards Ashland. Town officers were chosen according to the provisions of the act, and the organization was completed. The first selectmen were John Goulding, William Sheffield, Ebenezer Hill, Jonathan Whitney and Thomas Marshall. John Goulding was the town clerk and was annually re-elected to that office until 1784. "This gave the first impulse to the operations of this infant member of the body politic."

January 4, 1724-25, only eleven days after the first meeting, a second meeting was held, at which it was resolved to erect a meeting-house thirty-two feet by forty feet, with twenty feet posts, and £100 old tenor (about \$44.45) was assessed on the inhabitants towards defraying the cost, each man assessed being allowed the privilege of paying one-half of his rate in labor. It finally cost about £100 more and was completed in 1728.

The situation of the meeting-house was a subject of considerable discussion. Colonel Samuel Brown, of Salem, a large proprietor, who owned the farm formerly possessed by Lieutenant Henry Adams, of Medfield, promised them a site, to be selected from his land. They first thought of the spot which was finally used. But as a large proportion of the inhabitants dwelt in the northern and eastern portions of the town, it was once decided, for their convenience, to build near the present nail-factory, on Jar Brook. But after future consideration they were convinced that this location would not eventually accommodate the majority of the people as their numbers increased, and, looking at further requirements, they decided "to set their meeting-house south of Jasper's Hill, on the West side of the road that goes over there, on the Hon. Col. Brown's farm." A lot of three acres at that place was then given by Colonel Brown to be perpetually occupied as a site for a meeting-house and burying-ground. The wisdom of this last choice is now seen; and this remained the only church edifice in the town for nearly a century. Early in the same year (1725) the town established public worship, services being held at the house of Mr. Timothy Leland, and continued there until the completion of the meeting-house. For many years there were only temporary seats for the congregation, and

it was not until 1749 that members were allowed to build pews, and that a committee was chosen "to dignify the seats." Each man constructed his own pew in those days, and the mode of assigning the different degrees of dignity to the different seats is something astounding to the degenerate people of our times. To Captain John Goulding and "old Mr. Ebenezer Leland," the father of Deacon Timothy Leland, were allotted two of the most honorable pews.

In the year 1772 this meeting-house was repaired and enlarged, and it then answered the purposes of the inhabitants until 1822, when a substantially new church building was erected. Of this edifice of 1822, Rev. Dr. Dowse,¹ in his centennial address, remarks: "That meeting-house is supposed still to be here, but it has been so often enlarged and remodeled that it is very difficult to recognize anything that belonged to the original structure." It was again altered, raised and a vestry built below in 1859.

June 26, 1727, a meeting was held for the election and call of a minister. The result of the meeting was an invitation to the Rev. James Stone to undertake the work of the ministry. But as the meeting-house was not finished and the church was not then organized, his ordination was deferred until November 20, 1728. A church of eight members, including the pastor-elect, was founded on the same day, according to Fitch and others; but Dr. G. M. Adams says there was an interval of three weeks between the two ceremonies.

Mr. Stone was born in Newton, Massachusetts, in 1703, and was graduated at Harvard University in 1724. His great-grandfather, Simon Stone, was one of four brothers who came to this country from England in 1634, and settled at Watertown. One of his sermons, said to be the last he ever composed, was published after his decease, with an introduction by Rev. Oliver Peabody, of Natick, and Rev. Samuel Porter, of Sherburne, who thus comment upon his character: "He was held in great esteem by his own people, as well as those in neighboring towns, for his great sweetness of temper, his good humor, his instructive conversation, his exemplary piety, his great diligence and his faithfulness in the work of the ministry."² His salary would now be considered entirely inadequate. It was fixed at £75, old tenor, equal to \$33.33, to be raised to £80 when the town had received an increase of ten families, and to £85 when there should be an increase of ten more. He was to receive a settlement of £100, or about \$44. His salary was finally raised in 1742 to £150, or \$67. But in addition to this he had his firewood and the use of a house and land. On application by the town,

¹ Centennial Address delivered in Holliston July 4, 1876, by Rev. Edmund Dowse. Published by the Town. Printed at South Framingham, 1877.

² A Century Sermon delivered in Holliston, Mass., Dec. 4, 1826, by Rev. Charles Fitch, pastor of the Congregational Society. Printed at Dedham, 1827.

the Hon. Samuel Sewall and his children conveyed, May 9, 1728, to a committee of the town, Jona. Whitney and George Fairbank, in trust, eleven acres of land "for ye sole proper use, benefit and behoof of ye first Orthodox, Congregational or Presbyterian minister of ye Gospel which shall be settled in ye said town of Holliston, and to his heirs and assigns forever." The committee conveyed it to Mr. Stone January 2, 1730, and in the same year was probably built the ancient house long known as the Stone tavern. The Winthrop house afterwards stood upon a part of the same land. It was destroyed in the great fire of 1875; and the Hollis house took its place, but was burned March 12, 1887. Mr. Stone died July 19, 1742, in the thirty-ninth year of his age and the fourteenth year of his ministry. The town voted £60 to defray the expense of his funeral.

The only candidate for the pastorate, after the decease of Mr. Stone, was the Rev. Joshua Prentiss, who was ordained and installed on the 18th day of May, 1743. He received £200, old tenor, at settlement, and £140 annually. After two years his salary was gradually to be increased until it amounted to £200 per annum.

Mr. Prentiss (or Prentice, as he wrote it himself, his descendants calling it Prentiss), was born at Cambridge, in 1718, and was graduated at Harvard University in 1738. He had been trained from an early age with a view to this holy calling, and early devoted *himself* to the service of God. Rev. Charles Fitch says that "his preaching was plain, instructive and evangelical. For about five years before his death his health was so greatly impaired as to render him unable to preach, except occasionally. And, perhaps, it was owing wholly to this circumstance that the congregation was induced to procure, in 1784, a dissolution of the pastoral connection subsisting between him and them.

"But the fact which seems most unpleasant upon this subject is, that having fallen behind in the payment of his salary, the people should refuse his pecuniary claims, and compel him to the ungrateful task of a civil prosecution. The demand was, however, ultimately discharged without a legal process, greatly to the credit of the people and the satisfaction of the pastor. From the time of this settlement until his death, peace and good feeling prevailed, as is evident from the fact that after his dismissal the town exempted his estate from taxation, and appropriated for the use of his family a seat in the meeting-house. Mr. Prentiss finished his earthly course April 24, 1788, having attained the age of man, his threescore years and ten, forty-two of which he employed in the ministry among this people." He was thrice married, and had nine children, the second of whom, Dr. Thomas Prentiss, was pastor of the church in Medfield from 1770 to the time of his death in 1814. The eighth child, Margaret, married in 1789, Rev. Timothy Dickenson, the successor of her father at Holliston.

"It was during the ministry of Mr. Prentiss, and in the year 1748 that a number of families living remote from the place of worship, and contiguous to Medway, were, for the sake of better accommodation, set off from the congregation of Holliston by an act of the General Court, and comprised as a component part of the West Parish, in Medway, at its original incorporation. The number of families belonging to the religious society of this town was at that time stated to be about ninety."¹

After the dismissal of Mr. Prentiss there was a long interval before the settlement of another pastor. Thirteen successive candidates were heard, and the people were without a minister for one hundred and five Sabbaths. But finally they decided, with "perfect unanimity," to call Rev. Timothy Dickenson. Mr. Dickenson accepted the invitation, and was ordained at Holliston, February 18, 1789. His salary was £200, old tenor, at settlement and £80 per annum. He was born at Amherst, Mass., June 25, 1761. "The traits of character, which, more than any other, marked the opening period of his existence, were the mildness and amiableness of his natural disposition. He was also noted in early childhood for a great fondness for literary pursuits. So that, "although his constitution was naturally slender, and his health feeble and interrupted," a very considerable portion of the hours which were not employed in manual labor were devoted to study. He lived with his parents, and labored on a farm until sixteen years of age, when beholding his country engaged in a common and dubious struggle for independence, the deep interest excited in his bosom for her welfare roused his youthful ardor and would not suffer him to be dissuaded from espousing her cause and enlisting as a private soldier in the militia. In this capacity he continued to serve in the army about fifteen months.

"Upon leaving this post of suffering and danger, his health having been enfeebled by the exposures and hardships to which he was unaccustomed, he commenced fitting for college under the tuition of the Rev. Dr. Dwight, late president of Yale College, who was then engaged in the instruction of a private school at Northampton."² He was graduated at Dartmouth College in 1785. "While at college Mr. Dickenson made a public profession of religion. He was diligent and persevering in the prosecution of his studies; appeared to advantage at recitations and all the literary exhibitions of his class; and acquired the reputation of a correct classical scholar."¹ After graduation he served for one year as preceptor of Moore's Charity School, which was connected with the college, and afterwards officiated as minister in several different parishes in New Hampshire before he received the call to this society. In the November following his ordination he was married to a daughter of Rev. Joshua Prentiss, with whom he lived

¹ Fitch, before quoted, p. 18.

² Fitch, pp., 18, 19, 20.

until his death. They had seven children, two of whom were physicians.

Mr. Dickenson as a preacher was "plain, faithful and affectionate. He had a clear, strong and pleasant voice, which enabled him to speak with peculiar propriety and energy; and as he aimed to draw the attention of his hearers to his subject rather than to himself, so he seldom failed of deeply impressing their hearts and consciences." It appears that he was sometimes *too* plain and searching in his discourses and that dissatisfaction arose in consequence among some of his people; so that in June, 1804, the church called a council to consider the matter. The council, while advising moderation and forbearance, also advised a dissolution of the pastoral relation in the month of August following, unless an amicable adjustment of the difficulties should previously take place. Happily these disagreements were gradually reconciled, so that by the 25th of June the parish passed a resolution in favor of the continuance of the connection. And Mr. Dickenson remained in the office of pastor and peacefully exercised the duties thereof for about nine years afterward, during the remainder of his life. After a lingering and painful sickness, he calmly expired on the 6th day of July, 1813, having completed his fifty-second year and the twenty-fourth year of his ministry.

For seventeen months after the decease of Mr. Dickenson, the society was without a regular pastor, the pulpit being supplied by candidates. The fourth minister was the Rev. Josephus Wheaton, a man who had been recommended to this society as one adapted to their needs, and well fitted to smooth and quiet the disturbed relations of its members. He received a unanimous invitation to take the pastoral charge, which he accepted; and he was ordained and installed December 6, 1815. His salary at settlement was \$600, and his annual stipend also \$600.

Mr. Wheaton was the son of Joseph Wheaton, Esq., and was born at Rehoboth, Mass., March 16, 1788. "His natural disposition," says Fitch, "was amiable; his behavior peaceable, condescending and kind." He early evinced a strong thirst for knowledge, and by his own energy and perseverance, obtained a thorough education. He graduated with distinguished honor in 1812 at Brown University, where he continued his residence, studied theology and at the same time was preceptor in an Academy in Providence and then tutor in the University, where he gratified his love for classical studies. While still a tutor, he was licensed to preach, and was invited to supply the sacred desk in this town. "His conciliating deportment, amiable temper and dignified, yet unaffected manners, won the affection of those who were not always pleased with his theological sentiments. He was completely successful in uniting and harmonizing this people at a time when they were found not a little discordant in opinion and feeling; and enjoyed in an unusual degree, their respect, con-

fidence and affection from the commencement to the close of his ministerial life."

Mr. Wheaton was a student as well as pastor, and excelled in a knowledge of the classics. His literary character and his talents as an instructor made his house a favorite resort for young men fitting for college or perfecting their education. He was an instructive and brilliant preacher and had a very attractive style of delivery, although some times too rapid. His whole soul appeared to be in his work and he was sometimes eloquent in his discourse, aiming to dress his thoughts in choice language.

The good and the talented often die young, and it was so with Mr. Wheaton. After a gradual decline of three years, he finally left the scene of his earthly labors on the fourth day of February, 1825, at the age of nearly thirty-seven years. He left a widow and three children, two of whom adopted the profession of the law, to which Mr. Wheaton himself had a predilection before devoting his mind to the ministry.

Before his decease, Mr. Wheaton had the pleasure of witnessing the completion of the new meeting-house, in which he had been highly interested. It was dedicated on the third day of December, 1823, precisely one year less than a century after the incorporation of the town. "Mr. Wheaton delivered the sermon on the interesting occasion, and it was published; and it stands as a lasting monument of the man and the event, at the very close of his earthly labors." Several other sermons were published and also a work by him on school education.

The ministers up to this time all served during the remainder of their lives after installation, according to the olden custom. Those who follow remained only for shorter periods of time.

Rev. Charles Fitch, a native of Williamstown, Mass., was the successor of Mr. Wheaton, and was installed pastor of this church, January 4, 1826. He was a son of Ebenezer Fitch, D.D. the first president of Williams College, and was born June 26, 1799. He entered Williams College at the age of fifteen, graduated in 1819, and entered the Theological Seminary at Princeton the same year, graduating therefrom in 1821. Among his ancestors were many professional men, and Mr. Fitch himself possessed literary attainments of a high order. After serving as pastor of a church in Cherry Valley, N. Y., for three years, he was invited to return to Massachusetts in 1825, with the expectation of filling a vacancy in one of the larger towns. Finding the position had been filled before his arrival, he accepted, after a short time, the call to this church. The installation sermon was given by Rev. Dr. Wisner, of Boston. He labored here for six years, and his efforts were highly successful. His fidelity was appreciated, his reputation in the town was high, and his memory is held in grateful remembrance. During his residence here he delivered, December 4, 1826, a Century sermon which was printed and has become a valuable

record of the early history of the church and town. To this sermon the present writer is indebted for many of the facts presented in this paper.

Mr. Fitch was dismissed May 1, 1832, principally on account of some differences of feeling among the parishioners, and many of those who had become interested in religion under his ministration united with the newly formed Methodist church at that time. After filling several other positions, he became pastor of the Presbyterian church at Mt. Vernon, Indiana, in 1851, and of the Presbyterian church at Frankville, Iowa, in 1856. He resigned that office to enter the army as chaplain, May 5, 1861, but lost his health in the service and died while at home on a leave of absence, May 3, 1863, at Evansville, Indiana.

The sixth pastor was Rev. Elijah Demond. He was born at Rutland, Mass., November 1, 1790, graduated at Dartmouth College, in 1816, and at Andover Seminary, in 1820. After serving at the churches at West Newbury and Lincoln, Mass., he was installed pastor of this church, October 31, 1832. Although remaining in Holliston but three and one-half years, Mr. Demond must have performed faithful work, as twenty-nine persons were added to the church during his pastorate. He was dismissed by council, April 11, 1836. He afterwards preached in several other towns in this State, and passed the last years of his life at Westborough, where he died July 20, 1877, in his eighty-seventh year.

During Mr. Demond's pastorate the subject of warming the meeting-house again came up for consideration. According to the ancient custom, the only source of external heat up to this time had been the foot-stoves which were brought from the homes and were replenished at noon at the houses near-by. "In 1829 the subject had been agitated and a committee appointed to report upon the best method. But at the next meeting, the town first 'voted to accept the report of the committee relative to the best method of warming the meeting-house,' and then 'voted not to warm the meeting-house at all.'" But in 1833 a vote was passed to warm the house, and a committee was "authorized to procure a stove or stoves and place them in the meeting-house at their discretion, and that the funnel of said stove be extended through the roof of the meeting-house." There was decided opposition to this innovation. On the first Sunday after the stove was put in, one of the leading opposers of the change came out of the meeting-house bitterly complaining of the headache which the heat of the stove had caused him. But the laugh was turned upon him when it appeared, that, as the day was mild, no fire had been lighted."

In 1835 occurred the decease of Miss Elizabeth Prentiss, a daughter of the second pastor of the church. She lived for the purpose of doing good and

was truly "an excellent woman;" and among her benefactions was her methodical plan of assisting young men to prepare themselves for the ministry.

In the year 1836, the parochial business which had always been conducted in a town-meeting, was formally separated and a new organization was formed including only such as wished to join it.

Rev. John Storrs born in Mansfield, Conn., Sept. 6, 1801, was the next minister. He graduated at Middlebury College in 1824, afterwards studied theology and was ordained at Barre, Mass., in 1829. He afterwards settled at Norwich, Conn., before coming to Holliston, and was thirty-five years of age when installed here, December 20, 1836. The installation sermon was given by Rev. Joel Hawes (afterwards D. D.) of Hartford, a native of Medway, Mass., and one of the young men who had been encouraged and assisted by Miss Elizabeth Prentiss, before mentioned. This sermon was printed by a vote of the church.

Mr. Storrs labored diligently during the six years of his ministry and thirty-six new members were added to the church. He was dismissed November 8, 1842. Afterwards he filled some other stations and then settled in Winchendon, Mass., in 1849, as pastor and died there in May 1854. The interest felt in him by his former people in Holliston was evinced by their request to print his funeral sermon at their own expense.

The eighth clergyman who had charge of the church was Rev. Timothy Dwight P. Stone, born at Cornwall, Connecticut, about 1811, the son of Rev. Timothy Stone, and adopted son of Rev. Ebenezer Porter, D.D., professor in the theological seminary at Andover. He graduated at Amherst College in 1834, and afterwards studied divinity at Andover. This was his first parish, and he was ordained here March 1, 1843, Rev. Dr. Leonard Woods, of Andover, preaching the sermon. Like his predecessor, Mr. Stone served six years and had the satisfaction of witnessing substantial additions to the church during his pastorate. Impaired health led him to seek a dismissal in 1849, and his ministry terminated on the second day of March. He then became chaplain of the State Reform School at Westborough, was afterwards principal of the State Normal School of Connecticut, and later a teacher at Albany, New York.

Rev. Joshua T. Tucker (afterwards D.D.) follows next in the line of ministers. He was the son of Joshua Tucker, of Milton, Massachusetts, where he was born September 20, 1812. He came from old Puritan stock, being a descendant of Robert Tucker, who lived in Weymouth in 1639. He fitted for college at Phillips' Academy, graduated at Yale in 1833, and pursued his professional studies at Lane Seminary, Cincinnati. After ordination in the State of Illinois in 1837, he served as missionary and pastor in Illinois and Missouri until 1848, and also as an editor at St. Louis from 1846 to 1848. He was installed the ninth pastor of this church June 6, 1849, Rev. William M.

¹ Historical Discourse at Celebration of One Hundred and Fiftieth Anniversary of the Formation of the Church, by George M. Adams, D. D.

Rogers, of Boston, delivering the sermon, and the venerable Dr. Ide, of Medway, giving for the third time the charge to a Holliston pastor. "At the commencement of his ministry about 150 families," says Dr. Adams, "were connected with the congregation, and the church numbered 174." A period of great religious interest occurred during his pastorate, and at its close the church had increased to 409. Many young men have gone forth from this church during its history as missionaries and pastors; but during Dr. Tucker's years of service there was an unusually large number. Edward B. French, George F. Walker and the three brothers, Lyman, Elijah and Calvin Cutler (sons of Amos and Sarah Cutler) were all ordained to the work of the ministry during his time.

Dr. Tucker visited Europe on account of his health in 1859, and during the five months of his absence the pulpit was supplied by Rev. William M. Thayer, of Franklin. It was at this time that the meeting-house was raised, rooms were arranged in the basement and an addition built at the west end for the accommodation of the organ and choir. Then the house was again dedicated, December 2, 1859, Rev. Dr. Andrew L. Stone, of Boston, preaching the sermon.

Dr. Tucker was a man of much ability, both as a preacher and a writer, and many of his sermons and other literary compositions have been published. While here, he was associate editor of the *Boston Recorder*, a denominational paper well-known at that time and now merged in the *Congregationalist*.

Dr. Tucker was much interested in the history and antiquities of the town, and among his discoveries was one which he thus describes: "One day when I was in the village tin-shop, my eye was caught by an unusually shaped vessel lying in the corner, on a pile of old refuse, which I picked up and examined. It was a flagon of perhaps three pints' capacity, bearing this inscription: 'The gift of Mrs. Dorothy Ware, late of Sherborne, to the church in Holliston, 1745.' The workman stated that some one had brought it in and sold it and that he should melt it up for solder, as it was a much purer metal than could now be got for that purpose. I purchased it of him at his own price, and retained it as private property." This tankard is said to be now in the 'possession of the Worcester Society of Antiquity.

Another pewter flagon was found in a distant town, the owner having purchased it of a tin-peddler nearly fifty years ago. Its existence having become known to persons here it was purchased and is now in the possession of John M. Batchelder. It is inscribed, "The gift of the town of Sherbourn to the church in Holliston, a memorial of friendship, Anno Dom. 1728."

The condition of Dr. Tucker's health obliged him to ask for a dismission in 1867, and he gave a farewell discourse on the 31st day of March. This sermon was printed and contains many facts of historical

value, relating to the church. Although he terminated his duties at that time, the formal act of dismission was not performed until the following November, by the same council which ordained his successor. He afterwards served as pastor of the Second Congregational Church in Chicopee, for about ten years, and has, since 1877, devoted his time to literary work. He has resided in Dorchester and in Andover, Mass., and is at present in the latter town.

Rev. William H. Savage was the tenth pastor of this church. He was born in Woolwich, Me., and graduated at Bowdoin College in 1858. He became Professor of Mathematics in Delaware College in 1859. He enlisted in the Seventeenth Maine Regiment in 1862, and was appointed captain of Company A, serving in the Army of the Potomac. He afterwards studied divinity at Andover, and was ordained minister of the church at Holliston, November 7, 1867. Rev. Professor Park, of Andover, delivered the sermon, and Dr. Tucker gave the address to the people. Mr. Savage's pastorate continued but little more than two years, and was the shortest of any of the ministers of this church, whereas Dr. Tucker's was the longest since the time of Mr. Dickenson. Substantial additions were made to the church, however, forty-one new members being admitted, one of whom, F. A. Warfield, soon commenced preparation for the ministry, and has since been pastor of Union Church, in Boston. He is now at Brockton, Mass.

Late in the year 1869, on account of the health of himself and family, Mr. Savage asked for a dismission, which was granted December 30th of that year. He afterwards served as pastor of the Congregational Church in Jacksonville, Ill., and of the Unitarian Church in Leominster, Mass. He is now in the Unitarian Church at Watertown, Mass.

He was succeeded by Rev. Henry S. Kelsey, who was installed October 13, 1870, Rev. Jacob M. Manning, D.D., of the Old South Church in Boston, preaching the installation sermon.

"Mr. Kelsey was born at Evans Mills, Jefferson County, N. Y., graduated at Amherst College in 1855, and studied theology at the seminaries in New York City and East Windsor, Conn. Before entering the ministry he taught several years in Amherst College, and was professor in Beloit College, Wisconsin. He was ordained at Granby, Mass., in October, 1863, and installed at Rockville, Conn., in 1866."

In the year 1872, at the suggestion of Mr. Kelsey, the new parsonage was built—in part by subscription and in part by a portion of the Eames Ministerial Fund—and the deed was made to the trustees of that Fund. This bequest was made by Captain Aaron Eames, a member of the church and a resident of the north part of Holliston (now within the bounds of Ashland), who died about 1824. His farm and other property, to the amount of seven or eight thousand dollars, were given "to the Parochial part of the town," for the support of evangelical preaching. The

first trustees, chosen in a town-meeting in September, 1824, were Captain Samuel Bullard, Captain Abner Johnson, Dr. Timothy Fisk, Mr. Charles Marsh and Mr. James Cutler. They were directed to "draw a petition requesting the General Court, at their next session, to incorporate them into a body politic for the purpose mentioned above." Vacancies in this board are filled by vote of the parish.

Mr. Kelsey remained but a few months longer than his predecessor. Having received an invitation from another church, he asked to be released from his engagement here, and was dismissed March 6, 1873. He was installed at Woburn, Massachusetts, soon after, and has since acted as pastor of a church in New Haven, Connecticut.

The twelfth minister was Rev. George M. Adams (afterwards D.D.). He was installed September 11, 1873, Rev. Edmund K. Alden, D.D., of South Boston, delivering the sermon. Rev. Dr. Tucker, Rev. Mr. Kelsey and Rev. Dr. Dowse, of Sherborn, took parts in the ceremony, the latter assisting for the fifth time in settling a pastor over this church. Dr. Adams was born in Castine, Maine, was educated at Gorham Academy, Gorham, Maine, and at Bowdoin College, where he graduated in 1844. He has been for several years a member of the Board of Examiners of that college. He studied theology at Bangor, Maine, Halle and Berlin, Germany, and Andover, Massachusetts. He was ordained at Conway, Massachusetts, September 18, 1851, and was installed pastor of the Congregational Church in that town. He remained there until 1863, when he became pastor of the North Church in Portsmouth, New Hampshire, serving in that office until 1871. He then made an extensive tour in the Holy Land with his family. After his return he was installed pastor of the church in Holliston, as above noted.

In 1852 he married Miss Sarah Hills Crosby, of Bangor, Maine, who died in 1859. In 1862 Miss Louisa Lord Dana, of Brookline, Massachusetts, became his wife. Dr. Adams is a very able man and possessed the respect and esteem not only of his own people, but of all the inhabitants of Holliston; and it was with great regret that they learned of his decision to withdraw from the parish and the town.

He served for twelve years on the School Committee of this town, much of the time as chairman; and his removal was a great loss to the cause of education. He was also one of the trustees of the Public Library from its foundation until the year 1889; and his portrait still looks upon the scene of his labors there, in which he took so much interest. Dr. Adams was dismissed from the care of this church April 1, 1889, but continued to supply the pulpit until May 1st.

Of his writings there have been printed an historical discourse delivered July, 1871, at the two hundredth anniversary of the North Church, Portsmouth, New Hampshire; and an historical discourse delivered at the one hundred and fiftieth anniversary of the Congregational Church at Holliston.

Dr. Adams has, since his removal, resided at Auburndale, Massachusetts, and Castine, Maine.

In July, 1890, the church and the parish each voted to invite Rev. Frank I. Wheat, of Franklin, N. Y., to settle here as the pastor. He was ordained and installed the thirteenth pastor by a council of clergymen of this Conference, September 11, 1890. Rev. A. E. Dunning, D.D., of Boston, delivered the sermon, and Rev. L. R. Eastman, of Framingham, Rev. Dr. G. M. Adams, the predecessor of Mr. Wheat, and Rev. Dr. Dowse, of Sherborn, were among those who took parts in the service. The fine music added much to the interest of the occasion. It was rendered by a large choir, under the direction of Mrs. S. C. Stoddard, musical director, Miss M. S. White, organist, and Mrs. C. F. Thayer, soloist.

Mr. Wheat was born in Franklin, N. Y., in 1862. He was educated in the schools of the town, in Williams College and Boston University, where he graduated in 1889. He studied theology also in Boston University and graduated in June, 1890. While a student he served as pastor of a church in North Beverly, Mass., for two years. He is the youngest pastor ever installed in this church.

A Society of "Christian Endeavor" is connected with this church and numbers about fifty members. The Sunday-school was first permanently organized during the pastorate of Rev. Josephus Wheaton. Deacon Timothy Rockwood was the first superintendent and the number of scholars was between forty and fifty. The first meeting-house was a very plain structure, without steeple or spire, and had a strong resemblance externally to a country school-house of the olden time, except that its dimensions were greater. "In the year 1787 the meeting-house was enlarged according to the following votes:—'Voted that there be an addition made to the meeting-house by putting fourteen feet into the middle.' 'Voted to build a Porch in the front of said house with two pairs of stairs in the same to go into the Galleries.' The gallery stairs up to this time had been in the audience-room, at each side, about one-fourth the distance from the rear of the church to the pulpit. It was voted to have the house painted inside and out, the outside to be an orange color, the inside to be a stone color. It was also 'Voted to appropriate the two seats in the front Gallery, on the Women's side, to the use of the singers.' 'Voted that Lieut. Josiah Hemenway, Sylvanus Johnson, Ensign Nathaniel Johnson, Ebenezer Littlefield and Isaac Foster be Quiristers.' These votes contain the first reference I have found to singing in the meeting-house in either town or church records."¹

When the new church was built in 1823, a bell of 1600 pounds weight, cast by Holbrook, of East Medway, was placed in it; and this was the first church bell in town. The inscription on the bell reads: "I

¹ George M. Adams, D.D., sermon before quoted.

to the church the living call, and to the grave do summon all."

When this building was dedicated, Mr. Wheaton says in his sermon, "There is a propriety therefore, in erecting suitable houses of worship when circumstances require. It is not necessary to wait until the house is ready to crumble into ruins. . . . In such circumstances, when it becomes old and inconvenient, it is proper that a new house should be erected and in a style corresponding with the dignity of the purpose for which it is designed." The church clock on the interior gallery was the gift of Nathaniel Johnson, Esq.; the tower clock was purchased by the society.

The old meeting-house was taken down and the materials sold in parcels at auction. The broad pine panels which formed the front of the singers' gallery were bought by the late James White, father of William White, and were placed on the side of a room in a new house which he built about that time. It is said that the central panel had painted on it the date of the completion of the meeting-house, 1728, the date of its enlargement, and a much earlier date, probably that of the first settlement of the town. "But in an evil hour for our interests," says Dr. Adams, "an over-tidy servant scrubbed off the time-worn figures and left the panel clean."

Mr. White also bought the broad door-stone of the church, some five and a half feet square, and cutting it in the middle, made two stones for the entrances to his house.

The meeting-house was refitted and painted in 1845, and in 1850 it was repaired and enlarged by cutting it in the middle and inserting a piece of sufficient length to allow the building of four additional pews in each row, or twenty-four pews in all. The chandelier was the gift of Elial Littlefield.

Since the remodeling of the edifice in 1859, already noticed, the church is in the highest degree convenient for every religious and social meeting which it is desired to hold there.

In the year 1831 public worship was commenced in the Town Hall by persons of the Methodist faith, and a church was organized, Rev. Jonathan Cady being the first minister. "From an early date," says Rev. Dr. Dowse, "there were some citizens of the town who belonged to this denomination, and these were increased by the influx of population from abroad, so that it was deemed expedient to organize a separate religious enterprise. The society was small and feeble at first, but it has grown in numbers and wealth until it long since has not only become a fixed fact, but a great moral and Christian force in the community."

The first sermon preached by a Methodist minister was delivered by Rev. Mr. Bonsil in 1794, in the barn of Mr. Ebenezer Cutler, and others followed occasionally; but some persons had previously attended services at Hayden Row in Hopkinton, near the borders

of Holliston. The meeting-house was built here in 1833 and dedicated September 18th of that year. It was repaired and remodeled in 1874 and rededicated February 3, 1875. The society was incorporated, according to law, December 27, 1850. There have been altogether thirty-four pastors to this church, whose times of service have varied from a few months to three years. The present incumbent is Rev. John H. Emerson. The present parsonage, which is convenient to the church, was purchased in 1850; but there was a parsonage before that time, on Norfolk Street, built about 1848, chiefly through the efforts of Jonathan Cutler, Esq. There has been a Sabbath-school connected with the church from the beginning. It then numbered fifty scholars and the first superintendent was I. G. Rawson. The superintendent now, in 1890, is D. C. Mowry and nearly 150 persons attend it. An auxiliary society for Christian effort is the Epworth League, consisting of fifty-five members in its adult branch and thirty-five in the junior branch.

May 31, 1836, sixteen persons were legally organized as the Universalist Society of Holliston. This society at first held its services in the town-hall. Two years after its organization a meeting-house was built, which was dedicated January 9, 1839. In 1854 it was raised up and stores were built under it. The society was served by seven ministers during the twenty-four years of its regular existence which terminated in 1860. Services have, however, been held since that date, and are still conducted in 1890. The Baptist Society occupied their meeting-house from 1864 until the close of the year 1867, when their own vestry was ready for use. In 1867 the Universalist Society voted to sell their meeting-house, and it came into the possession of the Catholic Society. They held it until 1870, when it was moved away, and the land was used by the latter society as a site for their new church. The Universalist Society has lately been re-incorporated, and holds service every Sunday afternoon in Reform Club Hall, generally conducted by a clergyman from the Milford Church.

The Baptist Society was formed in 1860. It held its first public religious meeting in the town-hall on February 12th and the church was organized on the 28th day of the following August, a council being convened at that time. It consisted of nineteen members. The first preacher was Rev. J. D. E. Jones, of Worcester, and Rev. B. A. Edwards (1860) was the first regular supply. Revs. J. L. A. Fish, Geo. W. Holman, R. G. Johnson, A. A. Bennett, F. L. Sullivan, E. L. Scott and E. D. Bowers have followed him, and the present pastor, in 1890, is Rev. M. N. Reed, installed in 1889.

The society continued to hold services in the lower town-hall until 1864, when it hired and occupied the meeting-house of the Universalist Society until 1867. They commenced to build a new meeting-

house in 1866, and on December 29, 1867, the first service was held in the vestry. Work was continued on the house amid the difficulties incident to the beginning of a new enterprise, and it was finally completed, and was dedicated January 26, 1870. It is a commodious and tasteful building. The church and society are now well established and their future is promising. The Sunday-school was organized February 20, 1860, with nineteen members, A. G. Fitch being the superintendent. The membership in 1890 is 142, and the present superintendent is George W. Leland. A Society of Christian Endeavor is connected with the parish.

This church celebrated the thirtieth anniversary of its foundation on the 10th day of September, 1890. The event had been anticipated with pleasurable expectations, and they were fully realized.

"In response to invitations, past pastors, former resident members and the local members assembled in the main audience-room, together with the general public, to unite in celebrating the attainment of thirty years of church prosperity. The auditorium was finely decorated, a motto '1860-1890' being conspicuously displayed on the wall. An address of welcome was given by the pastor, Rev. M. N. Reed, a most graceful and fitting prelude to the exercises of the day. Rev. A. A. Bennett, of Japan, and Rev. E. D. Bowers, of Sharon, represented the former pastors, and gave pleasing reminiscences of their connection with the church, and congratulations at the present and prospective prosperity of the society."¹ Letters were read from other pastors and friends. Rev. A. A. Bennett presented the church with portraits of Rev. F. L. Sullivan, Rev. E. L. Scott, Rev. E. D. Bowers and Rev. M. N. Reed, the gift of W. H. Clark. These, in addition to the portraits already possessed by the church, make the collection complete. A fitting response was made by George W. Leland, in behalf of the church. A social evening was passed in the vestry, where old friendships were renewed, and memories of former days were recalled. The music was fine, and appropriate to the occasion, under the direction of E. W. Colburn. Prof. G. F. Rice presided at the new and excellent organ, which had recently been obtained. Altogether it was a red-letter day for this prosperous society.

An Episcopal society was formed in Holliston in 1864, Rev. Benjamin T. Cooley being the first rector. When public services first commenced, there was but one communicant in the town; but after five years or a little more, when the services were discontinued, there were about forty members. They worshipped in the lower town-hall. The society purchased of the town a lot of land on Mt. Hollis, and laid the foundation for a church, but they never reached a condition when they could erect a building. In the great fire in May, 1875, the records of the society, together with

a silver communion service, the gift of Bishop Huntington to the church, were destroyed. The parish still has a legal existence, and the meeting of the wardens and vestry is held annually. Occasional services are also held.

Catholic services had been held in the town-hall for a considerable time, conducted by priests from neighboring parishes, when in the year 1870 a new parish was formed, and Rev. R. J. Quinlan was appointed rector. He has remained in that position to the present day, and a large church has been gathered from the population of this and the neighboring towns. As before stated, this society purchased the old meeting-house of the Universalist Society; and in 1873 they commenced the erection of a church-building on that lot. Services were first held on Christmas of that year, in the vestry, before the completion of the church. It has since been completed and is a substantial edifice, well adapted to the wants of the parish. A Sunday-school, of which the rector is superintendent, is connected with the church. Rev. Mr. Quinlan has for several years been a member of the School Committee.

The permanent physicians of Holliston have been few in number. During many early years of its history the people were probably served by physicians from neighboring towns, and after 1772, Dr. Jonathan Tay (familiarily called Dr. Toy), who lived in Sherborn, not far from the Holliston line, included this town in his circuit. He lived until 1827.

The first regularly educated physician who settled here was Timothy Fisk, M.D., a graduate of Harvard College in 1801. He was born in Holliston, November 3, 1778, the tenth child of David and Sarah (Bullard) Fisk, and a descendant of John and Lydia (Adams) Fisk, who came from Watertown to Sherborn (now Holliston) soon after the year 1700. Dr. Fisk commenced the practice of medicine in his native town, and for about sixty years was the valued and trusted physician of a large number of inhabitants. He was a man of the highest character and a valuable member of the community. "For forty years," says Walker, "he was a member of the Congregational Church and one of its most faithful supporters. He died suddenly in his chair, dressed as for his usual duties, December 17, 1863, from congestion of the lungs. His funeral was largely attended, and his name will live in grateful and endeared remembrance." He married Rhoda, daughter of Isaiah and Abigail Daniels, of Medway. They had five children, of whom two survived their father, Frederick and Ferdinand.

Sewall G. Burnap, M.D., was also a prominent physician and citizen of the town. He was born in Temple, N. H., March 12, 1802, studied medicine at Dartmouth College and graduated in 1826. He settled at once in Holliston and practiced here for forty-eight years. He was an excellent physician, and possessed the esteem and attachment of

¹J. F. Fiske, in the *Milford News*.

his patients. He had also a good standing among his brothers in the profession, and at one time served as president of the Middlesex South District Medical Society. He was also several times appointed in his turn a counsellor of the Massachusetts Medical Society, and occupied that place at the time of his death. To him the present writer is much indebted for counsel and advice in the earlier years of his practice.

Dr. Burnap was a prominent and useful citizen and highly respected by his townsmen; was for many years a member of the Congregational Church, and was a director of the Holliston Bank from its formation. He died October 16, 1874. Not long after coming to this town he was appointed postmaster, and held that office for sixteen or seventeen years, using the small building attached to his residence for that purpose. He married, in 1832, Betsy Brown, of Holliston, who died in 1851. He afterward married Elizabeth S. Blanchard, who still resides here. He left no children.

Hiram Lake, M.D., has been a physician in Holliston for forty-four years and has enjoyed a large practice. He was born at Rehoboth, Massachusetts, August 25, 1820, and was educated in the public schools of that town and in the academy at Providence, R. I., where he was prepared for admission to the Medical College. He graduated in medicine at the college in Cincinnati, Ohio, in 1846, and settled here in the same year. He is a genial man, a good citizen and has identified his interests with those of his adopted town. In addition to his medical practice, in which he has secured the regard and good will of his patients, Dr. Lake has filled many offices of a public character. He has for years been a trustee of the Methodist Episcopal Church; treasurer of various temperance societies; chairman and secretary of the Board of Health for twenty years; and treasurer of the lodge of F. and A. Masons. He is a member of the Lodge and Encampment of the I. O. O. F., and is a trustee and auditor of the Holliston Savings Bank.

Charles C. Jewett, M.D., was born in South Berwick, Maine, in November, 1831, settled in Holliston as a physician about 1854, and practiced here about seven years. July 2, 1861, he enlisted in Company B, Sixteenth Regiment, Massachusetts Infantry Volunteers, and when the regiment was completed, he was made its surgeon. He afterwards served as surgeon-in-Chief of the Third Brigade, Third Division, Second Army corps. Returning in 1864, he remained for a while in Boston and then resumed practice in Holliston. But after a short residence he removed to Brooklyn, N. Y., and died in that city.

Charles E. Spring, M.D., was born in Grafton, Vt., November 19, 1842, and came to this town as a physician in 1874. He was educated in the common schools and in Burr & Burton Seminary, at Manchester, Vt., and graduated at the Albany Medical College in 1864. He was then immediately appointed an

acting assisting surgeon U. S. A., and was stationed for about one year at Hampton Hospital, Va. After the close of this service he settled as a physician at Jamaica, Vermont, where he remained until he removed to Holliston. While at Jamaica he married, in January, 1867, Viona M. Adams. They have had five children, of whom four are living. Dr. Spring has been highly successful as a physician, and holds a high rank as a citizen. He represented this district in the Legislatures of 1888 and 1889, has been a member of the Board of Health during nearly the whole time of his residence here, a member of the School Committee for about fourteen years and secretary of that board for a portion of that time. Failing health admonished him to seek rest and recuperation in his native State, and he passed there the whole of the summer months of 1890, his absence being greatly regretted by his numerous friends in this town. In September of that year he returned home and resumed practice to a limited extent.

Dr. Spring died October 25, 1890, since the above was written.

Dr. Andrew J. Stevens was born in Haverhill, Mass., graduated at the Harvard Medical School, and settled in Provincetown, Mass. After remaining there about three years he removed to Holliston, about the year 1874, and practiced here for some thirteen years. He then removed to Malden, Mass., where he now resides. He was succeeded by Dr. Edward Roth, who remained for about one year, and transferred his practice to Dr. F. Grant Atkins, in September, 1888. Dr. Atkins, who is here in 1890, was born in Devonshire, England, in 1842. He was educated at Harrow and at King's College, London; studied medicine at London and Edinburgh, and graduated at the latter college in 1869. He is a member of the Royal College of Surgeons of London, and a licentiate of the London College of Physicians. After practicing in Derbyshire, England, he came to this country, in 1888. He is married and has one son.

Dr. George W. Stearns graduated in Philadelphia in 1851, and first came to Holliston in 1881. He has practiced here for five or six years, having lived elsewhere a portion of the intervening time. He is here and in practice, however, in 1890. In the summer season he resides and practices in Cottage City, Mass.

Dr. I. C. Pope was born in Westborough, Mass., in 1855, and was educated in the public schools and in Worcester and Wilbraham Academies. His medical education was obtained at Jefferson Medical College, Philadelphia, where he graduated in 1888. After practicing in Waltham, Mass., more than a year, he came to Holliston in February, 1890. He was married, in 1880, to Miss Nellie V. Hall, of Milbury, Mass.

There are no other physicians who have lived here for any great length of time. Dr. George Wilkins

was here for three years, and died May 2, 1826, aged thirty-two years, according to an inscription in the Central Cemetery. Drs. Heard, McClure, Page, Hitchcock, Barker and perhaps others were in town at different times during the past fifty years, but for short periods only.

For many years one or more members of the dental profession have been present in Holliston. Dr. G. L. Cooke, of Milford, came here every week for a long time, having an office in the town; and Dr. Hayes was settled here for a number of years. The only dentist at the present time is Dr. E. C. Stoddard, who has been in practice in Holliston for about ten years.

The legal profession has been represented by several practitioners; but of them, one only was long a resident of the town. George M. Woodward, Herman Bragg, George C. Travis, J. H. Ladd, W. A. Kingsbury (now judge of the District Court, at Framingham); and, in 1890, J. P. Dexter, a student of Henry Hogan, have been here at different times.

Rev. George F. Walker, in his article before quoted, says concerning Esquire Bullard, "The first and only lawyer who had a permanent residence in Holliston was Elias Bullard: He was born in West Medway, December 30, 1799. He received a common-school education, and was aided in preparing for college by the venerable Dr. Jacob Ide, of West Medway, and graduated from Brown University in the class of 1823. He studied law with Elijah Morse, Esq., of Boston, three years; was admitted to the bar, and came to Holliston, October 7, 1826, commencing the practice of his profession. In 1834-35 and in 1870 he was elected to represent the town in the Legislature, the last time having the honor of calling the House to order, as the senior member. In the practice of his profession he has an unusual record of justice, and his counsels have ever been those of pacification. He was willing to assist those in trouble at a loss of his own pecuniary advantage. Had his life been spared through the remainder of another year, to October 7, 1876, he would have completed half a century of the practice of his profession in Holliston. He died November 2, 1875. His funeral was largely attended by the citizens of the town, and from the surrounding towns. He was for several years before his death a consistent member of the Congregational Church."

Esquire Bullard, as he was called by every one, was one of the most prominent and respected citizens of Holliston in his day, and during his life he was chosen to fill all the offices in the gift of the town. He originated the plan of a town library.

SCHOOLS.—In less than seven years after incorporation the town granted money for the support of a public school, the education of the children being considered nearly or quite as important as the establishment of church privileges. In 1738 three districts were formed, the North, West and Central, and it was voted to build a school-house in each district, and that

£100 be assessed upon the inhabitants to defray the cost, and that each man have liberty to work out his part of the assessment. May 27, 1754, there was "Voted, Ten pounds For a Reading and Righting school This present year." In 1765, £25 were appropriated for public schools, and were divided among the three districts. "The first school-houses were not magnificent in their dimensions or appointments. Those in the north and west were fourteen by eighteen feet, with 'seven-foot posts,' and the one in the centre, sixteen by twenty feet. They were doubtless large enough to accommodate the scholars of those days, and being warmed in winter by fires in large open fire-places, the ventilation must have been good, with little danger of a too high temperature."¹

In 1801 eight school districts were formed and \$334 were appropriated for the support of the eight schools. At the March meeting in 1807, a committee was chosen to have the general care of the schools, consisting of Dr. Timothy Fisk, Lt. Elijah Watkins and Capt. John Haven²; \$500 were granted for schools. The appropriation for school purposes continued to increase with the increasing number of scholars. In 1830 it was \$700, in 1875 it was \$6000, and of late years \$6800 annually. In 1846 the town took possession of the property of the school districts.

The number of schools has gradually increased until, in 1890, there are, besides a high school, five grammar, one intermediate and nine lower schools, five of which are not graded. F. B. Gamwell is the superintendent of schools, and in his report presented in March, 1890, he recommends a concentration of schools by the conveyance of scholars, as allowed by law, to central points where the benefits of graded schools can be enjoyed by all the children of the town. This plan has been adopted by some towns in this State, to the manifest advantage of the pupils, while with judicious management the expenditures required of the town have not been increased.

A private high school was commenced in the town as early as 1831, under William Gammel, teacher. He was succeeded by Daniel Forbes, in 1833; Pardon D. Tiffany, in 1834, and Edward Stone, in the winter of 1835-36. The school was not kept continuously up to this time, but generally for one or two terms in a year, the fall term having the largest attendance.

In the spring of 1836 Rev. Gardner Rice was induced to take charge of the school for one term. So great was his success that by the wishes of all he continued to occupy the place as principal for about eight and one-half years. When he commenced his labors the total attendance was seventy-six, but it soon began to increase, and continued to increase until the number of pupils in 1842 was 361, which was the largest number in any year. The aggregate attendance during the whole time of service of Mr. Rice and his assistants was 2140, comprising not only

¹ Rev. Geo. F. Walker in Drake's "History of Middlesex County."

residents of Holliston, but of many surrounding and some distant towns. In 1836 Master Rice changed the character of the school somewhat by introducing the manual labor system, and, in 1837, the name of Holliston High School was changed to "Holliston Manual-Labor School." The success of this institution was such that, in 1839, it took the name of "Holliston Academy," and the following announcement, made at that time, will show the general character of the institution and the principles upon which it was conducted:

"The object of instruction at this institution is not only to communicate a knowledge of facts, but to fit the pupil for the duties of life, by developing and disciplining the powers of the mind, enabling it to think and act for itself. The course of study is designed to be systematic and extensive, including all those branches which are requisite to prepare the pupil for the common business of life, or for a higher course of collegiate or professional studies.

"Since morality and virtue are essential to the peace and prosperity of this or any other institution, every reasonable precaution will be used to preserve and maintain in all departments of the school a strictly moral state of feeling.

"The discipline of the school is designed to be strictly parental, and in the administration of this discipline direct appeals to the better principles of the heart will be resorted to, rather than severe and disgraceful punishment. If, however, the conduct of a student render it evident that he is not susceptible of such influence, he will immediately, and if possible without unnecessary disgrace, be returned to his friends. Every effort will be given to those gentlemen and ladies who are calculating to teach, both in obtaining schools and in preparing them for their schools."

Master Rice secured the affection and respect of his pupils and aroused their enthusiasm, and they always looked back to their school-days under his tuition with the most pleasant feelings, as was shown in the year 1875, when some two hundred of them surprised him by a visit to his home in Shrewsbury, Mass.

The town-hall was used as a school-room for the High School until the year 1851, and the general appreciation by the town of the labors of Mr. Rice was demonstrated by a vote passed September 23, 1844, by which he was "exonerated from paying any claims which the town hold against him, incurred by his use of the Town-Hall for a High School." Mr. Rice retired from the academy in 1844.

Several other teachers followed,—Messrs. Cutler, Hoyt, Peterson, Gleason, Graves, Sears, Washburn, Parker, Pond, Kingsbury, Choate, Stiles, and Baker,—and the school was continued. In the year 1850 Deacon Timothy Walker, who had removed from Medway to Holliston, erected a building on the south side of Jasper's Hill for the use of this school, the land, a lot of nine acres, being provided by the

subscriptions of individuals. It was called Mt. Hollis Seminary, and that hill has since been generally known as Mt. Hollis. It was dedicated in June, 1851, the address being delivered by Rev. J. P. Cleveland, D.D., then of Providence, R. I. Rev. George F. Walker, now of Hampden, Mass., a son of Deacon Walker, was the principal at this time. In 1856, when Dr. I. H. Nutting had the charge, the town, through a committee, made arrangements with him to receive the pupils of the town qualified to enter a high school; and this contract was continued until the town purchased the Seminary building and established a public high school there. The building was destroyed by fire October 25, 1871. Another high school-house was built on the same lot in 1874 and has been occupied to the present time. The principal for 1889-90 was Carl E. Holbrook, who, for the purpose of continuing his studies, resigned his position at the close of the spring term of 1890, to the great regret of the School Committee and the citizens. C. H. Marshall has been appointed to succeed him.

We now return to the civil history of the town. Dr. G. M. Adams, in his historical discourse, alluding to the early days of the colony, remarks: "We can better understand the changes which a century and a half have wrought, and can better enter into the experience and life of the good men who laid the foundations for us, if we glance at the condition of the country in 1728. The number of inhabitants in Holliston did not, probably, exceed one hundred and fifty. There was no village. About thirty farm-houses were scattered all over the town. The towns of Milford, Natick and Upton were not yet incorporated. There was no church in either of those places, nor in Southboro' nor Grafton. Worcester, in 1718, had 'fifty-eight humble dwelling-houses,' some of which were furnished with windows of diamond-glass and others were lighted through oiled paper. There was probably no academy nor High School in Massachusetts. There were three colleges in the country,—Harvard, Yale and William and Mary's College, in Virginia. Massachusetts had about one hundred and seventeen thousand inhabitants, a small proportion of what Boston has now. In what is now the United States there were, besides Indians, six hundred thousand inhabitants, less than the present population of Philadelphia. But of course there were then no United States. There were ten English Provinces along the Atlantic coast; Florida was Spanish, Louisiana, including the valley of the Mississippi, belonged to France. Benjamin Franklin was struggling to earn his living as a printer in Philadelphia; Washington and Lafayette were not yet born." And Dr. Edmund Dowse, in his centennial address, says: "This condition of things in the homes and business continued essentially the same for a long period. The people were engaged as a whole in reclaiming and tilling the lands. The shoemaker, blacksmith, carpenter and storekeeper were regarded only as adjuncts

to society. It was convenient to have just enough mechanics and tradesmen to meet the wants of the people, and they desired no more. Even these did not pretend to live by their trades, but in addition cultivated their lands. Under these conditions the population continued to increase slowly from year to year, and the outward circumstances of the people to improve. At the end of the first century the population had grown from one hundred to thirteen hundred.¹ During this period the town was healthy, with one exception, of short duration. Between the 18th of December, 1753, and the 30th of January, 1754, a distressing and fatal sickness prevailed (called The Great Sickness), that resulted in the death of fifty-three persons, it being more than one-eighth of the population at that time. This sickness, both in its nature and cause, appears to have been involved in mystery. That it had a natural cause I do not doubt, but, as it was confined to the limited period of four or six weeks, having never appeared before or since, it does not militate against the healthfulness of the locality. The average number of deaths annually, during the first century, was seven. This includes the period of the great sickness." If we deduct the deaths from that epidemic, the average would not exceed six and a half. The same disease appeared in Sherborne about the same time, but its duration was greater, extending into the month of April, when there had been twenty-five deaths. In that town it was called "The Memorable Mortality."

This sickness occurred in Holliston during the ministry of Rev. Joshua Prentiss, and he appears to have observed it and to have taken notes of the symptoms in quite a scientific manner. A full record, taken from the notes of Mr. Prentiss, is given in Mr. Fitch's Century sermon.

This was a grievous blow to the young community. Many families were broken up entirely and the population was almost decimated. They were obliged to apply for assistance; and Tuesday, April 9, 1754, the following entry appears in the Journal of the House of Representatives of the Province: "A Petition of the Selectmen of the town of Holliston, representing the distressed circumstances of said town, by reason of the grievous sickness and mortality there, praying for the compassionate consideration of this Court, for the reasons mentioned. Read and committed to Captain Joseph Williams, Captain Ashley and Mr. Greenwood, to consider and report thereon." The report of the committee was accepted and the sum of twenty-six pounds thirteen shillings and four pence was granted, to be paid out of the public treasury to the selectmen, "and by them to be applied for the use and relief of such poor and indigent persons as may most need the same."

¹ Morse, in his "History of Sherborn and Holliston," says that the population was 1394 in 1809, 1782 in 1810, 2428 in 1850 and about 3100 in 1856. In 1890 it is 2650. In 1812 there were but thirteen houses on the main street.

As before intimated, the business relating to the church was, during many years, transacted in the same town-meetings in which the regular business of the town was conducted; but after fifty or sixty years a distinction was made. Then, all the legal voters were called to the town-meetings, while only those who paid a ministerial tax were called to the "town-meetings for parochial business." All the records were kept by the town clerk in the same record-book, until 1836, when a separate parish was organized, with its own meetings and records. It was also the custom for the ministers to receipt for their salaries in the town record-book, and these signatures are scattered through the records until the last one appears, April 1, 1829. The first town clerk was Captain John Goulding, who served ten years, from 1724 to 1734; and the last one is George B. Fiske, who is now filling his thirteenth year in that office. John M. Batchelder is the present town treasurer, and is serving his eleventh year in that capacity.

Until 1825 the town meetings were held in the meeting-house; but during that year a town house was built, the upper story of which was used for the town hall, while the lower story was occupied by the church for a parish hall. This house was situated on the Common, near the road and adjoining the cemetery lot. It was used for town and parish purposes until 1855, when it was sold and moved off. It was replaced the same year by the present town house, which was set farther back from the road. The lower hall in this building has been used for meetings of the various parishes and other societies. Edwin Payson, of Boston, was the architect, and S. & W. L. Payson the contractors for the new town house.

Aaron Phipps, afterwards deacon and treasurer of the church, and a superior man, was apprenticed to Dea. James Russell, a blacksmith; and during that time, 1747 to 1751, planted the magnificent elms in front of the Col. Whiting house. The large trees standing before the Congregational meeting-house, which were cut down in 1876 when the road was widened, were set out by the Rev. Mr. Dickenson, not far from the year 1800.

The French and Indian war occurred about the middle of the eighteenth century. We find no record of men who went to that war from Holliston, but probably there were a few. There were always adventurous spirits in every town who were ready for such expeditions.

It was not long after the cessation of those hostilities that the feelings of dissatisfaction with the mother country began to arise, which culminated in the war of the Revolution. When her oppressions became too onerous to be borne, this town was prompt in declaring its convictions. As early as 1768 a committee was chosen "to join with the committee of the Town of Boston, as well as with the committees from the several towns of the Province, in a convention, to be held at Faneuil Hall, in Boston, aforesaid, on ye 22d

of this Instant, in order that such measures may be consulted and advised as His Majesty's service and the peace and safety of this Province may require." They were evidently not then ready to throw off their allegiance to the Crown, but were resolved to maintain their rights and prepare for future contingencies, as the next vote, passed on the same day, will show: "To recruit the Town stock of ammunition by purchasing a barrel of gunpowder, one hundred French flints and one hundred and fifty weight of balls." March 5, 1770, it was voted "that we will not by ourselves, or any, for or under us, Directly or Indirectly, purchase any European Goods of those persons Termed Importers. . . . Neither will we have the Least Dealings whatever with any Country Shop Keeper who shall purchase any Goods of Said Importers, and that we will use the utmost of our Endeavor to Encourage and assist those applauded Merchants of the Town of Boston in their non-importation agreement, to whom this Town Vote their sincere and hearty Thanks for these Late Measures pursued by them for the Good of their Country, and that the moderator of this Meeting Transmit a Copy hereof to the Committee of Merchants in Boston."

"Voted that ye Town Clerk post up the names of the above S^d Importers at ye most public place in the Town."

This meeting was held on the day of the Boston Massacre. Henry Prentiss, a son of Rev. Joshua Prentiss, was an eye-witness of the scene and he wrote a long letter to his father, giving a graphic description of the same. It was found among the papers of Mr. Prentiss and is quoted in full by Rev. George F. Walker in his article.

May 23, 1774, the Town chose a committee of correspondence with Boston and the other towns in the Province. July 4, 1774, "voted to double the town stock of Ammunition." November 17, 1774, "voted to post up the names of all who shall sell or consume any of the East India Teas." At the annual town-meeting in March 1775, before proceeding to the election of Town officers, it was "voted that no man shall serve in any Town office or place wherever, who shall refuse or neglect to subscribe their consent to and compliance with the advice and association of the last Continental Congress and that they shall be treated with neglect." A similar vote was passed before the annual elections of officers in 1776, 1777 and 1779. The following instructions were given to Major Abner Perry when he was chosen representative to the General Court, May 20, 1776. After rehearsing the resolve of the last General Court, which requested towns to advise their next representative as to the support which they would give to Congress, in case that body should declare the Colonies independent of the Kingdom of Great Britain, they say: "To which the Inhabitants of the town of Holliston, Being Legally assembled, would humbly Reply (viz.) that the Said Honble. Congress are (under God) the

most Competent Judges of matters of such Vast Importance to these Colonies; We would therefore Refer it to their Wisdom, and do Solemnly Promise & Engage with our Lives and Fortunes to support them in the measure, if they, (whom we look upon as the Guardians of our Liberty) shall judge it to be best."

From year to year each representative was instructed by vote of the town to stand by the Continental Congress and the liberties and rights of the Colony. July 5, 1776, the day following the Declaration of Independence, the town voted to raise £11 to be paid to "Each man that shall Inlist to go as aforesaid, and do a turn for this town as a hired man." The Declaration of Independence is written out in full in the town records, as it also is in the records of Sherborn. January 5, 1778, the town voted their full approbation of the articles of confederation of the United States as "Sent to the said Town by the Gen^l Court of this State."

"But perhaps the most convincing evidence," says Dr. G. M. Adams, "of the thorough patriotism of the town is seen in the large sums of money which were voted and paid for carrying on the war. In the year 1776, the town granted four hundred pounds for the defence of the country. This was when all the other expenses of the town, including the Minister's salary, were less than two hundred pounds. It is recorded that at a town-meeting in September, 1776, "the Reverend Mr. Prentice, personally appeared and generously gave ten pounds to the town, towards defraying the charge that has arisen in this town by the present war." In 1777 the town granted for war expenses, one thousand one hundred and forty-nine pounds, all other town expenses being one hundred and seventy pounds. In 1778 the war appropriation was £2191. In 1779, currency had begun to depreciate, and the town granted for war expenses more than £4000, which was equal to about £2000 in silver. In 1780, currency was not worth more than one-thirtieth or one-fortieth of its nominal value, and the town appropriated for the war, seventy-two thousand pounds, which was still equal to about £2000 in silver. In 1781 the war appropriations were £24,750 old currency and £600 silver money, equal to about £850 in silver.

The names of the men from Holliston who served in the Continental army are recorded on various muster rolls in the archives of the State, and did time permit a thorough search, we could give very nearly the exact number. Col. Simeon Cutler served under Washington, and Col. Abner Perry, Maj. Jacob Miller and Capt Daniel Eames were conspicuous among the officers of that army. "They contended for the right, and they won and rejoiced in their achievements, but they had no conception of the great and glorious results as we see them to-day."

In 1780, September 4, the town met and voted for the first Governor of this State, and John Hancock received 39 votes and James Bowdoin two votes.

In 1790 the town first cast its votes for a representative to Congress. In 1791 nineteen persons and their families were warned to leave the town because they had moved into it without having obtained the town's consent. In 1795 the Minister's salary was first voted in the Federal currency, and it was \$266.67.

We now come to the commencement of an important era, the beginning of manufacturing industries which have been such a prominent factor in the prosperity of Holliston. Previous to 1793 there had been no manufacturers or mechanics in the township excepting those who, in a small way, supplied the immediate wants of the farmers and their families. And the farmers did not desire to have manufactures introduced, some of them even being strongly opposed to the plan.

But in that year Colonel Ariel Bragg began the manufacture of shoes. "He commenced business with forty pounds of sole leather and four calf-skins, from which he made twenty-two pairs of shoes, which he carried to Providence, R. I., in saddle-bags on horseback, with a bundle of hay behind him; and having disposed of his goods for \$21.50, returned and invested his gains in new stock. In 1800 and 1810 Hezekiah and Jonathan Bullard began business on a similar scale. In 1816 Deacon Timothy Rockwood began to manufacture goods and transport them to the Boston market in a horse-cart. In 1821 the names of Batchelder, Currier, Littlefield (who made fine shoes for ladies) and others were added to the list of manufacturers, all doing business upon small capital and transporting their goods and stock themselves in their one-horse wagons. It is said that Mr. W. S. Batchelder first endeavored to settle in Sherborn for this purpose, but was unable to purchase any land there for manufacturing uses, so much were the farmers opposed to new projects. He afterwards built up a large business in Holliston. A tannery at the West End and one at Chicken Brook, with currier's shops in different places, furnished the leather. Shoe-pegs were not in general use and steam hardly used at all in manufactures.

As the business increased, one of the events of the day was the inauguration, in 1828, of a line of two-horse baggage-wagons from the neighboring town of Milford to Boston, passing through Holliston and making two trips a week. On the first morning this new conveyance passed through the town, Mr. W. S. Batchelder and his workmen turned out to see it, and great was the outcry at the extravagance of Milford people, particularly of Chapin & Claffin, who owned the line; and Mr. Batchelder cried out, "Milford is getting proud, and when I can't take my shoes to Boston in my own team, I'll give up the business." He afterwards changed his mind, however, for he lived to carry on a business so extensive that it required a one-horse team all the time merely to take his goods to the railroad station, which was but a short distance.

As time went on many other persons set up the manufacture of shoes and boots, and Holliston became quite well-known in this business. There were ten large shops and several smaller ones. In 1874 it furnished employment for about six hundred persons and turned out goods to the value of \$1,000,000. Among them was Mr. John Batchelder, a brother of William S., who continued the manufacture even to the year 1889. He adopted and maintained a high standard and was distinguished for the excellence of his workmanship. No better boots than his were found in the market.

Hon. Alden Leland was, for many years in the business, and had during part of the time as a partner, Mr. P. R. Johnson, who still carries on the manufacture in the town. Mr. Leland began to make shoes in 1831, and was in active business for more than fifty years. He was also a prominent man in the affairs of the town. Born in Chester, Vermont, Nov. 30, 1807, his father, Capt. Nathan Leland, moved to Holliston, when the son was an infant, and the latter spent the remainder of his life here, where most of his ancestors belonged. Growing himself with the growth of the town, his interests were identified with it, and he received all the honors and duties which his town and his county could induce him to accept. He held every office of note within the gift of the town, was Representative in the Legislatures of 1838, 1842, 1848 and 1852, and was a member of the Constitutional Convention in 1853. He was State Senator in 1865 and 1866, and a member of the Governor's Council in 1875 and 1876. He was the first President of the Holliston Savings Bank, and at his death had been President of the National Bank for six or seven years. An active power in the town during its greatest prosperity, he did much to make that prosperity. He was a zealous member of the Congregational church, but in religion as in politics, he recognized the honesty of others with different beliefs, and won the confidence of all. He was twice married, first to Anna Temple, and second to Rhoda A. Leland. He died in Holliston, Aug. 30, 1883, leaving a wife and three children.

In the year 1879, the "hard times" seriously affected this business, and it began to decline. It has never recovered its former prosperity, and there are at present but five shops of much magnitude.

Although this has been the largest and most lucrative business, yet other branches of manufacture have flourished and have performed important service to the interests of the town.

In 1814, when the shoe business was still in its infancy, and gave no sign of its future success, Hon. Elihu Cutler, filled with the desire to do something towards the improvement and progress of his native town, conceived the idea that manufactures might build it up, by bringing into the town more money and more people. He resolutely set about the work, gradually overcame the opposition to new enterprises,

exhibited a plan of a mill, and formed a company of his townsmen, who erected the first mill in Holliston, in 1814, for manufacturing purposes. This was a thread mill, situated on Bogistow Brook, where W. L. Payson afterwards manufactured wood-work and boxes, with power from a steam-engine as well as the brook. This gave the first impulse in the right direction. By good tact and persuasion, he succeeded in drawing more people into the town, bought land and sold house lots, and also houses which he had built, and gradually formed the nucleus of a village. He labored incessantly for the improvement of the town. One accession brought another, other manufactures were established, and as the shoe business continued to improve, Mr. Cutler had the satisfaction during his own lifetime, of seeing the fruits of the labors which he had commenced.

Elihu Cutler was a son of Col. Simeon Cutler, whom we have mentioned as having served under Washington in the Revolution. He was born May 25, 1771, in Holliston, attended the district-school during its short terms, and assisted his father on the farm and in the tavern which the latter kept. He learned the trade of a wheelwright. Notwithstanding his limited advantages, "his mind," says Morse, "naturally strong and active, somehow acquired a good common education, and even mastered treatises on metaphysics. The information he acquired, and his ability to impart it, rendered his society attractive and profitable.

Mental culture, often acquired by the study of business as well as books, early marked his countenance, and gave dignity to his manners. These, coupled with a good measure of common sense, rendered him the first young man in Holliston. . . . His first appearance in a public capacity was that of marshal on the great and mournful occasion of the funeral of Washington. From about that time, for nearly forty years he was connected with the public measures and transactions of Holliston; and if not the projector of all, what one, it might be asked, was ever brought to an advantageous conclusion without him? No portion of the influence he exerted, or of the good he accomplished, is to be measured by the offices he filled." He was appointed a magistrate early in this century; was chosen a member of the convention to amend the State constitution in 1820, a representative from Holliston in 1827-28, and subsequently a State Senator, being the first man sent to the senate from this town, as his son Elihu was the second. He was also an active man in the affairs of the parish, and helped most efficiently to reconcile discordant views at a critical time. He died June 9, 1857, at the age of eighty-six, full of years and of honors.

The mill site of Mr. Cutler was afterwards occupied by Randall Travis, tanner and currier, by Hamlet Barber and Luther Bellows, by Samuel and W. L. Payson, then by W. L. Payson alone, and then by Payson & Cutler.

The manufacture of straw goods was commenced in 1815 by Charles and George Leland. It was afterwards conducted by Mr. Thayer, and then by Lewis Slocum, who, in 1861 improved and increased the business. He was followed by Slocum & Thompson; Thompson & Mowry; Mowry, Rogers & Co.,; and since 1882 by D. C. Mowry & Co., the present firm, who do a very large business. The factory now in use was erected in 1862, but several additions have since been made, so that it covers an area of seven thousand square feet, and contains five floors, there being also a one-story and basement ell. There are steam boilers and two steam-engines, and the works are equipped throughout with the most improved facilities for the manufacture of men's, boys' and children's straw hats of every description. The trimmings are imported from France and Germany, and the braid from China and Japan, where it can be manufactured more cheaply than in this country. Two hundred hands are employed during the busy season, under careful and complete supervision. The amount of sales is from \$150,000 to \$200,000 per annum. Some idea of the magnitude and variety of the business may be formed from the fact that two thousand *sample* hats are made every season, which is ten times the number formerly provided.

The manufacture of coach lace was commenced by Prescott Littlefield, about 1827, and was continued for some eight years. He employed eight or ten hands, mostly girls, and the weaving was done by hand-power. After the death of Mr. Littlefield the business was discontinued, and the place passed into other hands. A portion of the building was used for a shoe-shop, and was soon burned. It was the first shop burned in Holliston; and being one of the earliest fires of the town, it allowed the new fire company to display their engine in action. This may be remembered by some as the old crank machine, "Waterwitch," kept at Metcalf's station for many years. The origin of this, as of so many later fires in the town, was shrouded in uncertainty. For the purpose of saving property the windows and doors were removed at an early stage of the fire.

Earlier in the century, and perhaps before 1800, James Stone, a son of landlord John Stone, and grandson of the first minister, established a plough-factory, employing seven or eight men, near School and Washington Streets.

About and after 1828 a trip-hammer forge and auger-factory, saw-mill and other shops occupied the site of the present blanket-mills. There was also, at one time, a cotton-factory there, as before noted.

In 1834 a comb-factory was built on Jar Brook. The hard times of 1837 caused a suspension of work for a season, after which it was again in operation until it was burned, about January, 1860. When at the height of business the annual sales amounted to about \$100,000. Houghton & Joslyn and Houghton & Daniels were the proprietors.

In 1866, Messrs. Stetson and Talbot commenced in the same place the manufacture of shoe nails, and shoe and upholstery tacks. They are made of iron, zinc and copper. About twenty-two persons are now employed in this establishment, and in the year 1889 more than one and a quarter million pounds of manufactured goods were turned out, a specialty being made of nails for heeling-machines. The motive-power is the water of Jar Brook and a steam-engine, which run a plant of improved machinery. The building consists of a main shop, forty by one hundred and sixty feet, having an ell fifty by sixty feet in size.

Copper pumps were first made in 1837, by Houghton & Joslyn. At first two or three hundred were made in a year; but the business has steadily increased, owing to the excellence of the goods and the enterprise of the present managers, until during some years from three to four thousand were made annually; and the reputation of the pumps is such as to create a demand for them in foreign countries as well as at home. Since 1851, the business has been conducted by S. Wilder & Co., and the same firm-name has been retained since the death of Mr. Sidney Wilder in 1888, although conducted by Chas. and Geo. Wilder. They manufacture both common and force pumps, cistern and air-chamber pumps; and although the introduction of water-works in many towns has modified the call for pumps to some extent, they are still a staple article and must continue to be so. The members of the firm are skillful practical workmen and give their personal attention to the business. None but the best materials are used.

The manufacture of knit goods was begun in 1874, by George B. Fiske. One machine was employed at first, but the number has gradually increased until twenty hands or more were furnished with work, and in some years the sales have amounted to twenty thousand dollars. The goods find a ready sale and comprise a variety of useful articles of clothing. The business became well established among the manufacturing enterprises of the town. Of late it has been conducted by the "Mt. Hollis Manufacturing Co.," who now confine themselves chiefly to the production of knitted shirts.

The corporation known as The Holliston Mills was formed November 14, 1881, for the manufacture of blankets of different grades, some of a high quality being made. It continued for some years, but, owing to changes in the trade in those goods, ceased operation February 1, 1888. In December, 1889, it came into the possession of Edward Clark.

In 1880, Samuel Whiting commenced the manufacture of chairs and packing-boxes, and prosecuted a considerable business for several years. He employed improved machinery, driven by a steam-engine, had from five to fifteen men and furnished goods of a high quality. He is now succeeded by Elias Hunter, who makes boxes only.

A corporation called the Holliston Harness Co.

commenced business here March 7, 1890. They manufacture all kinds and grades of harness and sell at wholesale only. They employed eighteen persons at first, but have forty now. John Hughes is the manager.

Holliston has had the misfortune to be frequently invaded by fires. The most extensive of all was "the great fire," which occurred May 26, 1875. Says Walker: "Within three hours from the time when the alarm was first given twenty-two buildings were burned, all but one of which were completely destroyed. Among these were the hotel, a large livery stable, a block of stores, two other stores and several dwelling-houses. A large space in the centre of the village was left bare of buildings; but the enterprise of the people has rebuilt where the ruins were, and the general appearance is greatly improved. Statistics issued by the State Insurance Commissioners show, however, that this town has no more fires than the average of towns of the same population. The town has approved steam fire-engines and a hydrant engine.

"For the extinguishment of fires and for domestic and other purposes," the Holliston Water Company was incorporated in the year 1884, for the supply of pure water to the inhabitants of the town. The charter was renewed in 1887, and the company is now busily at work, in 1890, with the expectation of introducing the water before the close of the year. The water is obtained from springs in an immense well excavated for the purpose, in East Holliston. The overflow will be collected in an artificial lake, and a stand-pipe on Mt. Hollis will give the desired "head" to the water. Mr. John D. Shippee is the manager, and he is energetically prosecuting the work. The work of laying the pipes for conveying the water to the stand-pipe was commenced early in September, 1890. Mr. Z. Talbot has been the treasurer of the company from the beginning, in 1884.

Some twenty-five or thirty years ago efforts were commenced to improve the quality of the fruit of the cranberry vine and to increase its productiveness. It was naturally supposed that, as other fruits had been made better by cultivation, this crop might also be improved. With this end in view, Mr. Laurin Leland, in 1854, began the work of planting the vines in a meadow suitably prepared to furnish the cranberry with its natural food. In some cases this was done by paring the meadow and then covering it with a thick layer of sand; in other cases by merely spreading the sand on the natural meadow. Large crops of fruit of finer quality were thus obtained. Mr. Ezra Leland was afterwards associated with him in this work.

In 1860 Deacon George Batchelder commenced by planting one hundred square rods of meadow with the vines. This he gradually increased until eight acres or more were cultivated. These berries are not only larger in size, but they are harder and of darker

color than the native fruit, and are more highly prized in the market. H. B. Tibbetts succeeded George Batchelder, and has done even a better business. A. B. Tibbetts started a meadow of his own in 1890.

Nothing appears in the town records concerning the War of 1812; but it is evident that some men from this town served as soldiers at that time, because inscriptions to that effect are found on grave-stones in the burying-grounds, and one soldier of that war, Luther Green, was living in the town only a few years since. The records at the State-House would doubtless furnish the list of names.

No other events of importance occurred in the civil history of the town for many years, except those already mentioned under their appropriate headings.

In the year 1847, greatly increased accommodations for traveling were furnished by the Boston and Worcester Railroad Company. On July 4th of that year the first trip was made over the Milford Branch of that road, as far as Holliston Centre. The deep cut through Phipps' Hill was made with difficulty and occupied a long time, so that it was not until November, 1848, that the train went through to Milford. "This railroad has been of great advantage to the industrial interests of Holliston, and has had a profitable business in the transportation of passengers and freight." The greater part of that section of the village lying beyond the railroad has been built up since the introduction of these facilities. For a long time the people of the town have desired an early train to South Framingham, but could not induce the company to furnish it. But at length, through persistent efforts, they succeeded in July, 1890, in obtaining it. This train leaves Milford at 6.30 A.M., and returns at 6.12 P.M., thus accommodating many persons who wish to commence their daily work at 7 o'clock and others who desire to take early trains to Boston and other points. Great satisfaction is felt at the accomplishment of this long-sought object.

It is less than forty years since banking facilities were conveniently furnished to the citizens of the town. During all the previous time that business was done by the banks of Dedham, Wrentham and Framingham, "causing," says an old resident, "many a wintry trip to those distant towns." Some private banking was done by inhabitants on farms near by, "where one worth \$10,000 was a nabob, and if worth \$15,000, a blouted aristocrat."

But in 1854 the Holliston Bank was formed and incorporated with a capital of \$100,000, and it has furnished accommodations to this and neighboring towns. Its first president was William S. Batchelder and its cashier, Rufus F. Brewer. The latter served for several years, when he was succeeded by Thomas E. Andrews, who occupied the position until July 16, 1883, since which time John H. Andrews has filled the office of cashier. Mr. Brewer died in Philadelphia in 1888. Mr. Batchelder served as

president until his death, in 1876, when Hon. Alden Leland was elected to that station, which he occupied also during the remainder of his life. He was succeeded by Sidney Wilder in 1883, and by John M. Batchelder in 1890. The bank was reorganized as a National bank January 23, 1865, and in April of the same year the capital was increased to \$150,000. By careful management a handsome surplus has been created, amounting to about \$30,000.

The bank has from the first been closely identified with the development of this particular community, home interests having guided its policy to a great extent, and home enterprises of genuine merit having received its hearty and valuable co-operation. It occupies its own brick banking-house on Washington Street, built in 1872, and furnished with the most approved modern appliances for convenience and safety.

The Holliston Savings Bank was incorporated in 1872, and is an institution of great value to the town. Its office is in the National bank building, and it has had but one treasurer, Orrin Thomson, Esq. Hon. Alden Leland was the first president, and was succeeded by Seth Thayer and D. C. Mowry, who now occupies that chair. The amount of deposits from the beginning is about \$1,500,000.

Several old cemeteries are found in Holliston, and they were established at different periods, according to the locations of the inhabitants and their requirements for burial-places. The oldest is the Central Cemetery, near the first church and the town-house, where several of the early ministers are interred. There is also quite an old cemetery at the north part of the town, one in the western portion, two at Braggville, and one at East Holliston. Glenmount Cemetery was laid out some years since in the eastern quarter of the town, but is not at all used at present. Although some of these cemeteries are not without rural attractions, yet most of them are limited in space and belong to the old order of burying-grounds. In a cultivated community like this there was therefore a natural desire for a more extensive location, and one which should be capable of more ornamentation. And accordingly a plot was selected on the banks of Lake Winthrop, containing thirty acres. It contains a grove, which, with the water-view of the lake and its islands, forms a diversified and beautiful spot for the interment of the dead, and one which is attractive and pleasant to the minds of the living. It was incorporated in 1859 as Lake Grove Cemetery, and was consecrated June 1, 1860, Rev. J. C. Bodwell, of Framingham, delivering an eloquent address, and Rev. Dr. Tucker the consecrating prayer. It contains more than three hundred burial lots, many of which are tastefully adorned, and there are several hundred not yet laid out. Beautiful monuments have been erected near the graves, and the entire enclosure is an honor to the town. It has always, since its opening, continued to be a favorite place for interment, and

will compare favorably with similar parks in other towns.

We now approach a period filled with events of the most momentous character for this town, as well as for all the towns in the State—a period when men were turned from the peaceful occupations of life to the trying and hazardous career of war. The inhabitants of the town were forced to change the whole current of their lives, and many of them to adopt, in the emergency which arose, duties to which they had been wholly unaccustomed, and modes of living diametrically opposite to those in which their previous life had been passed. A long and bloody civil war, the hardest and most severe of all wars, was upon us, and a contest for the very existence of the Union was waged for four long and terrible years. The part which the citizens of this town took in that struggle is so well described by Rev. George F. Walker, in his historical article, that I cannot do better than to quote it. He writes, "When, on the morning of April 12, 1861, the first gun of the Civil War was fired against Fort Sumter, and its echoes stirred the patriotism of the entire North, the people of Holliston were ready, as worthy sons of Revolutionary sires, to take their full share of the burdens of the war. On the 15th of April, President Lincoln, by proclamation, called for seventy-five thousand volunteers, and on the 29th the town took measures for the raising of a military company, and it was soon ready to march, when ordered to join the Federal forces. To help those who were willing to enlist, and to relieve them of anxiety respecting the support of their families, who were to be left at home, the town voted, September 30th, to pay one dollar a month to the wife of any soldier enlisted from this town, and fifty cents per month for each child, in addition to the aid received from the State. It was also provided by vote, the next year, that the families of the nine months' men be paid the same as the others.

"In the spring of 1862, when the National Capital was threatened by the approach of the Confederate troops, and the Governors of the loyal States were issuing their proclamations for men to go to its aid, the anxiety of the inhabitants of Holliston was so great that a messenger was dispatched on horseback to Boston, to ascertain whether the Capital was taken or not. The messenger returned, riding into town just as the public services in the churches were concluded, and when he announced that the Capital was yet safe, cheer upon cheer rang out upon the still air of that quiet, beautiful Sunday afternoon, attesting the happiness with which the good news had filled the hearts of the people.

"It was voted July 22, 1863, unanimously, 'That the families of citizens of Holliston, whether alien or otherwise, who serve in the United States Army, either as drafted men or substitutes for drafted men, shall receive the same aid from the town treasury as

has been paid to the families of volunteers;' also, 'To continue the same aid to the families of those who have fallen in the service of their country, as they have heretofore received from the selectmen, until March 1st next, unless their pensions are sooner received.' June 20, 1864, it was voted 'that the Town Treasurer be hereby authorized to pay each volunteer or drafted man a sum not exceeding \$125, whenever such volunteer or drafted man shall be called for to fill the quota of Holliston;' also, 'voted that the town appropriate the sum of \$3000 to pay soldiers enlisted under the last call for troops, dated March 14, 1864.' Another vote was passed the same day, viz.: 'To choose a committee of five to make provision for a suitable reception of the returned soldiers belonging to Holliston.' June 18, 1866, the selectmen were instructed, by vote of the town, 'to pay all volunteers who re-enlisted in the field for the credit of Holliston, who have never received a bounty, one hundred and twenty-five dollars, and to those who have received only a partial bounty, the balance sufficient to make that sum.'

"The whole number of soldiers from Holliston, counting both enlistments and re-enlistments, who served in the Federal Army during the Civil War, was three hundred and fifty-four. Of these, sixty-six were natives of the town; and the names of fifty-three are upon the soldiers' monument as having lost their lives. Nine were captured and confined in Confederate prisons, of which number five died. While the war was in progress, the people at home did not forget those who were in the field, and after some of the great battles committees were sent to the front to care for the well-being and comfort of the wounded.

"Just before the war commenced, Sewell H. Fisk, from Holliston, was driven out of Savannah, Georgia, with indignity, because he was from the North. He enlisted in Co. B, and went back with the army and died in the United States Hospital at Newark, N. J. Another soldier, Simon C. Marston, being left alone on guard at Brandy Station, saved the books of the Holliston Company from the rebels, who came up suddenly, by strapping them in haste upon his back and leaving with them."

This company was Company B, of the Sixteenth Regiment of Massachusetts Infantry, whose first colonel was the lamented Powell T. Wyman, of Boston, once a schoolmate of the writer of this article. He was killed in action at the battle of Glendale, Va., June 30, 1862, before he had been a year in service. This regiment was also called the Middlesex County Regiment. Co. B was organized in Holliston, and its first officers were James M. Mason, captain; William A. Amory, first lieutenant; and Cassander F. Flagg, second lieutenant.

In 1866 the town appropriated \$3000 for the purchase and erection of a soldiers' monument. It is a square, granite monument and stands in the southeast corner of the Central Cemetery, where it can

plainly be seen from the main street. It consists of a base, ornamented pedestal and shaft. On the front side of the pedestal a flag is sculptured in relief, and on the opposite face is a shield with the following inscription in small capitals:

THIS WAS THE TOWN OF HOLLISTON,
IN MEMORY OF HER SOLDIERS,
WHO FLEW IN THE WAR FOR THE UNION,
1874.

On each of the remaining sides is a sword encircled with a wreath, also in relief. On the base of the monument are the following words:

"HONOR TO THE BRAVE."

On the sides of the shaft are carved the names of the soldiers of Holliston who lost their lives in the defence of their country. Those names are: M. Vose, F. Abbott, P. Harvey, C. C. Waite, S. H. Fisk, E. M. B. Perry, W. H. Clough, H. A. Harris, J. Speakman, E. B. Currier, A. G. Hunting, C. H. Wheeler, M. McCormic, A. Adams, C. H. Cole, E. Leland, J. E. Dean, A. Goodwin, M. Slatery, F. B. Joslyn, J. H. Cooper, J. Hamilton, J. W. Slocum, W. G. Gaylord, G. E. Jenkins, H. F. Chamberlain, T. Lacy, C. Drury, L. Dickey, J. Reeves, F. W. Clapp, B. F. Hawks, H. S. Bailey, A. Galvin, Jr., W. E. Lougee, J. S. Bullard, J. Gallacher, E. S. Hutchinson, C. S. Watkins, F. Riley, P. Cary, Emerson Fames, B. L. Durfee, J. M. Mann, C. H. Allen, William Crowell, N. Brown, Jr., R. Feeheley, G. Holbrook, G. J. Walker, W. H. Goodwin, E. G. Whiting and W. B. Jennesson, fifty-three in all. There is also the record of the battles in which the soldiers from this town were engaged, viz: Gettysburg, Locust Grove, Wilderness, Spottsylvania, North Anna, Cold Harbor, Cedar Grove, Petersburg, Andersonville, Richmond, Bull Run, Fair Oaks, Glendale, Malvern Hill, Chantilly, Newbern, Manassas, Fredericksburg, Antietam and Chancellorsville, twenty in number. An honorable record for the men of Holliston.

In connection with this subject, we may appropriately consider the Grand Army of the Republic, an outcome of the Civil War. The credit of originating the idea and plan of this organization is due to Dr. B. F. Stephenson, surgeon of the Fourteenth Illinois Regiment. In 1866 he conferred with Chaplain Rutledge, explained to him the design he had conceived, and together they drew up a list of by-laws, and April 6, 1866, they founded Post No. 1 of the State of Illinois. The order rapidly increased and spread over the country, and still continues to flourish. There are between seven and eight thousand posts at the present time, with a membership in August, 1890, of 455,510. National encampments are held annually; that for 1890 assembling in Boston, where a whole week was given to meetings and festivities, and great enthusiasm prevailed among the thousands who were present from all parts of the country, and many even from the Southern States.

Post No. 6, of Massachusetts, was instituted March

10, 1867, at Holliston. A member¹ of this Post writes, "Among the institutions of Holliston which are widely useful, Post 6, G. A. R., deserves a prominent place. Its charities have been extensive, and its composition being such as to remove it both from the field of politics and sectarianism, it has been able to reach in an unobtrusive way many a sufferer and has brought comparative comfort to many a poor, but deserving family. Its disbursements, since its organization, have amounted to nearly \$7000 (\$12,000 in 1890). It has had a varying history. It has been burned out three times, but each time has arisen with its membership more firmly united, and with a stronger desire to fulfill the high purpose to which it is most sincerely consecrated.

"The relief committee of the Post has worked in entire sympathy with the town authorities, and has been an important auxiliary in the work of finding out the needy and honestly paying the amounts voted year by year by the town. It is named the Powell T. Wyman Post, in affectionate remembrance of the first commander of the Sixteenth Regiment. It has for some years occupied a building on Green Street, owned by itself, and well deserves the respect which it enjoys in the community."

In 1890 this building was removed to Exchange Street, and was greatly enlarged and improved. The number of comrades in 1890 was fifty-two, and the Commander was D. F. Travis; I. H. Carpenter, Senior Vice; O. L. Cutting, Junior Vice; J. N. Fisk, Adjutant; and I. M. Hart, Quartermaster.

Several years after the foundation of the G. A. R., a new order called the Sons of Veterans, was instituted. It is composed of the sons of soldiers who served in the late war and received honorable discharge therefrom. The associations are called Camps, and Camp B. A. Bridges, (so called from late officer of Company B, and Captain of Company E, Sixteenth Regiment Massachusetts Volunteers), No. 63, of Massachusetts, was organized May 5, 1865. The captain in 1890, was N. E. Bridges, and the number of members thirty-four. This Camp is armed.

The Women's Relief Corps, formed in 1881, is an auxiliary to the G. A. R., and assists the widows and children of soldiers, by supplies of clothing and materials. It is also a general assistant to the Grand Army, in its work of benevolence. In 1890, Mrs. Z. Talbot is President, and Mrs. Lewis Bullard, Secretary.

Several societies for social and benevolent purposes exist in Holliston. The Mt. Hollis Lodge of Free and Accepted Masons was chartered in 1865, or, according to their usage, February 14, A. M. 5865. The number of members at present is about eighty; the lodge continues to prosper, and holds monthly meetings in Masonic Hall. The Worshipful Master in 1890 is H. C. Kingman.

A lodge of the Sons of Temperance was formed here many years since. It was re-organized in December, 1889, and now has about twenty members. The Worthy Patriarch is Albert E. Phipps.

Societies for the promotion of temperance have for a long time been present in Holliston, the first one having been organized as early as 1827. In 1876 the cause received a fresh impulse, and three societies were working in this direction. At the present time the efforts in this moral reform are conducted by societies auxiliary to the religious societies of the town, by the Sons of Temperance and by the Reform Club and its auxiliary, the Women's Christian Temperance Union, No. 15.

A lodge of the Independent Order of Odd Fellows existed in the town some years, and many members of that order reside here at present. A re-organization or a new organization is contemplated in the near future.

The Ancient Order of Hibernians is a social and charitable society for the mutual aid of its members. There is a National, State and county organization, and each of them meets semi-annually. In this State there are from ten thousand to twelve thousand members, and in Middlesex County about thirty-eight hundred members. M. F. Coughlin, of Holliston, is the county delegate. The society in this town, Division No. 24, was chartered July 19, 1876, with twenty members. It holds meetings every Monday night in A. O. H. Hall, Forbes' Block, and has there a reading-room and billiard hall for the purpose of interesting its members. It always has from \$500 to \$1000 deposited in the bank, from which to draw its requisitions for aid. The president in 1890 is C. F. Driscoll, and the secretary, John H. Coughlin, and the membership has increased to fifty.

A lodge of the Knights of Honor (No. 647) was organized in Holliston June 5, 1877. It is a society for mutual benefit, and meets on the first Friday of each month in Masonic Hall. The number of members was fifty in 1880; it has now increased to eighty-two. William H. Smart is the Dictator in 1890.

February 18, 1884, Grange No. 115 of the Patrons of Husbandry was founded. It has attracted to its membership not only farmers and their families, but many others who are interested in its objects. It is a social order for the mutual improvement of its members and the advancement of the interests of agriculture and horticulture, and persons of both sexes are admitted. It has proved to be a desirable organization, and has developed much latent talent among its members. Its meetings are held twice in each month, and in the fall season it holds an annual fair. The number of members in 1890 was one hundred and forty, and the Worthy Master was J. B. Parkin.

July 4, 1876, the citizens celebrated the centennial anniversary of the independence of the nation in a highly appropriate and enthusiastic manner. Various committees were chosen, who made full preparations

for the event, and the celebration was a success and a pleasure to all. Salutes were fired and bells rung in the morning, a procession was formed and marched through the principal streets, and all then assembled in the Congregational Church. The exercises consisted of an invocation by Rev. J. Gill, prayer by Rev. G. M. Adams, reading of Declaration of Independence by Professor G. Y. Washburn, oration by Rev. Edmund Dowse, of Sherborn, and benediction by Rev. George F. Walker, then of Blackstone, a former resident of the town. Excellent singing was interspersed, including Whittier's Centennial Hymn.

At the conclusion of these exercises the procession was reformed and marched to Mt. Hollis Grove, where ample refreshments had been provided. The Holliston Band then furnished music, and Hon. Alden Leland, president of the day, introduced C. S. Wilder as toast-master, and many appropriate sentiments received responses from present and former citizens. Many buildings were decorated, and as a whole more elaborately than ever before in Holliston. Fire-works in the evening and music by the band closed the celebration, which was a notable one and will be long remembered.

The 150th anniversary of the formation of the Congregational Church was celebrated Wednesday, June 11, 1879. The church was formed October 31, 1728, O. S., so that the exact anniversary, allowing for the change from old to new style, was November 11, 1878. The celebration was postponed to the more pleasant season of the year. In response to special invitation, a large number of the former members of the church and congregation returned to Holliston for the occasion. Many were present also from the neighboring towns. The meeting-house was very fully and beautifully decorated with flowers, ferns, evergreens, mottoes and emblematic designs. All but one of the former pastors of the church now living were present, and that one responded by letter. Exercises were held both forenoon and afternoon, and a social reunion took place in the evening.

The historical discourse, delivered by the pastor, Rev. George M. Adams, was an exceedingly interesting and valuable paper, presenting facts and reminiscences of great importance for future reference, as the writer of this article has learned, during its preparation. This anniversary was an occasion of great interest to all who had ever been connected with the church or congregation.

During this same year, July 19, 1879, the public library commenced its existence. The plan of forming a town library originated with Elias Bullard, Esq., who in his will left \$1000, under certain conditions for that purpose. Seth Thayer, Esq., then contributed \$500, and several others lesser sums. The town appropriated \$500 at first and have since granted \$400 annually for its support. The library is kept in the town-house and is opened for use during the afternoons and evenings of Wednesday and Saturday of

each week. It is found to be a very popular institution. Miss Josephine E. Rockwood is and has been the librarian.

The charge of this Library is committed to six trustees, two of whom are annually chosen by the town for three years. Portraits of Elias Bullard, Esq., Mr. Seth Thayer and Rev. George M. Adams, D. D., adorn the walls of the room, that of Esquire Bullard having been presented by his daughter, Mrs. Robert R. Bishop.

The Holliston Mutual Fire Insurance Company was incorporated and carried on business for about twenty years. William R. Thayer, O. B. Bullard, A. N. Currier and Thomas E. Andrews were its managers at different dates. It closed in 1862, and the insurance was transferred to George B. Fiske, who is, and has been for many years, an agent for several companies of that kind. A Loan Fund Association also existed here many years ago.

Mr. John N. Fiske, a native of the town, has for many years been established as a job and manufacturing printer, and employs steam as a motive power. His work is good and tasteful. Mr. Fiske has also been the enumerator of the census of 1890.

No newspapers are printed in the town. But an edition of the *Framingham Gazette*, called the *Holliston Transcript*, is furnished weekly to the citizens. The *Milford Daily News* is also sent here regularly. Of both of these newspapers James F. Fiske is the correspondent, and also of the *Boston Globe*. Mr. Fiske has been a reporter for many years. He has also been town treasurer, and was postmaster for seventeen years, the longest term of service of any person in that office. He was succeeded, July 12, 1886, by Frank Cass, who remains postmaster in 1890.

There is a good variety of stores in Holliston, sufficient for supplying the wants of the people, both in health and in sickness.

A "History of Sherborn and Holliston," with genealogies, by Rev. Abner Morse, was published in Boston in 1856.

It is said that Rev. Timothy Dickenson (1789-1813) wrote a pamphlet history of Holliston, extending to his day.

Rev. Mr. Fitch's century sermon (1826), Rev. Dr. Dowse's centennial address (1876) and Rev. Dr. Adams's historical discourse (1879), all contain valuable points concerning the history of the town.

BIOGRAPHICAL.

HENRY BULLARD.

Henry Bullard is a direct descendant of Benjamin Bullard, one among the first planters of Watertown in 1630, and who drew land there in 1637 and 1641. His son Benjamin settled in the extreme

southern part of Sherborn prior to 1658, a portion of his farm being within the bounds of Medway (now Millis).

Henry is the son of Titus and Esther Bullard and was born, at his present residence, July 13, 1815. His grandfather, Henry, born in 1749, settled here in the southeast part of Holliston and built the present house; so that Mr. Bullard is of the third generation occupying the homestead. A large farm is attached and it has been successfully carried on by the subject of this sketch.

After acquiring an education in the common and high schools of that day, Mr. Bullard served as a teacher in this town and in Framingham. That he was successful may be inferred from the fact that he was invited to take charge of the High School in Framingham. He was obliged to decline, however, as he had an engagement to enter business in Holliston. He afterwards conducted business in a store for three years in Cincinnati, Ohio, and for eight years in Medway, Mass. Then the declining health of his mother called him home, and he has since resided on the farm. He married Bethia S. Wheeler, of Medway, about fifty years since, and they have had seven children, all of whom are still living. Mrs. Bullard, a most estimable woman, lived to a good age and passed to a higher life in 1890, beloved and lamented by all.

Mr. Bullard has been a selectman of Holliston for five years, during four of which he was chairman of the board. He has been the first vice-president of the Holliston Savings Bank from the time of its organization, and has also been a trustee and member of the Investment Committee of that institution. He is an owner of real estate in Holliston, Framingham and several other towns, and devotes a considerable part of his time to its care. He is a member of the Holliston Grange of the Patrons of Husbandry.

APPLETON BULLARD.

Appleton Bullard was born in Medway, Mass., March 17, 1804, the son of Malachi and Polly (Littlefield) Bullard. He was the third child, Elias Bullard, Esq., of Holliston, being the first, and Rev. Malachi Bullard, of Winchendon, the second. A younger brother, Hartwell, resided in Westborough. At the age of about thirty years Mr. Bullard was married to Hepzibah L. Harding, of Medway, and settled in Holliston. While here he was a prominent citizen, held in much esteem by the people of the town. He was selectman, assessor, overseer of poor, and in fact held most of the town offices at one time or another.

About 1854 he returned to Medway about the time of the decease of his father and mother (who died nearly at the same time) and took charge of the farm at the homestead. He there remained during the rest of his life, and also held all the town offices there. But he died in Holliston, suddenly, at the residence

J. Talbot

of his brother Elias, and within two or three hours of the death of the latter, November 2, 1875. Mrs. Bullard remained in Medway until four or five years since, when she removed to Metcalf's Station, Holliston.

Mr. Bullard was a member of the Congregational Church for many years. He was a carpenter and worked at that trade both in Medway and Holliston. He assisted his father in building the Congregational Church in Holliston in 1822, and he built churches in Millis, West Medway and Bellingham.

ELIAS BULLARD.¹

Elias Bullard was born in Medway December 31, 1799. He was the son of Malachi and Polly Bullard, and was the oldest of six children. He early manifested a fondness for books, and, determining to fit for college, was placed by his father under the charge of Rev. Dr. Jacob Ide, of Medway, with whom he pursued his preparatory studies. He entered Brown University in 1819, and graduated in 1823. He studied law with Elijah Morse, Esq., of Boston, and upon being admitted to the bar, commenced practice in Holliston, October 7, 1826. It had been his intention to locate in Boston, but a decided indication of lung difficulty, with hemorrhages, compelled him to follow the advice of his physician, and seek a location further inland. He remained continuously in Holliston in the practice of his profession until his death, a period of forty-nine years. He was the first lawyer to settle in the town, and no other one settled there during his life.

During this long period of professional labor, Mr. Bullard transacted the business of a wide circle of clients, and maintained the constant respect of all who knew him. His advice was sought on account of the fairness of his mind and the soundness of his judgment; and the confidence of the community was reposed in him to an unusual degree. He was disposed towards the peaceful settlement of controversy, and much litigation was tranquillized and stopped, by his calm and restraining influence, before it was entered upon. As might have been expected, he was frequently called to act in positions of pecuniary trust and responsibility.

He faithfully performed his part in town affairs, and took interest especially in the schools, serving many years upon the School Committee. He three times represented the town in the Legislature—in 1834, 1835 and 1870. In the latter year he was the senior member, and called the House to order. In his address upon that occasion he spoke of the great changes which had taken place in the more than a generation since his first session.

He was largely concerned in the building of the Milford branch of the Boston and Worcester Rail-

road through Holliston, and was counsel for the corporation in the matter. He was throughout life a constant reader and a studious man, was considerate and mindful of the rights of others, and broad and tolerant in his views and conduct. He was a great lover of home. He married Persis Daniels, of Sherborn, who survived him, and of this union were born two children—Mary Helen, who also survived her father, the wife of Robert R. Bishop, of Newton, and Josephine Daniels, who died before his decease, the wife of Dr. Daniel W. Jones.

Mr. Bullard died November 2, 1875, lamented in the town, and in surrounding towns, to an extent which seldom occurs. He was a member of the Congregational Church in Holliston.

MOSES A. HARRIMAN.

Mr. Harriman was born in Bridgewater, N. H., May 3, 1812. Before he came to Holliston in 1835, he was a school teacher in the State of Ohio, and also resided in Natick, Mass., where he worked in making shoes for Henry Wilson, afterwards distinguished as a Senator and Vice-President of the United States. After removing to Holliston, he lived at first in the west end of the town with Amasa Forristall and made "brogans." In the year 1839 he purchased the Austin Bellows estate in East Holliston, built or enlarged the shop there, and commenced the manufacture of shoes and boots. This business he continued during the whole remainder of his life, devoting the greater part of the time to the manufacture of boots, in which he had quite a considerable trade.

In 1841 he married Susan Newton, a resident of Holliston, but a native of Shrewsbury, Mass. They had two children, but neither have survived. An adopted son is in business in Boston.

Mr. Harriman was a member of the Board of Assessors for two years. He joined the Methodist Church in 1845, and ever afterwards led a consistent Christian life. He was for many years a trustee and steward of that church, and was one of its chief financial supporters. He was also for some time the superintendent of its Sunday-school.

Mr. Harriman was an active business man and he secured the good will of all with whom he had dealings. Although reserved in his conversation concerning matters of business, he had the good tact to manage it successfully, and succeeded in accumulating a handsome competency. He was a favorite with his workmen, who attended his funeral in a body and keenly felt his loss. He died September 12, 1879.

ZEPHANIAH TALBOT.

Mr. Talbot was born in South Hanover, Mass., June 22, 1834. He was educated in the public schools and in Hanover Academy, and then as a full apprentice in the Corliss Steam Engine Co.,

¹ Contributed.

at Providence, Rhode Island. He was a staff officer in the United States Navy, from 1860 to 1866, being assistant engineer. Applying for duty in active service, he was ordered to proceed from San Francisco to the North. He received two promotions and served as chief engineer on the Gunboats *Chocura* and *Iosco*, and superintended the placing of the engines in them. He was on duty in the North Atlantic blockading squadron and was present at the capture of Fort Fisher. He continued in the service after the close of the war, and was appointed first assistant professor of steam-engineering at the Naval Academy, Annapolis, Md., this branch being then first introduced as a study. In the year 1866, he resigned his office for the purpose of entering business.

Mr. Talbot's first connection with Mr. D. K. Stetson was at Woodville, Hopkinton, Mass., in the manufacture of shoe nails and tacks. In the year 1866, they removed to Holliston, established themselves on the site of the old comb factory in East Holliston, where as Stetson & Talbot, they continued the above mentioned business for twenty-one years. In 1887 Mr. Talbot purchased the interest of Mr. Stetson and has since conducted the business himself. A reference to the description of this industry in another part of this article, will show the magnitude of the business. He has obtained one patent and applied for three others connected with this manufacture.

Mr. Talbot was a member of the Board of Selectmen in 1866; chairman of the Board of Assessors four years, from 1876; and a member of the school committee for ten years, a portion of that time as chairman. He was also a director of the National Bank and Trustee of the Savings Bank for several years. In 1882 he was chosen treasurer of the Holliston Mills, and has continued to occupy that post. He has also been treasurer and a director of the Holliston Water Company since its first incorporation in 1884.

In May, 1863, he was married to Eliza F. Paul, of Boston. They have had four children, one of whom, Henry P., after a course of study at the Institute of Technology, in Boston, proceeded to Europe for further education, and in 1890 took the degree of Ph.D. at Leipsic.

CHAPTER XXXVII.

MALDEN.

BY WILLIAM L. DAVIS.

MALDEN was originally a part of Charlestown. Charlestown was first visited, as far as is certainly known, by John Smith in 1614. There is no evidence that earlier explorers, including Verrazzano, Gosnold, Martin Pring, Weymouth, Champlain and Hudson, either entered the harbor of Boston, or even saw its

adjacent lands. John Smith, after some years' connection with the Southern Virginia Company, returned to England, and in 1614 sailed with two ships "to take whales and also to make trials of a mine of gold and copper." On his arrival at Monhegan, near the mouth of the Penobscot River, he anchored his vessels and sailed with eight men in a shallop, along the more southerly coast as far as Cape Cod, giving the name of New England to the country, and "drawing a map from point to point, isle to isle, and harbor to harbor, with the soundings, sands, rocks and landmarks." A copy of this map was submitted by Smith, on his return to England, to Prince Charles, afterwards Charles the First, who attached names to the various points there delineated. Of these names, Plymouth, named, it is believed, in honor of Sir Ferdinando Gorges, at that time Governor at the castle in Plymouth, and one of Smith's patrons; Cape Anne, named after Anne of Denmark, the mother of the Prince, and Charles River, named after himself, remain, while all the other names, including Cape James for Cape Cod, Milford Haven for Provincetown Harbor, Stuard's Bay for Barnstable Bay, Point George for Brant Point, Oxford for Marshfield, London for Cohasset, Cheviot Hills for the Blue Hills, Talbot's Bay for Gloucester Harbor, and Dartmouth, Sandwich and Cambridge, for places near Portland, never came into use.

Smith was followed by Thomas Dermer, in 1619, who put into Massachusetts Bay, and visited Plymouth, but there is no evidence that he sighted the northerly shore of the bay. The "Mayflower" followed in 1620, the "Fortune" in 1621, the "Abn" and "Little James," in 1623, all making Plymouth their only destination, and in the last of these years Robert Gorges, appointed Lieutenant-General of New England, came in a ship which was the pioneer in the great movement which ended in the settlement of the Massachusetts Colony. All the enterprises connected with these arrivals on the New England coast were conducted under the authority of an English company, first known as the Northern Virginia Company, and afterwards as "The council established at Plymouth, in the county of Devon, for the planting, ordering, ruling and governing of New England in America."

This company, together with the Southern Virginia Company, or, as it was called, the Virginia Company, was established in 1606. On the 10th of April in that year King James divided by letters patent between these two companies, a strip of land one hundred miles wide, along the Atlantic coast of North America, extending from the thirty-fourth to the forty-fifth degree of north latitude, a territory which then went under the name of Virginia. This territory extended from Cape Fear to Passamaquoddy Bay. The patent, or charter, to the Virginia Company was granted to certain knights, gentlemen, merchants and adventurers of London, who were permitted to

claim between the the thirty-fourth and forty-first degrees, or between Cape Fear and a point within the boundaries of New York harbor. The patent, or charter, to the Northern Virginia Company was granted to knights, gentlemen, merchants and adventurers of Bristol, Exeter and Plymouth, who were permitted to claim between the thirty-eighth and forty-fifth degrees, or between the southeastern corner of Maryland and Passamaquoddy Bay. That portion of the strip between the thirty-eighth and forty-first degrees included in both patents, was open to the company first occupying it, and neither company was permitted to make a settlement within one hundred miles of a settlement of the other company.

In 1620, the King having become displeased with Sir Edwin Sandys, the Governor and Treasurer of the Southern Company, forbade his re-election, but his successor, the Earl of Southampton, being no less obnoxious, he was disposed to show special favor to the Northern Company, and granted it a new act of incorporation under the title, already referred to, of "The council established at Plymouth, in the county of Devon, for the planting, ordering and governing of New England in America." Under their new charter a new grant was made to the company, extending from the Atlantic to the Pacific and bounded by the fortieth and forty eighth degrees of latitude.

Under the authority of this company the settlement of the Massachusetts Colony was made. In 1622 they granted to Robert Gorges all that part of the territory "commonly called or known by the name of the Massachusetts upon the northeaside of the Bay called or known by the name of the Massachusetts." This grant, according to the best authorities, included the region about Boston harbor, bounded on one side by Nahant and on the other by Point Allerton, and extending thirty miles into the interior, "with all the rivers, islands, minerals, etc.," within its limits. This grant included, of course, the territory afterwards occupied by the town of Charlestown, and Charlestown when settled included Malden, Everett, Melrose, Woburn, Stoneham, Burlington, Somerville, a large part of Medford and a small part of Cambridge, West Cambridge and Reading, Arlington, Lexington and Winchester.

In 1623 Robert Gorges, as has been already stated, was appointed by the Plymouth Council, Lieutenant-General of New England, and came over to secure his grant and establish a colony. In the next year, having failed in his colonial enterprise, he returned to England "until better occasion should offer itself unto him." It is probable that on his departure he left some remnants of his colony behind, as in 1626 there were planters at "Winnisemit," and as William Blackstone, the first settler of Boston, appears in the records as the agent of Gorges in 1626, and others connected with him and his enterprise were at about the same date inhabitants of what was later the Massachusetts Colony.

After the death of Robert Gorges his older brother

John, to whom his grant descended, leased, in or about 1628, a part of the land claimed by him to John Oldham and John Dorrell. This lease included the territory afterward embraced within the limits of Charlestown, and covered "all the lands within the Massachusetts Bay, between Charles River and Abousett (or Saugus) River, containing in length by straight line, four miles up the Charles River, with the main land northwest from the border of said Bay, including all creeks and points by the way; and three miles in length from the mouth of the foresaid river Abousett up into the main land, upon a straight line southward, including all creeks and points; and all the land in breadth and length between the foresaid rivers, with all prerogatives, royal mines excepted."

In 1628 the council for Plymouth, the successor of the old Northern Virginia Company, notwithstanding the grant they had made to Robert Gorges in 1622, under which Oldham and Dorrell claimed as lessees, sold the territory included in that grant to the Massachusetts Colony, bounding the lands conveyed by points three miles north of the Merrimack River and three miles south of the Charles River, and extending from the Atlantic Ocean to the South Sea. Oldham, of course, protested against this sale of lands to which he had reason to believe that he was rightfully entitled, but for some reason the Plymouth Council held the claim to be void and disregarded it. On September 6, 1628, John Endicott arrived in Salem, as the representative and local Governor of the Massachusetts Colony. Included among the members of the company arriving with Endicott, according to some authorities, were Ralph Sprague and his brothers Richard and William, who, not long after their arrival set out on an expedition, during which they traveled about twelve miles to the westward from Nahumkeik (now Salem) and "lighted of a place situate and lying on the north side of the Charles River full of Indians called Aberginians." It is said that by this band of adventurers it was agreed, with the approbation of Governor Endicott, "that this place on the north side of the Charles River, by the natives called Mishawum, shall henceforth, from the name of the river, be called Charlestown."

But authorities differ as to the place, time and manner of the settlement of Charlestown, and as to the persons by whom it was settled. Besides the lease of lands to John Oldham and John Dorrell, there was a claim made by Sir William Brereton, under a deed dated January 10, 1629, of "all the land in breadth lyinge from ye east side of Charles River to the easterly parte off the cape called Nahante, and all the lands lyinge in length twenty miles northeast into ye maine land from the mouth of the said Charles River lyinge also in length twenty miles into the maine land northeast from ye said Cape Nahante; also two Islands lyinge next unto the shore between Nahante and Charles River, the bigger called Brereton, and the lesser, Susanna." This claim also was rejected by the

Plymouth Council, and the Massachusetts Company in England sent a letter to Endicott by the "George Bonaventure," which arrived in Salem June 22, 1629, from which the following is an extract :

"We pray you and the council there to advise seriously together for the best means of our privileges and possible government, which, it may be, may by a temperate course we much desire it, though with some necessity it is necessary that a prudent and piousness be not brought in to tempt us, which if it were might be so common as might draw the heathen by our good example to the embracing of Christ and his gospel, that some stones be cast to the heathen, and a scandal to our religion through our disagreement amongst ourselves. But if necessity require a more severe course where fair means will not prevail, we pray you to deal, as in your discretions you shall think fittest for the general good and safety of the plantation and preservation of our privileges. And because we would not omit to do anything which might strengthen our right, we would have you (as soon as these ships, or any of them, arrive with you, whereby you may have men to do it) send forty or fifty persons to Massachusetts Bay to inhabit there, which we pray you not to protract, but to do it with all speed; and if any of our company in particular shall desire to settle themselves there, or to send servants thither, we desire all accommodation and encouragement may be given them thereunto, whereby the better to strengthen our possession there against all or any that shall intrude upon us, which we would not have you, by any means, give way unto; with this caution notwithstanding—That for such of our countrymen as you find there planted, so as they be willing to live under our government, you endeavor to give them all fitting and due accommodation as to any of ourselves; yea, if you see cause for it, though it be with more than ordinary privileges in point of trade."

Immediately after the arrival of the ships referred to in the above letter, Thomas Greaves and Rev. Francis Bright, with a party of colonists, were dispatched for Massachusetts Bay to take possession of the lands included in their patent and silence the claims of Oldham and Dorrell and Breton. The precise date of their arrival at Charlestown is rendered doubtful by the uncertain statements of different historians. It is probable that Thomas Greaves and the letter from which the above extract is taken arrived at Salem in the "George Bonaventure" on the 22d of June. It seems also probable that Higginson and Bright arrived in the "Talbot" and "Lion's Whelp" on the 29th of June, and yet the conclusion reached by Frothingham, in his "History of Charlestown," is that Greaves and Bright reached Charlestown on their expedition from Salem on the 24th of June. It does not even appear sure that Ralph and Richard and William Sprague, already referred to as settlers of Charlestown, were not companions of Greaves and Wright, instead of their forerunners. At any rate, it is certain that about the last of June or the first of July, the settlement of Charlestown was definitely made, and during the year 1629 Higginson wrote: "There are in all of us, both old and new planters, about three hundred, whereof two hundred of them are settled at Neihum-kek, now called Salem; and the rest have planted themselves at Masathulets Bay, beginning to build a towne there which wee doe call Cherton on Charles Towne." There seems, however, to be a concurrence of opinion, after attempts to reconcile conflicting statements, that the day of the arrival of Greaves, the agent of the Massachusetts

Colony, at Charlestown, was June 24th, old style, or July 4th, new style, and that therefore that is the date of the foundation and settlement of the town.

At this place a settlement was made with the consent of John Sagamore, the local native chief of a tribe of the Pawtuckets, a chief "of gentle and good disposition, a handsome young man conversant with us," as Thomas Dudley said, "affecting English apparel and houses, and speaking well of our God."

On the arrival of a second company following the lead of Endicott about one-third of the number more than one hundred in all, proceeded to Charlestown. On the arrival of Winthrop, in 1630, with a company of fifteen hundred persons, in a well-equipped fleet fitted out in England at an expense of more than twenty-one thousand pounds sterling, the Charles and Mystic Rivers were speedily explored, and Charlestown was selected as the place for the settlement of the Massachusetts Colony. At that time the proximity to tide-water, the two rivers, the Charles and Mystic, and the scattered lands which had been cleared by the natives, made the spot as attractive as any which could be found in the territory of New England. The presence of the Indians was, however, a constant menace to the peace and safety of the settlement, which demanded the utmost sagacity and watchfulness to guard against. Sagamore John made his home upon the creek which runs from the marshes between Powder Horn Hill and Winnisimmet into the Mystic. While he was the nominal ruler of the tribe, his mother, the Squaw Sachem and the widow of Nanapashemet, the old ruler, was the actual head of the tribe.

During the prevalence of small-pox in 1632, the Squaw Sachem and her two sons, Sagamore John and Sagamore James, died, and Wenepoygen, a younger brother, became chief. He was given by the settlers the name of George Rumney Marsh, from the place where he lived, on the southern border of the present town of Malden. Until 1851 he entertained kindly feelings towards the colonists, when he made claims to land which he declared had been the property of his brother, Sagamore John, which the General Court finally attempted to settle by ordering twenty acres to be laid out for him to make use of. After the death of his mother, the Squaw Sachem, he became the chief of the Pawtuckets and the nominal head of the Nipmucks, who occupied lands towards the Connecticut River. He joined King Philip in the war of 1675 and 1676, and, when taken prisoner, was sent a slave to Barbadoes. Finally released, he returned to Massachusetts, and died the last Pawtucket sachem, in 1684.

Notwithstanding the near presence of the natives, the people of Charlestown began at a very early period to push out into the adjacent country, and within and without the borders of that town to settle wherever they could find land suited to their needs. New colonists were constantly arriving from England,

and during the first ten years after the arrival of Winthrop it is estimated that four thousand families had reached the shores of New England, including more than twenty-one thousand persons. They had come from a country where the ownership of land was a prize which only the wealthy were able to secure, and the almost limitless bounds of the western world attracted a continued wave of emigration, with liberal homesteads and farms, almost free of cost, as the expected rewards of their enterprise. The eagerness displayed in our own day by the settlers of Oklahoma and other newly-opened Territories to possess advantageous sites for homes, finds a parallel in the days of our fathers, when almost for the asking the poor English laborer, with only sufficient means to secure a passage across the Atlantic, could become the lord of lands on a footing, so far as ownership was concerned, with the more favored in his English home.

Soon after the settlement of Charlestown a movement was made to establish a church. The Massachusetts Colony had instructed the three ministers, Messrs. Higginson, Skelton and Bright, who were among the members, that in case they could not agree who should "inhabit at Massachusetts Bay," they should "make choice of one of the three by lot, and he on whom the lot should fall should go, with his family, to perform that work." Rev. Francis Bright was finally selected, and engaged for £20 for the expenses of his journey, his passage out and back and a salary of £20 per year. He was to receive also £10 for the purchase of books, and a dwelling-house and land, to be used by him and left to his successor in the ministry. If he remained seven years he was to receive one hundred acres of land for his own use. Mr. Bright, however, was not a thorough Puritan, and the increasing non-conformity of the colonists disinclined him to continue as their pastor, and in July, 1630, he returned to England. It was said of him on his departure "that he began to hew stones in the mountains wherewith to build, but when he saw all sorts of stones would not suit in the building, as he supposed, he, not unlike Jonah, fled from the presence of the Lord and went down to Tarshish."

In 1629 Thomas Greaves, the agent of the Colony at Charlestown, sent to England the following description of the country in the neighborhood of his place of settlement:

"This much I can affirm in general, that I never came in a more goodly country in all my life, all things considered. If it hath not at any time been manured and husbanded, yet it is very beautiful in open lands mixed with goodly woods, and again open plains, in some places five hundred acres, some places more, some less; not much troublesome for to clear, for the plough to goe in, no place barren but on the tops of the hills; the grasse and weeds grow up to a man's face in the lowland, and by fresh rivers abundance of grasse and large meadows without any tree or shrubbe to hinder the sith. I never saw, except in Hungaria, unto which I always parallel the countrie in all our most respects, for every thing that is here either sowne or planted prospereth far better than in old England. The increase of corne is here farre beyond expectation, as I have seen here by experience in barley, the which because

it is so much above youre conception, I will not mention. And cattell do prosper very well, and those that are bred here farre greater than those with you in England. Vines doe grow here plentifully laden with the biggest grapes that ever I saw, some I have seenne foure inches about, so that I am bold to say of this countrie as it is commonly said in Germany of Hungaria, that for cattell, corae and wine it excelleth. We have many more hopeful comodities here in this countrie, the which time will teach to make good use of. In the mean time we abound with such things which next under God doe make us subsist: as fial fowl, deere, and sundrie sorts of fruits as musk-mellons, water-mellons, Indian pompeons, Indian pearre, beanes, and many other odde fruits that I cannot name. All which are made good and pleasant through this maine blessing of God, the healthfulness of the countrie, which far exceedeth all parts that ever I have bene in. It is observed that few or none doe here fal sicke, unless of the scurvey, that they bring from aboard the ship with them, whereof I have cured some of my companie onely by labour."

Such letters as this written to England—and there were many—served to excite the adventurous spirit of the age and enlarged the wave of immigration, which was already flowing with full tide on the New England shores. After the arrival of Winthrop, in 1630, the settlement at Charlestown rapidly grew and extended its boundaries. Shawmut or Boston was soon settled.

"Some went without the neck of this town wh^o travell'd up into the main till they came to a place well watered, whither Sir Richard Saltonstall and Mr. Phillips, minister, went, with several others, and settled a plantation and called it Wattertowne. Others went on the other side of Charles River, and then travell'd up into the country and likewise finding good waters, settled there with Mr. Ludlow and called the plantation Dorchester, whither went Mr. Maverick and Mr. Warham, who were their ministers.

"In the meantime Mr. Blackstone, dwelling on the other side of Charles River alone at a place by the Indians called Shawmut, where he only had a cottage at or not far off the place called Blackstone's Point, he came and acquainted the Governor of an excellent spring there without inviting him thither. Whereupon after the death of Mr. Johnson and divers others the Governor, with Mr. Wilson and the greatest part of the church, removed thither: whither also the frame of the Governor's house in preparation at this town was (also to the discontent of some) carried when people began to build their houses against winter and the place was called Boston.

"After these things Mr. Pinchen and several others planted betwixt Boston and Dorchester, which place was called Roxbury.

"Now, after all this, the Indians' treachery being feared, it was judged meet the English should place their towns as near together as could be, for which end Mr. Dudley and Mr. Broadstreete, with some others, went and built and planted between Charlestown and Wattertown, who called it Newtown (which was afterwards called Cambridge).

"Others went out to a place between Charlestown and Salem, called Saugut (since ordered to be called Lynn).

"And thus, by reason of discouragements and difficulties that strangers in a wilderness at first meet withal, though as to some things but supposed, as in this case, people might have found water abundant in this town and needed not to have perished for want, or wandered to other places for relief, would they but have looked after it. But this, attended with other circumstances, the wisdom of God made use of as a means for spreading his Gospel and peopling of this great and then terrible wilderness, and this sudden spreading into several townships came to be of far better use for the entertainment of so many hundreds of people that come for several years following thither, in such multitudes from most parts of old England than if they had now remained altogether in this town.

"But after their departure from this town to the peopling and planting of the towns aforesaid, and in particular of the removal of the Governor and the greatest part of our new gathered church, with the Pastor, to Boston, the few inhabitants of this town remaining were constrained for three years after generally to go to Boston on the Lord's day to hear the word and enjoy the sacraments before they could be otherwise supplied."

Thus by the dispersion of the Colony into adjacent

territory the following towns were established before 1649 :

Boston, in 1630; Dorchester, 1630; Roxbury, 1630; Watertown, 1630; Medford, 1630; Ipswich, 1634; Concord, 1635; Lynn, 1637; Sudbury, 1639; Gloucester, 1639; Haverhill, 1645; Manchester, 1645; Andover, 1646; Marblehead, 1649; Newbury, 1635; Rowley, 1639; Salisbury, 1640; Wenham, 1643; Woburn, 1642; Braintree, 1640; Dedham, 1636; Weymouth, 1635; Hingham, 1635; Hull, 1644. These, with Salem, settled in 1629, were all the towns within the limits of the Massachusetts Colony established before May 2, 1649, the date of the establishment of the town of Malden.

It was not long after the settlement of Charlestown that difficulties arose concerning town boundaries. These were finally settled by the General Court. In 1633 the Court established lines between Charlestown and Newtown or Cambridge by ordering that the land "impaled by Newton men, with the neck thereto adjoining where Mr. Greaves dwelleth, shall belong to the said Newton." The Charlestown bounds were to "end at a tree marked by the said pale and to pass by that tree in a straight line unto the meadowing between the westernmost part of the great lot of land granted to John Winthrop and the nearest part thereto of the bounds of Watertown." The land granted to John Winthrop here mentioned included the acres of the Ten Hills farm. On the 2d of July 1633, the Court also granted to the town of Charlestown "Mistick Side," as it was called, ordering that "the ground lying betwixt the North river and the creek on the North side of Mr. Maverick's, and up into the country, shall belong to the inhabitants of Charlestown." On the 3d of March 1636, another order of Court was made providing that "Charlestown bounds shall run eight miles into the country from the meeting-house if not other bounds intercept, reserving the propriety of farms, granted to John Winthrop, Esq., John Nowell, Mr. Cradock, and Mr. Wilson to the owners thereof, as also free ingress and egress for the servants and cattle of the said gentlemen and common for their cattle, on the back side of Mr. Cradock's farm." No further grants were made to the town after 1640, and not much time elapsed after that date before its boundaries began to be broken by the formation of new towns.

In 1633 William Wood, the author of "New England's Prospect," gives the following description of Charlestown :

Charlestown, a small town in Charlestown, which is another name for the town of Boston. This town is situated on the North side of the Mistick River. This town is the most pleasant and healthful place in the country, being so near the water, that the air is sweet and clear, and the water is so good, that it is fit to drink. The town is so situated, that it is easy to come to and from the country, and to provide for themselves farms in the country for their better subsistence. At this town there is kept a ferry-boat to carry passengers over Charles River, which between the two towns is about four miles long. It is a very pleasant ride forty ships at a time. It is higher than a broad bay, being about two miles long. It is a very pleasant place to live in, and is fit for a town. Towards the northwest of this bay is a great creek, upon whose shore is

situated the valley at Medford, a very fertile and pleasant place and fit for more inhabitants than are yet in it. This town is a mile and a half from Charlestown." "The next town is Mistick, which is three miles from Charlestown by land and a league and a half by water. It is seated by the water side very pleasantly; there be not many houses as yet. At the head of this river are great and spacious ponds whither the Alewives press to spawn. This being a noted place for that kind of fish, the English resort hither to take them. On the west side of this river the Governor hath a farm where he keeps most of his cattle. On the east side is Mister Cradock's plantation, where he hath impaled a park where he keeps his cattle till he can store it with deer. Here, likewise, he is at charges of building ships. The last year one was upon the stocks of a hundred ton; that being finished, they are to build one twice her burden. Ships without either ballast or loading may float down this river; otherwise the oyster bank would hinder them which crosseth the channel."

After the departure of Rev. Mr. Bright from Charlestown, in 1630, whose ministrations were not over an organized church, the first church of Boston was organized July 30, 1630. John Wilson was chosen teacher; Increase Nowell, ruling elder; William Gager and William Aspinwall, deacons. This was the fourth church in New England. The Plymouth Church was the first, the Salem Church the second, the Dorchester Church, organized in England, the third, and the Boston Church the fourth.

This church was first gathered in Charlestown, and at the end of three months removed to Boston. During the two following years the people of both Boston and Charlestown attended this church. On the 5th of June, 1632, Rev. Thomas James arrived at Charlestown, and immediate steps were taken to form a church in that town. On the 14th of October thirty-five persons were dismissed from the Boston church, and on the 21st of that month the first public services were held. The new church was formed November 2, 1632, and Mr. James was chosen pastor. The thirty-five persons forming the church were Increase and Parnel Nowell, Thomas and Christian Richeson, Abraham and Grace Palmer, Ralph and Jane Sprague, Edward and Sarah Convers, Nicholas and Amy Stowers, Ezekiel and Susan Richeson, Henry and Elizabeth Harwood, Robert and Jane Hale, George and Margaret Hucheson, Thomas and Elizabeth James, William and Ann Frothingham, Ralph and Alice Mouall, Richard and Arnold Cole, Richard and Mary Sprague, John and Bethiah Hauke, William Dade, Thomas Minor and Thomas Squire.

In 1633 the relations between Mr. James and his people became so unpleasant that a division of the church was threatened. This division, however, was healed when Rev. Zechariah Symmes arrived in Charlestown and became pastor, as the successor of Mr. James. During the pastorate of Mr. Symmes the town of Malden was established. In 1638 the town of Charlestown voted that a large part of the grant of land which afterwards included Malden should be reserved "for such desirable persons as should be received in," or for "such as may come with another minister." The part so reserved was described as lying "at the head of the five acre lots and running in a straight line from Powder Horn Hill to the head

of North River, together with three hundred acres above Cradock's farm." Before 1640 a few settlers had found their way from Charlestown to the Mistick side, but before the establishment of the town of Malden no church had been organized within that territory. Forming an exception to the general rule, the town preceded the church, and was not its creation. But though no organized church existed, the distance from the parent church at Charlestown rendered it necessary to establish independent religious services, and employ some minister to officiate. It is recorded that at that time, Mr. Sargeant, "a Godly Christian," and some young students from the college broke the seals to the people. As the settlement on the Mistick side grew, the desire soon sprang up in the minds of the people to form both an independent town and an organized independent church. On the 1st of January, 1649, a committee of men living on the Charlestown side of the river was chosen "to meet three chosen brethren on Mistick side," to agree upon the terms of a separation and the boundaries of a new town. The committee reported that, "to the end the work of Christ and the things of his house there in hand may be more comfortably carried on, it is agreed as followeth: that the Mistick side men should be a town by themselves." In accordance with the report of the committee, and in consequence of the assent of the Charlestown men to the formation of the new town, the Court of Assistants, on the 2d of May, 1649, old style, or the 12th of May, new style, "upon the petition of Mistick side men, they are granted to be a distinct towne, and the name thereof to be called Maulden."

The name of the town is due to the fact that some of the settlers came from the town in England bearing that name. It was largely the custom, not only among the Puritans of Massachusetts, who had only recently left the scenes of their old English homes, but also of the Pilgrims of Plymouth, who had long been weaned from loving associations of English life, to give to New England towns, and even to hamlets and outlying districts and farms and hills and plains, the names with which they were familiar in the land from which they had come. The writer of this sketch owes to some of these names on the estates of early Plymouth settlers the discovery of the spot of their birth, or that from which they had migrated to the New World. Malden in England lies in the county of Essex, about thirty-eight miles from London, and is supposed to be the ancient Camalodunum, once the capital of Cunobeline, an old British King; and the seat of the first Roman Colony in Great Britain. Cunobeline or Cymbeline flourished in the year 4 of the Christian era. Not many years later the Emperor Claudius, after his invasion of Britain, established at Malden a Roman colony, and it is said, made it a place of magnificence and beauty. It was written Maeldune by the

Saxons, being composed of two words—Mael, a cross, and dune, a hill. In the time of the Conqueror it was called Meldone, and subsequently Meaudon, Mauden, Maldon and Malden.

The early records of the town of Malden are lost and therefore no list of its earliest settlers has been preserved. It is known, however, that among them were Joseph Hills, Ralph Sprague, Edward Carrington, Thomas Squire, John Wayte, James Greene, Abraham Hill, Thomas Osborne, John Lewis and Thomas Caule. Of many of these men little is known. Joseph Hills came with his wife Rose from Malden in England. In 1647 he was the Speaker of the House of Deputies and edited the revision of Massachusetts laws printed in 1648, which was the first code of laws established by authority in New England. It was undoubtedly in honor of him that the town was named. He removed to Newbury in 1665.

Ralph Sprague was the oldest of three brothers, all of whom came to Charlestown. The two others, Richard and William, have been already referred to. They were the sons of Edward Sprague, a fuller, of Upway, in Dorsetshire, England. Ralph was about twenty-five years of age when he arrived. In 1630 he was chosen constable and made freeman, and, in 1632, was one of the founders of the Charlestown church. He was a selectman and representative, and a member of the artillery company. He died in 1650, leaving four sons—John and Richard, born in England; Samuel, born in 1631, and Phineas—and a daughter, Mary, who married Daniel Edmonds. His widow, Joanna Sprague, married Edward Converse, and died in 1680.

Thomas Squire was a freeman in 1634, and, in 1636, a member of the artillery company.

After the organization of the town Joseph Hills was chosen its first deputy to the General Court, John Wayte, the first town clerk, and Thomas Squire, William Brackenbury, John Upham, John Wayte and Thomas Caule, selectmen, and Richard Adams, constable.

In 1650 Rev. Marmaduke Matthews was invited to settle as pastor over the church in Malden, which until that time had no ordained minister. Mr. Matthews was born in Swansey, in Glamorganshire, in Wales, in 1605. It is known that in 1623 he was a scholar in All Souls' College, Oxford. He arrived in Boston from Barnstable, England, September 21, 1638, and was first settled over the church in Yarmouth, in the Colony of Plymouth, where he went with its earliest settlers. Nathaniel Morton, in "New England's Memorial," speaks of him as one "of the Godly and able Gospel Preachers with which the Lord was pleased of his great goodness richly to accomplish and adorn the Plymouth Colony." He left Yarmouth about the year 1647, and removed into the Massachusetts Colony.

Previous to the invitation extended to Mr. Matthews to settle in Malden, invitations were sent to

Mr. Miller, of Rowley, Mr. Blenman, John Wilson (son of the Boston minister), Samuel Mather, Ezekiel Cheever and several others. But difficulties, soon after the settlement of Mr. Matthews, arose in the church. In 1649 the people of Hull, where Mr. Matthews had preached, asked the General Court for "encouragement" to him to return to them. At that time the Court assisted feeble churches, and the encouragement asked for was financial aid from the Colonial treasury. The Court replied—"that it in no way judged it meet to grant the inhabitants of Hull their desire," and further said that they found several erroneous expressions, "others weak, inconvenient and safe," for which it judged it proper to order that Mr. Matthews should be admonished by the Governor in the name of the Court. It was true that the preaching of Mr. Matthews was peculiar, and his doctrinal opinions were different from those of other New England ministers. Before his settlement in Malden the churches of Charlestown and Roxbury remonstrated with their Malden brethren against his ordination. In 1650 Mr. Matthews asked of the Court the privilege of explaining his language to which exceptions had been taken, and, on the 22d of May, the Court ordered that he should have a hearing at the house of Mr. Philips, of Boston, before the elders of Boston, Charlestown, Roxbury and Dorchester. The explanation at the conference was not satisfactory, and at the General Court held on the 7th of May, 1651, a bill was presented complaining of the "former and later miscarriages" of Mr. Matthews, and he was ordered to appear and make answer. After a hearing it was determined that he "had formerly given much offense to magistrates, elders and many brethren by unsafe and unsound expressions in his public teaching; that he had failed to give satisfaction to those magistrates and elders who had been appointed for the purpose at his request; that he had since delivered other unsafe and offensive expressions; that magistrates, ministers and churches had written to the church in Malden to give information of these offences, and to advise against proceeding to ordain him; and that yet, contrary to all advice and the rule of God's Word, as also to the peace of the churches, the church of Malden hath proceeded to the ordination of Mr. Matthews; therefore, taking into consideration the premises and the dangerous consequences and effects that may follow such proceedings, it orders that all the offences touching doctrinal points shall be duly considered by a committee of nine of the magistrates and Deputies." The committee was authorized to call to its aid the reverend elders, and was directed to report at the next session of the Court. The Malden church was also ordered to appear and answer to the complaint of ordaining their minister under such circumstances. The nine magistrates sitting in the case were, Simon Bradstreet, Samuel Simonds, William Hawthorne, Edward Johnson, John Glover, Eleazer Lusher, Dan-

iel Gookin, Richard Brown and Humphrey Atherton. Mr. Matthews was required to appear on the 11th of June, 1651, and on the 15th he submitted the following so-called confession to the council:

"To ye Honored Committee of ye General Court, appointed to examine some doctrinal points delivered att Hull and since yt time at Malden, by M. M.

Honored of God and of his people :

"Having given you an account of my sense and of my faith in ye conclusions, wick were accused before you (or others) should count that faith a fansie, and that sence to be non-sence, I desire yt God may forgive them : I doe, conceaving yt such doe not yet see well know what they doe, as they shall know hereafter.

"Yet, in case yt this should reach any satisfaction to such as yett unsatisfied with my expressions, for to know that I doe acknowledge yt there be sundrie defects in sundry points yt I have delivered; I doe hereby signifie yt through mercy I cannot but see and also ingeniously confesse yt some of my sayings are not safe nor sound in the superlative degree, to-wit: they are not most safe, nor yett eyther sound or safe in a comparative degree; for I easily yeald yt not only wiser men probably would, but also I my self possible might have made out x's mind and my own meaning in terms more sound and more safe than I have done had I not been too much wanting, both to his sacred majesty whose unworthy messenger I was, and also to my hearers, and to my self, for wch I desire to be humbled, and of which I desire to be healed by ye author of both. As I do not doubt but yt conscientious and charitable-hearted Christians (whose property and practice it is to put upon doubtfull positions not ye worst construction but ye best) will discern as I doe, yt there is a degree of soundness in what I doe own, though but a positive degree.

"However it is and (I trust) forever shall be my case to be more circumspect than I have hitherto been in avoyding all appearances yt way for ye time to come yt soe I may ye better approve my self, through ye grace of Christ and to ye glory of God, such a workman as need not be ashamed. In ye interim I remayne amongst his unworthy servants ye most unworthy, and:—

Your accused and condemned
fellow-creature to commend in ye
things of Christ.

"MARMADUKE MATTHEWS.

"Boston, this 13th of ye 4 month, 1651."

The above confession was not held to be satisfactory, and the marshal was ordered to levy on his effects to pay the fine which was imposed upon him. As no effects could be found beside his library, it was ordered that the execution be "respite until other goods appear besides books." In the mean time he remained with the Malden Church, retaining its confidence and esteem. On the 28th of October, 1651, the following petition, signed by the women of his church, was sent to the General Court :

"To the Hon'd Court :

"The petition of many inhabitants of Malden and Charlestown of Misticke side humbly sheweth :

"That the Almighty God, in great mercie to our souls, as we trust, hath, after many pray-ers, endeavors and long waiting, brought Mr. Matthews among us and put him into the work of the ministry, by whose pious life and labors the Lord hath afforded us many saving convictions, directions, reproofs and consolations; whose continuance in the service of Christ, if it were the good pleasure of God, we much desire; and it is our humble request to the honored Court that you would please to pass by some personal and particular failings (which may, as we humbly conceive, be your glory, and no grief of heart to you in time to come), and to permit him to employ those talents God hath furnished him withal; so shall we, your humble petitioners, with many others, be bound to pray, &c. (signed).

"Mrs. Sergeant.

But notwithstanding this petition and a subsequent further confession of Mr. Matthews, the Court refused to remit the fine, and in October, 1651, arraigned the Malden Church for persisting in the ordination of their minister. In their answer to the arraignment the church said, "We know of no law of Christ or of the country that binds any church of Christ not to ordain their own officers without advice of magistrates and churches. We freely acknowledge ourselves engaged to any that in love afford any advice unto us. But we conceive a church is not bound to such advice, any farther than God commends it to their understanding and conscience. Our laws allow every church free liberty of all the ordinances of God according to the rule of the Scripture; and in particular, free liberty of election and ordination of all their officers from time to time, provided they be pious, able and orthodox, and that no injunction shall be put upon any church officer or member in point of doctrine or discipline, whether for substance or circumstance besides the institutions of the Lord."

The answer was of no avail, and on the 31st of October, 1651, a fine of fifty pounds was levied on the estates of three of the members of the church, who were required to assess the sum on the remainder of the offending brethren. Finally the fine of the ten pounds against Mr. Matthews was remitted, and ten pounds of the fine levied on the church members were remitted, and in the course of the ten following years the remaining forty pounds were paid.

In 1652, Mr. Matthews left Malden, and after preaching a short time in Lynn, returned to England, where he became vicar of the St. John Church in his native town of Swansey. After the accession of Charles the Second to the throne, under the Act of Uniformity, passed in 1662, he gave up his living rather than yield to the requirements of the law. After twenty years, during which, as he said, he was "comfortably maintained by the children of God, by his own children and by the children of the world," he died in 1683.

Though it is no part of the writer's plan to present in this chapter anything more than an outline of the ecclesiastical history of Malden, leaving to the pen of another the delineation of its details, the experience of the Malden church in its earliest pastoral relations is here included as essential to a correct portrayal of

the methods and principles of the government by which Massachusetts Colony was controlled, and under which the various towns came into being.

In the Plymouth Colony it was different. While the Puritans of Massachusetts brought with them the narrow spirit against which they had contended in the Old World, the Pilgrims of Plymouth, almost forgetful of the persecutions from which they had suffered, weaned during their residence in Holland from the ties which had once bound them to their English home, and chastened by their long exile into a new life in which old resentments had no place, permitted in their little communities the freest scope to individual freedom of opinion on matters pertaining to the church. So long as the spirit of the Pilgrims prevailed in the Plymouth Colony, it had never failed to exert an influence in mellowing and softening the asperities of its more rigid neighbor. But in later years, when the tide of population had flowed in from Massachusetts to settle its towns and control its legislation, then and not till then were laws, betraying a narrow and persecuting spirit, copied from the Massachusetts Code and placed on its statute-books.

In 1654 Mr. Matthews was succeeded by Michael Wigglesworth. Mr. Wigglesworth was born in England in 1631, and at the age of seven years arrived at Charlestown with his father and family. They removed to New Haven shortly after, and after preparation for college under Mr. Ezekiel Cheever, he entered Harvard, and graduated in 1651, one of a class of ten, which included, besides himself, Seaborn Cotton, son of Rev. John Cotton; Thomas Dudley, son of Governor Thomas Dudley; John Glover, Henry Butler, Nathaniel Pelham, perhaps a son of Herbert Pelham, the first treasurer of the college; John Davis, Isaac and Ichabod Chauncy, sons of Rev. Charles Chauncy, of Scituate, but afterwards president of the college, and Jonathan Burr. After graduating, he became a fellow and tutor at Harvard, and Increase Matthews, one of his pupils, said of him that, "With a rare faithfulness did he adorn his station. He used all the means imaginable to make his pupils not only good scholars, but also good Christians, and instil into them those things which might render them rich blessings unto the Churches of God. Unto his watchful and painful essays to keep them close unto their academical exercises, he added serious admonitions unto them about their inferior state; and (as I find in his reserved papers) he employed his prayers and tears to God for them, and had such a flaming zeal to make them worthy men, that upon reflection, he was afraid lest his cares for their good and his affection to them should so drink up his very spirit, as to steal away his heart from God."

Mr. Wigglesworth, as might be expected from his appointment as a tutor at Harvard, was a scholar of large attainments and culture, and in 1662 published a poem entitled "The Day of Doom," of which two editions were published within four years, the first of

which was of 1800 copies. Altogether seven editions have been issued in this country and one in England. In 1662 he published a poem on the sanctification of afflictions, of which at least five editions have been published. His ministry continued until his death, June 10, 1705, during which he was prevented from preaching some years by ill health, and was aided in his ministry at different times by three colleagues. The first was Benjamin Bunker, who was ordained December 9, 1663, and remained in service until his death, March 12, 1669. Mr. Bunker was the son of George Bunker, of Charlestown, and was born in that town in 1635. He graduated at Harvard in 1658, one of a class of seven. The second was Benjamin Blackman, who was settled about 1674, and left in 1678. He was the son of Rev. Adam Blackman, of Stratford, Connecticut. After leaving Malden he preached in Scarborough, Maine, from which place he removed to Saco, which town he represented in the General Court in 1683. The third was Thomas Cheever, who was ordained July 27, 1681, and was dismissed May 20, 1686. He was the son of Ezekiel Cheever, and graduated at Harvard in 1677. After many years of retirement, he was ordained the first pastor of the first church in Chelsea, October 19, 1715, where he remained until his death, in 1750, at the age of ninety-one years.

The connection of the family of Rev. Mr. Wigglesworth with Harvard College was a remarkable one. His son Edward, a graduate at that college in 1710, was its first Hollis Professor of Divinity, and continued in office forty-three years until his death, in 1765. Edward, the son of Edward, a graduate in 1749, succeeded his father in office and continued in service twenty-six years until his resignation, in 1792. The last Edward was succeeded in the professor's chair by Rev. David Tappan, grandson of Samuel Tappan, of Newbury, who married Abigail, daughter of Rev. Michael Wigglesworth.

After several ineffectual efforts to settle a successor to Mr. Wigglesworth, on the 1st of July, 1707, the Malden Church was presented by the grand jury for being without a minister and was ordered to obtain one at once. Several more attempts were made to secure a pastor, all of which failed until the 14th of September, 1708, when Lieutenant Henry Green and John Green, in behalf of the town, informed the Court "that they have had several meetings of the church, and one of the town, in order to the accommodating of that affair, but can make nothing take effect; but yet are in a very unsettled and divided frame and so like to continue and leave themselves to the pleasure of the Court." The Court, however, ordered "that Mr. Thomas Tufts is a suitable person qualified for the work of the ministry in Malden, and see cause to settle him there in that work, and further ordered the town of Malden to pay him for his maintenance during his continuance in said work amongst them, after the rate of seventy pounds money per annum; the

same to be levied upon the respective inhabitants of the town, according to their respective proportion to the province tax for the time being."

In the mean time, while the Court was thus considering the matter, an invitation had been extended to Rev. David Parsons, of Springfield, who made his appearance in Malden to preach on the Sunday when Mr. Tufts entered on his ministry in compliance with the order which the Court had issued. A committee applied to the Court in behalf of the church to suspend its order, and on the grant of their petition Mr. Parsons was ordained early in the year 1709. In 1721 he was dismissed and removed to Leicester, where he was installed September 15, 1721, and dismissed March 6, 1735. Mr. Parsons graduated at Harvard in 1705, in the class with Edward Holyoke, who was president of the college from 1737 to his death, June 1, 1769. He died in Leicester in 1737.

Rev. Joseph Emerson succeeded Mr. Parsons and was ordained October 31, 1721. He was the son of Rev. Joseph Emerson, of Mendon, and was born in Chelmsford April 20, 1700. He graduated at Harvard in 1717, and married, December 27, 1721, Mary, daughter of the Rev. Samuel Moody, of York, Maine, by whom he had nine sons and three daughters. Three of his sons were ministers—Joseph, of Pepperell; William, of Concord, and John, of Conway. His grave-stone, in Malden, says: "Here lies interred the remains of that learned, pious and faithful minister of the Gospel, the Rev. Mr. Joseph Emerson, late pastor of the First Church in Malden, who very suddenly departed this life, July the 13, Anno Domini 1767, in the 68th year of his age, and forty-fifth of his ministry. How blessed are the dead who die in the Lord. Precious in the sight of the Lord is the death of His saints."

The successor of Mr. Emerson was Rev. Peter Thacher, who was ordained September 19, 1770. He was the son of Oxenbridge Thacher, and was born in Milton, March 21, 1752. He graduated at Harvard in 1769, in the class with James Winthrop, Theophilus Parsons, William Tudor and Peleg Wadsworth, and was declared by Whitefield to be the ablest preacher in the Colonies. Mr. Thacher was a delegate from Malden to the convention which framed the Constitution of Massachusetts, and took an active part generally in the transformation scenes of the Revolutionary period. In 1785, on the 12th of January, he was installed as the successor of Rev. Dr. Cooper, in the Brattle Street Church, in Boston, leaving the Malden church after a pastorate of fifteen years. He died in Savannah, Georgia, December 16, 1802, a victim to a disease of the lungs, from which he had sought relief in the milder air of the South.

Rev. Adoniram Judson followed Mr. Thacher, and was ordained January 23, 1787. Mr. Judson was born in Woodbury, Conn., June 25, 1751, and graduated at Yale College in 1775. After his settlement in Malden he was installed at Wenham, December

26, 1792, and at Plymouth, May 12, 1802. In 1817 his connection with the Plymouth Church was dissolved, and having fully embraced the Baptist faith, he preached a few years in Scituate, and there died, November 25, 1826. He married Abigail, daughter of Abraham and Abigail Brown, of Tiverton, Rhode Island, and had four children,—Adoniram, Abigail Brown, Elnathan and Mary Alice. Adoniram, the oldest of their children, was the distinguished missionary at Burmah, and was born in Malden, August 9, 1788. He graduated at Brown University in 1807, and opened a private school in Plymouth, where he prepared for the press a book entitled, "Young Ladies' Arithmetic," and also a work on English Grammar. In 1808, while traveling through the United States, his mind became imbued with infidel views of religion, and with no decided plans as to his course in life, he was for a short time a member of a theatrical company. In 1809, having passed through a season of skepticism and doubt, he joined the Third Congregational Church, in Plymouth, over which his father was the pastor, and after a short time spent at the Andover Seminary, he was admitted to preach by the Orange Association of Congregational Ministers, in Vermont. His ordination took place February 6, 1812. About that time he married Ann Haseltine, and sailed February 19, 1812, for India, with a view to devoting his life to missionary-work. He settled in Rangoon, where he labored for nearly forty years, for the promotion of the cause he had espoused. He acquired a thorough knowledge of the Burmese language, into which he translated the Bible and other books. In 1820 his wife died, and in April, 1834, he married Mrs. Sarah H. Boardman, the widow of George Dana Boardman, a brother missionary. By his second wife he had five children—Adoniram, Elnathan, Henry, Edward and Abby. His second wife died September 1, 1845, and in June, 1846, he married Emily Chubbuck, well known in literature as Fanny Forrester, by whom he had one child, Emily, who married a gentleman by the name of Hanna. Mr. Judson made only one visit to his native country during his whole missionary service, during which he married his third wife. The writer of this sketch saw him during this visit, and the saint-like expression which he wore, together with his intercourse with those about him, gave him the impression of a man who, though lingering among the scenes of earth, seemed to belong to a higher and purer world.

The successor of Mr. Judson in Malden church was Rev. Eliakim Willis. He was born in New Bedford, January 9, 1714, and graduated at Harvard in 1735. He was settled first over the church of the South Precinct of Malden, October 16, 1751. After about forty years' service in that precinct this church was united with the North or First Church, March 25, 1792, and it is probable that he was either ordained about that time, or assumed, by an agreement be-

tween the two churches the pastorate of the reunited church. In order that the reader may understand the reference to the South church, it will be necessary to go back to an earlier date in Malden's ecclesiastical record.

The first meeting-house was built not far from the year 1650, though the precise date of its erection is not known. In 1727, its size proving inadequate to the wants of the congregation, it was proposed to build a new one. Two sites were at first proposed, one near the old church site near Bell Rock and the other in the orchard of the parsonage; but both of them were finally abandoned and the town voted to build "between Lewis' Bridge and the pond on the west side of the country road." Up to that time those who dwelt at "Mistic" Side within the limits of Charlestown, had worshipped with the inhabitants of Malden. In 1726 "Mistic" side was annexed to Malden, including all the territory of Charlestown on the northerly side of "Mistic" River, and the easterly side of North River, except a small strip of land at Penny Ferry, and comprises about one-half of the town of Everett. The members of the church living in the annexed territory were dissatisfied with the location. They said, however, that they would agree to a location selected by a committee of "wise and indifferent men."

Yielding to their wishes, the town voted, on the 17th of November, 1727, to choose a committee of "five eminent men of the colony, to whom the three localities mentioned should be submitted for their decision."

The committee reported in favor of the Lewis Bridge location, but a majority of the Board of Selectmen being south side men refused to put the report on record. The Court, however, interposed and not only required the report to be recorded but ordered the meeting-house to be built between the bridge and the pond, on the site now occupied by the meeting-house of the First Church. The house was raised August 28, 1729, and it is described as being unpainted inside and outside, with the pulpit on the north side opposite the south door which was the principal entrance. Two stairways in the corners led to the galleries, and the record states that "the east stair was for women and the west stair for men, and they could not get together in the gallery without getting over the railing. The first sermon preached in the new church was preached by Rev. Mr. Emerson, August 16, 1730, but very soon after the south side people became dissatisfied and, though contributing to the support of the ministry absented themselves from church worship. In 1733 they petitioned the Court to be made "a distinct Township or Precinct," with Pemberton's Brook as the northern bound. This was opposed by the town and the petition rejected, but in 1734 a council of neighboring churches established the Malden South Church and a meeting-house was built on land given by Jonathan Sargeant for that

purpose. It was built on Nelson's Hill, but it is stated that it was never fully completed, and is represented as having been in 1787 in a dilapidated condition.

Rev. Joseph Stimpson, of Charlestown, was ordained the first pastor of the South Church, September 24, 1735. In 1737 the town was finally divided into two precincts, and the south people were henceforth relieved from bearing their share of the support of two ministers. Mr. Stimpson was a graduate of Harvard in 1720. He was partially disabled from performing his duties as pastor and was dismissed in 1744. He remained in Malden after his dismissal until his death, in 1752.

In June, 1747, Rev. Aaron Cleveland, a native of Cambridge, and a graduate at Harvard in the class of 1735, was installed. He remained in Malden three years, when he removed to Halifax, Nova Scotia, and became a clergyman of the Established Church. He died in Philadelphia in 1754.

Rev. Eliakim Willis, already referred to, succeeded Mr. Cleveland soon after his dismissal. Some opposition was made to his settlement "on account of an inability to support him, and the prospect of the two parishes being united again if his settlement be deferred." When Mr. Judson was ordained in 1787 the same objection was made by a part of the church, who "feared that it would offer an effectual barrier in preventing the mutually wished for union of the two Churches, both of which have severely felt their separation, and thus remaining will probably terminate in the ruin of both." A protest against Mr. Judson's settlement was made by the dissatisfied persons who afterwards left the church and joined the South Church, thus giving a temporary encouragement to the people of the south. The South Church, on the strength of reinforcements, repaired their old meeting-house and struggled on until the dismissal of Mr. Judson opened a way for a return of the new to the old church, a re-union of both and the continued service of Rev. Mr. Willis as the pastor of the united churches, in 1792. Mr. Willis remained as pastor until his death, which occurred March 14, 1801. His funeral took place on Wednesday, March 18th, and Rev. Messrs. Roby, Prentiss, Osgood, Thacher, Lothrop and Eliot attended as pall-bearers. Rev. John Lothrop made the first prayer at the funeral, Dr. Peter Thacher preached the sermon and Rev. Mr. Prentiss made the concluding prayer.

Rev. Aaron Green succeeded Mr. Willis, having been ordained September 30, 1795, as his colleague. He was born in Malden, January 2, 1765, and graduated at Harvard in 1789. On the 8th of August 1827, he resigned his pastoral charge and soon after removed to Andover, where he died December 23, 1853, the last survivor of his class. During the pastorate of Mr. Green, Samuel Shepard, a Baptist, arrived in Malden in 1797 and preached a sermon which planted the seed from which the Baptist Society of Malden finally sprang. Regular services were established in 1800,

first in a school-house and afterwards in a barn when the school-house was closed to the "Schismatics," as they were called, and on the 27th of December, 1803, the first Baptist Church with a membership of forty-two persons, was formally recognized by a council of the neighboring churches. In 1804 a meeting-house was built on Salem Street, on a site now endowed in the Salem Street Cemetery. This house was occupied until 1843, when a new meeting-house was built at the corner of Salem and Main Streets. The present Baptist meeting-house was built on the same site, after the destruction of the two preceding it by fire.

In 1802, also during the pastorate of Rev. Mr. Green, the meeting-house of the First Church was taken down and replaced by the present brick structure, which has been several times enlarged and remodeled. It originally had two towers or cupolas, in one of which a bell was hung, presented to the church by Timothy Dexter, of Newburyport.

During the pastorate also of Mr. Green the First Church suffered another depletion by the formation of the Methodist Society in North Malden. In 1813 most of the people in that section of the town were Republicans in politics, and became much excited by the delivery of a sermon in the old church strongly inclining to Federalism. A new society was consequently formed, which gradually drifted into Methodism, and became the parent of the present Methodist Episcopal Church in Malden Centre. The new society held its first meetings in the house of James Howard, and afterwards in one of the school-houses of the town. Services were held in the school-house on School-house Hill until 1825, when a meeting-house was built on Main Street. In 1843 the meeting-house now used was built.

In this sketch of Malden only one additional event in its ecclesiastical history will be referred to, and with that event the divisions and subdivisions of the First Church will end. After the formation of the Baptist and Methodist Societies, that church passed through a most important experience, and one which, so far as its doctrinal life was concerned, radically changed its current. Mr. Green, who was not inclined to preach doctrinal sermons, belonged to the Arminian School, and the majority of his people were far from displeased with the expression of his liberal sentiments. There was even among some of them an inclination towards Universalism. The seed sown by him only needed some crisis in the church to develop it, and the crisis was reached when, after the resignation of Mr. Green, the selection of a new minister became necessary. In the discussions which preceded this selection, the widely differing sentiments of members of the church showed themselves and the struggle between the old and new order of things was a serious one. The struggle ended by the choice of Rev. Sylvanus Cobb, a Universalist minister, who was installed July 30, 1828, against the wishes of a considerable portion of the church, which at once withdrew

and took steps to form a new society. The disaffected members met at first in Sargent's Hall and afterwards in one of the school-houses. A claim was set up that the new society was in reality the First Church and entitled to all its privileges including, the possession of its records. It is not necessary to recur to the unfortunate dissensions of this period, and it is sufficient to state that the new society was organized in 1832 under the name of the Trinitarian Congregational Society, and Rev. Alexander W. McClure was ordained as its pastor. A meeting-house was erected in Haskins Street in 1833, and finally removed to Main Street near the square, where it was destroyed by the famous gale of September 8, 1869. The old society with its new faith, retains the name of the First Parish and worships in the old church built in 1803.

Returning now to the general history of the town, the record states that only a few years after its establishment its people experienced the necessity of more room, and presented the following petition to the General Court.

"To the Hon^d Court now assembled at Boston, the 7th of the 4th mo., 1662, the petition of the inhabitants of Malden humbly shewing;

"That the bounds of our town are exceeding strait, the most of our improved land and meadow being limited about two miles in length and one in breadth; and that also the most part of it by purchase from Charlestown, whereof we were a small branch; from whom also we had all the Commons we were, which is very small and rockie.

"That hitherto we have had no enlargement from the countrie, nor can we have any neere adjoining, being surrounded by sundry townships. That our charges to the countrie and ministry much exceedeth sundry others who have many times our accommodations and as many here do know.

"Our teacher, Mr. Wigglesworth, also hath been long visited with verie great weaknesses from which it is much feared he will not be recovered.

"For these and other weightie considerations, our most humble petition to this much honored Court, is that a tract of lands of about fouret miles square at a place called Pennycooke, may be granted as an addition to us, for our better support and encouragement, in the service of Christ and the Countrie; to be laid out by Mr. Jonathan Danforth or some other artist, and Capt. Ed. Jonson or John Parker.

"So with our heartie prayers to God for your utmost peace and prosperitie, we crave leave to subscribe ourselves.

"yr verie humble servants,

"Joseph Hills,
"Will. Brackenbury,
"John Wayte,
"John Sprague,
"Abra. Hill,
"Tho. Call,
"Job Lane,
"Peter Tafts,
"Robert Harden,
"In the name of the rest."

This petition was rejected, and it was ordered by the Court, "upon information that Pennicook is an apt place for a township, and in consideration of the Lord's great blessing upon the countrie in multiplying the inhabitants and plantations here; and that almost all such plans are already taken up, it is ordered by the court that the lands at Pennicook be reserved for a plantation till so many of such as have petitioned for lands there or at others, shall present to settle a plantation there."

It was not until 1726 that the boundaries of the

town were enlarged. In that year, as has been already stated, "Mystic side" was annexed, including so much of the town of Charlestown as lay on the northerly side of the Mystic River and the easterly side of north river, except a small strip of land at Penny Ferry." Since that time the boundary lines have been changed at various times.

On the 10th of June, 1817, an act was passed setting off from Malden to Medford a tract,—

"Beginning at the boundary-line between said towns, at the point where the creek, running from Creek Head, so called, crosses said boundary line; thence running in a southeasterly direction, by said creek, pursuing the course thereof, to a stake on the southerly side thereof, on the land of Nathan Holden, bearing south fifty degrees east and distant from the place of beginning, in a straight line, about one hundred and twenty eight rods; thence south six degrees west across the Bradbury farm, so called, about two hundred rods, to a stake in the line between said farm and land of Richard Dexter; thence south nine degrees east, so as to divide the land of said Dexter, and passing in a straight line between said Dexter's land and land of Benjamin Tufts, about one hundred and thirty rods to Mystic River, at a stake; thence westerly, by Mystic River, to the old dividing line between said towns, and by said old line to the place of beginning; Provided herein that said lands and the inhabitants thereon shall be holden to pay all such taxes as have been lawfully assessed or granted by said town of Malden, in the same manner as they would have been holden if this act had not been passed."

On the 3d of May, 1850, the town of Melrose was incorporated and set off from Malden, the territory included in the act of incorporation,—

"Beginning at the monument set up at the junction of the towns of Saugus, North Chelsea and Malden; thence running north eighty-eight degrees twelve minutes west to the town of Medford, said line, where it crosses Main Street, so called, being one hundred and sixty-seven feet south of the mile-stone standing on the easterly side of said street, south of the dwelling-house of Joseph Lynde (2d), and on Washington Street one hundred and twenty-two feet north of the land of Robert T. Barrett, on said street, on the most northerly corner of said Barrett's land, adjoining land of John J. Mahoney."

On the 9th of March, 1870, an act was passed incorporating the town of Everett, including that portion of the town of Malden,—

"Beginning at the Stone monument in the line between said Malden and the town of Medford, which is marked number 'three'; thence running easterly and southerly by the centre of a creek and Malden River to the centre of the Malden Canal; thence by the centre of said canal to the range of the north line of Wyllis Avenue; thence by said last-named line and the northerly side of said avenue to Main Street; thence across Main Street to the southerly line of Belmont Street; thence by the southerly side of Belmont Street to Ferry Street; thence crossing Ferry Street, obliquely, to the northerly side of Rich Street; thence north fifty-six degrees east, by the northerly side of Rich Street, fourteen hundred and ninety-one feet to a stake; thence south eighty-four degrees east six thousand and eleven feet to a stake in the line between said Malden and the town of North Chelsea, said stake being two hundred and forty-seven feet northerly from the stone monument in said last mentioned line, which is marked M N C eleven; and thence south-westerly, North-westerly and northerly as the present dividing line between said Malden and North Chelsea, Chelsea, Charlestown, Somerville and Medford runs to the first-mentioned bound."

On the 20th of April, 1877, a portion of the town of Medford was annexed to Malden, beginning,—

"At a stone bound at Creek Head, so called; thence running north-westerly to an angle in the wall on the northeast line of Salem Street forty-eight and one-tenth feet westerly from the east face of the west gate-post in front of William Tolithill's house; thence running northerly parallel with and nine hundred and eighty-six and sixty-six one-hundredths feet distant westerly from the present line dividing Medford and Malden to the line between Medford and Stoneham; thence running

westerly to the Eastman line, to the line between Medford and Malden, thence running southerly by the present easterly boundary of Medford to the point of termination."

On the 20th of February, 1878, the above act was amended so as to make the second and third courses of the boundary lines read as follows:

"Thence running northerly to a stone monument on the southerly line of the town of Stoneham; thence easterly nine hundred ninety and sixty-four one hundredths feet to a stone monument at the intersection of the southerly line of said Stoneham and the westerly line of the town of Melrose."

Though the growth of Malden has, in recent years, been exceedingly rapid, its population has been of course seriously affected by these changes in its boundary lines. Until the present century its increase was slight. In 1800 it numbered only 1059, in 1810, only 1384, and not much more when its territory was first impaired by the annexation of a part to Medford. When the town of Melrose was set off and incorporated in 1850, the population was 4780, of which Melrose took 1260; at the time of the incorporation of the town of Everett, in 1870, its population was 9570, of which Everett took 2200, leaving 7370. In 1875, the population was 10,843; in 1880, 12,017; in 1881, at the time of the incorporation of the city of Malden, about 12,300, and by the recent census, something over 23,000. Various causes have combined to cause the rapid increase of population in these later years. The establishment of railroad communications developed the shoe manufacture and other smaller trades, so that the manufacturing product of the town, which was, in 1837, only \$350,000 per annum, began to increase after the opening of the Boston and Maine Railroad in 1849, and has gone on at more than equal pace with the population.

The Edgeworth Company alone has had an annual product of more than \$2,000,000, and that of the Rubber Shoe Company has exceeded that amount. All the various enterprises which are the necessary consequences of growth have been established, and before the incorporation of the town as a city an ample Fire Department had been organized, a Public Library had been incorporated, and in 1870, a system of water works was completed. The annexation to Medford, in 1877, of about two hundred acres with only about one hundred inhabitants, was neither seriously opposed nor felt. The division of the town in 1870, however, resulting in the incorporation of South Malden as the town of Everett, was made against the earnest opposition of the town. It took from the old town all the territory which was annexed from Charlestown, in 1726, and the southeastern portion of the old town. It was made after a contest continuing through nearly a quarter of a century, and after six ineffectual efforts. It was the old and common story, repeated in the experience of many towns, of an outlying district containing a minority of the population, jealous of its rights and claiming to be oppressed by unjust and inequitable taxation, for the benefit of the majority in the central

town. The rapid growth and increasing prosperity of the mother town has been so great, however, that the dissensions which preceded the division have been healed, and the loss, which at the time seemed irreparable, has long since been forgotten.

Next to the ecclesiastical history of the town, its educational record is one of the most interest. Its schools at the present time are of a high order, and receive the most liberal support from the tax-payers. The early history of the schools is of the most meagre character and only interesting as showing from what small beginnings the present system has grown and how thoroughly, under our free institutions of government, the people of this, in common with other towns, appreciate the necessity of a good common-school education as a condition of public welfare. The earliest reference to schools on the records which has been preserved is under date of 1691, when it is mentioned that Ezekiel Jenkins continued to be the town's school-master. In 1693, John Sprague, Jr., acted in that capacity, and in 1697, John Moulton. John Sprague, who was a resident in the town and town clerk, was in service again in 1699, and recorded in the town books, under date of March 27th, that: "John Sprague chose school-master." The incorrect orthography of Mr. Sprague should not be taken as evidence of his want of education or of a lack of capacity to impart instruction. The writer, who has examined and copied many old records, has found that in the colonial days orthography seemed to be guided by no fixed rules, and that men who we know were men of study and culture, would spell the same word in several different ways and often on the same page.

In 1701 Malden was indicted "for want of a school-master for writing and reading," and in 1702, John Sprague was again "chose scool-marstar for ye year insueing to learn children and youth to Reed and wright and to Refmetick, according to his best skill." His school was kept in four several places at four different times, in the year and he received ten pounds for his service.

In 1703, on the 1st of March, it was "votted that ye scool shall be kep in ye watch-hous for this yeere," and on the 8th of the same month, "by a vote, Ezeckiel Jenkins is chose scool-mastar for the present yeer; and the scoole to be kept at his own hous, he is to have 3 pounds for ye yeer; and ye benefit of ye scollars." This school was doubtless a mixed private and public school, and Mr. Jenkins probably received fees from the pupils. In 1705 Nathaniel Waite was employed and received twenty shillings from the town, and "the benefit of the scholars." In 1708 John Sprague was again chosen schoolmaster and declined, Nathaniel Waite taking his place. In 1709 "Jacob Wilson chose scool-mastar for ye yeer ensueing to laro children To Reed and to wright and Refmetick, and he is to have two shillins paid him by ye town; and he is to have ye benefit of

ye schoolars." In 1710, Moses Hill was employed for a short time, followed in the same year by Thomas Pols, of Boston, John Sprague and Samuel Wigglesworth, of Ipswich. In the same year, too, it was voted that the "school be removed into three parts of the town, the first half year in the center, and one-quarter in ye southwardly end, and one-quarter in ye northwardly end of ye town."

Mr. Wigglesworth's engagement being for six months, it was voted that the school should be kept four months in the parsonage, and the other two months in some house in the north part of the town. With the exception of Mr. Pols and Mr. Wigglesworth, all the teachers up to this time had been Malden men, and Mr. Wigglesworth was a native of the town, being the son of Rev. Michael Wigglesworth, who died during his pastorate in Malden in 1705. Samuel Wigglesworth was the only one of the teachers mentioned who had received a collegiate education. He graduated at Harvard in 1707, and was probably reading for the ministry with Rev. Mr. Parsons, when it was voted that the school should be kept in the parsonage.

In 1711 Mr. Wigglesworth was engaged for an additional six months' term, and it was voted to build a school-house between John Wilson's house and the pound. In 1712 it was voted "yt ye school-house shall be built 20 foots in lengte, 16 foots wide, 6 foots stud between joints," and thirty-five pounds were voted to pay for the construction. It was built by William Green, of Malden, and the contract for the work dated October 27, 1712, was signed by him and by Henry Green, Thomas Newhall, Samuel Sprague and John Green, selectmen of Malden. In 1713 Francis Foxcroft was engaged for six months, with a salary of fifteen pounds, and it was voted "that ye school-house shall be improved for a wach hous when there is an occasion, and nott To disoblige ye school in sd' hous at any time." Mr. Foxcroft was a son of Hon. Francis Foxcroft, of Cambridge, and graduated in 1712.

Thomas Vernon was employed in 1714, and in 1715 John Bishop was engaged for six months, with a salary of £18. In 1717 Daniel Putnam, who graduated from Harvard in that year, was engaged for nine months, and in 1718 Richard Dana was employed "for one quarter, sartin," with the pay of £10 10s. Mr. Dana was the grandson of Richard Dana, who settled in Cambridge in 1640. He was born in Cambridge, July 7, 1699, and graduated in Harvard in 1718, the year of his teaching in Malden. He married the sister of Judge Edmund Trowbridge, and was the father of Francis Dana, chief justice of the Supreme Judicial Court of Massachusetts from 1791 to 1806.

In 1719 Malden was again presented to the Court for want of a grammar school, and ordered to obtain a schoolmaster. In 1720 Josiah Marshal, a Harvard graduate of that year, was engaged for a quarter of a

year, and in 1723 Nathan Bucknam, probably a Malden man, and a graduate from Harvard in 1721, was employed to keep school twelve months. At that time the school was kept five months at the centre of the town and three and a half months each in the north and south parts. In 1726 John Emerson, a college graduate of that year, was employed, and in 1730 £60 were voted for the salary of a schoolmaster, and the school-house, called old, though only eighteen years of age, was given to a poor man, named Thomas Degressha.

In 1732 and 1733 John Sprague was again in the service of the town, and in 1737 it was voted that the school be kept half of the time on the south and half on the north side of Pemberton's Brook. In 1751 Nathaniel Jenkins was engaged for six months for £16, and remained in office forty years. The original occupation of Mr. Jenkins was that of a shoemaker; but with some qualifications for teaching, he placed himself under the instruction of Rev. Mr. Emerson and prepared himself for the profession in which he served so long. He is represented to have been an excellent teacher, and to have kept a school in which, in his later years, the higher branches were successfully taught. A complete history of the school system of Malden up to the present time is impracticable within the space allotted to this sketch. The simple record here given, taken largely from the centennial book of Malden, published in 1850, to which the writer is also indebted for other material, must suffice, with a statement, however, of the system as it is now perfected and managed.

According to the last report of the School Committee, there were in Malden 3412 children between five and fifteen years years of age. Of these, 2317 attended the public schools; 605, the parochial schools; thirty-one, private schools; and 459 were either at home or at work. For the accommodation of the public school children there were fifteen schools. In the High School there were two hundred and thirteen. With the rapid growth of the population the average increase during the last three years of scholars in this school has been twenty. The school was under the management of George E. Gay, as principal, with six assistants.

The Centre School, was under the charge of Lewis A. Burr, principal, with thirteen assistants.

The Maplewood School, with an average attendance of three hundred and ninety-seven, was under the care of Arthur L. Doe, principal, with twelve assistants.

The West School, with an average attendance of three hundred and forty-four, was under Laura A. Leonard, principal, with eleven assistants.

The Belmont School, with an average attendance of two hundred and seventy-two, under John S. Emerson, with six assistants.

The Judson School, with an average attendance of one hundred and fifty-nine, was under Mary F. Grif-fith, with three assistants.

The Emerson School, with an average attendance of one hundred and three, was under Carrie F. Oakman, with four assistants.

The Converse School, with an average attendance of one hundred and thirty-seven, was under Emeline L. Rogers, with three assistants.

The Greenwood School, with an average attendance of one hundred and thirty-four, was under Ella P. Payson, with three assistants.

The Linden School, with an average attendance of ninety-four, was under Abby M. Fellow's, with two assistants.

The Oak Grove School, with an average attendance of sixty-seven, was under Ella M. Coops, with one assistant.

The Coverly School, with an average attendance of one hundred and forty-seven, was under Clara M. Sweetser, with three assistants.

The Pierce School, with an average attendance of one hundred and fifty-six, was under Anna C. Ennis, with three assistants.

Besides these schools there were the Evening School, with an average attendance of ninety-six, under the charge of C. M. Sargent, and the Evening Drawing School, with an average attendance of fifty-one, under the charge of George E. Morris.

The School Committee, according to the last report, consisted of Hon. Joseph F. Wiggin, mayor, chairman *ex officio*—Erastus B. Powers, chairman, Aaron C. Dowse, William H. Hawley, Roswell R. Robinson, Henry A. Fenn, C. Maria Nordstrom, James B. Foster, Wilbur H. Sargeant and William F. Witcher. The superintendent of schools was Charles A. Daniels, and the secretary of the School Committee, Frank E. Woodward.

Intimately connected with the cause of education is the Public Library, which was established by a vote of the town, March 12, 1877. Its establishment was due to a bequest of \$5000, made by John Gardner, of Charlestown, who was a son of Dr. Henry and Sarah (Beecham) Gardner, and was born in Malden, April 19, 1813, and died March 16, 1876. The library was opened to the public February 14, 1879, with 3643 volumes, and at the close of the first year 1870 volumes had been added. At the close of the second year the shelves contained 6112 volumes and 670 pamphlets, besides paintings and other articles of value. The number of volumes in the library December 3, 1889, was 16,837, and the number of pamphlets 3990. The total circulation for the year 1889 was 59,084 volumes. For that year the city of Malden appropriated the sum of \$4600 for the support of the library, and the dog-tax, amounting to \$1985.84. There were received by the treasurer from other sources during that year, \$2781.39, making total receipts of \$9367.23.

The expenditures during the year were: For books, \$1238.62; salaries and service, \$2528.13; binding, \$349.69; expenses and supplies, \$1629.86; catalogue

expenses, \$503.58; insurance, \$92; Maplewood delivery, \$200. The following funds are held by the trustees: the Converse Memorial Building Fund, \$25,000; uninvested income from the same, \$2137.75; the Holm Fund, \$5000, and the Lord bequest, \$500. Deloraine P. Corey is president; William F. Lang, secretary; Thomas Lang, treasurer; Henry L. Moody, librarian, and Edward S. Currier, Elisha S. Converse, George W. Walker, William A. Wilde, A. R. Turner, Jr., Daniel L. Millikin, trustees, together with the mayor, chairman of the Board of Aldermen, and president of the Council *ex officio*.

Resuming the history of the town, it will be proper to allude to the part taken by Malden in the various wars which have disturbed the current of New England life. Mr. Corey says, in his sketch of Malden, that "since the days of King Philip the people of Malden had always borne their share in the various expeditions which were sent forth. Malden troopers under Captain William Green, whilom of the Three County Troop, marched on an expedition against the Indians in 1695; and Edmund Chamberlain, a son of that Edmund Chamberlain who fell at the Narragansett fight, who was born after his father was slain, died from disease contracted in the expedition to Port Royal in 1710. About the same time James Hovey was a prisoner in the hands of the French and Indians in Canada. Later nine young men from Malden laid down their lives in the performance of their duty in the celebrated siege of Louisbourg in 1745. In the successive campaigns of the French Wars, which began in 1755 and extended over a period of nearly eight years, the men of Malden took an active part. Lieutenant Simon Wade was wounded in the futile expedition against Crown Point and was killed at the capitulation of Fort William Henry in 1757, when the savages of Montcalm's army, in the presence of their French allies, inhumanly massacred the greater part of the unfortunate garrison. In a company commanded by Dr. Ebenezer Marrow, of Medford, in 1758, were Lieutenants Samuel Burditt and Darius Green, with thirty-one non-commissioned officers and privates of Malden. This company was sent to the westward with the forces under General Abercrombie and participated in the unsuccessful and bloody attempt upon Ticonderoga, in which the colonial troops experienced a heavy loss and were afterwards much reduced by sickness. The Malden men who died in this campaign were James Whittemore, John Burditt, Jr., Ezekiel Floyd, Joseph Jenkins and Nathaniel Wait. In a company in service in 1762 commanded by Captain Moses Hart, of Lynn, were eleven men of Malden, and individuals were scattered in various regiments during the war. This war was the nursery of the Army of the Revolution; and there seems to have been a growing fondness for military life at this time among all classes. The enrolled militia of Malden in 1758 was one hundred and thirty-four men under the command of Captain John

Dexter. In 1763 its officers were Captain Ezra Green, Lieutenant Jabez Lynde and Ensign Thomas Hills."

With the termination of the French Wars the people of Malden settled down once more to the pursuits of a peaceful life. In common with the people of other towns in New England, they had been initiated into the methods of military life and were prepared for a renewal of strife if the welfare of their country demanded it. It is, indeed, a question difficult to answer whether such a readiness would have been found to resist the aggression of the mother country had not the people of New England become accustomed to the use of arms and to the scenes of war in the prolonged struggles with the French only a few years before. It is certain that Washington found in that struggle that military training and discipline which fitted him for a leadership of the armies of the Colonies against the cohorts of a King.

In 1770 the town voted "that we will not use any foreign tea, nor contenance the use of it in our families, unless for sickness, till the revenue acts are repealed." On the 22d of November, 1772, at a meeting held in Boston to consider the subject of the salary of the judges, a letter of correspondence to other towns was adopted. This letter called on the towns to stand "firm as one man," to open a free communication of sentiment with Boston and expressed a confidence that "regard to themselves and the rising generation would not suffer them to doze or set supinely indifferent on the brink of destruction while the iron hand of oppression was daily tearing the choicest fruit from the fair tree of liberty." At a meeting of the town of Malden held on the 5th of January, 1773, to consider the communication from the town of Boston, it was voted that Captain Ebenezer Harnden act as moderator, and that Captain John Dexter, Mr. James Kettell, Mr. Ezra Sargeant, Ensign Benjamin Blauey, Mr. Ezekiel Jenkins, Mr. Thomas Hill, Mr. David Sargeant, Mr. Samuel Sprague, Mr. John Grover, Jr., Mr. Josiah Howard and Mr. Samuel Waitt "be a committee to take into consideration the request of the town of Boston respecting ye late alarming report that stipends are affixed to the offices of the judges of ye Superior Court of Judicature in this province, added to many other grievancies under which the people have for some years groaned, and also to draw up instructions for their Representatives and lay ye whole before the town for their acceptance."

At an adjourned meeting held on the 14th of January, 1773, the committee reported as follows:—

"Having taken into serious consideration y^e state of y^e rights of y^e colonists of this province in particular, as men, as Christians and as British subjects; and also the list of these infringements and injurious violation of these rights transmitted to us from the vigilant and patriotic inhabitants of y^e town of Boston, by their committee of correspondence,

"Resolved, As far as we are capable of Judging that y^e said rights and also y^e list of infringements and violations of the rights are exhibited in a just point of light, and, therefore, with hearts deeply penetrated by the cruel oppressions and indignities with which we are treated by our elder brethren at home, and with y^e shuddering prospects before us, un-

der y^e present critical situation of our public affairs; the alarming inquisitorial Court appointed at Rhode Island; also replete with deep concern for our prosperity,

"Resolved, That we will, at all Times, and upon all just occasions, with our best blood and treasure, in conjunction with our brethren of this province and y^e other provinces, pursue every justifiable and constitutional measure for the obtaining a redress of our insupportable burdens, and in y^e defence and support of our invaluable rights, Civil and Religious, purchased by our ancestors at y^e expense of their treasure and their blood; and therefore

"Resolved, That our Representative be instructed to use his utmost endeavors in the General Assembly that the Honorable Constitutional Judges of the Superior Court of Justice in this province should have a support equal to their importance. Also, that our Representative use his endeavors that an address be again made to our gracious Sovereign for the restoration of our invaded rights and privileges, and that this people may be treated as indeed they are, loyal subjects of Great Britain. Moreover, since it hath pleased the great Governor of the Universe of late to answer y^e prayers of the people by terrible things in Righteousness,

"Resolved, That our Representative be instructed to use his endeavors that a day of humiliation be appointed for our many and great iniquities; and to seek of Him a right way for us and for our little ones and for all our substance, and that a letter of grateful acknowledgments be sent to our worthy Brethren, the inhabitants of Boston, for their vigilance and spirit upon this and many other occasions; with hearty good wishes and prayers that they may see good days according to the time in which they have in peculiar manner seen insult and massacre.

"JOHN DEXTER, per order."

Accompanying the report were the following instructions to the Representative of Malden in the General Court:

"To *Capt Ebenezer Harnden*:

"Sir,—The right of choosing a person to represent us in the General Assembly carries in the nature of the thing the right to instruct him. And though we reposed the highest confidence in you when we chose you into the office, yet we then reserved this right to ourselves to be made use of on extraordinary and alarming occasions.

"Such an occasion we esteem that to be in which we now instruct you. This is the late rumor which has prevailed of salaries being affixed to the Honorable Judges of the Superior Court, etc., paid to them by the King independent of the people, out of a revenue unconstitutionally raised upon us. This we esteem an intolerable grievance, a grievance which strikes at y^e root of our liberties. We now, sir, desire and instruct you to make use of every legal method in your power to obtain redress hereof. Particularly to exert your utmost influence in y^e General Assembly that an ample and honorable support be offered to them out of y^e treasury of this province. We also instruct you to forward in y^e General Assembly an humble address and remonstrance to our gracious Sovereign, begging from his royal clemency and justice relief under this proceeding. This we hope will reach not only y^e royal ear but heart also, and will be followed by y^e best efforts.

"When we chose you to represent us in y^e General Assembly we did it esteeming you a staunch and firm friend to our civil and religious liberties.

"We have no reason to alter our sentiments concerning you in this regard. Yet that your own opinion and sentiments may be confirmed by having those of your constituents, we now, sir, instruct you to exert yourself to the utmost in order to obtain a redress of our present grievances, and a confirmation of those rights and privileges, which to enjoy without molestation induced our forefathers to emigrate from their native land and plant that in which we now dwell.

"We trust, sir, we shall always find you in the number of those members of the General Court who, while they feel and express the warmest loyalty to their Sovereign, steadily and firmly maintain y^e rights of their constituents.

"As we cannot but think that the prevailing iniquities of our Land have induced a righteous God to permit men of violence thus to harass us, so, sir, we instruct you to use your utmost influence in the General Assembly that some effectual measures may be taken in order to carry y^e good and wholesome laws of this province for y^e suppression of immorality into more full and complete execution; and also that a day of humiliation may be observed through the province on account of his favors upon us in these regards, and deprecate his displeasures and ask his divine interposition in favor of our sinking land.

"JOHN DEXTER, per order."

The report and instructions were unanimously adopted, and the meeting adjourned to the 21st of the same month. At the adjourned meeting the following letter was adopted, and it was voted that the clerk should send a copy of the same to the Boston Committee of Correspondence:

"To the respect-able inhabitants of the town of Boston. It is with the utmost satisfaction and pleasure that we have, from time to time, observed your exertions and prudent endeavors to suppress all appearances of tyranny and oppression, and to maintain the past rights and privileges of the Colonies proper. And particularly of late that you have not been intimidated by ye alarming reports that have reached our ears; but as our fears and distresses increase your zeal and resolution stand fast."

"We give you our hearty and sincere thanks for all the salutary measures you have adopted for the common safety. And we heartily wish and desire that every town in this Province and thro' the land may have such a sense of danger and of duty as readily to lend a helping hand in this time of need. By the papers transmitted to you here-with you will find that a committee has been chosen by this town to correspond with yours on matters of publick concernment. We trust you will always find them and us ready to receive any intimation of this nature from you and to join in such measures as may be thought best. And may the great overruler and disposer of all events so direct and succeed your wise endeavors as that ye yoke of tyranny may be entirely broken and New England's yet invaluable privileges inviolate to the latest generations."

"May all vice and immorality be suppressed and piety and virtue reign triumphant. And may you in particular, the respectable inhabitants of Boston, thro' the propitious smiles of heaven see the happy fruits of your unwearied diligence in the cause of liberty. May you always be deemed among the early projectors and constant pursuers of those legal and constitutional methods which may establish our charter rights on a basis durable as the foundations of the earth; and may posterity, yet unborn, rise up and call you blessed."

Another meeting was held on the 13th of December, 1773, at which Captain John Dexter was chosen moderator, and Captain John Dexter, Mr. Ezra Sargeant, Captain Eben Harnden, Dr. Jonathan Porter, Mr. Thomas Hills, Mr. Ezekiel Jenkins, Mr. James Kettell, Ensign Benjamin Blaney and Captain N. Hatch, were chosen a committee to report on certain papers received from the town of Boston relating to the importation and landing of the article of tea. The committee reported at the same meeting a preamble and four resolutions sustaining the inhabitants of Boston in their action.

On the 25th of August, 1774, at a meeting called to consider the affairs of the Province, Ezra Sargent was chosen moderator, and, among other things, it was voted "that the Committee of Correspondence for this town, viz.: Captain John Dexter, Mr. James Kettell, Mr. Thomas Hills, Mr. Samuel Sprague and Captain Ebenezer Harnden, or any three of them, shall attend a general meeting of the committees of the several towns in this county, to be convened at Concord the thirteenth inst., to consult and determine what is expedient to be done at this very critical juncture of affairs; and that the said Committee of Correspondence shall, from time to time, as there may be occasion, consult and advise with the committees of any other towns in this County or Province on the affairs of our public grievances."

The resolves passed at the meeting in Concord were presented to the town at a meeting held on the

9th of September, 1774, and were unanimously approved. At a meeting held on the 20th of September it was voted that Captain Ebenezer Harnden and Captain John Dexter be appointed delegates to attend a Provincial Congress to be held at Concord the second Tuesday in October. It was also voted that a committee, consisting of Captain John Dexter, Captain Eben Harnden, Deacon Joseph Perkins, Mr. Ezra Sargeant, Mr. John Green, Jr., Mr. John Wait, Mr. David Sargeant, Captain Benj. Blaney, Mr. Joseph Howard, Mr. John Bucknam, Mr. Ezekiel Jenkins and Lieut. Amos Upham, be appointed "to hear and consider any matters of controversy that may arise in this town between man and man, between party and party, and use their wise and prudent endeavors for an amicable and pacific accommodation of such differences; and if possible promote that love, peace and friendship which will so much strengthen the common cause as well as prevent unnecessary and expensive law-suits, and that the town will support said committee in their determination so far as they shall appear to be just, and in such manner as shall be thought proper."

At the same meeting it was voted that Capt. Ebenezer Harnden be the representative of the town in the General Court, and on the 28th a letter of instructions to the representative was adopted. Again, on the 27th of May, 1776, instructions to Ezra Sargeant, then representative, were adopted by the inhabitants of the town, and their instructions, here given in full, will close the record of the preliminary steps taken by the town in approaching the War of Revolution:

"To Mr. Ezra Sargeant."

"Sir:—A Resolution of the late Honorable House of Representatives, calling upon the several towns in this Colony to express their minds with respect to the important question of American Independence is the occasion of our now instructing you."

"The time was, sir, when we loved the King and the people of Great Britain with an affection truly filial; we felt ourselves interested in their glory, we shared in their joys and sorrows, we cheerfully poured the fruit of all our labors into the lap of our Mother Country, and without reluctance expended our blood and our treasure in their cause."

"These were our sentiments towards Great Britain; while she continued to act the part of a parent state we felt ourselves happy in our connection with her, nor wished it to be dissolved. But our sentiments are altered; it is now the ardent wish of ourselves that America may become Free and Independent States. A sense of unprovoked injuries will arouse the resentment of the most peaceful. Such injuries these Colonies have received from Britain. Unjustifiable claims have been made by the King and his minions to tax us without our consent. These claims have been prosecuted in a manner cruel and unjust to the highest degree; the frantic policy of Administration hath induced them to send Fleets and Armies to America that by depriving us of our trade and cutting the throats of our brethren they might awe us into submission and erect a system of despotism which should so far enlarge the influence of the Crown as to enable it to rivet their shackles upon the people of Great Britain. This was brought to a crisis upon the memorable nineteenth of April. We remember the fatal day—the expiring groans of our murdered countrymen yet vibrate in our ears!! We now behold the flames of their peaceful dwellings ascending to Heaven; we hear their blood crying to us from the ground, vengeance, and charging us, as we value the peace of their names, to have no further connection with a King who can unfeelingly hear of the slaughter of his subjects and composedly sleep with their blood upon his soul. The manner in which the war has been prosecuted has confirmed us in their

sentiments: Piracy and murder, robbery and breach of faith have been conspicuous in the conduct of the King's Troops, defenceless towns have been attacked and destroyed—the ruins of Charlestown, which are daily in our view, daily remind us of this. The cries of the widow and the orphan demand our attention; they demand that the hand of duty should wipe the tears from their eyes and that the sword of their country should avenge their wrongs. We long entertained hopes that the spirit of the British Nation would once more induce them to assert their own and our rights and bring to condign punishment the elevated villains who have trampled upon the sacred rights of man and affronted the majesty of the people.

"We hoped in vain. They have lost their love to freedom; they have lost the spirit of just resentment. We therefore renounce with disdain our connection with a kingdom of slaves; we bid a final adieu to Britain. Could an accommodation be now effected we have reason to think that it would be fatal to the liberties of America—we should soon catch the contagion of venality and dissipation which has subjected Britain to lawless domination. Were we placed in the situation we were in the year 1773; were the powers of appointing to office and commanding the militia in the hands of Governors, our arts, trades and manufactures would be cramped; nay, more than this, the life of every man who has been active in the cause of his country would be endangered. For these reasons, as well as many others which might be produced, we are confirmed in the opinion that the present age will be deficient in their duty to God, their posterity and themselves, if they do not establish an American Republic. This is the only form of Government which we wish to see established, for we can never willingly be subject to any other King than He who, being possessed of infinite wisdom, goodness and rectitude, is alone fit to possess unlimited power.

"We have freely spoken our sentiments upon this important subject; but we mean not to dictate—we have unbounded confidence in the wisdom and uprightness of the Continental Congress; with pleasure we remember that the affair is under their direction; and we now instruct you, Sir, to give them the strongest assurance that if they should declare America to be a Free and Independent Republic, your constituents will support and defend the measure to the last drop of their blood and the last farthing of their treasure."

Nor was the spirit displayed in this communication a spirit of boasting, which was destined to fail when put to the test. In the repeated calls for men to recruit the armies of the war, Malden performed its full share. The list of soldiers furnished is not a long one, but it must be remembered that at that time the population of the town was only nine hundred and eighty-three, of whom forty-eight were negroes and four hundred and sixteen under sixteen years of age. According to Mr. Corey, in 1767 there were seven work-houses or shops in the town, with a trading stock of two hundred and forty-four pounds. The people had at interest eleven hundred and sixty-nine pounds six shillings and eight pence, and the live-stock of the farmers consisted of eighty-four horses, one hundred oxen and four hundred and eighty-six cows, besides sheep and a few swine. The products of the land were fifty-eight hundred and thirty-nine bushels of grain and six hundred and fifty-two barrels of cider with one thousand and fifty-two tons of hay, of which eight hundred and sixteen tons were salt hay. With these slender resources the people went into the war with a determination and spirit of self-sacrifice in which no town excelled, if there were many that equaled it.

The following list of soldiers of the Revolution is as complete as can be made out from the rolls in the office of Secretary of State:

Enlisted in Capt. Russell's company of Col. Jonathan Brewer's regiment for duty on Prospect Hill, Charlestown, 1775: Gideon Williams.

Enlisted in Epitaph Corey's company, Col. Prescott's regiment, 1775: Stephen Sweetser.

Enlisted in Capt. Abner Cranson's company for duty on Prospect Hill, 1775: Jonathan Mower.

Enlisted in Capt. Wood's company, Col. Jonathan Ward's regiment, 1775: Nehemiah Newhall.

Enlisted in Capt. Nailer Hatch's company, 37th Regiment of Continental Army under Lieut. Col. Wm. Bond, 1775: Nailer Hatch, capt.; Nathan Eaton, lieut.; Elijah Caswell, sgt.; Barnabas Newhall, sgt.; Unite Cox, sgt.; Chas. Hill, corp.; Amos Sergeant, Dan. Knower, Eben. Eaton, Eben. Barnes, Floyd Pratt, Geo. Barrington, John Grover, Joseph Caswell, Josiah Pain, James Pain, Joseph Baldwin, Joshua Gill, Joel Whitmore, John Graham, John Sprague, James Nichols, Joseph Holloway, John Hatch, Nathan Bucknam, Nathan Burditt, Obadiah Jenkins, Prince Hill, Phineas Sergeant, Robert Burditt, Stephen Pain, Solomon Sergeant, Samuel Holloway, Samuel Bishop, Samuel Burditt, Samuel Grover, Solomon Dow, Silas Sergeant, Thomas Wheeler, William Sprague.

Enlisted in Wm. Perkins' company of artillery Col. Richard Gridley's regiment, 1775: Eliakim Caswell.

Marched to Watertown April 19, 1775, Benjamin Blaney, capt.; Nathan Lyndes.

Sent to Point Shirley under Capt. Benjamin Blaney in 1776.

Enlisted in Capt. Stephen Dana's company, Col. McIntosh's regiment 1776, for one month: Nehemiah Oaks, John Sergeant, fifer; Jacob Sergeant, Samuel Waitt, John Jenkins, Joseph Jenkins, Nathl. Floyd, Benjamin Bill, Samuel Oliver, Nathan Hills, John Paine, Joseph Baldwin, Charles Hills.

Enlisted in the Continental Army for three years, 1777: Samuel Barnes, Andrew Bennett, Samuel Bishop, Samuel Berry, John Blackford, John Boyd, John Burnam, Wm. Bucknam, John Blanchard, Josias Bucknam, Robert Bushley.

Enlisted in Capt. Benjamin Edgell's company, Col. John Jacobs' regiment, 1778: Samuel Grover, John Grover.

Among the men who have been specially mentioned as conspicuous in service during the war, were Capt. Benjamin Blaney, Capt. John Dexter, Capt. Naler Hatch, Sergeant Bernard Green, Corporal Timothy Tufts, Pomp Magus, (a negro), Capt. Daniel Waters, Capt. Jonathan Oakes, Dr. John Sprague and Dr. Ezra Green; the last four performing their chief service on the sea. Capt. Waters distinguished himself while in command of the armed ship "Thorn," carrying eighteen guns and one hundred and twenty men, by the capture of the English brigs "Tryon" and "Erskine," carrying thirty-four guns and one hundred and seventy-one men. Capt. Oakes commanded at various times the Brigantine "Hawke" and the ship "Favorite," in which he made successful cruises. Dr. Sprague, in the military service in the early part of the war, was afterwards in the schooner "Active" and surgeon on board the State sloop "Winthrop," in which he remained until the close of the Revolution. Dr. Green, also first in the military service, afterwards became surgeon of the "Ranger," commanded by Paul Jones, and later of the ship "Alexander." But it is making an invidious distinction to mention even their names while there were so many others equally patriotic, and if not performing, yet ready to perform as brilliant service.

In the troubles with the French at the close of the last century and in the War of 1812 Malden took little part and suffered few burdens. Nor was the embargo a matter of special interest to its people. While the people in the sea-ports encountered embarrassments and losses, those only a little removed from the coast saw only the clouds without feeling the storm. Malden from the date of these events led a peaceful life, gradually increasing its population and business, and, as the neighboring city of Boston began to overflow its borders, felt the wave of prosperity and wealth flowing towards the town.

On the 23d of May, 1849, the two hundredth anniversary of the incorporation of the town was celebrated. An oration was delivered by James D. Green, and a poem by Gilbert Haven, Jr. A procession was formed under the marshalship of Augustus L. Barrett, assisted by Aaron Barrett, Charles Eastham, J. P. Lord and Francis Odiorne, and escorted by the Washington Light Infantry, of Boston, with the Boston Brigade Band, and marched to Bell Rock Pasture, where the ceremonies were had. On the platform were seated, besides the Orator and Poet,

Gilbert Haven, the president of the day, John P. Bigelow, the mayor of Boston, Samuel T. Armstrong, Rev. Messrs. Streeter, Neal and Church, of Boston, Rev. Mr. Hague, of Roxbury, Rev. Mr. Whittemore, of Cambridge, Rev. Messrs. Buddington and Ellis, George Washington Warren, Richard Frothingham, Rev. Dr. Ballou, Daniel P. King, Rev. Mr. Upham, Isaac Hill and Rev. Aaron Green. After the ceremonies the procession was again formed, and marched to the dining-pavilion, where accommodations had been provided for two thousand persons. In the evening there was a display of fire-works, and the town was illuminated.

When the War of the Rebellion broke out, the people of Malden were ready to perform their part in the terrible emergency. On the 20th of April, 1861, at a citizens' meeting, it was resolved "that we believe it to be the duty of every lover of his country and his race to assist in crushing out the rebellion and treason now existing in the Southern States" — "and that the Town of Malden, true to its ancient history, will furnish the men and the means to the extent of her ability for this object and we recommend the immediate formation of a company of volunteer militia to aid in preserving the Government of the United States." A committee was chosen to raise funds and purchase uniforms, consisting of J. H. Abbott, George D. B. Blanchard, J. S. Rice, Paschal P. Ware, M. Crocker and Lorin L. Fuller. The sum of \$2526.05 was raised by the committee. At a legal meeting of the town held on the 1st of May, 1861, it was voted that the selectmen, with a committee of seven, be authorized to expend a sum not exceeding \$10,000 in aid of the families of volunteers. The committee consisted of Matthias Crocker, George D. B. Blanchard, Lorin L. Fuller, J. H. Abbott, Richard Ward, G. L. Fall and George W. Wilson.

On the 15th of July it was voted by the town to pay a bounty of \$100 to each volunteer mustered in before the 20th of August.

At the same meeting a recruiting committee was chosen, consisting of David L. Webster, Gilbert Haven, E. S. Converse, R. G. Hill, Caleb Wait, Henry Ramsdell, Henry W. Van Vorhees, Daniel Emmons, Matthias Crocker, John Shackford, Hubbard Russell, Geo. P. Cox, Charles S. Malt, Thomas Darling, John Turck, Matthew Fitzpatrick, James Cutter, James Cruickshanks, Lorin L. Fuller, J. H. Abbott, Hubbard R. Lewis, Wm. H. Hill, Joshua Webster, James McShane, A. H. Evans, C. Cronan, Wm. H. Cromack, Thomas M. Butnam, F. D. Hayward and Henry A. Wentworth.

On the 27th of August, 1862, it was voted to pay a bounty of \$100 each to men enlisted for nine months.

Most of the men raised during the spring of 1861 enlisted in Company K, Seventeenth Regiment, for three years, and a few in Companies A, C, D, H and I of the same regiment.

In 1881 the population of Malden exceeded twelve

thousand, and by an act passed March 31st, in that year, it was incorporated as a city and divided into six wards. The act of incorporation provided that the government should be vested in a mayor, a board of seven aldermen and a Common Council of eighteen. The Board of Selectmen were required to divide the town into six wards, and it was provided that the election of city and ward officers should take place annually on the first Tuesday of December, and that the municipal year should begin on the first Monday of January, following. In 1887 the act was amended so that the city should be divided into seven wards, and that one alderman and three members of the Council should be chosen from each ward. The city officers for the first municipal year, 1882, were as follows:

Mayor.

Elisha S. Converse.

Aldermen.

- Ward 1, Tristram Griffin.
 " 2, John M. Devir.
 " 3, Joseph M. Russell
 " 4, George T. Coverly (Chn.)
 " 5, Lorin L. Fuller.
 " 6, Frank M. Clark.

*Common Council.**Ward 1.*

The mayors of the city since 1882 have been:

John K. C. Sleeper, 1883.

Lorin L. Fuller, 1884-85.

Marcellus Coggan, 1886-87.

Joseph F. Wiggin, 1888-90.

The Fire Department of the city consists of a chief engineer, four assistants, one engineer of steamer, one stoker, five drivers, twenty-eight hosemen, ten hook-and-ladder men, and one secretary to the Board of Engineers. The apparatus of the department consists of two steam fire-engines, one old steam fire-engine stored, two hose-wagons, three hose-carriages, one hook-and-ladder carriage with 333 feet of ladders, one supply wagon, one double pung, three single pungs, one pung for hooks and ladders, one engineer's carriage, one engineer's sleigh, six thousand feet of hose, a fire-alarm, nine horses, four houses and two hundred and fifty hydrants. The amount of money expended during the year 1889 was \$14,842.05.

The amount of money paid out by the treasurer during the same year for city expenses was \$624,888.18. Of this sum \$110,373.43 was paid out for the support of schools; \$15,436.53, for street lights; \$54,909.12, for streets; \$16,424.70 for the Poor Department, and Police Department \$16,076.52.

The following is a complete list of those who have represented Malden in the General Court since 1680:

Job Lane, 1686

Joseph Wilson, 1688-89, '94, 1703-04

Henry Green, 1689, '94, 1703-04

John Sprague, 1690

Phineas Sprague, 1691

John Green, 1692-94, '96

John Greenland, 1695, 1708, '10-15, '17, '20

Edward Sprague, 1696, 1703

Isaac Hill, 1698

Phineas Upham, 1705, '16, '18

Jacob Wilson, 1716, '19, '31, '37

Jonathan Sargent, 1721, '24-28, '30

Samuel Backus, 1722, '39

Timothy Sprague, 1732, '34

Samuel Wayne, 1735-36

Joseph Lynde, 1739, '41, '43

Samuel Green, 1742

Jesse Bucknam, 1744-51, '53

Barnard Townsend, 1755

Benjamin Hills, 1754, '57

Thomas Pratt, 1758-59

Ezra Green, 1760, '62

John Dexter, 1763-64

Ebenezer Harnden, 1765-74

Ezra Sargeant, 1775-77, '81, '84, '86

Benjamin Blaney, 1778-80, '83, '87

Wm. Wait, 1788

Thomas Hills, 1789

Isaac Smith, 1790-95

Barnard Green, 1797

Edward Wade, 1798

Jonathan Oakes, 1799-1802, '06-13

John Green, 1811-16

Ebenezer Harnden, 1813-14

Ebenezer Nichols, 1816-17, '19

Nathan Nichols, 1819-20, '23, '24

Cotton Sprague, 1823-26

Edward Wade, 1826-28, '31, '32

Isaac Stiles, 1829

James Crane, 1832, '35

Wm. H. Richardson, 1832

Wm. Pierce, 1833, '35

Sylvanus Cobb, 1833, '36

Uriah Chamberlain, 1835

George Emerson, 1836

Timothy Bailey, 1836

Daniel A. Perkins, 1837

E. N. Harris, 1837

Leavitt Corbett, 1838

Theodore L. Stiles, 1839

Wm. Nichols, 1839

Wm. Oliver, 1840

Benjamin G. Hill, 1842

Jonathan Oakes, 1843

Samuel S. Upham, 1845

Lemuel Cox, 1847

Thomas Wait, 1850

Wm. Johnson, 1851

Temple Dodge, 1852

Henry W. Van Voorhes, 1853

David Faulkner, 1854

Wm. J. Eames, 1855

David R. Shepard, 1856

George P. Cox, 1857

Phineas Sprague, 1858

J. Q. A. Griffin, 1859-60

Richard Ward, 1861

Caleb Wait, 1862

George W. Copeland, 1863-65

James Pierce, 1866.

In 1867 Malden and Somerville constituted the Fourth Representative District of Middlesex County and were represented as follows:

1867—James Farnes	of Malden
David M. Beal	of Malden
John A. Hughes	of Somerville
1868—John A. Hughes	of Somerville
John Tenney	of Somerville
George P. Cox	of Malden
1869—George P. Cox	of Malden
John Runey	of Somerville
Charles H. Guild	of Somerville
1870—George P. Cox	of Malden
Joseph M. Russell	of Malden
Severin Z. Bowman	of Somerville
1871—Selwin Z. Bowman	of Somerville
Charles H. Guild	of Somerville
Joseph M. Russell	of Malden
1872—Charles H. Taylor	of Somerville
Samuel A. Carlton	of Somerville
John H. Abbott	of Malden

In 1873 Malden, Everett and Somerville constituted the Fourth District, and were represented as follows:

1873—Quincy A. Vinet	of Somerville
Alonzo H. Evans	of Everett
John H. Abbott	of Malden
1874—J. A. Cummings	of Somerville
Horace Haskins	of Somerville
J. K. C. Sleeper	of Malden
1875—James Picot	of Malden
J. A. Cummings	of Somerville
S. Z. Bowman	of Somerville
1876—Charles G. Pope	of Somerville
Theodore N. Fague	of Malden
Alonzo H. Evans	of Everett

In 1877 Malden and Everett constituted the Eighth District, and were represented as follows:

1877—John K. C. Sleeper	of Malden
Henry M. Hartshorn	of Malden
1878—Elihu S. Converse	of Malden
George S. Marshall	of Everett
1879—Elihu S. Converse	of Malden
James P. Magow	of Malden
1880—James P. Magow	of Malden
George S. Marshall	of Everett
1881—Ezra A. Stevens	of Malden
William Johnson	of Everett
1882—Ezra A. Stevens	of Malden
William F. Chester	of Malden
1883—William F. Chester	of Malden
George E. Smith	of Everett
1884—Joshua H. Millett	of Malden
George E. Smith	of Everett
1885—Joshua H. Millett	of Malden
George W. Walker	of Malden
1886—George W. Walker	of Malden
Dudley P. Bailey	of Everett

In 1887 Malden alone constituted the Ninth District, and was represented as follows:

1887—William A. Wilde	1889—Henry E. Turner, Jr.
Daniel L. Milliken	Thomas E. Barker.
William A. Wilde	1890—Thomas E. Barker.
	Henry E. Turner, Jr.

The city of Malden is supplied with water from Spot Pond and Eaton's Meadow, for which it owes a debt of \$580,000, of which the following amounts were issued and became due at the times specified:

\$25,000 at 3 1/2 per cent., issued July 1, 1885, due July 1, 1895.
\$15,000 at 4 per cent., issued Jan. 1, 1886, due Jan. 1, 1901.
\$10,000 at 4 per cent., issued July 1, 1886, due Jan. 1, 1901.
\$40,000 at 4 per cent., issued July 1, 1887, due July 1, 1907.
\$5,000 at 4 per cent., issued Oct. 1, 1888, due July 1, 1907.
\$10,000 at 4 per cent., issued Oct. 1, 1888, due July 1, 1907.
\$25,000 at 4 per cent., issued July 1, 1889, due July 1, 1907.
\$25,000 at 4 per cent., issued Oct. 1, 1888, due July 1, 1908.
\$20,000 at 4 per cent., issued Jan. 1, 1889, due July 1, 1908.
\$15,000 at 4 per cent., issued April 1, 1889, due July 1, 1908.
\$20,000 at 4 per cent., issued Aug. 2, 1889, due July 1, 1908.

The sinking fund, for the liquidation of the water debt, is \$172,931.02, leaving a net water debt of \$407,068.98.

The assessed valuation of the city is \$16,133,537.50, consisting of real estate, \$14,073,900; personal estate, \$2,024,200, and resident bank stock, \$35,437.50, on which the rate of taxation in 1889 was \$15.50 on one thousand dollars.

The funded debt of the city, December 31, 1889, exclusive of water debt, was \$220,650.

A sewage system for the city is now being provided for. The Legislature of 1889 passed an act providing for the building, maintenance and operation of a system of sewage disposal for the Mystic and Charles River valleys. It provided for the appointment of commissioners by the Governor and Council to construct a sewer through the city to deep tide-water. The Commonwealth is to issue bonds for the construction and operation of this sewer, and one-eighth part of the amount is to be assessed in each of the first ten years in each city and town embraced in the system; one-sixtieth part in each of the second ten years; one-thirtieth part in each of the next ten years, and the remainder is equally divided in the remaining ten years. The proportion of the tax is to be determined by three commissioners, appointed by the Supreme Judicial Court, subject to revision every five years on the demand of any city or town interested. The main sewer, thus constructed under the direction of the Commonwealth, is to be used as an outlet for a local system, including the whole city. When both the State and local systems are completed, Malden, now suffering from the want of adequate drainage, will be able to boast of one of the most thorough and effective sewage systems in the Commonwealth.

With these details, this portion of the sketch of Malden, already filling more space than was allotted to it, must close. The writer feels that it should have been written by some son of Malden familiar with its antecedents, its localities, its institutions and its people. He is sure, however, that what it may lack in thoroughness and detail will be more than made up by the history which, it is hoped, will be soon published by that more competent historian, Mr. D. P. Corey, who is now zealously engaged in the work, and to whom the writer wishes to express his thanks for material, giving his sketch even the little merit it may possess.

CHAPTER XXXVIII.

MALDEN—(Continued).

THE ECCLESIASTICAL HISTORY OF MALDEN.

BY REV. JOSHUA W. WELLMAN, D.D.

THE fathers of New England were godly men, who, in their native land, had been trained in the stern school of persecution. While suffering for conscience sake, they had little time to mature plans for the ordering of their anticipated colonial life beyond the sea. The Pilgrims, who landed at Plymouth in 1620, had established the order of their church some years before, but the civil compact under which they were to live was drawn up on board the "Mayflower." The Puritans, who came with John Winthrop to Massachusetts Bay in 1630, had previously determined, to a certain extent, the form of their civil organization, but upon reaching these shores had no very clearly-defined ideas respecting the ecclesiastical polity which they should adopt. Concerning this matter of church-order, however, they were wise enough to receive instructions from leading men in the Plymouth Colony. From the first, they seemed to have entertained the general idea that both godliness and liberty should somehow be made dominant in the realm of civil government, and also in that of religious faith and life. They, as well as the Pilgrims, had left native land, home and kindred, and at peril of life had come into a vast and terrible wilderness that they might secure to themselves and their children religious liberty. They were not slow, therefore, to accept the teaching that they should make the church independent of all extraneous human authority, and then guard its freedom with the utmost vigilance. They were anxious to secure in some way the permanent protection of religious liberty. Upon reaching the New World, the first thing they did in the direction of establishing good order in their community, was to determine the *form* of their church. That question decided, the church itself was at once organized. The manner of organization was simple and reverential.

The church at Charlestown was formed July 30, 1630, and the order of proceedings was as follows :

"On a day solemnized with prayers and fasting, the Reverend Mr. Wilson, after the manner of proceeding in the year before at Salem, entered into a church covenant with Winthrop, Dudley and Johnson. Two days after, on Sunday, they associated with them three of the assistants, Mr. Nowell, Mr. Sharp and Mr. Bradstreet, and two other persons, Mr. Gager and Mr. Colburn. Others were present, and the church so constituted elected Mr. Wilson to be its teacher and ordained him to that charge at Mishawum (Charlestown). At the same time Mr. Nowell was chosen to be ruling elder, and Mr. Gager and Mr. Aspinwall to be deacons." (Palfrey's History of New England, vol. i. p. 316.)

Such was the form of their church. The first churches in New England were distinct, independent, voluntary, local organizations, each having the right

to elect its own officers, to receive and dismiss members, to ordain its ministers, also to dismiss them for cause, to discipline disorderly members, and to engage freely in any work which would promote piety and good morals in the community. Such at least they were in theory.

The large company of "about a thousand" persons, who came over the sea in a fleet under the lead of John Winthrop, did not come as a wholly unorganized body. They had given more thought to the civil than to the ecclesiastical polity under which they should live. This Colony had been organized under a charter, and their government in its final form consisted of a Governor, a Deputy Governor, a Court of Assistants and a General Court. The latter was the legislative body. The Court of Assistants, though exercising legislative power, yet also, with the Governor, constituted the executive branch of the government, and were called "The Magistrates." But how were the magistrates and the General Court to be constituted such? Where should the appointing or electing power be lodged? They had now organized a church, the integrity, the good order, the purity, the freedom and all the rights of which must be preserved at all hazards, lest its members should be plunged again into the fires of persecution. The State must be brought practically under the power of Christian men. The Church and State, therefore, must be so related to each other as to be mutually helpful, the Church securing high moral and religious character in the *personnel* of the government, and the State maintaining the good order, the purity and the faith of the Church. In this way it was supposed that the State would be made a Christian State; in other words, that the entire legislative and administrative government would become in character and power what Christian men would make it. But, for obvious reasons, the churches as such could not be allowed to take part in the administration of civil affairs. The freemen—that is, those to whom alone the right of suffrage had been entrusted—were not all professedly Christians in the evangelical meaning of that term. Could the body of freemen be composed exclusively of such men as were of mature age, and had confessed Christ, and had taken the freeman's oath, that body would naturally elect only godly and able men to places of power in the civil government, and then the State would become practically a Christian State. Accordingly, at the very first meeting of the General Court for elections, in the Bay Colony, which occurred on May 18, 1631, the law was enacted, that for the future the right of suffrage should be given only to such men in the Colony as were members of churches. In due time, on this plan, the body of freemen would be composed entirely of church members, and the General Court would come into being by what was then considered a popular election, but in which only certain members of churches could vote. Whatever may be said of the wisdom of this law, the motive in

the enactment of it was high and pure. Its purpose was distinctly stated in the preamble. It was enacted "To the end, the body of the commons may be preserved of honest and good men."

"The conception," as Mr. Palfrey has justly remarked, "if a delusion and impracticable, was a noble one. Nothing better can be imagined for the welfare of a country than that it should be ruled on Christian principles; in other words, that its rulers shall be Christian men—men of disinterestedness and integrity of the choicest quality that the world knows—men whose fear of God exalts them above every other fear, and whose controlling love of God and of man consecrates them to the most generous aims."¹

The theory was, as has been stated, that the churches should be independent, subject, within the sphere of their own proper action, to the dictation or control of no superior authority, civil or ecclesiastical, and acknowledging Christ only as their head. But ere long and most inconsistently the General Court began to supervise and even direct the action of individual churches; to judge of the qualifications of ministers; to inflict penalties upon churches which ordained ministers without the approbation of neighboring churches, or of the magistrates; to request, and to specify the purpose of, the assembling of synods; to receive the reports of the transactions of such synods, and to exercise the right of approving or disapproving of the same. Thus, strange to say, in the same colony in which the law was enacted that only church members should be allowed to take the freeman's oath, and be invested with the right of suffrage, the supreme legislative body and the magistrates were found to be possessed of an authority in ecclesiastical matters superior to that of the churches themselves. This legal union of Church and State, however well meant, in which only church members could be entrusted with the elective franchise, and in which the civil authorities were invested with a superior power in the management of ecclesiastical affairs, was destined to be the source of great injustice and trouble to individual churches; yet it was continued for sixty years.

In the meanwhile the freemen, or legal voters, who in time were all church members, elected not only the deputies, or members of the General Court, and the magistrates, but also the officers of the precincts or towns in which they lived. The time at length came when all the legal voters in a town-meeting were members of the church. There was no parish, no ecclesiastical society, in the modern sense of those terms. The towns were the only local organizations connected with the church. In a town-meeting the legal voters could transact both civil and ecclesiastical business; and the records of those meetings were at once town records, and what would now be called

parish records. On this limited territory there was a clear organic union of Church and State; but the Church power here was supreme. As a consequence, the secular and religious affairs of the community were so interwoven and blended that it is now extremely difficult to disentangle the ecclesiastical history from the civil history of an ancient New England town. If either history is to be written truthfully and perspicuously, the writer must occasionally state, or at least make intelligible reference to, certain events and transactions that properly belong to the other history. The attempt, however, will be made in the following annals to keep as nearly as possible within the limits of ecclesiastical history.

It should also be said, in a preliminary way, that the sources of information respecting the early history of Malden are unfortunately quite meagre. The town records previous to the year 1673 have disappeared. The existing records of the First Church reach back only to the year 1770. This church, at present date (1890), is two hundred and forty-one years old. Its records covering the first half of this period are lost. Aside from such of the town and church records as have been preserved, a valuable source of historical material is found in "The Bi-Centennial Book of Malden." This small volume was published in connection with the enthusiastic celebration of the two hundredth anniversary of the incorporation of the town, which occurred in 1849. Its authors were a committee appointed by the citizens, and consisting of Rev. A. W. McClure, then pastor of the First Church; Rev. J. G. Adams, then pastor of the Universalist Church; and William H. Richardson, Jr., then a prominent citizen of Malden. The chief purpose of the book was to put on record the memorable public services of that great Anniversary Day. But the committee wisely added a considerable amount of historical and genealogical information, which, if not as ample nor as methodically arranged as might be desired, must yet have been gathered at cost of much laborious and faithful research, and is now of the greatest value. Indeed, in no other one volume can at present be found so much of the kind of material which is indispensable in writing the history of Malden. There is also in "The History of Middlesex County," by Samuel Adams Drake, an invaluable article upon Malden, written with rare historic insight and accuracy, by Deloraine P. Corey, Esq. To Mr. Corey and to the authors of "The Bi-Centennial Book of Malden" the present writer is largely indebted. The additional information that will be presented has been gathered, item by item, from various and widely-separated sources.

THE ORGANIZATION OF THE FIRST CHURCH. - The following account of the origin of the town, and of the First Church in it is given, in quaint language, by Edward Johnson, in his famous book entitled, "Wonder-Working Providence of Zion's Saviour in

¹ Palfrey, *History of New England*, vol. i, p. 115.

New England." Speaking of events which occurred in 1648, he says:

"About this time the town of Malden had his first foundation stone laid by certain persons, who issued out of Charlestown, and indeed had her whole structure within the bounds of this more elder Town, being severed by the broad spreading river of Mistick the one from the other, whose troublesome passage caused the people on the North side of the river to plead for Town privileges within themselves, which accordingly was granted them. . . . The people gathered into a church some distance of time before they could attain to any Church Officer to administer the Seals unto them, yet in the meantime at their Sabbath assemblies they had a Godly Christian named Mr. Sarjant, who did preach the Word unto them, and afterwards they were supplied at times with some young students from the Collegd, till the year 1650."

From this statement we learn that the entire territory of Malden was at first within the bounds of Charlestown; that the people who first settled upon this territory came from "the elder Town," that is, from that part of Charlestown which was on the south side of Mystic River; that the people on the north side, or "Mistick side," as it was called, were moved to "plead for Town-privileges," on account of the "troublesome passage" over "the broad spreading river;" that "the people gathered into a church," and maintained regular Sabbath services of preaching and worship, "some distance of time" before they could obtain a minister; that, during a part of this period, one "Mr. Sarjant" "did preach the Word unto them," and that afterwards a similar service was rendered by young students from Harvard College. Mr. Sarjant was doubtless the William Sargeant who, as Mr. Corey affirms, "was here as early as 1643," and whose lands, "which were possessed by his descendants nearly two centuries, were in the southern part of the town." The fact that he was by occupation a "haberdasher," that is, a seller of small wares, such as ribbons, needles and thread, indicates that he was a lay-preacher, who, doubtless by his godliness and experimental knowledge of Christ and the Holy Scriptures, was able to edify the people. He was admitted to the church in Charlestown, January 10, 1639. He came from England in 1638, and was made a freeman in Charlestown in 1639.

The exact date of the organization of the First Church in Malden is not known. There is evidence that it was not organized before 1649. From the "Bi-Centennial Book" we learn that:

"The Middlesex Registry of Deeds, (Lib 11, pp. 82, 83) contains a record of a defaced agreement (and attestation thereto,) between the Commissioners of Charlestown and Mysticside, for dividing the unappropriated common lands, in which occurs the following clause: 'In consideration, the brethren of Mysticside are, by the providence of God, shortly to go into a church estate by themselves, and for the more comfortable proceeding and carrying on of that work of Christ among them.'—This instrument, it is said, purports to have been drawn by authority of a certain writing bearing date, March 26, 1649. From this it appears that the church at that time was not organized, but undoubtedly was a few weeks after."

Such was the conclusion of Dr. McClure, and it seems to have been well grounded. "The instrument" containing an "agreement" must have been drawn *after* the date of "a certain writing," for it was drawn "by authority" of that writing. That writing

was dated March 26, 1649. It must, therefore, have been *after* that date that "the brethren on Mystic side," were preparing "shortly to go into a church estate by themselves." Very likely the "instrument" was drafted on the same day as the "writing" (only *after* the "writing"), as both appear to have been essential to the consummation of "the agreement." Moreover, that the word "shortly" indicates a period of not more than a few weeks is made quite probable by the fact that the people of Mystic side, at this very time, were taking measures to secure the incorporation of their town. Their petition to the General Court was responded to, on May 11, 1649, in the following laconic Act of Incorporation:

"In answer to the petition of seall inhabitants of Mistick side, their request is graunted, viz., to be a distinct towne of themselves, and the name thereof to be Malden." (Records of Massachusetts, vol. iii. p. 162.)

As late, probably, as March 26, 1649, or sixteen days before the date of the above Act of Incorporation, "the brethren on Mystic side," most or all of whom were doubtless members of some church, as the very term "brethren" would seem to indicate, were preparing "shortly to go into a church estate." It can hardly be doubted that these same "brethren" were the men, or among the men, who petitioned the General Court to incorporate their town. It is quite certain, then, that they were seeking at once the incorporation of their town, and the organization of a church within it, and, more than probable, that they obtained both at about the same time. The date of the organization of the First Church in Malden, therefore, is almost certainly not far from May 11, 1649.

The statements of Edward Johnson are indefinite. Referring, *perhaps*, to the year 1648, he says: "About this time the town of Malden had his first foundation stones laid," but we know that the town was not incorporated until 1649. His subsequent statement, that "the people gathered into a church some distance of time before they could attain any Church officer to administer the seals unto them," gives us no date. For ought he says, the expression "some distance of time" may refer to the period between May 11, 1649, and the date of the settlement of the first minister in Malden. It is absolutely certain that no church was organized in this town before March 26, 1649, for after that date, or at that date, "the brethren" were preparing "shortly to go into a church estate." This is the testimony of a legal document witnessed and recorded. As compared with this legal and positive statement, the careless and indefinite statements of Johnson are of no weight.

Moreover, there is evidence that the chief purpose of the Mystic side men in seeking the incorporation of their town was, that they might enjoy better religious privileges. Richard Frothingham, in his "History of Charlestown," informs us, that as early as January 1, 1649, "a large committee was chosen from

the inhabitants" residing on the south side of the Mystic River, "to meet thres chosen brethren on Mistick side," to agree upon the terms of a separation, and the boundaries of a new town. This committee made an elaborate report beginning: "To the end, the work of Christ, and the things of his house there in hand, may be more comfortably carried on, it is agreed as followeth:" that the Mistick side men shall be a town by themselves, &c. This language indicates that, at that date, the work of Christ had been begun on Mystic side, and that the things of His house were "*in hand*," but not that a church had been organized, and that they were in the full enjoyment of Christian privileges. The truth appeared to be, that they had already established, in an informal way, religious services on Mystic side, which had been conducted for the most part by a Christian layman, William Sargeant, but that now they proposed to organize a church, settle a minister, build a parsonage, and, perhaps, a meeting-house.

When the First Church in Malden was formed there had previously existed in the territory now comprised in the Commonwealth of Massachusetts forty-two churches. Three of these had been organized in England, and transferred bodily to this country. Two of the entire number, however, had removed to Connecticut. The Malden Church, therefore, when formed in 1649, was the forty-first church in Massachusetts. Several of those early churches have, within the last hundred years, ceased to be orthodox Congregational Churches; and at present date (1890) there are only twenty-three orthodox Congregational Churches in this Commonwealth which are older than the First Church in Malden. This church is more ancient than any church of the same denomination within the former limits of Boston. Only one church, indeed, of this order, within the present limits of Boston is older, and that is the First Church in Charlestown (now a part of Boston). The Old South Church, Boston, so famous in history, was organized in 1669, and the Park Street Church as late as 1809. The latter is a young church in comparison with that sisterhood of ancient churches to which the Malden Church belongs.

THE FIRST MEMBERS OF THE CHURCH.—It would be interesting to know more than we do of the men and women who were the original members of this ancient church gathered on Mystic side. But we may be thankful that, while the biography of no one of them has come down to us, we are not left in entire ignorance of their general character. The fact that they "issued out of Charlestown" tells us something. We know what sort of people settled in that town nineteen years before. They were Governor Winthrop's people, godly men and women for the most part, Puritans in faith and character, people of such sterling integrity and worth as the world always has need of—of such moral and religious stamina, indeed,

as are more needed in every community and nation than any other class of people. On board the ships that brought them over the sea they had an abundance of religious services—"Preaching and catechising, fasting and thanksgiving, were duly observed." Winthrop, on the voyage, wrote a little book, entitled "*A Model of Christian Charity*," which evinced that in his own heart was living the spirit of Christ. Before dwelling-houses could have been prepared for all the company they organized the Church of Christ, and established the Christian ministry. Those who joined them during the years immediately following were like-minded. Indeed, no other class of people were permitted to make their homes in the Colony. The colonists speedily pushed out from Charlestown, southwest across the channel to Shawmut (Boston), westward to New Town (Cambridge), and northward across the Mystic River to Mystic side (Malden); and soon to regions still beyond, taking possession of the wild lands, subduing the wilderness and establishing Christian homes. And Cotton Mother, speaking of this people, tells us that, "Wherever they sat down they were so mindful of their errand into the wilderness, that still one of their first works was to gather a church into the *covenant* and *order* of the gospel." (*Magnalia*, vol. i. p. 79.)

As early as 1631, or only one year after the settlement of Charlestown, English people were living on Mysticside. Seven years later the population had come to be considerable; and ten years from that date, or in 1648, the inhabitants on this territory were numerous enough to be moving for the organization of a church. This movement and their previous zeal in establishing and maintaining regular religious services are what we would expect of men and women, who belonged to Governor Winthrop's colony. There were among them some of the first settlers of Charlestown. We know that several of their number came over the sea later. But they all belonged to one and the same class of English people. They were Puritans. They accepted heartily the Calvinistic interpretation of the Scriptures. Their religious beliefs had made them righteous and self-sacrificing, courageous and great lovers of liberty. They feared and loved God. Christ was dear to their hearts, and lived in their lives. Sin and irreligion were hateful to them, prayer and Christian service were their delight. Such in character and faith were the people who founded the First Church in Malden.

Some of the original members of the Malden Church were previously original members of the church in Charlestown. Others of this number joined the Charlestown Church some years after it was formed. Others still, who were among the original members of the Malden Church, may never have united with the First Church in Charlestown. There is evidence that, in some instances, good Christian people resided for several years in Charlestown, and yet were never connected with the church in that town, for the reason

that from the first they expected to remove sooner or later to some other plantation. Edward Johnson, the author of "The Wonder-Working Providence of Zion's Saviour," was one of this class.

He was a prominent man in the Colony, and eminent in Christian service; yet he resided six years in Charlestown without becoming a member of the church there. He then removed to Woburn, and took an active and leading part in the organization of the First Church in that town. Some of the founders of the church in Malden may have pursued a similar course. In that case they removed their church relation directly from some church in the old country to the new church in Malden.

No catalogue of the original members of the Malden Church has been preserved, yet the names of some of them are known. Mr. Corey speaks of "a document in relation to the church, written in 1648," which contains the names of several "of the leading men of Malden." As this document pertained "to the Church," the men whose names it contained probably took part in the organization of the church the next year. "They were Joseph Hills, Ralph Sprague, Edward Carrington, Thomas Squire, John Wayte, James Greene, Abraham Hill, Thomas Osborne, John Lewis and Thomas Caule."

Joseph Hills was a lawyer by profession, and an eminent man, not only in his town and church, but also in the Colony. Dr. McClure places him in his list of "distinguished citizens," and records the following particulars respecting him:

"He was born in 1602; came to New England at least as early as 1639, and was admitted as freeman in 1645. He resided at first in Charlestown, then in Malden, and at last in Newbury, whither he removed in 1657, and where he died February 5, 1688, aged 86 years. He was representative from Charlestown in the General Court for 1647, in which year he was also Speaker. He was for some time captain of the Malden Company, and represented Malden from 1650 to 1656. He was for several years one of the Assistants of the colony. . . . His first wife was Rose Dunster, a sister of Henry Dunster, the first president of Harvard College."¹

Mr. Corey, speaking of the part Mr. Hills took in laying the foundations of the town, says: "He had been engaged in important commissions with the leading men of the government." "He had just completed the famous revision of the Massachusetts laws, which was printed in 1648, and which was the first code of laws established by authority in New England. He came with his wife, Rose, from Maldon, in Essex, England, and in compliment to him, Mystic side is supposed to have received its new name." Mr. Frothingham speaks of him as "the principal character in Malden;" and Edward Johnson describes him as "active to bring the laws of the country in

order, and as "the leader of the Malden band" even before the first town officers were chosen.

Ralph Sprague, one of the founders of the church in Malden, came from England, "at his own cost," probably with Higginson's company, to Salem, in 1629. His wife, Joan, came with him; also two brothers, Richard and William. He was one of the pioneers who, that same year, came through the woods from Salem to the mouth of the Mystic River, took possession of the place on the southern side of the river, afterwards and now called Charlestown, and settled there. Probably he was a member of the church organized at Salem under those godly ministers, Skelton and Higginson. He was certainly a member of the church organized in Charlestown, and which in a few weeks removed to Boston, for his name is in the list of those who, in 1632, were dismissed from the First Church in Boston to organize a new church in Charlestown. This Second Church in Charlestown, now called the First Church, was the church from which the brethren came who organized the church in Malden. Ralph Sprague took the oath of a freeman in 1631, was made constable at the General Court in 1630, held several military offices, and was frequently representative in the General Court. He died in November, 1650.

Edward Carrington, as Dr. McClure informs us, was admitted freeman in Charlestown in 1636; was one of the principal men in Mystic side at the time of the incorporation of Malden. He also seems to have been a man of some wealth and considerable influence.

Thomas Squire came to Charlestown with his wife, Bridget, in Winthrop's company, in 1630; was No. 83 on the list of church members, in Boston; was dismissed in 1632, with others, to organize the new church in Charlestown.

"John Wayet, Esq., was very prominent among the first settlers of Malden. He was the representative of the town in the General Court from 1666 to 1684, and in the last-named year, was Speaker of the House. He served many years also as one of the selectmen." (Dr. McClure.)

James Greene came from England, was in Charlestown in 1646 and in Mystic Side in 1647. He was a member of the church in Charlestown. He and his wife, Elizabeth, were doubtless among the original members of the First Church in Malden. He died March 26, 1687, aged seventy-seven years.

Abraham Hill was made a freeman in Charlestown in 1640, and died in Malden, February 13, 1676. He was the ancestor of the Hills in Cambridge and of several noted families in New Hampshire. His wife's name, perhaps, was Sarah.

Thomas Osborne was in Charlestown in 1644, and was made freeman in 1649. He lived on Mystic side. His wife, Sarah, was one of the sisterhood who "stood up manfully in defence of their pastor, Rev. Mr. Mathews, against the General Court." In 1662 he and his wife were dismissed to the church in

¹ ("Bi-Centennial Book," p. 168.)

Charlestown. The next year he "united with Gould as a Baptist, having embraced the opinions of that sect as early as 1658." (Savage.)

John Lewis came to Charlestown in 1634. His first wife's name was Margaret, and by her he had six children. His second wife's name was Mary Brown, and six children were born to them. He died September 16, 1657.

Thomas Caule, or Call, "a baker, came from England with his wife, Bennett, and three children. He died May, 1676." The name of his second wife was Joanna, and she was one of the brave women who pleaded for their minister before the General Court. (Dr. McClure.)

Such were the ten men who, it is thought, were among "the leading men of Malden" at the time its First Church was organized. Six of them surely were among the original members of the church, and very likely all of them were. As a class, they were evidently men of ability, integrity and influence. They were worthy to be the founders of a Christian Church and to aid in founding a Christian State. Among the original members were also William Sargeant, "the godly Christian" and lay-preacher, and his good wife, Joan. John Upham, who was a leading citizen, held many important offices and trusts in both the town and the Colony, and was "deacon of the church for at least twenty years," and his wife, Elizabeth, were likewise in the list of first members. In the same class, too, without doubt, were most, if not all, of the thirty-six women who, as will later be shown, so honorably and publicly stood up in defence of their minister when they thought him wronged. To this select number others doubtless belonged, whose names, though now unlettered on the pages of the earthly church records, are, we believe, imperishably "written in the Lamb's Book of Life."

The church, which thus began its history early in May, 1649, entered at once and vigorously upon the difficult task of obtaining a minister. The members do not seem to have been unduly fastidious. Within about a year they extended calls to no less than nine candidates, viz., to "Mr. Miller, then at Rowley; Mr. Blinman, Mr. John Wilson, son of the first pastor of Boston; Mr. Samuel Mather, Mr. Ezekiel Cheever, Mr. Lyon, to one of the Watertown officers, to one of the Charlestown church officers and to Mr. John Breck." (Dr. McClure.) Several of these were probably at the time students in Harvard College preparing for the ministry. Some of the list afterwards became distinguished ministers. None of them accepted the call from Malden.

REV. MARMADUKE MATHEWS THE FIRST MINISTER.—The first pastor of the church was Rev. Marmaduke Mathews. He received and accepted a call some time in the early part of the year 1650. The exact date of his settlement is not known. During his brief pastorate he was a sorely afflicted man, but his troubles were not occasioned by unhappy relations

between him and his church, but partly by neighboring churches, and chiefly by the General Court and the magistrates. His case was a remarkable one, and deserves much ampler treatment than we have space to give it.

Rev. Marmaduke Mathews, son of Matthew Mathews, born in 1606, at Swansea, in southern Wales, graduated at Oxford February 20, 1624, at the age of eighteen; arrived at Boston September 21, 1638. His wife, Catharine, united with the First Church in Boston February 6, 1639. He settled in Yarmouth and was the first minister in that town, remaining there from 1639 to 1643. Winthrop calls him a "godly minister." Morton, in his "Memorial," under date of 1642, mentions his name as among "the specialist" of "a considerable number of godly and able gospel preachers," with whom "about that time the Lord was pleased, of his great goodness, richly to accomplish and adorn the Colony of Plimouth," "who then being dispersed and disposed of to the several churches and congregations thereof, gave light in a glorious and resplendent manner as burning and shining lights." Hutchinson speaks of "a set of pious and learned ministers" who were pastors of churches in Plymouth Colony in 1643, and Hubbard affirms that one of this number was Marmaduke Mathews.

Having closed his ministry in Yarmouth in 1643, Mr. Mathews, probably in 1644, removed to Hull and preached in that town, it would seem, several years, for in 1650 he was spoken of as having lately preached in Hull.

The civil authorities in Plymouth Colony appear to have had some dealing with Mr. Mathews before he left Yarmouth. Mr. Frederick Freeman, in his "History of Cape Cod," informs us that even under the jurisdiction of the Pilgrims,

"A strict watch was kept over the churches by the magistracy. No church could be gathered without the permission of the magistrates, and any minister preaching without their approbation was liable to a penalty. Mr. Mathews thus offended, and was fined ten pounds."

But the antiquarians have not yet decided with any unanimity whether he committed this offence through mere inadvertence; or because he did not believe that a minister of Christ, in his beliefs and official service, should be subjected to the will of the civil authorities; or was thus punished because he was judged to have preached erroneous doctrines. Yet Mr. Freeman, in a foot-note, adds the following apparently just remark: "Mr. Mathews has been represented by some of his contemporaries as 'weak and eccentric,' but we are inclined to think the weakness was mere artless simplicity, and the eccentricity the frankness of a man void of subtlety."

The imposition of this fine, however, in 1643, and the troubles connected with it, may have occasioned his departure from Yarmouth, which occurred the same year. The people in Hull were satisfied with his ministry, yet for some reason he left them. They

then petitioned the magistrates of the Massachusetts Colony that he might be *returned* to them. On May 2, 1649, the following remarkable response was made to their petition:

"The Court thinks it no way meet to grant . . . their desire for Mr. Mathews returning to them, nor residing with them, and do declare that they find several erroneous expressions, others weak, inconvenient and unsafe, for which it judgeth it meet to order, that the said Mr. Mathews should be admonished by the Governor in the name of this Court." (Records of Massachusetts, vol. ii, p. 276).

This action of the magistrates indicates that in some way they had already reached the conclusion that this minister's preaching was not what it should be.

Two days later, or on May 4th, the General Court or House of Deputies received a petition from the people of Hull "for the encouraging [that is, the furnishing of pecuniary aid to] Mr. Mathews to go to them and preach amongst them." The reply of "the whole Court" is: "That Mr. Mathews should not return to Hull, nor reside with them." And further they "do declare that they find several erroneous expressions, others weak, inconvenient and unsafe, for which they judge it meet to order, that the said Mr. Mathews should be admonished by the Governor in the name of the Court." Doubtless the admonition was duly given by the Governor. Mr. Mathews did not return to Hull.

In the early part of the next year, 1650, Mr. Mathews is preaching acceptably to the people in Malden. The church wishes to ordain him as its pastor. In the mean time Mr. Mathews requests of the Court an opportunity to explain the language used in his preaching to which exception had been taken. The voluntary presentation of this request was frank and honorable, and discloses an ingenuous confidence on his part that he could give a satisfactory explanation. On June 21, 1650, the Court ordered that his request should be granted, and that on the 28th of that month an opportunity should be furnished him to "give satisfaction for what he had formerly delivered as erroneous, &c., to the elders of Boston, Charlestown, Roxbury and Dorchester, with such of the magistrates as shall please to be then present (if he can)."¹

Mr. Mathews appears before that council, but fails to give satisfaction. Two churches, that of Charlestown and that of Roxbury, wrote to their brethren in Malden, earnestly advising them not to ordain him. "The latter, in reply, requested that any 'sin' in their pastor-elect might be pointed out, and they would consider it. No reply was received from Roxbury previous to the ordination, and only the views of Mr. Nowell, from Charlestown, but whether in behalf of the church, or as a magistrate, is not stated. Mr. Mathews was ordained." The brethren in Malden were aware that the church in Salem "ordained," that is, installed, Mr. Skelton as its pastor and Mr.

Higginson as its teacher; that the church in Charlestown ordained Mr. Wilson as its teacher. They knew also that the Cambridge platform, adopted two years before (1648), allowed a church not only to choose, but ordain its own officers. Why, then, should they not ordain as their pastor the man whom they had chosen to that office? In ordaining Mr. Mathews they supposed they were doing what they had a perfect right to do, and evidently intended no disrespect to magistrates or to other churches, and had they and their pastor been left to themselves, they might have long labored together in the interest of Christ and His kingdom—for ought that can now be seen—in great peace and joy.

Another year passed. On May 7, 1651, the General Court again assembled. Early in the session Mr. Mathews was summoned to appear and give satisfaction for "former and later miscarriages." He appears at the appointed time, May 15th, and listens to charges, nine in number, grounded upon certain passages taken from his sermons. He "owned not" the charges; but they were supported by the testimony of two Malden men, John Hawthorne and Thomas Lynde. Hawthorne, at another time, was anxious to obtain from the Court a license to keep a tavern in Malden, and sell intoxicating drinks. The hearing appears to have continued through several days. Mr. Mathews made an elaborate defense in a paper of considerable length, in which he explained in detail the several passages in his sermons on which the nine charges had been grounded. He was a trained scholar. He delighted in careful distinctions and definitions. These seemed to him obvious and important, and in his simplicity he thought he could make them seem so to others. He read his Hebrew Bible fluently, held it, perhaps, in his hand, as he discoursed to the plain men of the Court upon the meaning of certain Hebrew words, and gave the exegesis of certain passages in the Hebrew Scriptures.

The tribunal before which he stood was made up of sturdy, honest Puritans. They were farmers, mechanics, wood-choppers and captains of military companies,—good men and true, doubtless, all of them. But they could not understand the fine theological distinctions and exegetical subtleties of the Oxford divine. Only fourteen years before, the whole Colony had been thrown into the wildest excitement and panic by the Antinomian teachings of Ann Hutchinson, which were judged to be subversive of good morals and of all civil law and order, as well as of the divine law and Christian faith. The deputies and magistrates were suspicious that Mr. Mathews was another Antinomian, or something worse. In reality, he was far removed from Antinomianism, although, beyond question, he did believe in the independence of the local church, and that a Christian minister is responsible for his religious beliefs and teachings to no authority save that of the church of which he is a minister, and that of Christ, the only

¹ Records of Massachusetts, vol. iv, part 1, p. 21.

² Frothingham's "History of Charlestown," p. 122.

Head of the Church. Apparently it was this belief, his rare scholarship not always wisely exhibited, his fondness for using unusual words and expressions in attempting to make plain what he regarded as important theological distinctions, that aroused suspicions and occasioned all his troubles. In his theological belief he appears to have been a strict Calvinist. There is no evidence that he was a spiritualist, or a transcendentalist, in the ordinary sense of those terms. But his mind worked analytically, and he was in the habit of presenting his analysis of scriptural doctrine in his sermons. For example, one charge made against him was that of teaching, that the saints have a larger variety of righteousnesses than Christ Himself has. His reply was:

"When I said that saints have more variety of righteousnesses than Christ hath, it was in the explication of the word in Isaiah, 45: 24, which in the original is in the plural number, righteousnesses. 'Surely in the Lord have I righteousnesses and strength;' not that they have more variety of righteousnesses than He hath to give; because they have from Him, besides inherent righteousness and moral righteousness, imputative righteousness also, which He needed not for himself."

This statement, in which he discriminated between the different kinds of righteousness, may have seemed to the plain men of the Court to be dark sayings, "unsafe and inconvenient expressions," but there was nothing in them that was inconsistent with the strictest Calvinism; and this was evidently the judgment of his own people, among whom was Joseph Hill, one of the ablest, most intelligent and orthodox men in the Colony. Mr. Mathews' rhetorical and somewhat startling method of presenting this discrimination was doubtless what alarmed the brave captains and other deputies in the General Court.

Another charge made against the Malden minister was that of teaching that no sin should be reprov'd save the sin of unbelief, and that no virtue should be enjoined save that of faith. This charge was grounded upon a fact—namely, the teaching, by Mr. Mathews, that all sins are included in that unbelief which the gospel so severely condemns; and that all virtues are included in that faith which the gospel so earnestly enjoins. But this teaching is by no means equivalent to saying that there are no sins to be reprov'd except unbelief; or that there are no virtues or duties to be enjoined except faith. Consequently Mr. Mathews replied:

"I do believe and profess that all sins, of all persons, both under the law and under the gospel, are to be reprov'd both in unbelievers and others. And if any words, at any time, in any place, among any persons, have fallen from my lips or pen, which in the judgment of any seem to sound otherwise, I do not own them as my judgment." (Hutchinson papers.)

This answer was doubtless honestly given; and if so, it is difficult to see why it was not satisfactory.

All that is recorded of Mr. Mathews goes to show that he was a highly cultivated man for the times in which he lived. That he was most devout and spiritually-minded, there can be no question. That he was thoroughly evangelical in his faith, of a pure and patient spirit, perfectly frank and guileless, and unusually faithful and zealous in all the work of the Christian ministry, is almost equally certain. He presented to the Court carefully prepared and able—perhaps too able—answers to all the charges preferred against him. Then came a written testimony, signed by nine members of his church in Malden, affirming that in his answers to the Court he had stated, upon the points in question, for substance what he had delivered in his sermons,—nine brethren thus testifying for him against two Malden men testifying in opposition to him. Moreover, there is still extant a deposition, in favor of the pastor, signed by five of the leading brethren of his church, dated May 16th and certified by a magistrate on the 17th, in which they affirm that the answers "our Reverend Pastor, Mr. Marmaduke Mathews, hath given unto the Court" "are the substance of what was publicly delivered by him, and are the truth and nothing but the truth." But all was in vain. The church, as well as its pastor, was under suspicion, and the testimony in his favor—though it so greatly preponderated in both character and quantity the testimony against him—availed nothing. The tribunal would not acquit him.

On the contrary, "the Court declared" that the accused minister had "formerly and latterly given offence to magistrates and elders, and many brethren, in some unsafe, if not unsound, expressions in his public teaching;" that he had "not yet given satisfaction to those magistrates and elders who were appointed to receive satisfaction from him;" that since that time he had "delivered in his public ministry other unsafe and offensive expressions," on account of which "magistrates, ministers and churches" had been moved "to write to the church of Malden to advise them not to proceed to his ordination,"—that "yet, contrary to all advice and the rule of God's word, as also the peace of the churches, the church of Malden hath proceeded to the ordination of Mr. Mathews."

The Court, therefore, "taking into consideration the premises and the dangerous consequences and effects that may follow such proceedings," ordered that the offences "touching doctrinal points" should first be duly considered by a Committee of Magistrates and Deputies. This committee consisted of "Mr. Simon Bradstreet, Mr. Samuel Simonds, Captain William Hawthorne, Captain Edward Johnson, Mr. John Glover, Captain Eleazer Lusher, Captain Daniel Gookin, Mr. Richard Brown and Captain Humphrey Atherton." These five captains and four untitled citizens were to examine a scholarly minister, a graduate of Oxford, and decide the question of the soundness or unsoundness of his theology. They

were to meet on the 11th of June following, at the Ship Tavern, Boston; and it was thoughtfully provided that, "in case of difficulty," the committee could call in some of the "Reverend Elders" to give "help and advice." They were required to make return to the Court at its next session. The church of Malden, for the offence of ordaining Mr. Mathews without the approbation of magistrates and churches, was ordered to make answer at the next session of the Court. It was also ordered that Mr. Mathews, for "suffering himself to be ordained, contrary to the rules of God's word," "to the offence of the Magistrates, Reverend Elders and some churches, should give satisfaction to the Court at its present session by an humble acknowledging of his sin for so proceeding." But in case he refused to do this, he was "to pay the sum of £10 within one month." Fifteen deputies dissented from this judgment. The whole number was forty-one.

Mr. Mathews failed to appear before the Court to make humble acknowledgment of his "sin" in suffering himself to be ordained the pastor of the church in Malden. Consequently the marshal was ordered "to levy" on his goods "the sum of £10 as his fine." The marshal, in attempting to execute this order could find no goods in the possession of the minister, except a library, and in due time he so reported to the Court. This latter, consequently, at its next session, ordered that the execution of the judgment of £10 against Mr. Mathews "shall be respite till other goods appear besides books."

Mr. Mathews was popular with his people; and his church, being indignant with Mr. Lynde, one of its members, for having given testimony against the pastor before the Court, proposed to subject him to severe discipline for his offence. The Court of Assistants, hearing of this, addressed to the church a letter, dated March 4, 1651, which is significant as indicating the relation of the magistrates, or of "The Council," as they called themselves, to individual churches. The letter is as follows:

"*Christian Friends and Brethren:*

"We, being credibly informed of some purpose of yours to proceed further to censure Thomas Lynde for the testimony he gave in Court against Mr. Mathews, and that excommunication, and knowing ourselves with what tenderness and caution he gave his aforesaid testimony, and what disturbance your proceeding may probably occasion, both in the churches and civil government; we thought it no less than our duty, in a case of this concernment, *yet without any intention or desire in the least to infringe the liberty the Lord Jesus Christ hath purchased for his churches*, to desire you to take counsell and advice of three or four of your next neighbouring churches in the case aforesaid, before you proceed to further censure;—it being also Thomas Lynde's earnest request, as we are informed; so that if the case shall appear clear to others, as it may seem to do to you, you may then proceed with more peace and comfort, and be more fully convinced, if then he should continue obstinate. But in case it should appear otherwise to other churches than it doth to you, the rule of God's word may be further attended therein, for the preservation of true love and peace, which we desire you will jointly endeavour to promote with ourselves. So we rest your loving friends.

"By order of the Council,

"EDWARD RANSON, Secretary."

(Mase. "Hist. Coll.," vol. iii., second series.)

In the mean time the committee of nine captains

and yeomen, appointed by the Court to investigate the theology of Mr. Mathews, proceeded to discharge their duty. A detailed narrative of the proceedings in that investigation, on June 11, 1651, at the Ship Tavern, Boston, would be of exceeding interest. But no such narrative has been preserved. There is extant, however, a characteristic letter which Mr. Mathews addressed to that committee. The date of the letter—June 13, 1651—indicates that it was written after he had appeared before the committee, and had passed the ordeal of his examination. He wrote thus:

"To ye Honored Committee of ye Generall Court, appointed to examine some doctrinall points delivered at Hull and since yt time at Malden by M. M., Honored of God and of his people:

"Having given you an account of my sence and of my faith in ye conclusions wch were accused before you, I thought good to acquaint you, yt, if any among you (or others) should count that faith a fausie, and that sence to be non-sence, I desire yt God may forgive them: I doe, conceaving yt such doe not yet so well know what they doe, as they shall know hereafter.

"Yet, in case yt this should reach any satisfaction, to such as are (yett) unsatisfied with my expressions, for to know that I do acknowledge yt there be sundrie defects in sundrie points yt I have delivered, I doe hereby signifie yt through merry I cannot but see and also ingenuously confess yt some of my sayings are not safe nor sound in the superlative degree: to wit: they are not most safe; nor yett either sound or safe in a comparative degree; for I easily yeald yt not onely wiser men probably would, but also I myself possiblie might, have made out X's mynd (Christ's mind) and my owne meaning in termes more sound and more safe than I have done, had I not been too much wanting both to his sacred majesty, whose unworthy messenger I was, and also to my hearers, and to myself, for wch I desire to be humbled, and of wch I desire to be healed by ye author of both. As I doe not doubt but yt conscientious and charitable hearted Christians (whose property and practise it is to put upon doubtfulfull positions not ye worst construction but ye best) will discern, as I doe, yt there is a degree of soundness in what I do owne, though but a positive degree.

"However, it is and (I trust) ever shall be, my care to be more circumspect than I have hitherto been in avoyding all appearances yt way for ye time to come, yt soe I may ye better approve myself through ye graco of Christ and ye glory of God, such a workman as need not be ashamed. In ye interim I remayne amongst his unworthy servants ye most unworthy, and

"Your accused and condemn'd
fellow-creature to commend in
ye things of Christ,

"MATHEW Mathews."

"Boston, this 13th of ye 4 month, 1651."

(Frothingham's "History of Charlestown," pp. 124, 125.)

The committee's report is dated June 17, 1651, and reads thus:

"Upon serious consideration of the charges brought in against Mr. Mathews, together with the answers to them by himself given, as also upon conference with himself concerning the same, we, the Committee, yett remain much unsatisfied, finding several particulars weak, unsafe and unsound, and not retracted by him, some whereof are contained in this paper, with his last deliberate answer thereunto.

"SIMON BROWNESTEE,
"WILLIAM HAWTHORNE,
"RICHARD BROWN,
"JOHN GLOVER,
"EDWARD LUSHER,
"HENDREY AUBREOS."

Three other members of the committee did not sign this report. One of the three, however (Samuel Symonds), notified the Court that he was not present at the examination of Mr. Mathews; but having perused his writings, he fully assented to the report of the committee.

The Court in its autumnal session resumed its consideration of the case of Mr. Mathews and that of his church. In response to summons, the pastor and three members of the church in Malden—Mr. Joseph Hills, Edward Carrington and John Wayte—appeared before "the whole Court," Oct. 24, 1651. Mr. Mathews' case was taken up first. The Court had not received much light from its committee respecting the theology of the pastor. Moreover, the idea seems at last to have dawned upon the magistrates and deputies that the churches and ministers were better fitted to deal with theological questions than a committee of soldiers and citizens. Accordingly, as Mr. Mathews had not given satisfaction through "their Committee or otherwise," the Court declared "that, although the civil and church powers may proceed concerning offenders in their several ways, without interfering one with another, yet, in this case, upon consideration, they judge it doth stand with wisdom to have the churches to act before themselves." Accordingly, it is decided that the church of Malden shall speedily deal with Mr. Matthews. And if he "doth acknowledge his errors and unsafe expressions, and give satisfaction under his hand," and the magistrates are informed of it within six weeks, "the matter at present may so rest." Otherwise the secretary of the Court "shall give notice to the churches of Cambridge, Charlestown, Lynn and Reading"—not excluding other churches—"to send messengers" to constitute a council, which shall give advice to the church in Malden, and also shall decide the questions at issue respecting the theological beliefs of Mr. Mathews.

The Court next considered the offence of the church in ordaining Mr. Mathews without the approbation of the magistrates and other churches. The three brethren present, under the lead of Joseph Hills, himself an able lawyer, and at that time a member of the General Court, defended their church with great ability. They presented a written argument. Mr. Frothingham speaks of it as a "manly and well-prepared document," and adds:

"It argues, first, that the offensive expressions delivered at Malden were not so much before ordination as after; and 'for the business of Hull,' Mr. Mathews had undergone his punishment, and 'stood clear in law;' second, that in case they had 'swerved from any rule of Christ,' they should have been proceeded with 'in a church way,' for they 'both owned and honoured church communions;' third, that they had invited two churches, before ordination, to pursue this course, and were ready to reply to any charges of 'sin' they had committed: fourth, they begged the Court to consider what passed between them and the magistrates, and 'that no return was made only by Mr. Nowell;' fifth, that it was with grief of heart they seemed 'to wave or undervalue' the advice of any magistrate or church, but, considering the liberty of the churches, allowed by law, to choose their own

officers, and apprehending him (Mr. Mathews) to be both pious, able and orthodox, as the law provides, we proceeded.' The gist of the document, however, is contained in the last specifications—a part of which reads as follows:

"Our plea is, that we know no law of Christ or the country, that binds any church of Christ not to ordain their own officers without advice from magistrates and churches. We freely acknowledge ourselves engaged to any that in love offered any advice unto us, but we conceive a church is not bound to such advice farther than God commends it to their understanding and conscience. And if a church act contrary to such advice, we see not how, or by what rule, they are bound to take offence against a church of Christ in that respect, namely, for not attending that advice, or that a church of Christ so doing should be concluded offenders in any court of justice, and so plead that our laws allow every church free liberty of all the ordinances of God according to the rule of the Scripture; and in particular free liberty of selection and ordination of all their officers, from time to time, provided they be pious, able and orthodox. And that no injunction shall be put upon any church officer or member, in point of doctrine or discipline, whether for substance or circumstance, besides the Institutes of the Lord." ("History of Charlestown," p. 127.)

But under all this able and seemingly conclusive reasoning in defence of the church, the Court remained unconvinced. The church, thus arraigned and defended, was condemned as guilty of a gross offence in ordaining its own minister. It has been suggested that the Court grounded its action upon a statute of 1641, which empowered the civil authority to forbid any church to be gathered without approbation of magistrates and other churches, and also "to see that the peace, ordinances and rules of Christ are observed in every church." (Felt's "Ecclesiastical History," vol. ii. p. 53.) But was there, in this case, any breach of the statute? The Court might also have defended its right to deal with the church at Malden, if there was occasion for it, by appealing to the Cambridge platform; for that platform, while allowing each church to choose and ordain its own officers, also declares, that, "It is the duty of the magistrate to take care of matters of religion, and to improve his civil authority for the observing of the duties commanded in the first, as well as for observing the duties commanded in the second table;" and to restrain and punish certain sins, among which are "heresy" and "venting corrupt and pernicious opinions that destroy the foundation." But admitting that the magistrates were legally in possession of this right, was there, in this instance, any occasion for the exercise of it?

The sentence against the church reads thus:

"The Court orders, that the members of the Church of Malden shall be fined for their offences the sum of fifty pounds, which shall not extend to any person that hath given this Court satisfaction, and that con-

sented not to Mr. Mathews' ordination. And it is further ordered, that the said fifty pounds shall be levied by execution on the estates of Mr. Joseph Hills, Edward Carrington and John Wayne, who are hereby empowered to make proportion of the said sum on the rest of the members of the church, except before excepted."

There seems to have been preserved no complete list of the theological errors charged against Mr. Mathews. Statements of some of these charges, however, with Mr. Mathews' answer, are extant. Two of them, with the answers given, have been noticed. There is not space to present more; but it seems well-nigh inexplicable that such answers as he gave were not satisfactory—at least to the more intelligent of the reverend elders of the churches—and that they did not interpose in his behalf.

Mr. Mathews, convinced at last that he could not make himself understood, and that he *must* be laboring under some real inability to set forth clearly, and with proper and safe expressions, the truths of God's Word, on the 28th of October, 1651, sent to the Court the following confession :

"To the Honourable Court :

"Marmaduke Mathews humbly sheweth,--

"That through mercy I am in some measure sensible of my great insufficiency to declare the counsel of God unto his people (as I ought to do), and how (through the darkness and ignorance that is in me) I am very apt to let fall some expressions that are weak and inconvenient; and I do acknowledge that in several of those expressions referred to in the examination of the Honoured Committee I might (had the Lord seen it so good) have expressed and delivered myself in terms more free from exception; and it is my desire (the Lord strengthening me), as much as in me lieth, to avoid all appearances of evil therein for time to come, as in all other respects whatsoever; which, that I may do, I humbly desire your hearty prayers to God for me, and, in special, that I may take heed to the ministry committed to me, that I may fulfil it to the praise of God and profit of his people.

"Your humble servant in any service of Christ,

"MARMADUKE MATHEWS."

The same day, October 28th, thirty-six women of Malden, several of them wives of the leading men in the church, honored their pastor, and gained for their own names a glorious immortality, by sending to the court the following petition :

"To the Hon'd Court :

"The petition of many inhabitants of Malden and Charlestown, or Mistick side, humbly sheweth : That the Almighty God, in great mercy to our souls, as we trust, hath, after many prayers, endeavors and long waiting, brought Mr. Mathews among us and put him into the work of the ministry; by whose pious life and labors the Lord hath afforded us many saving convictions, directions, reproofs and consolations; and whose continuance in the service of Christ, if it were the good pleasure of God, we much desire; and it is our humble request to this honored Court that you would be pleased to pass by some personal and particular failings (which may, as we humbly conceive, be for your glory, and no grief of heart to you in time to come), and to permit him to employ those talents God has furnished him withal. So shall we, your humble petitioners, and many others, be bound to pray, &c.

If any persons now living can trace their descent from any one of those noble matrons, they may well be proud of their lineage.

On the 31st of October Joseph Hills, in behalf of his brethren, made further representation :

"In this they set forth the great pains they had taken to procure a minister—having applied to not less than nine 'orthodox, approved men'—before they had any thought of Mr. Mathews. They also urged that the written objections to him, sent by certain 'honored magistrates,' did not come in the form of official acts, but merely as advice, which the church felt at liberty to accept or not, as they pleased." (Dr. McClure.)

But no argument, pleading or petition was of any avail; the Court was inexorable. The only response made to the pathetic petition of the thirty-six women, and the repeated pleadings of Joseph Hills, himself a deputy and a member of the church for which he pleaded, was the stern judgment of the Court, that the young church should be burdened and disgraced by a fine of fifty pounds.

The next year, (May 27, 1652) "The messengers of the churches of Charlestown, Cambridge, Lynn and Reading make these returns to the Court." They report some confession from Mr. Mathews, but are not fully satisfied. In view of this result of council, the Court, "having perused Mr. Mathews' confession," "and finding it not to be such and so full as might be expected, yet are willing so to accept it at present as to pass it by," but refuse to remit the fines imposed upon Mr. Mathews and the church, "the country being put to so great trouble, charges and expenses in hearing of the cause." But at the autumnal session (October 26, 1652), the Court, in response to petitions, remitted Mr. Mathews' fine, and ten pounds of that imposed upon the church. On May 29, 1655, in answer to the petition of Joseph Hills and seven other members of the church, in which they humbly acknowledge their offence, and crave a remission of over thirteen pounds of the fine yet unpaid, the Court accepts the humble acknowledgments but refuse to remit the fine. Finally, on the 31st of May, 1660, it was ordered that the whole matter of the fine imposed upon the church should be submitted to the County Court of Middlesex for examination and adjustment. "In 1662 the Court abated ten pounds of the fine of Edward Carrington." It cost the colonial government something to collect that fine from the Malden church. It is doubtful whether the whole of it was ever paid. But at a later date the General Court gave to Joseph Hills a considerable tract of land in recognition of his valuable public services.

Mr. Mathews appears to have left Malden of his own will, probably in 1652. He preached for a short time in Lynn, but in two or three years returned to

his native town, Swansea, in Southern Wales, where he was known and beloved. He became at once vicar of St. John's Church in that town, where he labored with zeal and success, until the Act of Uniformity was passed in 1662. This was too much for him to bear. In the interest of religious freedom he refused to submit, and was one of the two thousand Puritan ministers who were driven from their churches and silenced. Dr. Calamy says of him: "He left a good living when he had nothing else to subsist upon. He afterwards preached by connivance of the magistrates in a little chapel at the end of the town. He was a very pious and zealous man, who went about to instruct people from house to house. All his discourse, in a manner, was about spiritual matters. He made no visits but such as were religious and ministerial, and received none but in a religious manner. . . . He lived above the world, and depended wholly upon Providence for the support of himself and his family. . . . He lived to a good old age, and continued useful to the last. He died about 1683."¹

After Mr. Mathews' departure from Malden, Mr. Nathaniel Upham preached for a time as stated supply. He was the son of John and Elizabeth Upham. His father has already been referred to as one of the original members of the church, and one of its deacons for twenty years. Nathaniel was born in England, and was but three years old when the family arrived in this country. He was admitted as freemason in 1653, and was then probably not far from twenty-one years of age. He married, on the 5th of March, 1661, in Cambridge, Miss Elizabeth Steadman, and on the 20th of the same month he died. Dr. McClure thinks that "he was undoubtedly one of the students from the college mentioned by Johnson, as assisting to supply the pulpit before the coming of Mr. Mathews." If so, he took only a partial college course, for his name is not in the catalogue of the graduates of Harvard.

REV. MICHAEL WIGGLESWORTH AND HIS COLLEAGUES.—This distinguished divine, the second minister settled in Malden, was born October 18, 1631, probably in some part of Yorkshire, England. His father's name was Edward. The son, in his brief autobiography, says:

"I was born of Godly Parents, that feared the Lord greatly, even from their birth, and in an early age . . . that was consumed with the desire of knowledge had brought them out of it. Those godly parents of mine meeting with opposition and persecution for religion, because they went from their own Parish Church to hear the word and receive the Lord's Supper, etc., took up resolutions to pluck themselves out of the hands of the persecutors to New England, and accordingly they did so, leaving dear relations, friends and acquaintances, their native land, a new built house, a flourishing trade, to expose themselves to the hazard of the seas, and to the distressing difficulties of a howling wilderness, that they might enjoy Liberty of Conscience and Christ in his ordinances. And the Lord brought them hither, and landed them at Charlestown, after many difficulties and hazards, and me along with them, being a child now full seven years old." The family arrived

"probably in the latter part of August, 1638." (Memoir of Rev. Michael Wigglesworth, by John Ward Dean, pp. 14, 136.)

In October they went to New Haven, and for a time were in straitened circumstances, as they "dwelt in a cellar, partly underground, covered with earth, the first winter." The next summer the father, ambitious to give his only son a good education, placed him under the instruction of the celebrated Ezekiel Cheever, then a young man, afterwards a teacher in Ipswich, Charlestown and Boston. The boy's education was soon interrupted by the lameness and ill-health of his father. But in his fourteenth year, as he was judged "not fit for husbandry," he was again sent to school, and "in two years and three-quarters" was deemed fitted for Harvard College; "and thither," he says, "I was sent far from my parents and acquaintance." He speaks pathetically of the sacrifices his father made in securing the education of his son, and tells the story of his own conversion:

"It was an act of great self-denial in my father, that, notwithstanding his own lameness and great weakness of body, which required the service and helpfulness of a son, and having but one son, to be the staff and supporter of his weakness, he would yet, for my good, be content to deny himself that comfort and assistance I might have lent him." "When I first came to the College I had, indeed, enjoyed the benefit of religious and strict education, and God in his mercy and pity kept me from scandalous sins before I came thither and after I came there; but alas! I had a naughty, vile heart, and was acted by corrupt nature, and therefore could propound no right and noble ends to myself, but acted from self and for self. I was, indeed, studious, and strove to outdo my compeers, but it was for honor and applause and preferment and such poor beggarly ends. Thus I had my ends, and God had his ends far differing from mine. . . . But when I had been there about three years and a half, God, in his love and pity to my soul, wrought a great change in me, both in heart and life, and from that time forward I learned to study with God and for God. And whereas before that I had thoughts of applying myself to the study and practice of physick, I wholly laid aside those thoughts and did choose to serve Christ in the work of the ministry, if he would please to fit me for it, and to accept my service in that great work."

He was graduated in 1651. Mr. Dean informed us that, "In the college catalogue, the name of Michael Wigglesworth stands at the head of his class;" that "he was chosen fellow of the college not long after he was graduated, and was one of the earliest members of the corporation, chosen by the body itself;" and that, "he was a tutor as early as July, 1652." Later in his life he was considered a candidate for the presidency of the college, and probably was elected to that office, but declined to accept the position." (See Mr. Dean's "Memoir of Michael Wigglesworth," pp. 88-89.)

Having prepared himself for the Christian ministry while serving the college as a tutor, he received a call to become the minister of the church in Malden. The exact date of the ordination is not known. Dr. McClure says:

"When about twenty-two years of age he was invited to preach in Malden. It was some five months before he concluded to accept the invitation. He supplied the pulpit a year and a half, being much troubled to decide what his duty might be, before he was inducted into the pastoral office. This was in or about the year 1654."

Mr. Dean, in his "Memoir of Mr. Wigglesworth," says: "I presume that his ordination did not take

¹ See Calamy's *Memorials*, vol. ii, pp. 108, 109.

place till after Aug. 25, 1656," as that was the date of his dismission from the church in Cambridge and recommendation to the church in Malden.

Mr. Wigglesworth was a young man of deep piety, and sincerely devoted to the service of Christ. Cotton Mather, speaking of him as a tutor in the college, says :

"With a rare faithfulness did he adorn the Station. He used all the means imaginable to make his Pupils not only good Scholars, but also good Christians, and to instill into them those things which might render them rich Blessings unto the Churches of God. . . . He employed his Prayers and Tears to God for them ; and had such a flaming zeal to make them worthy men, that, upon Reflection, he was afraid, lest his cares for their Good, and his affection for them, should so drink up his very Spirit as to steal away his heart from God." (Funeral sermon.)

It was a young man of such piety, and of such evangelistic fervor, as well as of rare scholarship, who came to Malden to be its second minister. He was ordained as *Teacher*. His predecessor, Mr. Mathews, was ordained as *Pastor*. This distinction, then familiar to the churches, was not so much a distinction of offices as a division of ministerial labors. According to the Cambridge Platform: "The pastor's special work is, to attend to exhortation, and therein to administer a word of wisdom ; the teacher is to attend to doctrine, and therein to administer a word of knowledge." Either might administer the sacraments. The pastor was to have the watch and care of the church ; the teacher was to instruct the people in the doctrines of Christianity. The distinction implies that there were to be, if possible, two ministers in every church. Few young churches were able to support two ministers. But Mr. Dean suggests that, "Perhaps Mr. Wigglesworth may have thought himself not well fitted for the active duties of parochial life, and may have chosen the office of teacher, to indicate the service he was best able to render to his parish."

The ardent piety and the passion for the conversion and salvation of souls, which he carried into his ministerial labors, are disclosed in a few extracts from his private Sabbath memoranda, first published by Dr. McClure :

"March 21, 1658. Oh, how vehemently do I desire to serve God, and not myself, in the conversion of souls this day! My soul longs after thy house and work, O God!"

"January 9, 1659. My soul paneth after thee, O God! After more of thy favors, more of thine image. O satisfy me with the fatness of thy house, make me to drink of the rivers of thy joys, so that for the outward pressures I may have inward supportings and consolations. I long to serve thee, O Christ! help thou me!"

"February 6. My soul, be cheerful in thy work ; thou servest a good Master."

"June 5. Now, in the strength of Christ, I desire to seek him and the advancement of God's glory, in the salvation of souls this day. Oh, that I might see the fruit of my labors before I die! O my soul! perform this as thy hast."

Mr. Wigglesworth's physical constitution was never robust. He suffered repeatedly from attacks of severe sickness. Not many years after his settlement he was found to be afflicted with some occult disease, which seriously interrupted his public ministerial labors, and at length occasioned the entire suspension of

them. He thought of resigning his office, but his people seem to have been unwilling that he should do so, though he soon ceased to receive a salary. During the time of this enforced relinquishment of his pulpit (a period of at least twenty-one years) three ministers in succession were called to be his colleagues, and each was ordained as *pastor* of the church.

The first of these was Rev. Benjamin Bunker. He was born in Charlestown in 1635, and was the son of George and Judith Bunker. His father owned some of the high land in that town, and Bunker Hill received its name from him. The son was graduated at Harvard in 1658, and was ordained pastor of the church in Malden December 9, 1663, when he was twenty-eight years old. He died in his pastorate, February 2, 1669-70. The fact that "Mr. Wigglesworth wrote his elegy, in which he gives him a high character for sincerity, modesty and devotion to his calling," indicates that the relations between them were fraternal and helpful.

The second colleague was Rev. Benjamin Blackman, son of Rev. Adam Blackman, first minister of Stratford, Ct. Sprague's Annals, (article on Wigglesworth) inform us that he "was ordained in Malden in 1674, and resigned his charge in 1678." Mr. Dean remarks : "Rev. Mr. Blackman was ordained as *pastor*." The town records simply state that he "supplied the desk four years, and left in the year 1678." His departure appears to have occurred "in consequence of some discontent." In 1679 "a committee settled with Mr. Blackman ;" but "nine years afterwards, in May 1688, he sued the town for arrears still due." (Dr. McClure.) He went from Malden to Scarborough, Me., where he seems to have been respected as a preacher and a citizen. He was the representative of that town in 1683. It is believed that he died in Boston.

Rev. Thomas Cheever, son of the celebrated schoolmaster, Ezekiel Cheever, was the fifth minister in Malden, and the third colleague of Mr. Wigglesworth. He was born August 3, 1658, graduated at Harvard in 1677, came to Malden in his twenty-second year, "began to preach there on the 14th of February, 1679-80, but was not ordained till the 27th of July, 1681. His connection with this parish lasted about six years, including the time he acted as stated supply." (Mr. Dean, in Memoir of Mr. Wigglesworth.) In 1686 some difficulty arose between him and his people, on account of certain offensive words uttered by him. What the words were is not now known, but "they are supposed to have been of a theological nature." (Mr. Corey.) The trouble was so serious that an ecclesiastical council was called, "which met in Malden, April 7, 1686, and adjourned to Boston, where meetings were held May 20th and 27th, and June 10th." The council, while not approving of the offensive words, yet advised the church to grant Mr. Cheever "a loving dismission." (Mr. Dean, Memoir

of Mr. Wigglesworth, pp. 90, 91.) After his dismissal he "lived in retirement nearly thirty years," but "on October 19, 1715, he was settled as pastor of the First Church in Chelsea, where he officiated over thirty-four years, and where he died, December 27, 1749, at the advanced age of ninety-one." (Mr. Dean.) The fact, that while settled at Chelsea he preached in Malden two sermons, which were printed, indicates, that pleasant relations had been restored between him and the Malden Church.

At the time Mr. Bunker was ordained, Mr. Wigglesworth was in the West Indies. He had sailed for Bermuda, September 23, 1663, mainly for the benefit of his health, but also, as he himself says, "to help the people's modesty," in putting in his place "a better watchman" and "a more painful labourer." He remained in Bermuda seven months and a half, and then returned home, none the better for the stormy voyage and warm climate, and consequently much discouraged. But the affectionate manner in which the people received him upon his return, greatly cheered his heart.

Although for many years after this he was not able to preach, he was yet not inactive. He was faithful in conversing with his people, as he had opportunity, upon the subject of personal religion; and these conversations were effectual in the conversion of many, and in the instruction and comfort of Christians. He also employed his pen, and became the most celebrated poet in New England in that early time. His purpose, however, was not to obtain fame, but to serve Christ, even when disabled by sickness, in the proclamation of His gospel. The first poem he published was "The Day of Doom." As many as ten editions have been issued. The date of the last is 1867. The first edition (1692) of eighteen hundred copies was sold within a year, which (as Mr. Dean thinks), considering the small population of the country at that time, "indicates a popularity almost, if not quite, equal to that of 'Uncle Tom's Cabin,' in our time."

For a century and a half at least, it was highly esteemed by the Christian people of New England for the religious instruction and inspiration it imparted. Judged as poetry, the work has no great merit. Some of its lines are uncouth and rough. The author was evidently more anxious about the religious teaching than about the smoothness of his verse. He accepted the extreme views held by some theologians of his day, respecting the future state of the non-elect who die in infancy, and expressed this view in a few lines in his long poem. Because of these few lines, some in modern times have expressed their abhorrence of the whole poem and of its author, believing the latter to have been a man of hard and cruel, if not fiendish, temper. Yet in truth he was possessed of a most sweet and gentle spirit, his life was full of kind words and deeds, and was devoted to the good of others. Of this work it has been said:

"It breathes throughout a strain of piety. . . True, there are some things in this composition which do not perfectly suit the moderate religion of the present day; yet, whether this be owing to the improvement or degeneracy of our virtue I leave to be answered by the lives and consciences of my brethren." (Mr. Dean's "Memoirs," p. 69).

Another published poem was entitled, "Meat out of the Eater." This too, received the public favor.

Mr. Wigglesworth also, during the interruption of his public ministry, devoted himself to the study, and soon after to the practice of medicine. He seemed to have become a skillful physician, for his medical services were in demand by the people, not only of Malden, but also of the towns beyond. By his kind offices to the sick, and his tender sympathy for the suffering, he appears to have endeared himself to many. Some, however, may still regard him as a hard, unsympathetic man, and never forgive him for a few lines of his poetry. But the Rev. Andrew P. Peabody, D. D., a distinguished Unitarian, who is an opponent of many of Mr. Wigglesworth's beliefs, is yet quoted by Mr. Dean as saying of the Poet Preacher of Malden:

"He was, it is believed, notwithstanding his repulsive creed, 'a man of the beatitudes,' a physician to the bodies no less than to the souls of his parishioners, genial and devotedly kind in the relations and duties of his social and professional life, and distinguished—even in those days of abounding sanctity—for the singleness and purity of heart that characterized his whole walk and conversation." ("Memoir of Mr. Wigglesworth," pp. 124, 125.)

During the terrible witchcraft delusion of 1692, Mr. Wigglesworth appears to have taken no active part on either side. But in the last year of his life, in a letter to Dr. Increase Mather, he interpreted the sufferings of the people at that day, from drought and war, as "a judgment of God for the innocent blood shed in those melancholy times."

His restoration to health was sudden and unexpected.

About the year 1686, "It pleased God," says Dr. Cotton Mather, "wondrously to restore his faithful servant. He that had been for near twenty years almost buried alive comes abroad again, and for as many years more must, in a public usefulness, receive the answer and harvest of the thousands of supplications with which the God of his health had been addressed by him and for him." (Funeral Sermon.)

During these last twenty years of his life he was the only minister in Malden, and his faithful ministrations appear to have been abundant and, with the exception of one time of sickness, continuous.

"It was a surprise to us," remarks Dr. Mather, "to see a little, feeble shadow of a man, beyond seventy, preaching usually twice or thrice in a week—visiting and comforting the afflicted, encouraging the private meetings, catechising the children of the flock, managing the government of the church and attending the sick, not only as a pastor, but as a physician too, and this not only in his own town, but also in all those of the vicinity. Thus he did unto the last, and he was only one Lord's day taken off before his last."

Attacked by a fever, after a sickness of ten days he entered into rest. His death occurred at nine o'clock on Sabbath morning, June 10, 1705. He was nearly seventy-four years old. As already intimated, the famous Dr. Cotton Mather, of Boston, preached the funeral sermon. Mr. Wigglesworth had been in

Malden, the Lord's "faithful one for about a jubilee of years together." His frail form was laid away amidst the graves of many of his parishioners, "and his sepulchre is with us unto this day."

Not far from the time when Mr. Wigglesworth received his call to become the minister of Malden, or in 1654, he was united in marriage to Miss Mary Reyner, of Rowley. After some five years of happy married life, she died Dec. 21, 1659, leaving one child, Mercy, hardly four years of age. The bereaved husband's grief was sincere and deep. He lived a widower about twenty years, or until 1679, when he married Miss Martha Mudge, probably the daughter of Thomas Mudge, of Malden. She was then about eighteen years of age, and six years younger than his only daughter. This great disparity in age occasioned much opposition to the marriage. His kindred disapproved of it. His people frowned upon it. His brethren in the ministry remonstrated. His intimate friend, Dr. Increase Mather, addressed to him a letter of expostulation, in which he said, among other things: "The like never was in New England. Nay, I question whether the like hath been known in the Christian world." His letter in reply to Dr. Mather, though not preserved, doubtless contained a full and frank explanation. It was shown to several other ministers; and while they were not satisfied, they seem to have made no further opposition. It is believed that he never regretted the marriage, for after her death he spoke of her with great affection and gratitude. One son and five daughters were born to them. She died Sept. 4, 1690, after a married life of about eleven years, aged twenty-eight.

His last wife was Mrs. Sybil Avery, widow of Dr. Jonathan Avery, a physician of Dedham, Massachusetts. She was a daughter of Nathaniel Sparhawk, of Cambridge. The exact date of their marriage is not known, but the year was probably 1691. "She was born about the year 1655, and consequently was about seven years older than his previous wife, though more than twenty years younger than he. She belonged to a family of some distinction in the colony." "She survived her husband a little over three years," and "died August 6, 1708, in the 54th year of her age, leaving one child, Edward." (Dean's "Memoir," pp. 105, 121.) This youngest son, Edward Wigglesworth, D.D., was the first Professor of Divinity at Harvard College on the Hollis foundation, and held the office for forty-three years. His immediate successor was his own son, Edward Wigglesworth, Jr. D.D., who continued in office twenty-six years. His immediate successor on the Hollis foundation was the Rev. David Tappan, the grandson of Abigail, the first daughter of the Malden preacher by his second wife. This daughter was married to Samuel Tappan, of Newbury. Dr. McClure properly speaks of it as "a very remarkable circumstance," that the first three Hollis professors "who held the chair for eighty successive years, with high reputation, should have been

respectively, the son, grandson and great-grandson of that good man." Michael Wigglesworth. ("Bi-Centennial Book," pp. 155-156.)

REV. DAVID PARSONS, THE SIXTH MINISTER IN MALDEN.—The church now proceeded to the difficult task of finding a minister who could fill the large vacancy made in the town of Malden by the lamented death of Mr. Wigglesworth. But soon a sad division appeared in the church, and a still more serious conflict began between the church and the town—the latter at that time standing, in its relation to the church, as a parish. Within two years five ministers in succession were approved by the church and nominated to the town. In four of these cases the town concurred with the church, but usually with a divided vote. All these calls were declined, probably on account of the contentions and the small salary offered by the town. The civil authorities then interfered. The following summary account of this interference is given by Dr. McClure:

"July 1, 1707, the Town of Malden was presented by the Grand Jury to the Quarter Sessions Court for not having a minister settled according to statute, and ordered to obtain one forthwith, and was threatened with the severity of the law. September 9th the Selectmen made answer that they have applied themselves to Mr. Clap, and were waiting for his reply. The Selectmen were required to give further answer at the adjourned Court. September 30th the Selectmen answer that Mr. Clap had replied in the negative a few days before; they requested further time, which was granted. December 9th the Selectmen report, 'that they have had a general meeting of the town, and are in a hopeful way of being supplied, having applied themselves to Mr. Gookin. . . . March 9, 1708, Lieut. Henry Green, in behalf of the town, reports, that they have applied to Mr. Joseph Parsons, who has the matter under consideration. . . . Sept. 14, 1708, Lieut. Henry Green and John Green, in behalf of Malden, inform the Court 'that they have had several meetings of the Church, and one of the Town, in order to the accommodating of that affair, referring to a minister, but can make nothing take effect, but yet are in a very unsettled and divided frame, and so like to continue, and leave themselves to the pleasure of the Court.'"

In view of all these transactions, "The Court do unanimously agree and conclude as followeth: That Mr. Thomas Tufts is a suitable person, qualified as aforesaid for the work of the ministry in that town of Malden, and see cause to settle him there in that work; and do order the town to pay him for his maintenance during his continuance in said work amongst them, after the rate of £70 money per annum." ("Bi-Centennial Book," pp. 158-159.)

In the mean time Mr. David Parsons, of Springfield, was invited by the church to preach as a candidate. It so happened that he and Mr. Tufts appeared in Malden at the same time, both desiring to

preach on the same Sabbath. It was arranged that one should preach in the morning and the other in the afternoon. They did so. Promptly, on Monday, the church met and voted to give Mr. Parsons a call, twenty-six out of thirty-one, voting for him, and the others not voting at all. Two days later, on Wednesday, October 27, 1708, the town met, and by a vote of fifty-three approved of the action of the church. Twelve persons, however, signed a protest, to the effect that they conceive such action to be a contempt of authority, and do think that they are not able to maintain two ministers at once. But a humble petition was sent to the General Court, praying that the order of the Quarter Sessions Court, which had appointed Mr. Thomas Tufts to be the minister of Malden, might be revoked. In response the Court directed that the said order should be stayed until the result of the call to Mr. Parsons should be known. It would not be surprising if a clergyman, who accepted a call given so hastily and under such peculiar and extreme pressure, did not find his ministry a pleasant one. He was ordained, probably, in the spring or summer of 1709. The town contracted to put the parsonage in repair, and to give him a salary of sixty pounds a year, the use of the parsonage and "all the naked money," that is, all the money dropped into the contribution box by strangers and the more liberal inhabitants.

On June 14, 1720, the town was presented to the Quarter Sessions for non-fulfilment of the contract with Mr. Parsons. The prosecution was directed by a committee of the church, and the defence was made by a committee of the town. The verdict of the jury sustained the complaint. After an examination of the parsonage by some of the justices, it was ordered that the selectmen pay a fine of ten pounds unless they speedily "repair the house and fences." The repairs were made and subsequently the case was dismissed. In 1721, Mr. Parsons, after a ministry of some twelve years, was dismissed, by advice of a council, and doubtless commended as a good and faithful minister, for he was settled again the same year (September 15, 1721), as the first minister in Leicester, where he labored in the ministry until March 6, 1735, at which date he was dismissed. He died at Leicester in 1737. When he came to Malden there were divisions in the church and town, and they seem to have continued through his ministry, but evidently were not all occasioned by himself. If he had strenuous enemies, he also had devoted friends, quite a number of whom, in the ardor of their personal attachment to their pastor, removed with him to Leicester.

REV. JOSEPH EMERSON, THE SEVENTH MINISTER OF MALDEN.—Mr. Emerson's faithful and successful ministry extended over a period of forty-five and one-half years. He was born in Chelmsford, April 29, 1700, and was the son of Edward, "some time deacon of Newbury," and Rebecca, daughter of Cornelius Waldo, "from whom," says one of her de-

scendants, "came that beloved name into the family." ("Memoir of Ralph Waldo Emerson," by James Elliot Cabot, vol. i. p. 8.) Deacon Edward Emerson was the son of Rev. Joseph Emerson, "the pioneer minister of Mendon, who barely escaped with his life when the village was destroyed by the Indians," and of Elizabeth Buckley, granddaughter of Rev. Peter Buckley, who, "being silenced by Laud for non-conformity, crossed the sea, in 1634, to New England, and pushed out through the woods . . . to Concord, and there spent most of his fortune as a pioneer of civilization." He was a famous minister in his day, greatly honored "by his people, and by all the ministers in the country." Rev. Joseph Emerson, the Malden minister, who could boast of such a distinguished ancestry, is represented to have been a precocious child; was able to pray in the family, in the absence of his father, before he was eight years of age, "to the edification, and astonishment" of those present; was admitted to Harvard College in 1713, when he had but recently finished his thirteenth year, and was graduated in 1717. "He began to preach to general acceptance when he was eighteen." He was engaged in teaching and preached occasionally, during the next two or three years. In March, 1721, the church and town of Malden, holding separate meetings on the same day, voted to call Mr. Emerson to be their minister. At that time he was not far from twenty-one years of age. He was ordained October 31, 1721. On December 27, 1721, he married Miss Mary Moody, of York, Maine, daughter of Rev. Samuel Moody and Hannah Sewall, who was "the only daughter of John Sewall, of Newbury, and the first cousin of the Rev. Dr. Sewall, minister of the Old South Church, Boston." "Father Moody," though distinguished for his eccentricity, was a man of prodigious mental force of unimpeachable integrity and sincerity. His ministry was uncommonly successful. He "was a zealous friend of revivals of religion." Whitefield "visited him and preached to his people." He has been spoken of as "a man of transcendent zeal in doctrine and practice." "When the offended parishioners, wounded by his pointed preaching, would rise to go out of church, he cried out, 'Come back, you graceless sinner, come back!' And when they began to fall into ill customs and ventured into the ale-house on a Saturday night, the valiant pastor went in after them, collared the sinners, dragged them forth, and sent them forth with rousing admonitions." ("Memoirs of Ralph W. Emerson," vol. i. p. 10.)

The children of Rev. Joseph Emerson and Mary Moody numbered nine sons and four daughters. Seven sons and three daughters lived to grow up. Three of his sons were ministers, viz.: Joseph, who was born Aug. 25, 1724, graduated at Harvard in 1743, ordained at Pepperell, February 26, 1747, and died October 29, 1775; William, who was born May 21, 1743, graduated at Harvard in 1761, and was ordained at Concord, January 1, 1766, and died October 20,

1776; and John, who was born November 25, 1745, graduated at Harvard in 1764, was ordained the first minister of Conway, December 21, 1769, and died June 26, 1826, at the age of eighty-one. Rev. William Emerson was "the patriot minister of Concord." He preached to the minute-men, and was a leader in the Revolutionary movements of the day. He was distinguished for his eloquence as a preacher, and especially "noted for his beautiful reading of the hymns." He was also a man of literary tastes, but had little opportunity to cultivate them. He volunteered to serve as the chaplain of a regiment, and when, in 1776, a reinforcement was sent from Massachusetts to the army at Ticonderoga, he went with the troops as chaplain. But the unaccustomed exposure brought on a severe attack of bilious fever, and he died at Rutland, Vt., at the age of thirty-three.

"His wife was Phebe Bliss (his 'Phebe-bird' he calls her in one of his letters), daughter of the Rev. Daniel Bliss, his predecessor in the Concord pulpit." Two children were given them, William and Mary Moody. This William Emerson, Jr., was born in Concord, May 6, 1769, graduated at Harvard in 1789, was ordained at the age of twenty-three at Harvard (a town some twelve miles from Concord), May 23, 1792, and was called to the First Church in Boston in 1799. He married, October 25, 1796, Ruth Haskins, fifth daughter of Mr. John Haskins, of Boston. The fourth child and third son of Rev. William Emerson, Jr., and Ruth (Haskins), was Ralph Waldo Emerson, who was born in Boston, May 25, 1803. This celebrated author, therefore, was the great-grandson of Rev. Joseph Emerson, of Malden. Mary Moody Emerson, the sister of Rev. William Emerson, Jr., was a remarkable woman, and her unique character is vividly set forth by her nephew, Ralph Waldo Emerson, in an article published in the *Atlantic Monthly* of 1883.

Rev. Wm. Emerson, Sr., the eminent patriot and eloquent preacher of Concord, was doubtless a man of sincere and earnest evangelical faith. But Rev. John Pierce, D.D., affirms that Rev. William Emerson, Jr., minister of the First Church in Boston, "in his theological views, perhaps went farther on the liberal side, than most of his brethren with whom he was associated." And he significantly adds, "I know not to what extent he preached his peculiar views, but I am not aware that he has ever definitely expressed them in any of his publications." Dr. Charles Lowell, says of him: "He was, to say the least, far from having any sympathy with Calvinism." (Sprague's Annals, vol. viii. Unitarian.)

Mary Moody Emerson spent most of her childhood and youth in Malden, first with her grandmother Emerson until the latter died, and then with her aunt, a sister of her father. She was a woman of keen intellect, and appears to have accepted, with satisfaction, the religious faith of her fathers. There was nothing negative in her nature, and she could not endure a

religion made up chiefly of negations. Her idea seemed to have been that all men of earnestness and power *must* believe in Calvinism when they know what it is. Duplicity was no part of her character, and she could have had no patience with any concealment or compromising of religious faith.

Rev. Joseph Emerson, of Malden, was a staunch Puritan in faith and character. He heartily accepted the Calvinistic interpretation of the Scriptures, and preached faithfully what he believed. His heart was full of kindness and his nature was sympathetic, yet in his preaching he was never negative, indefinite or compromising. His own son, the Rev. Joseph Emerson, of Pepperell, in a sermon preached in Malden in memory of his deceased father, said of him: "He was a Boanerges, a son of thunder to the workers of iniquity; a Barnabas, a son of consolation to the mourners in Zion." He preached and prayed and labored for the conversion of his people, and not in vain. He believed in the new birth, and in revivals of religion. He and Samuel Moody, his father-in-law and Daniel Bliss, the predecessor of his son William in the ministry at Concord, it is said, "were prominent supporters of Whitefield, and invited him into their pulpits." Daniel Bliss, "a flame of fire," as his successor and son-in-law called him, was "the introducer of a new style of preaching, bold, 'zealous, impassioned, enthusiastic,' which brought him into trouble with the lukewarm Arminianism of the day." ("Memoir of Ralph W. Emerson," vol. i. p. 12). The Malden minister is believed to have been in profound sympathy with this style of preaching. At the same time he had a reputation as a high scholar, and delighted in scholarly studies. Mr. Cabot spoke of him as "a heroic scholar." His own granddaughter, Mary Moody Emerson, calls him "the greatest student in the country," and remarks, that "He was a reader of the Iliad, and said he would be sorry to think that the men and cities he read of never existed." He "left a library considerable for those days." Withal he seems to have been an eminently prudent man, wise in speech and action. During his ministry a prolonged and fierce conflict raged in the town, respecting the location of a new meeting-house, which resulted in a division of the people, and the organization of the South Church in Malden, yet he "was not reproached by any as the cause." He was a positive man, and did not remain silent in those troublesome times in his parish. He spoke openly and preached faithfully against the contentions and alienations, but appears to have retained the respect of both parties. He must have been a man of vigorous health, as during his long ministry of more than forty-five years he lost but two Sabbaths by sickness. He died suddenly. The quaint language of the town record is: He "deceased in the evening of the 13 day of July, 1767, very soon after lying down to sleep who was cheerily and in health before." All his living children, ten in number, were present at the funeral of their father, and followed

him as his form was borne to the grave. He was greatly beloved by his people, and long after his death his name was familiar and his memory fragrant in Malden.

REV. PETER THACHER, D.D.—Mr. Thacher was the eighth minister of the First Church in Malden. He was born in Milton, March 21, 1752, and was the son of Oxenbridge Thacher, "a very eminent lawyer, and a coadjutor of the early patriots of the Revolution." He was the grandson of Rev. Peter Thacher, who married a daughter of Rev. John Oxenbridge, the latter a pastor of the First Church in Boston. He was the great-grandson of Rev. Thomas Thacher, the first pastor of the Old South Church, in Boston. The grandfather of our Mr. Thacher was pastor of the church in Milton for forty-six years; and his father, Rev. Thomas Thacher, was pastor of the Old South Church for about nine and two-thirds years, having been installed the first pastor of that church, February 16, 1669, and dying in the pastorate, October 15, 1678. His father was Rev. Peter Thacher, minister at Salisbury, in England. He did not come to this country.

The eighth minister of the First Church in Malden, therefore, belonged to an eminently ministerial family. He was graduated at Harvard College in 1769. After the death of Mr. Emerson the old animosities among the people of Malden seemed to have revived, and there was much division and conflict over the question of electing a new minister. At this critical juncture, Mr. Thacher, by invitation from a single man, preached one Sabbath morning in the Malden church. "His youthful and engaging mien," says Dr. McClure, "his silvery voice and golden eloquence so charmed the disturbed elements, that during the intermission it was decided by acclamation that this was the man to heal the dissensions." He was ordained September 19, 1770, when he was only eighteen years of age. He was a magnetic and brilliant preacher, yet perhaps more eloquent than profound. He had sincere evangelistic fervor, especially in the earlier part of his ministry. It is said of him that,—

"During his pastorate, from his earliest years, seems to have been to proclaim the Gospel of the grace of God to his fellow-men, and to this exertion, etc., was unremittingly attached, and, so far as possible, subservient. With the studies belonging appropriately to his College course, he was devoted to the study of Theology, and at the utmost his graduation he was not much prepared, according to the usage of the time, to enter on his professional career. . . . His first efforts in the pulpit awakened an uncommon interest. The multitudes crowded after him, and his simple, profound, and yet richly laden a representative from some brighter world. Whitefield, in reference particularly to the fervour of his prayers, called him 'the Young Elijah,' and the strictness of his orthodoxy, not less than the depth and warmth of his devotion, gave him great favour, especially with the more zealous portion of the congregation." (Sprague's "Annals," vol. i, p. 719.)

The Hon. Harrison Gray Otis, who sat under Mr. Thacher's preaching during his later ministry in Boston, speaking of his settlement in Malden, says:—

"His religious character was represented to have shone most brightly in the earlier and later periods of his life. During the period when he was brought into contact with the world, politically and socially, at so many points, that almost of his religious feelings seemed to have considerably abated, and his public manifestation to have become, if not less popular,

the pulpit orator, and to be rated higher than some of his contemporaries who were at least his equals in erudition, but without the advantage of his brilliant endowments." (Sprague's "Annals," vol. i, p. 719.)

Mr. Thacher's ministry in Malden covered the exciting period of the great Revolutionary struggle, and the abundant opportunity given him to sway the people by his impassioned eloquence was well improved. By both pen and speech he gave utterance to words by which the patriotic passions of the population were wrought up to white heat. Some of those words, as we read them now, seem still hot with the old fire that burned in them when they came fresh from his pen and lips. During those stirring years the town of Malden repeatedly gave "instructions" to her representative in the General Court. These "instructions" were drawn up by Mr. Thacher and adopted by the town. One of those documents closes with these words:

"The people in the province are a free and brave people; and we are determined, in the strength of our God, that we will, in spite of open force and private treachery, live and die as becomes the descendants of such ancestors as ours, who sacrificed their all that they and their posterity might be free." Another of these papers, dated May 27, 1776, ends thus:—"And we now instruct you, Sir, to give them [members of the Continental Congress] the strongest assurance, that if they should declare America to be a Free and Independent Republic, your constituents will support and defend the measure to the LAST DROP OF THEIR BLOOD AND THE LAST FARTHING OF THEIR TREASURES." ("Bi-Centennial Book," pp. 210, 212.)

It is said that Mr. Thacher even, "on one occasion, joined a military corps, but, having put himself under command of the military officer of the town, he was ordered to remain at home, that he might serve the cause of humanity in the discharge of the appropriate duties of his office." (Sprague's "Annals," vol. i, p. 720.)

After a ministry of some fourteen years in Malden, Mr. Thacher was called to the pastorate of the Brattle Street Church in Boston. Such a proceeding was unusual in those times, the union of pastor and people being then regarded, not only as sacred, but inviolable except for the most imperative reasons. The complaints of his people in Malden "were loud and bitter." But the prospect of a larger service in a wider field prevailed with their pastor, and the people yielded. While they refused to the end to sanction the action of the Boston Church, they gave to their pastor a letter of affectionate commendation. "He was dismissed Dec. 8, 1784, and was installed in the Brattle Street Church, Jan. 12, 1785, where he continued in office seventeen years, or until his last illness."

"His religious character is represented to have shone most brightly in the earlier and later periods of his life. During the period when he was brought into contact with the world, politically and socially, at so many points, that almost of his religious feelings seemed to have considerably abated, and his public manifestation to have become, if not less popular,

at least less spiritual and less effective. But towards the close of his ministry, especially when the evil days of adversity came, his mind recovered the tone of deep evangelical feeling which he had early exhibited, and Christianity, by her most serene and heavenly influences, illuminated his path to the grave." (*Sprague's "Annals,"* vol. 1, p. 722.)

Having gone to Savannah for the benefit of his health, he died there December 16, 1802.

Soon after he was settled in Malden, on October 8, 1770, he married Mrs. Elizabeth Poole. Ten children were born to them; two of them becoming distinguished clergymen, and one an eminent lawyer. Many honors were conferred upon him, and among them the degree of Doctor of Divinity by the University of Edinburgh, in 1791.

THE ANCIENT MEETING-HOUSES IN MALDEN.—The meeting-house in which the scholarly Mathews preached, and, during the early part of his ministry, the gifted Wigglesworth also, was located, as Mr. Corey informs us, "a little to the westward of Bell Rock." It was probably a small and plain building, designed to be used only temporarily as a place of worship. Bell Rock—an historical locality in Malden, and well known to all the older inhabitants—is about a third of a mile south of the present city hall, on the west side of Main Street, a few rods from the old parsonage house, which is on the opposite side of the street, and at the present time (1890) is owned by George H. Wilson, Esq. This rocky elevation received its name, according to tradition, from the circumstance that in the early time a bell was placed upon it to call the people together on the Sabbath for worship, and on other occasions. This bell, it is said, was rung at first by being struck with a hammer, and afterwards by being swung in a frame from which it was suspended. Not till 1693 did the town vote "that the bell shall behanged on the top of the meeting-house."

On November 9, 1658, the selectmen, by written contract, engaged one Job Lane to build a new meeting-house, for which they were to pay him "the sum of one hundred and fifty pounds in corn, cord wood, sound and merchantable at prices current, and fat cattle." This second house of worship was also located near Bell Rock; probably a little to the south of it. The contract required that it should be "a good, strong, Artificial meeting House, of Thirty-three foot Square." "All the sells, girts, mayne posts, plates, Beams and all other principal Timbers shall be of good and sound white or Black oake." Among other things, there were to be "a territt on the topp about six foot squre, to hang the bell in with rayles about it," "thre dores . . . east, west and south," a "pull-pitt and cover to be of wainscott to conteyne five or six persons," a "deacon's seat also of wainscott with door, and a table joynd to it to fall downe, for the Lord's Supper," and "seats throughout, made with good planks, with rayles on the topps, boards at the Backs, and timbers at the ends." "The windows," says Dr. McClure, "were few and small, on account

of the great expense of them, and were constructed with diamond panes in leaden sashes, according to the fashion of the times."

"A Seating Committee," elected by the town, annually assigned to each member of the congregation his seat in the house of worship, arranging the people "in an order corresponding to their share of the minister's rate,—age, deafness and dignity being taken into account." The work of this committee was called "dignifying the seats," and must have been, for both the committee and the people, a serious business. It was an out-cropping, in an uncongenial clime, of the old English aristocratic temper. Moreover, it was thought necessary to good order, to seat the men on one side of the house and the women on the other side. A few of the most wealthy and notable persons in the community were sometimes, by special vote of the town, permitted to build for themselves, at their own cost, square pews separated from the common seats.

March 14, 1692, the town of Malden voted, that "Corronal page hath liberty to build a pew." Colonel Nicholas Page was a wealthy merchant and a prominent military officer, whose favorite residence was on a fine farm in Chelsea. When living there he worshiped with the people of Malden and generously aided them in supporting the minister. He presented to the First Church in Malden two elegant silver chalices, which bear this inscription: "The gift of Col. Nicholas Page to the Church in Malden, 1701." They are still used by the church at every communion service. Colonel Page appears to have been the first man who received permission from the town of Malden to build for himself and family a square pew; subsequently a few others were accorded the same privilege. These persons, of course, were exempted from coming under the orders of the committee appointed to "dignify the seats." The deacons also obtained a similar exemption, as they occupied "the deacons' pew," which was always located immediately under the front of the pulpit, and was elevated somewhat above the level of the other pews. A pew was also set apart for the deacons' wives, and probably another for the minister's family. The remainder of the congregation were seated by the seating committee. But who should seat that committee? It is easy to see that this might become a momentous question, especially if the committee should be inclined to dignify themselves unduly by appropriating some of the most honorable seats. A single record shows how the town of Malden, in one instance at least, solved this difficult problem. On January 2, 1695, at a town-meeting it was "Voted, that Two denkens shall seate those commitis that is acointed [appointed] to Seate ye meeting-hous." It was doubtless thought that the deacons, as they could not have been offended by any official and unfair assignment of their own seats, would be under no temptation to take revenge, but would exercise an impartial judgment in deciding

the grave question of the rank and dignity of the several members of the seating committee.

Many of the young people were permitted to sit together in the galleries of the meeting-house. Consequently the town of Malden, following the general practice in New England, made careful provision to keep them in order. At one time the householders, or masters of families, were required to take turns in performing this police service. Afterwards a parish officer was annually elected, who was called "the tithing-man," and one of whose duties it was to maintain strict order in the house of God during the hours of public worship; but he probably was never a very popular man among the more ardent and impulsive youths of Malden.

Near to an old-fashioned meeting-house in New England would almost or quite invariably have been seen the horse-blocks and horse-sheds, or stables. The former were for the convenience of the women in mounting their horses; and the latter were for the sheltering of the horses during the long services of public worship. In Malden, December 9, 1689, it was voted in town-meeting, that six men, whose names are given, should have "the privilege of a peece of land of 24 fouts long and 9 fouts wide, . . . for to set a stable to shelter their horses on the Sabbath days." Similar votes were passed in subsequent years. On March 5, 1711, seventeen men were accorded the privilege of erecting a tables on the town's land, near to the meeting-house, not exceeding "three fouts and half in breadth for on hors." The narrowness of the stables indicates that the people did not ride to meeting in any kind of "wheel-carriage," but "on horse-back."

The second meeting-house, the building of which was begun in 1658, appears not to have been finished until after June, 1660. But it answered the needs of the people, as a house of worship, for more than forty years, or until 1702, when it was enlarged "by cutting it in two, and carrying off one end twenty-four feet." In 1721 the town raised forty pounds "for the further enlargement of the meeting-house." In 1727, sixty-seven years after the building of this second meeting-house, or twenty-five years after the first enlargement of it, it was found necessary to build again the house of God. The question of location was instantly raised, and a prolonged and bitter conflict ensued, during which seeds of strife and division, of personal alienation and animosity were sown, which sprang up and bore bitter fruit through scores of years. Mr. Emerson had then been settled only five or six years. He was a wise man and a lover of peace, but he could not calm the tempest. The people in the south part of the town contended for the old site near Bell Rock; the people in the north part for the site on which now stands the Universalist house of worship. Other sites were proposed, but received little consideration. The painful details of the struggle need not be rehearsed. It is sufficient to say, that

the contest raged until the General Court interposed with the stern order that the new house should be placed on the north location.

On August 28, 1729, the frame of the third meeting-house in Malden was raised. It "was built," says Dr. McClure, "with but one gallery; but afterwards another was built above the first. These were appropriated to children and youth." According to Mr. Corey's vivid description:

The building "was unpainted, both inside and outside. The pulpit stood on the north side, opposite the great south door, which was the principal entrance. Another door-way, on the easterly side, gave additional facilities for ingress and egress. In two corners stairways gave access to the gallery; and the description quaintly adds: 'The east stair was for women and the west stair for men, and they could not get together in the gallery without getting over the railing.'" Rev. Thomas C. Thacher, son of the eighth minister of Malden, writing, in 1849, of this third house of worship, in which, when a child, he listened to the eloquent preaching of his father, says:

"There seems to rise again before me that ancient, weather-beaten church, the place of my earlier worship, and where my venerated father taught and prayed. . . . Some of my ancient friends may remember that old meeting-house. It was one of the plainest and strictest of its sect. It looked the old Puritan all over. It had no tower nor belfry. Its little bell was hung outside on a beam projecting from the gable-end of the building. Close by stood the old school-house, with its enormous fireplace and rude benches, where I learned my rudiments."

In this plain meeting-house the people worshiped for about seventy-three years. It gave place, in 1803, to a brick church, which, though repeatedly remodelled, has stood to the present time (1890), and is now used by the Universalist Society, or the First Parish. When this house was built, if we may judge from the laconic parish record, there was no long debate or conflict respecting the building of it or its location. Perhaps the people recalled sadly the traditions that had come down to them respecting the dissensions and conflicts of the former time. The record is dated Dec. 7, 1801, and reads thus:

"Voted, to build a brick meeting-house. Voted, to purchase the bricks rather than make them. Voted, to pass over the 6th and 7th articles. Voted, to adjourn." This house was dedicated January 19, 1803. The bell for this church was given by the eccentric Mr. Dexter, usually called "Lord Timothy Dexter." The two cupolas, which were at first placed upon the house, were taken down in 1824, and in the place of them was erected the present steeple.

THE PARSONAGE LAND AND HOUSES.—On December 22, 1651, the town, by vote, gave and granted to the then "present preaching elder (Mr. Mathews),

and his next successor, and so, from time to time, to his successors, four acres of ground purchased of James Green for that end, and the house built thereupon, at the charge of all the inhabitants." This land was the parsonage land, now owned by George H. Wilson, Esq. This house was probably located a few rods south of the dwelling-house now owned by Mr. Wilson, and was occupied by the successive ministers of Malden for about seventy-three years. On August 1, 1724—Mr. Emerson then being the minister—this parsonage-house, with nearly all its contents, was consumed by fire. Within a few months a new house, located a few rods north of the site of the burned house, was completed, and Mr. Emerson with his family moved into it, January 5, 1725. Dr. McClure affirms that "the *frame of this house*—the rest of it having long since been pretty much renovated—is still standing." It was sold to Mr. Wilson by the First Parish in 1845, and at the present time (1890) is still standing, and still owned by Mr. Wilson. This is the house in which the celebrated missionary, Rev. Adoniram Judson, was born, on August 9, 1788, his father, Rev. Adoniram Judson, being at that time the pastor of the First Church in Malden. The present age of this ancient house is one hundred and sixty-five years.

THE MALDEN SOUTH CHURCH.—The action of the General Court, in arbitrarily deciding the question of the location of the third meeting-house, did not terminate the contentions and alienations that had vexed the town. The southern people were grievously offended by the order of the Court. On the 9th of August, 1730, Rev. Mr. Emerson preached the farewell sermon in the old meeting-house near Bell Rock, from the text: "Remember how thou hast received and heard." The next Sabbath the congregation worshiped for the first time in the new meeting-house. But the day was not a joyful one to all the people. A division of the parish was impending. The old alienations continued. At length the malcontents decided to withdraw and establish public worship in the southern part of the town. On Sept. 13, 1730, they held their first separate meeting, and some time in the next year began to erect a house of worship on "Nelson's hill." The location was on or near the present corner of Hancock Street and Broadway, in Everett. "The meeting-house," says Mr. Corey, "was never fully completed, and it is said to have been in a very dilapidated condition in 1787." "It was reached by a way twenty-six feet wide, which led from the highway." Dr. McClure speaks of it as standing, "on that black and lonely hill," "in the midst of lots," and remarks, that "those who resorted to it never enjoyed the convenience of a public road." The separate meeting first established was maintained for three years. "A Council of three churches" was then called to organize a church. It seems to have taken two or three days to effect the

organization, for the council met April 16, 1734, and on April 18th, "embodied what for fifty-eight years was known as the Malden South Church." The number of male members at first was sixteen. No officers were chosen until the 4th of September in that year, when John Mudge was elected deacon, and Jonathan Sargeant and Ebenezer Upham were elected ruling elders. On Sept. 24, 1735, Rev. Joseph Stimpson was chosen pastor, who, on account of his ill health, was dismissed in 1744. The next pastor, Rev. Aaron Cleveland, was installed in 1747, and in two or three years was dismissed. He was an intimate friend of Dr. Benjamin Franklin; was the great grandfather of the Hon. William E. Dodge, of New York city, and of the Rt. Rev. A. Cleveland Cox, Bishop of the diocese of Western New York; and he was the great-great-grandfather of Grover Cleveland, Ex-President of the United States. He died in Philadelphia, at the house of his friend Benjamin Franklin, August 11, 1757. The third and last pastor of the South Church was Rev. Eliakim Willis, who was ordained Oct. 25, 1752. The existence of this church from its beginning seems to have been little more than a lingering death. "In the course of thirty or forty years," says Dr. McClure, "their interests so far decayed that they barely maintained the forms of public worship. Mr. Willis was obliged to take the parsonage to satisfy his claims for salary. He then preached for some time, for a little pittance, which was raised from Sabbath to Sabbath," depending mainly "upon his labor as a farmer for a livelihood." In 1787 a brief spasm of life was given to this dying church, by the addition to it of a score of disaffected members of the First Church. Their first work was to repair the long-neglected meeting-house. "They found the windows badly shattered, the clap-boards hanging down by the end, and the whole edifice presenting a most cheerless and desolate aspect." Five years later this house, which should never have been built, was abandoned forever as a house of worship. The South Church decided to terminate its separate existence, and to return to the mother church. On March 25, 1792, the two churches assembled in the "North Meeting-House," and there "voted to be incorporated, with their officers, into one body."

REV. ADONIRAM JUDSON, NINTH PASTOR OF THE FIRST CHURCH.—He was the youngest son of El-nathan and Mary Judson, was born in Woodbury, Conn., in June, 1752, and graduated at Yale College in 1775. He married, November 23, 1786, Abigail Brown, who was born December 14, 1759, in Tiverton, R. I., and was the eldest daughter of Abraham and Abigail Brown.

The First Church, on December 8, 1784, had reluctantly parted with its popular minister, Rev. Peter Thacher. On July 3, 1786, it voted to call to the pastorate Rev. Adoniram Judson. His settlement, however, was strenuously opposed by some of the people. The church found great difficulty in agreeing upon

of that ancient covenant which Paul teaches is not disannulled in the Christian era. He was only three years of age when his family left Malden, and was twenty-four years old before he became a Baptist. Twenty-one years, therefore, had passed after he left Malden before he embraced the distinctive views of the Baptists; and his father did not embrace them until twenty-six years after he had left this town. It is difficult to see, therefore, what special relation any of the Judson family had to the First Baptist Church in Malden. But in God's Providence it is an honor to the town, and all the Christian Churches in it may well rejoice and give thanks that such a noble missionary as Dr. Adoniram Judson, "the apostle of Burmah," was born in Malden.

REV. ELIAKIM WILLIS, THE TENTH PASTOR OF THE FIRST CHURCH.—When the First and South Churches in Malden met in the North meeting-house, March 25, 1792, and "voted to be incorporated, with their officers, into one body," that vote made the Rev. Eliakim Willis the minister of the First Church. Previous to that vote the First Church had no pastor, but was provided with deacons. The South Church probably had no deacons, but was provided with a pastor. When, therefore, the two churches "with their officers," were merged into one church, the latter was fully officered. There does not appear to have been any formal installation of Mr. Willis into his office. No council was called, either for an installation service or to advise, or even to recognize the union of the two churches. There was, doubtless, a reason for this. Any examination of the beliefs of Mr. Willis, or of those held by his former church, might have made trouble.

Little is known of the early life of Mr. Willis. He was born in Dartmouth, Mass., June 9, 1714. Dartmouth at that time included the territory now comprised in the city of New Bedford. He was graduated at Harvard College in 1735; was called to the pastorate of the South Church in Malden, October 16, 1751, and was ordained October 25, 1752. He had been the minister of the South Church about forty years, when he was called to be the tenth pastor of the First Church. And when he entered upon the latter pastorate he was nearly four-score years of age. He was then for several years the sole settled minister in Malden. He died in the pastorate, March 14, 1801, at the age of eighty-seven years. The funeral services were held on the 18th of March. Six neighboring ministers were invited to serve "as pall-holders," viz.: "Rev. Messrs. Roby, Prentiss, Osgood, Morse, Thacher and Lathrop. Doct. Morse being on a journey, Doct. Eliot was apply^d to in his room." The services were conducted with "great solemnity." The meeting-house was "shrouded in black." The members of the church wore badges of mourning. "Doct. Lathrop made the first prayer. Doct. Thatcher preached from 2 Tim., 4 Ch., 6, 7, 8 verses. Mr. Prentiss made ye last prayer." An imposing procession followed the body

of the venerable minister to the grave. Although his prolonged ministry in Malden appears not to have been in spiritual results a successful one, yet in his death he was highly honored.

September 27th, "a letter left by Mr. Willis, and delivered by his executors," was read to the church, "wherein he begs the church to accept from his executors a bible, and exhorts that the scriptures may be read in public every Lord's day; whereon the church voted that the scriptures be read in public, forenoon and afternoon, every Lord's day, except in severe cold weather." Mr. Willis also "left a number of theological works as the basis of a parish library."

In his theological beliefs Mr. Willis was evidently an Arminian. The Arminianism of his day, however, must not be confounded with that of the Wesleys. It was, indeed, in several respects, the extreme opposite of the Wesleyan Arminianism. The latter was "warm, vital and evangelical;" the former "was cold, formal, unreligious, sceptical, tending to scepticism and infidelity." ("Sketches of the Theological History of New England," by Enoch Pond, D.D., p. 28.) It would more properly have been called Pelagianism, or Semi-Pelagianism. Prof. Moses Stuart affirmed that the Arminianism that troubled some of the churches of New England in the last century, and in the beginning of the present, was not the theology of Arminius, but "was Semi-Pelagianism in some respects, and Semi-Rationalism in some others; a compound of latitudinarian sentiments." "Arminianism now is, one might almost say, everything or anything that is opposed to orthodoxy. It exists in all forms and all gradations." ("Biblical Repository," 1831, p. 304.) Perhaps the most prominent characteristic of the so-called Arminians was their violent opposition to about every doctrine that is distinctively Calvinistic. Yet they generally claimed that they were standing only for a broad, liberal and tolerant theology; that it was really of no consequence what a man believed; that a good character and a respectable life were the main things; and that these can be attained apart from any experimental religion or change of heart. "They discouraged warmth and engagedness in religion as things of a bad tendency," and were afraid of nothing so much as what they called enthusiasm. Innovations in point of doctrine were considered of small importance. If people attended public worship on the Sabbath, and paid their taxes, and made no pretensions to any unusual seriousness, but sneered and scoffed at those who did, they might expect to be regarded as very good men." ("Sketches of the Theological History of New England," by Dr. Enoch Pond, pp. 29, 30.)

The Arminian ministers wholly disregarded, in their preaching, the Scriptural distinction between saints and sinners, between the regenerate and the unregenerate. They abominated all evangelistic fervor, and especially revivals of religion. The advent of Whitefield and the power of his preaching aroused

their anger, and he was excluded from their pulpits. They ceased to make a credible evidence of conversion a condition of admission to the church, and invited all persons of decent character and respectable lives to come into full communion. The consequence was that few became church-members, and in many instances even the congregations sadly diminished. The undeniable historic fact is, that this so-called Arminianism was the common, broad highway to Unitarianism and to Universalism.

In less than a year after, Mr. Willis was ordained as the minister of the South Church in Malden, or on December 28, 1752, that church adopted a new Confession of Faith and Covenant which were written undoubtedly by the pastor. As a confession of faith it was extremely meagre and vapid, having in its original form only three articles of belief. As a creed it was also indefinite, superficial and equivocal. In one part it was unintelligible, and in some of its statements glaringly defective and misleading. Any Arminian of that day could have subscribed to this creed without hesitation. Evidently it was intended to be an Arminian confession of faith. At a later date the Universalists in Malden made it the basis of their creed and covenant.

When Mr. Willis became the pastor of the First Church (March 25, 1792) he brought with him this Confession of Faith and Covenant. There is no record of its adoption by the First Church; yet it appears to have become, in some way, its Creed and Covenant, and to have remained such so long as that church was permitted to sustain any relation to the First Parish.

Mr. Willis also not only brought into the First Church the members of the South Church (very few probably in number), who had been religiously educated under his Arminian preaching and creed, but also brought back to the First Parish, at least, if not into the church, the score of men who were so intensely dissatisfied with Mr. Judson's "Bade Hopkintonian Principels," and who, in consequence of his ordination, withdrew to the South Parish. The only class of people in New England, at that time, having any connection with evangelical churches, who were strenuously antagonizing orthodox beliefs, were the so-called Arminians. The twenty-one seceders, who were so bitterly opposed to the evangelical beliefs of Adeniram Judson, were delighted with the beliefs of Mr. Willis. This corroborates the view that both Mr. Willis and the seceders from the First Parish were Arminians.

Less than three years after the settlement of Mr. Willis as pastor of the First Church, at a church meeting held November 10, 1794:

Resolved, that we will have no degree of knowing
 that we are members of a Church-less life and com-
 munion, and that we are not members of the Church, that there
 is no such thing as a Church, and that the terms of
 membership are not binding, and that we will not
 and we will not.

The church record adds:

"After some time spent, with respect to the first, the Church adjourned to the 24th instant."

The next records are as follows:

"Nov. 21 the Church met according to adjournment. After some time spent, being much divided in sentiment, and several members being absent, voted to adjourn, for further consideration, to ye first Tuesday of April next, to meet at the north meeting-house."

"1794.—At a church meeting December 19th the Pastor communicated to them a Request to him Signed by a Number of the Brethren of the Church to appoint a Chh meeting, that the Last Vote of the Church might be Reconsidered, and the matter then under Consideration be taken up, if the Chh should think fit,—after some Conference, the Church Voted in the Negative, by the majority of One."

"1796, April 7th.—The Church met according to adjournment, and 1st Chose Deacon Ramsdell Moderator. 2ndly, the Church being almost equally divided, relative to the subject, which had been under consideration, voted, that the Meeting be dissolved; which is accordingly dissolved."

It is quite probable that Mr. Willis, early in his ministry with the South Church, introduced "the half-way covenant," so-called—that is, invited people of respectable character and conversation to receive baptism and own the church covenant,—without coming to the Lord's Supper,—in order that their infant children might be baptized; and that, at a later date, he took a further step, and invited to "full communion,"—that is, to the Lord's Supper, as well as to baptism,—all persons of decently moral character and life. It is *certain*, as the church records show, that he attempted to introduce the half-way covenant into the First Church; and quite likely he attempted to accomplish this as a preparation of the church to take a further step, and receive into full membership all persons who were not openly immoral. The tendency of the half-way covenant, and of receiving to full communion those who gave no evidence of having been born of the Spirit, was to fill the churches with unconverted members, and the pulpits with unconverted ministers. The church records clearly show how perilously near the First Church in Malden—the church of Mathews, Wigglesworth, Emerson and Thacher—came to abandoning its ancient evangelical faith, and entering upon a course which would have brought it speedily to Unitarianism, or Universalism, and then very likely to a lingering death like that of the South Church, and finally to extinction.

REV. AARON GREEN, THE ELEVENTH MINISTER OF THE FIRST CHURCH.—He was born in Malden, Jan. 2, 1765, and was the son of Ezra and Mary (Vinton) Green. He was the grandson of Samuel (born in Malden in 1679) and Martha Green; and the great-grandson of John Green, who was probably born in Malden in 1650, and was the son of James Green, who came from England, and settled on Mystic side in 1647. Rev. Aaron Green was graduated at Harvard College in 1789, and was ordained in his native town, Sept. 30, 1795, as colleague pastor with the venerable Mr. Willis. After the death of Mr. Willis, in 1801, Mr. Green remained the sole pastor

of the First Church until he was dismissed, August 8, 1827. The period of his entire ministry in Malden was nearly thirty-two years. In 1796 he married Eunice Orne, of Lynnfield, and their children were four sons and one daughter. His half-brother, Dr. Ezra Green, born June 17, 1746, graduated at Harvard in 1765, a surgeon in the army and navy during the War of the Revolution, settled in Dover, N. H., and married Susannah Hayes. He died July 25, 1847, aged 101 years. Another half-brother, Bernard Green, born Jan. 14, 1752, was in the army of the Revolution, served the town of Malden in various offices, represented it in the Legislature, and died July 15, 1839, aged eighty-two years. Rev. Aaron Green, upon the resignation of his pastoral charge, removed to Andover. Like his two brothers, he reached a good old age. He survived all his college classmates, and died Dec. 23, 1853, eighty-nine years of age.

Theologically, Mr. Green was in sympathy with his predecessor and colleague, Rev. Eliakim Willis. Tradition represents him as preaching none of those great truths of revelation which the Holy Spirit is wont to use for the conviction and regeneration of men. His hearers were never aroused by the stupendous proclamations that "Except a man be born again, he cannot see the Kingdom of God," nor were they urged to instant "repentance towards God and faith towards our Lord Jesus Christ," as conditions of salvation. Doubtless Mr. Corey is correct in affirming that "Mr. Green, whose sermons were rarely doctrinal, but mainly on the practice of piety and the efficacy of good works, was of the Arminian School, and it is said that his preaching was not displeasing to a majority of his hearers." The constant burden of the Arminian preaching in that day, we are told, was "*do and live, do and live,*" and it is added, that "the congregations were all the while doing less and becoming more dead." Doubtless no minister holding an earnest evangelical faith, like that of Rev. Adoniram Judson, could have been called and settled as a colleague with Rev. Mr. Willis; or if called, it would have been by only a bare majority of the church, and in the face of a most remorseless opposition from the parish; and the faithful pastorate of such a minister would have been more burdened with tribulation and persecution than was even that of Mr. Judson. Mr. Green, however, for a time at least, gave satisfaction to the majority of his people. He seems to have accepted heartily Mr. Willis' Arminian creed and covenant. Indeed, under his direction, that document was printed as late as 1823, and it was set forth as the "Confession of Faith, and the Covenant of the First Congregational Church in Malden." In this printed copy are found a few, yet important, changes from the original form. There is no reason, however, to believe that these changes were made by Mr. Green. They were probably made by Mr. Willis himself, at the time he persuaded the First Church to adopt this

creed and covenant. The changes, however, were not for the better. The Confession of Faith (as distinguished from the covenant), in its original form, had three articles of belief—one very defective, respecting the being and character of God; another, as equally defective, respecting the sacraments of the church; and a third respecting "the communion of the churches." The third article of belief is omitted in the printed form which is represented to have been adopted by the First Church. Very likely this change was made in expectation that ere long the church could be wrested from "the communion of Churches," which it had so dearly prized through all its long history. But if such an expectation was cherished by any, they were destined to be disappointed. Several other changes were also made, all disclosing a positive trend towards a still more unevangelical faith. In the mean time there were few additions to the church, and many in the congregation, hearing nothing from the pulpit which convinced them of the truth, the reasonableness and the mighty spiritual power of the great historic beliefs of this church, were becoming increasingly averse to them.

Under such conditions there must have come sooner or later a crisis. In those days few Arminians in the pulpits, or in the pews, remained stationary. Ere long some of them denied the personality and regenerating work of the Holy Spirit, and became Universalists; others denied the divinity and propitiatory sacrifice of Christ, and became Unitarians. In the third decade of the present century each of these issues was reached by different persons in Malden. A few became Unitarians. A larger number became avowed Universalists. Had the Universalists at this time quietly withdrawn from the First Church and Parish, as they had a perfect right to do, and organized their own church and parish, and built their own house of worship, as the Baptists had already done, and as the Methodists were then doing, it would have been, beyond all question, honorable on their part, would have prevented a great and prolonged conflict, and saved the town from what is now, and must forever remain, a most painful passage in its history. But they decided to take a different course.

The first signal of the coming contest appears to have been an article in the warrant for a parish meeting, to be held May 8, 1826, which read thus:

"8th. To see if they [the members of the First Parish] will permit Ministers of other denominations in good standing to preach Lectures in the Brick Meeting House, when these meetings are occupied by their reported Pastor, and also any Votes on the subject that the society of the Parish, The promotion of friendship and good will may suggest. Agreeable to the petition of William Barrett, Esq., and others."

At the meeting held on May 8th it was voted "Not to admit Ministers of other denominations in good standing to preach in the meeting-house when it is not occupied by our Rev. Pastor." The next year, upon the written request of Artemas Cutter and twelve others, an article to the same effect, but in

more explicit terms, was inserted in the warrant for a parish meeting, as follows:

"To see if they will permit ministers in good standing of the Universalist denomination to preach Lectures in the Brick meeting-house when it is not in use by our respected Pastor, and pass any Votes on the subject that they may think proper." At the meeting of the parish held agreeably to this warrant on January 8, 1827, it was "Voted, second, To permit ministers of the Universalist denomination to preach Lectures in the Brick meeting-house when it is not in use by our respected Pastor. Voted, third, To choose a Committee to wait on our respected Pastor and get permission of him for Preachers of the Universalist denomination to preach lectures in the pulpit of the Brick meeting-house."

A week later, or on January 15, 1827, a written request, signed by William H. Richardson and twenty-seven others, was presented to the Parish Clerk, to call a parish meeting, to act upon two articles:—

"First, To choose a moderator. Second, To see if the Society will Prohibit Ministers of the Universalist denomination preaching Lectures in said Brick Meeting-house." At the meeting of the parish, held in accordance with this request, on January 24, 1827, it was "Voted, not to prohibit Ministers," etc. On January 27, 1827, Joseph Lynds and ten others requested the clerk to call a meeting of the parish, to be held February 3, 1827, to act upon two articles, the second of which was, "To see if the Society will prohibit Ministers of the Universalist denomination," etc. The society met according to the warrant, February 3d, and "Voted not to prohibit Ministers of the Universalist denomination preaching lectures in the Brick Meeting-house."

A similar article was in the warrant for a parish-meeting to be held May 27, 1827, but at the meeting it was voted to pass over that article. On June 10, 1827, the resignation of Mr. Green was read from the pulpit, by the preacher for the day, Rev. Mr. Sewall. The conflict in the parish had evidently become extremely violent, and the pastor could endure it no longer. He was a good and kind-hearted man, and had been generally beloved by his people. His preaching had been so indefinite and neutral as to give no offence to anybody; and now, in the time of strife, he thought to keep his speech and conduct so indefinite and neutral as to satisfy both parties. But, as usual in such cases, he seems to have satisfied neither. The Universalists had no further need of him, as he would not announce himself a Universalist, and unite with them in their attempt to change the long established religious faith of the church and parish. The members of the church (who, though now few in number were nearly all,—strange to say, considering the religious instruction they had so long been receiving—thoroughly orthodox in their beliefs), were displeased, because their pastor did not take an open and firm stand with them, and lead them in a brave

defence of the ancient faith of their church. He could not see it to be his duty to take either course, but in the midst of the battle determined to flee from the scene, and leave the contending parties to settle their strife as best they could.

In his letter of resignation, while he expressed sincere affection for his people, and gratefully recognizes their love and kindness to himself, he also speaks in plain terms of his grievous trials, and earnestly defends the neutral course he had taken, which seems to have been severely criticised by some of his people. His resignation was accepted, after he had been kindly invited to supply the pulpit for a short time. An ecclesiastical council was called to approve of this sundering of the pastoral tie, and he was dismissed August 8, 1827, with warm commendations from the council and from both the church and the parish.

THE SEPARATION OF THE FIRST CHURCH FROM THE FIRST PARISH.—Previous to May 8, 1826, certain members of parish had become acquainted with several Universalist ministers. "Whittemore, Ballou, Streeter and Dean, Universalists, had preached in Malden in the old brick school-house once standing on Pleasant Street." At the above date began the efforts, already noticed, to introduce into the pulpit of the First Church these or other Universalist preachers, although Mr. Green was still the pastor,—efforts which overwhelmed him with grief, forced his resignation, and brought on a controversy which for years filled the town with the most painful dissensions and bitter enmities.

Mr. Green's resignation of his pastoral office did not arrest, but rather intensified, the contest between the Universalists and those who adhered to the ancient faith of the church. The struggle, however, was continued mainly, not within the church, but within the parish. It would seem from the records of the parish, and also from those of the Church, that the Universalists were now determined that the entire property of the parish should be used—as it never before had been used, and as it was never entrusted to the parish to be used—for the support of a Universalist minister and for the propagation of Universalism in Malden. On the other hand, nearly all the members of the First Church resented the attempt to settle over them a Universalist minister, without the vote of the church and against its will. They knew that from the beginning the Congregational Churches had enjoyed the priceless liberty and the sacred right of electing their own pastors; and that the parish, at a later date, had come into being mainly to exercise a trusteeship in the service of the church, and had never intentionally, by the Bill of Rights or by any legislation, been invested with the right to vote in the election of a pastor, except in concurrence or non-concurrence with an election previously made by the church; and that all the property in the care of the parish was *trust* property—property entrusted to it for certain specific purposes and for no other—which

could never be honestly and rightfully used except in support of the faith and the minister of that particular church to which the parish itself was legally and organically united.

The number of the members of the church at that time, according to the church records, was eighty-three, twenty of whom were males, and sixty-three were females. The number of active members then living in Malden was probably less. The male members doubtless, were all, or nearly all, members also of the parish, and others in the parish sympathized with them and actively supported them. The women of the church were not members of the parish; had they been, the final issue of the conflict, beyond question, would have been quite different from what it was. The comparative strength of the two parties was usually indicated in the choice of a moderator at the parish meeting, although often the number of votes cast was not recorded. At a meeting of the parish held Aug. 1, 1827, in the choice of a moderator, "Edward Wade, Esq. (the candidate of the Universalists), had eighty-eight votes, and Ephraim Buck, Esq. (the candidate of the Congregationalists), had one hundred and eleven, and was elected." This was an important meeting, for (on account, apparently, of some illegality in the calling and transactions of several previous meetings, including the annual meeting in May), all the parish officers were to be elected, and, what was of still more moment, "a committee to supply the pulpit was to be chosen." As the Congregationalists were now the majority, they elected the parish officers and also the committee to supply the pulpit.

But at the next annual parish meeting, held March 20, 1828, although the number of votes cast for moderator was not recorded, Edward Wade, the leader of the Universalists, was elected to that office, and all the parish officers elected, also the five members of the committee chosen to supply the pulpit, were Universalists. It would be interesting to know how the orthodox majority of the year before had been overcome, and a Universalist majority had been gained. But the parish records are silent upon this subject, and they were never again under the control of the Congregationalists.

Previous to this annual parish meeting the Rev Sylvanus Cobb, a young Universalist preacher of considerable reputation in his own denomination, and especially distinguished as a controversialist, had preached several times in Malden, probably in the hall of the school-house then standing on the south side of Pleasant Street, upon the site now occupied by the Masonic Building. Mr. Cobb had made a favorable impression upon the Universalists, and at the parish meeting above referred to (March 20, 1828),

"The following motion was made and adopted, *viz.*, that from the high opinion this society entertains of the Rev^d Sylvanus Cobb our Committee be requested to Employ him as our Minister for one year - on such terms as shall be satisfactory to him and honorable to the society - and in case of his delinquency for any part of said time, such other person or persons as they may think proper."

But at a parish meeting held June 25, 1828, it was

"Voted, To adopt the motion made in writing by Mr. Benja^s G. Hill, which is as follows - That the high satisfaction derived from the Pastoral Labours of the Rev. Sylvanus Cobb since his stay in Malden that it is deemed a subject of expediency to appoint a Committee to wait on him to obtain his terms of settlement with the society and report (as soon as can be convenient) to this meeting. Voted, That Mr. Benja^s Lynde, W^m Barrett and Dea. Eben^t Townsend be a committee for the purposes above. Voted, Not to proceed any further on business of this meeting until the committee aforesaid report their doings."

This committee, after an interview with Mr. Cobb, who was already residing in the parsonage, returned to the meeting and presented in writing a long report, in which are stated in minute detail the terms upon which Mr. Cobb agrees to settle "over said Parish or Society as their Pastor." The society at once voted that the report be accepted, "and that Mr. Cobb be settled agreeably thereto;" also that the "installation" shall take place July 30, 1828, and that a committee be chosen "to write letters of communication to the several Clergymen which they may deem proper to officiate at the solemnization of the connection between this society and the Rev. Sylvanus Cobb." Several other votes are entered upon the record as having been passed, and finally the clerk records that, by vote, the meeting was dissolved, and officially signs his name. Then he adds another record, as follows:

"N. B. this Vote was taken but overlooked to be put in its regular place, which vote was as follows, *viz.*, Voted, that this Parish concur with the recommendation of the church. . . . The recommendation is as followeth . . . at a meeting of the first church of Christ in Malden at the Parsonage house June 23, 1828, voted unanimously that this church recommend to the Parish with which we stand connected to settle Rev. Sylvanus Cobb as our Pastor. Eben^t Townsend, Clerk pro tem. Attest Ch^r. Hill, Parish Clk."

On the day appointed for the installation services, (July 30, 1828) "the Council met in the parlors of William Barrett—Hosea Ballou, of Boston; Sebastian Streeter, Thomas Whittermore, of Cambridge; Russell Streeter, of Watertown, and Walter Balfour, of Charlestown, assisting."

Turning now to the records of the First Church in Malden, we find several entries which are of marked significance, especially when compared with the above recorded transactions of the so-called "First Church," and of the First Parish. Under date of "Malden, May 31, 1828," is found the following record of action taken by the First Church at a church meeting:

"Whereas a complaint has been laid in before the First Congregational Church in Malden against Br. Ebenezer Townsend, specifying that, contrary to the wishes and faith of the Church, he is aiding and assisting in supplying the pulpit in the First Congregational Society in this place with an Universalist preacher, whose doctrine to this Church is heresy; and whereas the first and second steps according to the gospel have been taken with him without obtaining satisfaction; and whereas he has been cited to appear before the Church and answer to said complaint, and he having failed to render any satisfaction to the Church, therefore Voted, that we consider said Townsend's (conduct?), as stated in the above complaint, a breach of Church covenant, and that he be no longer a member of this Church. Voted that the above be read before the Church at their next communion, before the administration of the ordinance of the supper.

Attest, EPHRAIM BUCK, Clerk."

The next record presents a scene which most pathetically discloses the sweet and tender spirit of the pastorless church and the unfailing fidelity of its members to their evangelistic and Christly mission, even in the darkest days of its great tribulation. The record reads thus:

"This day the sacrament of the Lord's Supper was administered and four persons were affectionately professed to this Church, viz: Sarah Oakes, Jr., Mary the letter, Charles Oakes and Eliza A. Pierce. The three first were baptized. Attest,

"EPIPHAM BUCK, Clerk."

This scene, coming in as it does in the height of the battle, amidst the clash of arms, "the thunder of the captains and the shouting," seems even now like a rift in the overshadowing blackness through which can be seen heaven.

The record immediately following the above is as follows:

"MALDEN, JULY 29, 1828.

"This day the Rev. SYLVANUS COBB, an Universalist preacher, is said to be installed to the pastoral care of the first church in Malden. The church, having heard that the above installation was to take place, prepared and sent in the following remonstrance, but the council refused to hear it.

REMONSTRANCE.

"To the Ecclesiastical Council to be convened in Malden July 30th, 1828, for the purpose of installing the Rev. Sylvanus Cobb, as Pastor of the first Church and Parish in said town.

"WE, the undersigned, being that a meeting of the first Church in Malden, without the desire, or request, or knowledge of the members, had been called by the Rev. Sylvanus Cobb, who himself was not a member; and that at said unauthorized meeting, attended only by Mr. Ebenezer Townsend (excommunicated from our Church May 31, 1828), his wife, Susannah, and Miss Elizabeth H. Sargent, the Rev. Sylvanus Cobb was elected by them a member, as they claim, of the first Church in Malden; and that afterward the aforesaid persons, together with the Rev. Sylvanus Cobb, proceeded to receive to Church fellowship sundry other persons, and also to elect the Rev. Sylvanus Cobb to be the Clerk, and the said Ebenezer Townsend to be a Deacon of the said first Church, as they claim; and also having heard that the first Parish in Malden had given to the Rev. Sylvanus Cobb a call to settle in the ministry over the said first Parish; and that Wednesday, the thirtieth day of July Instant, was appointed for the installation—

"We, the undersigned officers and members of the church connected with the said first parish, having never alienated ourselves, by certificate or otherwise, from the said Church or Parish, wholly disown and disapprove of the doings of the above named Ebenezer Townsend, his wife and Miss Elizabeth A. Sargent and those connected with them in the above named transactions, as being entirely unprecedented and contrary to all ecclesiastical usage, and contrary to our own wishes and feelings. And we do also hereby remonstrate against any ecclesiastical Council proceeding to install the Rev. Sylvanus Cobb as pastor over the First Church in Malden. Malden, July 29, 1828.

LEWIS FISHER,	DEACONS.
NATHAN NEWELL,	
WM. H. RICHARDSON,	

"We, the undersigned, being members of the First Church in Malden, approve of the above remonstrance." To this approval of the remonstrance are affixed the signatures of twenty-nine women, and the whole is signed by Epiphanius Buck, Clerk."

This remonstrance had no effect at the time, as the council of Universalist ministers which was called to install the Rev. Mr. Cobb refused to hear it read.

It is but fair to look next at the records of the Universalist Church in Malden. Opening the book, we find that they are called "Records of the First

Church of Christ in Malden." The record of the first meeting is, in part, as follows:

"At a meeting of the First Church of Christ in Malden, holden at the Parsonage house, May 22d, 1828:

"1st, Voted that we approve the doings of the Parish in employing Rev. Sylvanus Cobb to lead in our public devotions, and minister unto us the word of life, the present year.

"2d, Voted that Rev. Sylvanus Cobb and Mrs. Eunice H. Cobb be received into fellowship as members of this Church.

"3d, Voted to receive Brs. Charles Hill, Artemus Cutter and Edward Wade into fellowship as members of this Church.

"4th, Chose Br. Sylvanus Cobb Secretary of this Church."

A committee was then appointed "to prepare a new draught of the Confession of Faith and Covenant used by the Church in the admission of members, with suitable amendments, and also to draught a code of By-Laws." The meeting was then adjourned.

The question inevitably arises at this point, Who elected Rev. Mr. Cobb and received him as a member of the First Church in Malden? It is recorded that he was received at a meeting of the First Church in that town. But it is certain that neither the deacons nor any other of the numerous members of the First Church who signed "the remonstrance" had received any notification of that meeting, or had any knowledge of it until after it had been held. Was that so-called church meeting composed, at its opening, of simply Ebenezer Townsend, his wife Susannah, and Miss Elizabeth H. Sargent? and did they three assume to be the "First Church in Malden," and as such church receive members and elect Mr. Cobb as secretary? If so, the prayer: "God have mercy on their souls," ought to have gone up from the hearts of all good people in Malden; and not for those three persons only should the prayer have been offered, but also for all who abetted or sanctioned such a transaction. It is not believed that such a procedure would now be regarded by any member of the Universalist Church in Malden with any other than feelings of repugnance and reprobation.

The First Universalist Church in Malden held its second meeting on June 7, 1828, at which it received seven persons by confession of faith, adopted "a new draught" of the Arminian Confession of Faith and Covenant, written by Rev. Eliakim Willis, "with suitable amendments," and also adopted a resolution as follows:

"Resolved, That whereas Deacons Buck and Sargeant have withdrawn themselves from the Parish with which we, as a Church, stand connected, have absented themselves from our religious meetings, and have united themselves to another religious Society, we can, therefore, no longer recognize them as Deacons of this First Church of Christ in Malden; and it is expedient that we proceed to choose at least one person to that office at the present time. . . . Chose Br. Ebenezer Townsend First Deacon of this Church."

But Deacons Buck and Sargent, in the "Remonstrance" of July 30, 1828 (quoted above), distinctly and publicly affirmed that they were still "officers and members of the church connected with the First Parish, having never alienated ourselves, by certificate or otherwise, from said church or parish," nor

had they united themselves to any other religious society. They continued for years after this to be officers of the First Church and members of the First Parish. There is no record, up to this date, of any vote by which the First Parish had formally and legally sundered its long-continued connection with the First Church, nor of any vote by which the First Church had formally and legally sundered its long-continued connection with the First Parish.

It should be noticed that Ebenezer Townsend appears at this meeting as a member of the church, so called, there assembled, and is elected deacon. But there is no record of his having been received to this Universalist Church. He must, therefore, have been one of those two or three members of the First Church who, on May 22, 1828, met secretly at a private house, called themselves "The First Church of Christ in Malden," received Rev. Mr. Cobb and four other persons, as they claimed, into the "First Church," and then elected Mr. Cobb secretary of that church. Mrs. Susan Townsend and Miss Elizabeth H. Sargent are also recognized in the records of the Universalist Church as members of that church, but there does not appear to be any record of their reception into that church. This indicates that they united with Mr. Townsend, on May 22, 1828, in calling themselves "The First Church of Christ in Malden." It does not appear that any others were associated with those three persons in that notorious act of assumption and fraud, until they had received Mr. Cobb and others as members.

The First Universalist Church in Malden held its third meeting "at the Parsonage, June 23, 1828." The record of this meeting is as follows :

"14 Chose Br. E. Wade, Moderator *pro tem*.

"24 Chose Br. E. Townsend, Secretary *pro tem*.

"31 Voted unanimously, That this Church recommend to the Parish with which we stand connected, to settle Rev. Sylvanus Cobb as Pastor of our Church and Parish.

"EBENEZER TOWNSEND, Secretary *pro tem*

"A true copy of the Record of the meeting.

"SYLVANUS COBB, Secretary."

Returning now to the history of the First Church, we cannot find that more than three of its members united in the organization of the Universalist Church, viz.: one man and two women; and the one man was, after due form and process of discipline, excommunicated from the First Church before the Universalist Church held its second meeting. The brethren of the First Church, and other men in the town who sympathized with them, retained their connection with the First Parish so long as there was any hope of restoring the parish property to the uses for which it had been intrusted to the parish. As late as January 23, 1832, they appear to have made a most earnest but fruitless effort, through the power of the ballot, to discharge their obligations as honest men, placed in care of trust property, a part of which had come down to them, unperverted in its use, through nearly two centuries. At a meeting of the First Parish, held at

the above date, the whole number of votes cast for moderator was 228. Of this, Edward Wade, Esq., a leader of the Universalists, received 134; the good physician and orthodox deacon, Ephraim Buck, received ninety-three; and Thomas Odiorne received one. Another unsuccessful attempt of this kind was made at a parish meeting held March 26, 1832. This was the last effort which the orthodox party made, through the ballot, to save the parish property to the uses for which it had been intrusted to the parish.

It may not be best, in this place, to describe in detail the proceedings by which a Universalist majority was secured in those decisive parish-meetings. It is a painful story. Suffice it now to say that the majority, according to abundant and trustworthy evidence, was obtained by methods which were anything but righteous and honorable. And when that majority was obtained, the bars were put up. New rules for the admission of members were forthwith adopted, which thereafter made it impossible for any persons except Universalists to become members of this ancient orthodox parish.

After the orthodox party had failed to restore by their votes the parish property to the service of evangelical faith, the service to which it was consecrated by its donors, they brought suit at law against the parish. But this, too, failed of success. The courts at that time were dominated by the influence of an extraordinary decision of the Supreme Judicial Court of the Commonwealth, which had bereft the Congregational Churches of some of their dearest rights and most sacred liberties. That decision was given in the year 1820, in what has usually been termed "the Dedham case," but is now correctly cited as *Baker versus Fales*, 16 Mass., 488, and was regarded by some of the most eminent lawyers of the time, headed by Daniel Webster, as an unwarranted and unrighteous decision.

The Universalists in Malden pleaded that decision as justifying their method of organizing their church, their seizure, by a majority vote unrighteously obtained, of the entire parish-property, which had been sacredly devoted by the contributors of it to the support of an evangelical church and ministry, and their devotion of that property forever to the support of a Universalist Church and ministry. Possibly they had the legal power to do at that time what they did. But might does not make right. No power, no civil constitution, no law or statute, no decision of courts, can transmute falsehood, fraud and breach of trust into righteousness, else American slavery, with all its inexpressible wickedness and infamy, and a thousand other tyrannies, persecutions and atrocious wrongs, would have been made righteous.

The members of the First Church clung affectionately to their place of worship, attending faithfully the religious services held at the brick meeting-house, until, without their consent, against their protest, and to their dismay and grief, the Universalist

majority in the parish called the Rev. Mr. Cobb, an avowed Universalist, to become the settled pastor of the First Church and Parish, and he accepted the call. Then the stern, remorseless voice of arbitrary power said to them, as it said to their Puritan Fathers in England two centuries before—Conform to a faith and to a worship which your souls abominate, sit under preaching which you believe to be false and hazardous to the eternal interests of men, or flee hence and go whither you will. They would not be false to God and their vows; they would not deny their Lord and His gospel, nor defile their consciences; and so they fled from their own house of worship, endeared to them by a thousand sacred associations and tender memories, where they and their fathers and mothers had worshipped God, where they had received baptism and had confessed Christ as their Saviour and King. The exiled flock turned first into Captain John Sargent's Hall, a little dingy upper room near the corner of Salem and Ferry Streets, now used as a courtroom. Afterwards they gathered for their public religious services in a small hall in the second story of the brick school-house on Pleasant Street. There were no persons of wealth among them. They had left a good meeting-house, a fine parsonage-house, and ample parsonage lands, the parish wood-lots, and a ministerial fund of about \$4000—the whole, according to one estimate, valued at about \$20,000. They were few in number, and could ill afford to bear the pecuniary burdens which they now assumed. But they were rich in faith, in hope and in good works.

The brethren of the First Church, and other men sympathizing with them, had now separated from the Universalist Church and minister, but not from the First Church. As has already been shown, in the conscientious discharge of their duty as entrusted with the parish property, they took active part in the parish meetings as late as March 26, 1832. But in July of that year they organized a religious society, which, in the place of the First Parish, was soon legally connected with the First Church. In the preamble to the Constitution and By-Laws of that society, they say:—

"Whereas we consider the nature and worship of God, in its purity and simplicity, not only the most important duty, but an inalienable right; and that it is the duty of all Christians, in virtue of the support which they have pledged to the ministry, to show themselves fully persuaded in our own minds that the right ways of the Lord are perverted in the first religious Society in this place; and that any further attempts to restore the ancient order of things in the first religious Society would be not only useless and vain, but fraught with more evils than would be atoned for by all the ministerial property belonging to said Society if obtained; therefore we whose names are here inserted . . . do, on this twentieth day of July, in the year of our Lord eighteen hundred and thirty-two, hereby constitute and form ourselves a religious Society, in the name of *The Twentieth Congregational Society of Middlesex County*, and mutually covenant and agree with each other, and with such other persons as may hereafter unite with us, that we will maintain and support the public worship of God (to the extent of our ability), according to the ancient usages of Congregational Societies in New England."

The First Church was now wholly separated from the First Parish. It had passed through the greatest

trial in its long history of nearly two hundred years. But it had not been alone in its tribulations. It had known the blessedness of fellowship in suffering. In the early part of the present century eighty-one Congregational Churches in Massachusetts were forced in a similar way to separate themselves from the parishes or societies with which they had been connected. In most of these cases, however, Unitarians were the aggressors, and pursued a course in many particulars similar to that adopted by the Universalists in Malden, taking from orthodox Churches their meeting-houses, parsonage-houses, ministerial lands and all other property. In some instances they wrenched from these churches even their communion service and church records. The action of the Universalists in Malden with reference to the communion service of the First Parish will be noticed further on.

REV. ALEXANDER WILSON MCCLURE, D.D., THE TWELFTH PASTOR OF THE FIRST CHURCH.—The following extracts have been taken from a manuscript biography of Dr. McClure, which has been commenced (and it is hoped will be completed) by one eminently fitted to give to the world, in appreciative and elegant words, the life of this brilliant man, this masterful and brave minister of Christ:

"Alexander Wilson McClure was born in Boston, May 8, 1808, and was named for his maternal grandfather, Captain Alexander Wilson, whose mother was the only daughter of Rev. John Morehead, the first Presbyterian Minister of Boston. His ancestry was Scotch-Irish on both sides of the house, his great-great-grandfather on his father's side being John McClintock, one of the besieged at Londonderry, Ireland, during the famous siege of 1689. These families were identified with the great Protestant struggle of the period in the North of Ireland. His uncle, Rev. David McClure, was a distinguished Missionary to the Indians of his day.

"His father, Thomas McClure, was a merchant of vigorous intellect and great force of character. He was possessed of fine business ability and was the owner of Schooners and Coasters which carried on active trade along the Eastern Coast quite far to the South.

"His mother, Mary Wilson, . . . was a woman of much personal charm, and possessed a dignified and elegant bearing, which, added to a fine wit and talent in conversation, made her a prominent member of the social circles of her day.

"He was the youngest of all his father's children, and on him was lavished all that a father's pride and a mother's affection could suggest. His capacity was considered exceptionally good from earliest childhood, and his precocious scholarship excited the wonder of his parents and teachers. At the age of eight he was reading Shakespeare with avidity, had finished Rollin's Ancient History and other works, and at fifteen, when ready to enter College, he had made himself acquainted with all the books in the Library of the Boston Athenaeum. He was trained in the Boston Latin School and entered Yale College in 1823. . . . A finished and high-bred bearing was, through life, one of his prominent characteristics. At College his life was of the gayest. His well disciplined mind enabled him to perform his college duties with very little labor, and his irrepressible spirits sought amusement and excitement in ways which often defied the strict rules of the College. His father dying very suddenly at the conclusion of his sophomore year, he was transferred by his mother to Amherst College, where he graduated at the age of nineteen."

During Mr. McClure's senior year there occurred a season of special religious interest in the college, and under its quickening influence, with all the enthusiasm of his nature, he consecrated himself to the service of Christ, and soon "Set his face towards the ministry." There is a vivid account of his conver-

sion, including a letter which he wrote to his mother at the time, in one of Jacob Abbott's books, entitled "The Corner-Stone," pp. 320-331. His name is not given, but it is known that the subject of the narrative was Senior McClure. The depth of his convictions and the genuineness of the religious change which he experienced doubtless had much to do in determining his subsequent theological beliefs. Indeed, he was born into an era of heated theological discussion. His father had been a prominent member of the old Federal Street Church, Boston, and for years sat under the preaching of the distinguished Dr. William Ellery Channing. But when Dr. Channing embraced Unitarian views, the sturdy Scotchman, Thomas McClure, could not brook the new gospel, left the church, united with the Park Street Church, and was subsequently elected one of its deacons. Such an experience of the father could hardly have failed to exert a moulding influence upon the religious character of the son, especially after his conversion.

Mr. McClure entered Andover Theological Seminary in 1827, and was graduated from the same in 1830. In the seminary he was the class-mate of men who afterwards bore such distinguished names as William Adams, D.D., LL.D., George B. Cheever, D.D., Bela B. Edwards, D.D., William G. Shauffer, D.D., and President Leonard Woods, D.D., LL.D.

The year following his graduation Mr. McClure was a resident licentiate at Andover. At the beginning of this year, or some time in the autumn of 1830, his life, like a new-creating power, came into the history of Malden. He preached as stated supply to the First Church—probably coming from Andover every Saturday—until April 6, 1831, when he became acting pastor. In this capacity he labored until December 19, 1832. At this date he was ordained to the Christian ministry, and installed pastor of the First Church in Malden. The ordaining council assembled in the hall of the Brick School-house at nine in the morning. Public services were held in the Baptist Church in the afternoon. Rev. Dr. Lindsley, of the Park Street Church, Boston, preached the sermon. "The services," writes the clerk of the church, Dr. Buck, "were solemn and interesting, the day was pleasant and the congregation respectable." Six days after his ordination (December 25, 1832), at South Hadley, Mass., Mr. McClure and Miss Mary Brewster Gould were united in marriage. Mrs. McClure was the daughter of Rev. Vinson and Mindwell Woodbridge Gould, of Southampton, Mass. The young pastor and his bride were soon received into the house of Dr. Buck, and resided there for about a year. The house was on the corner of Main Street and Gould Avenue, on a lot which is now vacant.

The advent of Mr. McClure to Malden, in the autumn of 1830, was most opportune. Rev. Aaron Green had been dismissed August 8, 1827. For about seven months after his dismissal the First Church

and the orthodox members of the First Parish had control of the pulpit, and it was supplied by various orthodox ministers. "Mr. Talcot Bates" appears to have preached as a candidate for settlement, and some of the people desired that he should be called to the pastorate; but the parish, at a meeting held Dec. 26, 1827, voted not to extend to him a call. Rev. William W. Niles also preached as a candidate, and made a number of warm friends, at whose request a parish-meeting was called to see if the members of the parish would invite him to settle with them in the ministry. But the parish, January 8, 1828, refused even to consider the question of his settlement, by a vote of fifty-three against twenty-nine. There is no record that the church took any action in either of these cases. The Universalists, on March 8, 1828, having, by a majority vote in the parish, obtained control of the pulpit, and having at that date voted to invite a Universalist—Rev. Sylvanus Cobb—to officiate as their minister for one year, the First Church was driven to seek another place of worship and another minister. The first indication, in the records of the church, of any change in its place of worship, is under date of May 18, 1828. On that day, it being the Sabbath, the First Church worshipped in Captain John Sargent's Hall, and Rev. Cornelius B. Everest preached. At a church-meeting, held after divine service in the afternoon, it was voted, that the Rev. Mr. Everest "be invited to exercise all the rights and duties of a Pastor of this church." He accepted the invitation, and appears to have served as acting pastor for about one year. The Rev. John R. Adams, brother of Dr. William Adams of New York, preached to this little flock for some time previous to the coming of Mr. McClure. When the latter began his service as stated supply, the First Church had held services of worship separate from those of the First Parish for more than two years; but the conflict was still raging. None of the orthodox party had severed their connection with the First Parish, and the clangor and heat of theological debate still filled the town.

McClure was a strict Calvinist. He belonged to the class of theologians designated at that time as Old School, in distinction from those called New School. Those men whom Capt. John Dexter condemned, on account of their "Bade Hopkintonian Principles," were New School in their theology, or, as they preferred to call themselves, "Consistent Calvinists." Theologically, Mr. McClure was in sympathy with his predecessors in the Malden pulpit, Mathews, Wigglesworth and Emerson. Rev. Mr. Wigglesworth, after his decease, was referred to, in an oration delivered at Cambridge, as "*Orthodoxus Maldunatus*." The same title might appropriately have been given to Rev. McClure. But the difference between the Old School and the New, of that time, was trifling in comparison with the difference between both of those Schools and the Arminians. Mr. McClure was

thoroughly evangelical in his faith. Out of his own experience, as well as out of the Word of God, he had learned to believe in the reality and the necessity of the new birth. Under a profound sense of the dependence of all men upon the regenerating grace of the Holy Spirit for salvation, he preached, and labored and prayed for the immediate conversion of the impenitent among his people; and not without marked success. He had not preached a year before a powerful revival of religion came on. When he entered upon his labors in Malden he was but twenty-two years old. When the time came to gather the recent converts into the church, and welcome them to the Lord's Table, as Mr. McClure had not been ordained, and therefore could not officiate at the sacrament of the Lord's Supper, it was arranged that Dr. John Codman, of Dorchester, should perform that service. Accordingly, on communion Sabbath, November 6, 1831, Dr. Codman being present and conducting the services, twenty-three persons were received into the church, by confession of Christ. It is certain that no such scene as this had been witnessed by this church for more than half a century, if ever before. Moreover, this large addition was made to the church when it was in the midst of fiery trials and sufferings, such as few churches in our country outside the Congregational denomination have been called to endure. Rev. S. Osgood Wright, in his "Historical Discourse, delivered in Malden, December 1, 1831," remarks:

"The greatest addition ever known to have been made at any one time, to the First Church in Malden, was made on Nov. 6, 1831. Twenty-three were received by profession. Rev. Mr. McClure is the present minister. As he says, 'Since they [the First Church] left the meeting-house, they have added to their number thirty-three, twenty-nine by profession and four by letter. The whole number of members is now seventy-six, twenty-four males and sixty-two females.'"

In connection with this revival occurred an event of special significance. Mr. McClure was then only an acting pastor. Yet, guided by him, the church was led to examine as never before the Arminian creed, and covenant which Eliakim Willis had foisted upon it forty years before. Under that creed, and under the preaching, the teaching, the religious indifference and moral corruption that went with it, one church in a growing town had become extinct; and the First Church itself had first sunk into an ominous indifference and stupor, and then had been thrown into convulsions and conflicts which brought it to death's door. But now the church, quickened and enlightened in the atmosphere of a powerful revival of religion, saw these mournful facts in all their relations as in the light of the noon-day sun, and took in their full significance. Then came decisive action. On November 2, 1832, that entire day having previously been set apart for the purpose, the members of the church, now spiritually revived, assembled, and with great solemnity, with fastings, confession and prayers, and in the presence of neighboring ministers, they abolished that Arminian creed, and with joy

and thanksgiving adopted a thoroughly evangelical Confession of Faith and Covenant, thus placing the church once more upon its ancient foundation—that upon which it stood in the days of its greatest spiritual power and glory, "the foundation of the apostles and prophets, Jesus Christ himself being the chief corner-stone." This occurred only four days before that communion Sabbath on which twenty-three recent converts were received into the fellowship of the church, and received only upon credible evidence that they had been born of the Spirit.

In the mean time it devolved upon this young minister, not only to preach the gospel for the conversion of his impenitent hearers and the strengthening of the faith of Christians, but also to cheer the desponding hearts of the little exiled band, and to lead them in a vigorous defence of both their faith and their rights. The manuscript biography already referred to has in it this passage:

"Mr. McClure roused the orthodox minority to action, and resorted to a lawsuit to obtain the property which had been bestowed by the Calvinistic founders of the Malden Church. But the case was lost. All that remained for them to do was to begin again as an infant church, buy a site, and erect a new house of worship as they might be able. The only property which they retained was the treasures which certain departed members had dedicated to the sacramental use of the Church. Mr. McClure—then twenty-two years old—guarded these quaint and sacred vessels at no little risk to himself. Now that the interest in points of theological belief has changed, we cannot conceive of the intense excitement they caused them. During a course of four lectures on 'Universalism' delivered by Mr. McClure, in Malden, in 1832, he was escorted home after each by a body of young men to protect him from personal violence at the hands of the opposing party."

When Mr. McClure began his ministry in Malden, the First Church was at its lowest. Its enemies were exultant and defiant. Their leader, Rev. Syllanus Cobb, was a man of large physical presence. Mr. McClure had none of that kind of largeness to boast of. He was of slender stature, and very youthful in appearance. He was received in the town by the opponents of his faith and of his church in a manner anything but courteous. They spoke of him as "a mere boy," and he was insulted upon the streets. At first they deemed it quite safe to make him in various ways the butt of their ridicule. But those who, either in private or public, assaulted him or his religious faith with contemptuous speech, seldom or never made the second attack. He was a man of fine scholarship, and an accomplished theologian, of good breeding and high spirit, and withal, an almost matchless controversialist. All this made it dangerous to assault him. But he was also a man of brilliant and caustic wit. His power in the use of irony and sarcasm, and of quick and sharp repartee, has seldom been equaled. Those who at first thought to deride him, soon regarded him with suitable fear, and for their own protection, if from no higher motive, treated him with marked respect. His sincere piety and his downright earnestness in all the work of the Christian ministry endeared him to his own people, gained for him the confidence of all, and softened the

asperity of even the worst enemies of his faith. A minister who was acquainted with him, and well informed respecting his achievements in Malden, says: "I had a profound respect for his gifts, his character and his work. In the earlier years he fought a hard battle, but fought it bravely, and came at last to be greatly esteemed and honored by those who had fought against him."

Mr. McClure's wit was often as harmless as it was brilliant, but sometimes it hurt. In either case, however, it was a part of himself, as natural as the tones of his voice. He never put it on exhibition. It might be said of him, as Ralph Waldo Emerson said of his Aunt Mary, that he "never used [his wit] for display, any more than a wasp would parade his sting." He used it only for a purpose, and generally it was effective. The following incident illustrates his ability in the line of sharp repartee. It is related by a distinguished professional gentleman who was present at the meeting.

"On one occasion, Mr. McClure, as chairman of the School Committee, arose in a town-meeting and requested a larger appropriation of money for the support of the public schools, and supported his request by facts and arguments. Instantly a man whose reputation for generosity was not high, sprang to his feet to oppose the additional appropriation. His remarks, however, were largely a violent tirade against clergymen. He declared them to be useless members of society, cumberers of the ground, lay fellows, a heavy burden upon the community, supported at great expense by the town. He also remarked that in deference to his wife he paid ten dollars a year for the salvation of his soul, and he considered that a dear and even extravagant price. He sat down amidst loud laughter and applause. Mr. McClure calmly rose from his seat, explaining further the urgent need of a larger appropriation for the schools, and then added:—'Although I differ from the gentleman, who has just spoken, on the main question at issue, I am happy to say that there is one point on which I fully agree with him, and that is that ten dollars a year paid for the salvation of his soul is too much. But the gentleman forgot to state the reason, which is, that ten millions of such souls as his could dance together on the point of a cambric needle without jostling, at the same time crying, O! the immensity of space!' The speaker sat down amidst 'thunders of applause,' which were repeated, and so long continued that the man of small soul left the hall."

The meeting voted unanimously to increase the appropriation for schools.

He remained pastor of this church until Nov. 9, 1842, when at his own request, mainly on account of impaired health, he was dismissed. From 1844 to 1846, he was the acting pastor of the Presbyterian Church at St. Augustine, Florida. He then returned to Boston where he was the editor of *The Christian Observatory* from 1847 to 1850. He was also assistant editor of *The Puritan Recorder* for three years. The First Church in Malden called him the second time to its service. He supplied the pulpit six months, and then he was installed its pastor, Nov. 22, 1848. But after a successful pastorate of about three years and a half, he received an urgent call from the Grand Street (Reformed Dutch) Church, Jersey City, N. J., and was dismissed from the church in Malden, April 28, 1852. The First Church, in reluctantly granting his request for this second dismissal, says:—"Our hearts are moved with grief at parting from our long tried, and faithful friend and Pastor, and with a feel-

ing akin to desolation in view of our bereaved state." He remained in the pastorate of the Grand Street Church about three years, when he was called to the Secretaryship of the American and Foreign Christian Union, and for several years filled that office. In 1856, he was sent to serve as chaplain of the American Legation at Rome, Italy. "The American Chapel in Paris was erected largely by funds which Dr. McClure secured with great zeal and labor." In March 1859, "broken down by bronchial disease, he retired from public service, and was a great sufferer until his death." He died in Canonsburg, Pa., Sept. 20, 1865, but he was buried in the cemetery on Salem Street, in Malden, by the side of his three little children whom he laid there so tearfully years before. It was probably his own request that his body might rest where sleep so many of the people whom he loved, and to whom he ministered in the Gospel of Christ.

The entire length of Dr. McClure's ministry in Malden, as stated supply, acting pastor and pastor, was about sixteen years. He was respected more and more in the town, and the esteem and affection of his own people for him increased to the last. Feelings equally appreciative and affectionate also appear to have been cherished by him towards this town and especially the people of whom he was pastor. Mrs. McClure, who is still living, speaking of her husband in a recent letter, remarks: "His love for Malden, for the church and people amounted to enthusiasm,—his youthful, ardent love." He was also highly esteemed by his brethren in the ministry. One of the leading ministers of Boston affirmed that "no one had ever done so much for his mind and heart as Dr. McClure had." Amherst College, his *Alma Mater*, in 1854, gave him the honorary degree of Doctor of Divinity.

He was a versatile scholar, and his abilities were as varied as they were great. In one of the notices, published at the time of his death, occur these words:

"A great man is fallen—yet assured! His talents were varied, his learning was great, in science, history, his own language, Latin, Greek, Hebrew, French, German, Italian. His wit was brilliant, his memory extraordinary; his disinterestedness notable. But his great excellence was his humble trust in Christ, and his unreserved consecration to His cause."

In the biographical sketch, from which quotations have already been made, among other characteristics mentioned are the following:

"His friendships and personal attachments were almost exclusively to the faithful and disinterested friend; he never shirked nor failed to appear when his presence and influence were needed in adversity. He was bold as a lion in defending those who were unjustly assailed, while he could, in a masterly way and by a few words, expose the pretentious, and lay bare a sophism. He was a devotional man. Listening to his discourses, which would keep a company seated with mirth, one would be greatly struck, in hearing him pray, with the deep reverence and awe, and the earnest supplicatory tone of his prayers. He was a godly man, a sound divine, a trenchant controversialist (as witness his unapologetic lectures on *The Universalist's conversion*), and a true Christian gentleman. His forgiving spirit was an eminent characteristic. While his sensitiveness was acute and his feelings were im-

passive, resentment had no lodgement in him. He was truly magnanimous."

Dr. McClure was a prolific writer for the press. He published valuable articles in the *Christian Observer*, of which he was editor, *New Brunswick Review* and in the *Literary and Theological Review*; also in the *Boston Recorder*, the *Puritan Recorder*, of which he was for several years co-editor with Dr. Parsons Cooke, and in other religious papers. He was the author of a small book entitled, "The Life-Boat," an allegory, which had a large circulation; of "Four Lectures on Ultra-Universalism," a volume which quickly reached a fourth edition, and which was called "a theological classic unanswered and unanswerable;" of the lives of John Wilson, John Norton, John Davenport and John Cotton, in "The Series of the Lives of the Chief Fathers of New England," and a book entitled, "The Translators Revived," which gives a biographical sketch of each translator concerned in King James' version of the Bible.

Dr. McClure occupies a conspicuous position in the history of Malden. Becoming pastor of the First Church at the time it was swiftly approaching extinction, he, under God and His truth, arrested its downward progress, revived its failing life and courage, and restored to it its ancient honor and power. He changed, largely, the currents of thought and belief in Malden, and the morals and manners of the community were much the better for his coming into it. Upon questions of faith, and of right and wrong, he was never indefinite or equivocal. He was no trimmer. It was impossible for him to be guilty of hedging, or of cowardly concealment. He was grandly positive in his beliefs, and grandly brave in proclaiming them, though he did not know that he was. He appears to have been utterly ignorant of the experience of fear in any line of duty, and therefore was not conscious of doing a brave thing in giving clear and positive utterance to any truth or message of God. In dealing with troubled and anxious souls, he was gentle and tender as a mother, but it was not in him to fear wicked and defiant men. He was himself a faithful friend and a righteous man, and his delight in all true and royal souls was unbounded. Some of the ministers of Malden have been great and godly men, who wrought better than they knew, and better than the people of their time knew. Dr. McClure was one of these, and the impress of his own strong and manly character—and especially of his grand loyalty to truth and righteousness—still abides upon the town. He is one of that blessed company to whom has been fulfilled the words of the Seer of Patmos, written by command of a Voice from Heaven: "Their works do follow them."

REV. CHAUNCEY GOODRICH, THE THIRTEENTH PASTOR OF THE FIRST CHURCH.—Mr. Goodrich was born in Middletown, Connecticut, July 20, 1817. His father was the distinguished Chauncey Allen Goodrich,

D.D. LL.D., who was born in New Haven, Connecticut, October 23, 1790, graduated at Yale in 1810, was tutor in that college from 1812 to 1814, was ordained at Middletown in 1860, was Professor of Rhetoric and Oratory in Yale from 1817 to 1839; and then of Pastoral Theology in the Theological Department, holding this position until his death, which occurred February 25, 1860. The mother of Rev. Chauncey Goodrich was Julia, the daughter of Noah Webster, LL.D., the celebrated lexicographer. The son graduated at Yale in 1837, taught one year in a private school in Virginia, spent two years in the Theological Department at New Haven, and was ordained Pastor of the First Church in Malden August 30, 1843, where he labored successfully until, at his own request, he was dismissed November 1, 1847. Mr. Goodrich was a scholarly, modest and courteous man, accustomed to the society of educated people, and was much respected and beloved in Malden. A lady who remembered seeing him in Malden in her early childhood, speaks now of "his gentle, refined face and manner."

The church and society parted with him, after his ministry with them of about four years, with expressions of sincere regret. He was installed Pastor of the Congregational Church in Watertown, Connecticut, August 22, 1849, and on account of impaired health relinquished that pastorate November 1, 1856. After that time he resided in New Haven, and, among other literary labors in which he was engaged, aided his father in preparing the revised edition of "Webster's Unabridged Dictionary." He also continued in this work after his father's death. He departed this life March 27, 1868, aged forty years.

On October 22, 1843, shortly after his ordination at Malden, he married Miss Elizabeth E. Coe, daughter of Rev. Noah Coe, at Greenwich, Connecticut. Their son, an only surviving child, graduated at Yale in 1866.

REV. AARON C. ADAMS, THE FOURTEENTH MINISTER.—Dr. McClure closed his second pastorate in Malden April 28, 1852. Mr. Adams was installed July 29th, of the same year. The latter was born in Bangor, Maine, in 1815, and was the son of Eliashib Adams (who was the son of Eliashib, of Canterbury, Connecticut), and of Anna (Leland), daughter of Rev. John Leland, of Peru, Massachusetts. He graduated at Bowdoin College in 1838, and at Bangor Seminary in 1839. On July 10th, of the latter year, he was ordained.

During the earlier years of his ministry he labored in Maine. Afterwards he settled in New Jersey. Coming next to Malden, in 1852, he continued in his pastorate there for five years, and was dismissed at his own request, July 15, 1857. The next year he was installed pastor of the Congregational Church in Auburn, Me., where he labored for ten years. In 1868 he accepted a call to the pastorate of the Congregational Church in Wethersfield, Conn. This position he held until 1879. At the present date (1890)

he continues to reside in Wethersfield. Mr. Adams has served in the Christian ministry about fifty-one years, and is still engaged in the work he loves, having now the pastoral charge of a parish in the vicinity of his residence.

Mr. Adams' ministry in Malden was rich in spiritual fruits. On a single Sabbath—May 6, 1855—forty-five persons united with the church; thirty-seven by confession of Christ and eight by letter. During the five years of his ministry here seventy-nine united with the church; twenty-eight by letter and fifty-one by confession of Christ. The church, upon his resignation, put on record its testimony "to his faithfulness as a pastor and a preacher," also to the pain it felt in parting with him, and expressed to him its "Christian sympathy and affection." Mr. Adams himself speaks of his life and work in this town thus:

"My five years at Malden I reckon as among the brightest and most stimulating in my ministry. We had an excellent company of brethren. Our Sunday-School and prayer-meetings were uncommonly interesting and helpful; and there were seasons of special progress and ingathering. I left there with great reluctance."

Mr. Adams' wife was Harriet S. Johnson a daughter of Dr. A. and Julia (Sargent) Johnson. Their two sons, John S. and George E. Adams, are both deacons, the former in the Harvard Church, Brookline, Mass., and the latter in the Shawmut Church, Boston. The two daughters, Charlotte E. and Harriet S. are married, the former residing in Salt Lake City, and the latter in Wethersfield, Connecticut.

It is a matter of some interest that Mr. Adams was one of four brothers—"brought up in the old Puritanic fashion,"—three of whom became ministers of the gospel. Two of these have entered into their rest—Rev. George E. Adams, after a ministry of forty-eight years, and Rev. John C. Adams, after a ministry of over thirty years. The Rev. Aaron C. Adams having already labored in his calling fifty-one years, the total length of the three ministries is one hundred and twenty-nine years.

THE FIFTEENTH MINISTER OF THE FIRST CHURCH WAS REV. CHARLES EDWARD REED.—He was born January 28, 1830, in Taunton, Mass., was graduated at Andover Seminary, in 1857, and was ordained in Malden, April 7, 1858. His pastorate was terminated by act of council, December 1, 1869. He is now in business in Milwaukee, Wis., and is a member and an officer of a Congregational Church.

REV. ADDISON PINNEO FOSTER, D.D., WAS THE SIXTEENTH MINISTER OF THE FIRST CHURCH.—His father was Rev. Eden B. Foster, D.D., long the able preacher and faithful pastor of the John Street Church, Lowell, Mass. The son was born September 25, 1841, at Henniker, N. H., fitted for college at Phillips Academy, Andover, was graduated at Williams' College, in 1863, spent two years in theological study, at Princeton, N. J., and graduated at the sem-

inary at Andover, in 1866. His first pastorate was with the Appleton Street Church, Lowell, Mass., where he was ordained, October 3, 1866. On account of impaired health, he relinquished his pastoral charge in 1868. After resting for two years, he became acting pastor for one year at Dubuque, Iowa. He was installed pastor of the First Church, in Malden, Mar. 29, 1876. After a brief, but successful ministry, he resigned his charge. The brethren of the church, by formal resolutions, urged him to remain, expressing their high appreciation of his character, and recognizing gratefully the success of his ministry. But he insisted upon the acceptance of his resignation, and was dismissed by Council, September 18, 1872. He was installed pastor of the First Church, Chelsea, October 1, 1872; was called thence to the First Congregationalist Church, in Jersey City, N. J., in the spring of 1877, and labored in that pastorate about nine years. Dr. Foster was installed as pastor of Immanuel Church, Boston, April 1, 1886, and fills that position at the present time.

REV. JOSHUA W. WELLMAN, was called to be the SEVENTEENTH PASTOR of the First Church, in Malden, and was installed March 25, 1874. After a service of little more than nine years, he relinquished the pastorate under advice of physicians, and was dismissed by sanction of Council, April 17, 1883.

The present pastor is the REV. THEODORE CLAUDIUS PEASE. He was born October 14, 1853, in Poughkeepsie, N. Y., was graduated at Harvard College, in 1875, and at Andover Seminary, in 1880. He was ordained to the ministry, and installed as pastor of the Congregational Church, in West Lebanon, N. H., September 8, 1880. From that pastorate, he was called to be the EIGHTEENTH MINISTER, of the First Church, in Malden, and was installed December 16, 1884.

MODERN MEETING-HOUSES OF THE FIRST CHURCH.

After the Church was deprived of its house of worship in 1828, it worshipped for about five years in an "upper room." In 1832, the Trintarian Congregational Society, which in September of that year, became connected with the First Church began the erection of a meeting-house.

This house was completed in the spring of 1833. The building committee, of which Rev. Mr. McClure was chairman, made its final report, April 2, 1833, and received the thanks of the society. The dedication of the church probably occurred not far from that date. This house of worship was located on the southeast corner of Maine and Haskins Streets. Immediately east of it was also erected a parsonage house. This house appears to have been built by a joint-stock company, upon land sold to the company, with certain conditions, by the society.

Mr. and Mrs. McClure, having boarded with Dr. Buck during the first year after their marriage, and having resided another year in a house owned by

William Barrett, and situated on Haskins Street, just east of the present Unitarian Church, moved into the new parsonage house. This was their home during the remainder of Mr. McClure's first pastorate. During his second pastorate, they resided in the second house west of the depot of the Boston and Maine Railroad. To the same parsonage, however, Rev. Chauncey Goodrich brought his young bride in October, 1843, they having been united in marriage less than two months after his ordination. But at the close of the ministry of Mr. Goodrich, the parsonage was sold. The house is standing at the present time, and is still used as a dwelling-house.

In building the meeting-house a debt was incurred, which, though not large, was for many years a heavy burden upon the small society. In this house the church and society worshipped about seventeen years. In 1848, those of the congregation, who resided in South Malden, expressed a desire to organize a church and build a house of worship in their part of the town. Consequently in March of that year, twenty one members of the First Church were dismissed that they might organize a new church on the territory now comprised in the town of Everett. Most of those who now remained with the First Church regarded their house of worship as located too far to the south. It was, therefore, moved in 1850 to the site now occupied by the Fire Engine House near the Square, and at the same time was enlarged. Here the church and congregation had their church-home for nineteen years, when they found themselves again straitened for room. As the house was in the process of being elevated, and also enlarged the second time, it was blown down in the memorable "September gale" of 1869. This occurred in the last year of the pastorate of Rev. Mr. Reed. The society immediately addressed itself to the work of building again the house of God, which was completed in about a year, and was dedicated March 23, 1871. This is the house of worship which is occupied at the present time by the First Church. Six days after the dedication of this house, Rev. Addison P. Foster was installed as pastor of the church and society.

THE PROSPERITY OF THE CHURCH.—The growth of the First Church, during the sixty-two years which have elapsed since its separation from the First Parish has exceeded its growth during any previous sixty years of its long history. When Mr. McClure began his labors as acting pastor of the church in April, 1831, the entire number of church members resident, or recognized as members, could not have been much over sixty; for Rev. S. O. Wright in his "Historical Discourse," delivered in December 1881, (a month after the reception of twenty-three, on one Sabbath, by profession), affirmed that the whole number of members was then eighty-six. But in the Directory of the First Church for 1890, the number of members is stated to be 572, of whom 452 are resident and ninety-six non-resident.

In 1831, the congregation could be accommodated in a small hall in the second story of a school-house. But in 1890, a church with seats for an audience of about nine hundred is barely sufficient for the congregation. The members of the Sabbath-school at the present time number 543. The church also sustains a mission Sabbath-school of 163 members in that part of Malden called Edgeworth. Members of the church are likewise connected with a religious enterprise on Belmont Hill, which is designated "Mystic-side Congregational Union," and which, it is expected, will soon grow into a church. The school at Edgeworth is sustained by "The Edgeworth Mission Society," and was organized in 1852, with about twenty scholars. Its sessions were held at first in a freight depot, then in a private house, later in a school-house. A chapel was built in 1866, and was dedicated in December of that year. This Sabbath-school, during the thirty-eight years of its history, has had only three superintendents: Thomas S. Williams, Esq., for some years superintendent of the Boston and Maine R. R., Dea. James Freeman, for many years Deacon of the First Church, and Mr. Joseph W. Chadwick, Master in the Boston Latin school. Each of the first two served in this office about ten years. Mr. Chadwick, the present superintendent, has served about nineteen years. A prayer and conference meeting (with preaching occasionally) is held every Sabbath evening. The history of this mission has been one of great success and of marked usefulness.

OTHER CONGREGATIONAL CHURCHES.—In the spring of 1848, the Congregationalists who resided in North Malden,—a territory now comprised in the beautiful town of Melrose,—feeling that the growing population in that vicinity should be better provided with religious privileges, organized an Orthodox Congregational Church. They erected a house of worship, which was dedicated in 1849. The same year the Rev. Stillman Pratt, who had preached to them for several months, was installed as their pastor. Such was the origin of the present prosperous Congregational Church in Melrose.

The organization of the **WINTHROP CHURCH** in 1848 in South Malden,—a territory which is now comprised in the pleasant and rapidly growing town of Everett—has already been mentioned. It worshipped for a time in the hall of the South-West District School-house. Its first minister was Rev. George E. Pratt, who was ordained in 1849. This church was unhappily divided in 1858. But the two parts were brought together again in 1861, constituting the present united and efficient Congregational Church in Everett.

THE FIRST CONGREGATIONAL CHURCH IN MAPLEWOOD.—On July 2, 1873, four persons at the house of Mr. Frank P. Harriman, of Maplewood, Malden, prayerfully considered the question of the organization of a Congregational Church in that part of the town. On Wednesday of the following week another

prayer-meeting was held with special reference to the same subject, at the house of Mr. John H. Potter. The following paper was drawn up December 22, 1873: "We the undersigned, residents of Maplewood and vicinity, desire that a Congregational Church be established in this place, and guarantee our support for the furtherance of that object." Twenty-two persons signed this paper. These people decided at once to hold services of public worship on the Sabbath. Rev. J. W. Turner was invited to serve as acting pastor. The Massachusetts Home Missionary Society offered to contribute \$400 towards his support, provided opportunity should be offered him to preach and labor elsewhere one-half of the time. It was soon arranged that he should divide his services between Maplewood and Edgeworth; the first place being in the easterly, and the other in the westerly part of Malden. The people at Maplewood leased Randal's Hall, and the first service of public worship was held on the morning of the first Sabbath in January, 1874. They had furnished the hall and named it "Salem Hall." A Sabbath-school was instituted, in the afternoon, of eighteen members. On January 20, a Sabbath-school was fully organized with Mr. Frank P. Harriman, superintendent; Mr. John H. Potter, assistant superintendent; and Mr. E. P. Woodward, secretary and treasurer. During the first year the average attendance was forty-six, and during the second year fifty-three.

"The First Congregational Society in Maplewood" was organized March 30, 1874. "The First Congregational Church in Maplewood" was organized, by advice of a Council, in Salem Hall, on June 10, 1874. In the same hall the church and society worshipped nearly three years. In the latter part of this period the society erected a house of worship, which was dedicated June 7, 1877. A debt was incurred, and some difficulty has been experienced in canceling the same, but there is now a good prospect that the society will soon be entirely free from debt.

Rev. J. W. Turner may properly be called the father of this church. He was an able and earnest preacher, a true and godly man, and he became warmly attached to the little flock that gathered around him, and was greatly interested in the organization and prosperity of this church. He closed his labors with this people in February, 1875.

On the 16th of May, in the same year, Rev. Silas Ketchum was called to be the pastor of this church and society. He preferred not to be installed, but served as acting pastor until October 1, 1876. Mr. Ketchum was a scholarly and accomplished man. His able sermons and faithful pastoral labors were highly appreciated by his people, and they parted with him with sincere regret. The next acting pastor was Rev. Alfred S. Hudson, whose ministry in Maplewood commenced October 8, 1876, and who

at the same time was acting pastor of the young Congregational Church in Linden (a portion of the city of Malden, lying northeast of Maplewood.) He continued with the church in Maplewood nearly seven years. His labors were earnest and faithful, but were prosecuted in the face of some difficulties, for which, perhaps, neither he nor his church were responsible. His pastorate terminated in June, 1883. After this various ministers supplied the pulpit until September 1 1883, when Rev. H. Allen Shorey became acting pastor, and served as such until October 1, 1884. At that date Rev. William F. Obeare commenced his labors as the acting pastor of this church and society. He is still with them, and his ministry is happy and successful.

The church is united and faithful, supporting a flourishing Sabbath-school and all departments of church work, and is inspired by the hope of still larger prosperity. The present number of church members is eighty-five, of whom thirty are males and fifty-five females.

THE UNION CONGREGATIONAL CHURCH in Linden (Northeast Malden), was organized with fourteen members, by advice of an Ecclesiastical Council, June 13, 1876. Of the fourteen members, eleven presented letters to the Council, and three made public confession of Christ. A Sabbath-school had been organized January 17, 1874, and at about the same time union religious services had been commenced in a hall then standing on Lynn Street. The Sabbath-school and the weekly religious service had been continued until the time came to form a church. "The Union Congregational Society" was organized May 6, 1876, to act in connection with the church, and was incorporated June 7th of the same year.

At a meeting of the church held soon after its organization, J. F. Jefferds and William J. Pratt were elected to serve as deacons until January, 1877. At its second meeting the church voted to call Rev. Alfred S. Hudson to become its acting pastor for six months from October 1, 1876. The society subsequently concurred with the church in extending this call to Mr. Hudson. He continued his ministry, however, with the church and society for about five years, terminating his pastoral labors November 26, 1881. Rev. Edmund S. Potter succeeded Mr. Hudson as acting pastor, commencing his labors June 1, 1882, and he still continues his acceptable and successful ministry with this people.

The Union Congregational Society soon after its organization initiated measures to build a house of worship. The corner-stone was laid October 11, 1876. Religious services were held for some time in the vestry. The auditorium was furnished in the fall of 1879. A debt was incurred which was gradually diminished until the last payment was made December 28, 1886, and the society began the year 1887 free from debt. But the house was not formally dedicated until October 24, 1879. The present members of the church

number forty-six, of whom thirteen are males and thirty-three are females. The present superintendent of the Sabbath school is Mr. H. G. Tomlinson, and the number of members is two hundred and six. This church abides in the unity of the Spirit and in the bond of peace; and with its wise and faithful pastor is doing good work for Christ and His kingdom in that part of the city.

THE FIRST BAPTIST CHURCH IN MALDEN.—This church was organized in 1803. During the previous century and a half the First Church has been the only church at Malden Centre. Various influences at last combined to bring about the founding of a Baptist Church. Some of these influences had been active for at least sixteen years, or from the time of the settlement of Rev. Adoniram Judson as pastor of the First Church. The Baptists were strictly evangelical in faith. They believed in conversions and revivals under special manifestations of the regenerating grace of the Holy Spirit. Some of the more spiritual and godly members of the First Church had become alarmed in view of various sad developments of Arminianism, under the ministries of their pastors, Willis and Greene. Such Christians would naturally be attracted by the earnest evangelistic preaching of Baptist ministers, even though taking at first no special interest in their views of baptism. Their own deeper religious needs were not met by the preaching to which they were accustomed to listen. They had been shocked to learn that members of their own church and congregation were bitterly opposed to the conversion of souls and to revivals of religion. The following statements respecting the actual religious condition of Malden at that time are undoubtedly in the main true, and they largely explain the demand which existed for evangelical preaching and for the founding of a Baptist Church:

"Not a few of the members of the Parish Church, admitted through outward baptism, had become the active opponents of the great revival which was then commencing in New England. An energetic protest to the settlement of Mr. Judson, the father of our beloved Burman missionary, is to be found on the records because he was of the 'Bible Baptist' and 'Prophets'. And the opposition to what was then so properly called 'experimental religion' at length prevailed and Mr. Judson retired. But the eyes of many were opened. . . . But while some professed their convictions, and united with Baptist churches in the vicinity, the great majority of those who were in this town saw where this thing would grow. Meanwhile there was in this town an alarming dearth of spiritual religion. Such was the state of things when, in 1797, Rev. Dr. Shephard, of Brentwood, N. H., visited Malden, and was invited to preach at the house of Mr. John Tufts. This sermon, the first Baptist sermon ever preached in the town, attracted immediate attention, so different was its whole spirit from anything heard at the Parish Church. Meetings were continued on the afternoon and evening of every third Wednesday, Rev. Messrs. Shephard, Peck and Smith officiating. God blessed the enterprise and a revival of religion was the result. Sabbath preaching

continued. Meanwhile the first Baptist church in Malden

for its godliness, that this revival of religion awoke the spirit of persecution, and the little band of Baptist Christians were driven from the Centre School-house. It was the same spirit that a few years before so furiously opposed Adoniram Judson, on account of his evangelical faith and preaching, drove him from the First Church, and put in his place Eliakim Willis with his Arminian creed and Elishah. The only place now open to the Baptists was a barn on Salem Street, owned by Mr. Benjamin Faulkner. In this barn they worshipped until September, 1804, "undeterred by the winter storm or the opposition of their enemies." Under the direction of Mr. Pottle a church was organized, composed mainly of recent converts.

"They met at the house of Mr. Phillips, and Mr. Joseph Dyer was chosen clerk. A committee was appointed to call a Council, that their proceedings might be regular in form, and that the new church might be in fellowship with the surrounding churches of their 'Faith and Order.' The Council, composed of delegates from the Baptist churches in Boston, Newton and Beverly, convened on the 27th of February, 1803, in the barn, where the brethren and sisters, forty-two in number, were duly constituted and recognized as a church, under the name of the First Baptist Church in Malden." (Church Manual.)

In January, 1804, probably in the barn, this church for the first time commemorated the Lord's death, the number of communicants being sixty-four, fifty-two of whom were recent converts. In September of 1804 their meeting-house was so nearly completed that they occupied it as a place of worship, and when finished it was dedicated. It was located on ground now included in Salem Street Cemetery. In this "exceedingly plain house, with its large windows and square belfry," the church worshipped thirty-nine years. The first deacons of the church were Samuel Wait, Jr., and Samuel Wheeler. Rev. Mr. Pottle appears to have terminated his successful ministry with this church early in 1807. The number of church-members at the time he left was 110. He was succeeded in 1807 by Rev. William Bently, who remained only one year. He was followed by Rev. Ely Ball, who served as preacher, but was not invited to be pastor. From 1808 to 1815 there was no settled pastor. The church in these years appears to have suffered from internal strifes and divisions. During this period various ministers supplied the pulpit, one of whom was Rev. J. Livermore, who preached two years. Rev. Samuel Wydown was then called to the pastorate, but he left at the end of one year. In 1816 Rev. Ebenezer Nelson, who had removed from South Reading to Malden, became the pastor of the church. He labored for seven years, but remained nominal pastor two years longer. He died in office May 4, 1825, in the seventy-second year of his age, and the fortieth of his ministry. He is said to have been the first and only minister who has died while in official connection with this church. His successor was a young man, Mr. John Cookson, who was ordained pastor of the church March 24, 1824, and left after a pastorate of two years. Rev. J. N. Brown was installed as pastor December 20, 1826, and remained one

In 1803 Rev. Henry Pottle, an earnest and warm-hearted Baptist minister, preached in Malden. A revival followed and about fifty were subsequently baptized. It is sadly indicative of the moral and religious degeneracy of the town, once distinguished

year. A call was extended to Rev. Avery Briggs, September 28, 1828, who served the church four years, during which he baptized nearly sixty persons. The house of worship was also enlarged and furnished with a bell. The next pastor was Rev. Conant Sawyer, who continued in office three years. Rev. E. N. Harris was settled as pastor April 1, 1837, but soon "avowed his belief in Universalism, and, by his unchristian influence, involved the church and society in great difficulty. He was finally excommunicated, but subsequently renounced his errors and sought restoration to the church." Rev. Joseph M. Driver officiated as pastor from 1838 to 1840; and Rev. Nathaniel W. Williams from 1840 to 1843. During the pastorate of the latter there was a season of special religious interest; William Oliver, John B. Faulkner and Thomas Wait were chosen deacons; and a spacious and elegant meeting-house was erected on the corner of Main and Salem Streets at a cost of \$10,000. This house was dedicated February 22, 1843. In June, 1843, the church recalled a former pastor, Rev. John Cookson. He was succeeded in 1848 by Rev. Charles B. Smith, whose pastorate was terminated in 1850. His successor was Rev. William F. Stubbett, who began his pastorate September 1, 1851.

In 1853 the meeting-house, ten years after it was dedicated, was repaired and a baptistery was added and at the same time the vestry was made more commodious, the entire improvements costing about \$5000. But this beautiful house of worship was destroyed by fire March 3, 1855. Invitations from the Congregational and Universalist Societies to occupy their houses of worship were accepted, and the work of erecting a new house upon the old site was soon commenced. The new church was dedicated February 14, 1856.

During Mr. Stubbett's pastorate of eight years, seventy-two persons were admitted to the church by baptism and sixty-seven by letter. Elisha S. Converse and William Hunter were elected deacons, the former in 1854, the latter in 1856. Mr. Stubbett left in 1859.

The next pastor was Rev. Daniel W. Faunce, D.D., who began his ministry with this people in May, 1860. But two years later the church was again afflicted with a great calamity. Their house of worship, only six years after it was completed, was consumed by the flames. It was in the midst of our great Civil War. The recent building of the church now destroyed had drawn heavily upon the resources of the people. Nevertheless they bravely set themselves to the work of building again the house of God upon "the same hallowed spot." The new church was dedicated March 31, 1864. In this year, Deacons John B. Faulkner and Elisha S. Converse having resigned their office, Freeman A. Smith and Alfred R. Turner were elected deacons for the next seven years. The pastorate of Rev. Dr. Faunce was one of marked success. He labored with the church six years and then re-

signed, to the great regret of his people. During his pastorate one hundred and thirteen persons were added to the church, and of these sixty-one received baptism.

In 1867 Charles Merrill and David Hutchins were elected deacons. And on the 17th of July in that year Rev. George F. Warren, of Lowell, was installed as pastor of the church. He resigned his pastorate November 7, 1869.

Rev. Samuel W. Foljambe, D.D., began his ministry with this people May 1, 1870, and resigned his office October 1, 1886. His pastorate of more than sixteen years was longer than that of any of his predecessors in the service of this church. The ministry of this eloquent preacher and faithful pastor proved a great blessing to the people. His hearers received knowledge of the truth, and were edified. Many were convicted of sin, born of the Spirit and added to the church. Early in his pastorate two new Baptist Churches were organized, which were offshoots of the church under his care. From the First Baptist Church in Malden:

"July 18, 1871, eighteen persons (afterwards increased to twenty-two) were dismissed to and in forming a church in Everett; and Aug. 17, 1871, letters of dismissal were granted to nineteen persons (subsequently increased to twenty-four) to form a church in Maplewood, the outgrowth of the Sabbath-school established in 1868."

John H. Parker was elected deacon in 1871 and re-elected in 1878. E. T. Underhill was elected deacon in 1874, William Hardy in 1880 and Horace M. Wiley the same year, and William Mann in 1882. John H. Parker was re-elected in 1878 and 1885 and Horace M. Wiley in 1887. James B. Upham was elected 1888. James H. Morse, Jesse Cudworth, Joseph Hague and David Hutchins in 1889, and G. Fred. Estie in 1890.

The present pastor of this church and society is Rev. J. Nelson Lewis. He began his ministry with them October 23, 1887, and recognition services were held November 16th of the same year. The members of this church at the present time number 625, of whom 210 are males and 415 are females. The members of the Sabbath-school number 891.

The question of a new and larger house of worship was again pressed upon this people in the early part of the year 1888. At a special meeting held on the 3d of December in that year, a committee was appointed to procure plans and raise money. The committee consisted of Deacon E. S. Converse, E. F. Bickford, A. R. Turner, Jr., Deacon J. B. Upham, W. C. Langley, Jr., James Pierce, Deacon John H. Parker, Deacon Jesse Cudworth, Deacon David Hutchins, John N. Williams, Deacon H. M. Wiley and G. L. Richards. A. R. Turner was chosen chairman and G. L. Richards secretary.

"On Monday evening, Jan. 28, 1889, a public meeting was held in the church to organize an interest in the movement. Speeches were made by the Pastor, Rev. J. Nelson Lewis, A. R. Turner, Jr., E. F. Bickford and E. S. Converse, who said formally that if the people would raise \$30,000 for the new church he would give \$20,000, and if more was raised, he would give dollar for dollar. Stereoscopic views of plans for the church were also shown.

"By July 1, 1888, the amount of \$2,000 had been subscribed, which secured the subscription of \$1,000 by E. S. Converse. In the mean time the committee had held a meeting on May 24, 1888, at the house of twelve members, the last being Sunday, and E. E. Barker had been chosen chairman and J. R. Barker secretary.

"The old church was moved to the northeast corner of the lot about Oct. 1st, and arrangements were immediately made for the construction of the foundation of the new church.

"On the 26th of February, 1890, at a meeting of the society, the committee reported that owing to the unsettled condition of the labor market, and to recent large fires in Boston and Lynn, the cost of building materials had very much increased, also that the requirements of the church were such that the building could not be erected for \$60,000, as at first proposed, and that in view of this they recommended that \$30,000 or more be appropriated, with the understanding that this sum be raised by subscription, if possible; it was voted. In connection with the above vote, Hon. E. S. Converse renewed his former generous offer to contribute as much more as the church and society should raise prior to Jan. 1, 1892."

In addition to this ample contribution of Mr. Converse to aid in building the new house of worship, he has recently presented to the Baptist Society a fine parsonage house, the grounds of which are contiguous to the spacious meeting-house lot. The value of this parsonage house, and of the land given with it, upon a part of which the north end of the new church stands, has been estimated to be \$20,000. It is due to this public and princely benefactor to add that he and his estimable wife have also, within a few years, presented to the city of Malden the munificent gift of a Free Public Library Building, which is to serve as a fountain of intellectual light and life, and also as the memorial of a beloved son who was suddenly taken from them in his early manhood. To this noble gift Mr. Converse has added permanent funds for the purchase of books. He has also given costly paintings and beautiful statuary.

The First Baptist Church in Malden, like other churches, has had its times of trouble and trial. The flames have twice consumed its house of worship. It has been obliged repeatedly to make great sacrifices in building the house of God. Nor has perfect peace always reigned within itself, as is indicated by a famous pamphlet, entitled: "The History of Wars and Fightings (Without Shedding of Blood), in the Baptist Church in Malden, Written By John Spurgeon, S. M. One of the Members 1812." Yet, on the whole, this church, during the eighty-seven years of its history, has been blest abundantly in things temporal and spiritual. It has wrought bravely and nobly for Christ and His Kingdom. The early days of this church fell upon the most critical period in all the long history of evangelical faith in this town, and it proved itself equal to the hour. It rendered a splendid service in the defence and propagation of that faith at just the time when its enemies were flushed with seeming victory, and unbelief, gross intemperance and ungodliness abounded. If it shall remain true to the same evangelistic beliefs and fearlessly proclaim them for the salvation of men, the prospect is, that with ampler means it will render in the future still grander services for God's Kingdom

of truth and righteousness in Malden, in the land and in the world.

THE FIRST BAPTIST CHURCH IN MAPLEWOOD.—Religious meetings began to be held by Baptists in this part of Malden February 22, 1886. Preaching services, conducted by Rev. G. F. Warren, then pastor of the First Baptist Church at the Centre, soon followed, attended with considerable religious interest. A Sunday-school was organized in August, 1868, with sixty scholars. For a time its sessions were held in the Grammar School-house, but at length the use of this house was forbidden by a single member of the School Board. His action, however, was soon overruled by the full board. In the fall of 1869 a chapel, which was nearly completed, was blown down by "the great September gale" of that year, and made a complete wreck. But a meeting of the Baptist Church at Malden Centre was at once called, and \$1000 were subscribed. The people at Maplewood raised \$800 more; and another chapel better than the first was erected. It was dedicated March 3, 1870. In September of the same year Rev. William Boyd became "the first regular supply." He ceased to supply the pulpit in April, 1871. A similar service was then rendered by Mr. J. K. Richardson, a student in Newton Theological Seminary. A Baptist Church of twenty-eight members was organized August 2, 1871, and was recognized October 18, 1871. Mr. Richardson was its acting pastor until his theological course was completed at Newton, when he accepted a call to become the pastor of the church, and was ordained July 10, 1872. But receiving a call from Rutland, Vermont, he closed his ministry with this church in April, 1874. On April 6, 1875, Rev. M. N. Reed began his pastorate with this church, and terminated the same in November, 1877. The next ministerial laborer with these people was Mr. T. G. Cass, a student at Madison University, who came June 25, 1878, and one year from that date was ordained as pastor of the church. Early in the year 1880, the entire debt of the church (\$1500) was paid off. In 1882, under the energetic leading of the pastor, aided by the Massachusetts Baptist Convention and by contributions from churches and friends, the present commodious house of worship was erected, to which was attached the old chapel as a vestry. The cost of the whole was over \$11,000, all of which was secured before the house was dedicated in October, 1882. Rev. Mr. Cass resigned his pastorate early in 1883, to accept a call from the Baptist Church in Claremont, N. H., and Rev. S. A. Severance became pastor in April of the same year. He continued his labors until October, 1889, when he resigned to accept the pastorate of the Baptist Church in Keene, N. H. In December, 1889, Rev. George W. Rigler, of Antrim, N. H., accepted a call from the church in Maplewood, and is its present pastor. This church, with its congregation and Sabbath-school, has steadily increased through the nineteen years of its history, the members of the church numbering at the

present time 164, and the members of the Sabbath-school 225.

THE CENTRE METHODIST EPISCOPAL CHURCH.—Itinerant and other Methodist preachers held religious services in private houses within the limits of Malden many years previous to the organization of a Methodist Church in the town. As early as 1791 Rev. Jesse Lee preached in the east part of the town, near the Saugus and Chelsea line, and under the influence of that sermon two men, Mr. John Waitt and another Mr. Waitt, were converted. In 1800, or not far from that year, Mr. Joseph Snelling and Rev. Thomas C. Pierce came out from Boston and preached in Malden, Mr. Snelling discoursing with great impressiveness upon the lives of poets.

But the earliest movement of the Methodists in the direction of church organization was made in North Malden (now Melrose). As early as 1813, religious services, preliminary to the founding of a Methodist Church, were conducted there by Rev. Timothy Merritt. He was succeeded in this labor the same year by Rev. Thomas C. Pierce, and he by Rev. Ephraim Wiley. Under the direction of Mr. Wiley, "in the summer of 1815, a church was duly organized according to the Discipline." Mr. Wiley was succeeded in 1818 by Rev. Orlando Hinds, "who officiated one year, during which a meeting-house was built." The church thus organized was the mother Methodist Church in Malden.

On May 12, 1815, two persons were converted under the influence of a revival in North Malden. These persons were James Howard and his wife, Mary (Cox) Howard. In the early part of the following year (1816) Mr. Howard and his family moved to Malden Centre, and for several months resided in the house of Mr. Samuel Cox, which is still standing, on Pleasant Street, opposite the last factory. The next year he moved into his new house on the west side of Summer Street, near the corner of that street and Rockland Avenue.

It is said that when Mr. and Mrs. Howard moved to Malden Centre, they and Mr. John Waitt, who lived on Cross Street, were the only Methodists in that part of the town. Religious meetings were conducted at an early day in the house of John Waitt. But at the residence of Mr. Howard, in August, 1816, appears to have begun the movement which led to the organization of a church. Some time in that month, at the request of Father Howard, as he was called, and at his residence, Rev. Ephraim Wiley held a public religious service, and preached from the text: "These are they which came out of great tribulation, and have washed their robes, and made them white in the blood of the Lamb." Soon after this a class was formed under the leadership of James Howard, which met at his house and was maintained for several years. Perhaps it was merged into the class which, as we shall see, was formed in 1820, but Mr. Howard continued to be its leader. In the mean

time religious meetings, under the lead of Methodist ministers, were held, first in the school-house at the corner of Salem and Sprague Streets, then in Stiles' Hall, at the corner of Pleasant and Washington Streets—where now stands the new and beautiful Methodist house of worship—and also in the hall of the Brick School-house on Pleasant Street, which appears to have been the cradle of infant churches in Malden.

On August 15, 1819, Gilbert Haven, the father of Bishop Gilbert Haven, requested the First Church, of which he was then a member, to give him a letter of dismission and recommendation to the Baptist Church. He was persuaded, however, to withdraw his request. Mr. Haven, himself a man of warm and earnest evangelical piety, was evidently restless under the cold, indefinite preaching of the Arminian minister who at that day was pastor of the First (Congregational) Church; and on June 3, 1821, he again asked for a letter of dismission, but now he expressed a desire to be recommended to the Methodist Church, which was then being organized, or had recently been formed there, showing that it was not chiefly any change of view respecting Christian baptism that led him to leave the First Church. His request was granted.

Rev. S. Osgood Wright, himself a Methodist minister, in his historical discourse, already referred to, which was preached December 1, 1831, gives what is probably a trustworthy account of the origin and early history of the Methodist Church at Malden Centre. Speaking of Mr. James Howard, his wife Mary and Mr. John Waitt, who, as he affirmed, were the only Methodists living at Malden Centre in 1816, he says:

"They continued to live in the love and fellowship of the Church of their espousal, without receiving any accessions to their numbers until the year 1820. At this time a revival commenced in the north society and extended to the centre of the town. Several persons now withdrew from the Baptist Church and one from the Congregationalist, who together with several others, were formed into a class. These, like many in similar circumstances, had many difficulties to encounter and many prejudices to overcome. Being without a house of worship, they met in the school-house hall (the Brick School-house), and were supplied a portion of the time with preaching by the minister of the north church. Receiving a gradual accession of numbers, they proceeded to erect a meeting-house, which was dedicated in 1825. Rev. Joseph Marsh labored very successfully with this society at this time; and to him belongs much praise for his activity and perseverance in providing a house of worship. The first preacher who resided with them was Rev. Ebenezer Treason, who came in 1825. Rev. John T. Burrill succeeded him, and remained two years, and gave place to Rev. Timothy Merritt, the present minister. This church has had its seasons of adversity and prosperity. It has moved onward under the guidance of the day-star of hope, and sat down in tears and the darkness of clouds and disappointment. It has received a gradual increase of members, and the whole number is now fifty."

The meeting-house, referred to by Mr. Wright as dedicated in 1825, is still standing upon its original site. It has, however, been remodeled into a double dwelling-house, and is located on the west side of Main Street, the fourth building south of Mountain Avenue. The date of its dedication is said to have

been April 27, 1826. The second house of worship was located at the corner of Pleasant and Waverly Streets, and was dedicated October 20, 1842. This house also is still standing, and is now occupied as a store by a furniture dealer, Mr. C. C. Homer. The third house of God built by this church, and the one in which it now worships, was dedicated May 13, 1874. This large and beautiful house is located at the corner of Pleasant and Washington Streets, on the site of the old Stiles Hall, in which the early Methodists in Malden sometimes worshipped.

The names of the ministers who were in charge of this church previous to 1826 are not known. But beginning with Rev. Joseph Marsh, of that year, the church has had thirty-eight pastors, one of them—Rev. Joseph Cummings—serving in two pastorates, separated by an interval of thirty-one years. The present minister in charge is Rev. W. P. Odell, who is now in the fourth year of his successful pastorate.

PASTORS OF THIS CHURCH.

1826, Rev. Joseph Marsh.	1866-61, Rev. W. S. Studley.
1827, G. W. Fairbanks.	1862, Rev. W. R. Clark.
1828, Rev. Ebenezer Ireson.	1863, Rev. J. D. Bridge.
1829-30, Rev. J. T. Burrill.	1864-65, Rev. Wm. R. Bagnall.
1831, Rev. Timothy Merritt.	1866-67, Rev. Lorenzo K. Thayer.
1832, Rev. A. U. Swinerton.	1868-69, Rev. Daniel Steele.
1833, Rev. C. Noble.	1869, Rev. Isaac S. Cushman.
1831, Rev. N. B. Spaulding.	1861-62, Rev. E. O. Haven.
1835, Rev. R. W. Allen.	1863-65, Rev. J. W. F. Barnes.
1836, Rev. E. Othman.	1866, Rev. L. T. Townsend.
1867, Rev. H. B. Skinner.	1867, Rev. A. O. Hamilton.
1828-33, Charles Hayward.	1868-69, Rev. T. Barton Smith.
1833, Rev. S. G. Hiler, Jr.	1871-73, Rev. J. J. Jones.
1840, Rev. Moses Palmer.	1874, Rev. Joseph Scott.
1811-42, Rev. George Landon.	1875-77, Rev. D. C. Knowles.
1843, Rev. Joseph Whitman.	1878-79, Rev. Joseph Cummings.
1844, Rev. G. W. Frost.	1880-82, Rev. S. F. Jones.
1845, Rev. Jacob Sanborn.	1883-85, Rev. J. H. Mansfield.
1846-47, Rev. Joseph Cummings.	1886-90, Rev. W. P. Odell.
1848-49, Rev. Joseph Dennison.	

This church was organized in 1821, and its Sunday-school in 1822. In its early years it had a hard struggle, as many a church of Christ has had, for existence, and at times since that day it has been maintained only by the loving devotion and large sacrifices of its members. But glorious has been its victory. Its days of small things and struggle for life are over. It has, for the present, the finest house of worship in the city, also a larger number of church members than any other church in the city, save the Catholic, and the largest Protestant Sabbath-school, except the school of the First Baptist Church. The number of its church members at the present time is 666, and the number of its Sabbath-school 736. This church stands up bravely for all true moral reforms, for truth and righteousness in the city and in the land, and for pure and earnest evangelical religion everywhere.

THE METHODIST EPISCOPAL CHURCH, MAPLEWOOD, MALDEN.—The following historical sketch of this church has been courteously furnished by its present pastor, Rev. J. W. Fulton. It has been in a few places slightly abbreviated, or condensed.

The first religious gathering in this part of the city was held in the year 1837, in the first school-house that was ever built here. A Baptist brother, Aaron Waitt, preached at 6 o'clock P.M., Sundays, in warm and pleasant weather. No conversions are reported, and no organization was accomplished.

In 1839 and 1840, Father Blodgett, a farmer in Linden, and a Methodist local preacher, obtained the use of the house occupied by Samuel Burrill, which now stands on Salem Street, at the head of Beach Street, and during those years held two prayer-meetings a week, bringing the people in stormy winter weather in his sleigh. People also came from East Saugus to help him. From these meetings a revival started, which reached most of the families in this part of Malden. Many were converted. Among the number was Miss Lydie Reagh, who organized, in 1843, the first Sunday-school in Maplewood. This school was held during the summer in the school-house that stood where Mr. Rockwell's house now stands, at the corner of Rockwell and Salem Streets. The first superintendent was Joseph Cheever. There were five classes. As cold weather came on, the school was held at Miss Reagh's house. It gradually dwindled away to one girl, Francis Ferrald, who came every Sunday for six months, to recite her lesson to Miss Reagh.

In 1850, in one room of a small school-house, which stood where the present school-house stands, a second Sunday-school-house was organized. Charles Meade, the teacher of the public school, assisted by Sanford B. French, Albert Norton and Temple Dodge, of Malden Centre, all Congregationalists, were the leaders. Mr. French was superintendent. After sustaining this school for some time, three of these brethren moved away, and it was thought, on account of the predominance of Methodists, that a church, if one should ever be organized, must be of that denomination. So the Congregationalist brothers then asked the Methodists to take charge of the school.

Mr. Wilbur Haven then became superintendent, and Mr. Newcomb his assistant. Miss Rebecca Knowles, of Malden Centre, led the singing.

In the same school-house preaching services were conducted by a local preacher—Mr. Staples, of Lynn, who received \$200 a year. He was followed by Edward Oathman, of Chelsea, and he by local preachers, Fathers Blodgett, of Linden, and Poole, of Lynn, who preached alternate Sundays.

The first house of worship erected in this part of Malden was that of the Methodist Episcopal Church, in 1857. From the congregation which worshipped in it was organized the present Baptist and Congregationalist Churches, of Maplewood. This first house of worship was located where the present Methodist Church stands. The land was given by W. R. Ferrald and Joshua Webster, on condition that it should always be used for a Methodist Church, and that said

church should always stand directly opposite a certain elm tree.

The building committee were Silas Anderson, W. A. Fernald, Edward Fuller, George Barber and John Emerson. The contract for the cellar was signed April 18, 1857, by H. R. Lewis, contractor. The first money for the cellar was given by Mr. W. Huntley, who, when solicited by Father Blodgett, remarked that he had nothing to give but some old cent-pieces in a barrel. This Father Blodgett accepted with thanks, and the next day carried off the barrel in his old tip-cart. Upon opening the barrel it was found to contain thirty-five dollars in old-fashioned one-cent pieces, and these weighed fifty-seven pounds. The ladies organized a society for furnishing the church, some of them, under the lead of Miss Reagh, binding shoes to obtain money. The church was dedicated in Feb., 1858, and the sermon was preached by Rev. E. O. Haven, afterwards Bishop Haven, who was a cousin of Bishop Gilbert Haven.

The members of the first Board of Trustees were Gilbert Haven, Charles Pratt, Edward Fuller, W. R. Fernald, Thomas Reagh, Father Blodgett and Eben Neagles. Local preachers, Blodgett and Poole were in charge.

In the spring of 1858, Rev. E. O. Haven was appointed to this charge by Conference. The number of church members at this time was twenty-six. He was followed by Rev. Charles H. Sewell, who was pastor for 1859 and 1860. His successor in 1861 was Rev. A. P. Andrews. During the pastorate of the latter the church was burned to the ground. In 1862, Rev. E. O. Haven was again pastor. In 1863 and 1864, Rev. L. P. Frost, a local preacher, was in charge. Until 1863 the school-house was used as a place of worship. But in that year a chapel was built at a cost of about \$3000, nearly one-half of which came from the insurance upon the former building.

The church was subsequently served by the following pastors:

1865. Rev. W. C. Sawyer.	1872-73. Rev. R. W. Copeland.
1866-67. Rev. S. Cushing.	1874. Rev. I. H. Packard.
1868-69. Rev. John W. Hamilton.	1875. Rev. Charles Young.
1870. Rev. J. W. Trask.	1876-77. Rev. C. N. Smith.
1871. Rev. C. C. Wilber.	

During Mr. Smith's term of service, on account of the discipline of a member, a number left the church, which so reduced its finances that Mr. Smith felt compelled to leave the pulpit, but he still kept official control, and Rev. George H. Clark supplied the pulpit the remainder of the year.

Afterwards the pastors were:

1878. Rev. R. W. Allen.	1884-86. Rev. Joseph Candlin.
1879-80. Rev. S. S. Rodgers.	1887-89. Rev. Seth Cary.
1881-83. Rev. J. H. Emerson.	

During the last year of Rev. Mr. Cary's pastorate the church was entirely remodeled, at an expense of \$4500. This work was not completed until the present year. The edifice was re-opened and re-dedicated

June 22 and 23, 1890; \$2500 had previously been raised by subscription, and at the time of dedication the remaining \$2000 was secured. The present edifice is a Gothic structure, finished and furnished in oak, and lighted by electric lights.

The present number of members in the church is one hundred and twenty, and in the Sabbath-school two hundred.

Thus through several reverses this church has been brought, and is now in a prosperous condition. Among its pastors may be found several who have received the honorary title of Doctor of Divinity, and one who was made Bishop.

This church now, in grateful review of the past, can sing:

"Thus far the Lord hath led me on,
Thus far His power prolongs my days."

May they also ever be able to sing, with faith in God for the future:

"And every evening shall make known
Some fresh memorial of His grace!"

BELMONT METHODIST EPISCOPAL CHURCH.—This church was organized by members of the "Belmont Union Church" on July 26, 1888. This Union Church was preceded by the "Glendale Christian Union Society." The latter was organized more than twenty years ago by the Young Men's Christian Association of Malden. It was strictly undenominational, and maintained a Sabbath-school and religious meetings in a school-house on Ferry Street. This Union Society undoubtedly accomplished good, but its trials were many, including a lawsuit. The source of its troubles was twofold: it was a *Union Society*, and its location, after South Malden became the town of Everett, was near the line between Everett and Malden. Either of these sources of trouble is almost invariably, if not always, sufficient to occasion the death of a mission or a church. The Glendale Christian Union Society became extinct. The Baptists of Everett took possession of the property it had gathered, and there is now on Ferry Street a Baptist Mission Society.

The Christian people who withdrew from the Glendale Union still felt the need of religious privileges in that part of the city, and some movement was made to procure a site for a chapel on Ferry Street, in Malden. In the mean time Mr. John P. Russell offered as a free gift a lot of land containing about five thousand square feet, situated on Fairmont Street, Belmont Hill, on condition that a chapel should be built upon it, and that the church to be organized should be forever strictly undenominational or non-sectarian. In consequence of this offer of Mr. Russell, on June 5, 1882, "The Belmont Christian Union Society in Malden" was legally organized. The written instrument, or constitution, under which it was organized, consisted of Preamble, Standing Rules and By-Laws. The standing rules were

only two in number. The second of these reads as follows:

"Nomination to change the society from a union to a denominational association shall be received, and no sectarian discussion shall be allowed in the Society meetings. And we do further agree to the following by-laws, for the more particular government of this Society."

At the same meeting at which this society was organized, and pledged to remain forever a Union Society, it accepted by a unanimous vote Mr. Russell's gift of land, with the conditions upon which it was offered, and also voted that the sincere thanks of the society should be expressed to the donor. The land was deeded to the society by Mr. Russell, and the conditions already referred to were expressed in the deed. Upon this basis the society received subscriptions from benevolent people of various religious denominations, also sums of money raised in other ways, and with the same built a chapel upon the land they had received. A Sabbath-school was organized, prayer-meetings were held, and preaching on the Sabbath by various evangelical ministers, mostly Congregational, was maintained until September 15, 1884, at which date the society voted to hire Rev. William F. Obeare to serve as acting pastor for one year, beginning on the 1st of the following October, at a salary of \$500, it being understood that he should also labor one-half of the time as acting pastor of the First Congregational Church in Maplewood.

Under the lead of Rev. Mr. Obeare, on May 13, 1885, "The Belmont Union Church" was organized with eight members. It was organized, as its name indicates, as a strictly undenominational, though evangelical, church, and this in honest fulfillment of pledges made to the donor of the land, and virtually also to all the donors of money. Mr. Obeare labored successfully with this society and church for three years. During this period thirty-six persons were added to the eight original members of the church, a large portion of whom united by confession of Christ, making a total of forty-four members.

The church and society then invited Rev. John E. Wheeler to serve as pastor one year. He entered upon his duties November 1, 1887, and labored about nine months. During this time nine persons united with the church, five of them by confession of Christ. The members of the Sabbath-school numbered nearly 200.

In July, 1888, a warrant was posted for a meeting of the society to be held on the 24th of that month. The second article in the warrant was as follows: "To hear a proposition from the Methodist Episcopal Church in Malden, and to take such action on the same as may be deemed advisable." The society accordingly met July 24th, and, after the meeting was organized, voted to hear the propositions sent from the Methodist Episcopal Church in Malden. It was presented in written and was in substance, that, "The Belmont Christian Union Society shall sell or convey to Trustees of the Belmont Methodist Episcopal Church

when organized" all the property real and personal "of said Union Society, and that the said Trustees of the Belmont Methodist Episcopal Church will, in such case, assume the mortgage outstanding on said real estate, and also all the floating debts of said Union Society, amounting to about \$1000. It was also added: "This proposition is upon the understanding that Mr. John P. Russell will release to the said Trustees of the Belmont Methodist Episcopal Church all right and title and interest he may have at law or equity by reason of the conditions contained in his deed of said real estate to the Union Society, dated June 29, 1882."

After hearing this proposition read, the Union Society, in violation of one of its own "Standing Rules," and also of its solemn contract and promise to remain forever a Union Society, upon the basis of which contract and promise money had been raised to build a chapel, voted—though not unanimously—"to authorize the selling or conveying of all the real and personal property" in its possession to the trustees of the Belmont Methodist Church, "whenever such Board of Trustees shall be organized." It was understood that Mr. Russell had given his assent to this arrangement. Whether the questions of his legal right to authorize such a transaction, and of the legality and morality of all these proceedings, were properly considered, the records of the society do not inform us. The presiding elder, however, was present, and read to the meeting the written proposition from the Centre Methodist Episcopal Church.

Two days later, or on July 26, 1888, some thirty members of the Belmont Union Church met at the chapel. No public notice of the meeting had been given. A minority of some eighteen or twenty members had no knowledge that such a meeting was to be held. The thirty members thus assembled voted to give to themselves letters of dismission from the Belmont Union Church, and recommendation to the Belmont Methodist Episcopal Church, soon to be constituted. They then voted to authorize the clerk of the Union Church to give letters of dismission and recommendation to such absent members as should desire him to do so. These thirty persons were then and there constituted and declared to be by the presiding elder, who had been present through all the proceedings, a *Methodist Episcopal Church*. The pastor of the Centre Methodist Episcopal Church—the Rev. Willis P. Odell—was also present, and was declared by the presiding elder to be the pastor of the new church. Such was the origin, according to the records and the testimony of competent witnesses, of the Belmont Methodist Episcopal Church in Malden. No comment is needed.

The Belmont Union Church never by vote declared its own dissolution, and therefore still exists as a true Church of Christ, with all the rights, liberties and possessions which belonged to it at the time when thirty of its members thus left it. The fact that this

church does not at present maintain public religious services does not render it non-existent.

The second and present pastor of the Belmont Methodist Church is Rev. Oliver W. Hutchinson. He began his labors September 15, 1888. The church was organized with thirty members and a Sabbath-school with 130 members. The church now (1890) has eighty-six members, and the Sabbath-school about 250. The chapel has been moved to a larger lot on the corner of Boston and Fairmont Streets, and has been enlarged, the whole at an expense of about \$3000. The entire property is now valued at about \$6000. "The church is entirely free from debt. The congregation and Sunday-school constantly grow. The people feel encouraged; they believe they are laying the foundation of a large and prosperous church."

THE FIRST UNIVERSALIST CHURCH AND FIRST PARISH.—Some account of the origin of this church on May 22, 1828, of its connection with the First Parish, and of the installation, July 30, 1828, of its first minister, Rev. Sylvanus Cobb, has already been given. Mr. Cobb continued in office until August 28, 1837, when the parish accepted his resignation. His successor was Rev. J. G. Adams, of Claremont, N. H., who was installed February 28, 1838. The Universalist Church the same year, or ten years after its organization, under the ministry of Mr. Adams through its Deacons, Artemus Cutler and Abraham T. Neally, made a formal demand upon Silas Sargent, deacon of the First Church, for "all the property" then "in his possession belonging to the First Church of Christ in Malden." The property referred to included the communion service and probably a small trust fund. Deacon Sargent refused to surrender this property without the consent of the First Church. The Universalist Church then began a suit at law against Deacon Sargent, and the case was brought before the Supreme Judicial Court. But representatives of the two Churches, after two meetings for conference, both parties being desirous of avoiding the vexation and expense of litigation, on October 25, 1839, signed an agreement according to which the Universalist Church was to withdraw the suit at law then pending before the Supreme Court, and forever waive its claim to the property in dispute, yet without admission that that claim was unfounded or unjust, and the First Church was to pay to the Universalist Church one hundred dollars, yet without "at all admitting that their claim to the property in dispute is or can be invalidated." This agreement was ratified by the two churches.

It is worthy of record that in subsequent years the two pastors of these churches, McClure and Adams, united heartily in promoting temperance, and in other labors for the welfare of the town. "Antagonistic," says Mr. Corey, "as they were in their religious beliefs, with the memories of the recent conflicts of their societies still alive, they stood shoulder

to shoulder and hand in hand in the many reforms which they instituted or promoted, and cemented a friendship which time did not destroy, which is still green in the heart of the survivor, and which may make more joyous the meeting on the shores of life."

Mr. Adams' ministry with the Universalists continued fifteen years. His resignation was accepted by the parish with much reluctance, Feb. 2, 1853; the members of the Parish at the same time putting on record expressions of their high esteem and warm affection for him as their pastor and friend.

The next minister of this people was Rev. D. P. Livermore, who was installed Dec. 18, 1853. After a ministry of nearly two years his resignation was reluctantly accepted, to take effect Nov. 1, 1855. His successor was Rev. W. C. Brooks, who probably was installed in September of 1856. He resigned Dec. 31, 1857, and the dissolution of the pastoral relation took place April 1, 1858. He was followed by Rev. Thomas J. Greenwood, who "entered on his labors as pastor of the First Parish, May 2, 1858." He labored in the pastoral office with marked fidelity for five years, bringing an unusually large number of persons into the church. Yet his official relation was terminated by the parish in August, 1863. His successor was Rev. Thomas Gorman, who accepted a call, and entered upon his duties, but after a few months' labor, resigned the pastorate.

Rev. J. F. Powers was the next minister. He began work on the first Sunday in April, 1866; and, after a pastorate of five years and seven months, resigned on account of exhaustion from overwork, preaching his last sermon on the third Sabbath in October 1871. Rev. William S. Bell was then invited to become the pastor. He was installed in October, 1872, but as early as March 10, 1873, the parish voted to accept his resignation.

The parish next called to the pastorate Rev. William H. Ryder, of Arlington, who began labor July 1, 1873, but was not installed in his office until Oct. 5th of that year. Mr. Ryder, by his eloquence in the pulpit, and by his efficiency and popularity as a minister, largely promoted the prosperity of the church and parish. After serving in this position about nine years, he received a flattering call to become the pastor of the Universalist Society in Cincinnati, Ohio, and accepted the call. Upon his resignation, his pastoral relation to his people in Malden was dissolved July 15, 1882. A series of resolutions expressive of deep regret at parting with him, and of sincere esteem and gratitude, were unanimously adopted by the parish.

Rev. G. F. Babbitt was called to be the successor of Mr. Ryder, and was installed Feb. 29, 1884. After some two years of service, not being able longer to believe in the distinctive doctrines of Universalism, and having accepted the evangelical faith as held by the Baptist denomination, he resigned his pastorate and was dismissed May 1, 1886, and is now success-

fully laboring as the pastor of a Baptist Church in Westboro', Massachusetts.

The present pastor is Rev. W. F. Dusseault, who was called from Marlboro', Mass., and was installed May 5, 1887. Mr. Dusseault is the eleventh pastor of the Universalist Church and Parish in Malden.

It is worthy of notice that there appears to be but one record of any action on the part of this church in calling or dismissing a minister. The parish appears to have assumed the entire authority and responsibility in every instance—save in the settlement of Mr. Cobb—of electing and dismissing the chief officer of the church.

The brick meeting-house, built by an orthodox church and parish in 1802, is now occupied by the Universalist Church and Parish. The house, however, has been repeatedly remodeled and renovated. The change in its structure was made in 1836, during the ministry of Rev. Sylvanus Cobb, when the building was "divided into two stories, the upper being used for public worship and the lower containing a large hall and other rooms for public purposes." This ancient meeting-house has been well preserved by the First Parish. It "seems," as Mr. Corey justly remarks, "to bear an ever-present air of youth."

THE CHURCH OF THE IMMACULATE CONCEPTION.—The following sketch of the history of this church is taken, in an abbreviated form, mainly from an elaborate and interesting historical article published in the *Sacred Heart Review*, July 12, 1890.

Malden had existed as an incorporated town two hundred and four years before any Roman Catholic Church was established within its limits. Previous to 1853 the few Catholics in Malden were obliged to hear Mass in adjoining towns. But during that year Rev. John Ryan was appointed the first Roman Catholic pastor in Malden, by Rt. Rev. Bishop Fitzpatrick. His pastoral care, however, was not confined to Malden, but extended over Medford, Melrose, Wakefield, Stoneham, Winchester and Everett. The *Review* presents as follows the early history of Catholicism in Malden:

"The first Mass was celebrated in Green's Hall, now known as Dowling's Block, corner of Pleasant and Middlesex Streets. There were about 600 Catholics assembled on that occasion. The Sunday school in the beginning numbered about sixty children. For some time Father Ryan resided with a milliner on Jackson Street, then put leased the house which now the convent. In this dwelling the Holy Sacrifice was offered until the basement chapel of the church was ready for divine service. At the first prominent parishioners of early days may be mentioned James Curran, or whose home Father Ryan resided, John Rafferty, George [unclear] and John James Maloney, who had been American Consul to Algiers; in passing we may say that the beautiful residence at [unclear] was formerly the home of Houghton & Dutton, of Boston, and numbered in the home of Mr. Maloney."

"The past and the present are extraordinary, notwithstanding the fact that Malden, like many another city, held within its boundaries a few desperadoes whose threats and deeds proved them vildly entitled to the name in which they gloried, 'Know-nothings,' and made them aliens, indeed, to the great body of enlightened Americans."

"When [unclear] of the [unclear] in Malden purchased a lot of land for a church on Summer Street, and the Catholics of Medford,

equally zealous, purchased a lot in Medford. But it was found that their united strength was necessary and the land was sold, and the Catholics of both places united and purchased the present site, between Medford and Malden, and built a church thereon. This was in 1854, the year ever memorable as that which saw proclaimed the dogma of the Immaculate Conception, in honor of which the newly-erected church was named. The first Mass was offered there on Christmas day. As it first stood the little church accommodated three or four hundred people."

"Father McShane succeeded Father Ryan; Father Scully labored there as pastor later on; Father Gleason became pastor in 1868. During his pastorate the church was twice enlarged, a parochial residence and a school-house built, and the School Sisters of Notre Dame introduced into the diocese—the former parochial residence becoming their convent."

In 1884 Rev. M. F. Flatley was appointed pastor of the parish in Malden, and is now its permanent rector. At that time Wakefield, which, at first, was a mission attended from Malden, had a parish, and Father Flatley had been its first pastor. Winchester had been set off with Woburn and Everett with Chelsea. Stoneham had a distinct Catholic parish, with a mission in Melrose, and there was a separate parish in Medford.

"Father Flatley was born in Ireland in 1843. After making his early studies there in a private classical school, he came to America, graduated in 1865 from Holy Cross College, Worcester; received the first honors of his class, carrying off the gold medal. His theological studies were made in St. Mary's Seminary, Baltimore, and there he was ordained a priest, Dec. 28, 1868. He then turned to the diocese of Boston, for which he had studied. It was in St. James' Church, Boston, of which Father James A. Hanley (now Bishop of Portland, Me.) was then pastor, that Father Flatley spent the first five years of his ministry in the holiest of callings. In June, 1873, he was sent to Wakefield."

His pastorate in Wakefield is represented to have been laborious and successful. During the business panic of 1873-78, through the co-operation of his people, he paid off a debt of \$14,000. Having been transferred, in 1884, to the parish in Malden, he was made, in 1888, its first permanent rector.

"During his short pastorate here he has renovated and beautified the church, so that it will now compare favorably with many of the churches of the Archdiocese. He has purchased three acres of land, known as the Colburn estate, in the east end of Malden, and there he has opened a new mission, and in the near future he will build there a church and school."

"Near the Parochial School on Highland Avenue, is another beautiful lot of land which he has secured, and will devote to parish purposes. He is about to open a new cemetery of seventeen acres which is now being laid out into lots. With the enormous running expenses of the parish he has paid nearly \$25,000 of the debt."

Father Flatley is assisted by three curates—Fathers Curran, Sullivan and Cunningham:

"Rev. F. J. Curran . . . was born in Randolph, Mass., Feb. 14, 1852. He made his early studies in Randolph, graduated from the High School March 10, 1871, being the first Catholic to receive a diploma. The following September he entered St. Charles' College, Md., graduated therefrom in 1874, and in September entered St. Joseph's Seminary, Troy, N. Y. He was ordained priest Dec. 21, 1878. His first appointment was to St. Peter's, Cambridge, where he labored a year and a half, being assigned to Malden June 8, 1880. During his ten years in this parish he has been identified with every good work."

"Rev. D. F. Sullivan was born in Boston May 3, 1855; graduated from Holy Cross College, Worcester, June 2, 1876; entered St. Joseph's Seminary, Troy, N. Y., 1876; ordained priest Dec. 20, 1879. After serving

in Cambridgeport and Winchester two years, he was appointed to Malden Dec. 27, 1881.

"Rev. F. A. Cunningham was born in Roxbury in 1863; he graduated in Boston College in 1884. A post-graduate of 1885, he received the degree of B.A., went to the American College, Rome, the same year; was ordained there in 1889. He merited the honor of writing the poem, 'America's Greeting,' upon the occasion of the golden jubilee of our Holy Father, Leo XIII."

"The Catholic Church of Malden is finely situated on Pleasant Street. It is built of brick, is cruciform, has a capacity of seating 1300. The basement chapel is plain, yet very devotional. The main church is beautiful. The paintings are worthy of special note. . . . It was during the renovation of the church effected in the present pastorate that these paintings were added. The statue of the Sacred Heart, which stands within the sanctuary, is the most beautiful in this country. It is the very statue that took the prize at the Paris Exposition of 1889. . . . The sanctuary is lit by an arch of thirty gas jets; the body of the church by sixteen upright candelabra each containing twenty-two lights. There are forty altar-boys and a sanctuary choir of forty members attached to this church."

The "School Sisters of Notre Dame" constitute a teaching order, which is distinct from that of the "Congregation of Notre Dame," and from that of the Sisters of Notre Dame, and was originally founded in France in 1598.

"The first house in America was established at St. Mary's, Pennsylvania, in 1847, but was subsequently transferred to Baltimore, where Mother Mary Clara is Superior. In 1850 a house was established in Milwaukee, Mother Mary Caroline, Superior. This is the General Mother-House for America, and is the special head-house and novitiate for all the western houses, Baltimore being the same for the eastern province. . . . Their parochial schools are attended by 56,222 children. In academies there are 2610 pupils; in asylums 1713 orphans.

"Their first school in the north was opened in September, 1881, in Malden; the second in Canton, 1885, Rev. John Flatley, now of St. Peter's, Cambridge, then rector; the third in Roxbury, 1889, Redeemptorist Fathers in charge."

It is reported, that in the parochial school in Malden—

"There are 750 pupils, boys and girls. Their ages range from five to fourteen years inclusively. The school embraces three departments—the primary, preparatory and grammar, each subdivided into two grades, each grade composed of two divisions.

"The course of study is as follows: Elementary or advanced, according to the grade of the pupil; Christian doctrine, embracing Catechism, Holy Scripture and Church History; object lessons, introducing physiology, botany, geology, etc.; spelling, reading, combining elocution; arithmetic, mental and written; book-keeping and algebra, geography, history, grammar, rhetoric, composition, both of letters and essays, and natural philosophy."

It is stated in the last report of the superintendent of schools, that in the year 1889 the number of children between five and fifteen years of age in the parochial school in Malden was 605, and that the number in the public schools was 2317. *The Review*, from which we have so freely quoted, makes no allusion to our public schools, nor to the education of any children in the city, except those in the parochial school. This would have no special significance, if the Catholics in this city, as in all northern cities and towns, were not greatly indebted to our system of public schools. Many Catholics, educated in our public schools, are well aware, that neither they nor their children would have received any school education whatever, had it not been for our system of free

schools. These educated and intelligent Catholics would doubtless be much gratified if their church authorities and publications would gratefully and courteously acknowledge this large indebtedness.

We have not been able to verify the statement of the *Review*, that Catholicism in its early days in Malden suffered from "a few desperadoes, whose threats and deeds" "made them aliens indeed to the great body of enlightened Americans." But even if the statement be true, it is but fair to say, that the citizens of Malden have no sympathy with anything that tends to interfere with the fullest freedom in the worship of God.

ST. PAUL'S EPISCOPAL CHURCH.—Previous to the organization of this church, another Episcopal Church, known as "Grace Church," had existed for a brief time in Malden. The following historical account of these two churches is mainly an abbreviation of written documents which have been kindly furnished by present officers of St. Paul's Church:

On Sunday, September 27, 1861, evening service, according to the rites of the Protestant Episcopal Church, was held by Rev. William H. Munroe (then rector of Trinity Church, Melrose), for the first time in Malden, in a small hall on Irving Street. Evening services were continued in this hall until December 1st, when a larger hall, over the Boston and Maine Depot, was secured. In this hall evening services were conducted until June 1, 1862, when both morning and evening services were held. A morning service, however, was held on Christmas, 1861, on Sunday after Christmas, and on Easter Sunday, 1862. During all this time the church was dependent upon clergymen from neighboring towns to conduct the services.

On October 17, 1861, at a meeting held in the evening, the following document was presented and signed:

"The undersigned, citizens of Malden, hereby associate ourselves together as a Religious Parish and Society, under the name of Grace Church, for the worship of Almighty God, in accordance with the Canons and Liturgy of the Protestant Episcopal Church, Oct. 17, 1861.

"G. W. Clark, J. S. F. Cushing, William Embley, John P. H. Cushing, James Hammett, Samuel H. Woods, Mary C. Clark, Mary P. Cox, Abbie W. Woods, J. A. Woods."

A subscription list was also made up for the support of a rector, amounting to \$99.

During the first five months of 1862 a series of sermons on the doctrines and polity of the Episcopal Church was given in this hall, on Tuesday evenings, by Bishop Randall, Drs. Bolles and Lambert, Rev. Mr. Palmer, Dr. Wells, Rev. William R. Huntington, Rev. F. D. Huntington and Dr. John Cotton Smith.

On May 3, 1862, a petition for a warrant to call a vestry to organize Grace Church was signed. This petition was granted by B. G. Hill, justice of the peace, and a warrant was issued May 5th. The meet-

ing thus legally called was held May 12, 1862. Prayer was offered by Rev. William H. Munroe, of Melrose, J. S. F. Cushing was elected clerk, and G. W. Clark, moderator. J. S. F. Cushing and William Embley were elected wardens. G. W. Clark, William A. Herrick, James Hammett, William Linderby and Thomas M. Kaulback were elected vestrymen. J. S. F. Cushing, S. H. Woods and G. W. Clark were elected delegates to represent the church, and to ask its admission to the Diocesan Convention to be held in Boston, June 4, 1862.

From the number of votes cast it would appear that ten persons were present at this meeting. The Rev. Joseph Kidder officiated as rector from May to October of 1862, giving his services as a labor of love. December 30th the Rev. Dexter Potter was invited to become the rector of Grace Church. He accepted the invitation and remained with the church until February 3, 1864. During this period the church and congregation appear to have been quite small, as on November 3, 1863, the number of communicants in the church was twenty, and the number of Sabbath-school scholars from thirty-five to forty.

April 25, 1864, Rev. C. Ingles Chapin was called to the rectorship at a salary of \$800. He made the following report to the convention in the spring of 1865:

"Grace Church, Malden. Baptisms, 17; communicants last reported, 19; died, 1; removed, 3; called, 10; present number, 34; confirmation, 9; marriages, 1; burials, 5; Sunday-school: Teachers, 7; scholars, 6. Missionary collections, \$29; for Sunday-school, \$55; for Children's Chapel Fund, \$110; Christmas and Easter festivals, \$11.50; other purposes within the Parish, \$200.

"By the blessing of God our work has been prospered. The present pressing need of the Parish is a suitable church or chapel. This want supplied, there is nothing to prevent a rapid growth."

As early as May, 1862, the refusal of a lot of land known as the Heater Pice, on the Dexter estate, was obtained, but afterwards the site, for some reason, was not regarded as a suitable one for a church. But in March, 1865, under Rev. Mr. Chapin's rectorship, the subject of land and a church was again brought up, and a committee was appointed to examine a church in Chelsea, with a view to its purchase and removal, but the project was found not to be feasible.

August 4, 1865, Rev. C. Ingles Chapin resigned and soon after services ceased, and Grace Church existed only as a corporation. The records of Grace Church came to an end with a meeting held Nov. 22, 1869, at which time James Hammett was clerk.

Persons who were members of Grace Church affirm that this abrupt termination of its services, followed after a time by the extinction of the church itself, was occasioned by some lack of harmony in the brotherhood, and also of funds to meet necessary expenses.

After the cessation of religious services, quite a number of the members of Grace Church hired seats at the Methodist Episcopal Church, and on Easter Sunday, 1866, the house was given up entirely to the parish of Grace Church, Bishop Randall preaching in the morning and Rev. George Denham in the even-

ing, the choir using the Episcopal Church music throughout the day.

Steps were taken early in the year 1867 preliminary to the organization of another Episcopal Church in Malden. On January 13th of that year services of worship, conducted according to the liturgy of that church, began to be held in private houses, and on February 1st the rooms of the Young Men's Christian Association, in Waits' Block, having been engaged, the services were held in them. On March 26, 1867, a meeting was called of all persons interested in forming a parish or corporation in Malden, according to the rites and usages of the Protestant Episcopal Church, and a petition, requesting B. G. Hill, justice of the peace, to call a meeting for the purpose of organizing such a parish, was signed. A warrant for this meeting was issued April 14th. The meeting thus legally called was held April 21, 1867, and a Protestant Episcopal Church was organized under the name of *St. Paul's Church*. This meeting was held in Waits' Block, and officers of the church were elected, as follows: As Wardens, Charles F. Stansbury and A. B. Converse; as Vestrymen, C. A. Stearns, G. W. Wilson, William W. N. Cox, Alexander Henderson and O. N. Coburn; as Treasurer, G. W. Clark; as Clerk, Alexander Henderson. A constitution and by-laws were adopted and signed by the following persons:

Charles F. Stansbury, William Stearns, A. B. Converse, G. Wilson, O. N. Coburn, G. W. Clark, Alexander Henderson, Leonard Woods, M.D., J. S. Chapin, James Hammett, J. M. Kaulback, Joseph A. Hill, J. S. F. Cushing, J. Edward Burt, C. L. Hanford, Charles Downer and William Linderby.

The hall over the Boston and Maine Depot was leased at \$125 a year. The use of a part of the furniture formerly used by Grace Church was offered by its treasurer to St. Paul's Church.

April 16, 1868, Rev. George Putnam Huntington, son of Rev. Dr. Frederick D. Huntington, Bishop of Central New York, was called to take the pastoral charge of St. Paul's Church and Parish. He accepted April 17th, for one year, at a salary of \$500, and entered upon his duties the following Sabbath. On May 30, 1869, he was elected rector, and accepted the office.

At a meeting of Grace Church, held May 14, 1868, the following resolutions were offered and adopted:

"Resolved, That the organization known as Grace Church be from this date dissolved, and the property belonging to it be transferred to an organization known as St. Paul's Church, Malden."

"This action was legalized by an Act of the Legislature passed March 3, 1870."

During the period between April 2, 1867, and November 28, 1870, several committees were appointed to consider and report upon the question of the location and erection of a house of worship. Numerous sites and various plans for obtaining a house of worship, including the project of removing a church from Medford, were reported. But none of these reports were found on the whole to be acceptable. Finally,

on November 28, 1870, a committee was authorized to purchase a lot on Washington Street, of Mr. Charles Heath. This land was eventually secured, and upon it was erected the present Episcopal Church.

"This church was consecrated by Bishop Eastburn, on May 23, 1872. The total cost of the buildings and grounds was \$15,729.72. The parish house was built in 1883, at a cost of about \$2500.

"Rev. George P. Huntington resigned the rectorship on account of ill health, August 15, 1884. Rev. John Milton Peck was called to be his successor, and preached his first sermon February 22, 1885. He resigned June 4, 1887.

"Mr. Peck suddenly departed this life July 24, 1890, at Menahant, near Falmouth, Mass., where he was passing the summer with his family. In his early life Mr. Peck was a Congregationalist, but later became an Episcopalian, and entered the Episcopal ministry. He had served as rector in the Episcopal Parishes of Rutland, Vt., Claremont, N. H., and in several other places. He came to Malden from Bridgewater, highly recommended by the bishop. He has since preached in various places in the vicinity of Boston, and during the present summer had supplied the Episcopal pulpit in Brookline, where he preached the Sabbath before he died. Rev. Mr. Peck was a scholarly man, and of much literary culture. He has written several pleasing poems."

The present rector in the Episcopal Church in Malden is Rev. George Alexander Strong. He preached his first sermon as rector, October 15, 1887. At the present time the wardens of the church are Allan J. Chase and William Be de las Casas; Clerk, William D. Hawley; Treasurer, Matthew C. Grier; Vestrymen, Alfred Tonks, Charles B. Shaw, Charles J. Addy, George T. Brown, Otis E. Waitt and George C. Tate.

The present number of communicants is 220, and of Sunday-school scholars, 206. The seats in this church are free. The charter requires that "no rent charge or exaction shall ever be made or demanded for occupation or use of its seats." The expenses are met by the Sunday offertory.

ST. LUKE'S EPISCOPAL CHURCH, LINDEN, MALDEN.—The following sketch of the origin and history of this church is official:

"The services of the Episcopal Church in Linden began November 23, 1873, when but few persons took part in the worship. From 1873 to 1876 the Rev. George P. Huntington, then rector of St. Paul's Church at Malden Centre, held full evening prayers and preached on the fourth Sunday, in the afternoon, every month. The last of these services was held September 24, 1876. But services of worship were again commenced by Rev. Mr. Huntington January 8, 1882. From that time different neighboring clergymen conducted worship until December 31st, when Mr. T. L. Fisher first read the evening service, and from that time officiated as lay-reader, the Rev. Mr.

Huntington coming once a month to celebrate the Holy Communion. Mr. Fisher was ordained to the diaconate in May, 1883, and continued in charge until he was ordained to the priesthood in December, 1884. He entered upon the duties of his ministry on Christmas Day.

"Services of public worship thus far had been held in various places, but in the last part of this period in Associate Hall. The cellar for the new church was completed before December 17, 1883, and the church was consecrated by the Bishop of Massachusetts, April 29, 1884. The cost of the church was \$5163. This sum, however, does not include payment for decoration of the walls of the church, the altar, lecturn, prayer-desks, chancel rail, clergy chairs, two chandeliers and memorial windows, all of which were presented.

"St. Luke's Parish was formally organized by the election of a vestry on July 1, 1885. The Rev. T. L. Fisher closed his services as rector of St. Luke's Church on the first Sunday in Lent, 1888. The Rev. L. H. Merrill entered upon his duties, as the successor of Rev. Mr. Fisher, October 18, 1888, and terminated them in February, 1890. He was followed by the present rector, Rev. Edward Owen, who began his labors in the same month in which Rev. Mr. Merrill left. The present number of communicants is fifty, and the Sunday-school scholars number fifty-five."

THE FIRST UNITARIAN CONGREGATIONAL SOCIETY of Malden was organized with ten members (six males and four females), December 21, 1875. The names of the original members were, Nathaniel W. Starbird, Asa R. Brown, Harrison J. Dawes, Seth C. Jones, Martha J. Noyes, Caroline M. Franch, Josephine Coburn, Louis D. Starbird, C. M. H. Abbott and Daniel M. Wilson. To these were added twenty-seven members the first year, and nine the second year.

All members of the society subscribed to the following statement:

"The undersigned unite in the following faith and purpose: Our faith is in God, and in His Son Jesus the Christ. And we hereby form ourselves into a Society, that we may co-operate in the study and practical Christianity."

The first pastor was, Rev. Daniel M. Wilson, who began his ministry with this people in 1876, and closed it in December, 1878. The second pastor was Rev. Henry Westcott, who was installed November 1, 1881. While taking his summer vacation, he died suddenly of heart-disease, July 16, 1883. The third and present pastor is Rev. Benjamin H. Bailey, who entered upon his labors with this society April 9, 1884.

The organization of this society took place in Richardson's Hall, in Central Square, but its religious services were held mainly in Odd Fellows' Hall until the dedication of its new house of worship, which took place October 11, 1878. This house was erected at a cost, aside from the land, of \$8000, and is located on Haskins Street, not far from Main Street. The members of the society number, at the present times

seventy-two, forty-five of whom are males, and twenty-seven are females. The Sabbath-school was organized with eight members in 1877. The number of its members now is over one hundred and ten.

This society at the present time is more prosperous than it ever was before. Within a year it has purchased a new and superior organ for its church, at a cost of \$1600. Its accomplished and faithful pastor is respected and beloved by his people, and is constantly adding to his friends and enlarging the society.

THE FAULKNER EVANGELICAL UNION CHURCH.—This church is located at "Faulkner Station,"—a name given to that portion of the city which is accommodated by a railroad depot of that name, and is situated between Malden Centre and Maplewood. The evangelistic movement which led to the organization of this church was commenced by Mr. Frederick A. Houdlette. In 1882 he erected the Mystic Hall, near Faulkner Station, as a place of public worship, though a part of the building was devoted to other purposes. For a time he bore the entire financial burden of maintaining religious services. His chief associate in conducting religious meetings was Capt. George W. Lane, an earnest and successful Sabbath-school missionary for a number of years on the coasts of Maine and North Carolina. A Sabbath-school was organized in Mystic Hall in October, 1882, with six teachers and sixty-eight scholars, and with Mr. Houdlette as superintendent. Earnest evangelistic prayer-meetings were also held weekly, and services of worship, with preaching, on the Sabbath. Rev. E. S. Potter, a Congregational clergyman, who had then labored in the ministry with large success forty-eight years, was invited to serve as acting pastor, and he entered upon his labors June 4, 1882, and preached his last sermon September 1, 1889.

On March 22, 1883, at a meeting held in Mystic Hall, of which Mr. Houdlette was chairman, and Mr. E. A. Atwood, secretary, a society under the name of "The Faulkner Evangelical Union," was organized with Mr. A. C. Dowse as clerk; Mr. George R. Conrad as treasurer; Messrs. J. I. Stewart and Daniel Wilder as auditors; and Mr. E. A. Atwood as superintendent of the Sabbath-school. The religious belief of the society was expressed in the following formula:

"This Union recognizes the Scriptures of the Old and New Testaments as the only rule in matters of doctrine, and its infallible rule of faith and practice. It requires on the part of its members a substantial assent to them. It requires that the public ministry shall accord with them. But it recognizes no inflexible dogmas in their interpretation. It does not believe that any one may be excluded or excommunicated from its fellowship, this Union does not require, as a condition of membership, that every candidate shall perfectly understand them, or agree with every other member in their interpretation of the same, being very confident that the Lord hath much truth yet to break forth out of His Holy word." [Then follows the Apostles' Creed.]

In the summer of 1885 Deacon John B. Faulkner, who had been a member for many years and an officer of the First Baptist Church in Malden, a gentleman

of wealth, and in honor of whom the railroad station had received its name, intimated his intention to present a lot of land to the Union, and to build upon it a house of worship, whereupon the Faulkner Evangelical Union, by taking the necessary legal steps, became, on December 8, 1885, an incorporated society. On the 17th of the same month Deacon Faulkner conveyed, by deed, to the Faulkner Evangelical Union, a lot of land valued at \$1000. In the deed the donor makes the following statement:

"I donate this property to the Society, and Church when instituted, known by the name of The Faulkner Evangelical Union, to be entrusted to the Prudential Committee of said Society, with a Board of Trustees, who shall act in concurrence with the above-named Committee."

"The object of this donation is the establishment and maintenance of the ordinances of religion in accordance with the belief and usages of the society as it now exists. And furthermore this house of worship shall be kept free from all incumbrance whatsoever, to have and to hold the granted premises, with all the privileges and appurtenances thereto belonging, to the said The Faulkner Evangelical Union, to their own use and behoof forever."

The organization of the Union Society was designed to be preliminary to the organization of a church. Accordingly "The Faulkner Evangelical Union Church" was organized on February 12, 1886, with Mr. E. A. Atwood as clerk and treasurer. The confession of faith adopted was evangelical.

The house of worship was completed in June, 1886. The entire expense of the building, including the land, was about \$7000, and the whole was a munificent gift to the Faulkner Evangelical Union and Church from Dea. John B. Faulkner. The church was dedicated June 9, 1886. In the public services of the afternoon, Dea. Faulkner, with fitting words, presented the keys of the church to the chairman of the Board of Trustees, closing with the remark: "I hope this will prove a blessing to the people." In the evening a sermon was preached by Rev. John L. Withrow, D.D., of the Park Street Church, Boston, and Rev. W. F. Obeir, of Maplewood, offered the dedicatory prayer.

The present number of church members is forty-four, and the members of the Sabbath-school number about one hundred and twenty. Rev. Harry P. Rankin, a Methodist minister, is the present acting pastor.

There are now in Malden, ministering to the religious and spiritual needs of its more than twenty-three thousand inhabitants, fourteen Christian churches. One of these churches is two hundred and forty-one years old. The other thirteen have come into existence during the period of the last eighty-seven years. With all their imperfections, mistakes and partial failures, they have yet stood as bulwarks against immorality, intemperance, all unrighteousness and crime. Without churches and the preached gospel, Malden would have been uninhabitable to respectable people. They have been the light, the joy and the glory of the town; while in their ministries of salvation and consolation they have been to thousands as the open gates of Heaven.

CHAPTER XXXIX.

MALDEN—(Continued).

SOCIETIES.

BY GEO. HOWARD FALL.

THERE are over seventy societies to be found in Malden to-day. Many of these are secret and comparatively unimportant. Quite a number have no more members than officers. Still others are little more than mutual admiration clubs. Societies which are purely secret or self-centred have little claim upon the pen of the historian. To be of general interest, they must be connected with the general welfare, or must, at least, be typical of the community's development. An individual's history is of value just so far as it represents the spirit of the times or just so far as his life and acts present a history of the times. Of the same nature is the history of a society. If it has sought to accomplish public work, whether good or bad, the historian is bound to recognize it. But if private matters and individual interests only have been considered, a history of it would be a tax upon public forbearance.

Many of the societies are doing general work, and illustrate phases of social development. Of these there is none more important than the Malden Deliberative Assembly. This society was organized December 8th, 1875, by ten young men, who met at the house of Mr. Charles D. Weld. Its object and purpose was (first) the full and free discussion of the leading questions of the day; (second) exercise and training in parliamentary practice. Its founders were Elijah George, Otis E. Waitt, Sidney D. Shattuck, A. R. Turner, Jr., A. F. Crocker, Chas. D. Weld, Horace F. Gleason, J. C. Auld, Frank F. Sargent, J. Q. A. Brett. The society now numbers over eighty members, comprising representatives from every class and profession. Such subjects as the following have been discussed:

Resolved, that it will subvert the best interests of Malden to adopt a city charter; That church property ought to be taxed; That a property qualification should be one of the conditions of the exercise of the suffrage; That the enactment of national laws providing for compulsory education should be encouraged; That the right of suffrage should be extended to women; That all railroads should be owned and controlled by the State; That the Bible should be read in the public schools; That Pomeroy ought to be hanged; That Chinese immigration ought to be prohibited; That prohibitory legislation is conducive to the best interests of this Commonwealth; That England would be justified in interfering in the laws between Turkey and Servia. That Free Trade will best advance the commercial interests of the United States; That all National, State and Municipal offi-

cers should be denied the right of suffrage during their term of office; That labor organizations are detrimental to the general welfare; That capital punishment should be abolished; That the President of the United States should be elected for a term of six years, and no longer; That Tilden was fairly elected; That bad cooking is the cause of more misery than alcoholic liquors; That women should vote in municipal elections; That the poll-tax should be abolished; That life is not worth living.

This society has exercised a potent influence upon Malden affairs. Many officers, first of the town, and later of the city government, have been among its members, and in the assembly room learned to fairly view those questions which otherwise they might have seen only through the mist of local and political prejudice. In the town-meeting, and in the ward-room, speeches have been continually made under the stimulus of passion and self-interest. In the assembly room, one motive controlled discussion,—that of the pure reason. No limits except those of time have ever been allowed to interfere with the freedom of debate. Again and again have the citizens poured into the meetings as the one place where they could hear fairly discussed the living questions of the day. These were called the public meetings of the assembly, and ladies were always welcome.

The great success of this society has been due to two causes. First, any man could join provided he possessed good morals and intellectual capacity. These were the only requisites. The society has never been ruled by a "set." Secondly, freedom from burdensome rules and orders. Members are allowed to come into and go out of the room when they please. Hence an uninteresting debate will clear the hall *per se*; and disputants know that in order to keep their audience they must have something to say worth hearing. Ninety per cent. of all debating societies are killed out by the strictness of their rules.

Among the many subjects of public interest which the assembly has considered was one concerning the advisability of revising the city charter. The assembly voluntarily took upon itself, early in 1888, the task of preparing the outlines of a new charter. A committee of five was appointed, who examined all the charters of neighboring cities, and also studied for some six weeks the problem of municipal government. As a result, the modern problem of city government became widely discussed in Malden, and the end is not yet. This self-appointed task of the assembly is only an instance.

The water question, the sewerage, the electric light, streets, fire department, etc., etc., have all been overhauled and examined from an impartial standpoint. The Sewerage Bill, for the Metropolitan Valley, which passed the Legislature recently, is due largely to the efforts of the assembly. The assembly brought the merits of the scheme before the people of Mal-

den, at one of its public meetings. The citizens of Malden did the rest.

The following gentlemen have served as presidents of the assembly since its organization: Elijah George, Harry P. Ballard, George F. Foster, A. A. Knights, George A. Littlefield, Frank P. Bennett, A. R. Turner, Jr., George D. Ayers, Alfred H. Jones, Sidney D. Shattuck, Jerome H. Fiske, John S. Patton, Charles D. Weld, George L. Gould, Alfred E. Cox, Daniel L. Milliken, A. J. Freeman, R. R. Robinson, Tristram Griffin, Elnathan D. Howes, Clarence A. Perkins, F. H. Page, William F. Merrill, Frank E. Woodward, Charles R. Magee, F. O. Woodruff, Geo. Howard Fall, George L. Richards, John M. Corbett, George H. Woodruff, Eugene H. Cox, Charles G. Schaedel, H. Hubbard, F. A. Lux, Harry H. Barrett, Edwin S. Blaine, H. L. Boutwell, Curtis S. Pease, F. I. Winslow and George W. Cox.

OLD AND NEW *The Women's Club of Malden.*

On Friday, October 18, 1878, thirteen Malden women met at the house of Mrs. H. H. Robinson, at the invitation of Mrs. Harriette R. Shattuck, "to consider the feasibility of forming a woman's club in Malden." From this small beginning, "Old and New" has gradually grown into a large club, numbering, in March, 1890, 100 members. It is the only woman's club in the city, and one of three in Middlesex County. The presidents during the twelve years of its existence have been Harriette R. Shattuck, Rosella F. Baxter, Lorette A. Eaton, Harriette H. Robinson and Cora F. Pease.

December 10, 1889, the club was duly incorporated under the charter-name of the Old and New, of Massachusetts. The incorporators are Cora E. Pease, Ella F. Bean, Cynthia M. Shepherd, Harriette R. Shattuck, Adeline A. Nichols, Rosella F. Baxter, Harriette H. Robinson, Lena D. M. Siner, Caroline D. Waldron and Caroline A. Danforth. The purpose of the club, as stated in its charter, is literary and educational work, and establishing and maintaining a place for social meetings for the convenience of the women of Malden and vicinity. Mutual improvement is its object, and incidentally, whatever work for the outside public it may be able to do in addition. In pursuance of the first object, lectures and other entertainments are given by members of the club, and by persons invited to address it, on literary, ethical, scientific and domestic topics. Half of the twenty-four meetings each year are in charge of three committees, who, on the afternoons respectively assigned to them, provide speakers and topics appropriate to their respective departments. The other half of the meetings are in charge of the club itself, which provides for them in executive session. During the last year the club listened to essays upon "Utopias; Old and New;" "Mirabeau and the French Revolution;" "Robert Browning;" "The Schools of Russia;" "Electrical Engineering;" "Dust and Dampness;" "Some Curious Beliefs of

the Ancient Botanists and Herbalists;" "A Group of Tolstoi's Women;" "Ethics in its Practical Relations;" "Morals of Materialism;" and the "Removal of Lord Elgin's Marbles from Greece."

Of the thirteen meetings conducted by club members alone, two have been devoted solely to business. One was occupied with accounts of summer vacations, one with readings by members, two with debates, one with housekeeping essays, and a short entertainment to close, two with essays by members, the subjects being "The Science of Financial Success" and "The Ethics of Financial Success."

The main idea of mutual improvement has been advanced by original work, in writing, speaking and debating, as well as in listening. One feature has been an original magazine, containing compositions in prose and rhyme from the members of the club. There are also a writing-group and a reading-group formed by the club, the former having been in existence about nine years, and the latter less than one year. The writing-group has been a great means of developing the literary and critical talent of those club members who belong to it. Its president from the beginning has been Mrs. R. F. Baxter. It is a rule that each of the twelve members of this group shall write at least five articles each year; and these articles are read in the group and criticised in a friendly but candid spirit by each one present. By this means the members have learned not only to bear the more adverse criticism, but also to know how to criticise frankly in return. Courses of public lectures are occasionally given by distinguished lecturers, under the auspices of the Old and New. Another feature of the club's outside work is the formation of a committee which sends reading-matter every week to a number of women living in isolated localities.

It remains to speak of the management of Old and New, which is the most important fact regarding it, and the secret of its success. The leading principle upon which this club is founded is the belief that every woman has within her the germ of some latent talent, which only needs cultivation in order to bear fruit. "Old and New" stands for the development of the individual, and its main intent is to draw its members out and encourage them to speak their inner thought. In order to carry out their ideas, it was necessary to adopt two principles,—democratic management and rotation in office. The business of the club is transacted by its members in executive session. There are no executive committee or directors, and, although under the charter trustees are necessary, these officers are merely nominal. They can do nothing unless first instructed by the club at a regular executive session. The opportunity for wire-pulling is thus reduced to its lowest terms. A new matter is first presented before the whole club by any individual who wishes to present it. It is then fully and fairly discussed, and, unless referred to a committee for some reason, is decided by a majority vote.

It has been a rule from the beginning that no officer except the secretary and the treasurer and no member of a committee shall serve in the same position for more than two consecutive years, or be eligible for re-election until a year has intervened. It was felt in the beginning, and is now still more strongly, that a club whose object is "mutual improvement" cannot attain that object without giving opportunity to all to compete for the honorary offices. Without the provision for rotation, experience shows that only one or two women ever have a chance in any society to become a president or a vice-president, or a chairman, and thus to learn to preside and to conduct meetings. The result in Old and New has been that in twelve years six women have become educated in the duties of a presiding officer.

The principle of rotation in office does not apply so strictly in societies for philanthropic or special work; but in a woman's club, where women meet together to learn and to grow, it is at the same time a safeguard and an inspiration. Old and New has proved the value of this principle by long and successful experience.

THE WOMAN'S CHRISTIAN TEMPERANCE UNION.—This association was organized April 19, 1876. Mrs. P. S. J. Talbot was chosen president; Miss Hattie A. Sawyer, secretary; and Mrs. Charles Merrill, treasurer. Mrs. Talbot still holds the office as president, a continuous service of more than fourteen years.

The object of this Union is to educate public sentiment to the standard of total abstinence from alcoholic liquors as a beverage, to secure the right education of the young as to the use of alcoholic liquors and narcotics, to reclaim the fallen, to enlist and unite the women of the city in temperance work, to obtain the legal prohibition of the liquor traffic, and, by co-operation with other associations in the State and nation, to promote the cause of universal temperance and sobriety. The first work of the Malden W. C. T. U. was to assist in organizing a reform club, hiring a club-room, furnishing it with a library and games to interest these reformed men, that they might not return to their former resorts. A gospel temperance meeting was held every Sunday evening with large and interested attendance. Large numbers signed the pledge, and many intemperate men were reformed.

A juvenile temperance society was formed with Mr. S. F. Fairfield and sister as superintendents. It became very prosperous, with a membership of five hundred, and still continues under the name of the "Loyal Temperance Legion." Its present very efficient superintendent is Mrs. Dr. Peleg Wadsworth. One of the "boys" from this region recently organized a total abstinence society in the University at Berlin, Germany, which is increasing in influence and popularity.

The W. C. T. U. has placed scientific temperance text-books in the Public Library, and in all the libra-

ries of the Malden public schools; also treatises on tobacco; and, in answer to their petition the School Board have placed the temperance text-books in the hands of each public-school teacher, also in the hands of the pupils of the three highest grades in all the public schools of Malden, at the same time directing that the children of the lower grades shall be taught orally by the teachers, examinations being required as in other studies.

Interesting temperance books by the best authors have also been placed in all the libraries of the Malden Sunday-schools. Temperance lessons are taught, temperance Sunday-school concerts are held, and hundreds of children and teachers have signed the pledge, and the rolls of honor which are passed once a year in the Sunday-schools, under the supervision of the W. C. T. U. superintendent.

Literature, written upon the different phases of the temperance question, is very widely circulated among the people at large. The press and the churches are influenced by the society to encourage and sustain a healthy, earnest temperance sentiment in the community, which has for the past fourteen years been successful. No licenses for the sale of intoxicating liquors have been granted by the city government except for medicinal and mechanical purposes; and in no town or city of Massachusetts has the prohibitory law been so thoroughly respected and enforced as in Malden. The wonderful growth of Malden, it having doubled its population in ten years, is largely due to the fact of there being "No license," the result in a great measure of the W. C. T. U.'s faithful work.

The work of the Woman's Christian Temperance Union permeates every branch of society, and has departments seeking to reform the many vices and social evils which so constantly tempt the young from the path of truth and virtue. It is non-sectarian in religion, and non-partisan in politics, seeking to save in the name and spirit of the divine Master whom it loves and serves.

MALDEN MEDICAL IMPROVEMENT SOCIETY.—This society was instituted in 1888, but it was really an outgrowth of the Holmes Medical Club, which was started in the city of Malden some ten years ago, and included the select physicians of Malden, Medford, Melrose and Stoneham. This society is conducted on the same plan as the State Medical Society, meeting monthly, when essays and papers are read. There is also a presentation of cases. In the winter of 1889, there was given a course of lectures worthy of note. In this society was born the idea of the Malden City Hospital; and when Deacon Converse was asked what he could do to help embody the idea, he responded nobly by giving \$10,000 in cash, and several acres of beautiful land. John L. Sullivan is the present president of the society; John B. Mahoney, secretary; Godfrey Ryder, treasurer.

THE BRITISH-AMERICAN ASSOCIATION.—The chief aim of this association is to get the British-American

people to become naturalized citizens, thereby enabling them to vote; also to encourage social intercourse among the members. The present officers are Saml. P. Priest, president; James Scales, vice-president; A. J. Crockford, secretary. The society now numbers about forty members.

MALDEN INDUSTRIAL AID SOCIETY.—This society was organized in 1875, the year of the great fire at the Rubber Works. Its object, as stated in the constitution, is to relieve and prevent destitution, by rendering prompt, efficient, and judicious aid to the deserving, necessitous poor in our own town; and to encourage thrift, by endeavoring to cultivate the self-respect and self-reliance of those to whom aid is rendered.

The society also endeavors to find employment for the unemployed, and is conducted on the same plan as the Boston Industrial Society. The members number about two hundred, and meet once a year to select officers and to distribute about \$1000. Any citizen can become a member by paying the small amount of one dollar. The present officers are E. S. Converse, president; J. K. C. Sleeper, vice-president; John W. Chadwick, secretary; William H. Sargeant, treasurer, and John H. Parker, auditor.

UNITED ORDER OF THE GOLDEN CROSS, MYSTIC COMMANDERY.—This association was organized for the purpose of paying to its members a death benefit of from \$500 to \$2000, also of caring for sick members and for mutual help. It is a secret order, composed of about 100 members in Malden Centre, and about eighty in Maplewood.

The order itself was organized in Tennessee in 1876, and now numbers about 18,000 to 20,000 members. It ranks third among the great orders, the Ancient Order of United Workmen holding the first rank, secondly the Knights of Honor, and thirdly the Golden Cross. One of the features of the Golden Cross Order is that the members pledge themselves not to drink, buy or make intoxicating liquors while they belong to the order. Ladies are permitted to join. Harvey L. Boutwell, Esq., a citizen of Malden, goes to Louisville, Kentucky, this year, as the Supreme Representative of the Grand Commandery of Massachusetts. This society has gained more members within the past year than any other similar order in the United States.

GOOD TEMPLARS.—Laurel Lodge, No. 152, I. O. G. T., organized in 1887, and now numbers from forty to fifty members. It is a temperance organization, whose object is to reform the drunkard, and keep sober men sober. It is the largest secret temperance organization in the country. The Sons of Temperance is an older order, but not as influential. When it was first organized it admitted men only; but a few years later the Order of Good Templars was formed, for the purpose of admitting women as well as men. The order flourished rapidly, and did such good work that the Sons of Temperance changed their rules and admitted ladies, following the example so nobly set.

FREE MASONRY.—Masonry is more flourishing in Malden than in any other city or town of its size in the Commonwealth. The oldest organization is the Mt. Vernon Lodge. Its charter bears the date of A.D., 1857, and its members now number 230. Officers: Worshipful Master, John Newell; Senior Warden, Joseph F. Wiggin; Junior Warden, Edward G. Wise; Treasurer, James Hammett; Secretary, Alfred Tonks.

Converse Lodge.—This newer organization received its charter the 8th of January, 1887, and the brothers now number 142. Officers: Worshipful Master, Frederick J. Foss; Senior Warden, Joseph W. Sanders; Junior Warden, Eugene Nelson; Treasurer, Joseph M. Russell; Secretary, Charles R. Magee.

Following these orders come first: *The Royal Arch Chapter of the Tabernacle*, which received its charter in March, 1887. The companions now number 197. Officers: Most Excellent High Priest, Geo. E. Norris; Excellent King, Frederick G. Currier; Scribe, George L. Griffin; Treasurer, Joseph M. Russell; Secretary, Arthur W. Hutchins.

Second: *Melrose Council, Royal and Select Masters*, organized December 12, 1856; constituted February 27, 1868; 193 members. Officers: Thrice Illustrious Master, William Bickford; Deputy Master, James Emerson; Principal Conductor of the Work, Frederick G. Currier; Treasurer, Winslow B. Southworth; Recorder, Arthur W. Hutchins; Master of Ceremonies, George E. Cofran; Captain of the Guard, Clarence O. Walker; Conductor, Edwin A. Kelley; Chaplain, James H. Waite; Steward, Chas. C. Blanchard; Sentinel, Henry L. Putnam.

Third: *Benueant Commandery, Knights Templar*. Date of charter, October 20, 1886. Officers: Eminent Commander, Sir T. Fred. Martin; Generalissimo, Sir Rudolph Cramer; Captain-General, Sir Henry D. Wilder; Treasurer, Sir Joseph L. Bicknell; Secretary, Sir Allan J. Chase.

MALDEN YOUNG MEN'S CHRISTIAN ASSOCIATION.—In the fall of 1884 this institution first took form and shape in the mind of one young man whose hope it had been for several years, and then by the union of several others, whose desires were as strong as his. As a result, a dozen or more young men who desired an opportunity for self-culture and improvement in various studies, decided to join together in a kind of class, to meet at their houses one evening in each week, and talk over the readings which they should undertake in their leisure hours. They represented the various religious denominations of Malden, and sought religious progress as well as intellectual culture. The meetings were continued during the winter, and when the spring approached the class decided to hold a small prayer-meeting on Sunday evenings for the purpose of helping and influencing the young men of the city. The first meeting was held at the Baptist vestry, and then alternately among the various churches. Next they rented a hall in Bar-

rett's Building and finally in Bailey's Building. By this time many citizens were asking that the work might become permanent and that an active and efficient association might be formed. At this time the class consisted of the following members: G. Louis Richards, Samuel M. Fairfield, F. J. Salsman, Dr. George M. French, Geo. C. Currier, Chester Crosby, Arthur Leonard, Caleb Crawford, William Merrill, Fred. Schwartz, Chas. J. Bartlett, Richard Kerr, H. S. Howard, N. E. Nourse.

September 10, 1885, an initial meeting for the purpose of organizing a larger association was held at the vestry of the Baptist Church. At this time a committee, representing the several churches, was appointed to canvas for members. The ten who were appointed for the purpose entered immediately upon their task, and at the October meeting reported that the signatures of over three hundred young men had been secured, also that a general feeling in favor of the work existed in the community. At the next meeting, held October 21st, Walter C. Douglass, the State secretary of the Massachusetts associations, was present. In his remarks, he said: "We have a definite and distinct work to do—to labor for young men. This work is needed to meet the various temptations and pitfalls which the adversary has placed in their way. As the devil works distinctly in every large community for the downfall of this class more than any other, so our work is for the same class and to the opposite result."

The Malden institution, which chose to base its action upon the principles which had made possible the formation and successful prosecution of sixty similar associations in other parts of the State, adopted the truths expressed in that part of the constitution which states that "the object of the association shall be to improve the spiritual, intellectual, social and physical condition of young men by appropriate means and methods in harmony with the spirit of the gospel."

A further extract from the constitution, relative to the duties of members, shows what the institution expects of itself: "The members of this association shall seek out young men and endeavor to bring them under moral and religious influences by introducing them to the members and to the principles of the association. November 25, 1885, at a meeting held in the vestry of the Methodist Church, the following Board of Directors was constituted: Hon. J. K. C. Sleeper, George E. Gay, G. Louis Richards, Clarence O. Walker, John H. Parker, Herbert Porter, W. H. Sargeant, M. C. Grier, Rev. M. M. Cutler, William B. de las Casas, A. D. Cromby, A. J. Chase, Freeman A. Smith, H. B. Griffin, S. M. Fairfield.

The board was empowered by the constitution to choose a president and two vice-presidents for the association. For president it chose the principal of the High School, Mr. George E. Gay, a man pre-eminently fitted for the position. For vice-presidents

Hon. J. K. C. Sleeper and Clarence O. Walker. Matthew C. Grier and Wilbur H. Sargeant were made respectively secretary and treasurer. To the important position of general secretary, the board called William R. Comer, who was formerly connected with the Boston association. The next and very important step was to secure proper headquarters. The Masonic building was then being erected, and, through the generosity of Malden citizens, handsomely furnished rooms were opened to the public in that beautiful building in November of 1886. The rooms were made free, to be used by any young man, whether a member of the association or not. Classes for vocal music and instruction in penmanship were formed, and a course of entertainment furnished for the winter. At the annual meeting, in December, 1886, Mr. Gay declined further service, and Mr. Herbert Porter was elected president in his stead. Under his efficient care and faithfulness, for two years, the association gained in number and extended its influence.

October 12, 1888, a vote was passed, making the association a corporation under the laws of the State. With the new form of organization came a change in the filling of the offices. Those who had been the incentive and spirit in previous years declined to further serve, and at the head of the association was placed Mr. William R. Hawley, who also served efficiently for two years.

The community, seeing, by the earnest efforts of former workers, that the influence of the association's work was being felt in every home, and in almost every church, gave it a zealous support. In August, 1889, Mr. William R. Comer resigned his position as general secretary, and Mr. W. H. Simonds, who was acting in a similar capacity in Keene, N. H., was elected to the office. It is due to Mr. Comer, however, to say that the present prosperity of the association is largely due to his ability and faithful efforts during the previous years, which were the formative years of the society.

Each year of the association's existence had brought forth several young men to that point in every man's life when he accepts or rejects the proffered Gospel of salvation. But it was left to the laborers in the fall of 1889 to see the spiritual harvest for which many had long looked. The assistance of Messrs. Martin and Peabody were secured for this service, and the association could say with the apostle, "And the Lord added to the church daily."

In the fall of 1889 a short-hand class was formed and largely attended. In the spring of 1890 an Outing Club was organized, and, through the generosity of Hon. E. P. Converse, grounds were secured at the Fells for lawn tennis and base-ball.

In five years the Malden Young Men's Christian Association takes its place the eighth in size in the State, though the city itself ranks as the eighteenth in size. A large proportion of Malden's best citizens have enrolled their names among its members. To

the co-operation and influence of such men have been added the noble efforts of the Women's Auxiliary. These ladies have cared for the parlor, keeping it supplied with flowers, and have furnished refreshments at the association's reception. The value of their labor in behalf of the association can never be estimated.

The societies existing in Malden at present are as follows:

MASONRY.

Mount Vernon Lodge, charter 1838; Converse Lodge, V. F. & A. M., chartered 1882; Royal Arch Chapter of the Tabernacle, chartered 1880; Melrose Council, R. & S. M., instituted 1867; Beausant Commandery of Knights Templar, instituted 1880.

ODD FELLOWS.

Middlesex Lodge, No. 17, chartered 1865; Malden Lodge Association, I. O. O. F., Middlesex Encampment, No. 9, chartered 1887; Malden Odd Fellows Association, Patriarchs' Meeting, I. O. O. F., Canton Malden, No. 60.

MISCELLANEOUS.

American Legion of Honor, organized 1870.
Ancient Order of Hibernians, Division No. 12, organized 1870.
Ancient Order of United Workmen, M. P. M. Lodge, No. 10, organized 1879.
British-American Association, Linden Branch, No. 4, Linden.
Grand Army of the Republic, Major General Hiram G. Berry Post, No. 40.
Order of the Sons of Veterans, George H. Patch Camp, No. 80.
Massachusetts Hiram G. Berry Women's Relief Corps, No. 10, organized 1878.
Golden Rule Alliance, St. John Chapter, No. 17, organized 1880.
Home Circle, Mystic Side Council, No. 32, organized 1882.
Independent Order of To-Elm, Westchester, Title, No. 17.
Knights of Honor, Malden Lodge, No. 352, organized 1876. Maplewood Lodge, No. 355, Maplewood, organized 1878.
Knights of Pythias, Spartan Lodge, No. 59. Frank L. Converse Lodge, No. 7.
Knights and Ladies of Honor, Linden Lodge, No. 391, Linden.
M. C. O. F., Iona Court, No. 10, organized 1879.
New England Order of Protection, Reliance Lodge, No. 3, Linden.
Same, Progress Lodge, No. 11, organized 1888.
Massachusetts Volunteer Militia, Company 1, Fifth Regiment, Malden Rifles, organized 1883.
Order of Columbus, John Hancock Settlement, No. 2, instituted 1889.
Order of the Iron Hall, Local Branch No. 238, Linden.
Order of Loyal Workmen, Lodge, No. 1, instituted 1886.
Order of United Friends, Longfellow Council, instituted 1882. Same, Salome Council, No. 61, Linden; instituted 1883.
P. F. Y. B. O.
Royal Arch Chapter, Mystic Side Council, No. 90, organized 1870.
Same, Linden Council, No. 172, Linden; organized 1878.
R. S. of G. F., Silvan Assembly, No. 86.
Worshipful Chapter, Tabor Chapter, of Malden.
Paul Revere, No. 18, Temple of Honor; organized 1877.
Whittemore Lodge, No. 189, Independent Order Good Templars.
Sagamore Council, No. 3, Temple of Honor.
St. Mary's Total Abstinence Society, organized 1885.
Laurel Lodge, No. 152, Independent Order Good Templars.
Pauline Revere Social, No. 16, Temple of Honor.
Reliance Division, No. 18, Sons of Temperance.
Garfield Division, No. 55, Sons of Temperance.

TEMPLES.

St. John's Cathedral, No. 1, instituted 1880.
St. Peter's Cathedral, No. 2, instituted 1880.
Maplewood Commandery, No. 219, Maplewood; instituted 1882.
United Order of Pilgrim Fathers, King Philip Colony, No. 17.
High Rock Colony, No. 39, Maplewood, instituted 1882.
Carpenters and Joiners' Union, No. 152, instituted 1889.
Malden Board of Trade, instituted 1889.

M. P. M. LODGES.

St. John's Cathedral, No. 1, instituted 1880.
St. Peter's Cathedral, No. 2, instituted 1880.

Maplewood Reading-Room.

Union Maternal Society, organized 1886.

Malden Mutual Benefit Association, organized 1875.

Old and New—The Woman's Club.

Samarian Circle.

Young Men Christian Association, organized 1886.

Women's Auxiliary and Young Men's Christian Association.

Woman's Christian Temperance Union.

BIOGRAPHICAL.

ELISHA SLADE CONVERSE.

Elisha Slade Converse, son of Elisha and Betsey Wheaton Converse, was born in Needham, Mass., July 30, 1820. His parents removed to Woodstock, Conn., in 1824, and here he remained until twelve years of age, when he went with his parents to Thompson, Conn., and for nearly a year worked in a cotton factory at that place. In 1833 he came to Boston, where he lived for a short time with his brother, Deacon James W. Converse, and attended the McKean School. He was subsequently employed by his brother-in-law, Mr. Aaron Butler, of South Boston, as clerk in his store, where he remained until 1836. He then returned to Woodstock, where he attended school and worked on a farm until seventeen years old. At this time he went to Thompson and engaged for two years with Mr. Albert G. Whipple to learn the clothier's trade. He soon after formed a partnership with Mr. Whipple which continued until young Converse was twenty-one years of age, when he purchased Mr. Whipple's interest and continued the business.

In 1844 Mr. Converse removed to Boston and formed a partnership in the shoe and leather business with Benjamin Poland, under the firm-name of Poland & Converse. During this period he lived with his brother, Deacon James W. Converse, on Pearl Street, and also at Jamaica Plain. In 1847 he removed to Stoneham, where Poland & Converse had a branch business of grinding and preparing drugs, spices, etc. This partnership was dissolved in 1849, and Mr. John Robson became associated with Mr. Converse, and the business was continued under the firm-name of Converse & Robson until 1853, when Mr. Converse withdrew from the partnership, and founded the Boston Rubber Shoe Company. He was elected its treasurer, in which capacity he has remained to the present time. This company is one of the representative institutions of New England.

Mr. Converse early manifested laudable interest in religious matters. He united with the First Baptist Church of Thompson, at Brandy Hill, in 1832, and while living in Boston was a member of the Federal Street Baptist Church. He became a member of the Baptist Church in Malden in 1847 and was chosen deacon in 1854, and officiated until his resignation,

Frank B. Kinnear

David Ayers.

March 17, 1865. He removed to Malden in 1850, locating on Linden Court.

Upon the organization of the Malden Bank, in 1851, he became one of its directors, and in 1856 was chosen president, and has occupied that position to the present time, a period of thirty-four years.

September 4, 1843, he united in marriage with Mary Diana Edmands, and their family consisted of four children, viz.: Frank Eugene, born October 1, 1846, and died December 15, 1863; Mary Ida, born January 7, 1853, married January 4, 1882, Mr. Costello C. Converse, of Boston; Harry Elisha, born May 7, 1863; and Francis Eugenia, born May 14, 1865.

All measures tending to advance the interests of Malden have found in Mr. Converse an earnest advocate. He represented the town in the General Court in 1878 and 1879, and in 1880 and 1881 was a member of the Senate, and upon the incorporation of Malden as a city he was chosen its first mayor by an almost unanimous vote. He is the man whom the citizens of Malden most delight to honor.

In 1863 a sad affliction was visited upon Mr. and Mrs. Converse by the tragic death of their eldest son, who at the time was assistant cashier of the Malden Bank. He was shot and killed in the bank at noon-day by E. W. Green, of Malden, the motive being robbery. He was a youth of seventeen, of great promise and of singular purity, the inspiration and delight of a wide circle of loving hearts to whom he stood for sweetness and light. The Converse Memorial Building, erected as a memorial to Frank Eugene, was dedicated October 1, 1885.

In 1888 Mr. Converse gave a fund of \$25,000 for the extension of the memorial building when necessary, and has recently given, in money and land, about \$30,000 in aid of the Free Hospital.

DAVID AYERS.

David Ayers, the son of David and Sarah (Seaverns) Ayers, was born in Needham, Mass., in that part of the town which is now Wellesley, July 27, 1818.

The only school education which he received was in the common schools of his native town, with the exception of about four months' instruction in 1833 in the private school of Mr. Marshall S. Rice, of Newton. In 1832 he removed to Boston, and for a little more than a year was office boy for the late Theophilus Parsons, Esq., at that time practicing law in Boston. When not needed at his office he worked at Mr. Parsons' house, doing such work as was required of him.

After leaving Mr. Parsons' office he entered Mr. Rice's school, as stated above, and in the fall of 1833, he left school again, returned to Boston, and became salesman and helper in the retail grocery store of Benjamin Dutton, his brother-in-law. In 1835 he entered the employ of Baxter & Dutton, and in 1837 that of Stratton & Houghton, both firms being

wholesale grocers. He remained with Stratton & Houghton until 1843, when he became a partner with Mr. John Stratton, under the firm-name of Stratton & Ayers. At the end of about a year this partnership was dissolved. He remained, however, in Mr. Stratton's employ until 1847, when he again became a partner in the firm of Stratton & Ayers. In 1850 John Stratton retired from the firm, and his son, George F. Stratton, took his place. In 1861 Mr. James F. Eaton became a member of the firm, the name of which was then changed to that of Stratton, Ayers & Eaton.

In 1865 Mr. George F. Stratton retired, and Ayers & Eaton continued in business until 1875, when they also retired from active business. In 1856 he was married to Martha E., daughter of Ivory Lord and Nancy (Hill) Huckins, of Great Falls, N. H., by whom he had four children, of whom two sons and one daughter are now living, viz., George D. Ayers, a member of the Suffolk Bar; Charles H. Ayers, a merchant of New Haven, Conn.; and Cora E. Ayers, still residing in Malden. Mr. Ayers joined the Independent Order of Odd Fellows in 1843, and is still a member of that fraternity. In that order he is a member of Massachusetts Lodge and Massasoit Encampment, and also the Grand Lodge and Grand Encampment of Massachusetts. He is a Past Grand of Massachusetts Lodge, and Past Chief Patriarch of Massasoit Encampment, Past Grand Warden of the Grand Lodge, and was for several years one of the District Deputy Grand Masters. He is also a Past Grand Patriarch of the Grand Encampment of Massachusetts. In 1858 he became a citizen of Malden, and has taken an active part in its affairs, especially in town-meetings. Never, unless sick, was he absent from any of them. He served on many important committees, took an active interest in schools, and served seven years, from 1873 to 1876 inclusive, and from 1884 to 1886 inclusive, on the School Committee.

From 1872 to 1878, inclusive, he was a member and secretary of the Board of Road Commissioners of the town of Malden. He is careful, methodical and painstaking in all matters, especially where public interests are concerned. He thoroughly studied all public questions in regard to which he was called upon to act. In all the positions he occupied he took great pains to know his duty, and was just, firm and resolute in the performance thereof. He has been one of the trustees of the Malden Savings Bank since 1878, and one of the examining committee of the bank since 1880, both of which positions he now fills. He has also been one of the vice-presidents of that institution.

His views are broad and progressive. He always endeavors to keep abreast of the times, is bold and outspoken, but tolerant of the opinion of others. In politics he is a progressive Democrat, a tariff and civil service reformer. He is one of the vice-presidents of the Malden Civil Service Reform Association.

REV. M. F. FLATLEY, P.R.

Rev. M. F. Flatley, P.R., Malden, Mass., was born in Ireland, where he made his early studies in a private classical school, and in St. Jarlath's College, Tuam.

When about eighteen years of age he arrived in Boston, and the same week entered the College of the Holy Cross, Worcester, Mass. Here he studied rhetoric and philosophy, and graduated with the highest honors, June, 1865. In September of the same year he entered the Theological Seminary of St. Mary's, Baltimore, Md., conducted by the Sulpician Fathers.

After a theological course of three years and a half, he was ordained priest, December 28, 1868, in the old cathedral, by the Most Rev. Martin J. Spaulding, D.D., Archbishop of Baltimore.

His first mission was Brookline and Brighton at that time, January 1869, forming but one parish. July 12, 1869, he was appointed to St. James' Church, Boston, as assistant to Rev. James A. Healey, now Bishop of Portland, Maine. After serving four years in this large and important parish, embracing the entire centre of the city, he was appointed by His Grace, the Archbishop, in June, 1873, to be the first pastor of Wakefield and Reading.

While in St. James' Parish, Boston, he was a constant and zealous worker in the cause of temperance. He organized the St. James' Young Men's Total Abstinence Society, and was its director for four years. He won for it the most costly and beautiful banner in the State, and made the society the largest and most flourishing in the city. He was one of the chief organizers of the Massachusetts Catholic Total Abstinence Union, also of its first convention, and was elected its treasurer five successive years.

Being the first priest to live in Wakefield, he had to provide everything for church and parochial house. He raised the church—only a portion of it was built—fourteen feet, had it wheeled round to face up-town, built a brick basement, and purchased the land for its extension. He also purchased a parochial house and grounds. Notwithstanding the panicky times, he paid off a debt of \$14,000 and left the church and church property entirely free from debt, when he was transferred from Wakefield to Malden. In July, 1884, Archbishop Williams appointed him administrator of Malden, and in September of same year he was appointed its pastor. In the year 1888 he was promoted and appointed permanent rector of Malden.

During his short stay in Malden he has already greatly improved the exterior, and at much expense has beautified the interior of the brick church. He has purchased land for school purposes, and on one of the lots he is now erecting a brick school-house, to cost about \$75,000. He has also purchased land for a new cemetery, and a country estate of three acres near the centre of Malden, on which church and school will be erected, and form the beginning of a new parish.

Father Flatley has lately returned from an extended tour of Europe, Egypt and the Holy Land.

REV. JOSHUA W. WELLMAN, D.D.

Rev. Joshua W. Wellman, son of James Ripley and Phebe (Wyman) Wellman, was born in Cornish, Sullivan County, N. H., November 28, 1821. His father, Deacon James Ripley Wellman, was born in Cornish, N. H., February 21, 1789, and died there November 1, 1860. He was the son of James and Althea (Ripley) Wellman. James Wellman, the grandfather, was the son of the Rev. James Wellman, who was installed the first pastor of the First Church in Cornish, September 29, 1768. He was born in Lynn, Mass., was graduated at Harvard College in 1744, and died in Cornish, aged eighty-five years, December 18, 1808. Althea (Ripley) Wellman, the grandmother, was a descendant in the sixth generation from Governor William Bradford, of Plymouth Colony. Joshua Wyman Wellman, after attending the public schools in Cornish till he was fifteen years of age, was fitted for college at the Kimball Union Academy, Meriden, N. H., from which he was graduated in 1842, entering Dartmouth College that year, and graduating in 1846.

In the winter of 1838-39 he taught school in Hartford, Vt., and later, during his college course, in Upton and East Randolph (now Holbrook), Mass. From 1846 to 1849 he taught in Kimball Union Academy a part of each year, and in 1847 was for two terms principal of the academy in Rochester, Mass. Entering the Andover Theological Seminary in 1847, he was graduated in 1850, and was then a resident licentiate in the seminary for one year.

He was ordained to the Christian ministry and installed as pastor of the historic First Church in Derry, N. H., June 18, 1851, where he remained five years. He was installed pastor of the Eliot Church, Newton, Mass., June 11, 1856, and dismissed October 23, 1873. His pastorate in Newton included the exciting period of the Civil War. During the early period of the conflict he visited the South and saw something of the horrors of war. He was strongly opposed to slavery and supported the war as necessary to save the Union. His plain statement of his views in his sermons produced considerable excitement at a time when many believed that the pulpit should be silent on such subjects. He continued, however, in every way which seemed to him to be proper, to help forward the cause of justice. The church became eminently patriotic, and twenty-seven men from the congregation enlisted in the war.

During this pastorate the church grew from small membership to be one of the largest and most prominent churches in the State.

March 25, 1874, Mr. Wellman was installed pastor of the ancient First Church in Malden, Mass., the

Mr. A. H. Hattery

Truly yours,
J. M. McClure.

history of which is given at length in this volume; and which, under his care, grew into a large and influential church. He remained in this position till May 6, 1883, since which time he has not been settled, but has continued to preach in various localities, while using much of his time for literary work.

October 24, 1854, he married Ellen M., daughter of Caleb Strong and Prudence (Durfee) Holbrook, of East Randolph (now Holbrook), Mass.

Their children are: Arthur Holbrook, who married, October 11, 1887, Jennie Louise Faulkner; Edward Wyman, who married, October 1, 1884, Emma E. Patch; Ellen Holbrook, who married, October 24, 1883, Robert Cushman King, and Annie Durfee Wellman.

Mr. Wellman was elected a corporate member of the American Board of Commissioners for Foreign Missions in 1867, and he has been one of the managers of the Congregational Sunday-school and Publishing Society since 1870; and a trustee of Phillips Academy, in Andover, since 1870. He is a member of the New England Historic Genealogical Society, a corporate member of the General Theological Library, of Boston, and for many years a director of the American College and Educational Society, of which he is now vice-president. He was a leading advocate of the formation of the Congregational Club of Boston, of which he was an original member. Olivet College, in 1868, and Dartmouth College, in 1870, bestowed upon him the degree of Doctor of Divinity.

He has published: "The Church Polity of the Pilgrims;" "Review of the Sabbath Hymn and Tune-Book;" "Our Nation under the Government of God," a war sermon preached in 1862; "Christianity and our Civil Institutions;" "A Review of Dr. A. V. G. Allen's Biography of Jonathan Edwards;" besides numerous sermons, addresses and magazine articles. He made an argument before the Visitors of Andover Theological Seminary, in the famous "Andover Case," so called, which was published in the book called the "Andover Case."

CHAPTER XL.

ASHLAND.

BY GEORGE T. HIGLEY.

THE SURFACE.—The town of Ashland is situated in the southwesterly part of Middlesex County, and is bounded northeast by Framingham, east by Sherborn, south by Holliston, southwest and west by Hopkinton, and northwest by Southborough. Its measurement from east to west is four miles, from north to south three miles, and it contains twelve and five-eighths square miles. Its population in 1885 was 2633, and its latest valuation (1889) was \$1,300,901. Its outline is irregular, the only straight divisional line

against neighboring towns being the Holliston boundary. The Framingham line is nearly straight, having but a slight bend at Winter Street. Against Southborough there are three bearings, against Hopkinton four, and in the short distance bounding on Sherborn, there are two, the bend in this line being but slight. The town was incorporated March 16, 1846, being composed of portions of the towns of Framingham, Holliston and Hopkinton. The part taken from Hopkinton was the territory lying between Cold Spring Brook and Sudbury River; from Holliston, that lying east of Cold Spring Brook and down the river to the old Framingham line traced below; from Framingham, the rest of the territory on the south side of the river and all on the north side. The old line between Framingham and Holliston, beginning at a point on the river a few rods below the iron bridge, crossing Union Street, ran easterly nearly parallel to the north boundary of Wildwood Cemetery, to a stone bound near the northeasterly corner of the "Old Orchard," in the woods on the Town Farm, thence southerly to a bound in the road about ten rods north of the house of the late W. D. Cole, and thence easterly with a slight southerly deflection past a stone bound situated on land of Mrs. W. H. Wright, at the entrance of the Cozzens meadow, to the angle in the middle of the Sherborn line. This old boundary line cut in two the farms of the two Grouts, Higley, Dearth and others. The surface of the land is moderately hilly. Taking a bird's eye view, the most marked feature is the depression caused by the Sudbury River, which flows through from west to east. A hardly less noticeable depression is the valley of Cold Spring Brook, which stream, after traversing the southwest part of the town, joins the river well to the east. Indian Brook, coming down to the river from the southwest, in the west part of the town, yields another line of low-lying surface. Away in the extreme east there is a wide plain of low land, mostly swamp and peat meadow, lying south and west of Waushakum Pond. Into this pond flow two brooks coming from the south, one from beyond the Holliston line. From these various depressions, in all directions, the land rises to hills of moderate elevation. The low lands are wide or gently slope upward, and upon the elevations are plains, the surface everywhere affording convenient farms. On most of the elevated lands, woods and cultivated fields are intermingled.

But few points in the landscape are so conspicuous as to have acquired distinctive names. What is now "the village" was, before the incorporation of the town, called Unionville. The extended hill which rises slowly at the southwest of the village is called "Magunko," in remembrance of an Indian settlement of the same or a similar name once located upon its eastern slope. In the north part of the town a slightly higher elevation has received the name of "Wild-cat Hill;" north of the river, in the east, "Ballard Hill" and "Banner Hill," at the southwest of the

cemetery, are names now seldom heard. Of the names which have formerly been applied to certain districts, names not always euphonious, none seem to survive except that of "Oregon," which designates a small cluster of houses bordering on Southborough, and "Chattanooga," which is the name of the new factory village at the westerly end of the town. These names are also applied to the schools in their respective districts. For the rest of the town the names given to the schools apply to the districts: "Number Two" designating the southwest part of the town, and "Number Six" the southeasterly district. Reference is still made to the "Cutler District," to designate the school and territory about one mile north-east from the village, and otherwise known as "District Number Five." But this appellation is going out of use, the family for whom the district was named having now moved away. While to point out any particular locality the name of the person living near may be given, yet, at the present time, the influence of no family seems to be so pervasive as to give its name to the neighborhood.

Of the population of the town, which is now, doubtless, somewhat above the figures of 1885, about one-third live upon its farms, these inhabitants being scattered evenly over its surface, though somewhat less thickly in the northern part than elsewhere. The remainder are gathered in a village situated at nearly the geographical centre of the town, upon an almost level plain lying at the junction of the river and Cold Spring Brook. Before these waters meet, the river, whose general flow is easterly, sweeps round by a bend to the south, thus cutting off or blunting the sharpness of the angle which would otherwise be formed by the junction of the streams, and forming an almost circular boundary to the village on the east. On the southwest this plain pushes up Cold Spring Brook, and up the river valley to the west, while it presses back against the land lying between these two valleys. Thus is formed the village plain, a basin more than half a mile in width, and extending far up the river, and having pleasant overlooking hills on all sides. Sudbury River forms the northerly and northeasterly boundary of the village, Cold Spring Brook the southeasterly and southerly, and the steadily-rising slope of land which, at its elevation, is called "Magunko," the southwestly.

The whole town is traversed from west to east by the Boston and Albany Railroad, of which the Ashland Station is twenty-four miles distant from Boston. The New York and New England Railroad Company run their cars from Ashland Centre, at their junction with the Boston and Albany, through Hopkinton and Milford to Providence, Rhode Island.

INCORPORATION.—In 1837 the first petition for setting off the town, signed by James Jackson and 130 others, was presented to the Senate. The Committee on Towns reported a bill which, however, was denied a "third reading." The petition was afterward

referred to the next General Court. In 1838 the subject was again brought up, many remonstrances from clusters of individuals being sent in. Each of the three towns from which it was proposed to take a portion of the territory voted to oppose the measure, and sent agents to carry out their wishes. The petition got no further than the committee of the Senate, whose report of "leave to withdraw" was accepted. The matter rested till 1846, when a new petition, drawn up and circulated by Calvin Shepherd, Jr., and signed by James Jackson and 209 others, was again presented to the Senate. This petition was reinforced by others until about all the voters residing within the limits of the proposed town had become petitioners. At this time the towns of Framingham and Holliston voted not to oppose; while Hopkinton passed a contrary vote—yeas, 159; nays, 115—and appointed their resident lawyer, Samuel Walcott, Esq., agent to act for them in opposition. Remonstrances were sent in from various persons residing in the three towns interested. The petitioners were represented by a lawyer from Sudbury. A very thorough hearing was had before the joint Committee on Towns; all the facts favorable, or the contrary, were brought out by the opposing parties. The reports of this committee and of that of 1838 recite at length the statistics of population, resources and business, and present a showing favorable to the petitioners. The bill, as proposed by the committee, with the exception of the change of name from Unionville to Ashland, suggested by Calvin Shepherd, Jr., who was then a member of the House of Representatives, was passed by both Houses, was signed by Governor Briggs, and took effect upon its passage, March 14, 1846. The boundaries of the town, which had been determined by the survey of William F. Ellis, are fully defined in the act of incorporation. Within a year or two afterwards the selectmen of Ashland, meeting in conference with those of the neighboring towns, set up monuments at each of the angles. There have been several efforts made, by persons interested, to change the boundaries, but only one has been successful. In 1853, for the benefit of parties who then occupied the mill at Cordaville, the bound on the south side of the river, which stood at first west of the road leading from the mill to Hopkinton Centre, was carried down stream to its present position, leaving that road wholly in the town of Hopkinton.

The act of incorporation attempted to apportion equitably the town burdens. Ashland was to support, during their natural lives, one-twelfth of the Framingham paupers, one-fifth of those belonging to Hopkinton, and one-eighth of the Holliston poor. Holliston pauper-farm, which remains to the present time within the Ashland limits, was not to be taxed, a provision which, at the request of Ashland, was annulled by the Legislature of 1848. Ashland was required to assume six hundred dollars of Hopkinton's debt, which sum was soon afterwards paid. It

seems to have been admitted that Ashland became owner of all the public property located on its territory, which consisted principally of a very few school-houses. Hopkinton, however, craved the fire-engine, which one night certain of its inhabitants carried away, but in the law suit which followed, the Court decided that the engine must be returned, which was done.

ORGANIZATION.—The first town-meeting was held March 31, 1846, in the Chapel Hall. At this meeting, which was called by Major Calvin Shepard, as a justice of the peace, a full corps of town officers was chosen. The town's first honors were bestowed upon Calvin Shepard, Jr., Josiah Burnham, Dexter Rockwood, Andrew Allard and Albert Ellis, they being chosen selectmen. Benjamin Homer began his twenty-years' term as treasurer. Among the other officers elected familiar names appear: William F. Ellis, S. N. Cutler, William Eames, William Seaver, James Jackson. Daniel Eames began his service as moderator. C. F. W. Parkhurst was chosen town clerk, perhaps for his even, free penmanship, an illustration of which could afterwards, for many years, usually be seen posted at the side of the meeting-house door, where he "published" all the proposed marriages. At that first meeting a rule was established, which has prevailed ever since, that warrants for town-meetings must be posted at least eight days before the meeting, and another attempt was then made, which has failed, whenever tried, to the present day, to enact a code of town by-laws.

At the second meeting, held on April 8th, the assessors were intrusted with the duty of arranging the highway districts, and they appear to have marked out thirteen, a number not substantially varied from, but for a short period, through the entire history of the town, to the abrogation of the law relating to highway surveyors in 1889. A committee of seven were chosen to take into consideration the whole subject of school districts, schools, school-houses, and the division of the school money. The names of Elias Grout and William F. Ellis stand respectively first and second on this list. Their report made at the adjourned meeting, with slight amendments, was adopted. No less than five town-meetings were held before the end of June. During those months about the whole work of the town seems to have been laid out, and particularly the subject of roads and school-houses was dealt with.

FURTHER ACTS OF THE TOWN.—At the annual meeting in 1847 the appropriations were \$2000 for town expenses, \$500 for highways, and \$800 for schools, figures that were not much changed during the first years of the town. In 1850 the fire-engine called the "Magunko" was bought for \$500. About the same time the town purchased of James Jackson his interest in the Chapel building.

In this year the question of building a town-hall began to be agitated in connection with necessary

school provisions for the Centre District. It was not, however, until 1855, and after many plans had been proposed and votes passed, that the appropriation of \$10,000 was finally made, and a committee actually set about the work of building. The Building Committee were, Elias Grout, Andrew Allard, John A. Whitney, James Jackson and William Jennison. In December of that year this committee reported the building erected at a cost slightly less than the appropriation. They appear to have charged the town twenty-five dollars each for services. At the same meeting the superintending School Committee were authorized to make necessary changes in the system of conducting the schools and to hire a grammar-school teacher. The graded system for the Centre District was introduced the next year.

In 1858 the old custom of letting out the paupers to the lowest bidder was still in force, though the overseers of the poor were allowed the alternative of hiring a farm upon which to place the town paupers. Late in the following year the Thomas Fiske farm was purchased for that purpose. Six years later the town sold this place, and purchased of Elias Grout a more commodious farm in the easterly part of the town, which has since been occupied as the home of most of the Ashland paupers. From the year 1861, through the war, the town furnished its several quotas of soldiers, responding promptly with men and money, when called upon. Some account of its work may be found elsewhere.

Up to the year 1871 the old "Magunko" had served to extinguish the few fires which had overtaken the town, "Capt." John A. Whitney standing high upon the engine and urging on the thirty laboring men who were working the brakes. But the days of hand-power were passing away. In that year the sum of \$7500 was voted for a steam fire-engine, hose-carriage and house, and the next year hooks, ladders and a truck were added, the whole resulting in an excellent fire equipment, since appreciated on many occasions. The firemen at first paid \$3.50, annually, and allowed their poll taxes, later received \$6, and in 1878 \$12.

About this time action was taken by the town in favor of the Hopkinton Railroad, with the proviso that its northerly terminus should be at the centre of the town. Within two years following \$10,000 were invested in the capital stock of the road, an investment which proved a loss to the town, as a subsequent sale by the mortgagee divested the stockholders of all property in the road.

The purchasing of Wildwood Cemetery in 1869, and the establishment of the Public Library in 1880, will be spoken of in subsequent paragraphs.

For some account of the laying out of roads, and provisions made by the town for schools, reference may be had to the subsequent portions of this narrative, which treat of those subjects.

Public provision was first made for lighting the

streets in 1881, an appropriation of \$300 being then made for that purpose. Many individuals had before erected lamp-posts, and the town now furnished lamps and service. At a later date the town also set many of the posts, and the streets in the village were fairly well lighted with kerosene oil lamps. At the close of 1889 an electric light company from South Framingham was admitted to do business, and at the beginning of the following year had erected two arc and about forty incandescent lights.

At the close of the war the town's indebtedness was \$30,000. The building of the school-house on Main Street, the subscriptions to the Hopkinton Railroad, the purchase of the land and preparing the grounds of Wildwood Cemetery, and the provision of a steam fire-engine, were extraordinary expenses incurred since the war, carrying up the indebtedness in 1872 to \$53,000. Annually an appropriation has been made to reduce the debt, varying from \$4000 to \$1500. In 1882 the town debt was \$25,000 and consisted principally of notes not soon to mature. To have in readiness the means of paying these obligations at maturity, a sinking fund was established and three commissioners were appointed. The sinking fund, by vote of the town, is to be discharged in 1890. At the beginning of 1889 the town debt had been reduced to about \$10,000.

TOWN OFFICERS.—When the voters of the town of Ashland first assembled in the Chapel Hall for the transaction of business, the work to be done was not new to them. They had learned the method of procedure by attending similar meetings in the towns from which they had come. A full proportion of those who gathered had been accustomed to take an active part in such meetings, and had held offices in the parent towns. This will account for the directness with which they proceeded to lay out within the first few months the whole work of organization. The first town officers elected were therefore not a random or an experimental selection, but they were men who had been tried and found equal to similar work before. Thus was early established a rule which has been followed since, to elect to office those men who have proved themselves qualified. The burden of doing the town work has been assigned to substantially a certain few persons, who year after year have been chosen to the offices, sometimes upon one board, sometimes upon another, but almost always their names appearing somewhere in the list. Those men who have served as selectmen have often at other times been chosen assessors or overseers of the poor. Not unfrequently a new man will be elected as a third assessor or overseer, but it will always be found that at least one of the board has held some important office before and has demonstrated his fitness to be trusted. It has been the policy of the town usually to re-elect the town clerk in recognition of the fact that his knowledge of the doings of the town acquired in past service is valuable, and may be used

in assisting other officers. For about the same reasons the treasurer is not often changed; experience has taught him how best to manage the town's finances. Upon the board of school committee it has been the custom to elect one or more of the clergymen, if there are such in town who are noted for scholarship, and have remained sufficiently long to form an acquaintance with the people. Politics have invariably been ruled out of meetings held for the election of town officers. The man supposed to be best fitted for the office according to the judgment generally prevailing, has as a rule been elected. The assessors, school committee, treasurer and tax collector have always been paid for services, the allowances, however, at first being small. The town's first treasurer, who retired at the end of 1865, never charged above thirty dollars annually, and for most of the time he was serving, only ten dollars. The treasurer for 1866 charged \$100, setting an example which has been followed by all the succeeding treasurers. The school committee for many years were paid only one dollar per day, the assessors two dollars. The members of these boards now get two and one-half dollars. The selectmen made no charge for services for many years, nor did the overseers of the poor. More recently the work of the different boards has increased, and their pay has been advanced in proportion. The trustees of the library, the trustees of Wildwood Cemetery, the commissioners of the sinking fund and the park commissioners seem to be the only boards whose members now receive no pay for services. The matter of pay is never a just criterion by which to judge of services which have been rendered, as many of the town's agents have spent time and money freely, with no expectation of a recompense, and without even receiving afterwards any public acknowledgment of their valuable services. The writer is happy to record that the town has once in its whole history, departed from its usual custom of unappreciative silence. When their first treasurer, after long and obliging services, retired from the office, the town, at their meeting of March 5, 1866 (so say the records), did "extend a vote of thanks to Benjamin Homer for his acceptable services as treasurer the past twenty years." The real agents of the town who have done the work are only partly represented in the lists of town officers, and of these there is allowed only space for two lists. The selectmen since the organization of the town are as follows, viz:

1840—Calvin Shepard, Jr., Josiah Burnham, Dexter Rockwood, Andrew Allard, Albert Ellis.

1847—William Jamieson, Pennel Clark, Dexter Rockwood, Elias Grout, William Eames.

1848—William F. Ellis, Josiah Cloyes, John Works.

1849-52—Elias Grout, Willard R. Eames, William Eames.

1853—Simeon N. Cutler, Willard R. Eames, William Eames.

1854—Elias Grout, James Jackson, William C. Jamieson.

1855—William Eames, J. E. Forbush, Charles Twitchell.

1856-57—William Eames, Benjamin Homer, Henry Cutler.

1858—Elias Grout, Henry Cutler, John Clark.

1859—Elias Grout, William Eames, Benjamin Homer.

1860-61—Elias Grout, W. A. Scott, J. N. Pike.

- 1862—J. N. Pike, Henry Cutler, Charles Alden.
 1863-64—J. N. Pike, Charles Alden, John Clark.
 1865—J. N. Pike, Charles Alden, Alvah Metcalf.
 1866—J. N. Pike, Alvah Metcalf, Benjamin Homer.
 1867—J. N. Pike, Alvah Metcalf, C. H. Tilton.
 1868—W. F. Ellis, W. R. Lames, B. T. Thompson.
 1869—W. F. Ellis, Elias Grout, W. A. F. Noyes.
 1870—John Clark, B. T. Thompson, J. H. Dadmun.
 1871—John Clark, Henry Cutler, J. H. Dadmun.
 1872—John Clark, Alvah Metcalf, S. A. Cole.
 1873—Charles Alden, S. A. Cole, R. N. Ross.
 1874-76—Charles Alden, Abner Greenwood, J. A. Whitney.
 1877-78—Abner Greenwood, R. N. Ross, S. S. Baker.
 1879-80—A. Greenwood, S. S. Baker, J. A. Balcom.
 1881—R. N. Ross, C. H. Tilton, A. Metcalf.
 1882-83—C. H. Tilton, R. N. Ross, C. F. Grout.
 1884-85—Adrian Foote, J. A. Balcom, B. H. Hartshorne.
 1886—A. W. Eames (2d), J. A. Balcom, G. C. Fiske.
 1887—A. W. Eames (2d), W. F. Ellis, G. C. Fiske.
 1888—Adrian Foote, C. H. Tilton, J. A. Balcom.
 1889—Adrian Foote, J. A. Balcom, W. W. Smith.
 1890—A. Foote, J. A. Balcom, C. E. Loring.

Only one Senator has gone from Ashland, J. N. Pike, in 1872. Since 1856 Ashland has been united with Hopkinton in its representative district. For the years 1856 and 1857 the town passed votes not to send a representative. The following representatives from Ashland served in the years below specified:

- 1851-52, James Jackson; 1853, Elias Grout; 1854, Simeon N. Cutler;
 1855, William M. Thayer; 1859, William F. Ellis; 1862, Benjamin Homer;
 1865, John Clark; 1868, William Seaver; 1871, J. N. Pike;
 1874, Charles Alden; 1877, Wm. F. Ellis; 1880, S. F. Thayer; 1883, Caleb Holbrook;
 1886, F. N. Oxley; 1889, Abner Greenwood.

WAYS.—The public ways as they existed at the incorporation of the town were nearly all retained, while others have been added. By consulting a map of Ashland, it will be observed that the roads formerly extended through the town in three systems. Thus there were roads crossing from Holliston, Hopkinton and the southerly part of Southboro', and all centering in Framingham. The Hopkinton road lay through the village of Unionville, and the traveler could take his choice of ways, by the old road through Cherry Street, past what is now the Dwight Printing Company's grist-mill over the "Common," or by the more level way through Union and Fountain Streets and Park's Corner. The road from Holliston led past the old burying-ground, William Eames', the Poor Farm and Park's Corner, with a diversion by the Joseph Morse place to South Framingham. The inhabitants of the southern part of Southborough and further west went by the "Oregon" road, traversing the northerly part of the town. All the inhabitants dwelling north of the river, as far west as "Chattanooga," and those south of the river living east of the paper-mill and north of W. D. Cole's, depended upon Framingham for school privileges, and went to Framingham Centre to trade, to vote and to attend church, excepting that for a time a Baptist church might have been reached at Park's Corner. The people of Unionville journeyed to Hopkinton to church and town-meeting, while the inhabitants on the east side of Cold Spring Brook north to the Framingham line toiled slowly over the hills to Holliston for the like privileges. At the

incorporation of the town a new centre of trade, church influence and municipal business was created, which it became necessary to connect with the outlying districts by passable roads. Ways were also required to render the schools accessible to the inhabitants of the new districts. For these purposes new roads were built, the principal of which are as follows: from F. O. Grout's house through the woods over the old disused Central Turnpike to the junction with Fountain Street; from the "Oregon" District southerly to its junction with Winter Street, opening a road to Fayville; from Cordaville, through what is now "Chattanooga," to Winter Street, Southborough building its portion; from William Eames' place southerly to the Warren Morse place, avoiding the hill and the distance round "the old red school-house" in the woods; Cross Street in District No. 3, to give the inhabitants living on High Street access to their school; Concord Street from Fiske's to Front Street. At a few points roads have been altered, straightened or discontinued, notably near the Albert Hayden place, by which the road over "the Common" to Framingham was shortened and improved, and near Josiah Burnham's house, the old road having been abandoned and a new one built for convenience of the neighborhood in reaching both their school and the village. At a somewhat later date Main Street was continued from Union Street toward Holliston, in a straight line to its junction with Prospect Street, thus avoiding the necessity of the detour past the cemetery; and quite recently a way was built from the house of William Eames, past District No. 6 school-house, by which a difficult hill on the old road has been avoided. Most of the early roads were laid out by the county commissioners, and met with more or less opposition from the town.

In the village there have been changes in the roads since the town was set off. Pleasant Street was very early built by the town, Mr. Jackson giving the land, and was a substitution for a discontinued road, which clung to the south shore of the Mill Pond. All the buildings upon Pleasant Street to Alvah Metcalf's house, and all on the avenues leading south from this street to the railroad, have been erected since the organization of the town.

The land for Central Street was given by the owners, Benjamin Homer and the heirs of Capt. John Stone, and the street was constructed by the town about 1850. At the opening of the new cemetery Homer Avenue was laid out, affording a direct way thereto. The old road from the railroad crossing to Elias Grout's house was formerly broken at Union Street, the northerly part leading into that street at a point slightly nearer the new house of Mr. Holbrook than at present, and the southerly part hugging the bank of the river from Union Street to Cold Spring bridge. The northerly part of Alden Street, as far south as Central, was opened to the public by Charles Alden, in honor of whom it was named, in 1868, for

the purpose of making his land accessible to building. The part south of Union Street was laid open about the same time by Albert Leland, the owner of the land in that neighborhood. The connecting portion between Union and Central streets was seized and laid out by the town several years later, in the face of some opposition. Esty Street was opened by C. C. Esty, the owner of most of the land through which it was constructed, in 1868, and was afterwards accepted by the town.

BUILDINGS.—Substantially all the buildings now standing upon the streets so far mentioned have been erected since the incorporation of the town, and nearly all between the years 1868 and 1873. On the other hand, the houses as they now appear, with a few exceptions, were at that time standing on Main Street, from Union to its northern terminus, and on Front Street from the Jennings house west to Mrs. Jerusha Whittemore's. On Union and Cherry streets very few of the houses are older than the town; on Concord and Granite streets all are new. None of the buildings in town are very old. One who came to town in 1818 says that there were then in sight on the whole plain, from a point of view at the factory, besides the "Long Block" and the "Boarding-House," only the houses of Michael Homer and Capt. Stone at the east, the "Old Mansion" at the south, and that of Matthew Metcalf away at the west. Across the river at the north, part way up the hill, was the Clark house.

As to the business buildings, when they were erected, for what purposes, and who occupied them, can be gathered from the account to be given later of the industries of the town.

LANDMARKS.—In the changes that have taken place, many landmarks have been removed. It is only about twenty years ago that the dwelling-house was burned which was situated on the spot built upon by Sir John Frankland, near the Hopkinton line, and which contained as parcel of itself portions of the original Frankland house. In the easterly part of the town the old house for many years occupied by J. E. Morse, said to have been built by James Haven two hundred and sixty years ago, has recently been burned. The "Old Mission" house occupied by Roger Dench over one hundred and fifty years ago, and which stood upon the premises of Mrs. Eliza A. Howe, but a few feet southwesterly from her house, was burned in 1877. The long quadrangular house formerly occupied by Capt. John Stone, located on the north side of Union Street, about where the house occupied by Curnyn now stands, was taken down about 1850. A little to the southwest, on the new school grounds, may still be seen the cellar-hole of the barn used in connection with this house. The house occupied by Benjamin Homer in 1846, and which had descended to him from his grandfather through his father, was moved about 1870 to its present location on the east side of Homer Avenue.

BURIAL-GROUNDS.—In 1846 there were three burial-grounds within the limits of the town. In the woods at the extreme south, almost at the Holliston line, on the old disused road leading from William Eames' house, over the hill, there is a spot of land which has been used for a burial-ground until quite recently by the inhabitants of that neighborhood. In the days when the travel from Framingham to Holliston passed, this locality was not so lonely and desolate as now. What is probably the oldest burial-ground in town is the half-acre of land on Union Street, near the Newhall boot-shop. Here are a tomb and grave-stones, marking the graves of some of the early settlers. Since the town was set off this yard has become the property of the town, and has been walled in and otherwise improved. Until 1869 the principal burial-ground was the two acres lying in the rear of the Congregational Church. Originally at this point there was a small grave-yard owned by the Unionville Evangelical Society. Later the town of Hopkinton became the owner of the lot, and added sufficient land to increase the yard to its present size. Within a year or two Hopkinton has released what interest, if any, it had remaining to the town of Ashland, so that the last named town now owns the fee in the land. The yard seems to be for the most part filled with graves, yet the holders of the lots continue to bury their dead within its limits.

WILDWOOD CEMETERY.—In 1869 the town purchased of Charles Alden twenty-three acres of land, situated half a mile east of the village, on the northeast side of Homer Avenue, and lying on the southeast bank of the river. The ground rises from the river in an irregular and pleasing manner, to an elevation of about seventy-five feet in the extreme rear, the surface everywhere presenting a full view of the village which lies below. When first taken, most of the land was covered with a growth of oak and chestnut-trees, which have since been partly cleared away in those portions which have been graded and wrought for use. Only a small part of the whole tract has yet been occupied, but this section has been carefully laid out in paths and lots, the natural contour of the surface readily lending itself to the designs of the landscape artist. A considerable sum of money was at first expended in improving the grounds, and sufficient portions of the surface were then wrought to meet burial requirements to the present time. Many families have purchased lots upon which they have erected monuments. Burials have begun upon the high grounds and by the river side. The grounds are well-kept, the town employing a gardener who devotes his time to the work. A small stream of excellent water runs through the grounds along the southwest part, at the foot of the hills, which is used for drinking and also for watering the hill-slopes, the water being forced up by machines. Wildwood Cemetery is the name given to this beautiful burial-ground. Eight years ago the town

bought an additional acre of land at the entrance of the grounds, and removed therefrom the old buildings, so that now the inhabitants of Ashland have secured for all time a worthy place for the burial of their dead. The original committee appointed by the town to prepare the grounds, making a cemetery out of the forest, appear to have done their work well. Their names are Warren Whitney, Henry Cutler, Willard R. Eames, Charles Alden and Alvah Metcalf. The cemetery is now under the government of a board of five trustees chosen by the town, one of whom is chosen annually to serve for a term of five years.

SCHOOLS.—The town of Ashland adopted the method of conducting schools which had prevailed in Framingham. There was no division into territorial districts, each having a corporate standing, owning and holding its school property, as was the case in many country places, but the town bought the land and erected the school-houses. At the same time there was a quasi-district arrangement, the method of the district system being in part followed. There were chosen at the annual town-meeting two committees, called respectively the school committee and the prudential school committee. The former had a legal standing, but the latter existed by custom and by acquiescence on the part of all concerned. Under this system the prudential committeeman had charge of the school-house in his district, provided fuel and hired the teachers. A meeting was usually held in each district at least once a year, at which the prudential committee for the ensuing year was nominated and the question determined, by bidding or otherwise, as to who should provide the fuel for the next year and the price to be paid for it. The nominee of the district was invariably elected at the succeeding town-meeting. The school committee proper, usually called the superintending school committee, in distinction from the prudential committee, consisted of three persons chosen for their fitness for the office. They were taken from the class of liberal, or at least well-educated men; often they were old teachers. The duty of the school committee was to examine the candidates for teachers, to visit the schools, to have a general superintendence over them, including the text-books, and to make an annual report, in writing, to the town upon their condition. In this way the schools were conducted many years in an acceptable manner, especially to the inhabitants of the outside districts.

But the influence of the cities and larger towns began to be felt, where the cumbersome machinery of the system above described had been abandoned, and a simple system introduced of schools conducted under the sole charge of one committee, and graded by classes so far as practicable. In 1859 the town abandoned the election of a prudential committee, and added three members to the school committee, which, again increased in 1863, became a committee of nine, one-third elected each year. For a time care

was taken that, at least, one member of the nine should be chosen from the residents of each district, in order to maintain the proper equilibrium of school influence throughout the town. The districts, too, at first, held their meetings, as before, to nominate the candidate for election from their district. But it proved inconvenient always to maintain this rule, and deviations from it were more and more allowed, till the rule had at last become obsolete. Then it began to be felt that a committee of nine persons was larger than could be needed for a small town, and that the school business could be done more conveniently and no less efficiently by a board of a smaller number. The town about 1880 had reduced the number to three, one member to be elected annually, and this arrangement, proving entirely satisfactory, has prevailed to the present time.

The division of the school money among the districts was at first made by vote of the town, and seems to have been based on the number of families or scholars in the district. But the rule was varied, sometimes equal amounts being assigned to all the districts. Once the Centre District was allowed to count as one and one-half. Later the division was left to the judgment of the superintending school committee, and this committee appears to have recovered from the town gradually a recognition of the rights which the law really gave them.

Feeling that the burden upon scholars of purchasing school-books had become excessive, in order to reduce the price, in 1882 the town appropriated \$300 to be used in purchasing a supply to be sold without profit for cash. This plan was pursued successfully two years, when the law requiring towns to furnish school-books free to their scholars went into effect. The supply on hand was then turned over to the new use. Books and supplies are now purchased as needed, and are issued by the agent of the town upon the requisition of the school-teachers.

In the spring of 1889, taking advantage of the new law, a union with the town of Hopkinton was effected and a superintendent of schools was chosen for the two towns, who has now completed one year of successful service.

The locating of schools which pre-supposed a division of the town into districts was done by the committee on schools appointed at the second town-meeting held on April 8, 1846.

The limits of the district having been determined, to find the actual spot for the location of the school-house, measurements were made to decide as to its geographical centre, and the house was built at a point on the road nearest that centre. There were originally seven districts, reduced to six when the school-house in District No. 3 was erected. Five new school-houses were built very early, and they stand today in their original locations, though in three of them no schools now assemble. The school in the

Centre District, otherwise called District No. 1, was kept in the chapel, a two-story brick building, which stood on the site of the town-hall, but more to the front. Only the first story in this building was fitted with school furniture, and regularly occupied for school purposes. There were seats for about fifty scholars. Overflow schools were sometimes kept in the hall above and in other buildings in the village. Before 1850 the number of pupils attending the Centre School had become double that in District 6. Between these two schools there were many contests in spelling occurring on winter evenings. The schools in the other districts were smaller, particularly in Nos. 2 and 4. After 1855 the attendance in the outlying schools began to decrease, a tendency which has not been checked even to the present time. The result has been seen in the closing of the schools in Districts 2, 3 and 5, though the last-named school was also weakened by the cutting off of a portion of the district by the flowage from "Dam 2." In the northerly part of the territory of District 3, in 1887, a new school-house was built to accommodate the children from the new village at Chattanooga Mills.

Meantime a great change has been going on in the centre of the town. It was early found that the school accommodations were insufficient, that something more than one school-room in the Chapel building was needed. It was also believed that there were now scholars enough in this district to put in successful operation the graded system, which had proved beneficial in the cities and larger towns. At a meeting of the town held in 1855, it was decided to erect a town building, upon the first floor of which provision should be made for the schools in the centre of the town. Four school-rooms of a size to seat fifty pupils each were provided and furnished in a substantial and, for the time, superior manner. The schools in this district then began anew under the graded system. From 1856 for two years a high school was taught by H. F. Allen, and about 1863 portions of the tuitions of scholars attending the private school of Warden Reynolds were paid for a year or two by the town. With these exceptions it was not attempted to carry scholars beyond the grade of the grammar-school, requiring those who desired to pursue more advanced studies either to go out of town for the needed instruction or to obtain it in the occasional private schools which were taught on the tuition plan.

HIGH SCHOOL.—In 1867 the number of scholars having increased, to meet the general desire, as well as to keep abreast with neighboring towns, it was again voted to organize a high school, though the number of resident families was not sufficient to compel the town to take such action. From the date of its final establishment there has been no interruption to the high school. At first the services of but one teacher were required. Later, when the number of scholars had increased, an assistant was furnished,

and now for many years two teachers have devoted their time to the school, and, if short periods at the change of teachers be excepted, with almost uniformly satisfactory results. The principal, at least, has always had the preparation afforded by a college course of study; the assistant now employed is a college graduate. So successfully has this school been conducted, that very few scholars have gone away to other schools, even for acquiring the necessary preparation for college or the higher technical schools. Following is a list of the principals of the high school, with dates and periods of teaching:

J. O. Norris, 55 weeks, from June, 1867; H. E. Marston, 8 weeks, from September, 1868; Francis Savage, 27 weeks, from January, 1869; H. E. Bartlett, 40 weeks, from September, 1869; J. A. Page, 13 weeks, from September, 1870; A. S. Roe, 187 weeks, from January, 1871; J. B. Messervey, 40 weeks, from September, 1875; A. J. George, 240 weeks, from September, 1876; W. H. Thompson, 40 weeks, from September, 1882; F. E. Whittemore, 120 weeks, from September, 1883; E. H. Alger, 13 weeks, from September, 1886; C. W. Ayer, 4 weeks, from January, 1887; H. A. Blood, 63 weeks, from February, 1887; Walter Moores, 80 weeks, from September, 1888.

OTHER SCHOOLS.—The grammar school, though belonging to the series of graded schools in the Centre District, has been open to pupils from all parts of the town, who have chosen to attend. This school has always been the special care of the committee, and none but teachers of sterling character and large experience have been employed. The appointments of teachers to the lower grades, and in the mixed schools, have usually been made from the graduates of the high school, or of one of the State normal schools. It has been the practice of the committee to retain good teachers, advancing them in grade and pay, and marriage of a female teacher has not worked a forfeiture of her position. The schools have suffered at times from the excursions of marauding superintendents from larger places, but the offer of higher wages has not always proved a sufficient lure. Teachers have usually preferred to keep their present assured positions, though they get less money. An exception, however, must be allowed in the case of the high school principals, who have as a rule left at the end of from two to six years for better positions, as the town though liberal in all school matters, necessarily sets a limit to salaries. Contrary to the tendency in the outlying districts, the number of scholars in the centre of the town has always been increasing. Before 1870 the four rooms in the town hall building, with the addition of one of the ante-rooms up stairs, could not be made to seat all the scholars. A room was fitted up in Adams Block, at the corner of Railroad and Alden streets, providing for about forty of the smallest scholars. This arrangement not proving permanent, as no other quarters could be secured, the school committee, with the consent of the selectmen,

put up and furnished the small school building now standing east of the town hall. Still the rooms were crowded, the number of pupils running up as high as seventy-five in the lowest grade. In 1871 eighty rods of land were bought on South Main Street, and the four-room school-house now occupied was erected and furnished at a cost of about ten thousand dollars. This relieved the pressure, furnishing accommodations sufficient to the present time. More recently the conviction gained ground that the rooms in the town hall building did not meet the modern requirements of school-rooms, and that some of them were needed for other purposes; as a result, in 1889 the town voted to erect an appropriate school building on their lot of land, situated on Central Street, lately bought for the purpose, and are now engaged in putting up a building which will accommodate the high and grammar schools, and one other school.

Until about the year 1855 there were only two sessions or terms of the schools, consisting usually of twelve weeks each. The summer term began in May, a female teacher being employed, and none but the smaller scholars attending. The principal school was in the winter term, commencing the first Monday after Thanksgiving. A male teacher was employed, and, as all the large boys and girls in the district attended, the strong qualities of the teacher were sure to be tested. Soon after the year above named, female teachers only began to be employed, and the number of weeks of schooling was increased. For many years the schools below the high school were kept thirty weeks annually, the time being divided into three equal terms. Recently, two to five weeks have been added to the length of the school year. The high school year has always been forty weeks. With the change from male to female teachers in the winter, the attendance of grown-up boys and girls in the district schools fell away. It may, however, be said that those who, under the early custom, would have attended school in the winter, but now remained at home, were few, for most of this class, about this time adopting the new fashions of living, went into the boot-shops, or, going away from home, struck out for themselves. But looking back and comparing the palmy days of the district school with those of later times, it cannot but be observed that a certain amount of sturdiness has been subtracted from the outlying districts, and its substitute for the people of those districts must be found, if at all, in the growth and culture afforded by the high school now convening in the centre of the town.

TWO TEACHERS.—It is impossible to refer to each of the long line of teachers who have toiled in this town; but going back a considerable period, a passing reference may be made to one or two who have left a specially lasting impression by virtue of their personal influence. Under the old district administration the names of L. H. Cobb and Samuel Upton

will occur to the minds of residents who have now passed middle life. Upton taught in the Centre District for two or three winters, conducting a large school with very great ability. He was at the time taking his course in Dartmouth College. He afterwards became a lawyer, and is now a judge in the highest court in New Hampshire, his native State. Cobb was also a Dartmouth student, a classmate of Upton, and preceded him in school work in Ashland. Cobb taught five winters in District No. 6, taking the school through the period of its greatest strength. There were then in that school fifty scholars, of ages varying from four to twenty-one. His administration was severe but just, and truly inspiring. So much interested in his work was he, that, in addition to his regular duties, he aided his scholars in forming a lyceum, the meetings of which were held weekly during the winter terms of several years. About everything of an intellectual order within the capacity of the scholars was planned and executed at these meetings. There was always a debate, with the regular array of disputants, after the manner of lyceums in those days. There was a "paper," upon the preparation of which much time had been spent; there was declamation, music, everything but a play. To add to the interest, other schools were invited to participate in the exercises, the final wind-up usually being a good-natured combat in spelling. At these meetings lectures were sometimes given by Cobb, Upton and others, including Sanborn Tenney, then the Park's Corner teacher, afterwards the professor in natural science. The result of all this fervor, breathing intellectual life into No. 6, was the awakening of aspirations among the youth of that district. Two of the boys at least who participated in the debates of that lyceum have, as men, made their mark: E. F. Dewing, after the war, judge of the District Court in New Orleans, and afterwards, for years, to the time of his decease, a prominent lawyer in a neighboring town, and Rev. J. E. Twitchell, D.D., for many years a successful pastor of prominent city churches, and now located in New Haven, Conn.

LIBRARIES.—The earliest known library kept for use within the territorial limits of this town was the collection of books, principally novels, purchased and owned by Ephraim Bigelow. He lived on the place occupied by the late W. D. Cole in the easterly part of the town. From about 1815 for twenty-five years people came from all directions, within a radius of five miles, to take out books, paying for their use at the rate of two cents a week. When the school library was provided for the Park's Corner District in Framingham, this collection was carried over to that point and placed in the care of George Fay, who also had charge of the school library.

About the year 1830, Matthew Metcalf, Elias Nason and Andrew Allard went to Boston together and bought one hundred and fifty volumes, paying two hundred dollars, and placed them in the counting-

room of the cotton factory for general circulation. The selection was made mostly by Mr. Nason, who was then teaching school in the village. This library was in use about ten years, when the books were sold to the families interested in them. The original contributions were from one to five dollars, and no charge was made for the use of the books. About 1840 the State had a series of books prepared under the supervision of the Board of Education, which were furnished upon payment, to those towns that desired to introduce them. These books treated upon scientific and historical subjects, and were bound in a uniform style. Fifty or more volumes were placed in each of the school-rooms in Framingham and Hopkinton and were issued to the households in the districts. Much interest was manifested in this movement, and the books were eagerly read; but no new books were added, so the interest gradually fell away. The library belonging to what is now the Centre District is supposed to have been scattered and lost. Twenty volumes, originally in the district now comprising the westerly part of the town, are still in existence and in a fair state of preservation.

Shortly before the war a few persons clubbing together bought about fifty volumes, mostly histories and biographies, and placed them in the office of the shoe-shop of C. H. Tilton, in charge of George H. Ellis as librarian. The subscribers had free use of the books; other persons were allowed to take them out upon payment of a fee. After about one year the club suspended and divided the books among the members.

In the year 1859, with money raised by subscription, the Agricultural Library (so-called from the prevailing character of the books) was purchased and put into general circulation. This was the first effort made, after the incorporation of the town, to furnish a free library. It would appear from the books of the librarian still preserved, that there were upwards of 125 volumes in this library. The principal patronage came from the farmers, but nearly all the families in town, at one time or another, appear to have taken out books. No additions were made and the books gradually disappeared. Mr. S. W. Wiggins, the librarian, at whose store the library was kept, still had in his possession at the establishment of the present Public Library, eight volumes, which he placed in that collection.

A period of twenty years now followed, in which discouraging views prevailed, and the untoward end of the Agricultural Library was cited by way of illustration, forgetting that to attain success other books than those on farming are needed, as well as frequent reinforcements by the addition of new books. But that the towns-people desired to read, if only books of the right kind could be furnished, was shown all through this period by the patronage given to private circulating libraries.

First came to town one Uriah Pollard in 1870,

bringing 500 fresh volumes, mostly novels and histories, and putting them in circulation at a charge of two cents a day. This library was kept in the store of Horace Yeaton, in a building since burned. For two or three years this venture proved profitable to the owner, as the circulation was large. The period of popularity was prolonged by the addition from time to time of a few new volumes. After the interest had fallen off the library was sold.

Next, a club of a dozen persons was formed, and fifty dollars raised, by which a small library was purchased, to be kept at the drug-store of Billings & Oxley. This movement lasted a year, at the end of which time the books were sold by auction to the subscribers.

Then followed other circulating libraries, each in turn having its day. Mrs. Franklin Moulton purchased a small library of interesting books, which she kept at her residence on Railroad Street. W. T. Hill selected about 200 volumes, mostly novels, covering and labeling them neatly, and keeping them several years at his printing-office. Still later, S. A. Davis, profiting by the example of others who had turned an honest penny in the business, placed a library of about three hundred volumes in his periodical store on Railroad Street. This, like the libraries which preceded it, was composed of popular works, and was largely patronized until the opening of the Public Library. He still retains his books and loans them as they are called for.

In parallel movement with the libraries there have been circulations of books and magazines owned by clubs, which, after having gone the rounds, would be divided or sold at auction among the members. There have been few, if any, years in the history of the town when one or more clubs of this character have not been in the field.

At least one special effort has been made to furnish the public with the free use of magazines and papers. E. P. Tenney during his pastorate with the Congregational Church, raised funds by solicitation, hired a room in the then post-office building and had it furnished for a general reading-room. This room was kept open one year, day and evening, with, however, but a small attendance of readers.

Even after the partly successful experiment with the Agricultural Library before referred to, there were those who believed that a free public library, if properly managed, could be made to succeed, and furthermore that the interests of the town demanded that an effort should be made to establish such a library. In the spring of 1871 A. S. Roe, then principal of the high school, now master of the Worcester high school, made strenuous efforts to awaken an interest in the subject; some of the citizens, at his request, met at the town hall building and discussed the question. It was thought that one thousand dollars would be needed to start a public library with prospect of success. Mr. Roe drew up a sub-

scription paper and commenced its circulation. Alvah Metcalf, Henry Cutler and a few others put down liberal sums; but when two hundred and fifty dollars had been subscribed, it was found that the limit to which the people would then go had been reached. Many persons, when approached, proved to be unwilling to contribute, giving as a reason that the time had not yet come for a public library. The town, it was said, was struggling under a large war debt, and the consequent heavy taxes, and was suffering under the general depression in values and incomes, which had overtaken the whole land at that time. So the subject was reluctantly dropped.

PUBLIC LIBRARY.—The condition of the town's finances annually improved. Year by year some part of the debt was paid. In 1880 the opinion began to be entertained that the time had come for the establishment of a free public library. It was in the spring of that year that G. T. Higley, having requested the insertion of an article upon the subject in the warrant for the annual town-meeting, made a motion at that meeting, which was carried, that such a library be established by the town under the provisions of the statute law. This proved to be a beginning. A committee, consisting of G. T. Higley, W. F. Ellis, S. S. Baker, Adrian Foote, Elias Grout and Paul Stevens, were chosen to carry this vote into effect. No action was taken till the succeeding fall. At that time the committee, having called to their aid many of the citizens, planned a series of entertainments which afterwards took place, with the effect of raising the needed funds, and at the same time awakening a general interest in the subject. In this movement the churches and other public organizations participated. All the population, exceptions, if any, being very few, took an active personal interest. The funds obtained from entertainments were more than doubled by cash subscriptions, which immediately followed, the whole secured sum amounting to nearly one thousand dollars. With this eight hundred volumes were purchased, which became at once a working nucleus. The town voted to assign the dog tax to the library, and this, with two hundred dollars appropriated annually to the present time, has now served to collect a library of nearly three thousand volumes. The selections of books have been made by the trustees, principally through their secretary, who has made it a strict duty to study the subject. Books that have become standard are easily found. To acquire a knowledge of new books, the notices which appear in the literary columns of the papers and in periodicals devoted to the subject are studied, and from notes taken the purchasing lists are made. Books asked for by persons using the library, especially by teachers and students, are bought if no valid reason exists for excluding them. This process of selection has been found to work satisfactorily, as only the best books and those that are wanted are admitted. All ages, and classes, and dwellers in all parts of the town use the library.

In it the schools find aid in their work, special privileges being granted in the use of the books to teachers and students. A board of six trustees chosen by the town, one-third annually, conduct the library. A printed catalogue has been prepared for home use, supplementary slips being added after each new purchase. Although the books are freely entrusted to the care of young persons to be taken to their homes, after nine years' constant use, not half a dozen volumes have been lost, or were unaccounted for at the last annual examination of the library. The system in use, of fines, of charging upon personal cards, and of requiring each applicant for a book to fill out a slip to be left with the librarian, absolutely protects the library from all loss or damage, except the ordinary wear and tear.

Hitherto the library has occupied one of the ante-rooms in the town hall building. At the last meeting of the town a vote was passed to move it into one of the large rooms on the first floor of this building, where it is intended also to fit up a public reading-room.

MILLS, WATERS, ETC.—At the time the town was established, most of its business was done in the mills located upon the river. First in order of importance was the four-story frame mill of the Middlesex Union Factory Company, in which cotton-cloth was manufactured. This mill, which stood upon the present site of the Dwight Printing Company's machine-shop, at the corner of Main and Myrtle Streets, had been built some thirty years before by a corporation called the Middlesex Manufacturing Company. In 1827 certain Boston parties had bought the property, and one year later had become incorporated under the name first mentioned.

James Jackson, who had had experience in a mill in Sutton, had come to this place about 1825. He was appointed resident manager of the new company, and had remained in this office to the time our narrative commences, in 1846. At this time a small building stood near the east end of the factory, occupied for counting-room by the company, and for a store. "Long Block," then glorying in three times its present length, was across the street, filled with tenants, operatives in the factory. The "Boarding-House," standing at the head of the street, vacated about six years before by Mr. Jackson himself, was now occupied, as its name imports, as a home for the unmarried employees. The small houses farther to the west were filled with factory tenants. Since Mr. Jackson's advent the enterprise had prospered. By buying stock from time to time, he had, in 1846, become substantially the owner of the property. At this time the mill was still running at its full capacity, turning out products valued at \$65,000 annually; but owing to competition and other causes, later the business became unprofitable, and was closed, Mr. Jackson retiring. The factory was never again started; in 1854 it was burned to the ground. Thus came to an end the

business enterprise which had given birth and prosperity to the village of Unionville, and had definitely led up to the establishment of the town.

The counting-room building survived the fire, and, after being used for some years as a store, was moved away; nothing of the factory remained except the large wooden undershot water-wheel, which for many years afterwards was allowed to revolve, at first, presumably, to keep it from rotting, but finally, as we small boys concluded, solely for amusement. Close upon the dam stood the grist-mill then as now, only that the farmer who then brought his corn to grind, was never sure of having his grist ready when he wanted it, as the factory took what it needed of the water first; if any was left the grist-mill had it. But the failure of the factory brought revenge to the grist-mill, which ever since has had its own way. In the spring of 1868 the Boston Flax-Mills bought the property, and proceeded to erect the frame building, known as the machine-shop, now standing at the corner of Main and Myrtle streets, intending to occupy it for the manufacture of linen goods. Before the works were completed, in the fall of that year, the whole property was sold to the Dwight Printing Company.

The Dwight Printing Company was organized as a corporation under Massachusetts laws in 1868, with a capital of \$300,000. There were originally three stockholders,—William Dwight, Jordan, Marsh & Company, and Francis Skinner & Company. Subsequently Jordan, Marsh & Company bought out the other stockholders, thus becoming sole owners of the three hundred shares of stock. Still later the individual members of this partnership succeeded to the ownership of the stock, and are now its sole owners. The Dwight Printing Company first bought of the Boston Flax Mills, about six acres of land, which comprised the original plant of the Middlesex Union Factory Company. This conveyance covered the factory and grist-mill water privileges, and the lands below the dam, including the canal, which had been formerly used in connection with them. Other conveyances to the company followed, by which title was obtained to 125 acres of additional lands along the northerly banks of the river and the north shore of the Mill Pond.

The purpose of this company was to establish an extensive business in bleaching, dyeing and printing cotton cloths.

Immediately after its organization the company prepared plans for a series of extensive buildings, such as would be needed in their business. Within the next two years seven large granite buildings, intended to be covered with mansard roofs, were begun and carried forward, four of them to completion. A machine-shop already built was furnished, utilizing the water-power. At the same time a new street was cut through the company's land on the north side of the river, and ten double houses were erected for the

use of employees. Including houses standing upon the lands purchased by the company, tenements for forty families were provided. The company's buildings were erected under the supervision of Gen. William Dwight, Jr., who came to Ashland and remained during the process of erection. Richard M. Ross was chief mechanic, and Adrian Foote was put in general charge of the company's property, taking up his residence in town and remaining to the present time. The effect of the sudden entrance of this company into town and its conspicuous building operations was to raise the price of real estate, and cause other new business to start up. New stores were opened, houses were built. Land which before had been held only for agricultural purposes, was surveyed and put upon the market for building lots. Workingmen who had saved a few hundred dollars, thought the time had come for them to secure homes; so buying thirty or forty rods of land, they built houses, raising by mortgage the balance of funds needed to complete them. Those were times of general inflation; the cost of labor and materials was high; consequently their houses, when completed, represented high values. The mortgages placed upon them were sometimes larger than the whole cost of similar premises fifteen years later, or before the war.

The company had only partly erected their buildings, when it began to be rumored that the city of Boston was in search of a further water supply, and had its eye upon the Sudbury River. This at once put an entirely new complexion upon the prospective value of this enterprise. If the water of the river was to be taken for domestic use, it was clear that the proposed business of the company could not be carried on, as products from the dyeing processes must necessarily go into the water and pollute it. It was therefore decided to cease work upon the buildings until the water question should be finally determined.

This action of the company in suspending all operations came disastrously upon the town. The prospects predicated upon the increase of business which would be caused by the carrying on of the company's operations, came to an end, causing general disappointment. Houses and other buildings became vacant, and the values in real estate fell away.

In 1872 the city of Boston obtained from the Legislature an act which condemned finally to their use the waters of the Sudbury River and its tributaries. From this time it was manifest that the company's buildings could never be occupied as at first intended. The question now was for what purposes, and to what extent could they be used. To determine this question, a suit was brought against the city of Boston, in 1876, in the nature of a claim for damages for injury to the company's water rights. The questions of law involved were carried up to the Supreme Judicial Court, and the decision, drawn up by Justice

Ames, reported in Volume 122, of the Massachusetts reports, page 585, finds that while riparian proprietors "retain all their common law rights in the river, so far as they are not inconsistent with the use defined in the statute," the petitioner had acquired no right by express grant or prescription "to befool the water, or render it unfit for drinking purposes," and was not entitled to damages. This was equivalent to deciding that the water of the river could still be used for "domestic purposes, for watering cattle in it, for cutting ice," and also for mechanical power if not attended with pollution.

Since that time the property has awaited a purchaser; \$500,000 have been expended in land and buildings, the latter containing 175,000 feet of floor room. A spur track from the Boston and Albany Railroad brings freight and coal to the doors of the buildings, affording the best of facilities for handling goods. The plant has been kept in good condition, and will some day doubtless be put to a profitable use.

The Dwight Printing Company also owns the "Bigelow Paper-Mill property," including about nine acres of land, a wide flowage, and valuable water rights situated on Sudbury River about one and a half miles west of Ashland Village.

A. D. Warren, a thread manufacturer of Worcester, in the latter part of 1879, came to Ashland, and leasing for a term of years one of the Dwight Printing Company's buildings, fitted up a factory for the manufacture of spool cotton.

After the mill had been running but a short time, in January, 1880, a corporation was organized under the name of the Warren Thread Company, with a capital of twenty-five thousand dollars. All the stock was immediately bought by Eben D. Jordan, James C. Jordan, Eben D. Jordan, Jr., and Adrian Foote, who from that time to the present have remained the sole owners of the stock. Eben D. Jordan was chosen president, and Adrian Foote treasurer. This mill takes cotton yarn as it comes from various factories in New England and twists it into thread. The thread, which is of many sizes and colors, is wound upon spools, and after being marked according to quality and to suit customers, is shipped to all parts of the United States. About seventy-five hands are employed at the mill, who have work the year round. The value of the annual product is about three hundred thousand dollars.

The next concern of importance was the paper-mill of Calvin Shepard & Son. The "son" was Calvin Shepard, Jr., who, at his father's death, succeeded to the property and business. The mill stood half a mile east of the village, at the junction of Fountain and Union Streets, just west of the iron bridge. The paper, which was for newspaper supplies, was at first made by hand. Afterwards water-power was used, and finally steam and water-power combined. The water to carry the mill was taken out of the river

just above the dam recently removed, at a point about seventy feet southwest from the bridge, and was carried directly across Union Street to the north. The raceway has been filled with earth, though its southerly end can yet be traced. The old site of the mill has been entirely obliterated by the Boston Water Board in leveling the ground upon the bank of their water-basin. The first mill was burnt down in 1842, and was immediately rebuilt on a larger scale. Shepard employed twenty to twenty-five hands. He turned out an annual product of about \$30,000. His business, at first successful, owing to competition and other causes, at length became unremunerative, and was closed about 1850. For a year or two after that date he attempted the manufacture of combs, but did not succeed in making this new business profitable. The property was now sold to Lee Claflin, and Shepard moved to Taunton. In 1857 he took up his residence in Boston, serving most of the time for thirty years afterward as visitor for the Overseers of the Poor and Provident Association. He was one of the most prominent men in the early history of the town. He is now residing in Edgartown much enfeebled with age.

Charles Alden bought the Shepard Paper-Mill property of Lee Claflin, of Hopkinton, about 1855. He introduced machines to pulverize quartz and other minerals. Just before the war he had succeeded in obtaining a monopoly of the emery manufacture, having the sole right to import the Smyrna stone, the only stone then supposed to be available. The war coming on, the call for emery to be used in polishing and for other purposes was enormously increased, and Alden, having the facilities for its manufacture, turned his whole attention to that business. During the war his business was thriving and remunerative, and he acquired property. Later there was still a market for emery, as it came more to be used in the arts, but on account of others engaging in its manufacture and other sources for the supply of stone being found, a competition in the business arose, which greatly reduced the profits of its manufacture.

In 1863 Alden changed the form of the business ownership, which had already become a partnership, to that of a corporation, under the name of the Washington Mills Emery Manufacturing Company, himself, at first, holding a majority of the stock. This company became owner of the property, and continued to carry on the business at that point until the city of Boston bought its real estate and water rights. Shortly before the expiration of the time allowed the company to remove their buildings, they were consumed by fire, the insurance being recovered only after a protracted lawsuit. The company then removed its business to New England Village, now North Grafton.

In about 1870, Alden, having disposed of his interest in the emery manufacturing business, built a mill on the west side of Union Street, just north of

the iron bridge, for the manufacture of emery-wheels. A stock company was formed for this purpose, under the name of the Vitriified Wheel and Emery Company, with Alden as first manager. This company carried on its business till bought out by the city of Boston, after which the building was taken down and removed.

After Alden withdrew from this last-named company he built an emery-mill on the spur track at the Cutler Mills; but had hardly begun business when the city of Boston also absorbed this concern, removing the buildings. This closed the business enterprises of Alden in Ashland.

Very marked results accompanied the success of his early emery business. He purchased a large tract of land of Benjamin Homer, in 1866, and about the same time smaller tracts from the heirs of John Stone and others, and commenced building houses. His operations were mostly in the neighborhood of Homer Avenue and the street which bears his name. Nearly all the houses on these streets were built by him or with the aid of his money. To any reputable person who would buy from him a house-not he would furnish means for erecting the house, taking back a mortgage to secure the money loaned. The registry in which Ashland real estate conveyances are recorded contains evidence of a large number of deeds given by Alden between the years 1867 and 1873. His share in the work of building the Methodist Church is referred to in the account given of that church.

In 1879 Alden removed from town, engaging in other enterprises till nearly the time of his death, which occurred in 1888. His funeral was attended at the Methodist Church, in Ashland, and his remains were buried in Wildwood Cemetery, the land for which was bought of himself, and which, as one of the board of town trustees, he had helped to lay out and beautify.

About a mile below the Shepard Paper-Mill stood the Cutler Mills. At this point the water-power early employed in connection with the iron foundry of Gilbert Marshall and Richard Sears was used by Sears to run the saw-mill built by him, and from 1818 to carry also the grist-mill erected by Calvin Bigelow, the owner at that date of the water privilege. Subsequently the property, passing successively through the hands of James Whittemore and William Greenwood, finally came into possession of S. N. Cutler. The grist-mill stood at the northerly extremity of the dam, was a one and one-half story building, and was painted in the old-time Venetian red. At the southerly end of the dam was the saw-mill, with its up-and-down saw and all the openers to the weather, for which such mills of old were famous. This mill was also rigged with a set of stones for the grinding of gypsum into flour, or "plaster," as it was called, which in those days was used by farmers to sow upon old pasture lands, and to put in their po-

tato-hills as a fertilizer. The farmers brought their corn to the mill for grinding, and the miller took a toll of two quarts for each bushel ground. In the winter logs were brought to the mill-yard on sleds, and later in the season the boards or planks into which they had been sawed were carried away. All these processes were carried on leisurely, much to the comfort of the patrons of the mill, who, while their grist was being prepared, learned the news from the miller. Cutler at first continued the operating of these mills in the old way, but later he began buying corn, and, after grinding it into meal, selling to the stores. His new business grew rapidly, one or more of his sons were admitted into partnership, and the name of the firm now became S. N. Cutler & Son. They bought their corn by large quantities in the West, and became heavy patrons of the railroads, thus inducing the Boston & Albany Railroad Company to build a spur track for their benefit. A large and convenient mill furnished with elevators and other apparatus, was erected on the side of the stream next to the track. This mill was wholly burned in the fall of 1867, but the next spring it had been replaced and was running. Thus by energy an extensive and valuable business was established, which was continued till the removal of the firm in 1876. At this time the city of Boston bought the whole property, and subsequently took down the building, so that now no trace remains. The original site of the old red mill is now many feet under water in "Basin 2," of the city's system of water supply, on the Sudbury River. A little to the west of where the highway formerly passed under the railroad the bed of the spur track may still be traced, but the site of the principal mill has been dug over and is lost in the graded bank, or lies partly covered by water.

One mile west of the village, on the Sudbury River, is located the box-mill of Alvah Metcalf. The dam and the original building were erected about 1835 by John Cloyes, for the manufacture of sash and blinds. Very early a set of stones was put in for grinding corn. In 1844 Cloyes sold to Daniel White, who one year later conveyed to Henry Brown. In 1847 H. F. Goodale, of Marlborough, became owner. As a tenant under Goodale, Micah B. Priest, also of Marlborough, manufactured boxes used in casing boots shoes and bonnets. Metcalf bought the property of Goodale in 1860, and continued the business, gradually increasing it. In 1870 the mill proving too small for the amount of business to be done, was pulled down, and the present commodious building erected. To supplement the water-power, not always sufficient in summer, steam was provided. The stones for grinding corn were left out of the new mill. Two years ago a stone dam was built, so that now the mill has superior facilities for turning out boot-boxes. About two million feet of boards are made into boxes annually. The careful supervision and personal labor of the owner have built up this successful business.

Half a mile farther west are the remains of the Bigelow Paper-Mill dam. This was once the site of a flourishing business in the manufacture of a fine quality of hand-made paper. The original owners were John, David and Perkins Bigelow, and Gardner Wilder (2d.) They bought land lying upon the stream in 1817, and in that or the following year, built the dam and mill. Shortly before the establishment of the town, the last of the Bigelows had withdrawn from the business. David Bigelow, who maintained his hold longest, resided in Framingham Centre, and rode daily to his mill. There are still remaining traditions of the personal beauty and superior social influence of the women belonging to the Bigelow families. About 1846 Hon. Isaac Amés, judge of Suffolk Probate Court, for himself or as attorney for Hazen Morse, was interested in this mill. Silas Warren, Samuel Whitney and probably others were connected with it, and engaged, after the town was organized, in the manufacture of wall-paper. Samuel Whitney used to tell how, when he once found himself short of materials, he went into his potato-field and gathering the vines and weeds, ground them up and made them into pulp, thus saving fifty dollars in the way of stock. But the business was at length closed and the property remained idle. The mill was burned about 1866.

After this property had ceased to be used it passed successively, by deeds, to John Clark, 1864; E. P. Dewing, 1865, and to Thomas Corey in 1868. In 1869 the Dwight Printing Company bought the land, water privilege and rights of flowing, and are now the owners. The dam had been maintained until very recently, but now the middle part has been washed away.

Still farther west on the river, near the town limits, on the site of the "Old Forge," are located the Chattanooga Woolen-Mills, owned and operated by Taft & Aldrich. At this point there is a dam and a fall of about twenty-five feet, with two wooden water-wheels of one hundred and sixty horsepower. About the time of the incorporation of the town, W. B. and A. J. Wood, the owners, built a paper-mill, which, for several years, was run by Isaac Ames. In 1863 David Fales & Company started up the works, manufacturing satinet and woolen goods. They carried on the business for about eight years, after which the mill was left idle. In 1873 the Woods sold the whole property to C. and C. T. Aldrich, who enlarged the mill and put in steam-power, to be used when the water was low. In 1876 Charles Aldrich sold his interest to L. H. Taft, of Uxbridge, who, six years later, sold to his father, Moses Taft. The present firm is composed of Moses Taft and Charles T. Aldrich, the latter residing upon the premises and conducting the mill. Taft & Aldrich employ about seventy-five hands. Since Aldrich came, a village has grown up at this point, which is called Chattanooga, and a school-house has been built in the neighborhood.

On Cold Spring Brook, about three miles from its junction with Sudbury River, there was formerly a saw-mill and grist-mill, which in early times were in operation when the water in the brook was sufficient to run them. After the incorporation of the town S. N. Cutler & Company appear to have had an interest in the property. But the mill was many years ago abandoned, and the privilege is now lost in the flowage of "Dam 4" of the Boston water supply.

On a small brook which empties into Waushakum Pond, at the place late of W. D. Cole, for many years prior to 1850, stood a shop owned by James Bigelow. Here was a small water-power which Bigelow employed to run a turning-lathe and a saw rigged for wheelwright work. Bigelow could make anything, from a clock to an ox-cart. While engaged in rimming out a gun-barrel at his lathe, an end of his neckerchief caught on the shaft of the rimmer, which, winding round quickly, before he could become disengaged, caused his death.

There are no great ponds within the town limits, excepting a portion of Waushakum. The Framingham boundary line, which crosses this pond, leaves in Ashland, perhaps, a little less than a quarter part. This part of the pond affords the best fishing. Here, until about twenty years ago, sportsmen caught good strings of perch and horned-pout in the summer, and pickerel through the ice in the winter. But since the pond has been "improved," by the cultivation of black bass, no fisherman has any luck.

The Ashland waters, once a principal source of pecuniary benefit, the town can no longer call its own. Of the six once flourishing mills that stood upon the banks of the Sudbury, only two remain, and these no doubt are doomed. In 1872 the City of Boston obtained from the Legislature an act conferring the right to take the waters of the river and all its tributaries for the purpose of acquiring an additional water supply. As rapidly as its plans could be formed, the city proceeded to obtain, by purchase or seizure, all the business property upon the river east of the village, and cleared off completely the banks of the stream in this section. It placed an embargo upon the valuable water-power in the centre, without offering the owners any compensation. The two remaining privileges west of the village it has so far permitted the owners to use, but always in the face of uncertainties as to how long or in what manner they may be allowed to use them. With the exception of the small amount of water required to keep up the flowage of the stream, and the amounts that may be necessary for extinguishing fires, for domestic purposes, and for generating steam in the towns bordering on the river, all the waters of the Sudbury and its tributaries above a certain point in the town of Framingham have been presented as a gift by the Legislature to the city of Boston, reserving only to immediate owners the right to

sell their interest therein for such price as they may be able to get, or to recover compensation for property taken only by the vexatious process of law. The city of Boston, in accordance with the provisions of this act and the rules of law, has paid the price for lands bought and has satisfied the judgments obtained for lands and rights seized in the cases of those who by law were entitled to recover and who have brought suits. But the large indirect damage to the town, in the destruction of its business and taxable property, has not been paid, nor is it by law recoverable. The many and valuable rights of private owners to drain into the river and its tributaries, seized by the city, have not been paid for, and the right to obtain compensation is now irrecoverably lost, because the owners had received no actual notice of the seizure and did not bring their action for damages within the time allotted by statute. Under the guise of general legislation, the city of Boston has obtained the passage of punitive laws, restricting the rights of land-owners in the free use of their property and widely enlarging the sphere of the law of nuisance. The agents of the Boston Water Board have continually annoyed the owners of lands lying upon the banks of the river and the in-flowing brooks, by coming uninvited upon their premises for the purpose of discovering sources of pollution to the water, and by issuing orders for removal of such causes of pollution without first having procured any authoritative determination of what is a pollution of their water supply.

"Dam 2," of the Sudbury water system, which was built about 1878, in the town of Framingham, flowed the river to the Shepard Dam. The city of Boston built an iron bridge just below this point, and also a bridge below the site of the Cutler Mills, and, by laying out and building such parts as were necessary, opened two good roads to Park's Corner, in place of the one old road, in part submerged, which formerly crossed the river at the Cutler Mills.

Less than a mile up Cold Spring Brook the city, in about 1885, built a dam nearly half a mile long, for storing water on this brook. The lands covered by this basin were obtained from the owners by purchase, the deeds conveying full title. In 1890 the city of Boston began the dam on Indian Brook, having obtained title to the lands proposed to be covered partly by purchase and partly by seizure.

The agents of the Boston Water Board have forbidden fishing upon the ice in their basins in the winter, though no prosecutions for that offence have yet been made. All persons are prohibited from bathing in the Sudbury or its tributaries.

In 1888 an act was passed by the Legislature forbidding bathing in the Waushakum Pond, as the Sherborn prison takes water from that source; but this act seems to be strictly confined to the waters of the pond; therefore, it is suggested that Ashland boys may learn to swim in the Bigelow Pond, on the affluent brook, a mile to the southwest.

BOOT AND SHOE BUSINESS.—In the early years of the town the work of making shoes was not all done as it now is—in the factory—nor was the business all carried on by a few large concerns. There were small manufacturers, who would buy a few sides of leather in Boston, cut and make them into shoes in their shops in the country, and then return to the city, selling the products of their own labor. In those days there was no difficulty in finding a market for such goods at paying prices. Men, who, in the end, became large manufacturers, frequently began in this way, acquiring a practical knowledge of every part of the business, from the selecting of the stock, through the processes of manufacture, to the final disposition of the goods in the market. This manufacturing in a small way was then common, and was often taken up by men, who, for the time being, happened to have no other employment. In this way, too, work could be afforded for a whole family, as there would be some part that each member could assist in doing.

When the small shop began to enlarge and furnish work for persons outside of the family, the business was carried on in a way quite unlike the present. In 1846, and for a few years afterwards, there were no large gatherings of workmen in the shops of the manufacturers; all the work, except the cutting of the leather, was done away from the shop. The shoemaker would come, often from a neighboring town, with his team, and take out stock enough to keep him in work for a week or more. Quite far back, when shoes, rather than boots, were made in this section, the workman would take the leather just as it came from the hands of the cutter, who did his work without the aid of machinery. Going home with the stock, his wife would bind and close the shoes, while he did the bottoming. His boys would be taught while young to peg, and, later, to last, and, still later, before they had reached the age of twenty-one years, they would acquire skill in fitting and trimming, thus becoming expert in all the parts of the bottoming process. There were many farmers who worked on shoes in the winter, when they had nothing else to do; and, generally, the work of the shoemaker could be taken up and laid down to suit circumstances.

Where the manufacture of boots was carried on, the crimping, closing and treeing, though at first done by the workmen at their own houses, was at length confined to the shop of the manufacturer. Slowly machines were invented for doing the work at the factory; but for a long time the bottoming was performed wholly by hand, and at the homes of the workmen. Finally, upon the introduction of the pegging machine, the bottomer was obliged to go where this was set up, as such machines cost too much for him to buy. The invention of other machines soon following, the employment of steam-power at the factory to run them finally required the assembling of all the workmen at that place. Now within

the last twenty years the little shops, which so commonly stood by the houses of the workmen and were used by them, have been abandoned, and the comparatively free life of the shoemaker of thirty years ago has been exchanged for the routine work of the factory operative. Wages may have increased, and a better average living been gained, but the former freedom of the individual has been partly lost in the changed methods of doing work and especially in the surrender of rights to associations which have been established for the protection of the workman.

As the manufacture of boots and shoes has been and still is the principal business in this town it will be proper to give a somewhat full account of this business, beginning at the time the town was incorporated and tracing the history of the different shops.

Calvin Dyer in 1846 was occupying for his boot-shop the building on Main Street, which is now the stable of Mrs. John Phipps. He had a few years before erected both the house and shop standing at this point. At an earlier date he had manufactured in the Mitchell and Bryant shop, to be spoken of later. He was very active in getting the town set off. He remained, however, only a year after that event, moving his family to Worcester, himself accepting employment as passenger conductor on the Boston and Worcester Railroad.

Daniel Morey followed Dyer in this shop, but did not continue long in the business. The buildings had been mortgaged to Lee Clafin, and the mortgage was now foreclosed.

In 1852 Simpson Jones bought these premises of Clafin, and moved in from the Broad barn, where he had started a few months before. The boots manufactured by him were sold by Whitney & Hines, of Boston, on commission. Later he manufactured for Lee Clafin. In about 1860 the shop which stood at the corner of Union and Main streets, on land now owned by John Connor, had been vacated by William Wheelock, and as this was a larger and more convenient building, Jones now occupied it, turning his former shop into a stable. About this time he became a partner in the firm of Newhall & Company, of Boston, he receiving the stock and making up the boots, while the Boston partners attended to the buying and selling. This substantial business was continued till his death, in 1865.

William Wheelock came from Mendon in 1857. John Clark built for him a shop at the junction of Union and Main Streets, upon the Connor land, then owned by Clark. Wheelock, as a partner in the firm of Severance & Wheelock, at once began manufacturing boots in this building. This business lasted but a year or two. Wheelock then bought the land where now the Newhall shop is located, and moving there a small building from Hayden Row, made of this a nucleus about which a larger shop was built. As a partner in the firm of Boyd, Brigham & Wheelock, he here attended to the manufacture of shoes till

about 1871, when his health failing, he was obliged to cease doing business. He died with consumption two years later. Wheelock introduced into his shop a caloric engine, which in that day was in these parts considered a novelty.

H. Newhall & Company, of Boston, bought this shop of Wheelock and carried on the business until 1882. They enlarged the building and put in steam-power. The factory was first in charge of Samuel Seaver until his death, in 1876. For the next four or five years C. M. Adams was superintendent, and during the last year a Mr. Godfrey, from Milford. The firm finally transferred its business to their shop in Woodville, giving as a reason that they could manufacture there at a lower figure. The building has since remained unoccupied.

In May, 1846, the boot-shop of Edwin A. Forbush, which stood on the south side of Union Street, at what is now the Neff place, was totally burned. This shop was never rebuilt.

Forbush after the fire, for a few months, did business in a part of the antiquated "Stone" house, which then stood on the opposite side of the street. He next formed a partnership with William Seaver, and for about two years they manufactured boots in the Seaver shop, to be referred to later. They also played checkers very late of nights, if tradition may be trusted, both being experts in the game and quite equally matched. In 1849 Forbush bought one of the "Sullivan" houses and erected a boot-shop within the yard of the enclosure. It has always been supposed that this building was located very near, indeed, to the west line of the lot, as there was a sharp controversy in words about the rights of the respective owners, echoes of which have not yet wholly died away.

Forbush, after dissolving connection with Seaver, for a short time manufactured boots in his new shop. About this time he invented a machine for siding boots. He got Lee Clafin interested, and by his aid fitted up a foundry for the manufacture of machines in one of the Shepard Paper-Mill buildings, which were now owned by Clafin. After experimenting here at a cost of \$40,000, Clafin having tired of the venture, Forbush took his machine to Lawrence and there had castings made. Afterwards a Milford concern became interested, but at this point Forbush abandoned the enterprise, and nothing more was done to bring the machine into use. The model was burned in the Boston fire of 1872. It is said that at one time Forbush was offered one hundred thousand dollars for his invention. When Forbush returned to Ashland, as Thayer and Wiggins were manufacturing boots in his shop, he formed a partnership with P. Ware, Jr., and commenced on shoes in Leland's Block, of which building some account will be given later. The business was continued, either in this or his own shop, until after the coming on of the war. A sewed shoe was made by this firm for army use.

Later, skins in the shape of the ordinary buffalo robe were cut into uppers and made by them into moccasins, the fur side in. After dissolving partnership with Ware he continued in business alone, still making moccasins; now working for Wilson, Corey & Company. After North Carolina was opened at the close of the war he went to Winston, in that State, and leased a plantation for a term of years. He also opened a store in Winston. Meantime his shop in Ashland was occupied by his son, P. W. Forbush, who for about two years manufactured shoes, which were sold by P. Ware in Boston. E. A. Forbush returned to Ashland in 1869, and after running his shop one year, ceased work on account of failure of health. Ten months later he died.

George S. Downs, during the sickness of Forbush, carried on the business as his agent. After his death Downs began business for himself, manufacturing shoes for Potter, White & Bailey. This business was continued for several years, until receiving an offer of a lucrative position as superintendent of the shoe-shop in the State Prison, he moved away. That was the end of this boot-shop as such. About ten years ago this building was converted into a tenement-house. Forbush was an active, public-spirited man; he was frequently elected to town office, for many years was chosen moderator of the town-meetings, and was a leading member in the Baptist Church.

William Seaver came to Ashland from Hopkinton about 1840. In 1846 he was manufacturing boots in the first shop built and occupied by him, the same building now standing on Front Street next to the hardware store of Perry & Enslin, and occupied as a dwelling. Seaver also built and occupied till his death the dwelling-house standing next door west. After the dissolution of the partnership with E. A. Forbush, spoken of above, he continued the business alone in the same building. About 1852, in this building, George W. Jones was interested with him as a partner for about three years. Later, Seaver moved into a shop across the street, standing on the present site of the barn of A. Greenwood & Son. After a time his sons, George and Henry, were admitted into partnership. They manufactured mostly small boots of cheap grade. In about 1863 Seaver accomplished some real estate exchanges, and as a result became owner of the whole land now covered by the Greenwood coal shed and Blake's building. He then sold off the small buildings that occupied the ground, to be taken away and converted into dwelling-houses, and moved upon the spot now covered by Blake's building, a shop of about the same size, which had stood at the junction of Main and Union streets, and had been formerly occupied successively by Wheelock & Jones as before related. He sold to Blake and Balcorn the easterly part of the lot, and they erected a building of similar dimensions to his own, leaving between the two buildings a clear space of forty-eight feet. Here he and his sons, under the firm-

name of Seaver & Sons, carried on the business till 1872, when the Boston fire destroyed a large amount of goods belonging to them, and upon which the insurance proved almost worthless, owing to the failure of the companies carrying the risk. This fire was the cause of finally closing his business as a boot manufacturer. For many years afterward he was engaged in the business of undertaker, keeping goods for sale and personally conducting funerals. He died in 1888, after a somewhat prolonged illness. From the first he was a prominent man in town affairs, holding various town offices. He was a deacon of the Congregational Church, almost covering its whole history. As a justice of the peace, he tried civil causes, while justices still had jurisdiction. Earlier, criminal cases also were tried before him. His judgment was often sought in matters having a legal bearing.

Hiram Temple came to town about the time of its organization, and commenced manufacturing boots in the second story of the passenger station, which then stood on the north side of the track near the Main Street crossing. Temple seems to have succeeded to the business of Montgomery Bixby. While in this building George F. Seaver joined Temple, first as an employee, later becoming a partner in the business. When the Baptist Society, moving into their new church, abandoned their chapel on Front Street, Temple bought and fitted this building for a boot shop and store. George Brewster was put in charge of the store, which occupied the front part, while the boot business was carried on in the remaining portions. After two or three years a fire totally consumed the building. Temple then erected a building on the south side of Railroad Street, near where now stands the store of Mrs. McPartlin, which, in connection with his partner, Seaver, he occupied for the boot business. In a short time, selling out to his partner, he moved to Marlborough where he still resides.

Seaver soon left this location and started business at Park's Corner. Returning after about a year, he joined his father in the partnership spoken of above. After the dissolution of this business connection, about the time of the Boston fire, he manufactured boots as a partner with one Thompson in a building owned by Ezra Morse, situated near Morse's lumberyard on Front Street. Within a year or two a fire occurred, by which this building was consumed. Seaver, then going West, closed his business connection with this town. In 1888 he died in Chicago. He served as town clerk for several years.

Albert Leland came from Holliston and set up the manufacturing of boots shortly before the establishment of the town; his first shop, now known as the "Light-House," and situated near Cold Spring Brook, on Main Street, was located in the rear of the Grout & Enslin Grocery. From this building he moved into Broad's barn, where he was manufacturing about 1849,

when it was burned. In 1850 he erected the building now owned by Mrs. Ann Manning, situated on Summer Street. Here he manufactured boots in the rear, while he kept store in the front part of the building. S. F. Woodbury became a partner with him in the store business in 1852. In 1853 he and Woodbury bought the corner lot on the opposite side of Summer Street, extending from Main Street to what is now the market of A. W. Eames. The southerly part of the land was sold to Charles Wenzell. Upon the front part Leland & Woodbury erected the building since known as Leland Block, or Central Block. The first building was begun in 1853, and the work had proceeded as far as the roof-boards, when a violent wind blew down the whole structure. Some defect in the foundation contributed to its fall. It is said that there was scarcely a whole timber left in the mass of ruins.

With the aid of contributions from citizens who sympathized with them in their misfortune, funds were secured again to set up the building, which was now carried to completion. In 1858 Woodbury conveyed his interest to Leland. The building, as first erected, stood too high for convenience, so it was lowered some six feet, to its present level. The shingled roof was afterwards covered with slates, and the homely columns, which for many years stood at the front, were removed. In this form, substantially, the building stood till June, 1889, when, catching fire from the blazing livery-stable of W. A. Scott, the high-pitched roof was burned off. Later in this year, B. C. Hathaway, of Westborough, became owner, and added to the attractiveness of the building by putting on the present flat roof, and otherwise changing the external appearance.

Albert Leland moved into this building about 1854, and afterward carried on the manufacture of boots, for the most part alone, till about 1870, when the second and third stories of the building were changed into tenement dwellings, and the two floors in the roof into halls and bed-rooms. About 1857 Leland rented all of the building, which had before been occupied for manufacturing boots, to P. Ware, Jr., who, with E. A. Forbush, manufactured shoes for some two or three years. When this firm moved out, Leland again took up the boot business, taking into partnership George B. Cole, his son-in-law. The building was now divided up, several concerns occupying different floors and carrying on business at the same time. In 1864, besides Leland & Cole, Blake & Balcom were occupying.

In 1866, Leland & Cole having dissolved, were running separately on different floors, and on a third floor C. M. Adams was doing business. Nearly all the time in connection with the making of boots, Leland had carried on a store chiefly with others, of which some account will be given later. He was a man of solid proportions, physically and mentally, and by his enterprise accumulated a snug property,

part of which he left to his favorite church, the Baptist. He died in 1877.

George B. Cole was at first in partnership with Albert Leland, and later was doing business for himself in Central Block, as has been stated above. In 1868, when Blake & Balcom vacated the Clark shop, now standing on the east side of Main Street, a little south of Union Street, Cole began occupying and afterward bought it in 1872. In the same year he built the house next beyond, where he resided for a time. In this shop he continued the manufacture of boots, either alone, or in connection with his brother S. Augustus Cole, until 1876. In that year, while returning from the Centennial Exhibition at Philadelphia, he took a violent cold, which shortly afterwards resulted in his death, he not having yet reached middle age. He was an active, courteous man, who took an interest in the affairs of the town, and of the Baptist Church, of which he was a member.

Shortly before 1850, Sylvester Hartshorn and Abraham Tilton formed a partnership, under the name of Hartshorn & Tilton, and fitted up for a shop, the old William Greenwood blacksmith building, which stood on Cherry Street, a few feet south of the present dwelling of A. T. Jones. This firm manufactured boots for only a year or two, and then dissolved.

Abraham Tilton went on with the business in connection with Charles H. Tilton two years longer. Abraham had before manufactured boots at the place of his former residence in the westerly part of the town. About 1853 he built a shop near his house on Pleasant Street, in which he manufactured boots some eight or ten years. After his death the shop was altered into dwelling-house tenements.

Charles H. Tilton, in 1853, bought a lot of land on the bank of what is now the Dwight Printing Company's Canal, at a point opposite Dea. Perry's house, and built a frame shop about 23 by 28 feet. In that building he commenced the manufacture of boots, which was continued by him at this place three years, after which this building was moved a short distance up Pleasant Street, and converted into a dwelling-house. In 1856 he purchased a quarter of an acre of land on the south side of Pleasant Street, where his present shop stands, and erected a two-story building of moderate dimensions, here entering upon business on a larger scale. The war coming on, he engaged in making army shoes. Larger quarters were now called for. In 1862 one hundred feet were added to the buildings. The processes of making shoes were now rapidly changing. Machinery was added year after year, Tilton being always ready to try any new machine that promised success. Steam-power, being required to run the machinery, was next introduced. All parts of the manufacturing were now done in the factory, very little of the bottoming even after this time being put out, and a few years later none at all. The work was principally upon boots of medium

weight, for which a market was found throughout the country, and especially in the West. The name of the maker was stamped upon the best qualities of the goods. About 1874 another one hundred feet was added to the main building, and a factory was built to supply the shop with lasts. This latter business was given up in 1880, that this building might be added to the capacity of the boot-shop, and at the same time two hundred feet more were built on, and a large store-house erected, the latter being connected to the main building by a foot-bridge. Previously a side-track had been laid to the factory by the Boston & Albany Railroad Company; so that now hand-trucks, for carrying stock or goods, could run from the railroad freight-platform to all points in the buildings. These building operations resulted in establishing in Ashland one of the largest and most convenient boot-shops in the State. Meanwhile there had grown up along with the shop a whole neighborhood of houses, Tilton having erected many of them, and himself owning twenty-five tenements; he also added two large frame barns, in which were kept blooded stock. Having retired from the boot business in 1885, he is now giving attention to his farm and to the improvement of his stock.

Houghton, Coolidge & Co., the large firm of manufacturers and dealers in boots and shoes, who have several boot and shoe factories in the State, and whose principal place of business is on High Street in Boston, took a lease of the Tilton shop for a term of years in 1885, and at once entered upon a large manufacturing business. They found this shop fully equipped with machinery, provided with sufficient steam-power, and with freight-cars at its doors. Since that date the business has gone forward with only an annual stop of a week, to take account of stock. This shop affords employment for about five hundred men, women and boys, and turns out three thousand pairs of boots and shoes daily. The value of the annual business is \$1,000,000. The pay-roll for 1890 will amount to \$275,000, being double that of the first year. The workmen are paid regularly on Thursdays of each week. The plan pursued by this firm is to manufacture samples of boots and shoes in the fall and winter, which they show to their customers throughout the country. Orders are received through the medium of traveling agents, who go the rounds twice a year, to be filled at different dates throughout the season. As fast as orders are taken, the shop is put at work upon them, and the goods are manufactured, which, if not wanted for delivery immediately, are stored in their own store-room, or in the large unoccupied stone buildings of the Dwight Printing Company. At all seasons of the year, especially from July onward till the middle of the fall, large quantities of boots and shoes are shipped to all points in the West and Southwest, being loaded directly from the storage buildings into the freight cars of the Boston and Albany Railroad. In the winter

the help are working mostly upon shoes, at other seasons upon both boots and shoes. All classes and qualities for men's and boys' wear are made in this shop. The resident managers of the factory are W. B. Temple and J. E. Tilton.

Paschal Blake came to town in 1862 and worked the first six months for Abraham Tilton. Afterwards he was in partnership with Tilton one year. He then set up business for himself, commencing in rooms in the Leland building. After a few months Josiah A. Balcom formed with him a partnership under the name of Blake & Balcom. At the end of two years the firm moved into the shop on Main Street, fitted for them by John Clark, who had moved the building upon this spot from across the road in the field where it had served as a barn. In 1868 they bought of William Seaver a lot of land, where now are the coal-sheds of Abner Greenwood, and built upon the easterly side a two-story shop of about the same dimensions as Blake's building, now standing just at the west. Seaver & Sons had erected a similar shop on the site of the last-mentioned building. A space of about forty-eight feet which was left between these shops people began to suggest might well be utilized as a continuation for Concord Street toward the Main Street crossing. But the owners of these two buildings thought a better use could be put to that open space, so they built each half-way across a narrow two-story projection, giving the appearance on the Front Street face of one large building and on the back side of two projecting wings. This firm continued to carry on the business till 1874, when they dissolved partnership, Balcom buying the real estate. About this time the shop lately occupied by Seaver & Sons was in the market. Blake, purchasing this, set up and carried on business alone. On April 6, 1879, the whole combined building was consumed by fire. Blake has since continued to reside in Ashland, but has not engaged further in the manufacture of boots.

Josiah A. Balcom, after dissolving partnership with Blake, as above related, commenced the manufacture of boots alone in the same shop. He pursued mostly that method of doing business which at this time was becoming customary among the shops, that is, to fill orders for goods, and not to make up a large stock in advance of orders, destined to commission houses to be marketed at a loss. He did about the same volume of business as before the dissolution. He remained here till the fire before spoken of, after which he opened business again in the Cole shop, near Union Street. His work now was principally upon shoes. His business increasing, in 1886 he bought a lot of land situated next to his home on Alden Street, and erected a three-story frame building, equipping it with modern conveniences, including steam-power. Here, every working day in the year, his business goes forward regularly, the steam whistle summoning and dismissing the workmen, who, having once been admitted

to this shop and given satisfaction, are permanently retained.

C. M. Adams began the manufacture of boots in 1866 in the second story of the Wiggins store. Remaining here a year or two, he moved into Leland Block, where he continued business about three years. He then moved into buildings of his own recently completed at the corner of Alden and Railroad Streets. He occupied for his boot business a portion of the larger building and the second story of the bakery stable, which stood upon the site of the present bakery shed. In 1879 a fire which started in the stable consumed that building, and catching the large building, destroyed that also. The building as it now appears was immediately re-erected, Mr. Adams occupying, however, with his boot business only the middle portion of the first floor, and that only for a short time subsequently to his connection with H. Newhall & Company, as superintendent in their shop. At a still later period, in partnership with C. S. Brewer and C. F. Davis, he manufactured shoes for a year or two in the "Gothic Arcade," on Alden Street, and afterward alone, his own building being occupied with other business. For two or three years, at a period before the fire, D. R. Chamberlain was in company with him. After this partnership was dissolved Chamberlain continued to work for him until the final failure of his health.

In 1888 Charles Grieshaber, buying out the stock of C. M. Adams, commenced the manufacture of shoes in the Gothic Arcade, a one-story building situated on Alden Street. This building is furnished with a hot-air engine, which is used in Grieshaber's business, affording the necessary power.

Montgomery Bixby was manufacturing boots, at about the date of the organization of the town, in the second story of what was then the railroad passenger depot, being followed a year or two later in the occupancy of this building by Hiram Temple, as has been before related. Bixby had been preceded in business by Calvin Dyer, and at a still earlier time by Mitchell & Bryant, when the building stood a few feet north of the Main Street crossing.

It has been before stated that about 1857, S. W. Wiggins was in the boot business three years, in partnership with E. S. Thayer. At the time when the town was organized, besides keeping store on the first floor of the brick building now owned by J. N. West, in the second story he was manufacturing boots alone. This business he had been engaged in for several years, commencing in 1841. Benjamin C. Pond, a man well known in the early days of this town, was foreman in this shop. The business was then carried on according to methods now out of date; there was more barter than cash; keeping a store at the same time, the boots manufactured by him were bartered in Boston for hardware and other stock for the store. In buying stock for the shop the barter also came in play; so many feet of upper-

leather, so many pounds of sole-leather and so much cash would be given for a case of boots. Here in town the workmen on boots were paid largely in orders on the stores. Where a boot-shop and store were carried on by the same person, the work was paid for in goods chiefly out of the store. After Wiggins moved into his new building, in 1850, the custom of orders declined rapidly, and within a few years became obsolete. Upon moving away Wiggins closed his boot business.

George W. Jones, in about 1853, after dissolving partnership with Dea. Seaver, manufactured boots for Whitney & Hines over his store, situated at the corner of Main and Summer Streets. This business was continued but a short time.

STORES.—It is not intended to give a full account of the stores which have done business in this town; only a few can be referred to. Many, if not all the early stores were general—that is, dry-goods, groceries, crockery and furniture were kept for sale in them. The first in the order of time kept in the village was the store which stood at the east end of the cotton factory. This was opened by Homer Tilton, about the time the factory was built. A Mr. Barton followed Tilton, who, in turn, was followed by William Jennison. Jennison was in occupancy at the time when the town was set off. Soon after he moved into his own store, of which mention will be made below. George W. Fairbanks was the last occupant of this store, which was closed about 1855.

One of the earliest general stores was kept by Eben Tombs in the basement of the house of W. R. Eames. This store was finally closed about 1840.

In 1841 S. W. Wiggins moved into the brick building now owned by J. N. West, occupying the first floor for a store, and the second for a boot-shop as has been related. In the store business he followed a Mr. Parks. The succession before this had been from Studley & Homer, through Valentine & Brewster, to Parks. In early times the second story of this building was entered by an outside stair-way at the east end, and was occupied for offices when not in use for other purposes. Wiggins continued to carry on the business of a general store at this place till about 1850, when he put up the large frame building standing on the north side of Front Street at the corner of Concord, and which is still known as his building. Upon its completion he moved in, and kept a general store for two or three years, when he sold out and went West. The business was now carried on successively by William Jones, by Thayer, Sweet & Company, Cheever & Thayer (Silas F.), and Cheever alone until 1860, when Wiggins again came into possession. For a long term of years Wiggins now had the ownership and control, establishing a firm character for the store. In 1876 the business passed into the name of E. S. Thayer & Company, Wiggins remaining manager. Later, his health becoming less secure, he slowly withdrew, and finally

the store was closed. A portion of the building was leased to A. A. Coburn, and has since been occupied by him for the sale of dry-goods and clothing.

William Jennison is well remembered by persons of middle age, as being for a series of years one of the principal store-keepers in town. He began a few years before the town was incorporated in the factory store. In 1845 he bought land of the Unionville Evangelical Society and built what is still known as the "Brick Store," situated on the northeast side of Main Street, west of the Congregational Church. About the same time he built the house nearly opposite, which he occupied with his family. He kept a general store till 1851, when, dying, the business came into the hands of his son William. The last-named, aided by his brother Albert, both of whom had acquired experience under their father, carried on the business for a few years longer. They then sold out and moved to New York. After the departure of the Jennisons the brick store never seemed to retain its tenants. It has been occupied at intervals to the present time chiefly for a store and market. In 1847 the Dwight Printing Company became the owner of the real estate.

George A. Tilton was engaged in various ventures for the sale of goods from about 1860 to 1887. Beginning with a stock of drugs in Woodbury's building, he moved into the Brick Store, which he bought about 1862. He now added a stock of groceries. In 1867 he sold the business to W. A. Tilton and E. F. Greenwood. About this time he erected two small buildings at the east of the brick store to meet the then great demand for business accommodations. A few years later these buildings becoming vacated, he moved them to Alden Street and converted them into a store for himself which he called the Gothic Arcade. This store was afterwards closed and the real estate passed into other hands.

William A. Tilton, beginning as an apothecary in the Brick Store, afterwards erected on leased land the small building at the east of the Central House, which he occupied in this business for six years. He then sold to E. T. Billings, who has continued as proprietor to the present time. The building is now owned by George E. Whittemore. For several years Billings has served as town clerk, having his office in this building.

Something has been said about the boot business of Albert Leland. His store business was hardly less important. In the first building he erected, which is now owned by Mrs. Manning, and situated on Summer Street, he provided for a general store, which was kept in the front part, customers ascending several steps from the street upon entering. In 1852 S. F. Woodbury became a partner in the business of this store. A few years later Central Block was built by Leland & Woodbury, as has already been related, and Woodbury continued a partner with him in the store business. In 1858 the partnership was dissolved,

Woodbury taking the stock. As has been before mentioned, these were the days of store orders, given by the boot-shops, which probably formed the basis of half the trade. If the manufacturer owned a store, he was doubly fortunate, for he got a profit both on the boots the workman made and on the goods he bought. After a few years Woodbury retired and William Jones was taken into partnership with Leland. Horace Yeaton succeeded Jones, and after Yeaton others, either alone or in company with Leland, kept a general store till 1869. After this time Leland did not engage in business.

In the year last named Bernard Billings opened a drug-store on the first floor of Central Block. In 1872 F. N. Oxley became a partner, and the firm took the name of Billings & Oxley. In 1875 Oxley bought the interest of his partner and continued the business alone till 1890, when he sold to C. E. Thayer, the present proprietor.

James O'Brien, who occupies the westerly front room in Central Block for his shoe-store and harness-shop, first commenced business in 1874, in White-house Building. He made the change in location in 1879, then adding boots and shoes to his stock. His trade has been largely increased.

George W. Jones bought a lot of land of Captain Stone and erected a building at what is now the corner of Main and Summer Streets, in 1846. He afterwards occupied these premises for the purposes of a general store. In 1853 this building was moved southerly on Main Street fifty or sixty feet, to be used as a dwelling-house. At the same time a building which had stood in the rear and been occupied as a barn was brought forward to the corner and received additions. This constituted his store till about 1870. In 1867 A. A. Coburn had become interested with him, and together they now enlarged the building to its present dimensions. About this time Jones formed also other business connections in Boston. When he died, in 1872, he was a partner in the firm of Jones, Williams & Faxon.

In 1870 William Enslin bought one-third interest in this real estate. This stand was now occupied by A. A. Coburn and Franklin Enslin, who had formed a partnership under the name of Coburn & Enslin. A large general-store business was done till 1878, when the firm dissolved, dividing the stock and the building, Coburn taking the dry-goods and Enslin the groceries. Coburn continued to trade here in dry-goods and clothing till 1886, when he moved into the Wiggins Store, on Front Street, where he now is. Enslin dealt in groceries until 1877, when he sold to E. F. Miller & Son, who after a short time sold to C. F. Grout and C. W. Enslin. The last named formed a partnership under the name of Grout & Enslin, and have continued the business to the present time. Ever since Jones opened a store on this corner a substantial and prosperous business has been done at this point.

In 1883 Henry I. Pike and J. E. Woods came from Westborough, and forming a partnership under the name of Pike & Woods, commenced doing a grocery business in the new brick building of A. Greenwood, situated at corner of Front and Concord Streets. They called themselves the Boston Branch, put prices down and sold mostly for cash. They at once secured a good trade in this and neighboring towns. In the spring of 1889 the partnership was dissolved, Woods keeping the business and Pike going back to Westborough.

About 1850 John Clark came from Acton and began the manufacture of tinware in the lower part of one of the Brewster buildings, which stood on the site of Greenwood's stable. He also kept hardware for sale. After two years he bought the land on the north side of Front Street, then vacant since the burning of Temple's shop, and erected the building now used for dwellings and the hardware-store of Perry & Enslin. He now greatly increased his business of manufacturing tin-peddlers' supplies. In 1855 Edwin Perry began working for Clark in the store and in issuing goods to the peddlers. Five years later Clark sold the business to Lyman Patch and Perry,—the former taking a deed of the real estate. The business now went on under the name of E. Perry & Co. After about four years Patch sold his interest back to Clark. Then for seven years the business was conducted under the name of Clark & Perry. A large number of tin-peddlers' carts were now sent out, covering the country in some directions to the distance of thirty or forty miles. The firm usually owned the carts, the peddlers often, but not always, providing the horses. These were the palmy days of tin-peddling, as the good price then obtained for rag stock encouraged barter, by which the tinware was largely disposed of. In 1877 Clark sold all his interest, including the real estate, to Edwin Perry and Franklin Enslin, who have continued to the present time an extensive business under the firm-name of Perry & Enslin.

S. F. Woodbury, after the firm of Leland & Woodbury had been dissolved, carried on the store in the Leland building for about two years. He then bought and enlarged the Temple boot-shop on Railroad Street, where he kept a store for a short time. In about 1870 he erected another building just at the west, a portion of which he occupied for a clothing-store. In 1873 he exchanged his stock with Horace Yeaton for real estate, and three years later bought it back. He closed business in 1877.

C. B. Stockwell occupied for a shoe-store the westerly portion of the Woodbury building until it was burned, in 1877. He then leased a lot of land on Front Street, where he built a small store, which he is now occupying.

About 1875 A. F. Farwell fitted up a confectionery factory and store in the building next west from the brick store, where he continued in business till he sold, in 1887, to R. E. Hunt, the present owner.

Of the stores established more recently, and now running, are the dry-goods store of C. T. Scott and the grocery of O'Connor & Shaughnessy.

S. A. Davis began his business as a dealer in newspapers and periodicals in 1870, having his first store in Whitehouse building. Later he became a dealer in fruits and confectionery. After Draper vacated the store in Broad's building on Railroad Street in 1877, Davis took possession and has remained in this location to the present time. When changing to these larger quarters he found room to add a stock of fancy goods and books for a circulating library.

From time to time clothing dealers have brought in stocks and opened stores, but none have been able to establish a permanent business. Of those who have remained longest, may be named H. M. Dufur, the noted wrestler, and George S. Hutchins.

TAILORS.—Among tailors, Waite's name is remembered in part from the tailor's work his widow did for many years after his death. Bodemer, who followed in the early years of the town, had for his place of business the renovated blacksmith's shop which once stood about where the steamer-house now stands. Next came Baylies, who occupied the same quarters. Later, Lewis Kingsbury for several years had his shop in West's building. W. M. Draper, who in the seventies occupied the store now of S. A. Davis, made his way chiefly by his marked personal traits. John N. West came from Boylston and established his business about 1867. He had bravely maintained his hold, brought up a family of children and was still working at his trade when, a few years ago, by a sudden stroke he was totally disabled.

Want of space forbids reference to the long line of dressmakers and milliners.

BAKERY.—Ever since C. M. Adams first erected his building at the corner of Alden and Railroad Streets, in 1870, the town has had the benefit of a local bakery, as the serviceable oven at that place has attracted its counterpart, the baker. Frank B. Tilton, coming from Natick, was the first to open a bakery in this town. He was followed by Fiske & Stratton, several other bakers successively followed in the business in Adams Block, none remaining above a year or two, until Michael F. and Thomas R. Twiss took possession in 1884. Under the name of Twiss Brothers they have carried on the business to the present time.

MARKETS.—Until about twenty-five years ago there were no meat markets in the village, the people there, as elsewhere, depending for supplies upon the carts which called at their doors. A. W. Eames (2d) opened a market in a building erected for him on Summer Street in 1870, and the business has been continued ever since at that point. Many different persons have at times kept meats and provisions for sale at various stands, but few have continued long in the business. Besides Eames, Theodore Jones and John H. Jackson at the present time keep well-patronized markets, and send around carts in this and neighboring towns.

For many years Melvin Whittemore has carried on trade in fish, both from his market and his wagon.

CARPENTERS.—At the head of the list of carpenters who are noted for length of service, and results accomplished, stands Richard R. Brewster. He came to town soon after James Jackson, being specially engage to look after the carpenter work needed about the cotton-factory. In 1845 he built a house on Front Street, which he occupied till his death, in 1878. About 1835 he succeeded to the business of Studley & Homer. They had built a carpenter's shop just at the west of their brick building, now known as J. N. West's, and had carried on a lumber-yard and store at that point. To conduct the store business in the brick building, Brewster took into partnership first William and later Samuel Valentine. The store and partnership were dropped in a few years, but the carpenter's shop and the lumber-yard he kept. Later this shop was moved to the spot now covered by the brick block of Abner Greenwood, and fitted for a dwelling. It was finally taken down in 1885. He now built and occupied a carpenter's shop situated on Front Street, about where now stands the coalshed of Abner Greenwood. This was probably about 1840. His lumber-yard, near West's building, about the same time he moved upon land now of the Boston and Albany Railroad Company, lying between their track and Front Street, east of Greenwood's building. In his yard he kept a good stock of lumber for sale, till near the time of his decease. About 1850 he rented the lower part of his carpenter shop to one Hammond, who came from Dover, for a wheelwright business, and the second-story to Aaron Rice for a harness-shop. He built at this time a second carpenter-shop at the east of the one rented, standing about on the site of Greenwood's barn. Subsequently this building was rented to John Clark, William Seaver, the Sons of Temperance and other tenants. Both of these buildings were finally moved away and converted into dwellings. About 1850 he and Orlin Allard built a steam-mill on the south side of Front Street, near the railroad track, at about the location of Ezra Morse's buildings, and fitted it with machinery for making doors, sash and blinds. This mill had a steam planer, the first used in Ashland. Charles V. Guy superintended the running of the mill, which after a year or two was burned, taking fire in the absence at breakfast of the attendant. Some years later Guy went west with Wiggins, and engaged in the manufacture of lumber.

Brewster built for their owners many of the houses and other buildings in town. He was active in establishing the Congregational Sunday-school and church, though not a church member. His influence was felt in the setting off and building-up of the town, and his aid was freely given to its business interests.

Charles Homer, one of the children of Michael Homer, learning his carpenter's trade in Framingham, commenced business here in partnership

with Studley, reference to which has already been made. He soon went away, later engaging in government work. For one of these contracts with the government he claimed that a large sum of money was due him, which could never be obtained. He finally returned to Ashland to spend his last days, and died in 1888.

Edward and Charles Knowlton were doing carpenter work before and after the establishment of the town. Charles Knowlton superintended the rebuilding of Shepard's paper-mill after the fire in 1842. Alonzo Perkins was at one time associated as a partner with Charles Knowlton. He was among the early soldiers in the Civil War.

Eleazer Whittaker was mostly engaged in doing carpenter repairs at the cotton factory. He was said to be very "ingenious," could "make and attach a mosquito's bill."

Willard Stiles was following his trade as carpenter in 1846. He built many of the older houses. His son, Gilbert Stiles, succeeded to the business.

Abijah Adams and George H. Adams, his son, came from Rutland about 1855 and built a house and shop on Main Street, where now the daughter of the former and the son and widow of the latter reside.

E. L. Sherman, whose native place is Westborough and who is still working at his trade as a carpenter, came to town in 1844.

Warren Wright, who began carpentering with George H. Adams, his nephew, formerly drove stage from Hayden Row through Hopkinton Centre to Ashland. J. F. Porter is known beyond the limits of the town as a builder, and is now erecting the school-house on Central Street. Charles H. Bigelow, son of James Bigelow, whose early home was the W. D. Cole place, was noted before he had become partially disabled, for the excellence of his work. It is said that Bigelow would work half a day with George H. Adams, as partner upon a job, without speaking, the two silent men fully comprehending each other.

BLACKSMITHS.—In former times blacksmiths' shops were located without much reference to villages, just where their owners happened to reside. In 1846, Daniel Lamb had for many years pursued this trade in a shop on the Sherborn Road at the limit of the town. Lamb kept working at that spot till disabled by old age. The shop remains, but has been turned to other uses. Just above the Shepard, or, as it is called in the older histories, the Howe dam, on the river bank, Alexander Clark, with his sons, Newell and Alexander, kept a blacksmith-shop. The business at this place was discontinued about 1840. Newell Clark was in the Greenwood shop for a short time about 1840. In 1841 he occupied a blacksmith-shop for a year or two, which stood where Greenwood's old office now is on the south side of Front Street. This building was afterwards moved off and changed into a dwelling-house. Clark went to South Framingham and opened business.

William Greenwood's blacksmith-shop stood on the west side of Cherry Street, at a spot a little to the south of the present residence of A. T. Jones. This seems to have been the principal shop in this region in pre-Ashland times.

About 1843 Addison Fisher came from Medway and opened a blacksmith-shop on Front Street at a point about where Blake's building now stands. Capt. Moses Clafin followed Fisher in the business.

In 1847 Abner Greenwood, quitting the old location of his father, William, on Cherry Street, commenced work in this shop. In 1850 he built his shop on Concord Street, and soon after the two dwelling-houses next to the south. In 1853 he formed a partnership with Harvey Piper, who had before worked for him, which continued till 1856, when Piper bought the business. In 1859 Piper moved into the basement of Taggart's new wheelwright shop across the street, and Greenwood resumed blacksmithing alone in his shop. Here he continued till 1868, making money, when Gibbs took the business, selling out to Whitcomb. George Boutilier occupied this shop twelve years, beginning in 1878. In 1882 Greenwood erected the fine brick building standing at the corner of Front and Concord Streets.

Herbert H. Piper, upon the failure of his father's health, succeeded him in business and remained two years in the Taggart basement. He then leased a spot of land on the east side of Concord Street, and building a shop, has since carried on his trade there.

PAINTERS.—Henry J. Dadmun, who was born in the northern part of what is now the town of Ashland, in 1808, early learned the house-painter's trade, and followed it in this town and vicinity throughout his life, which closed in 1879. About 1850 John W. Spooner came from New Bedford and engaged in the same business. Later these men formed a partnership under the name of Dadmun & Spooner. For many years they worked together; then separating, they shared between them nearly the whole business of the town. Both built houses and paint-shops. Dadmun, after dissolving the firm connection with Spooner, took his son James into partnership, and later C. F. Grout. James died two years before his father. The business was closed at the latter's death. Dadmun and Spooner were both men of marked individuality. Spooner, being active in the prosecution of temperance work, was threatened with injury, and the firing of his building more than once seemed to him proof that injury was actually intended. C. H. Spooner and G. T. Jones, once employees of Spooner, now have a monopoly of the house-painting work in Ashland.

O. A. Wilcox in 1870 erected a building on the west side of Concord Street, close to the canal, in which to do ornamental and carriage-painting. After following his trade for a series of years, he sold his building and business to R. A. Taggart. Since that time some half a dozen different persons have occupied this building, each for a short time only.

WHEELWRIGHT.—With the exception of Hammond, who for a short time occupied one of the Brewster carpenter-shops, R. A. Taggart is the only one who has made an exclusive business of doing wheelwright work in the village. He built and occupies a shop on the west side of Concord Street.

COAL DEALERS.—At first George W. Jones did all the coal business, two or three car-loads a year supplying his customers. In 1867 Ezra Morse succeeded to Jones' coal business, and two years later added a stock of lumber. He erected sheds and continued in the business about ten years.

In 1866 J. N. Pike and C. H. Tilton erected a coal-shed between Front Street and the railroad, and engaged in the business, Pike soon selling to his partner. In 1869 Abner Greenwood bought the shed and commenced a business which he has carried on to the present time. He deals in anthracite coal exclusively, handling one thousand tons annually. He also sells hay, lime and cement.

C. H. Tilton in 1873 again returned to the coal trade, building sheds along the railroad near his boot factory. In 1885, when he closed his boot manufacturing, he transferred the coal business to his son, C. H. Tilton, Jr., who now carries it on.

ICE DEALER.—For many years G. C. Fiske has supplied ice to the people of Ashland from his two ice-houses. In addition to this business he carries on the farm formerly worked by his father.

BARBERS.—There have usually been at least two barber-shops in the village. Charles H. Nichols, whose place of business is on Front Street, commenced in 1871.

HOTELS.—Capt. John Stone built and opened the Railroad House, now Scott's Hotel, in 1834; a barn was also built, standing more to the front than the present stable, with cow-yard where Central Block now stands. Stone at that time quit the old dwelling on Union Street, known as the "Simpson" house, and moved into the hotel with his family. He carried on the hotel only about a year. Later he took up his abode in the dwelling situated a few rods to the west, which has ever since been occupied by him or his descendants. Stone continued to own the hotel property and leased to different parties. The lessees seem to have occupied in the following order, none of them for long periods: Reignolds, Fuller, Angier, Atherton, Barber, Warren, Bates & Thayer, Bates, Scott.

Smith Bates and Silas F. Thayer bought out Silas Warren in 1848. The business included the livery stable. In the spring following, Thayer sold to his partner the hotel business, but retained the livery. Thayer carried on the livery stable nine years and then sold to W. A. Scott, himself moving to Hopkinton. Bates sold the hotel furniture and business to Scott in 1849. From that time to the present Scott has carried on the hotel and stable. In 1868, after the death of Captain Stone, he bought the whole

hotel property. The stable was burned July 30, 1851, at the time of an officers' drill, when there were many strangers in town, and again on June 15, 1889. It has now again been rebuilt. In the years before the town was incorporated the second story in the wooden easterly extension of the hotel was sometimes used as a hall for public meetings. In 1869 O. A. Wilcox bought the lot of land on the north side of Front Street, on which now stand the Central House and post-office building. There were two houses then upon it. Altering and enlarging the more easterly of these to its present proportions and furnishing it, he opened a hotel which was named the Central House. Here he carried on the business, until 1878, when becoming dissatisfied with results, he moved to Kansas. The receivers of the Mercantile Savings Bank having taken possession as mortgagee, at first leased these premises to various persons, as tenants at will, and finally sold in 1879 to F. D. Osgood, who shortly afterwards conveyed to Michael Manning, the present owner of the property.

In 1869 the Megonko House and livery stable, situated on Pleasant Street, were erected and furnished by C. H. Tilton. S. F. Thayer returned from Hopkinton to conduct the business. At the end of four years the livery stable was closed, and the hotel business passed into the hands of C. F. Hanson. Hanson was followed successively by Babcock and Greely. In about 1880 the hotel building was finished into tenement dwellings.

There have usually been one or more restaurants in operation in the village, their lease of life not often extending beyond one year.

LIVERY STABLES.—The history of the Scott livery stable has been given in connection with the account of the hotel now bearing the same name.

The livery stable on Summer Street, for many years conducted by S. F. Thayer, was built by Charles Wenzell about 1861, he buying the land from Albert Leland. Wenzell kept stable five or six years, and sold to Ed. Carter, who continued the business only a year or two. The whole property now came into the hands of John Clark, who took James Moffatt into partnership in the livery business. Later Clark sold to Moffatt the business, retaining ownership of the real estate. In 1875 Thayer bought the personal property, and in 1889 his son, Charles E. Thayer, became owner of the real estate.

In 1846 S. F. Thayer began keeping livery stable in a building which stood upon the present site of Mary C. Broad's dwelling-house. In the same year, 1847, Willard Broad became owner of this building and the house which stood at the corner, whose location is marked by the cellar-hole, visible now for many years. Thayer occupied only for a year, then moving into the "Stone" stable on Main Street. Afterward Broad's barn was occupied successively by Wenzell for a livery stable, and Albert Leland as a boot-shop, till it was burned in about 1850. The

second story was occupied from about 1845 as a boot-bottomer's shop by Willard Broad, who hired workmen and ran teams. Years later Broad was a pioneer in the gilding of boot-tops, and accumulated a small property before the shops introduced gilding-machines.

RAILROADS.—In 1834 the Boston and Worcester Railroad Company, having completed its road from Boston to this point, ran its trains into the low building which now forms the easterly end of the freight-house. This was its first station. Later the two-story boot-shop, which had stood back of the Main Street flag-house, was moved forward to the north side of the track and served for purposes of a railroad passenger station in its first story and for a boot-shop in its second. There were outside stairs at the east end. Below, just east of the building, was an open shed, which at a later date was moved easterly and attached to the first depot, making of the whole the present freight-house. About 1850 the passenger station was sold and moved to the north side of Front Street, where such part of it as survived a subsequent fire was rebuilt into the present post-office building. A new station was erected on the south side of the track, on the spot now covered by the west end of the present building, which served till 1888, when it was moved across the street and converted into the store now owned by Mrs. McPartlin. The present fine building was erected in the last-named year. It is to be followed by a brick freight-house, to stand on Front Street.

In 1872 the Hopkinton Railroad Company, having completed their road from Milford to Ashland, commenced running trains, and there has been no interruption in the service to the present time. The new track laid on the south portion of the Boston and Albany road-bed, leading from Cherry Street east, admits the trains to the station of the latter road. Owing to the failure of the Hopkinton Railroad Company to meet their obligations, the mortgage on the road was foreclosed in 1883. At the sale the property was bought by George Draper, who afterwards sold to the Milford and Woonsocket Railroad Company, which in turn has leased to the New York and New England Railroad Company for a term of ninety-nine years. The latter company is now in possession, John T. Jackson being the local freight agent, while passenger tickets are sold by the agent of the Boston and Albany Railroad Company.

The last-named company has been the successor of the Boston and Worcester Railroad Company since 1867. Timothy Vincent was the first general station agent at this point. In about 1841 he was succeeded by James H. Jones, who continued in that position till October, 1873; during the last four years of this period the business being mostly done by his son, C. U. Jones, who had been appointed clerk. Since the resignation of his father, J. Newton Pike has served as agent.

EXPRESS COMPANIES.—Ever since the first days of express companies Ashland has had an agency. William W. Whitaker will be remembered as one of the earliest of the agents and afterward as man-of-all-work about the station till his death, about five years ago. E. F. Greenwood was for many years the active agent of the Adams Express Company, now represented by A. J. Lowe. J. N. Pike is agent of the American Express Company and H. G. Stiles of the Ashland and Boston Express Company.

POST-OFFICE.—The Unionville post-office was established January 7, 1835, presumably, in great part, for the benefit of the cotton-factory. Matthew Metcalf was the first post-master, and the factory store-building was the place where the post-office was kept. On March 17, 1840, William Jennison succeeded to this lucrative position, and on March 6, 1846, James O. Clark was made happy by appointment to it. All this time the office was kept in the factory-store, which building, considering it was also the counting-room for the factory, and devoted to various other important purposes, must have been the principal business centre of the village. The general post-office at Washington, from which names and dates have been obtained, has this note: "April 29, 1846, name changed to Ashland." As the town was incorporated on March 16th it will be seen that the Post-Office Department, so far as it was concerned, graciously extended the life of the dying Unionville just forty-four days. Clark held the office till April 8, 1847, when Willard W. Warren obtained the appointment. During, or perhaps at the commencement of Warren's term, the post-office was transferred to the store of G. W. Jones, at corner of Main and Summer Streets. James H. Jones was appointed January 18, 1851, and opened an office in the railroad station. He performed the work of postmaster unassisted for years, in addition to his regular duties as railroad agent at this point. Later, his daughter, Caroline H. Jones, aided him, gradually taking upon herself the whole work. When Jones' health finally failed, Miss Jones was appointed assistant, and conducted the office, her father only signing necessary papers. About 1873 the location of the post-office was changed to the small building in the curtilage of the Jones house, on Main Street. Jones died August 18, 1885. On September 21st of the same year, Adrian Foote was appointed to the office. On February 26, 1887, Caleb Holbrook assumed the work as post-master, which he had before carried on as Foote's agent. The office was removed in 1885 to the Coburn Building, situated on the north side of Front Street.

NEWSPAPERS.—The *Ashland Advertiser* is the original local newspaper. It was first published August 7, 1869, by George W. Morse, of whom some notice appears elsewhere. H. H. Tilton soon acquired a half-interest. The printing was first done in rooms in the second story of the Jones Building, on a hand-press. About a year later the editing and printing were

transferred to the third story of the Broad Building, where the paper remained till its removal to South Framingham, January 21, 1876, and consolidation with the *Framingham Gazette*. The following persons were concerned as owners or editors, or both, while the business remained in Ashland: Morse & Walker, Walker & Mayhew, Geo. P. Mayhew, Edgar Potter and Potter & Vincent. The *Ashland Advertiser* is now printed weekly at South Framingham, by the Lakeview Printing Company, and contains about the same matter as the *Framingham Gazette*, but somewhat differently arranged on the local pages. The *Ashland Advocate* and *Ashland Tribune* are weekly papers, having a circulation in Ashland, and are printed, respectively, in Marlborough and South Framingham.

SURVEYORS.—Mathew Metcalf was a surveyor of land fifty years ago. He was also a justice of the peace and made many of the deeds of that day. His handwriting, though fine, was always even and clear.

William F. Ellis, who had been a student with Metcalf, began work as a surveyor, shortly before the organization of the town. He did substantially all the local work of that kind till about ten years ago, when his railroad engineering, in which business he had also become an expert, took him away temporarily. He still retained his residence in Ashland and returned in 1887, to resume his local work. Following the employment of surveyor so many years in Ashland, he became acquainted with the farms and other divisions of land, having in many cases personal knowledge of the bounds and dividing lines. He was a justice of the peace, and his bold, uniform handwriting may be found upon very many of the deeds, affecting Ashland property, passed during the last fifty years. He also wrote wills and administered upon estates. He was kept much in town office, and there is probably no board of town officers upon which he has not served. His influence in establishing and conducting the town has been second to none. He died suddenly of heart-disease, in August, 1888.

George A. Ellis and William F. Ellis, sons of the Ellis above mentioned, while learning the business of surveyor, assisted their father, but moved away upon entering on business of their own.

George H. Stone, a son of Captain John Stone, has been known as an engineer and surveyor, although he spent most of his life in operations away from town. He studied in the office of Simeon Borden, of Fall River. Beginning for himself, he was first engaged in the engineering department of the Boston & Worcester Railroad Company. He was living in Natick from 1857 to 1862, at which latter date he joined the army, being attached first to the Sixth, and later to the Twenty-sixth Regiment of Massachusetts Volunteers. He was made lieutenant of engineers, and placed on the staff of General Weitzel, at New Orleans. In this city he was in charge of the work of restoring the levees destroyed by the rebels at their

retreat. After the war he returned to Natick, and later was engaged about a year and a half as engineer in the construction of the European and North American Railroad in Maine. In 1869 he removed to Ashland, making that his home, and engaging in various enterprises till his death, in 1879.

PHYSICIANS.—Any account of the physicians who have practiced in the town of Ashland would be inadequate without some mention of Dr. James S. Sullivan, whose memory is still fresh and cheering in the minds of the older people. He came here in about 1835, and remained several years. He had an office in the second story of the West Building. He built the two "Sullivan" houses, that is, those now owned by Mrs. E. M. F. Forbush and Mrs. Mary E. Brewer. He possessed a large heart, as well as a bright mind, and became much beloved. He married Miss Jane Valentine, of Hopkinton. He went away in about 1843, wandering West and South, spending some years in Darien, Georgia, and finally dying in Savannah.

Dr. Jonas C. Harris followed Sullivan. He first lived in the "Simmons" house, that being the house next easterly from Mrs. Willard Broad's. He built what is now known as the "John Clark" house, situated on Main Street subsequently to the setting off the town, which he helped accomplish. He was admitted to be a good physician even by his enemies. His nature was of a positive kind that hews out its own way. He was made a colonel of militia. He moved away about 1853, going to Cambridge, where he has since remained, having a successful practice.

About this time or perhaps earlier, Drs. Learned and Wheeler were in town, the latter conducting a school for boys in one of the "Sullivan" houses.

Dr. Jackson, an eclectic physician, came before Harris went away. He spent several years in practice.

Dr. William Barrett took the house of Dr. Harris upon the departure of the latter, and practiced medicine very successfully for a number of years. His wife was a sister of E. A. Forbush, of whom mention has been made. Dr. Barrett went away to Boston, where he has found a large field for labor.

Dr. William Rogers was a successful physician here for many years. He lived in the "Buck" house, the same now owned by the Adams sisters, on Front Street. He was of a social nature and made many friends. His health failed and he was obliged to give up working in his profession some fifteen years ago. He has been dead for several years.

Dr. Seaver lived in the "Simmons" house and practiced medicine for several years.

Dr. J. M. Wiggin followed Seaver, residing for a time in the same house. About 1870 he built a residence on the corner of Railroad and Alden Streets, and practiced medicine successfully to nearly the time of his decease, in 1882. He was a man of good judgment and decided opinions. He held town office, acting on the Board of Overseers of the Poor. He had formerly been a Methodist preacher, and ap-

peared in the pulpit occasionally during his stay in Ashland.

Dr. G. C. Pierce came to Ashland in September, 1866. He is a graduate of Dartmouth College and of the Harvard Medical School. He spent two years in Bellevue Medical School, New York City. He is a member of the Massachusetts Medical Society and other societies. About 1870 he built a house at the corner of Central and Alden Streets, in which since that time he has resided and had his office. Being one of the physicians longest in practice in this vicinity, he is called to neighboring towns for attendance and consultation. He was for many years a member of the School Committee.

Dr. J. H. Redfearn came to town first in 1879 and remained four years. He then engaged in business which took him to Texas during the winter seasons. After an absence of six years he returned to Ashland. His office is at his residence on Main Street. He graduated from the College of Physicians and Surgeons in New York City. He is a member of the Massachusetts Medical Society, and corresponding member of the Gynecological Society of Boston.

Dr. I. J. Clark took up his residence in this place in 1883, and continued in the practice of medicine till 1886, when he sold his business and moved to Woburn. He has now been for several years practicing in Haverhill.

Dr. F. E. Mayberry succeeded to the business of Dr. Clark, remaining three years, when he removed to Hoosick Falls, N. Y.

Dr. Geo. W. Butterfield, who is a graduate of the Boston University Medical School, began the practice of medicine in this place in 1883. In the same year he moved into the John Clark house, on Main Street, where he has since resided and had his office. He has recently bought that place. Practicing homoeopathically, he rides much into neighboring towns. He is a member of the School Committee.

For many years Dr. White came from Hopkinton one day in each week, and, having a room in Scott's Hotel, attended to dentistry.

About 1870 Dr. H. A. Mansfield opened a dental office in Broad's Building, and prosecuted his business for several years, when he went to Evanston, in the suburbs of Chicago, where he has recently died.

Dr. F. E. Lewis succeeded to the office and business of Mansfield, remaining for a term of years, then removing to Natick, where he now has an office.

Dr. M. G. Leonard opened a dental office in 1883, in Adams Block, remaining only about a year.

Dr. E. J. Dixon now practices dentistry at his office in Greenwood's Block on Front Street.

LAWYERS.—It is quite certain that a young man opened a law-office in Ashland as early as 1850, but he could have remained only a short time. No one seems to remember his name, or anything about him, except that his hair was red.

George W. Norris was the first lawyer to take up a

continuous abode in town. He came in June, 1869, and remained till May, 1876. He had an office in the Jones building, which during the latter part of his stay he occupied only in the evening, being at his Boston office during the day. After a time he bought and moved into the cottage house standing near the east end of Pleasant Street, where he continued to reside until his departure from town. He was a member of the School Committee during a term of years. After leaving town, in 1885, he was appointed Government agent with the tribe of Nez Percés Indians. For several years he remained with his family at this post. He now resides in Boston, having a law-office in Rogers Building.

George W. Morse came to Ashland in 1869, while he was yet a law student in Boston. He was admitted to the bar in June of that year, and opened an office in Central Block. In the following July he started the *Ashland Advertiser*. While he remained in town he was editor of this paper. In July, 1870, having gathered a law business in Boston sufficient for his support, he sold his interest in the paper, and removed from town, carrying away as his wife, Miss Clara R. Boit, one of Ashland's school-teachers. He now has a large law business in Boston.

George T. Higley, who is a graduate of Amherst College, and of the School of Law in Boston University, began the practice of law in 1873, opening an office in Broad's Building. He still remains in his original quarters. In 1875 he removed his family into the house then erected by him, situated at the corner of Central and Alden Streets, where he continues to reside. He was a member of the School Committee for many years.

Henry Hogan, having recently been admitted to practice law in the State Courts, does law business in the town in the evening, being away at another office during the day. He was a student at the Boston University School of Law.

SOCIETIES.—*Ancient Free and Accepted Masons.*—The North Star Lodge was chartered June 14, A. L. 5865. The society met at first in the hall in Wiggins' building. In 1884 commodious rooms were elegantly fitted up in the third story of Greenwood's Block, in which the meetings have since been held.

Grand Army of the Republic.—Col. Prescott Post, No. 164, was instituted August 12, 1867, and meets every Wednesday evening in their hall in the Jones building. Its membership numbers fifty.

Independent Order of Odd Fellows.—Ashland Lodge, No. 164, was established October 9, 1872. The meetings were held first in the G. A. R. Hall, afterward for a time in the old Masonic Hall. For many years previous to 1890 this society occupied the hall in Adams Block, fitted up for their use. At the commencement of that year they took possession of large, finely-furnished rooms in the third story of Central Block.

Daughters of Rebecca.—Aurelia Lodge, No. 80, was instituted June 21, 1889, and meets in the Odd Fel-

lows' Hall on the first and third Fridays of each month.

Order of the Eastern Star.—Olive Branch Chapter, No. 12, was chartered June 28, 1881, and convenes in the Masonic Hall on the first Tuesday evening of each month.

Woman's Relief Corps.—Col. Prescott Relief Corps, No. 15, was instituted April 12, 1880. This society meets in the G. A. R. Hall.

Ancient Order Hibernians.—Division No. 22 meets in its hall in Central Block, on the first Tuesday of each month.

Patrons of Husbandry.—Ashland Lodge, No. 124, meets in the G. A. R. Hall on alternate Tuesday evenings. Its charter dates from April 7, 1885.

Knights of Labor.—Washington Association, Assembly No. 4530, was chartered November 3, 1885. This society hold their meetings in their hall in Adams Block.

Lasters' Protective Union.—The local Branch of this society meet in their hall in Broad's Building.

Other societies have been organized and meet in the interest of life insurance, temperance, athletics, and for other purposes.

CHURCHES AND MINISTERS.—The First Universalist Society in Ashland held its first meeting for organization May 13, 1871. John Clark was chosen treasurer, and John W. Spooner, John Clark, H. H. Tilton, H. W. Barrett and T. A. Osborn a parish committee, with George W. Norris as clerk. There were also among its corporators William Wheelock, O. A. Wilcox, Hubbard Willson and others. The society leased the hall in Adams Building, at the corner of Railroad and Alden Streets. Meetings were held here regularly for about two years.

George Proctor was hired as preacher the first year. He was succeeded by Anson Titus, and by students from Tuft's College. A quartette choir and organist were employed, and much interest was shown in the enterprise. The number of families, however, whose members desired to attend the meetings was found insufficient to warrant their continuance.

Catholic Church.—On December 20, 1858, Father P. Cuddihy, of Milford, first celebrated mass in the town hall in Ashland. At that time Ashland, Hopkinton and probably other towns were a part of his parish. From this time onward Father Cuddihy or his curate came to Ashland and read mass about once in three months. It was some years later that another parish was formed, with Hopkinton as the centre, and embracing also Ashland and other towns. Father Thomas Barry was placed in charge, and attended to the Ashland mission, having services once a month. He was succeeded by Father Minietti, who was in turn succeeded by Father John J. Ryan. It was during the term of Father Ryan that money was raised, chiefly by subscriptions, and a lot of land situated on Esty Street was purchased to be devoted to religious purposes. The building of the church

which now stands upon that land was begun July 1, 1874, and was carried forward by degrees, so as not to incur too much of a debt. Late in that year the church had been built so far as to be covered in, and the basement put in a condition for use. First services were held on December 26, 1874, at which Father Ryan officiated. Father J. S. Cullen, who had been curate in the Hopkinton parish from the days of Father Barry, was now assigned as priest in charge of a new parish embracing the field of Framingham Centre, South Framingham and Ashland. For a short time he resided in Ashland, in the brick house on Union Street, and then moved to South Framingham. Up to the time when the church was occupied, services had been held in the town hall; afterward there were regular services in the basement of the new building. A Sunday-school, which had been early established, was held weekly. The church went on increasing in numbers and financial strength.

The building was carried forward to completion in the year 1883, and on the 16th day of December, in that year, the final dedicatory exercises were held. The church is a substantial building of pleasing design, having a finished basement and an audience-room with a seating capacity of 400. To the rear is an addition containing rooms for the priest. Shortly after the completion of the church Ashland was designated as a parish, and Fr. M. F. Delaney was assigned as the priest in charge. He took up his residence at the B. F. Brown house, on Summer Street. At that time there was a debt of about \$6000; this has since been removed by means of subscriptions, pew-rents, fairs and the annual tax of one day's earnings levied upon the members, and the church is now free. The membership of the church, if estimated upon the basis of the whole Catholic population, is about 700; if confined to those who give attention to religious observances, it is somewhat less than half that number. Frequently the audiences in attendance upon religious exercises occupy the entire seating capacity of the church. Recently plans have been made for a dwelling-house for the priest, to be erected to the southeast of the church. On the 1st of May, 1890, Fr. Delaney was sent to Natick to have charge of a much larger church, and Fr. John Hefferman has been stationed in Ashland.

Congregational Church.—This church grew out of a previously existing Sunday-school, which was established as far back as 1828. About 1832, \$600 were subscribed, principally by those interested in the cotton factory, and with this sum, a second story was built upon the village school-house, to be occupied for religious purposes. This building stood on the site of the present Town Hall, but nearer the street, and was called "The Chapel." The second story of this building was fitted up with movable seats, made of pine boards, and afforded seating capacity for about one hundred persons. Besides being in use for religious purposes on Sundays, during the

week it was occupied, as occasion demanded, for lectures, lyceum debates, town-meetings and other public purposes, until it was torn down in 1855, to give place to the present Town Hall.

The Union Evangelical Society was organized as a legal body from the worshippers in the chapel Feb. 17, 1835. In the spring of this year, the society bought of James Jackson about two acres of land, on the northeasterly side of Main Street, opposite to the chapel, with a view to erect a meeting-house thereon. The land purchased, besides comprising the lot at present occupied, extended back into the cemetery, and westerly to include the land now covered by the "Brick Store." The southeasterly line of the lot was the same as at present, but was produced to near the back side of the cemetery; thence turning at a right angle, the line ran northwesterly to the canal, and up the canal as far as the confectionery store. The last-named land was sold to William Jennison, and the portion of the land northeasterly of the present cemetery wall was sold to the town of Hopkinton, and is now owned, with the remainder of the cemetery, by the town of Ashland. A strip of land on the west side of the present church lot was set apart to be leased for sheds, the "lessees to hold the land as long as sheds shall be supported for use of horses on said land." A committee was appointed to "build the house on the credit of the society," consisting of James Jackson, Josiah Cloyes, Jr., Calvin Shepard, Jr., William Jennison, John Stone, Richard R. Brewster, Abel Greenwood, Jr., Matthew Metcalf and Joseph Ballard. The house seems to have been modeled after the Baptist Church in Westborough. It was completed that season, and was dedicated January 21, 1836. This was the building now known as the Congregational Church, and the only change in its external appearance to this day has been caused by the substitution, in 1889, of stained windows in place of the old plain glass, and the erection of a chapel, about 1870, attached to the rear. In 1846 the name of the society was changed by vote to the "First Parish in Ashland," since which time all its acts have been done in that name. Recently some doubt having arisen as to the legality of this change, in 1889 an act of the Legislature was passed establishing this name and legalizing all acts before done under it. The records of this society, both church and parish, have been preserved, and are tolerably complete. The method of conducting the church is in the dual form customary in the Congregational order, the "parish" holding the title to the property and transacting the business, and the "church" conducting the religious exercises. Any person, male or female, above twenty-one years of age, is eligible to membership in the parish, but is received only upon its formal consent. No one is admitted to the church except upon assenting to its creed and articles of covenant.

The church at its organization numbered twenty-

one members, all but three joining by letter from neighboring churches, of whom thirteen came from Framingham. Many more members soon joined, and the church appears to have been always self-supporting. Its membership in the course of fifteen or twenty years arose to about one hundred and fifty, but has, especially since the establishment of the Methodist Church, which drew from its numbers, fallen away, so that there are now but one hundred and twenty. Twice in the history of the church the inside of the building has been remodeled, the first to accommodate a larger audience, the second, which occurred in 1889, to secure a conformity to modern ideas. The pews were originally sold by auction to attendants at the church, are still largely owned by individual proprietors, and are taxed for the support of preaching. The society has taken part of the pews for unpaid taxes and these are rented. A portion of the expenses is now raised by subscriptions, and the Social and Literary Society turn in a contribution of about two hundred dollars annually. There is no permanent debt, and the parish has never placed a mortgage upon the premises.

Prominent men in the town, though not members of the church, have been and still are active members of the parish. A prosperous Sunday-school convenes every Sabbath in the year in the church and chapel. With this is connected a library, often renewed. A few years ago a branch of the Christian Endeavor organization was established, which has served to add to the membership of the church, doing in a more quiet way the work formerly accomplished by revivals.

This church has had but few deacons, their terms of service having been long. Calvin Shepard, Jr., was appointed at the organization of the church; a few years later William Seaver was chosen. These two men served for many years, the latter continuing to act until shortly before his death, which occurred in 1887. After Deacon Shepard moved away from town, Dexter Rockwood was chosen and continued to act till his death. Later have followed in the office Edwin Perry, William Ockington and W. H. Hoven-den, who are still acting.

The following is a list of the ministers who have been settled or hired for periods of more than one year: James McIntyre, who, while a student in the senior class at Andover Theological Seminary, had commenced preaching to the congregation in April, 1834, was ordained and installed pastor of the church January 21, 1836. He was employed at a salary of five hundred and fifty dollars. His father-in-law, Bartlett, of Newburyport, built for him the house standing opposite the church, which was occupied by him while he remained in town, and was sold to James Jackson on his departure. He is said to have been a remarkably genial man, and succeeded well in uniting in one congregation the various denominational elements. After two years, his

wife dying, at his own request he was dismissed, and returned to Elkton, Md., his native place. Forty years later, by invitation, he attended the semi-centennial celebration of the Sunday-school, and received the hearty welcome due to the pleasant memory of his early labors.

The next pastor was Joseph Haven, Jr., also a young man from the seminary at Andover. He was ordained and installed November 6, 1839, and remained seven years, carrying the church through the period during which the question of a new town was agitated and its organization effected. He is said to have taken a strong interest in the formation of the town. He was a man of fine personal appearance and an able preacher. He and his father, also a minister, who lived with him, bought of Captain Heywood the house now owned by S. W. Wiggins, and occupied it during his stay in town. The salary paid him was six hundred and fifty dollars. His contract with the society made provision for terminating his term of service by either party giving six months' notice. It is said that, spurred on by advisers who believed in the potency of doctrinal sermons, he once preached a discourse in which the short-comings of other denominations than his own were pungently set forth, and that this caused offence in the minds of some. The Baptist portion of the congregation from this time withdrew, and took steps to establish a church of their own denomination. On December 16, 1846, he was dismissed to accept a call from Harvard Church, in Brookline, in charge of which he remained four years. Afterwards he became successively Professor of Mental and Moral Philosophy in Amherst College, Professor of Systematic Theology in Chicago Theological Seminary, and again Professor of Mental and Moral Philosophy in Chicago University. He died May 23, 1874. His books on "Mental and Moral Philosophy" and the "History of Ethics" have had a wide sale.

Charles L. Mills, following Mr. Haven, was installed as pastor February 11, 1847. He was a man of advanced middle age. His health gave way, and he was dismissed at his request in April, 1849, returning to Middlefield, Conn. A very pleasant memory still remains of the happy influence of Mrs. Mills as a "perfect lady."

William M. Thayer, of Franklin, was ordained and installed June 20, 1849. He was a graduate of Brown University and had recently studied theology with Dr. Jacob Ide, of Medway, a theologian of the old school. Mr. Thayer's seven years of ministerial labor were exhibitions of strength and zeal. His interest extended to town affairs so that he became popularly known, and was chosen to represent the town one year in the Legislature. He bought the lot of land and built the house now owned by B. W. Houghton, on Pleasant Street. His voice finally failed him and he was dismissed, December 25, 1856. He returned to Franklin, where he has

sine resided. After the recovery of his voice he engaged in lecturing on temperance, becoming well-known throughout the State. He was for many years secretary of the Massachusetts Total Abstinence Society. He is still engaged in preaching and lecturing. He is the author of a series of juvenile works, setting forth in a popular manner the lives of distinguished Americans.

T. F. Clary, a man of middle age, followed Mr. Thayer, being installed December 25, 1856. He came from Thetford, Vt., where he had concluded a successful pastorate. He was thought by many to be an able preacher, but misfortunes seemed to combine against him, resulting in his dismissal, March 30, 1859.

Horace Parker, a recent graduate of Amherst College, next supplied the pulpit for two years. He was ordained but not installed, May 31, 1861, the records of the council showing an implied protest at the irregularity of such a proceeding. He was a direct, practical preacher, and succeeded in adding members to the church. He has since labored in the churches at Leominster, Ashby, Pepperell, Lunenburg, and other places. In the winter of 1864-65 he was with the Christian Commission in the army.

A. H. Currier was ordained and installed December 3, 1862, and held the office of pastor for three years. This was during the stress of war times, and he gave strong support to all town measures in aid of the war. He built and occupied the house on Pleasant Street now owned by G. W. Norris. There was strength and reasonableness in his preaching and a peculiar degree of gentlemanliness in his manners. April 28, 1865, he was dismissed to become pastor in a much larger field of the Second Congregational Church in Lynn, where he labored for many years. He is now a professor in Oberlin College.

George G. Phipps was stated supply from September, 1865, to December, 1867. He was a very acceptable preacher and a genial companion. He went away to be settled over the church at Wellesley, where he remained for many years. He is now pastor of the Congregational Church at Newton Highlands.

M. M. Cutter followed as pastor, being ordained and installed December 29, 1868. He, too, was of a social turn, and was beloved, especially by those young people who, like himself, were devotees of the musical art. He was dismissed, at his own request, March 31, 1873.

E. P. Tenney was stated supply from the spring of 1873 till June, 1876. Subsequently his efforts in this vicinity in raising funds for Colorado College, of which he had been appointed president, were successful. He is now living in Manchester-by-the-Sea.

Thomas Morong preached first on July 1, 1876. Later he was hired as stated supply. On June 12, 1878, he was installed pastor, and remained in the service of the church till March 4, 1888. During this time the church prospered. Never did it seem easier

to raise all needed funds. Mr. Morong's thought was mature, often unique, always interesting. His sermons were carefully prepared, his illustrations being often drawn from the fields of science, with which he had made himself familiar. With him, in particular, botany was a favorite study. Taking it up first as a pastime, he became afterwards a close student and a recognized authority in this science. He is now engaged in making original researches in South America, being in the employ of certain botanical societies. He was finally dismissed from his pastorate February 24, 1890.

On the same day Charles H. Dutton was ordained and recognized as pastor of the church. Mr. Dutton is a graduate of Amherst College and has been a student in the Hartford Theological Seminary.

All the ministers of this church, it is believed, have been graduates of colleges. All have brought with them wives, who have in a greater or less degree assisted them in their pastoral work. Seven of the twelve have been ordained, thus showing the preference of this church for young pastors.

Baptist Church.—The first preaching service occurred December 30, 1841. The gathering was at William Waite's house, situated, as the streets are now named, at the corner of Main and Cherry. Aaron Haynes, of Southborough, delivered the sermon. On January 6, 1842, a regular prayer-meeting was established, the houses of the attendants in turn serving as the place of assemblage. Occasional preaching services were also held at dwelling-houses, and sometimes in the chapel then standing on the site of the present town-hall. In May, 1843, regular Sunday services were begun in the hotel kept by Thomas Barber (now Scott's Hotel), students from Newton Seminary officiating.

On November 8th, in the same year, the Unionville Baptist Church was organized, with a membership of forty-five, twenty-two residing in the town of Hopkinton, twenty-three in Framingham, many having formerly been regular attendants at the meetings of the Congregational Church and contributing to its support. Only two of the original members of the Baptist Church are now living,—Mrs. Caroline Bal-lard and Mr. Frank Chickering.

An effort was soon made to provide a house of worship. Through a committee appointed for the purpose, a lot of land now lying on the south side of Front Street, opposite the dwelling of Mrs. E. A. Forbush, was purchased of William Seaver, and a cellar, of which the remains can still be seen, was commenced. The purpose for which the land was to be used had been kept a secret, and when it became known that a Baptist church was going up at that point, there was a small tempest in the neighborhood. So this spot was exchanged for other land owned by Seaver, on the opposite side of the street,—the same now occupied by the hardware concern of Perry & Enslin. A frame chapel was now built on

the land thus finally acquired, having the dimensions of thirty-one by forty-five feet, and at a cost of one thousand dollars. This building was dedicated on March 20, 1845, by appropriate religious services, and at the same time was ordained Zenas P. Wilde, the first pastor of the church, who had responded favorably to the moderate call by the society of three hundred dollars annually. This building was occupied by the church for their religious services during the next five years, after which time it was sold and used for a boot-shop until its destruction by fire.

On the 30th day of April, 1849, the society adopted as their corporate name the Ashland Baptist Church. A larger place of convening was now found to be needed. A committee consisting of Benjamin Homer, Edwin A. Forbush, Charles Morse, Albert Leland and Richard Montague were chosen to erect a church upon the new lot of land lately purchased of Captain John Stone, situated on the east side of Summer Street. The committee's action resulted in securing for the society its present commodious building, which was dedicated on April 10, 1850, by services conducted by the pastor, B. F. Bronson. Funds to purchase the land and build this church were obtained by subscription, but not in sufficient amount; so that a debt remained, which was discharged by Oliver Brewer and Charles Morse, who received the notes of the church deacons for the moneys advanced by them. During the ministry of Rev. K. Holt this indebtedness, or what remained of it, was paid off, so that the society then became quite free from debt. Since then, on account of misfortunes, other debts have been incurred, though the church is now paying the running expenses. The present membership is one hundred and twenty, about one-third of whom are non-residents. The church records to March 26, 1846, the date of the burning of the E. A. Forbush boot-shop, were destroyed in that fire. A general minute has been entered covering the early years, and the principal facts relating to the church down to nearly the present time were recently gathered by Miss M. A. Homer and are preserved in a manuscript history.

Prominent among the early members of the society appear the names of Michael Homer, Benjamin Homer, T. S. Burlingame, who was the first deacon, Alvah Ormes, Lyman Fay and E. A. Forbush. Later Albert Leland became connected with the church, and afterwards to the time of his death was, perhaps, its most influential member. He was a man of property, and at his decease left to the church a devise of real estate which will eventually become operative.

For consistency and usefulness in more recent years the life of Dea. David R. Chamberlain is cited, who died February 14, 1880.

In calling a pastor it has not been the custom of this church, at least in recent years, to convene a council for installation ceremonies. Any person who has been ordained in the Baptist Church, is eligible to serve as pastor, and the only distinction in hiring

seems to be that the term may be limited, or left indefinite, according to the circumstances of the given case. Both methods have been practiced by this church, the present pastor, S. T. Frost, having been employed for an indefinite period.

Following is a list of pastors, with a few brief notes concerning them:

Z. P. Wilde closed his labors July 2, 1846, and after preaching in Marblehead, Boylston, and perhaps other places, became a missionary in New York City. He was noted for his able pastoral work.

B. F. Bronson was pastor from December 7, 1846, to November 10, 1850. He was afterwards connected with churches in Waltham, West Putnam, Connecticut and Andover, Mass., where he is now living in retirement.

Prof. Henry Day came from Brown University to take charge of this church March 1, 1851. He remained only till June 6, 1852, when he returned to his college work. He is remembered as an interesting preacher. Later he was a pastor in Philadelphia and in Indianapolis, and now resides in the last-named city.

N. Medbury, who lived upon the farm now occupied by William Enslin, was pastor from 1853 to 1854.

K. Holt officiated from January 3, 1856, to January 29, 1860, then going to Milford. He is now living in Petersham.

W. W. Ames was pastor from February 26, 1860, to September, 1861.

D. F. Lamson commenced work with the church April 20, 1862, and closed on November 29, 1865. He not only conducted his church ably, but worked for and with the town in promoting enlistments, and in awakening enthusiasm during the war. Later he became pastor of churches in Northboro', Worcester, Hartford, Conn., and in Manchester-by-the-Sea, where he is now residing.

R. B. Moody ably occupied the pulpit from April 26, 1866, to February 22, 1868. Afterwards he was for many years pastor of the church in Plymouth, and is now at the Monument Church in Charlestown.

G. B. Potter's term of service was from May, 1868, to November, 1870. He died at Newton, and was buried November 25, 1870, in Wildwood Cemetery. Annually his grave is decorated by his surviving soldier comrades.

W. R. Maul, who served from January 15, 1871, to November, 1872, was thought by Benjamin Homer, who listened to his sermons every Sabbath, to be the ablest preacher who had stood in the Baptist pulpit. He was afterwards pastor at Hoboken, and is now at the Mariners' Church on Staten Island.

J. D. Meeson followed, October 5, 1873, to April 1, 1875, going thence to Lebanon, N. Y. He is now in Melrose without a charge.

N. B. Wilson was pastor from November 1, 1875, to April 31, 1878, and L. S. Fitts from September, 1878, to May 1, 1881.

A. M. Higgins took charge on May 1, 1881, and continued to February 14, 1883, when he went to Somerville to reside. He now preaches at different places, as opportunities are afforded.

C. D. R. Meacham was pastor from May 1, 1883, to June, 1886, going at that time to Canton. He has built a residence in Stoneham.

D. G. Macdonald was pastor from August, 1886, to January, 1888, while pursuing his studies in the theological seminary. He has now returned to labor in Canada.

S. T. Frost, the present pastor, began his labors in July, 1888.

Methodist Episcopal Church.—There were people residing in town who, although they had been in the habit of attending religious services at the Congregational or Baptist Churches, had never felt quite at home.

It had been intended, whenever a favorable time came and sufficient means could be insured to carry it on, that a church of the Methodist faith should be established. In view of the growth of the town, and the fact that a competent leader having financial means—in the person of Charles Alden—was ready to take up the work, in 1866 the question of establishing a church began to be entertained. The movement commenced with the holding of prayer-meetings at the houses of believers in that faith. Besides Mr. Alden, Mr. Hayden, Hiram Mellen, George Scott and others, including persons from Hopkinton, became interested and met together at the meetings. It was not till the spring of 1868 that plans had become fully matured. At that time Mr. Alden attended the General Conference, and, making known the purpose of the Methodist people here to establish a church, obtained the assignment of his friend, Rev. George W. Mansfield, as a minister to this station. Mr. Mansfield had been resting for two years, that he might recover his broken health. He came at once and opened his work, commencing preaching services in the Town-hall, which were continued here each Sabbath, until the succeeding spring.

Soon after the arrival of Mr. Mansfield the work of establishing a church was begun. The records show that on July 15, 1868, the Methodist Episcopal Church of Ashland was organized, according to the forms of law. On July 5th, preceding, the Quarterly Conference had appointed as trustees, Charles Alden, George Scott, William A. Tilton, J. N. Pike, and A. T. Davis. At the meeting of the trustees held on the date of its organization, J. N. Pike was chosen president, and A. T. Davis secretary. At the same meeting a committee on the building of the church was appointed, consisting of the persons above named with the exception of Mr. Davis, and with the addition of three more members—Charles H. Tilton, Alvah Metcalf and John Crisness. This committee went speedily to work, Mr. Alden taking a very active part. A lot of land situated on the eastern side

of Alden Street, at the junction of Church Avenue, was furnished by Alden from lands owned by himself. Plans for the building were obtained and the work commenced and pushed forward, so that before the next spring the church was completed, furnished, provided with an organ, and ready for occupancy. The church was dedicated free of debt, March 3, 1869, the presiding elder conducting the exercises. The funds for building and furnishing this church which, including all expenses, cost about \$15,000, were furnished chiefly by Charles Alden in the first instance, and it is said in the final outcome, that the enterprise cost him \$8000 in actual money. At a meeting of the trustees held May 24, 1869, the following vote was passed, "that we, the trustees accept the deed of the M. E. Church from Brother Alden," and that the "trustees extend to Brother Alden a vote of thanks for the interest he has taken and the money he has expended in building and furnishing the M. E. Church." For the purpose of reimbursing Mr. Alden in part for moneys advanced, subscriptions were obtained from the people. About \$500 were raised at a fair held by the church, which were used to defray expense of carpets and other furnishings. In the building of the church and collecting a congregation, the efforts of the pastor and his wife were constant and effective, much of their success being due, doubtless, to skill derived from previous experience in similar work. This church started off with a membership of sixteen, which has been increased so that the present number is one hundred and thirty. Its original members came in part from the other churches, but there was never any other than kind feelings exercised toward the churches from which they came. Alden had for several years, up to the time when he began to attend the Methodist meetings, been a regular attendant at the Congregational Church, and superintendent of its Sunday-school. That church had recently shown courtesy toward its Methodist attendants by hiring for several months as its pulpit supply, a Mr. Cushing, who was a Methodist minister. This church has freely joined with other churches in all work which can best be done unitedly. A flourishing Sunday-school is connected with the church.

The succession of pastors is as follows, their terms beginning about April 1st, the regular time for change of ministers in this denomination. George W. Mansfield was with the church from April, 1868, three years. His excellent work has already been alluded to. His wife was a very able assistant. Since leaving Ashland his health has allowed him to continue in his ministerial labors. He has now been at Gloucester since April, 1889.

A. O. Hamilton was with the church two years beginning April, 1871. He was noted for good discourses, and particularly for his fine performances as a reader. While here he was pursuing, as he found time, the study of medicine, and is now a physician

in practice in East Boston, having taken charge of but one church since leaving Ashland.

Lorumus Crowell was a scholarly preacher and had formerly been a presiding elder; coming in 1873, he remained one year.

In 1874 Henry Lummis commenced a pastorate of three years, during which time he became greatly respected both by his church and the people of the town. As a member of the school committee, opportunity was afforded for making use of his wide and accurate scholarship. After serving as pastor at various stations, he is now discharging the duties of a professor in one of the Western colleges.

J. R. Cushing followed in 1877, remaining three years. He was a genial man and an acceptable preacher. He too became well known in town, holding for a time the office of school committee. He has left samples of his large, even handwriting in the committee's record-book, having served as secretary of that board. He is now pastor of the Stanton Avenue Church in Boston.

Elias Hodge followed in 1880, his term of service being two years. He was an acceptable preacher and an agreeable companion.

W. H. Cook came in 1882, remaining one year.

E. A. Manning was an able preacher and a wide-awake citizen. He was often employed to report public meetings for the press. It is in this capacity that for many years his erect figure upon the stage has become familiar to the frequenters of the Chautauqua meetings at the Framingham camping-ground. He came to Ashland in 1883 and remained two years.

In 1885 Pastors Full and Hopkins supplied.

J. C. Smith was assigned to this church in 1886. There were those who thought his sermons equal to any that have been delivered in the church. He resigned in the summer of 1887, and has recently deceased.

C. H. Talmage, while pursuing his course of theological study in Boston University, was sent here to supply the pulpit in the last part of 1887. In the following year he was appointed pastor. He manifested energy in all his work. He succeeded in collecting the scattered congregation and in securing much-needed repairs of the church edifice. The next year he was assigned to a church in Boston Highlands.

Harvey H. Paine came in 1889 and is still with the church.

CIVIL WAR.—When the war broke out in 1861 the town was in debt \$16,000, chiefly for the cost of the Town Hall built six years before. The town, however, assumed readily the new burden imposed by the war. No one at first supposed that there was to be a long, hard trial of strength between the contending parties. As the war progressed it became apparent, however, that only the greater resources of the North would enable that section finally to prevail. The town of Ashland came forward in response to every call and provided its full quota. At first it was only

necessary to appeal to the patriotism of the citizens to secure the required number of volunteers. Afterward inducements were offered in the way of bounties to the persons enlisting and aid to their families. The bounties paid varied widely, but tended to increase as the war went on, sometimes running above \$400. Ashland provided for the calls made out of its own citizens, if a very small number of recruits near the close of the war be excepted. When soldiers were wanted public meetings were held, which were addressed by citizens and by speakers from abroad. At the close of the meeting volunteers were called for, and under the inspiration of the hour were readily obtained. The first call by the President for twenty companies of three months' men, made April 15, 1861, was filled from the State Militia. Of the thirty-nine regiments of three years' men called for on May 3, 1861, Massachusetts procured by solicitation the privilege of sending six regiments. In the Eleventh and Twelfth, sent forward at this time, Ashland furnished a considerable number of men.

In July of the same year an act of Congress authorized the President to call for 500,000 men, and thenceforward requisitions were made upon the States as soldiers were wanted. In response to the calls upon the town of Ashland, enlistments were made onward quite to the close of the war, chiefly for three years. The Thirty-second Infantry and Second Cavalry contained a large number of these men. In response to the President's call of August 4, 1862, for 300,000 nine months' men, a considerable number enlisted in the Fifth Infantry. The other enlistments are widely scattered in the service, and are mostly for three years, a few being for one year and one hundred days, respectively. The town made liberal promises to its volunteers. Taking early advantage of the war acts passed by the Legislature, they voted in the fall of 1861 to appropriate money in aid of the families of the soldiers, and in the summer of 1862 for the encouragement of enlistments. Subsequently similar votes were passed, adding to the sums appropriated; and in March, 1863, it was voted that the selectmen be instructed to send for the bodies of deceased soldiers. In 1865 the poll-taxes of the soldiers were abated for that year. The whole amount of money appropriated and expended by the town for war purposes was about \$12,000; a sum nearly as large, raised and paid as aid to the families of the soldiers, was afterward repaid by the State. According to the report of the Adjutant-General, Ashland furnished one hundred and eighty-four men for the war, which was a surplus of eleven above all demands.

Among these soldiers, three only were commissioned officers, these men having been promoted from the ranks. The following is a roll of officers and privates, intended to include residents of Ashland, and persons serving upon its quotas. The first date given is that of *muster in*. A final date standing unexplained shows the close of service, which may be by expira-

tion of term, by order of War Department, or by other discharge.

5th Regt. Inf. (100 days), Co. G.—Webster Brooks, corp., July 27, '64, November 16, '64; Elbridge Moulton, July 27, '64, November 16, '64; Norman Smith, July 27, '64, November 16, '64.

Company K.—Moses Clark, July 19, '64, November 16, '64; Charles H. Jewell, July 19, '64, November 16, '64.

1st Unattached Co. Inf. (100 days)—Frank A. Johnson, 1st lieut., Aug. 9, '64, November 16, '64.

1st Unattached Co. Inf. (1 year)—Otis Chickering, November 2, '61, June 27, '65; Joseph P. Ockington, Nov. 25, '64, June 27, '65.

5th Regt. Inf. (9 months), Co. C.—Charles E. Kimball, September 16, '62, July 2, '63.

Company E. (Mustered in, September 16, '62; mustered out July 2, '63)—Lewis H. Kingsbury, sergt.; Henry Perkins, corp.; Frank A. Wall, corp.; Webster Brooks, Geo. S. Chamberlain, Francis H. Chickering, Albert B. Comey, S. Augustus Davis, George A. Ellis, Levi Fairbanks, Geo. S. Fisher, Henry M. Frail, John W. Gowell, Ezra Morse, corp.; Marcena M. Greenwood, Joseph W. Hartsborn, Eliphalet J. Jones, Elbridge Moulton, Joseph P. Ockington, John A. Parker, Augustus Perkins, Charles C. Pollard, Stephen Spooner, Dana M. Wenzell, William H. Wheeler; Henry G. Harriman, corp., Jan. 13, '63, died of typhoid fever at Newbern, North Carolina.

42d Regt. Inf. (9 months), Co. B.—David Robinson (Holliston) September 3, '62, August 20, '63.

43d Regt. Inf. (9 months), Co. B.—Stanislaus Fontaine, October 11, '62; John Gavin, October 11, '62, July 30, '63; Thomas Rowley, October 11, '62.

44th Regt. Inf. (9 months) Co. K.—Avery Sylvester, September 12, '62, June 18, '63.

45th Regt. Inf. (9 months), Co. F.—William F. McNamee (Frammingham) September 26, '62, July 7, '63.

Company L.—Charles H. Moore (Marlboro'), October 7, '62, October 21, '62, transferred to "F", Co., July 7, '63.

5th Bat. Lt. Art. (3 years)—Russell Emerson, December 22, '63, wounded at Berryville, Va., discharged June 12, '65.

15th Bat. Lt. Art. (3 years)—John H. McGarrity, Sept. 16, '64, Jan. 14, '65, trans. 6th Battery, June 19, '65; Eugene Shepard, Sept. 16, '64, Aug. 4, '65.

2d Reg. H'vy Art., Co. B.—Fred. O. Grout (Blackstone), Aug. 31, '64, Jan. 15, '65, trans. Co. E, 17th Inf., June 30, '65; Edward C. Marsh, July 29, '63, Sept. 3, '65.

Company E.—Ora P. Howland, Sept. 20, '64, June 26, '65; William H. Nason, Sept. 19, '64, Dec. 16, '64, trans. 17th Inf., Co. G, prom. corp., June 30, '65.

Company G.—Geo. P. Read, Dec. 7, '63, April 4, '64, died Andersonville, Ga.; Avery Sylvester (Worcester), Dec. 7, '63, Oct., '64, died Florence, S. C.; Wright Walker, Sept. 19, '64, Jan. 17, '65, trans. 17th Inf.

Company L.—Amos R. Babcock, Dec. 22, '63, Sept. 3, '65; William D. Bell, Dec. 22, '63, Sept. 3, '65.

4th Reg. H'vy Art. (1 year), Co. K. 25th Unattached Co. H'vy Art.—Charles C. Pollard, corp., Aug. 23, '64, June 17, '65.

29th Unattached Co. H'vy Art. (1 year)—James Madden, Sept. 19, '64, June 16, '65.

2d Reg. Cav. (3 years), Co. B.—George A. Cook, corp., Sept. 23, '63, Feb. 23, '64, prisoner, June 13, '65; Eastman Dudley, Sept. 17, '63, July 20, '65; George F. Duley, Sept. 22, '63, Oct. 4, '64, died Andersonville, Ga.; E. A. Forbush, Jr., alias James Smith, Sept. 14, '63, July 20, '65; George V. Marsh, Jan. 5, '64, July 20, '65; Stephen Spooner, Sept. 4, '63, Feb. 22, '64, killed by guerrillas near Drainesville, Va.

Company C.—Benjamin Johnson, Dec. 15, '63, Dec. 30, '63.

Company D.—Stephen A. Cole, sergt., Jan. 5, '64, wd. Fort Stephens, Md., July 20, '65; Arthur L. Parker, Dec. 8, '63, wd. Five Forks, Va., May 24, '65, for disability; Harlan P. Boyd, Jan. 5, '64, July 20, '65, as absent, sick; Orton W. Cole, Jan. 5, '64, July 20, '65; Russell W. Collier, Jan. 5, '64, wd. Vienna, Va., July 6, '65; Charles D. Hart, Dec. 21, '63, wd. Fort Stephens, Md., trans. V. R. C., July 20, '65; Joseph W. Hartsborn, Jan. 5, '64, July 20, '65; George W. Morse, Jan. 5, '64, Sept. 13, '64, wd. Shenandoah Valley, Va., Jan. 21, '65; Edward McKnight, Jan. 5, '64, Sept. 13, '64, lost right arm, Shenandoah Valley, Sept. 11, '65, from hospital; Arthur W. Stiles, Jan. 5, '64, July 20, '65.

Company E.—Augustus J. Davis, (S. Augustus Davis), Sept. 9, '64, June 13, '65; Charles F. Davis, Sept. 6, '64, June 13, '65.

Company F.—John S. Notlage, Feb. 23, '61, exp. and died Sept. 29, '61, Danville, Va.

Company H.—Chas. E. Duley, corp., Dec. 21, '63, Aug. 25, '64, wd. Berryville, Va., July 20, '65; John Cowhey, Dec. 31, '63, July 10, '65, for disability.

Company K.—Hiram Mellen, Dec. 12, '63, July 20, '65.

Company Unknown.—Dennis McCarthy.

1st Reg. Inf. (3 years) Co. K.—Charles W. Hathaway (Frammingham), Aug. 17, '61, May 25, '64.

2d Regt. Inf. (3 years), Co. K.—Thomas K. Clapp, May 25, '61, wd. bat. Cedar Mt., Aug. 9, '61, for disability; Benjamin F. Montague, May 25, '61, Aug. 9, '62, killed at bat. Cedar Mt.; Timothy Sullivan, May 25, '61, Oct., '63, enl. U. S. Army.

10th Regt. Inf. (3 years), Co. C.—Martin Kennedy (Boston), Dec. 8, '63, June 21, '64, trans. 37th Inf., trans. 20th Inf., June 19, '65.

11th Regt. Inf. (3 years) Band (must. in Aug. 3, '61, must. out Aug. 8, '62)—Samuel S. Baker, Abner E. Bell, Charles S. Brewster, George F. Coxon, Edward Daniels, Lorenzo Frost, Ben. H. Hartsborn (Sept. 23, '61, disability), Robert J. Neal (Boston), Wm. A. F. Noyes, Augustus Perkins, Charles Spooner.

The same band, leaving out Hartsborn and adding Benj. G. Brown. James H. Dagnun, Gilbert W. Holbrook and Prince Spooner, served (three years) in Third Brigade, Second Division, Second Army Corps, from July 10, '63, to July 1, '65.

Company A.—John Shaughnessy (Boston), June 13, '61, Feb. 22, '64.

Company C.—Edward Gross, June 13, '61, Aug. 15, '62.

Company H.—William Mansfield, June 13, '61, Feb. 22, '64, to re-enlist; William Mansfield, corp., Feb. 23, '64, July 14, '65; Charles R. T. Knowlton, June 13, '61, July 13, '63, killed Gettysburg, Pa.

Company L.—William Maley, (Boston), June 13, '61.

12th Regt. Inf. (3 years), Co. B.—Granville H. Smith, corp. (Frammingham), June 26, '61, Oct. 20, '62, died of fever at Smetonketon Hospital; Isaac R. Babcock, June 26, '61, July 8, '64; Alonzo G. Duran (E. Raymond, Me.), June 26, '61, Sept. 17, '62, killed at Antietam, Md.; Lorenzo Frost, June 26, '61, Aug. 1, '61, trans. 11th Inf.; Arthur L. Parker, June 26, '61, Feb. 2, '63, wd. and disch.; John B. Whalen, June 26, '61, July 8, '64.

Company F.—Augustus Perry, July 22, '63.

Company G.—Thomas Johnson, July 22, '63; Emil Ruff, Sept. 22, '63; Charles L. Stoddard, July 21, '63, April 6, '64, disability.

Company H.—James L. Bell, July 21, '63, June 25, '64, trans. 39th Inf., Co. B, June 29, '65; Henry R. Smith, July 21, '63, June 25, '64, trans. 39th Inf., Co. B, died Andersonville, Ga.

Company L.—George A. Cook, corp., June 26, '61, Oct. 12, '62, for wounds rec'd in battle; Hans C. Hanson, July 21, '63, June 25, '64, trans. 39th Inf., Co. D, died Andersonville, Ga.; Sanford P. Lane, July 21, '63, June 25, '64, trans. 39th Inf., prisoner and died probably at Andersonville, Ga.

Unassigned Recruits.—Francis Baldwin, July 21, '63; William Ryan, Sept. 22, '63, April 12, 1864.

13th Regt. Inf. (3 years), Co. H.—Charles E. Duley, (Sudbury) July 16, '61, Dec. 15, '62, disability.

Company L.—James Sullivan (Marlboro'), July 16, '61, Aug. 1, '64.

16th Regt. Inf. (3 years), Co. B.—Edward T. Dean, sergt., July 2, '61, July 27, '64; Albert Hadley, corp. (Holliston), July 2, '61, July 27, '64; Eastman Dudley (Sherborn), July 2, '61, Dec. 11, '62, for wounds received in battle; Chester R. Lessor, corp., July 2, '61, May 13, '63, killed Chancellorsville, Va.; Edward Enslin, July 2, '61, July 27, '64; William H. Maynard, July 2, '61, Jan. 7, '62, disability; Edwin L. Perry, Nov. 4, '61, Dec. 12, '63, trans. V. R. C.; Albert A. Whittemore, July 2, '61, July 27, '64; Elbridge G. Whittemore, July 2, '61, Sept. 24, '61, disability.

17th Regt. Inf. (3 years), Co. F.—Wright Walker, Sept. 19, '64, June 30, '65.

18th Regt. Inf. (3 years), Co. F.—Geo. H. Houghton, Aug. 24, '61, Dec. 19, '62.

20th Regt. Inf. (3 years), Co. A.—Michael Hennessey, Mar. 4, '62, Mar. 29, '64, to re-enlist; Michael Hennessey (Cambridge), Mar. 30, '64, taken prisoner, died Feb. 22, '65, Salisbury, N. C.

Company C.—Albert Reiss, sergt. (Boston), July 18, '61, wd. at Fredericksburg, Va., Feb. 18, '62; Jacob Bender (Boston), July 18, '61, Mar. 5, '62, exp. and died.

Company I.—James McGuire, Mar. 1, '62, May 28, '62, wounded Fredericksburg, Va.

Company J.—John Wells, Sept. 9, '64, June 8, '65.

Unassigned Recruits.—Michael Bradley, Mar. 4, '62; James Kennedy, Mar. 4, '62.

21st Regt. Inf. (3 years), Co. K.—Mathias Heckman, Aug. 29, '62, Aug. 30, '64.

Albert M. Kaly

22d Reg. Inf. (3 years), Co. K.—Adoniram J. Smith, Oct. 4, '61, Jan. 31, '63, disability.

23d Reg. Inf. (3 years), Co. A.—Elliott S. Reed, Oct. 9, '61, Dec. 2, '63, to re-enlist; Elliott S. Reed, Dec. 3, '63, July 28, '65.

24th Reg. Inf. (3 years), Co. A.—George H. Warren, Sept. 6, '61, Sept. 6, '64.

25th Reg. Inf. (3 years), Co. A.—Frederick A. Nottage, Oct. 10, '61, Dec. 17, '63, to re-enlist for Hopkinton, July 13, '65.

Company D.—Martin L. Parmenter (Webster), Oct. 9, '61, Dec. 17, '63, to re-enlist; Martin L. Parmenter (Webster), Dec. 18, '63, July 13, '65.

Company H.—John S. Powers (Framingham), Aug. 14, '62, Jan. 18, '64, to re-enlist; John S. Powers (Framingham) Jan. 19, '64, June 3, '64, killed Cold Harbor, Va.

Unassigned Recruits.—Aaron Rice, Feb. 23, '64, Feb. 26, '64.

26th Reg. Inf. (3 years), Co. J.—John H. Balcom, musician (Pepperell), Sept. 2, '61, Dec. 31, 1864, to re-enlist; John H. Balcom, musician, Jan. 1, '64, Aug. 26, 1865.

29th Reg. Inf. (3 years) Co. H.—John H. Aldrich, Dec. 16, '61, Oct. 22, 1862, died Long Island, N. Y.

31st Reg. Inf. (3 years), Co. K.—Willard W. Watkins, Feb. 4, '62, Feb. 4, 1864, to re-enlist; Willard W. Watkins, sergt., Feb. 15, '64, Sept. 9, 1865.

32d Reg. Inf. (3 years), Co. H.—Augustus A. Coburn, 1st sergt., Jan. 5, '64, Dec. 4, 1864, 2d lieutenant, at close of war; Albert C. Andrews, 1st sergt., Jan. 5, '64, June 29, 1865, absent, wounded; Aug. A. Coburn, sergt. (Framingham), Aug. 11, '62, Jan. 4, 1864, to re-enlist; William Forman, sergt., Jan. 5, '64, June 29, 1865; Albert C. Andrews, corp., Aug. 11, '62, Jan. 4, 1864, to re-enlist; James L. Bell, corp., July 21, '63, June 29, 1865; William Forman, corp., Aug. 11, '62, Jan. 4, 1864, to re-enlist; Geo. B. Twitchell, corp., Jan. 5, '64, wd. Sept. 16, 1864, trans. V. R. C. Mar. 28, 1865; Oscar W. West, corp., Aug. 11, '62, Jan. 4, 1864, to re-enlist; Oscar W. West, corp., Jan. 5, '64, July 11, 1865; Edward F. Whittemore, corp., Jan. 5, '64, May 12, 1864, lost right arm near Spotsylvania, June 3, 1865; Willard Aldrich, Aug. 11, '62, Jan. 4, 1864, to re-enlist; Willard Aldrich, Jan. 5, '64, July 12, 1865; William Fitz, Aug. 11, '62; Preston W. Forbush, Aug. 11, '62, assigned to quartermaster's dept., May 30, 1865; David Hennessey, Aug. 11, '62, Jan. 4, 1864, to re-enlist; David Hennessey, Jan. 5, '64, May 23, 1864, prisoner North Anna River, paroled Nov. 30, 1864, died Annapolis, Md.; Frank A. Johnson, Aug. 11, '62; John Maley, Aug. 11, '62; Andrew J. Perry, Aug. 11, '62, Dec. 18, 1863, trans. V. R. C., Jan. 4, 1864, to re-enlist; Andrew J. Perry, Jan. 5, '64, June 18, 1864, wd. at Petersburg, July 13, 1865; Silas S. Seaver, Aug. 11, '62, Jan. 4, 1864, disability; Geo. B. Twitchell, Aug. 11, '62, Jan. 4, 1864, to re-enlist; George H. Vose, Aug. 11, '62, May 30, 1865; Edward F. Whittemore, Aug. 11, '62, Jan. 4, 1864, to re-enlist; Samuel G. Winch, Aug. 11, '62, May 30, 1865.

33d Reg. Inf. (3 years), Co. C.—William Bell, Aug. 6, '62, Sept. 12, 1863, trans. V. R. C., Sept. 5, 1864, disability; George Scott, Aug. 6, '62, June 11, 1865.

35th Reg. Inf. (3 years), Co. A.—Wm. H. Frankland, corp., Aug. 9, '62, Oct. 4, 1862, sergt., Nov. 3, 1863, disability.

Company C.—John W. Hodges (Chelsea), Aug. 19, '62, Dec. 13, 1862, killed.

36th Reg. Inf. (3 years), Co. F.—Disch. A. Metcalf, musician, Aug. 13, '62, April 30, 1864, disability.

36th Reg. Inf. (3 years), Co. K.—William O. Andrews, Aug. 20, '62, Nov. 3, 1863, disability.

50th Reg. Inf. (3 years) Co. R.—Levi Ramsden, Jan. 4, '64, wd. Spotsylvania, Feb. 9, 1865, disability.

Company C.—Abner P. Chase, Jan. 4, '64, Sept. 17, 1862, wd. Antietam, Va., April 8, 1865, disability.

68th Reg. Inf. (1 year), Co. E.—Lionel D. Phillips, Sept. 9, '64, Jan. 6, '65.

Veteran Reserve Corps.—Edward J. Ford, Sept. 20, '64.

Naval (3 years).—William Sloan, Aug. 19, '64, furnished by J. N. Pike; John Sullivan, Aug. 19, '64, furnished by John Clark; John Wilson, Oct. 20, '64, furnished by Henry Cutler.

8th Marine Reg. Inf. (3 years), Co. A.—Moses R. Adams, Sept. 1, '61, Sept. 1, '64.

5th N. H. Reg. Inf. (9 months).—Lorenzo Frost, after Aug. 8, '62.

15th N. Y. Cav. (1 year), Co. K.—George T. Huxley, Oct. 8, '61, trans. 3d Provisional N. Y. Cav. Sept. 21, '65; Wakefield I. Higley, Oct. 8, '64, trans. 3d Pro. N. Y. Cav., died in hosp. Washington, D. C., Sept. 4, '65.

Re-riding in or Credited to the Quota of Ashland, but Regiment, if any, unknown.—Lorenzo Bolden (colored), Vicksburg, Miss., Dec. 3, '64; Adol-

phus Burgess (colored), Fort Monroe, Feb. 6, '65; Benj. Davenport (colored), Vicksburg, Miss., Nov. 3, '64; Herman S. Greenwood, July 12, '63, Dec. 10, '63, disability; John Harvey, enl. out of town; Henry W. Jackson; Thomas C. Pond, July 21, '63, disch. for disability; Wm. H. Pratt, July 21, '63, Sept. 16, '63, disability; Henry Wellington.

Drafted (3 years) and Farnished Substitutes in Paid Commutation.—Lyman Beck, July 10, '63; E. Francis Chaffin, July 10, '63; Charles Cloyes, July 10, '63; Daniel Fenton, July 10, '63; Edwin Perry, July 10, '63; Alfred B. Rugg, July 10, '63; Samuel Seaver, July 10, '63; Charles H. Tilton, July 10, '63; J. Edward Tilton, July 10, '63; Jacob Winchester, July 10, '63; Curtis B. Young, July 10, '63.

BIOGRAPHICAL.

ALVAH METCALF.

Alvah Metcalf was born in Appleton, Maine, April 12, 1824. He was the eighth in descent from Michael Metcalf, who came from England, and settled in Dedham, in 1637. His father was born in Franklin, Mass, but had removed to Maine when a young man, and there his eight children were born and brought up. Alvah was the second child by his mother, Melinda Phillips, of Auburn, Mass.; he is the seventh in direct line from Rev. George Phillips, the first minister in Watertown, Mass., who came to America from England in 1630. His opportunities for an education were few, but he improved what he had. He attended district school only winters, and when there was no school in his own district he went to another near by. In those days a fire-place occupied the greater part of one end of the room, and four-foot logs were rolled in without being split. During the summer of his eighteenth year he worked in Massachusetts, and in the winter of 1845 he obtained his last schooling. But his education did not end there. He has always been a great reader, giving especial attention to history and science. Natural Science is his hobby and he never tires of studying the works of the great naturalists. His strong application and his retentive memory have stored his mind with knowledge, so that he may, without doubt, be classed among the best of self-educated men.

While at home in Maine, Mr. Metcalf had worked chiefly at coopering, but at the age of twenty-one he came to Massachusetts. Arriving at Boston in the morning, he at once set out by stage for Franklin, where he was to work during the summer. He reached his destination at night, not having eaten anything since he left the schooner in the morning, for he was afraid that he might want his only remaining six-pence for some other purpose. The next two years he spent in a cooper-shop in Smithfield, R. I.

Mr. Metcalf obtained his first experience in wood-working when he was employed by Milton Whiting, in his saw and grist-mill, Unionville, Franklin. Here he worked for seventeen dollars a month, laboring at least fifteen hours a day. The next year 1850, he took charge of the business himself, and hired the mill for four years. In 1855 he hired part of the mill

belonging to Peter Whiting. The upper part was used for making shoddy and cotton batting, but in the lower story Mr. Metcalf sawed logs and made the boards up into boxes that were used for straw-goods, boots and shoes. Many places in this vicinity were supplied from this mill. In 1856 he bought the Luther Rockwood farm in Holliston for \$2600, and moved his family there.

Farming, however, didn't agree with him, or rather he didn't like farming, so the next year he traded the farm for the mill and house that he now owns in Ashland. At this time he was worth about \$4000.

The original dam at this place was built by John Cloyes about 1835. It was eighteen inches high, and the power obtained was only sufficient to run a turning-lathe and a grind-stone. Later a mortising machine was put in, and sash and blinds were manufactured. In 1844, Cloyes sold out to Daniel White, who the next year conveyed it to Henry Bacon. In 1847 it came into possession of H. F. Goodale, of Marlboro', who let it to Micah B. Priest, also of Marlboro'. It was with Mr. Priest that Mr. Metcalf exchanged his farm in 1857, and became owner of the mill where he has since carried on the manufacture of boxes, and gradually increased the business.

During the war this mill always had plenty to do, because there was always a supply of lumber on hand, and customers could be sure of prompt attention to their orders.

Adjoining the mill is a small shop where for about five years kegs were made for Emery Mills, then situated in the eastern part of the town. Nearly all of the towns in this vicinity have at one time or another been furnished with boxes, as South Framingham, Natick, Holliston and Westboro'. The quality of box furni-hed has always been first-class, and orders are quickly filled.

In 1870 a new and larger mill was built in place of the old one in such a way that only a few hours were lost in changing from the one to the other. The new mill is 44x61 feet, with two ells each 24 feet square. The attic is used for storing boxes and lumber, the second story is given up to the manufacture of boxes, the ground floor is used chiefly for planing, while in the basement are the water-wheels and the engine, the latter necessary through the increased business. The engine is of twenty-five horse power. A stone boiler-house has been built behind the mill, and a large chimney constructed. Two years ago a stone dam was built in the place of the old wooden one. New and improved machinery has been added, and recently a large tank and automatic sprinklers have been introduced for protection against fire. Over two million feet of lumber is used annually, and \$30,000 worth of boxes were sold. From 1871-75 the manufacture of flocks was carried on in addition to the box business, while the stones for grinding grain were left out of the new mill.

Mr. Metcalf has been twice married—first, May 30,

1850, to Harriet H. Vose, and second, to Harriet M. Makepeace, October 11, 1859. By his first marriage he has three children; by his second, seven. His services to the town have been many and varied. He has been measurer of firewood, highway surveyor, overseer of the poor, assessor and School Committee. For nine years he was one of the trustees of Wildwood Cemetery, and on the Board of Selectmen he has served six years. He has been one of the trustees of the Methodist Church since its beginning, having also been one of the building committee. He is also a member of the Masonic Order.

In 1877 he took a trip to California, being gone two months. He visited Santa Barbara, Ventura, Los Angeles and the Yosemite Valley. The valley is entered by two routes from Merced—the Mariposa and Coulterville. Mr. Metcalf went in by one of these routes and came out by the other, traveling over four hundred miles by stage. He was one of a party of eight who, with a guide, took mustangs and rode out to the Mariposa Grove of Big Trees. He brought home with him a great many curiosities, most of them illustrative of his favorite study—natural science. These now fill a large cabinet in his home and are with much interest shown to all his guests.

In 1881 he lost a part of his left hand in a planer. It was cut off below the wrist. Being a temperate man the wound soon healed, and in a week he was out to the mill to look after his business. He retains the use of his wrist and the amount of work he can do, though maimed, is surprising. While on the Board of Selectmen he was zealous in suppressing the liquor traffic.

He has always been a hard worker and a careful planner. Though he has lost considerably in business accommodations, he has never failed to meet his own obligations, and by personal supervision and strict attention to business he has built up the large manufactory he now controls.

CHARLES TAFT ALDRICH.

The ancestors of Mr. Aldrich were Englishmen, some of whom came early to America, settling in Rhode Island, near the site of the present enterprising town of Woonsocket. The grandfather of the subject of this sketch was Isaac Aldrich, one of the pioneers in woolen manufacturing in New England and engaged in it soon after Samuel Slater introduced cotton machinery at Pawtucket.

Charles, son of Isaac, born in Rhode Island in 1815, married Abigail K. Taft, of Uxbridge, in 1842. They had eight children, of whom Charles T. is the oldest, who was born in Millbury, Mass., April 12, 1845. His childhood and youth were passed in company with his brothers and sisters at the home of his parents. When about four years old he met with an accident which resulted in a lameness for life. It was thought his lameness would prevent his taking

C. J. Aldrich.

Elias Groot

any part in the business in which many of this family had been engaged, so that after leaving the grammar school he attended the High School with the intention of fitting for college. During this stage of preparation for the higher degrees of learning the desire to learn the business of manufacturing frequently showed itself. He finally decided to waive the college course and master the details of woolen manufacture. To do so he entered a woolen-mill in which his father, Charles, was a superintendent, and there learned the business, and in 1862 went to Bellingham, Mass., and there commenced the manufacture of flannels with his father. In this business he was successful until 1868, when the mill was burned, entailing much loss. He then went to Kansas with the intention of farming on a large scale, but the great drouth of 1869 put an end to his efforts in this direction. Leaving Kansas, he went into Arkansas and built a flour-mill in the vicinity of "Pea Ridge," a location made memorable by the great battle fought there during the War of the Rebellion. Owing to illness caused by the climate, he returned to New England in 1871, and commenced the manufacture of horse blankets in Worcester. This business was very profitable, owing to his using material that had not been utilized before, and also to the prevalence of the "epizootic" distemper among horses that year, which created an unusual demand. In 1873 Mr. Aldrich settled in Ashland, where he commenced the manufacture of satinets and blankets for the New York market. This manufacturing seems likely to continue in the family, as his oldest son, Charles T., Jr., is engaged in the same business in a mill in Worcester County, and the other sons are with their father at home. Mr. Aldrich married Emma G., daughter of Smith Aldrich, of Blackstone, in 1864, and from this union there are Charles T. Jr., born July 19, 1866; Henry A., born March 31, 1868; Louis H., born November 4, 1870, and Alice M., born June 11, 1873. Mrs. Aldrich died November 23, 1889, deeply mourned by her family and friends. Mr. Aldrich is a Methodist in religion and a Republican in politics. Although interested in public matters, he has avoided political offices and attended closely to his business and built up a pretty home and village about his mills. Mr. Aldrich has recently sustained a severe loss in the burning of his mill buildings, October 7, 1890. This water privilege, situated on the Sudbury River, is a very valuable one, and the mills will be rebuilt, unless the city of Boston shall decide to take the water, a project now under discussion.

Mr. Aldrich is a specimen of robust manhood from which the lameness of his childhood does not seem to detract, and belongs to the class of New Englanders known as self-made and successful.

ELIAS GROUT.

The subject of this sketch is a descendant in the sixth generation of Captain John Grout, the famous

millor of Sudbury, who came to this country as early as 1638. His father, Elias, Sr., was born in Medfield, but settled in Sherborn, and in 1801 removed to the south part of Framingham. He served in the Revolutionary War, was a "minute-man" from Sherborn in 1775, and was in the battle of Bunker Hill.

Elias, Jr., the youngest son of Elias, Sr., and his wife, Eleanor (Dadmun), was born June 3, 1816. He received a good education at the Framingham and Leicester Academies, and was a successful teacher in the common schools for many years. At the incorporation of Ashland, in 1846, his farm was included in the new town, which has honored him with most of the offices within her gift. He was representative in the Legislature of 1853, selectman, assessor, overseer of the poor, school committee for many successive years.

Being raised upon a farm he has ever taken an intelligent interest in agriculture; was president of the Middlesex South Agricultural Society, 1861-62, and a member of the State Board, 1863-65.

Mr. Grout has often been intrusted with public and personal matters, where carefulness, integrity and sound judgment were required. In 1852 he was sent to England by the Jennings Heirs Association, to investigate their claims to the great William Jennings estate there. After a careful inquiry and search of the archives of the Library of the British Museum, Doctors' Commons, Chancery Courts, Government State Paper Office, and other sources, he reported to his associates that no claim of real or supposed heirs in America could be sustained—a conclusion fully confirmed by agents since employed.

In 1865, Mr. Grout was engaged by H. J. Sargent and other heirs of the distinguished James Swan, formerly of Boston, to go to Charleston, West Virginia, to examine into the legal status of the vast tracts purchased by said Swan in the last century, 1780-1790. On this trip, in May, 1865, he met a son of the late Josiah Randall, trustee of certain French claimants to these lands, and the following winter he was employed by Mr. Randall, and spent three months exploring the lands in question, and examining the records in some fifteen counties—reporting in writing to Mr. Randall in Philadelphia.

After disposing of his farm, Mr. Grout engaged in the cotton business from 1867 to 1882, with headquarters at Kingston, N. C. Since then he has enjoyed the quiet of his pleasant home and family. He married Nov. 21, 1839, Harriet Fiske, daughter of Richard and Betsey Fiske, of Framingham, a lady of good education, rare beauty of person and excellence of character. Their children were: *Charles Muzzey*, born October 24, 1840, lost at sea off Bahama Islands, October 3, 1864; *Channing Fiske*, born July 24, 1842, married, first, Carrie P. Tilton, second, Sarah Jones; merchant, Ashland; *Edgar Follen*, born December 24, 1845, owner of cattle ranch, Wyoming; *Mary Rowland*, born May 7, 1850, married Samuel

E. Poole, deceased, of Ashland. She has one son, Charles G. Poole, born June 18, 1870.

CHARLES HENRY TILTON.¹

The Tilton family are of English origin, and Abraham Tilton was the first to emigrate to America, coming with the colony of one hundred and twenty English and Scotch families, which arrived in Boston in 1718. John Morse, who was the maternal ancestor of the Tiltons, also came over with this colony. Among this band of sturdy settlers are to be found the names of many who, as pioneer settlers, laid the foundations of what have since become prosperous towns and villages in New Hampshire, Maine and Massachusetts. Abraham Tilton joined his fortunes with that portion of the colony (eighteen families) which settled Hopkinton, and where to this day are to be found worthy representatives of that name. In the fourth generation from Abraham was Leonard, the father of the subject of this sketch. Leonard was born in Hopkinton, October 7, 1800. Catherine H. Morse, the wife of Leonard, was born in Dummerston, Vermont, January 7, 1806. They had six children, the first-born being Charles Henry, who was born November 30, 1829. His parents are both deceased, his father June 11, 1841, and his mother September 13, 1877. When Charles H. was three years old the family moved to Bennington, Vermont, and here he remained until the death of his father. It was here that his school-days were passed, his educational advantages being such as were afforded by the district schools of the Green Mountain State. On the death of his father, who left but a very limited estate, Charles, whose assistance in the support of the family was needed, left school and with the family removed to that part of Hopkinton now Ashland, where Charles entered a shoe-shop and for a number of years, by prudence and close attention to all details in the manufacture of boots and shoes, not only became well-versed in the business, but also became an important factor in the family economy. At the age of twenty-one, being dissatisfied at the prevailing rate of wages paid to competent and skilled operators, Charles started in a small way for himself, his first case of boots (which were children's red-topped boots) being made from stock supplied on credit by a Boston leather merchant, who was a shrewd observer of young men and knew the value to such, of a kind word and kindly assistance; nor was young Tilton's case the only one where Hon. Lee Claflin gave timely assistance by allowing credit to such as could bring the collateral inherent in an honest face. Mr. Tilton was successful in his business undertakings, and gradually worked his way up to an enviable prominence in this great New England industry, establishing himself in one of the finest and best-appointed

shoe factories in the Commonwealth, it being known all over this section of the country as "the model boot and shoe factory," which was built by him on his own land, of which he had bought some one hundred acres, erecting thereon some forty dwellings, laying out streets and, with his own hands, setting out shade and fruit trees, thus making it the most beautiful section of Ashland. October 1, 1850, Mr. Tilton married Caroline M., daughter of Henry and Myra C. (Coggins) Babcock, who has borne him two children—Jennie M., May 23, 1860, and Charles H., Jr., November 30, 1862. Jennie M. was married, May 25, 1888, to Rev. Carey F. Abbott, of Nashua, N. H., and they have one child, Ruth Tilton, born November 26, 1889. In politics Mr. Tilton has been a thorough-going Republican since that party was first organized. While avoiding political office, he has in town affairs been efficient and useful, being for a number of years on the Board of Selectmen and for four years its chairman, also a member of the Board of Assessors, justice of the peace, a director in the South Framingham National Bank and president of the Middlesex South Agricultural Society.

He retired from the boot and shoe business in 1886. Mr. Tilton is a lover of the horse, as is also Charles H., Jr., and has some fine specimens in his commodious stables at Ashland. He is also a breeder of fine cattle, and his opinion on matters relating to the breeding and care of stock is quite professional.

As a citizen, Mr. Tilton is upright and law-abiding; is a contributor to the support of the Congregational Church; is well-informed on the general topics of the times, and with easy fortunes is taking a good share of that happiness and contentment which should go hand in hand with merited success in one's life work.

J. NEWTON PIKE.

Says an old philosopher, "All men, whatever their condition, who have done anything of value ought to record the history of their lives." Eventful periods occur at rare intervals in the lives of men the most distinguished, but even in their more retired walks of private life there are few whose lives are not marked by some vicissitudes of fortune, which, however trivial they may seem, are yet sufficient to excite great interest.

The events which give the highest interest to biography are of a volatile and evanescent nature and are soon forgotten. It is the part of the biographer to collect these passing events and fix them indelibly upon the pages of history, that succeeding generations may know how their predecessors lived, what ideas governed them, what trials and difficulties they encountered and how they overcame them, and even their domestic relations, for all these teach a lesson that will be serviceable by pointing out what paths led to success, and what roads are to be avoided as leading to failure.

¹ Continued.

C. H. Tilton

J. Newton Pike

There is none so humble that his life can fail to be an object of interest when viewed in the right light. How much more will this interest be enhanced when we contemplate the life of a man who, by his own heroic struggles, has hewn out his own pathway to success and compelled the fates to grant him his reward. Most certainly one who by his own efforts has attained affluence and social position, and through all the changing events of life has preserved his integrity unimpaired, is deserving the pen of the historian.

Such a man is the subject of this sketch. He was born August 24, 1824, in that part of the town of Hopkinton, Mass., which is now incorporated in the town of Ashland. Here, too, his father, Benjamin, was born, and his grandfather, Jonathan, lived for many years. The latter was a minute-man, and participated in the famous battles of Bunker Hill and Ticonderoga. At the former engagement he stood within a few feet of the immortal Warren when he received his death-wound.

J. Newton Pike was one of four children and spent his youth at his father's home, enjoying the school privileges of his time, viz., twelve weeks in the winter, and twelve weeks in the summer, at the district school. These opportunities he improved to the best possible advantage until the spring of his thirteenth year, when, his father's health being poor, the boy was obliged to give up the summer term and assist in earning a livelihood for himself and the balance of the family.

In the summer of his fifteenth year he went away from home to work on a farm, returning in the autumn and attending the winter school. At twenty-one, through the kindness of a friend who loaned him the necessary funds, young Pike attended the autumn term of the Hopkinton Academy, and during the winters of the next four years taught school, being employed on a farm during the summer months of '46 and '47, and in the track department of the Boston & Albany Railroad during the summers of '48 and '49. In '50 he was placed in charge of a force of men in this department on this railroad, and continued therein until October, 1866, when he resigned this position, and accepted that of clerk in the office of the Emery Works of Charles Alden, where he remained until 1875. These works were merged into the Washington Mills Emery Manufacturing Company, of which corporation he was chosen clerk. In '74 this plant was purchased by the Vittrified Wheel and Emery Company, and Mr. Pike was made foreman of the emery department of the business, retaining that position until in '78 the city of Boston possessed itself of the Sudbury River, for a part of its water supply, which permanently closed the manufacture of these goods in this section. Superintendent W. H. Barnes, of the Boston & Albany Railroad, learning of Mr. Pike's release from service with this company, tendered him the position of station-agent at

Ashland, which position he accepted and has occupied constantly ever since.

In 1860 Mr. Pike was elected a member of the Board of Selectmen for the town of Ashland. The War of the Rebellion breaking out, he distinguished himself by his devotion to his country's flag, and his services in raising troops, and in assisting the families of soldiers, caused his townsmen to elect him chairman of the board in 1862, which position he filled for six years with great credit to himself, and to the general satisfaction of his townsmen.

In 1871 he was elected Representative from the Fifteenth Representative District, consisting of the towns of Ashland and Hopkinton, and in 1872 was sent to the Senate from the Fifth Senatorial District, consisting of the towns of Newton, Natick, Framingham, Ashland, Sherborn, Wayland, Weston, Holliston and Hopkinton.

In 1871, Mr. Pike was appointed trial justice by His Excellency, William Claflin, Governor of the Commonwealth, which position he continued to fill until the establishment of the district courts. He has also served repeatedly as member of the School Committee, and overseer of the poor.

May 12, 1851, Mr. Pike married Martha, daughter of Josiah and Martha Burnham,—a fortunate union, for Mrs. Pike proved to be a true helpmeet in the fullest sense of the word, and has, by her wise counsel, ready hand and abiding faith, helped to win the victories of life. And now, as the twilight approaches and the shadows are falling toward the east, together they look back to that May morning with feelings of gratitude that life has yielded them so much of its joys and comforts.

Two children have blessed this union—Edgar A., born May 16, 1864, and died June 19, 1865; Willie B., born April 18, 1866. He married Angy, daughter of George and Jane Boutilier, November 9, 1887, and lives with his parents.

Another member of the family who has been as one of their own children to Mr. and Mrs. Pike is Mollie E. Burnham, born October 8, 1869, and whose parents died when she was six years old, since which time she has been a member of Mr. Pike's family.

Mr. Pike was made a Mason at Framingham, and was one of the charter members of North Star Lodge of this town at its institution.

In 1870, with his wife, he united with the Methodist Church, and has been one of its trustees ever since, and for the past ten years superintendent of its Sabbath-school.

Modest and retiring in his manner, upright and honorable in his business transactions, loyal to his friends, conscientious in the discharge of his life duties, he has won the esteem and respect of all who knew him, and life has been crowned with a generous degree of success. May he long live to enjoy the same.

CHAPTER XLI.

EVERETT.

BY DUDLEY P. BAILEY.

THE town of Everett, formerly known as South Malden, was incorporated March 9, 1870, and named in honor of Edward Everett. It contains a territorial area of about 2325 acres, lying between the Mystic River on the south (separating it from Boston and Charlestown), Medford on the west, (Malden River forming the boundary), the city of Malden on the north, Chelsea and Revere on the east, Island End River forming the boundary for a part of the distance.

A tongue of land, extending on both sides of Broadway, from Mystic River nearly to Mystic Street, containing the old Charlestown Almshouse, belongs to and is under the jurisdiction of the city of Boston. About five hundred acres, in the southwesterly portion of the town, consist of salt marsh, and the whole of that section is but little above tide-water, but from the Eastern Division of the Boston and Maine Railroad, and the Saugus Branch, the land gradually rises toward the northeast, reaching an altitude of 133 feet above mean low water on Belmont Hill, and 175 feet above mean low water on Mount Washington, which last is the highest point of land in town. Between these two hills runs a narrow valley, broadening into extensive meadows, as it stretches northwesterly to Malden. On the easterly side of this valley rises Corbett Hill, from the summit of which the land slopes gently northeasterly to the Malden line. The greater proportion of the town is not more than fifty feet above mean low water.

The general shape of the town approaches the form of an ellipse, its longest axis running northeast and southwest. Its greatest length is about two and one-half miles; its greatest breadth about one and three-quarters miles. The number of acres taxed in 1890 was 1816.

About one hundred acres in the northeasterly portion of the town are occupied by Woodlawn Cemetery, one of the most beautiful in the vicinity of Boston. Between 150 and 200 acres are occupied by streets and ways, and a considerable portion consists of water surface.

Of Everett's geology, Nason's "Gazetteer of Massachusetts," says: "The geological formation is upper conglomerate, drift and the St. John's Group. The soil is sandy loam in some parts; in others clayey." This last feature is found almost uniformly on the high lands. Clay land suitable for the manufacture of bricks is also found on the lowlands not far above tide-water.

There are about 1100 to 1200 acres suitable for building. Some of the best building land is comprised in the strip of territory southwest of Belmont Hill

and Mt. Washington, and just above the railroad extending from Chelsea to Malden. The soil in this tract is composed for the most part of a sandy loam, with a sub-stratum of gravel.

Farming is carried on to a limited extent, mostly in the form of market gardening. The number of farms in 1885 was forty. The aggregate value of their products was \$66,076, the largest items being milk, \$19,955; green-house products, \$12,520; vegetables, \$13,577. The total value of the agricultural property was \$466,925. Of the taxable area, 946 acres, according to the census of 1885, were devoted to agricultural pursuits, of which 356 acres were cultivated, and 390 acres uncultivated, the latter including 12 acres of woodland.

The number of manufacturing establishments in 1885 was forty-four, of which two were corporations having eighteen stockholders, and forty-two private firms, with fifty-eight partners and members. The total capital invested was \$1,129,698, of which \$60,400 were invested in buildings and fixtures, and \$127,070 in machinery. The value of stock was \$878,016; the value of goods made, and work done, was \$1,496,795; the number of employees was 717; the amount of wages paid, \$304,270; the aggregate number of day's work performed was 11,886 out of a possible 13,566—an average of 268 working days for the year, leaving 13 per cent. of lost time. The oldest branch of manufactures is that of bricks, one establishment in this branch dating from the year 1795. Of the total manufactured product, bricks, building materials and stone work represented \$803,454; clothing and straw goods, \$33,941; iron goods, \$66,000; oils, paints, colors and chemicals, \$492,497. The fire losses by the different manufactories for the ten years ending June 30, 1885, were \$146,750.

Everett ranked in 1885 as the seventy-eighth town in the Commonwealth in regard to its manufacturing products, and the one hundred and fifty-first in regard to the product of each individual.

The principal manufacturing establishment in Everett is that of the Cochrane Chemical Company, consisting of several large buildings, occupying thirteen acres of land and employing about 140 hands. The business was begun by Alexander Cochrane at Malden in 1858. On his death, in 1865, he was succeeded by his sons, Alexander and Hugh Cochrane. In 1872 they purchased the establishment in Everett, founded in 1868 by the New England Chemical Company with a capital of \$300,000, this company having been financially unsuccessful. After purchasing the works of the New England Chemical Company, Messrs. A. and H. Cochrane erected two new buildings, doubled the capacity of the works and made Everett the principal theatre of their manufacturing operations. The building west of the Eastern Railroad was burned in 1882, but has since been rebuilt. The company manufactures acids and other chemicals, chiefly sulphuric, muriatic, nitric and other acids.

The Union Stone Company was established in 1869

and formerly carried on quite a business, employing about forty hands in the manufacture of emery wheels and emery wheel machinery for grinding and polishing. The works were burned in 1881, and though they were rebuilt the company apparently never recovered from the blow. In 1889 it failed and in March last its works, consisting of a factory and 71,000 feet of land, were sold at auction.

The Waters Governor Works, established by Mr. Charles Waters for the purpose of manufacturing steam-engine governors on a patent issued to Mr. Waters January 3, 1871, were located in Everett, about eight years ago in a building formerly owned by Hervey Waters and designed by him for a scythe factory. Mr. Charles Waters died in 1880, and Mr. Edward Dewey purchased the business and on April 27, 1882, became owner of the factory at Everett, where he shortly after commenced manufacturing operations, which were continued by himself and Mr. R. B. Lincoln, under the firm-name of Edward Dewey & Co., until the death of Mr. Dewey, April 9, 1890. Since that time the business has been carried on by Mr. Lincoln, the surviving partner. The establishment employs from forty to fifty hands and manufactures from 2500 to 4000 steam governors annually.

In November, 1888, Messrs. O. J. Faxon & Co. started, in one of the buildings connected with the works, a foundry which manufactures castings for the governor works and piano plates.

The furniture factory now owned and operated by Charles H. Bangs was originally established by Mr. Geo. D. Otis in 1885 for the manufacture of chamber furniture. The establishment was purchased by Mr. Bangs in March, 1888, and is now devoted to the manufacture of drug-store interiors, for which Everett has the largest establishment of its kind in the world. The business was begun by Mr. Bangs in the latter part of the year 1885. The idea originated with Mr. Bangs of making such work in sectional form for convenience in shipment and adaptability to different situations or locations. This method has become very popular on account of the quality of the work that can be produced by being able to concentrate the required workmen upon a single specialty. The enterprise has grown from a very modest beginning to one of large proportions, Mr. Bangs having in his employ at the present time between eighty and ninety employees, including a great many different trades, such as designers, draughtsmen, carvers, show-case makers, glass-grinders, metal-workers, silver-platers, millmen, cabinet-makers, glass-stainers, etc. Besides these several men are employed for setting up the work, which is now being shipped to every part of the United States, and several the past year have been exported. The present output of the establishment is at the rate of nearly a quarter of a million per year, and the demand seems to be rapidly increasing. Many of the finest drug-stores in the country are the product of these factories.

Stephen H. Kimball's factory was originally established for the manufacture of children's carriages in 1875. The factory was partially burned January 29, 1879, but was afterwards rebuilt and enlarged. The establishment is now devoted mainly to the manufacture of invalid chairs and athletic goods.

In 1881 White, Wiley & Co. established a varnish factory near the Chelsea line. The firm dissolved January, 1883, and the factory in Everett was transferred to Messrs. Wiley & Richardson, who carried on the business until April, 1888, when Mr. Benj. J. Richardson, one of the original firm, became sole proprietor. No information has been furnished in regard to its operations.

Though not coming within line of manufacturing business, the sale of spring water has assumed proportions which entitle it to mention as one of the important industries of Everett. Everett or South Malden spring water has from time immemorial been noted for its excellent qualities. The first systematic attempt to make it an article of merchandize was made by the Everett Spring Water Co. in 1881, when they purchased the land at the junction of Ferry and Chelsea Streets, and soon after established a plant including the present Everett Spring House. They have since done an extensive business in the sale of Everett Spring Water.

The Belmont Hill Spring, owned by the Belmont Hill Water Co., enjoys a deservedly high reputation, and the water from this supply commands a large sale.

The Glendale Springs, operated by S. G. Bennett, are of more recent date.

A large proportion of the residents of the town are engaged in business in Boston. The population of the town, according to the census of 1890, is 11,043, as compared with 2220, May 1, 1870. The valuation of the town May 1, 1890, was \$7,889,650, of which \$7,451,300 was real estate and \$438,350 personal property. The assessed valuation of real estate is divided as follows:—Land, \$3,355,950; buildings, \$4,095,350.

The number of dwelling-houses May 1, 1890 was 2225, as compared with 414 in 1870. The total taxation for the State, county and town purposes in 1890 was \$120,585.92, and the rate \$14.50 on the \$1000. Of the total population of 5825 shown by the census of 1885, 4610 were native-born and 1215 of foreign birth. Of the native-born, 3253 were born in Massachusetts, 637 in Maine, 313 in New Hampshire, 116 in New York, and 92 in Vermont. Of the foreign-born, 436 were born in Ireland, 463 in the British Provinces, 173 in England and Scotland. As to civil condition, 3012 were single, 2503 married, 299 widowed and 11 divorced.

As Everett was originally a part of Malden, its history grows out of that of the parent town, of which it is a continuation. The history of South Malden therefore first demands notice.

The whole town of Malden was originally included,

by virtue of a grant in 1633, within the territorial limits of Charlestown, the country north of Mystic River being known as "Mystic Side" or "Mystic Field." The exact date of the first settlement is not known, but as early as 1629, Ralph Sprague, who in the preceding year had landed at Salem, and taken up his residence at Charlestown, with his two brothers Richard and William, passed over and explored the country on Mystic Side, which they found an "uncouth wilderness," full of "stately timber," inhabited by a remnant of the once powerful tribe of Pawtuckets, under the rule of an Indian chief called Sagamore John, who dwelt at Beacham Point, now the Van Voorhis estate.

His tribe had been under the leadership of the Sachem Nanapashemet, who was killed in 1619. After his death his widow, the Squaw Sachem, established her authority over the tribe, and among the curiosities to be found at the Middlesex Registry of Deeds is a grant from the Squaw Sachem of a large territory in the vicinity, probably including the territory of Malden and of several adjoining towns, dated in 1639.

In 1634 an allotment of land was made to the several inhabitants of the tract, afterwards known as the Five Acres Lot, bounded by the line running from the Powder Horn Hill to the North or Malden River; and the Charlestown Book of Possessions, as early as 1638, shows allotments of numerous tracts on the Mystic Side, within the territorial limits of Everett.

Penny Ferry was established where Malden Bridge now is in 1640, and it continued to exist until the opening of the bridge in 1787. The road to the ferry, according to Corey's "History of Malden," lay near the edge of the marshes, between the burying-ground and Mystic River, in part coinciding with Bow and Main Streets.

So far as known, the earliest settlers in what is now Everett, were William Sargent, described as a "godly Christian," in 1643 or earlier; Thomas Whittemore, near Chelsea line, 1645 or earlier; Thomas Caule, at the Ferry, as early as 1643; Deacon John Upham, in 1650, apparently in what is now West Everett; Peter Tufts, between 1638 and 1640. He kept the Penny Ferry, where Malden Bridge now is, in 1646. William Bucknam, the ancestor of a long line of prominent citizens of Malden, appears as a purchaser of real estate as early as 1649, and was certainly a resident at Mystic Side prior to 1664. The old house supposed to have been erected by him was, until about a dozen years ago, occupied by our veteran fireman, Joseph Swan, one of his descendants, and stood on the site of Mr. Swan's present residence. Portions of this edifice are still standing near the spot. It is among the oldest buildings in town, if not the oldest.

By act of the Court of Assistants passed May 16, 1849, O. S., "Upon the petition of the Mystic Side men they are granted to be a distinct Towne, and the name thereof to be called Mauldon." The boundary

between Charlestown and the new town appears to have been established on a line running from near Powder Horn Hill in a northwesterly direction to the North (now Malden) River, and Stephen Fosdick, Thomas Whittemore, William Sargent and Richard Pratt are mentioned as abutters thereon.

The portion still remaining within the limits of Charlestown included all the southwesterly portion of Everett, and must have corresponded nearly with what was afterwards the Southwest School District, though including a somewhat smaller area. Judging from references in ancient deeds, the line, which passed through the Bucknam farm would extend from southeast to northwest, some distance southerly from Nichols, High and Hancock Streets. The exact location cannot now be given.

These territorial arrangements continued until 1726, when the remaining territory of Charlestown north of the Mystic River was annexed to the town of Malden except a small strip of land at Penny Ferry, which has been mentioned before as still belonging to the city of Boston.

Steps had been taken to effect a separation from Charlestown as early as 1721. It appears from the Malden town records that "At A General Town meeting in Malden on ye second of June 1721, John Pratt moderator, It was putt To vote to se wher This Town will Joine with our Charlestown neighbours in petitioning To ye Generall Court for Ther coming off from Charlestown to be one Township with Malden according To ye warrant. And ye vote passed on the Affirmative. And That is all yt dwell on ye north side of mistick River up To Malden line; and from boston line To medford line." Chelsea was then a part of Boston and so remained until 1738.

On account of the opposition of Charlestown the separation was not consummated until 1726, when it was effected in answer to the petition of Josias Bucknam, Jacob Wilson and Jonathan Barrett. The tract thus set off comprised about one-half of the present town of Everett, and thirty-four years later, in 1760, it was inhabited by thirty families.

South Malden had always been separated in some measure by natural geographical features from the rest of the town by the Great Swamp, extending from the Chelsea line westerly so that a comparatively narrow strip of habitable territory connected the south with the rest of the town. The southerly part had not been long annexed to Malden before they began to desire separation.

The immediate occasion for this movement was the re-location of the meeting-house at the Centre, which, by an order of the General Court, made August 4, 1729, was to be placed where the Universalist Church now stands, instead of on the old site at or near Bell Rock. The location of this meeting-house gave rise to a very bitter controversy between the north and the south parts of the town. The new meeting-house was occupied for the first time August 16, 1730, and

on the 13th of September following, the people on the south side held their first separate meeting for public worship. In 1734 they appear to have erected a house of worship on what is now Belmont Hill, on the lot now occupied by Hawes Atwood as a residence, at the corner of High Street and Broadway.

The lot for the church was given by Jonathan Sargent, a worthy descendant of the "godly Christian" before mentioned, "in consideration of the love, good-will and affection that I have for and do bear for the Christian people that inhabit in the south part of Malden, and for the propagation of the Gospel among them," and "for the erecting of a new meeting-house in order to the worshipping of God in the Congregational way." His deed is dated August 6, 1731, and the lot comprised a quarter of an acre and was reached by a way twenty-six feet wide which led from the highway.

A council of three churches met April 16, 1734, and on the 18th embodied the South Church with sixteen male members. On the 4th of September following Jonathan Sargent and Ebenezer Upham were chosen ruling elders, and John Mudge, deacon. Rev. Joseph Stimpson, of Charlestown, was settled as pastor of this church September 24, 1735, and continued to serve, with some interruptions on account of ill-health, until 1744, when he was dismissed.

The south part still remained by law an integral part of Malden proper, but a movement had been inaugurated some time before to have it incorporated as a separate town or precinct, and at a public town-meeting, held March 5, 1733, it was "voted that Jonathan Barrett, John Willson and Lieutenant Samuel Bucknam to be agents to appear at the Generall Court the second Wednesday of the next Sessions to act in behalf of the town of Malden, referring to a petition of Josias Bucknam, John Mudge, and sundry other of the inhabitance of the Southerdly part of said town, which petition is that the Generall Court would set them of into a distinct Township or precinct, according to the bounds mentioned in said petition."

At a town-meeting held May 17, 1736, "according to the desire of Mr. Jonathan Sargent and others, it was put to a vote to see if the town will set them of with all the inhabitants and estates into a distinct township or parish by the bounds hereafter mentioned, beginning at a stake and heap of stones in the marsh by Molton's island, which is the station-line or bounds between Boston and Malden, and so as Boston line runs to the creek where Boston line crosses the creek in Capt. Oliver's farm, and from thence on a strate line to pemberton's brook at the bridge, and from the said bridge south and southwesterly as the lane runs to the end of hutchinson's lane, and from thence on a strate line to sandy bank river, then as the river runs to the mouth of it, and from the mouth of the said river southeast as the grate river runs to wormwood point, formerly so-called, [now

a part of the VanVoorhis estate] and from the said point northeastwardly as the river runs to the first station, with all there proportionable part of all there ministerial lands belonging to the said town, and it passed in the negative." These bounds would include somewhat more than the present territory of Everett.

In 1737 the efforts of South Malden for separation were more successful, and by act of the General Court passed December 27, 1737, the south part of Malden was set off as a separate parish by the lines prayed for by the petitioners, "Saving that Samuel Bucknam, John Shute, James Hovey, James Green, Obadiah Jenkins, Isaac Waite, Isaac Wheeler and Jonathan Knower" were allowed to continue with the North Precinct, so long as they, with their families, should attend the public worship there.

From this time much of our knowledge of South Malden and of the men who were prominent in its affairs for more than a hundred years later, is derived from the records of the South Parish and South School District.

The first precinct meeting was held January 23, 1738, at which Captain Samuel Green was chosen moderator; Thomas Waite (3d), clerk; Captain Samuel Green, Stower Sprague, Benjamin Blaney, Samuel Stower, Joseph Willson, committee to call precinct meetings.

At a meeting held March 13, 1738, a permanent organization was effected: Elder Jonathan Sargent, moderator; Thomas Waite (3d), clerk; James Barrett, Captain Samuel Green, Nathaniel Upham, John Burditt, Joseph Willson, committee; Lieut. Thomas Burditt, Thomas Waite (3d), Stower Sprague, Benjamin Blaney, John Winslow, assessors; Josias Bucknam, treasurer; and Phinehas Sargent, collector.

A parish was a territorial corporation at that time, and taxes were assessed for the support of public worship in the same manner as ordinary town taxes. The assessors held their first recorded meeting at the house of Benjamin Blaney, now occupied by William J. Partridge, June 9, 1738, and assessed a sum of seventy-five pounds for the support of "ye ministry."

At a meeting of the South Precinct March 30, 1739, "a vote was called for to see if ye Precinct would finish ye school-house, and ye vote passed in ye negative."

At a public meeting of the South Precinct in Malden, May 8, 1739, voted, "To finish ye outsidie of the meeting-house."

The South Precinct maintained a troubled existence of fifty-five years. For about three years after the departure of Mr. Stimpson they were without a pastor. On April 2, 1747, Rev. Aaron Cleveland was called to the pastorate at a salary of £360, "old tenor"—depreciated paper-money, not worth twenty cents on the dollar. Shortly after, on April 24, 1747, the South Parish voted to raise £1200, old tenor, for the purpose of providing a parsonage, and selected the tract of land which, with eight acres added in 1749, is now known as the "Sargent and Popkin Estate," on Main,

Prescott, Everett and Tremont Streets. The old parsonage may still be seen at the corner of Main and Prescott Streets. Mr. Cleveland commenced his labors May 23, 1747, and continued to serve until Nov., 1750. For somewhat more than a year from this time the parish was without a pastor. On Oct. 16, 1751, it concurred with the church in calling Rev. Eliakim Willis as the precinct's minister, but the negotiations for his settlement were somewhat protracted, and it was not until February 20, 1752, that the terms were definitely fixed, the salary to be £53 6s. 8d. specie value, use of the parsonage, enlarged and repaired, and 18 cords of wood. Considerable opposition was developed by a portion of the parish, who desired re-union with the North Precinct, which now proposed to pull down the new meeting-house and remove it to its original site. These overtures were rejected and Mr. Willis commenced his labors. The affairs of the parish steadily declined from this time, owing largely to internal discord and the withdrawal of influential members. In 1758 it proposed a re-union with the North Parish, the united parish to maintain two ministers to be paid from the town treasury, but the North Parish acted upon these proposals "in the negative." On March 23, 1766, the South Precinct, finding itself unable longer to raise the money to pay Mr. Willis his salary, voted to convey to him its parsonage-house and land, on condition that he would relinquish his civil contract and preach to them for three years, the weekly contributions to belong to the parish, and to be paid to Mr. Willis for the purpose of extending the period of his service. This parsonage estate remained in the hands of Mr. Willis and of his devisees until 1870, when all of it except the house-lot was sold and cut up into building lots. At the end of the term for which he was thus compensated, Mr. Willis, at the request of the parish, engaged to continue the work of the ministry for a free contribution. From March 27, 1775, to June 5, 1787, through all the period of the Revolutionary War, and for four years after, there is no record of any parish meeting.

At the latter date, in consequence of dissensions in the North Parish, growing out of the ministry of Rev. Adoniram Judson, a considerable number of wealthy members left the former and joined the South Precinct. With this seasonable reinforcement, the prospects of the South Parish brightened. The then dilapidated old meeting-house on Belmont Hill was repaired, and for four years the parish enjoyed an era of prosperity. On the dismission of Rev. Mr. Judson, in 1791, the way was opened for a reconciliation between the North and South Parishes.

At a meeting held January 12, 1792, the South Parish accepted the terms of union reported by a joint committee of the two parishes, and on February 23, 1792, after a separation of fifty-five years, the articles of union were confirmed by the General Court. Rev. Mr. Willis became the pastor of the united

churches, and so continued until his death, though with Rev. Aaron Green as colleague after September 25, 1795.

By the terms of the agreement it was stipulated also that the Rev. Mr. Willis should be allowed to preach in the South Meeting-house six Sabbaths a year so long as he should continue able to administer the sacrament to any of the then church.

The old meeting-house continued to stand for several years longer, but was at length sold about the year 1796. On December 10, 1800, we find the last entry of a meeting of the South Parish, at which meeting it was "Voted that the Money the Meeting-House was Sold for that Belonged to the South Parish in Malden Should be as a fund in the hands of the Treasurer of the South District upon Interest so long as the District Continues to be a District in the South Part of Said Town and that the Interest of that Money be annuall be Laid out By the Said District Comtee for the Benifit of the Schooling of the youth."

At this point we may notice a few of the prominent citizens who were residents in this part of Malden during the latter part of the eighteenth and the early part of the nineteenth century.

Captain Isaac Smith was for many years a representative of the town of Malden in the General Court, and was said to have been an influential member. Though taken from the almshouse in Boston when a boy, he sustained, as a citizen, an enviable and untarnished reputation. He is mentioned as the commander of an armed vessel in the Revolutionary War. He lived first in the north part of the town, and afterwards removed to South Malden, where he had large landed possessions, which, after his death, in 1795, were for the most part sold to his son-in-law, Captain Nathan Nichols, for many years a prominent and respected citizen of Malden. At the time of his death Captain Smith was said to have been the wealthiest man in Malden. As indicating the standard of wealth in those days, it may be added that Captain Smith left, after his estate was settled, about \$20,000 to be divided among his ten heirs.

Rev. Eliakim Willis, already mentioned as pastor first of the South Parish and then of the united parishes, was a man of eminent piety and very highly respected in the community. He was born in New Bedford, January 9, 1714, and graduated from Harvard College in 1735. He died March 14, 1801, aged eighty-eight. He was chairman of the committee that reported the instructions of the town of Malden, addressed to Ezra Sargent, then representative in the General Court.

There still remained at or near 1800 several citizens who had taken a prominent and honorable part in the Revolutionary War. Among these may be mentioned Captain Benjamin Blaney, who commanded the company of militia from this town in the battle of Lexington, and the company which marched to join Washington's army in New Jersey in Decem-

ber, 1776. His father was a prominent man in the South Parish, and a magistrate of some note, and was found dead in the road when returning from the discharge of his duty, not without suspicions of murder. Captain Blaney was prompt in duty and persevering in effort. He frequently served as moderator in parish meetings. He removed from the town in the latter part of his life.

Colonel John Popkin was of a Welsh family, and was born in Boston in 1743. Before the Revolutionary War he was a member of Paddock's artillery company. In the army he was a captain of artillery in Gridley's regiment, and was in the battle of Bunker Hill and at the siege of Boston. He was commissioned captain in Knox's artillery and was in the battle of White Plains; he was made a major in Groaton's regiment January 1, 1777; was aide to General Lincoln at Saratoga and was commissioned lieutenant-colonel of Crane's artillery regiment July 15, 1777, in which position he continued until the disbanding of the army, in 1783. After the war he resided in Bolton and later in South Malden, in the old South Parish parsonage-house devised in part to his wife by Rev. Mr. Willis, on Main near the corner of Prescott Street, where he died, May 8, 1827. He was a member of the Society of Cincinnati, and was for many years an inspector of customs in Boston. He walked to and from Malden, four miles, every day, from 1789 until he was more than eighty-four years old. His most distinguished descendant was Rev. John S. Popkin, born January 19, 1774, a clergyman and professor in Harvard College, and his successor in the Society of the Cincinnati.

Captain Jonathan Oakes was born in Malden, October 4, 1751, and was in command of a vessel in the merchant service before he was twenty years of age. In the latter part of 1776 he was captain of the private armed brigantine "The Hawke," of ten guns and eighty men. The next year "The Hawke" was taken into the service of the State, and sailed with Captain Manley, on the disastrous cruise in which his associates were captured at Halifax. Captain Oakes was more fortunate, and, being separated from them, he escaped and took several valuable prizes. He continued in command of the "Hawke" until 1779, making three important captures in 1778, when he purchased an interest in the armed brigantine "Thomas," of which he took command. In 1780 he made a cruise in the ship "Favorite," of ten guns, and when he returned he took command of the "Patty," of which he was an owner. In 1781, while in command of the latter vessel, he took the British brig "Betsey," bound to Lisbon. He was a representative in the General Court for twelve terms, the longest service on record with one exception. Captain Oakes died August 16, 1818, at the age of sixty-seven years, leaving a son of the same name, who also was for many years a prominent citizen of South Malden. Two grandchildren of the latter are now living in Everett.

Captain Daniel Waters was among those who marched with Captain Blaney on the day of the battle of Lexington, where he saw his only service upon the land. Immediately upon the investment of Boston he was appointed by Washington upon the gunboat doing duty on Charles River, and, in 1776, was promoted to the schooner "Lee," in which position he distinguished himself by bringing the prize ship "Hope," which had been captured by Captain Muggford, into Boston Harbor, in the face of the British fleet, and by assisting in the capture of a number of transports, in one of which was the colonel and a portion of the Seventy-first Regiment, with supplies of great value to the Continental service. He was appointed a captain in the United States Navy, March 15, 1777. He sailed as a volunteer with Captain Manley in the "Hancock," and upon the capture of the British frigate "Fox," of twenty-eight guns, was put in command of that vessel. Both vessels were captured at Halifax by a superior British force. Captain Waters was taken a prisoner to New York, where he was retained until April, 1778, when he was exchanged. In March, 1779, he was in command of the United States brig "General Gates." He commanded the ship "General Putnam," a privateer of twenty guns, on the expedition to the Penobscot, in 1779. In December, 1779, he sailed on a cruise in the armed ship "Thorn," of eighteen guns and 120 men, and, on Christmas morning captured two British brigs, "Tryon" and "Sir William Erskine," after inflicting great loss upon both. These two brigs carried thirty-four guns and 178 men. The "Thorn" lost eighteen men, killed and wounded, among the latter being Captain Waters, who received a wound in the knee, from the effects of which he became permanently lame. The "Tryon," after being captured, escaped, while the "Thorn" was pursuing the "Erskine," but in a shattered condition.

In January, 1780, Capt. Waters fell in with the ship "Sparlin," of eighteen guns and seventy-five men, from Liverpool for New York, which was taken after an action of forty minutes. His next, and probably his last voyage, was as commander of the armed ship "Friendship," from Boston, to which he was appointed in January, 1781. After the war he retired from the sea and lived on his farm in Malden, where he died March 26, 1816. The site of his residence was at or near the present location of the Everett Spring House, and his lands extended on the westerly side of Ferry Street, as far north as the estate of Thaddeus Peirce, and southerly to Island End.

Besides the persons above mentioned, the names of Nalor Hatch and Nathan Nichols, appear as commanders of armed vessels. Capt. Hatch commanded a company which was stationed at Beacham's Point, on the Van Vooris estate, during the battle of Bunker Hill. He also commanded the earthworks afterwards thrown up at Beacham's Point, and at the junction of Main and Bow Streets.

For many of the foregoing particulars I am indebted to the historical sketch of Malden, by Deloraine P. Corey, in Drake's "History of Middlesex County," to the "Bi-centennial Book of Malden," and to Mussey's "Reminiscences and Memorials."

It may be well to notice in this place some of the changes in the southern part of the town. In the course of one hundred and sixty or seventy years since its settlement, it had become a fairly prosperous farming community, with convenient roads and means of communication with Boston. It is probable that the oldest road is that leading to Penny Ferry, already mentioned. It is impossible to give the exact date at which this road was laid out.

In 1796 a county road was laid out three rods wide from Main Street to what is now Everett Square, and thence northeasterly in a nearly straight line over Belmont and Corbett Hills, and through the swamp, and then turning easterly to Linden. A portion of this road is now known as Lynn Street, a part as School Street, and for upwards of a mile between these two, it was mostly within the limits of what was afterwards the Newburyport Turnpike. The road to Wormwood Point, now known as Beacham Street, was laid out in 1681; Shute Street as a town-way in 1695, and afterwards as a county road. Chelsea Street, formerly extending through Bucknam and Locust Streets to Main Street, was laid out in 1653. Another old road is Ferry Street, formerly known as the county road to Winnisimmet. Main, Ferry and Chelsea Streets have been several times widened by the county commissioners. Elm Street, Nichols Lane, (now a part of Nichols Street), Paine's Lane (now a part of Chelsea Street), and Baldwin Avenue are also old roads. So far as can be ascertained, these are the only roads in South Malden of an earlier date than 1800. Formerly, ordinary travel went around through Medford, and thence to Boston, making quite a journey and interfering seriously with public convenience. The building of Malden bridge, which was formally opened to the public by the firing of cannon and other festivities, Sept. 29, 1787, proved of great benefit to South Malden, offering, as it did, a direct route to Charlestown and Boston.

This bridge was built by private capital, and was for seventy-two years owned and operated by the Malden Bridge Corporation as a toll-bridge. The payment of the tolls imposed a heavy tax upon the public travel, and continued to impede the growth of South Malden. To reach Boston it was necessary, according to the "Bi-centennial Book of Malden," to pass two toll-bridges, and a man could not ride into Boston and out again without paying the heavy tax of forty-seven cents.

The south part of Malden did not long remain without a separate local organization. The South Parish was succeeded by the South School District. On the 6th day of May, 1799, the town of Malden voted "To accept the report of the committee ap-

pointed to divide the town into districts." This report provided for three districts,—the North, the Middle and the South Districts,—the boundaries of the South District to begin at the wharf on Malden Bank, so called, thence running easterly over the hill to the Chelsea line, leaving Jacob Perkins and Asa Tufts a little to the southward of said line. This line was probably not far from the line between the South and North Parishes, and included a slightly larger area than the present town of Everett. The South Precinct had evidently had a school-house for many years located on the southeast side of the County road, laid out in 1796; but on the division of the town into districts, it was deemed advisable to build a new one, and on October 7, 1799, the town voted to build a school-house in the south part of the town, of the same dimensions as the one proposed for the north part, and to raise \$600 for the purpose of building these school-houses. William Emerson, Stephen Pain, Jr., Joseph Barrett, Jr., Bernard Green, Esq., and Capt. Amos Sargent were appointed as a building committee for both. On the 7th day of April, 1800, the selectmen were empowered to purchase land as a site for the school-house, and pursuant to this authority they purchased of Thomas Sargent, for \$20, the lot near the corner of Hancock Street and Broadway, where the house of Hon. Alonzo H. Evans now stands. The South School-house was erected thereon at the cost of about \$300, and continued on or near that spot for the next forty-two years. The old school-house was bought of the proprietors by the town at an appraisal for \$50, and sold for \$35. The first meeting of the South District was held December 10, 1800, on the same day as the last meeting of the South Parish. Capt. Benjamin Blaney was chosen moderator, Ezra Sargent (since 1758 clerk of the South Parish) was chosen clerk, Capt. Jonathan Oakes, Stephen Pain, Jr., Capt. Amos Sargent a committee; Mr. John Howard, treasurer.

It was voted "that the Committee Shall hire such a Master, and when they think best for the Benefit of the Children." It was also voted "that the fifty Dollars that Belonged to the Proprietors of the old School-house ly on interest, and that the interest of it be annually Laid out for the Benefit of Schooling of the youth of the South District."

In 1802 Uriah Oakes, whose descendants to the third generation are still living in town, appears as treasurer. The last entry in the handwriting of Ezra Sargent is under date of March 12, 1804. He was succeeded April 12, 1805, by Winslow Sargent.

From April, 1803, to March 4, 1819, there is no record of any meeting of the South District. At the meeting held on the latter date Captain Ebenezer Nichols appears as moderator; Isaac Parker, clerk; Nathan Lynde, treasurer; Captain Eben Nichols, Captain Nathan Nichols and Isaac Parker were chosen a committee to purchase land for the district at their discretion.

At a meeting held March 25, 1820, it was voted "to remove the School-house, and Captain Nathan Nichols, Captain Ebenezer Nichols, Captain Uriah Oakes, Captain Thomas Oakes and Thaddeus Pierce were chosen a committee for the purpose." June 14, 1823, Captain Nathan Nichols was chosen clerk, and from that date to 1830 the records are very neatly kept in his handwriting. He was for many years a prominent citizen of Malden and a man of sound business qualifications, and grandfather of our present town treasurer. On the 12th of March, 1830, Solomon Corey was chosen clerk, and so continued until 1834.

Nathan Lynde was treasurer of the South District from March 4, 1819, to March 21, 1835, a period of sixteen years. From the year 1820 the names of William Pierce, Thaddeus Pierce (father of the present Thaddeus), Thomas Oakes, Captain Henry Rich, Elisha Webb, David Faulkner, Daniel A. Perkins, Leavitt Corbett, Alfred Osgood and Seth Grammer frequently appear in the proceedings of the South District.

At a meeting held March 27, 1837, measures were taken for establishing a primary school, which was subsequently opened in Webb's Hall, so-called, in the house now owned and occupied by Dea. Calvin Homer. By a report of the financial concerns of the South District for the year 1839, the cash receipts are stated at \$641.52.

In 1841 the increasing population of the South District and the local jealousies of its different sections led to an agitation for a division, and on March 19, 1842, Captain Jonathan Oakes, William Pierce, Stephen Stimpson, Benjamin Nichols, Benjamin S. Shute and Solomon Shute were chosen a committee to report on a proper division line between the two districts. This committee reported March 21, 1842, in favor of a line running across the hill so as to leave Daniel A. Perkins, Jonathan Baldwin, Jr., and William Whittemore on the west side of the hill, the east side to keep the school-house and land for their own. At a town-meeting held April 18, 1842, it was voted that the South District be divided according to the above line, and all the inhabitants southwest of said line were set off as a new district by the name of the Southwest School District. At this time there were in South Malden eighty-eight houses and one hundred and five families as compared with fifty-two houses in 1828.

The South School District continued in existence until 1853, and the old school-house was, in August following the division, removed to the present Glendale School-house lot on Ferry Street, which the South District purchased of Mary Polley for the sum of \$300, originally containing about two acres, of which an acre and three-quarters were sold. The old school-house was repaired and continued to be used until 1854, when it was replaced by a new building, which continued in use until 1885, when it was, in turn, replaced by the present Glendale School-house.

John Cutter, Jr., was chosen clerk of the South District June 18, 1842, and served until March 7, 1849, when he was succeeded by Charles D. Adams, who continued in office until the abolition of the district system.

The Southwest District, as the new district was called, embraced the larger portion of the population and wealth of the former South District. It held its first meeting on May 12, 1842. William Peirce was chosen moderator; William Johnson, the last clerk of the South District before the division and for many years a prominent citizen of Malden and Everett, assessor, town treasurer, representative to the General Court in 1851 and 1882, was chosen clerk; Stephen Stimpson, Prudential Committee. A Building Committee was chosen consisting of Jonathan Oakes, Stephen Stimpson, George Winslow, Uriah Oakes, Charles Baldwin, Henry Van Voorhis and William Peirce. This committee was authorized to select and purchase a lot of land as a site for the school-house, and to borrow not exceeding \$1500 for building the same, in addition to \$500 to be raised by taxation, making a total of \$2000 placed at the disposal of the building committee.

A plan prepared by A. Benjamin was presented and it was voted to make the building two stories high, and thirty by forty feet in size on the ground. The committee were authorized to expend not exceeding \$2400 for this building. The Prudential Committee were authorized to employ such teachers as they judged proper, and a school was opened in a small house on School Street, while the new building was in process of erection. By a report of the Building Committee, presented at a meeting held August 22, 1842, it appears that the contractor, Mr. Elisha B. Loring, received for labor and material furnished \$1581.89. The cost of the land, which was purchased of Jonathan Oakes, now worth probably \$5000 or more, was \$150. The chairs for the building cost \$108, and the furnace \$149.44. These and various other items brought the total cost up to \$2595.11. A vote of thanks to the Building Committee was adopted and the Prudential Committee was directed to employ a male teacher.

The upper story was not at first used for school purposes, but continued to be used as a hall, and the Building Committee were authorized to furnish the same with seats. The Prudential Committee were also at the same meeting authorized to let the school-house hall for all religious worship, lyceums and singing-schools, but not to allow dancing or drilling.

At the annual meeting of the district held March 21, 1842, Solomon Corey was chosen clerk and continued to hold that office until the abolition of the district system in 1853. A school district library was established in 1842 and rules were adopted for the regulation thereof on March 21, 1843. David N. Badger was chosen as the first librarian at the same meeting.

Schools were opened in the new school building in the fall of 1842. From the report of the Prudential Committee March, 1843, it appears that the number of school children in the Southwest School District, between the ages of four and sixteen years, was 119, and that the amount paid for teachers' services from the organization of the district was \$306, male teachers receiving thirty dollars and female teachers sixteen dollars per month, and other incidental expenses brought up the total expenditures to \$347.67. The district continued to prosper and was steadily reducing its debt when, on Friday, the 27th day of February, 1846, at about one o'clock in the morning, the new school building took fire and was totally destroyed with its contents, including apparatus and library. The loss was estimated at \$2700; the insurance was only \$1200. The examination of the schools was to have taken place the same day.

On the 12th day of March the district met and voted to build a new school-house larger than the first, and chose as a Building Committee, George Winslow, Stephen Stimpson, Samuel H. Clapp, Capt. Jonathan Oakes, William Peirce, James H. Dix, Charles Baldwin and David N. Badger. From a report of the treasurer at the same meeting it appears that the total expenditure for schools was \$497.02 for the preceding year. It was voted that the new school-house be fifty-five feet long, forty-two feet wide, two stories high; the first story to be fitted up immediately for school purposes, the second to be used as a public hall until needed for use as a school-room. It was also voted to raise \$500 for the building by taxation this year. An attempt to reconsider this action March 24th, was defeated by a vote of forty-two to twenty-five, but the width of the building was reduced to thirty-six feet instead of forty-two, and the expenditure was limited to \$3300, which was considerably exceeded. The new building, like the old, was erected by our late esteemed fellow-citizen, Mr. E. B. Loring, with that thoroughness which was characteristic of his work. It continued to be used for school purposes by Malden and Everett for forty-three years, and after being remodeled in 1871, and partially burned in 1875, was abandoned for school purposes in the fall of 1889. Transformed into an engine-house during the year 1890, it promises to serve out a further extended term of usefulness. The final report of the Financial Committee, submitted March 18, 1847, shows a total expenditure on the building of \$3642.32, of which the contractor, Mr. E. B. Loring, received \$2903.33, including extras.

The whole number of scholars in the district, May 1, 1846, between the ages of four and sixteen years was 166. On the 30th day of October, 1847, it was voted to let the school-house hall free for Sabbath-schools. A committee consisting of Jonathan Oakes, Solomon Corey and Daniel A. Perkins was chosen at the same meeting to petition the Legislature for leave to assess and collect their own district taxes. This

movement developed into an effort to have South Malden set off and incorporated as the town of "Winthrop," and a petition for this purpose, headed by Jonathan Oakes, was presented to the General Court, February 2, 1848, by Mr. Bowker, of Boston, and referred to the Committee on Towns, which, on April 13, 1848, reported "leave to withdraw" and the matter was referred to the next General Court, April 17, 1848. At the next session, on January 11, 1849, the petition was taken from the files of the previous year and referred to the Committee on Towns, which again reported leave to withdraw March 19, 1849, which report was accepted March 29th. At the following session redoubled efforts were made for separation, and numerous petitions were presented from South Malden, beginning with one headed by James H. Dix, presented by Mr. Brewster, of Boston, January 16, 1850. Other petitions followed, headed respectively by Miss Joanna T. Oliver and Willard Sears.

From a statement entered in the record-book of the Southwest District under date of February 1, 1850, the following interesting facts appear in regard to Malden and the proposed new town.

The whole town grant for schools for 910 scholars was \$3000, of which the Southwest District with 147 children received \$495.35, and the South District with 77 children received \$259.49, and both with 224 children, \$754.84.

The valuation of the Southwest District was: Real estate, \$255,658; personal, \$70,321. South District: Real estate, \$102,843; personal, \$18,145. Total, \$446,967, without including estates of non-residents.

The estimated number of polls in the proposed town of Winthrop was 305; number of inhabitants was 1169. The whole amount of property was stated to be \$711,233.

The parent town of Malden, attacked on the north by the petition to incorporate Melrose (which was successful), and on the south by the petition to incorporate Winthrop, struggled earnestly to preserve its territorial integrity, and succeeded in postponing the incorporation of South Malden for twenty years more. The Committee on Towns reported leave to withdraw as before, and this report was accepted April 29, 1850. The effort for separation was by a petition presented to the Legislature March 25th. The matter was April 18th referred to the next General Court in which the petitions were taken from the files Feb. 14, 1857, and adverse report made April 18th, and accepted April 21st.

The last meeting of the Southwest District was held March 16, 1853, at which Solomon Corey was chosen clerk; Timothy C. Edmester, Prudential Committee; Stephen Stimpson, treasurer; Wm. Pierce, and H. W. Van Voorhis, Finance Committee. Their term of office was short, for at a town-meeting held April 4, 1853, Malden abolished the district system.

As showing the relative importance of South Malden, the following figures, giving the school appro-

priations for the whole town and the proportion allotted to South Malden for four years previous to the abolition of the district system, will be of interest:

SCHOOL APPROPRIATIONS.

Years.	Whole Town.	Portion Allotted to S. and E. W. Dist.	Per cent. of Total.
1840-50,	\$3000	\$754.84	25.16
1850-51,	3500	897.22	25.6
1851-52,	4000	1,408.27	35.2
1852-53,	4000	1,186.56	29.6

On the 1st day of May, 1853, the number of tax-payers in the Southwest District was 199, and in the South District, eighty-eight. As indicating the comparative wealth and taxation of 1853 and 1889, it may be added that there were in the South and Southwest Districts in 1853, only fourteen tax-payers, who were assessed \$100 or more each, against 173 in Everett in 1889. After making all due allowance for increased rates, these figures indicate a marked increase in wealth. The names of the tax-payers in South Malden paying \$100 or more in 1853 were: Eliphalet Kimball, \$113.89; Nathan Lynde's heirs, \$240.43; John Lewis, \$161.92; Nathan Nichols' heirs, \$450.50; Uriah Oakes' widow, \$337.31; Wm. and G. W. Pierce, \$172.53; Rebecca Perkins, \$110.84; Joseph Swan, \$189.87; Stephen Stimpson, \$123.67; Simon Tufts, \$273.84; H. W. and J. C. Van Voorhis, \$582.94; Geo. Winslow's estate, \$189.18; Leavitt Corbett, \$192.15; David Faulkner's widow \$135.22.

The abolition of the district system marks the close of another epoch in the history of South Malden, and at this point it may be well to note some of the changes which had occurred during the previous fifty-four years since the establishment of the South District.

One of the most important public works belonging to this period was the construction of the Newburyport Turnpike, which was laid out pursuant to a warrant of the county commissioners dated September 22, 1804. The proprietors were incorporated March 8, 1803. The work of laying out this road extended through the years 1804, 1805, 1806. The portion in South Malden was laid out and constructed in the two latter years. This road was laid out four rods wide and has so continued to the present time. It covered in part the location of the county road laid out in 1796 to East Malden. It continued to be operated as a turnpike road until 1852, when it was made a public highway by the county commissioners. In 1856 the boundaries were established by suitable monuments, and it has for more than eighty years constituted one of the important landmarks within our territory, and one of the great arteries of travel. It extends in a straight line northeasterly from Malden Bridge to near the northerly boundary of Everett, where it turns slightly to the west just before reaching the Malden line.

From the re-union of the North and South Parishes in 1792, until 1847, there appears to have been

no regular places of worship in the south part of Malden, though for a time before the district was divided, Miss Lambert, a day-school teacher, maintained a Sabbath-school in the old red school-house on the hill, where Mr. Evans' house now stands. In 1847, such was the growth in population and wealth, that the religious needs of the community began to require some local religious organization and service. By the union and co-operation of several members of the different evangelical churches and other benevolent persons residing in South Malden and Chelsea, a Sabbath-school was opened in the school-house of the Southwest District, on the first Sunday in May, 1847. The first superintendent of this Sunday-school was Deacon Calvin Hosmer, a member of the Baptist Church in Malden. J. H. Dix was secretary and treasurer, and W. C. Barrett librarian. At the first session thirty-six persons were present, and such was the interest manifested that the formation of a church began to be seriously considered. For the purpose of trying the experiment for a few months, the hall in the Southwest District was opened for public worship on December 19, 1847, and Rev. J. A. Benton was engaged to supply the pulpit for the first Sabbath. On the evening of March 8, 1848, a number of persons residing in South Malden, and members of different churches, convened at the house of Mr. Uriah Oakes to consult with reference to the formation of a church, and Uriah Oakes, John Willcutt and Samuel H. Clapp were made a committee to prepare articles of faith and make other needed preparatory arrangements.

The council met the 16th day of March. Among the facts presented for the consideration of this council were the following: Within a radius of one mile from the school-house there dwelt a population of 600, steadily increasing. The Sunday-school, which began with 36 members, then numbered 140, and for the last four Sabbaths the average attendance had been 118. The attendance at the meetings for public worship in the hall had varied from 80 to 240 in the day-time, and from 60 to 200 in the evening, and the increase had been gradual from the beginning, and during the last three Sabbaths the average had been 223. The council voted to proceed with the organization of the church in the evening, the exercises of which were. Reading of results of council; Scriptures by Rev. Mr. Guernsey, of Charlestown; prayer by Rev. Mr. McClure, of Malden; sermon by Dr. Blagden, of Boston; constituting the church and prayer by Rev. I. P. Langworthy, of Chelsea; fellowship of the churches by Dr. Edward Beecher, of Boston; and concluding prayer and benediction by Rev. J. A. Benton.

The names of the original members of the church were as follows: Isaac Clapp, Samuel H. Clapp, Uriah Oakes, Nehemiah M. Rider, Wm. Whittemore, Jr., John Willcutt, Eliza A. Baldwin, Harriet Battelle, Elizabeth Blaney, Susan P. Clapp, Rebecca J.

T. Mansfield, Charlotte Oakes, Sarah Oakes, Elizabeth W. Oliver, Joanna T. Oliver, Lucy B. Oliver, Lucy Pierce, Elizabeth Stimpson, Esther Whittemore, Esther R. Whittemore, Joanna T. Whittemore, Mariah H. Whittemore, Emeline Willcutt, Mary A. Wilson, twenty-four in all. Miss Joanna T. Oliver, whose portrait may be seen in the vestry of the Congregational Church, was one of the earliest pioneers as she was one of the most earnest workers in this field.

This little church met almost uniformly for business, at first at the residence of Mr. Uriah Oakes. March 25, 1848, at the regular business meeting held at the house of Mr. Oakes, it was voted that this church shall be called the "Winthrop Congregational Church," probably in anticipation of the incorporation of South Malden as the proposed new town of Winthrop. Uriah Oakes and John Willcutt were the first deacons. Rev. J. A. Benton was, on July 19, 1848, unanimously called as acting pastor, in which position he continued to officiate until November, 1848. Though the period of his ministration was short, he deeply influenced the polity of the church, inasmuch as he was the author of the Confession of Faith and By-laws, which, with some changes in 1871 and 1886, still continue in use. After the departure of Mr. Benton, the church was for about a year without a regular pastor.

On the 18th of October, 1849, Rev. Francis G. Pratt, of Andover Theological Seminary, pursuant to a call of the church, August 19, 1849, was installed as the first regular pastor of the church, in which position he continued for more than eight years, until April 13, 1858. During his ministry land was purchased for a house of worship, and the building which the church still occupies, with a seating capacity of about 350, was erected in 1852. It was dedicated December 8, 1848, and the first Sabbath services were held in the new church on December 12, 1852, previous to which time the meetings had been maintained in the Southwest District School-house. The house and land cost about \$12,000. In securing this Dea. Eliphalet Kimball was a prime mover, and Samuel H. Clapp, James H. Dix, Alonzo H. Evans, Wm. Whittemore, Wm. Baldwin and J. M. Gilford were also prominent in this movement. The pastorate of Mr. Pratt was a prosperous one for the church, many members being added during his ministry.

On the 8th of September, 1859, Rev. James Cruikshanks was installed, pursuant to a call extended to him on the 9th of June, and accepted June 26th. The church was far from unanimous in this call, and during the deliberations of the council there was presented a protest, in behalf of fifty-five members of the church, against the settlement of Mr. Cruikshanks. After listening to both sides, the council decided that the proceedings were regular, and they proceeded with the installation. Thereupon sixteen members, having been denied regular letters of dis-

mission, withdrew under the advice of an ex-parte council, and formed the Chapel Congregational Church of South Malden, of which Rev. L. H. Angier was pastor. They purchased a lot of land and erected a chapel on the site of the present residence of Mr. George C. Stowers, at the corner of Cottage and Winter Streets, which last street from that fact was for some time called Chapel Street. The new Chapel Congregational Church continued to exist until October, 1861, when, after various negotiations, both that and the Winthrop Congregational Church were disbanded, and reunited in one body as the South Malden Congregational Church, October 31, 1861. Of this council, Rev. Dr. Blagden, pastor of the Old South Church, of Boston, was moderator. The original cause for the disruption had been removed in the resignation of Rev. Mr. Cruikshanks, which was tendered June 15, 1859. He was dismissed by council June 29th following. The first deacons of the new church were Uriah Oakes, E. P. Foster and George Whittemore. The chapel was burned January 2, 1867.

On April 6, 1862, Rev. Oliver Brown, of Quincy, Mass., became acting pastor, in which position he continued until February 26, 1864, having received January 4, 1864, a vote of thanks for his earnest and successful labors in the interest of peace. On February 26, 1864, a call was extended to Rev. David M. Bean to become pastor, which was accepted March 5th, and on June 28th he was duly installed by a council called for that purpose. During his pastorate occurred a powerful revival, as the result of which there were added to the church July 1, 1866, nineteen individuals, besides numerous others in the course of his ministry. On November 24, 1868, Rev. Mr. Bean was dismissed by council. On January 28, 1869, a call was extended by the church to Rev. Albert Bryant, formerly missionary in Turkey, who accepted and was installed March 25, 1869. During his ministry in 1871, the creed and by-laws were revised, and a young people's prayer-meeting was instituted. Mr. Bryant's pastorate continued until May 13, 1874, when he was dismissed.

On the 4th of August, 1874, a call was extended to Rev. W. J. Batt, which was declined, and in January following, a call was extended to Rev. Webster Hazlewood, who was installed July 7, 1875, resigned February 10, 1876, and was dismissed by council May 4, 1876. From August 1, 1876, until October 17, 1881, Rev. Wm. H. Bolster served as acting pastor, harmonizing the dissensions growing out of the previous pastorate, and leaving the church in a healthy and prosperous condition. From an able historical sermon delivered by Mr. Bolster, November 11, 1877, many of the foregoing particulars are derived.

On the 26th of April, 1882, Rev. George Y. Washburn, a graduate of Andover, who had supplied the pulpit for five months, was ordained and installed. During his ministry large numbers were added to the

church, which also prospered in other directions. On July 1, 1883, as the result of a revival, thirty-five were added to the church, twenty-four on profession of faith. A debt of \$4000, which had existed since the building of the church in 1852, was extinguished. This desirable result was consummated April 26, 1886. The church has since been newly frescoed in a very tasteful manner by Mr. Everett B. Wilson, a graduate of the Everett grammar school. In 1887 and 1888, especially the latter, there were revivals resulting in numerous additions to the church. The Courtland Street Mission was instituted March 29, 1885, and in the same year a chapel was erected there by Captain Samuel J. Sewall, one of the public-spirited citizens of Mystic Village.

Mr. William H. Whipple was the first superintendent. Religious services and a Sunday-school have since been maintained there. The whole number in the Sunday-school is 126; average, 80. Near the close of Mr. Washburn's pastorate, the church became interested in the Mystic Side Mission, maintained by the Malden and Everett Congregational Churches, through the Mystic Side Congregational Union, organized March 28, 1889. Under the auspices of this association a Sunday-school was opened March 31, 1889, in a room formerly occupied as a grocery-store, at the corner of Main and Woodville Streets, Everett. The membership has increased from 61 to 190, with an average attendance of 130 in the spring of 1890. The Union has purchased 34,000 feet of land on Willis Avenue, with a view to erecting a house of worship. The superintendent is James M. Morey, of Malden.

Mr. Washburn closed his labors in April, 1889. During his pastorate the twenty-fifth anniversary of the re-union of the Winthrop and Chapel Churches was appropriately commemorated, October 31, 1886, on which occasion Mr. Washburn delivered a very interesting historical sermon.

Rev. Eddy T. Pitts was called to the pastorate July 30, 1889, and, having accepted the call, commenced his labors on Sunday, September 1, 1889, and still continues in this position. The membership of the church in October, 1889, was 258, as compared with 145 in 1879. The number in the Sunday-school in April, 1890, was 410, as compared with 230 in 1879. The number of volumes in the Sunday school library in April, 1890, was 374. The receipts of the society during the year 1889-90 were \$3096.14; the expenditures \$3,080.57.

The account of the Congregational Church has carried us far beyond the period under notice at the time of its institution. Returning now to the period prior to the abolition of the district system, a few facts require mention. Some time after the establishment of the Fire Department in Malden, an engine was procured and an engine-house built in South Malden in 1847. The first fire-engine was a common hand-engine, named "General Taylor," in honor of the

hero of the Mexican War, then freshly wearing the laurels of victory. This continued in use as the only engine in South Malden and Everett until 1878. The engine-house erected in 1847 was partially destroyed by fire in 1860, when it was sold and removed to the lot next southwest of Whittier's store, where it still stands, remodeled into a dwelling-house. The present engine-house, about to be abandoned, was erected in 1860, and the engine-house lot was at the same time enlarged.

Woodlawn Cemetery, occupying about one hundred acres, in the east part of Everett, besides seventy-six acres more, owned by the corporation, was organized August 31, 1850. The grounds were consecrated July 2, 1851; the corporation confirmed and established April, 1855. The first interment was made on the evening of July 1st, next preceding the consecration. The whole number of interments to June 1, 1856, was nine hundred and forty-eight.

The order of exercises at the consecration consisted of music, reading of the Scriptures, by Rev. I. P. Langworthy, prayer by Rev. Wm. I. Buddington, original hymn by Rev. J. H. Clinch, of Boston, address by Rev. Geo. E. Ellis, of Charlestown, hymn by Henry W. Fuller, Esq., prayer and benediction by Levi Fuller.

Mr. Henry W. Fuller was connected with the cemetery from its origin to his death, August 14, 1889, and to make it what it is may be said to have been his life-work, and the cemetery is his most enduring monument.

Woodlawn is one of the most tastefully adorned cemeteries in the suburbs of Boston, and does lasting honor to the elegant taste of Mr. Fuller. It embraces an area of about one hundred acres between Elm and Fuller Streets. The corporation has made repeated attempts to procure from the town leave to bury in an adjoining tract of land containing about seventy-six acres, known as the Corbett farm, purchased by the corporation in 1868, but heretofore without success. The number of interments in Woodlawn Cemetery to January 1, 1879, was 11,459, and the total to April 25, 1890, was 19,187.

The town has during the present year laid out a tract of land of about twelve acres between Fuller street and Woodlawn as a burial-ground, to be called Glenwood Cemetery.

A new road to Chelsea, now known as Second Street, was laid out by the county commissioners in 1852, and was built in 1854, at a cost of \$5279.89.

A post-office was established in South Malden, and Solomon Corey, father of the late incumbent, was appointed the first postmaster, January 17, 1852. The first post-office was established, and was for several years kept in the store of Mr. Uriah Oakes, at the corner of Chelsea Street and Broadway, now occupied as a fruit store. In 1857, James H. Dix succeeded Mr. Corey, and removed the post-office to

the store now occupied by Whittier Brothers. Mr. Dix continued to be postmaster during 1857 and a part of 1858, and was in 1858 succeeded by George W. Chase, who served until June 10, 1859, when David N. Badger was appointed, and continued in the office until about January 1, 1865, when he was succeeded by Joseph Gerrish, who was postmaster from 1865 to 1869. David N. Badger was then reappointed, and served until November 7, 1871, when George E. Kimball was appointed as the first postmaster of Everett proper, in which position he remained until July 25, 1872.

Before the erection of the Masonic Building, Mr. Badger had kept the post-office in his building on Broadway (the old engine-house reconstructed), next southwest of Whittier's store. The post-office was removed to the Masonic Building in the fall of 1871. Shortly after Mr. Kimball's appointment several improvements were introduced. Two daily mails were established instead of one, as had formerly been the case, and letter-boxes were provided. Mr. Kimball having removed to Chelsea, Dr. James B. Everett was appointed postmaster July 25, 1872, having been the acting postmaster for several months prior to that date.

He continued in service until April 6, 1886. In 1876 Mr. Kimball again returned to Everett, and as assistant postmaster was connected with the office during the remainder of Dr. Everett's term. The postal service during this period was greatly extended and improved. Everett was made a money-order office in 1879. Shortly afterwards, in the same year, an additional daily mail was established, making three daily. A telephone was connected with the office in 1880. A Sunday mail was established early in 1881. A telegraph office was opened November 6, 1882. In 1884 it became an international money-order office. On the 6th of April, 1886, Columbus Corey, son of the first postmaster, succeeded Dr. Everett. The office up to this time had been kept in Dr. Everett's drug-store, but on the appointment of Mr. Corey a new office, with suitable appointments, was fitted up also in the Masonic Building, separate from any other place of business, a change which had become imperative owing to the growth of the business. In the thirty-eight years which have elapsed since the establishment of the post-office, the business has shown a wonderful increase. This is indicated by the increase in the compensation of the postmaster from \$53.90 in 1853 to \$141.66 in 1863, \$430 in 1873, and \$1200 in 1882, when it became a Presidential office. The business of the post-office for the year ending March 31, 1890, amounted to \$5602.82, and the compensation of the postmaster to \$1700. On the 1st day of June, 1890, Mr. Corey was succeeded by Mr. Charles Manser, who had been designated as the choice of the majority of the Republicans by a caucus held in Everett Hall, April 21, 1890. On July 1, 1890, another daily mail was established, making four

every week-day. A free postal delivery was established Nov. 1, 1890, the houses having been numbered pursuant to a vote of the town adopted in March, 1890. Through the kindness of Postmaster Corey the following interesting facts, relating to the growth of the business during his term of service, have been furnished:

<i>Year ending</i>	<i>Money orders issued</i>		<i>Postal notes</i>	<i>Total Receipts.</i>
<i>March 31.</i>	<i>Domestic.</i>	<i>Foreign.</i>	<i>issued.</i>	
1887	492	129	482	\$3450
1888	619	191	497	4501
1889	778	354	582	5034
1890	951	321	517	5003

A large part of South Maldepe, or Mystic side, was originally laid out in small lots of five and ten acres each. The greatest admirer of the system of peasant proprietors could ask for nothing better; but in the course of two centuries, these holdings, too small to afford the owners a livelihood, had one by one been absorbed by large landed proprietors until nearly the whole area of South Malden was divided among a small number of large farms, several of them exceeding 100 acres each.

About the year 1845 these large tracts began to be cut up and sub-divided, and laid out into house-lots, and during the twelve years from 1845 to 1857, no less than twenty-five large and important tracts of land were thus surveyed and placed upon the market in lots desirable for building purposes. Among these we may mention the Daniel Waters estate in 1845; the Winnisimmet Company's land in 1846; the former farm of Jonathan Oakes, on Belmont Hill, and the farm of Timothy Clapp, in 1850; the Belmont lands and the estate of Jonathan Oakes' heirs, on School Street, in 1852; the Lynde farm in 1854; Mount Washington and the Samuel Pierce farm, on both sides of Bradford Street, in 1856. The opening of these large tracts to settlement had no small influence in promoting the subsequent increase in population and wealth.

The period just then beginning opened up several important facilities for public travel. The Eastern Railroad and the Saugus Branch were both opened in 1854, and communication by street railway with Boston was opened in 1858; one line of cars running up Main Street to Malden, operated by the Malden & Melrose Railroad Co., afterwards leased to the Middlesex Railroad Co., incorporated June 6, 1856; and another line up School Street and Broadway and through Summer Street to Woodlawn and Cliftondale, operated by the Cliftondale Railroad Co., incorporated April 1, 1859. In the course of a few years later they made half-hourly trips during the day, and hourly trips until late in the evening, and the fare to Malden was ten cents. The last-named route was abandoned many years ago.

During the preceding half-century the tolls on Malden Bridge had been materially reduced, but the tolls levied upon travelers upon that and the Warren and Charles River Bridges still constituted a serious

incumbrance upon public travel. The two latter bridges were made free April 30, 1858. One of the most important events as regards the growth of South Malden was the abolition of tolls on Malden Bridge, which was laid out as a public highway, free from tolls, April 1, 1859. The significance of this event was not misunderstood by the inhabitants of South Malden, and the day was observed with great rejoicings. The town bells were rung, and a detachment of the Charlestown Artillery fired a national salute at morning, noon, evening and at eleven o'clock. A procession, headed by Captain Stephen Stimpson as chief marshal, followed by a cavalcade of prominent citizens on horseback (among them Hon. Alonzo H. Evans and Deacon Calvin Hosmer), escorting the selectmen of the town in a barouche, drawn by four white horses, with the Malden Brass Band, the General Taylor Engine Company, and the children of the public schools in several vehicles, and others, proceeded across the bridge with flags flying, as far as Charlestown Square and back again to South Malden, where they partook of a bountiful collation, and listened to patriotic addresses in the afternoon.

A great impetus was given to the growth of the population, which rose from 1169 in 1850 to 1547 in 1860, and 1886 in 1867. The assessors' valuation, not including the estates of non-residents, increased from \$779,125 in 1854, to \$910,675 in 1860, and to \$1,104,493 in 1867. The number of miles of accepted streets in 1859 was eleven, increased in 1869 to fourteen.

At the outbreak of the war thirty-seven of the citizens of South Malden responded to their country's call, but until the organization of a Grand Army Post here the record of their names and deeds was never brought together, and is even now imperfect, though the most important facts so far as known are given below.

Previous to 1883 there was no Grand Army Post at Everett, partly owing to the fact that Everett was not a distinct municipality until several years after the war. In the spring of 1883 a few of the veterans conceived the idea of organizing a post. On canvassing the town it was found that fifty or sixty old soldiers were at that time residents of Everett. The post was formally instituted on Thursday evening, June 14, 1883, in Everett Hall, with a membership of twenty-four, by Deputy Commander Geo. S. Evans and staff.

The name of James A. Perkins Post was adopted in honor of Lieut. James Amory Perkins, of the Twenty-fourth Massachusetts Volunteers, a gallant and efficient officer, who was killed in an assault upon Fort Wagner on Morris Island, August 16, 1863, at the early age of twenty-seven years.

The Post prospered and increased from the outset, meeting first in Odd Fellows' Hall until the spring of 1884, when it leased what was lately known as Grand Army Hall, on Chelsea Street, adjoining the Masonic Building.

About this time a relief fund was established for

the relief of old soldiers and sailors and their families, whether members of the organization or not, and it now amounts to a considerable sum. In the spring of 1889 the Post leased its present quarters on the third floor of Plaisted's Block. The membership in April, 1890, amounted to nearly ninety. It annually observes Memorial Day with appropriate ceremonies, and from an eloquent address by the adjutant of the post, Comrade Andrew J. Bennett, delivered on Sunday afternoon, May 29, 1887, a few extracts are given, with some additions giving such particulars as can be obtained in reference to the men of South Malden who offered themselves on the altar of their country during the Civil War.

"ROLL OF HONOR OF SOUTH MALDEN, 1861-1865. These are the names of patriots who have passed over to the majority: Robert Atkins, Third Iowa, who left a peaceful home, never in the flesh to return.

James M. Baldwin, First Massachusetts Cavalry; Harry H. Currier, Forty-fourth Massachusetts; Hugh L. Currier, Forty-fourth Massachusetts. Well I knew these in the old days, in the decade before the struggle; in the sunshine of youth, before we dreamed that any occasion would present itself in their lives to make them heroes.

Edward E. Clapp, Pennsylvania Infantry, who fell at Spottsylvania in 1862; one whose life, yielded up at the demand of his country, had given the promise of large usefulness. "He had that fine fibre of manhood which is better than genius." Rest, beloved son and affectionate brother; soldier of the Republic, faithful unto death, rest!

"Green be the turf above you, friends of our better days;

None knew you but to love you, none named you but to praise."

Charles Dean, Sr., morocco dresser, died at Soldiers' Home, Chelsea, May 27, 1887; Hervey Dix, Third Iowa, who fell in 1861, in a victorious engagement at Kirksville, Missouri, whose last words were, "The Third Iowa never surrenders." The lyric muse has chanted his dirge in a requiem dedicated to his regiment. His familiar form, I doubt not, is present to the mind's eye of those who knew him.

Stephen Emerson, theological student, graduate of Harvard College, First Massachusetts Infantry, killed at Chancellorsville, May 5, 1863. Had this youth returned, he might, perhaps, have been our Laureate. At the call to arms he doffed his college gown, girt on his armor, went to the front and died like a hero. "Greater love hath no man than this, that he lay down his life for his friends."

Joseph P. Emmons, brickmaker, about twenty-two years old, a former Malden school-boy, died at Andersonville, Company I, D. C. Cavalry, and afterwards Company G, First Maine Cavalry; Wm. H. Faber, rope-maker, Nineteenth Massachusetts; an old Malden school-boy. Some of you will remember when the flag was at half-mast in this village, in 1864, his death having been reported. He recovered, returned and died at home.

Ephraim Hall, Nineteenth Massachusetts, one of the cleverest men of one of the cleverest regiments sent out by the old Bay State.

Jesse Lincoln, Thirty-fifth Massachusetts; a smooth-faced boy. His comrade relates that one morning when his company was moving out to the front, and Jesse, weak and debilitated, had been ordered by the surgeon to remain in camp, he persisted in following; "Bob looks so lonesome, going off without me," said the boy.

Edwin Lord, First Massachusetts Cavalry. A brave man.

Joseph Spooner, First Massachusetts; type of stalwart New England stock, grand soldier of the glorious First Massachusetts, whom Hooker led and Cudworth loved, who was in all the campaigns from the baptismal battle of Blackburn's Ford, in July, 1861, till one day in 1864, when the survivors stood before our war Governor, who characterized them as "War-worn and scar-worn veterans."

John Spooner, Forty-fifth Massachusetts. Younger brother of the preceding. Somewhere along the broken line, where the waters of the Gulf beat against the coast of the Lone Star State, he found a grave.

Augustus S. Stimpson, First Massachusetts Cavalry. He was a fireman, as was his comrade, Lord. The circumstances of this man's life, before he became a soldier, from week to week, and month to month, made him familiar with danger.

William Whittemore, Forty-fourth Massachusetts. We could not think of him as dead; it seemed as though at any time we might see him approaching us, with the smile of greeting in his eyes."

The following is the list of names of living comrades who enlisted from South Malden:

George Atkins, 2d Mass.	Fred. Lincoln, Navy.
Bartlett Baldwin, 1st Mass. Cav.	Elisha A. Loring, 30th Mass.
Frank A. Brown, 17th Mass., the first man to enlist from South Malden.	Frank M. Loring, 4th Mass.
Sebastian Cutler.	Stephen McLaugh.
Chas. H. Dean, 2d Mass. Cav.	Hiram Mills, Navy.
Daniel Desmond, 33d Mass.	Wm. H. Mirick, 17th Mass.
John Earle.	Isaac Newton Organ, 38th Mass.
Geo. Emerson, 15th Mass.	Wm. C. Peabody, 33d Mass.
Horace Flagg.	Wm. F. Pike, 5th and 61st Mass.
Alexander Greene, 1st Cav.	Edward L. Shute, 8th Mass.
Thos. Grover, 45th Mass.	Gulian H. Van Voorhis, 4th Mass.
Edward Lawton, 17th Mass.	James A. Wallace, 4th Mass.
	Andrew J. Bennett, 1st Mass. Lgt. Battery.

It is to be hoped that a suitable monument may be erected in our new town cemetery to the soldiers who fell during the War of the Rebellion.

The Universalist Society, the second religious society in South Malden of those now existing, was formed in 1865. As near as can be ascertained, religious services began to be held by them in 1864, but the earliest record of any meeting for business is under date of March 28, 1865, at Badger's Hall. This meeting was called to order by Wilson Quint. William Johnson was made chairman and R. M. Barnard clerk. A committee consisting of Messrs. Quint,

Lewis and Barnard was appointed to make arrangements with Rev. B. K. Russ, of Somerville, to preach for one year as a supply. The society continued to worship in Badger's Hall until September, 1872, their principal ministers being Rev. T. J. Greenwood, Dr. A. A. Miner, Rev. H. J. Cushman, Rev. L. L. Briggs, Rev. A. J. Canfield, Rev. W. H. Cudworth and Rev. W. H. Rider, then a theological student. Just before the incorporation of the town they completed their organization as a religious society, July 8, 1869, the petitioners for this purpose being William Johnson, Anthony Waterman, J. D. Bean, H. M. Currier, David N. Badger, James Pickering, Thomas Leavitt, Elisha B. Loring, Elisha A. Loring, Francis B. Wallis, Thomas Lewis, Adams B. Cook, R. M. Barnard, Philip Ham.

Shortly after the incorporation of the town, a movement was commenced for building a church, and on May 22, 1871, it was voted to commence building when subscriptions reached \$3000. On the 24th of September, 1871, a building committee was chosen, consisting of Anthony Waterman, Elisha B. Loring and R. M. Barnard. On the 19th of October, 1871, the committee was instructed to commence. The lot at the corner of Summer Street and Broadway was purchased, and the corner-stone laid May 14, 1872. The first religious service was held in the vestry June 22, 1872, and the building was formally dedicated Wednesday, September 25, 1872, and the first religious service in the new church was held on the Sunday following. This church was remodeled in 1889, and re-dedicated January 17, 1890, with appropriate ceremonies.

The first superintendent of the Universalist Sunday-school was Mr. Wilson Quint, who was succeeded by J. D. Bean, Mr. Philip Ham, Isaac E. Coburn, Rev. R. P. Bush, September 10, 1888, and Mr. A. J. Bennett. The Sunday-school has increased from 150 in 1879 to 227 in the spring of 1890. The Sunday-school library contains 550 volumes. The pulpit continued to be occupied by preachers settled in neighboring towns, principally Rev. Warren H. Cudworth, until December 1, 1879, when R. Perry Bush, then a student in the divinity school at Tufts College, was engaged as a stated supply until April 14, 1880, when he was unanimously called as pastor, and was installed June 13, 1880.

The original cost of the building and land was \$10,000, and it had a seating capacity of upwards of 200, which by the remodeling was increased to about 400, at a cost of \$9000. It is adorned with memorial windows, the gift of R. M. Barnard and Henry Schrow. The architects of the remodeled building were Messrs. Brigham and Spofford.

In 1866 two new school-houses were erected, one on Thorndike Street and the other on Ferry Street, at a cost of about \$8500, finished and furnished. Schools were opened in the lower story of both buildings in the spring of 1867, the upper stories being left unin-

ished until some years later. Both of these buildings have since been sold. In 1868 a school-house was also erected on Hancock Street at the corner of Hanson Street, costing for building and land \$2165.61. The first school in this building was established in the spring of 1869. This school was discontinued in November, 1874, and the land and building sold at auction for \$1341.17, in 1875.

On July 15, 1867, a Sunday-school was organized in the Glendale District by members of the Young Men's Christian Association of Malden, which resulted January 1, 1870, in the organization of the Glendale Union Christian Society, with twelve members, which purchased the lot of land on which the Glendale Chapel now stands, August 1, 1872, for \$672. In 1882 a movement was inaugurated for building a house of worship; the corner-stone was laid July 6, 1882, and the completed edifice was dedicated October 11, 1882, the sermon being preached by Rev. W. F. Mallalieu. The cost of the building and land was about \$2700. A Sunday-school was maintained there and also occasional religious services until 1888, when, these having been discontinued, the chapel was leased to the First Baptist Church in Everett, which, on December 16, 1888, opened a Mission Sunday-school there, which had a membership of 126 in December, 1889. The number of volumes in the Sunday-school library is about 300.

The only other organization antedating the incorporation of the town is that of the Palestine Lodge of Free Masons, which originated in a meeting held September 23, 1868, at which permission was asked of the Mt. Vernon Lodge of Malden to form a lodge of Free and Accepted Masons in South Malden, and Palestine was the name agreed upon for the new lodge. The petition, signed by 14 members of Mt. Vernon Lodge was granted at the regular communication of Mt. Vernon Lodge held December 3, 1868. The dispensation was granted December 8, 1868, by Charles C. Dane, Grand Master of the Grand Lodge of Massachusetts. The Grand Master appointed George W. Pierce, Master; Henry L. Chase, Senior Warden, and Alfred Tufts Junior Warden. The first regular communication of the Palestine Lodge was held in the engine-house hall, January 14, 1869, at which the organization was completed, as follows: Treasurer, Thomas Leavitt; Secretary, James P. Stewart; Senior Deacon, J. Franklin Wakefield; Junior Deacon, Philip Ham; Senior Steward, John G. Berry; Junior Steward, Albert W. Lewis; Inside Sentinel, Benjamin Corey; Marshal, Stephen A. Stimpson; Tyler, Thomas Leavitt; Chaplain, James Skinner.

The lodge continued to operate under dispensation until December 8, 1869, when it received a full charter.

The charter members were George W. Pierce, Henry L. Chase, Alfred Tufts, Thomas Leavitt, James P. Stewart, J. Franklin Wakefield, Philip Ham, Stephen A. Stimpson, Benjamin Corey, Albert W. Lewis,

Henry W. Van Voorhis, John C. Van Voorhis, Peter Hanson and John G. Berry, the same who petitioned for the dispensation. But four of these, Messrs. Leavitt, Lewis, Stewart and Ham, still remain members; Messrs. Pierce, Tufts, Wakefield, Hanson and Stimpson have died, and Brothers Chase, H. W. and J. C. Van Voorhis, Corey and Berry have withdrawn. The lodge was formally constituted December 22, 1869, by Grand Master William Sewall Gardner, and suite, and the first board of officers was installed at the same meeting. The lodge continued to hold its meetings at engine-house hall until the spring of 1872. The need of a building, both for their own and town purposes, was apparent, and the action of the town in postponing the erection of a town-hall suggested the idea of erecting a building suitable both for town and lodge purposes. As the result, the Masonic Building, at the corner of Broadway and Chelsea Streets was commenced in October, 1870, completed in 1871, and enlarged in 1872. The lodge moved to their new hall in the spring of 1872, and the same was dedicated with appropriate ceremonies on Tuesday evening, June 11th, in the same year, by Grand Master Sereno D. Nickerson, of the Grand Lodge of Massachusetts. The Masters of the lodge have been as follows: George W. Pierce, 1869-70-71-72; Chas. D. Stearns, 1873-74; Charles F. Atwood, 1875-76; Philip Ham, 1877-78; Columbus Corey, 1879-80; Nathan Nichols, 1881-82; John F. Nichols, Jr., 1883-84; James A. Wallace, 1885-86; Francis A. Dyer, 1887-88; George W. Whittemore, 1889-90. There have been admitted in all 165 members, of whom eleven have died, thirty-four have been dismissed, and fifteen excluded.

With all these developments of local life, the agitation for incorporation as a separate town, which had slumbered since 1857, revived in full force. In the autumn of 1867 petitions were circulated, and, having obtained numerous signers, were presented in the next General Court. The first was that of Hawes Atwood and sixty-two others, presented by Mr. Hughes, of Somerville, in the House on Jan. 10, 1868, for the incorporation of South Malden as a new town. Remonstrances were also presented. The attempt was unsuccessful, and on the 25th of February, 1868, the committee on towns reported reference to the next General Court, which, on the 27th of February, was accepted.

At the next session the effort was renewed, the petition of Hawes Atwood and others being taken from the files of the previous year and referred to the Committee on Towns. January 18, 1869, several additional petitions were also filed with some remonstrances. March 16th the committee again reported leave to withdraw, but a minority dissented and reported a substitute bill. On the 19th day of March, the report coming up for consideration, a substitute bill incorporating the town was moved by Mr. Goodspeed, of Athol, on behalf of the minority of the Com-

mittee on Towns. This bill was debated on two successive days, and on March 25th was rejected by a tie vote of 67 to 67, and on the same day the report was accepted, 69 to 67. On the 26th of March reconsideration was moved, and the matter was again debated on March 30, 1869, when the motion to reconsider was rejected by a tie vote of 101 to 101. After this the report was accepted, thus ending the struggle for that year. The name of Winthrop having already been appropriated by another town, it became necessary to substitute some other name for the proposed new town, and Everett was selected at a meeting held at the Congregationalist vestry. The vote of the town of Malden to purchase the franchise of the Spot Pond Water Company, thus incurring a heavy water debt, furnished another argument to the petitioners for separation in the struggle of 1870.

At the next session of the Legislature in 1870, there were two projects before the General Court—one on petition of E. S. Converse and others to annex the whole of Malden to Boston, on which leave to withdraw was reported; another, a petition to incorporate the town of Everett. Petitions came in more numerous than before, there being some 309 petitioners against 66 remonstrants. The committee, of which William Cogswell, now member of Congress, was chairman, reported leave to withdraw February 14, 1870, but a minority dissented and reported a substitute bill, and on February 23d the motion to substitute the bill was debated the remainder of that day and a part of the next, when the bill was substituted—yeas, 126; nays not counted. The next day, on ordering the bill to a third reading, the vote stood: yeas, 130; nays, 69. Among the distinguished names recorded in favor of the division were those of T. H. Sweetser, J. E. Fitzgerald, B. F. Mills, Bushrod Morse, G. H. Ruffin, C. R. Train and A. J. Waterman (both of the last afterwards attorney-generals); and on the other side, General William Cogswell, A. W. Beard (late State treasurer, and now collector), Selwyn Z. Bowman (afterwards member of Congress), T. C. Hurd (clerk of courts of Middlesex County), and J. K. Tarbox (afterwards member of Congress).

The bill was engrossed in the House, February 26th, and sent to the Senate, where, after passing through prior stages, it was, on the 3d day of March, ordered to a third reading, 216 yeas to ten nays, among the yeas being Messrs. George M. Buttrick, (now a resident of Everett), C. R. Ladd (afterwards auditor) and Patrick A. Collins (late member of Congress). The bill was engrossed in the Senate on the following day, and on March 9th it was enacted in both Houses and signed by the Governor.

The achievement of this victory after so protracted a struggle was signalized by great rejoicings in Everett. On the evening of the day on which the bill was signed the people gathered in the public square and in the vestry of the Congregational Church; speeches of congratulation were delivered, and a salute of 100 guns fired,

with other demonstrations of rejoicing. In May the organization of the new town was celebrated by a sumptuous collation under one of Yale's largest tents, in which some six hundred persons participated. Alonzo H. Evans presided, and, after a short address of welcome, read letters from the Governor of Massachusetts, the mayor of Boston and other distinguished persons. Interesting speeches were also made by Lieut.-Colonel Parker, Rev. Albert Bryant, Patrick A. Collins, A. O. Brewster and others. Among those prominent in the contest for the incorporation of the new town were A. H. Evans, Hawes Atwood, William Johnson, Anthony Waterman, Stephen H. Kimball, Henry S. Whitmore, Columbus Corey, William E. Titcomb and Thomas Leavitt.

The first town-meeting warrant was issued by James G. Foster, justice of the peace, March 9, 1870, and the first town-meeting was held March 21, 1870, in the vestry of the Congregationalist Church, where the town-meetings continued to be held during the first year after the town was incorporated. At this town-meeting Alonzo H. Evans was chosen moderator, Joseph H. Cannell, clerk, by 119 votes over J. F. Wakefield, who had 104 votes, Mr. Cannell having served by successive re-elections to the present time. Hawes Atwood cast the first vote. Hawes Atwood, A. H. Evans, Columbus Corey, Anthony Waterman and Elisha B. Loring were appointed a committee on the division of debts, public property, etc., with Malden. It was voted to have five selectmen, and the first board elected, who were also overseers of the poor, consisted of Henry W. Van Voorhis, Wm. H. Lounsbury, Elisha B. Loring, George W. Peirce and P. Richmond Pratt. Of these, George W. Peirce and Elisha B. Loring have since deceased. Mr. Loring had filled many places of trust in the parent town of Malden, and served by successive re-elections until March, 1876. He died February 21, 1890, after living to an advanced age, universally trusted and respected. James G. Foster, Wm. Johnson and Otis Merriam were elected assessors. Daniel Emmons was chosen treasurer, by 116 votes to 104 for P. P. Ware, and served by successive re-elections until January 1, 1880. For School Committee, George S. Marshall and Charles F. Atwood were elected for three years; J. H. Whitman and Wilson Quint for two years, and James G. Foster and H. M. Currier for one year. Mr. Quint declined to serve on the School Committee, and the joint convention of selectmen and School Committee elected Dr. J. F. Wakefield.

Solomon Shute, Benjamin Corey, E. B. Edmester, Thomas Leavitt, George Sargent and Timothy Murphy were elected constables. The number of ballots cast at the first town-meeting was 232. A code of by-laws was adopted May 17, 1870. The first auditors, chosen November 8, 1870, were Columbus Corey and Joseph H. Cannell.

On the 4th of April the following appropriations were made; For schools, including contingent,

\$8000.00; highways, \$3500.00; salaries of town officers, \$835.00; poor, \$500.00; Fire Department, \$200.00; contingent, \$3000.00; street lamps, \$500.00; bridges, \$500.00; interest on town debt, \$3000.00. These—with the State tax, \$2726.40; county tax, \$1109.91; overlays, \$974.53—made a total tax levied the first year of \$24,845.84.

The number of dwelling-houses in town May 1, 1870, was 414; the number of acres of land taxed, 1959, or about 120 acres greater than it is at present, 120 acres west of Malden River having been set off to Medford in 1875; the number of children between five and fifteen years of age, 432.

In the division of the town property, the town of Everett received all the real estate located within its limits, with some personal property, valued in all at \$37,606.99, and in consideration of same, it assumed \$38,500.00 of the debt of the old town. As showing the changes in the rates of interest, it may be remarked that the first loan procured by the town of Everett bore seven per cent. interest, and this rate was paid for several years. By the report made to the secretary of the Board of Agriculture, by the town clerk, October 17, 1870, it appears that there were at that time twenty-six miles of streets, four having been laid out and accepted the first year, viz.: Lincoln Street, Fremont Avenue, Garland Street, and Oak Street, now called Central Avenue.

The school accommodations of the town at that time consisted of the old Centre School-house, with two small rooms and one large one; the Glendale School-house, with two small rooms, and the Hancock Street, Ferry Street and Thorndike Street School-houses, with one finished room each.

Among the first things that came up for consideration by the new town, was that of providing a Town-House, which was indefinitely postponed; the proposed alterations in the old Centre School-house met the same fate. At a town-meeting held January 11, 1871, it was voted to lease the hall and offices in the Masonic building for town purposes. The first town-meeting in Everett Hall was held March 28, 1871, where all subsequent town-meetings have been held.

The incorporation of the town gave a marked impetus to all kinds of local improvement. Several additional tracts of land were laid out into house-lots, and opened to settlement, and the increase in population and wealth the first five years was very rapid, the population increasing from 2220 in 1870, to 3651 in 1875, and the valuation from \$1,736,379.00 to \$4,404,650.00.

Nor was it in material growth only that this prosperity was manifested. Two religious societies, the Baptist and Methodist, came into existence within the first two years after the town was incorporated. The Methodist Church originated in a class-meeting held at the house of Joseph Ladd, April 12, 1870. The society was formally organized

October 11, 1870, and ground was broken for their church on the same day. The church had sixteen constituent members. The first pastor was Rev. W. F. Mallalieu, D.D. The corner-stone of the new edifice was laid December 19, 1870, and the completed structure was dedicated May 24, 1871, the cost of the building and land being \$14,000. Rev. William Cheney was pastor from April, 1871, until April, 1872; Rev. Edward W. Virgin from April, 1872, to April, 1875; Rev. Edward P. King from April, 1875, to April, 1878; Rev. Edward R. Thorndike from April, 1878, to April, 1881; Rev. Thomas Corwin Watkins from April, 1881, to April, 1884; Rev. J. W. Dearborn from April, 1884, to April, 1887; Rev. F. T. Pomeroy from April, 1887, to April, 1890, and Rev. Charles Young from April, 1890, to date.

The Sunday-school, which numbered in April, 1890, 352, as compared with 198 in 1879, was organized May 28, 1871. Charles W. Johnson was the first superintendent, and served four years. The parsonage was built in 1875. The membership of the church in April, 1890, was 218 and 14 probationers, as compared with 128 members and 14 probationers in 1879. The church was seated with pews in place of settees, which had been previously used, in 1886, at a cost of \$500. The number of volumes in the Sunday-school library is 500. The total amount of money raised for church expenses from the date of organization has been \$35,000.

Until 1882 this church was burdened with a heavy debt. Sunday, June 4, 1882, was set apart for raising the debt, and voluntary subscriptions were asked for and some \$4000 were pledged, to be paid in two years in four payments. The pastor, Rev. T. C. Watkins, labored indefatigably to make up the remainder, and his efforts were finally crowned with success. To him belongs the honor of being the pioneer in the movement for raising the church debts in Everett, and within a very few years every other church in town, stimulated by the example of the Methodists, had likewise paid its church debt. On Tuesday, July 4, 1882, subscriptions having been made covering the total amount of the church debt of \$8000, the event was commemorated by a jubilee in Library Hall.

The Baptist Church started about a year later than the Methodist. The first meeting was held at the house of Levi Brown, on Charlestown Street, April 5, 1871, at which it was ascertained that there were some forty residents of Everett who were members of Baptist Churches, besides others of Baptist sentiments. On Sunday, April 9, 1871, the first public religious service was held, consisting of a prayer-meeting in Everett Hall, followed by the organization of a Sunday-school. Deacon Levi Pierce was moderator, and Mr. J. H. Parker, of Malden, was the first superintendent, and S. H. Kimball the first treasurer.

On June 8, 1871, a meeting was held at Levi Brown's house for the purpose of organizing a church, and a nucleus was there formed. The church was formally

constituted July 3, 1871, with thirty-two charter members, by a council of which Rev. G. W. Gardner, D.D., was moderator. The sermon was preached by Rev. S. W. Foljambe, of Malden. W. O. Dodge was elected first clerk; Dr. Levi Pierce, treasurer, who resigned and was succeeded by G. L. Packard. P. F. Packard and Levi Pierce were the first deacons. For several months Mr. J. H. Arthur, a student in the Newton Theological Seminary, afterwards a missionary in Japan and since deceased, labored with great success, and gathered in a large number of members. Rev. W. F. Stubbett was called to the pastorate October 10, 1871, but declined. On January 22, 1872, a unanimous call was extended to Rev. William B. Smith, who accepted the call and commenced his labors on the first Sunday in February, 1872. He was installed May 9, 1872. This pastorate was of short duration, as dissensions soon sprang up in the church. Mr. Smith resigned, and his resignation was accepted April 11, 1873, to take effect May 1st.

On the 24th of September, 1873, the church was formally organized as a corporation, and, on the 15th of October following, purchased the lot of land on which its church edifice stands, from David N. Badger. The corner-stone of the church was laid June 24, 1874, by Rev. S. W. Foljambe. During a considerable portion of the period since Mr. Smith's resignation the pulpit had been supplied by Rev. J. R. Stubbett, a student in Newton Seminary. On the 22d day of September the church was formally dedicated, and Rev. Frank B. Sleeper, who had been called to the pastorate July 8, 1874, was installed. The first Sunday service in the new church was held September 27, 1874. There were seventy-three members at the date of the dedication, and eighty-three in the Sunday-school. The land, building and furnishing cost about \$13,000. The building has a seating capacity of about 280 in the main part, and seventy-five in the vestry. Mr. Sleeper continued pastor until November 25, 1877, when he resigned and accepted a call to the First Baptist Church in Gardner. For some time after this the church was without a pastor, but depended upon supplies for preaching, among whom Rev. L. G. Barrett deserves mention as one whose labors were especially fruitful. September 23, 1878, a call was extended to Rev. W. F. Stubbett, D.D., of Bloomfield, N. J., who had been preaching for the church since May. He consented to remain for a time, but closed his labors January 25, 1879, after a short but most useful pastorate, in which he did much to restore and encourage the church. Rev. L. L. Potter, then a student, was employed for six months, April 7, 1879. The church then numbered 135. Mr. Potter was called as a permanent pastor, and was formally installed October 9, 1879. His pastorate lasted but about a year, as he resigned September 5, 1880, and closed his labors September 30th. The pulpit was then supplied for

some time by Rev. A. N. Dary, who was called to the pastorate February 25th, while still a student at Newton, and ordained August 4, 1881. He resigned September 23, 1883, and closed his labors October 1st. Rev. William O. Ayer, was called January 1, 1884, and began his labors with the church February 10th, and was installed February 26, 1884. During his pastorate, stimulated by the example of the Methodists the church resolved to pay off its debt, which amounted to upwards of \$5200. The day chosen to invite pledges for this purpose was Easter Sunday, April 13, 1884, when, after a sermon appropriate to the occasion, pledges were invited, and in less than one hour the whole amount was guaranteed, the final payment being made in March, 1887. During the year 1886 extensive repairs were made on the church. The Sunday-school has had, besides Mr. John H. Parker, of Malden, four superintendents, viz.: William O. Dodge, N. J. Mead, R. A. Edwards and Amos E. Hall, the present incumbent. There are about 500 volumes in the Sunday-school library. Rev. W. O. Ayer resigned June 20th, and closed his labors June 29, 1890, after a useful and successful pastorate of nearly six and one-half years, during which the membership of the church was increased from 174 to 271, a net gain of 97. The number of persons baptized was eighty five.

The educational wants of the town received early attention. The upper story of the Ferry Street School-house was finished, and a grammar school opened there in the autumn of 1870, which three years later was reduced to a sub-grammar grade. A movement was started in 1871 to erect a new and commodious school-house in place of the old Centre building, which had been standing nearly a quarter of a century, but this was defeated, and instead, the Centre School-house was remodeled and refurnished with improved seats and desks, which had previously been of an antiquated design.

In the autumn of 1870, although the population of the town had not reached the number essential to make a High School obligatory, a beginning was made at the Centre School-house with a class of sixteen, of whom five graduated in 1874—the first graduating class. The school has been from the commencement under the charge of Mr. R. A. Rideout, who had been from 1866 a teacher in the Centre Grammar School, first of South Malden and afterwards of Everett. The whole number of different pupils connected with the High School since its establishment has been 379, of whom sixty-nine have taken a business course of two years. The number of graduates has been 122, several of whom have served the town with credit as teachers in the public schools, while others have filled other positions of usefulness. In the thirteen years from the establishment of the Malden High School in 1857 to 1870, inclusive, only fourteen pupils from South Malden graduated from that institution. The Everett High School was kept

first in the old Centre School-house, from which it was removed to the third floor of the Masonic building in 1872, and from that to the Locust Street School-house in 1875, where it remained until 1881, when it had dwindled to only fifteen pupils. In 1882 it was removed to its present quarters, where it has shown a marked increase in numbers until within the past year. An assistant was first employed in 1872; a second assistant was employed in 1886.

Among our educational institutions should be mentioned the Home School, established April 15, 1874, and at first kept in the Cuneo Building near Everett Square. In 1875 it was removed to a building erected for its use next southwest of the Congregational Church, where it remained until 1889. It was at first under the charge of Mrs. A. P. Potter and Miss O. J. Pierce, and after the retirement of Miss Pierce was continued under the management of the former. In June, 1880, it awarded diplomas to its first graduates. In September of the same year a college preparatory department was added. Subsequently a branch of the school was opened at Natick in 1885 and has been very successful.

Owing to the rapid growth of the town a more retired location was found to be desirable, and in 1888 a tract of land on the corner of Sumner and Argyle Streets, containing 40,000 square feet, was purchased, and in the following year a large and commodious edifice was erected, which was opened for the school in September, 1889. The architect was Mr. Geo. F. Wallis, the builder Mr. G. H. Peters, of Everett. The elevated location of the building commands a fine view of the surrounding country, and the school has been equipped with all the appliances for doing the best work. The course of study embraces four years.

Although the introduction of water by the town of Malden was one of the prominent grievances urged as a ground of separation, Everett had not been incorporated more than a year before the necessity of a water supply became apparent, and on the 29th of March, 1871, a committee of five was chosen, consisting of Otis Merriam, Anthony Waterman, Lewis P. True, W. H. Lounsbury and George S. Marshall, to see what arrangements could be made for a supply of pure water from the city of Charlestown, and also to meet a committee of the Legislature for the purpose of securing the necessary legal authority.

On June 29, 1871, the act of the Legislature of April 19, 1871, authorizing the introduction of water, was accepted, and a committee of five, consisting of Alonzo H. Evans, W. H. Lounsbury, Otis Merriam, Anthony Waterman and Lewis P. True, was appointed to procure estimates from different sources, and to report on the best plan. On the 5th of September this committee reported, their report was accepted, and the town voted by a large majority to introduce water, and to authorize the treasurer to issue bonds of the town, to an amount not exceeding \$50,000.00, for a term of twenty years, at a rate of six per cent. inter-

est per annum, to defray the expense of the introduction of water. It was estimated that this sum would be sufficient to lay nine and one-fourth miles of pipe. Otis Merriam, H. W. Van Voorhis, Alonzo H. Evans, W. H. Lounsbury and Charles Woodberry were chosen water commissioners, with full powers for making all contracts and laying all pipes. This committee entered into a contract with the city of Charlestown, October 5, 1871, by virtue of which the city of Charlestown was to furnish water, the town of Everett to lay and maintain the necessary pipes and structures for the distribution of the water, the city of Charlestown receiving eighty-five per cent. of the water rates, Everett receiving only fifteen per cent.

The water commissioners concluded a contract with George H. Norman, of Newport, Rhode Island, October 11, 1871, for laying 40,000 or more feet of pipe, with seventy-five hydrants and gates for same, for the sum of \$46,640.00, of which 5000 feet were to be ten-inch pipe, 4000 feet eight-inch, 18,000 feet six-inch, and 13,000 feet four-inch pipe. The work of laying the pipes was not commenced till early in October, but before it could be completed cold weather set in, and it was necessary to suspend operations until the following spring. About 23,000 feet of pipe had been laid. The original estimate of \$50,000.00 having proved insufficient, the town was authorized by the Legislature to expend a further sum of \$50,000.00, to be raised by taxation or borrowing. The town, on April 22, 1872, accepted this act, and authorized the further issue of bonds, like those previously issued, to the amount of \$50,000.00. The work was resumed as soon as the spring opened and carried forward without interruption, until about thirteen miles, or three and three-fourths miles more than the original estimate, had been constructed. Water was introduced May 1, 1872. The cost of the works to February 28, 1873, was about \$84,000.00.

The burdensome contract with the city of Charlestown continued in force until June 1, 1886, when, through the efforts of a committee, consisting of Thomas Leavitt, F. P. Bennett, Geo. Taylor, I. T. Winchester, N. J. Mead, G. F. Foster and Daniel Russell, a modification of this contract was secured, by which Everett has received fifty per cent. of the water rates since July 1, 1886.

The water-works were further improved in 1888 by the construction of a plant for providing a high-water service, which was put in successful operation in July, 1888, the entire cost being less than \$10,000.00, this including the purchase of a lot of land, the erection of a pumping-station on Irving Street, with the necessary machinery, and also the purchase of land and the erection of a reservoir on Mt. Washington.

The total expenditures on account of the Water Department to December 31, 1889, have been \$159,255.49, besides \$2853.77 expended for hydrants, about \$10,000.00 for the high-water service, and \$103,020.00 for interest on the water debt to Dec. 31, 1889. Of this

amount, \$126,873.37 have been provided for by taxation. The water rates received from the incorporation of the town to December 31, 1889, were \$46,552.72, of which about \$30,000.00 have been received since the modification of the water contract in 1886. The receipts in 1889 were \$10,003.39, and in 1890 about \$11,000.00, the receipts being now adequate to pay the cost of maintenance of the water-works and the interest on the water debt, besides providing a sinking fund. It is probable that it will be unnecessary to impose any further burden on the tax-payers on account of the water-works, and that taxation may thus be materially reduced. The gross amount of the water debt December 31, 1889, was \$100,000.00. The total amount of pipe laid to December 31, 1889, was 106,319 feet, or about twenty miles, of which 12,444 feet were two-inch pipe, 941 feet of three-inch, 46,704 feet of four-inch, 47,621 feet of six-inch, 2681 feet of eight-inch, and 7128 feet of ten-inch pipe.

The Everett Lodge of Odd Fellows was instituted March 18, 1875, with fifteen charter members, as follows: A. F. Ferguson, C. O. Sanborn, Carlos E. Bolton, W. W. Bullock, Nathan B. Raymond, J. O. W. Dearing, William Tyzzer, Jr., Josiah A. Kingman, William H. Pierce, George A. Colby, Joseph W. Bartlett, A. B. Robinson, David Smith, George W. Paine and S. C. Currier. The first meeting was held in the Masonic Hall, through the kindness of Palestine Lodge, and subsequent meetings were held in Everett small hall until July 18, 1875, when the lodge moved into a room fitted up for that purpose on the third floor of the Masonic Building, where they remained until April, 1888, when, having purchased the present fine brick Odd Fellows' Building, formerly known as the Library Building, and having fitted up the third floor for a lodge-room, they moved into their present quarters, which were dedicated with appropriate exercises May 2, 1888. The membership of the lodge in the Spring of 1890 was 180, as compared with 69 in the year 1879. A. F. Ferguson was Noble Grand for thirteen years, being succeeded by Walter C. Day, who at present fills that position.

The rapid increase of population made it evident that new school accommodations would soon be required. The upper story of the Thorndike School-house was finished in 1873 at a cost of about \$1000, and a new school was opened there in the fall of 1873. In the spring of 1873 plans were brought forward for the erection of two new school-houses, one at Mt. Washington and the other at Locust Street. The Mt. Washington School-house project was defeated. Favorable action was at first secured upon the Locust Street School-house, but at a subsequent meeting reconsideration prevailed, and the matter went over until the spring of 1874, when an appropriation of \$8000 was made, to which \$800 was later added from the school appropriation.

The cost of the land, 15,020 square feet was, \$2388.50, and the building erected, by Mead, Mason & Co.,

cost \$5253, making a total cost of land, building, furnaces, \$8826, without finishing the upper story. Two schools were opened in the building in November, 1874, and in 1875 the upper story was finished at a cost of about \$1350, bringing the total cost to about \$10,786. The building was further enlarged in 1888, by the addition of four school-rooms, besides additional hall room, the old building being moved back. The architects were Messrs. Brigham and Spofford, and the contractor Mr. G. M. Coan, and the appropriation for the same was \$7000. An additional lot of land in the rear was purchased for \$1900 in 1889, and the total cost of the building as it stands has been upwards of \$20,500. Largely through the efforts of Mr. S. C. Currier, a town clock was procured and placed in the tower of this school-house in 1889, and the event was celebrated by a gathering at the school-house, at which addresses were made by various citizens.

The building of the Mt. Washington School-house was delayed until 1877, when an appropriation of \$5000 was made at a town-meeting held March 8, 1877. The original lot of land, consisting of 12,779 square feet, was purchased of the Boston Five Cents Saving Bank for \$1277.90 (ten cents per foot). The plan was drawn by G. F. Wallis, and the building erected by J. H. Kibby & Son, of Chelsea, costing, with the upper story unfinished, about \$6000. Schools were opened in the lower story in the spring of 1878. The upper story was finished in 1880, and the building was reconstructed and enlarged, as it now is, in 1887, the architects being Brigham & Spofford, and the contractor, J. A. Corkum. The lot has also been enlarged by the purchase of 19,000 feet of additional land, and the whole cost of building and land as they now stand has been upwards of \$16,500.

During the period of hard times, from 1875 to 1881, the educational interests of the town suffered severely. The population of the centre of the town outgrew the accommodations furnished in the old Centre School-house, and in 1876 Badger's Hall, since remodeled into dwelling-houses, was engaged, and a primary school opened in the same. This sufficed for two years, when the necessity of further enlargement compelled the hiring of a room over the present store of I. T. Winchester, where a school, first of the intermediate, but afterwards of the primary grade, was located. At a town-meeting held July 15, 1878, a motion to appoint a committee to consider the matter of purchasing a lot of land and erecting another Centre School-house there, was defeated by a vote of 143 to 29. On May 27, 1879, another similar effort was defeated by a vote of 93 to 60.

In the spring of 1881 a committee of nine, appointed in November, 1880, to consider the subject of school accommodations in concurrence with the School Committee, reported in favor of additional accommodations, both for the Centre and the Mystic Village Districts. An appropriation of \$6000 was

made for the latter, with little opposition in addition to the proceeds realized, from the sale of the old Thorndike Street School-house, making an available fund of \$6600, with which the present Thorndike Street School-house was erected in the same year, three schools being opened in the building in the following autumn. The architect of the building was Tristram Griffin, and the contractor, Joel Snow.

The proposal for an additional Centre School-house encountered a bitter opposition, extending until late in the night at several successive town-meetings; but, notwithstanding all the opposition, an appropriation of \$12,000.00 was secured, and a building committee selected. The lot of land on Church Street, containing 19,088 feet, was purchased of H. G. Turner, for \$2278.40, on the 10th of May; the filling and grading of the lot cost \$470.70. Mr. Tristram Griffin was the architect. Ground was broken for the building January 21, 1881; the foundation was constructed by Mr. W. M. Dodge for \$940.00. The contract for the building above the foundation was awarded to Richardson & Young, of Boston. The cost of the building, aside from the furnishings and blackboards, was \$7384.70. The furnaces and other appliances brought the total up to the appropriation of \$12,000. The building was dedicated on January 2, 1882, with appropriate ceremonies, in which the Hon. John D. Long, then Governor, and Hon. J. W. Dickinson, secretary of the Board of Education, participated. It was not the building in itself which elicited this marked demonstration, but the fact that it marked a turning-point in the educational history of Everett, which has been steadily onward from that day to the present time. The building was first occupied for school purposes Monday, January 9, 1882. The lot was further enlarged later in the year, by the purchase of additional land between the original lot and Liberty Street, at a cost of \$1000.00, giving a total area of 26,495 square feet. In 1886 the building was enlarged by adding two rooms for the lower grades, and one room of double size for the High School, with suitable recitation rooms. The enlargement was designed by Mr. Tristram Griffin, the former architect, and the additions were constructed by the former contractors, Richardson & Young, of Boston, the foundation being the work of Patrick Linehan, of Malden. The total cost of the addition was \$7000.00. In it are the High School, and six schools of the primary and intermediate grades.

In 1885 the Glendale School-house, after being in service for thirty-one years, could no longer accommodate the increased school population of that district, and at a town-meeting, held March 10, 1885, an appropriation of \$6500, with the proceeds realized from the sale of the old building, was made for the erection of a four-room school-house on the old site. The architect employed by the building committee was John Lyman Faxon, and the contractors were Mead, Mason & Company. The building

contains four rooms, and the total cost of the edifice, with eleven thousand five hundred and seven feet of additional land purchased in the rear and heating apparatus, was about \$8300, of which the contractors received \$6625. Four schools, much better graded than before, were opened in the new building in November, 1885.

Within two years after the enlargement of the Church Street School-house in 1886, so rapid was the increase of population that the Centre schools began to be again over-crowded, and complaints were made as to the sanitary condition of the old Centre School-house, which at the incorporation of the town was far the best of our school-houses. A committee of nine was appointed to consider the subject, and this committee reported unanimously in favor of selling, or otherwise disposing of, the old Centre School-house, and of appropriating the sum of \$25,000 for the purpose of erecting a brick school-house in the central part of the town sufficient to contain eight rooms, each 28 by 36 feet. The appropriation recommended was unanimously passed, and the matter of erecting the building was committed to the same committee, and this committee purchased twenty-two thousand square feet of land at the junction of Broadway and Broadway Court, at eighteen cents per square foot, making the total cost of the land \$3960. The committee employed Wesley L. Minor as architect. The foundations were constructed by Patrick Linehan, of Malden, at an expense of \$988.25, and the building contract, above the foundations, was awarded to Mead, Mason & Company, at the price of \$18,722, to which extras amounting to upwards of \$2000 must be added. Various other items have brought the cost to date up to \$27,941.86, and there is still an unsettled claim on account of the contractors. On the 23d of September, 1889, three schools were opened in the Broadway School-house, and on the 14th of October the last of the remaining schools in the old Centre School-house was removed to the new building. The old building was thus finally abandoned, after a continuous service for school purposes by the towns of Malden and Everett of forty-two years.

The erection of the Broadway School-house completed the entire reconstruction of the school accommodations of the town of Everett. There remained no longer a solitary school-house inherited from the town of Malden. Everett has now six large, commodious and fairly well ventilated school-houses containing thirty-nine school-rooms, with a seating capacity of two thousand and twenty-nine, and two recitation rooms—all costing \$103,275. The town employs thirty-eight teachers. Within the past two years these school-houses have been provided with electric one-session signals.

The subject of an evening school had been agitated for some years, but never took shape until 1889. On the 19th day of March, pursuant to the recommendation of the School Committee, an appropriation of

\$500 was made, and on the 15th day of October following, after the legal notices had been given, an evening school was opened in the Broadway School-house, the sessions being maintained Monday, Tuesday, Wednesday and Thursday evenings from 7.30 to 9.30. The number of different scholars attending during the first term was 115, the largest number at any one session was 81, and the average number present for the whole term, ending Friday, Dec. 20th, was 29. The oldest scholar attending was 41 years of age, the youngest 13, and the average age was 15 2-15 years. This institution affords a means of education to any who have previously enjoyed very limited opportunities in this direction, and bids fair to achieve permanent usefulness.

For five years after its incorporation, Everett was an integral part of the representative district, consisting of Malden, Somerville and Everett, represented in the Legislature by three members. The first effort to secure a representation from Everett was in the autumn of 1872, when Alonzo H. Evans received the nomination at a Republican caucus and was elected. As Everett was a small part of the district, it did not secure representation again until 1875, when Mr. Evans was again nominated and elected, having thus served in the Legislatures of 1873 and 1876, both years on the Committee on Banks and Banking.

In 1876 the re-arrangement of the districts associated Everett with Malden as a district having two representatives, of which, by agreement with Malden, Everett was to have six representatives in ten years. The first representative in the new district was George S. Marshall, who was nominated after an animated contest in the largest caucus ever held in Everett up to that time, by a vote of 150 to 140 for Robert M. Barnard, and was elected in November, 1877, serving in the Legislature of 1878 on the Committee on Banks and Banking. He was re-elected in 1879, serving in the Legislature of 1880 on the Committee on Education.

William Johnson was elected as his successor in 1880, serving in the Legislature in 1881 on the Committee on Woman's Suffrage. He was succeeded in 1882 by George E. Smith, Esq., who was elected, after a spirited contest at the polls, over our late esteemed fellow-citizen, John S. Nichols. Mr. Smith was re-elected in 1883, thus serving in the Legislatures of 1883 and 1884, on the Committee on Education in 1883, in 1884 on the Committee on Taxation; also as House chairman of the Committee on Roads and Bridges.

He was succeeded in 1885 by Dudley P. Bailey, who was the last representative from Everett in the old district. In 1886 Everett became a district by itself, entitled to one representative, and Mr. Bailey was re-elected as the first representative in the new district, serving in the Legislatures of 1886 and '87 as House chairman of the Committee on Taxation in both years, and on the Committee on Probate and In-

solveny in 1887. He was succeeded by Joseph H. Cannell, who was elected in 1887, and re-elected in 1888, serving in the Legislatures of 1888 and 1889 on the Committee on Street Railways. In the caucus of 1889 the candidates were Adams B. Cook, Thomas Leavitt and John S. Cate, the latter being nominated and elected, serving in the Legislature of 1890 on the Committee on Street Railways.

All of the foregoing representatives elected have been Republicans. The Democratic nominees from Everett who have contested the elections have been as follows: 1871, Joseph E. Nichols; 1872, Columbus Corey; 1873, E. A. Alger, Jr., and C. Corey; 1874, C. Corey; 1875, J. E. Nichols; 1876, J. E. Nichols; 1877, Daniel Emmons; 1878, Daniel Emmons, (Democratic) and Alfred Tufts (Greenback); 1879, Wear T. Melvin, (Butler Dem.) and George F. Foster (Reg. Dem.); 1880, Charles F. Atwood; 1881, Charles F. Atwood; 1882, John S. Nichols, Sr.; 1883, Charles F. Atwood; 1885, Otis W. Greene; 1886, Woodbury A. Ham; 1887, Charles C. Nichols; 1888, William Bassett.¹

Everett has never been represented in the Senate until two years ago. In 1874, Alonzo H. Evans, the first representative, was nominated, but in the great political avalanche of that year he was defeated.

From this time, owing to local jealousies, no candidate from Everett succeeded in securing the nomination of the Senatorial District Convention until 1888, when Mr. Evans was nominated and elected, being re-elected in the autumn of 1889, and serving in the Senate in 1889 and 1890. In both years he was chairman of the Senate Committee on Banks and Banking, and served also on the Committee on Taxation.

It would be interesting to write our political history more in detail, but it would be a very delicate subject to treat, and it is perhaps better that many of the local contests of the past should not go into history.

As a part of our local municipal history the following names of the different citizens who have filled the more important town offices since the incorporation of the town are presented:

Selection: W. H. Lounsbury, 1870-72; H. W. Van Voorhis, 1870-72; George W. Pierce, 1870-71; E. B. Loring, 1870-75; P. Richmond Pratt, 1870-71; Joseph E. Nichols, 1871-73; Columbus Corey, 1871-76; Clarke Thompson, 1872-76; Lewis P. True, 1872-74, 1886-87; Samuel J. Cox, 1873-75, 1877-80; Philip Ham, 1874-76, 1880-83; Charles F. Atwood, 1876-79; Adams B. Cook, 1876-79, 1880-81; Woodbury A. Ham, 1879-80, 1881-83; Gullian H. Van Voorhis, 1879-80, 1887-90; Nathaniel J. Mead, 1880-81; Isaac T. Winchester, 1881-83, 1884-86; Geo. F. Foster, 1883-84; Fred. Johnson, 1883-84; Harden Palmer, 1883-86; Nathaniel B. Plummer, 1884-86; Frank P. Bennett, 1886-87; Francis E. Dyer, 1886-90; John S. Cate, 1887-89; Charles H. Spencer, 1889-90.

Clerk: Joseph H. Cannell, 1870-90.

Treasurer: Daniel Emmons, 1870 to Jan. 1, 1880; Wm. Johnson, 1880-86; Joseph E. Nichols, 1886-90; Nathan Nichols, 1890. Mr. Johnson died in office in 1886, his fellow-citizens testifying their regard for him

¹ In 1889 there was no Democratic candidate for representative, and the opposition concentrated on Thomas Leavitt, Independent Republican.

by re-electing him while on his dying bed. Appropriate resolutions were passed in honor of him in town-meeting, April 27, 1886.

Assessors: Wm. Johnson, 1870-80; Jas. G. Foster, 1870-74; Otis Merriam, 1870-73; Robert M. Barnard, 1872-75; Joseph E. Nichols, 1876-78, 1880-87; Henry W. Van Voorhis, 1878-78, 1880-86; Columbus Corey, 1877-87, 1890; Francis E. Dyer, 1878-80; Albert W. Lewis, 1886-90; Amos Roberts, 1887-89; Geo. G. Ladd, 1887-90; Daniel O. Dearborn, 1880-90.

School Committee: Jas. G. Foster, 1870-71; H. M. Currier, 1870-73; Geo. S. Marshall, 1870-73, 1876-79; Chas. F. Atwood, 1870-76; Dr. J. F. Wakefield, 1870-71, 1881-84; J. H. Whitman, 1870-73; G. C. Hickok, 1871-82, 1886-87; Andrew J. Bennett, 1872-74; E. A. Alger, Jr., 1873-74; Dudley P. Bailey, 1873-74, 1876-80, 1882-90; Albert W. Lewis, 1874-78, 1879-90; John H. Burt, 1874-76; Isaac E. Coburn, 1874-77; Francis E. Dyer, 1874-78; Harden Palmer, 1877-83; James B. Everett, 1878-81; Henry A. Tenny, 1878-81, 1883-85; Stephen F. Hoogs, 1880-85, 1886-89, 1890; Nathan Nichols, 1886-90; John C. Spofford, 1886-90; Geo. M. Buttrick, 1887-90; Roscoe E. Brown, 1889-90; Geo. N. P. Mead, 1889-90; Mary O. Bullfinch, 1889-90; Sarah J. Clough, 1889-90; Darius Hadley, 1890.

Auditors: Columbus Corey, 1870-71; J. H. Cannell, 1870-76; Thos. Leavitt, 1871-74, 1875-76; George P. Foster, 1872-73, 1874-75, 1878-79; A. F. Ferguson, 1874-75, 1876-80; S. A. Stimson, 1876-77, 1888-89; H. A. Tenny, 1877-79; Charles E. Jennings, 1879-83; Frank P. Bennett, 1879-81; Geo. H. Burr, 1881-86, 1889-90; Henry K. Veazie, 1883-90; Chas. C. Nichols, 1886-88; Henry E. Taylor, 1890.

The first Water Committee consisted of five persons, to be elected annually, pursuant to chapter 205, of the acts of 1871. The persons chosen on this committee were Charles Woodberry, Wm. H. Lounsbury, H. W. Van Voorhis, Otis Merriam, A. H. Evans, and they served for two years, when they were succeeded by the Water Board elected pursuant to chapters of the acts of 1873, who have been as follows: W. H. Lounsbury, 1873-76; Irving A. Evans, 1873-74; Geo. F. Foster, 1873-74; Thos. Leavitt, 1874-80, 1882-90; Chas. D. Stearns, 1874-77; Chas. W. Merrill, 1876-78; Stephen A. Stimson, 1877-81; Nathan Nichols, 1879-82; Nathan B. Smith, 1880-82; Geo. Taylor, 1882-85; Daniel Russell, Jr., 1882-86, 1890; Robert H. Jenkins, 1885-90; Isaac T. Winchester, 1886-90.

A sinking fund was established in 1876. The following citizens have served as sinking fund commissioners:

Amos Roberts, 1876-89; Josiah A. Kingman, 1876-89; Chas. Woodberry, 1876-77; Joseph H. Cannell, 1876-90; Jas. P. Stewart, 1889-90; Jas. E. Larkin, 1889-90.

The selectmen acted as overseers of the poor for the years 1870-80. The overseers of the poor since that time have been as follows:

Robert B. Rogers, Sr., 1880-82; Adams B. Cook, 1880-85, 1888-90; Stephen C. Currier, 1880-81, 1882-83; N. F. Shippee, 1881-84; Samuel P. Cannell, 1883-90; Geo. S. Marshall, 1884-90; D. P. Murphy, 1886-88.

The selectmen also acted as Board of Health during the ten years 1870-80. The members of the board since that time have been as follows:

Geo. F. Foster, 1880-81; Adams B. Cook, 1880-81; Alfred Tufts, 1880-81; Francis E. Dyer, 1881-82; Isaac T. Winchester, 1881-84; Geo. S. Marshall, 1880-81; Wm. G. Coleworthly, 1880-82; Edward R. Thorndike, 1880-81; Rev. R. P. Bush, 1881-90; W. G. Beaver, 1881-83; Geo. H. Burr, 1888-90; Geo. E. Smith, 1882-90; Albert N. Dary, 1883-84; Gilman C. Hickok, 1884-90; Martin J. Cahill, 1884-89.

The selectmen have acted as surveyors of highway for the years 1870-72, 1874-75, 1879-80, 1885-87. The following gentlemen have been elected as surveyors of highways:

Daniel Eames, 1872-74; Geo. W. Paine, 1876-77; Benj. F. Nichols, 1880-85, 1887-89.

The Highway Department has been managed by the following gentlemen as road commissioners for the terms named:

Louis P. True, Caleb Richardson and Geo. W. Paine, 1875-76; Robert M. Barnard, 1877-78, 1889-90; Samuel J. Sewall, 1877-79; Geo. W. Pierce, 1877-78; Leonard Emerton, Sr., 1878-79; Benj. F. Nichols, 1878-79; Solomon Shute, 1889-90; Thos. Leavitt, 1889-90; Amos Stone, 1890.

Until the year 1881 the financial year of the town ended on the last day of February and the town-meetings were held on the fourth Tuesday in March. By an amendment of the by-laws made in 1881 the financial year was made to correspond with the calendar year, the accounts being made up for ten months ending December 31, 1881. In 1882 and subsequent years the annual town-meeting has been held on the first Tuesday in March. The by-laws were further amended April 28, 1887, by adopting certain building regulations, and these, not having been found sufficiently stringent, were amended and strengthened in December, 1889, and with these and certain other amendments the by-laws of 1881 constitute the regulations governing town affairs.

The expenditures of the town of Everett for the first two decades of its history, 1870-89 inclusive, have been as follows:

	1870-80.	1880-89.	Total.
School, current expenses . . .	\$110,979.66	\$174,983.35	\$285,963.01

¹ Unsettled claims in course of liquidation to be added.

² Included in miscellaneous until 1877. No specific appropriation.

Of these expenditures \$1,205,122.38 were raised by taxation—\$463,294.21 in the years 1870-80 and \$741,828.17 in the ten years 1880-89 inclusive. Water bonds were issued to the amount of \$100,000, and \$77,000 borrowed for other town purposes, besides the portion of the Malden debt assumed and loans paid off, and there have been received from various sources other than taxation and loans (chiefly the bank, corporation and dog taxes, sale of town property and water rates), \$214,164.96, making the total taxation, loans (net) and other receipts, \$1,596,287.34. The total principal of the water debt, January 1, 1890, was \$100,000, and of the town debt, \$117,500, of which \$88,500 were inherited from Malden. Against this was held a sinking fund of \$69,675.21, of which \$32,725 has been derived from taxation, \$22,359.55 from interest on investments, and the balance from various sources.

Down to 1878 the Fire Department had continued very much in the condition in which it was in 1847, except that in 1875 a hook-and-ladder company was formed, apparatus purchased, and a house erected for the same. At a town-meeting held May 9, 1878, the town voted to purchase a steam fire-engine and equipments, an appropriation of \$3400 being made. After the new steamer, the "Joseph Swan," had been purchased, the Fire Department was reorganized and made more efficient. On March 19, 1885, an appropriation of \$1600 was made to provide an electric fire alarm, and the remodeling of the old Centre School-house for an engine-house, at a cost of \$6700, will afford facilities which promise to increase still more the efficiency of the department.

At the time the town was incorporated the street-car accommodations were very poor, the rails being mostly of wood, surmounted by iron straps. The running time was very slow, and the fares high. On the Eastern Railroad and the Saugus Branch were located two unsightly structures, built in 1854 for stations, utterly inadequate to the wants of the public. The fares were eight cents for single trip and six and one-half cents for commutation tickets. This was reduced in May, 1879, to six cents for single fare, and five cents for commutation tickets. In the fall of 1879, after a united effort, a new station was secured between Broadway and Main Street, the lot being purchased by private subscription and the town laying out Railroad Street in the rear. In 1880 a station was established at East Everett, the expense being mainly defrayed by private subscription, and trains began stopping there on Monday, December 20, 1880. In 1881 a freight track was located at the foot of Carter Street on the Saugus Branch. In 1882 a new station was built on the Saugus Branch, about one thousand feet north from the site of the old station, at the foot of Waters Street. The opening of the new station was celebrated by a banquet and entertainment, at which about 250 persons were present. Though the removal of the station aroused

much bitter feeling at the time among those who were discommoded, it has proved beneficial in the end, as it resulted in establishing still another station on the Saugus Branch at West Street, which was opened about the 1st of March, 1890, although trains had stopped there for passengers since June, 1888.

The horse-car accommodations continued to be very unsatisfactory until within the last three years, the running time being frequently changed, besides being very slow, and the management unprogressive, not to say stupid. There was, however, some improvement, as the track had, in the course of years, been relaid with iron rails, and in some places paved, and fares somewhat reduced. The route to Everett Springs had been opened Sept. 14, 1882, as a branch line.

The rails were laid to Elm Street in June, 1884, and cars commenced running hourly trips on this route as an independent line July 1, 1884. Half-hourly trips were inaugurated May 2, 1885. The extension to Woodlawn Cemetery was commenced July 24, 1884, and cars began running hourly and half-hourly trips most of the day before August 10, 1884. A larger number of half-hourly trips was instituted May 8, 1886.

One of the most important events affecting our horse-car accommodations was the advent of the Lynn & Boston Railroad, which secured a conditional location to Everett Square in April, 1886, and an unconditional location June 9, 1886. Cars commenced running over this line August 11, 1886, and have made hourly trips from that date to the present time.

The Middlesex Railroad at last began to awake to the fact of impending competition, and when, later in the year, through consolidation with the Highland Railroad Company, more progressive elements were infused into the management, the outlook for better accommodations visibly brightened. During the summer and fall of 1887 the work of improvement commenced in earnest. On July 4, 1887, the fares to Boston were reduced from six to five cents. The horse-car tracks which had previously been located on School Street, were relocated on Broadway. From the Eastern Railroad to Everett Square a double-track paved with granite blocks was laid, and a single-track, also paved, extended over the hill to Ferry Street, and thence through Ferry Street to Malden Centre. Cars commenced running over Belmont Hill between Malden and Boston December 19, 1887. During the same year a new route was located through Bucknam Street with the track in the middle of the street and paved. Cars commenced running over this route December 8, 1887, the location on Chelsea Street from Bucknam to Main Street being discontinued. In 1888 a paved double-track was laid below the Eastern Railroad to Sullivan Square, resulting in further reduction of running time, and greater regularity and frequency of trips.

During the past year the track has been moved into the centre of Main Street and paved, resulting in another great improvement, and in June, 1890, a location was granted for a double-track on Ferry Street between Elm and Chelsea Streets, and also on Chelsea Street from Ferry Street to Everett Square. It is expected that a second track will soon be laid through Main Street, and that the advent of electric-cars may still further shorten the running time between Everett and Boston.

During 1888 also the horse-car tracks were laid in Ferry Street from Broadway to Elm Street, and the East Middlesex Railroad Company commenced running cars by that route to Chelsea and the Beaches.

At the time the town was incorporated, and, indeed, for many years afterwards, its sidewalks were in very poor condition, though gradually improving. Since 1886 the improvement has been more rapid, the town having in that year adopted the practice of paying one-half the expense of setting edge-stones and laying brick or concrete sidewalks in front of the estates of those who will pay one-half of this expense. The widening of Main, Chelsea and Ferry Streets, in 1874 and 1875, involving an outlay of \$43,218, was one of the principal public improvements in our highways. In 1882 and subsequent years, largely through the efforts of the Everett Town Improvement Association—a most useful society, which existed from 1882 to 1887—the streets of the town have been quite extensively adorned with shade-trees. In 1888 the system of lighting the streets with electricity was introduced.

The Everett Public Library was dedicated May 1, 1879, and was opened for the delivery of books May 10, 1879. It had been proposed as early as 1871, when the proceeds of a ball held November 21, 1871, were set aside as a contribution to a fund for that purpose. The movement first took definite shape at a meeting of citizens held in Everett Small Hall, June 21, 1878, when a board of directors was chosen and a committee appointed to solicit contributions of money and books. The library, when opened, was composed mainly of books thus contributed, numbering 1289 volumes. It was maintained as a private enterprise through the liberality of various public-spirited citizens until May 3, 1880, when it was turned over to and accepted by the town, and has since been maintained at the public expense. A reading-room was opened January 26, 1884, but discontinued within about a year, as not required by the public wants. The number of volumes in the library December 31, 1889, was 6181; the number of deliveries in 1889, 27,850, as compared with 10,940 in 1880. The total expenditures upon it to December 31, 1889, have been \$11,603.47, of which \$4145.89 have been expended for books and magazines. The town makes an annual appropriation for the library (\$1000 in 1890, besides the dog-tax, amounting to \$1279.08).

The first town-clock was a gift to the town by Mrs. Caroline M. Barnard. It is a large tower-clock weighing 900 pounds, was placed in the tower of the Congregational Church, August 15, 1883, and started August 25th. The expenses attending the necessary changes in the tower were met by subscription secured through the agency of a committee of the Everett Town Improvement Association. It was formally presented to and accepted by the town at a meeting held November 13, 1883, and suitable resolutions of thanks to the public-spirited donor adopted.

Up to the year 1876 the large Catholic population residing in town had enjoyed no local place of religious worship. In June of that year a Sunday-school was opened, and regular Sunday services shortly afterwards began to be held in Everett Hall, in which they continued to be held for a year and a half. On July 13, 1877, 12,160 square feet of land on the corner of Broadway and Mansfield Place were purchased for \$3040. The erection of the present church edifice was begun in 1877, the vestry being finished ready for occupancy about January 1, 1878, and the main auditorium some years later. The church is under the pastoral care of Rev. Joseph F. Mohan, rector, ordained in 1871, who was until lately assisted in his labors by Rev. James G. Gilday, as assistant rector.

It is estimated that about one-quarter of the population of Everett is connected with this church.

Grace Episcopal Church dates from June 10, 1886, when the first service was held in the rooms of the Young Men's Christian Association, conducted by Rev. J. S. Beers, Rev. G. W. Durrell and the choir of St. Thomas' Church of Somerville. On February 5, 1886, at a meeting of those interested in the establishment of an Episcopal Church, held in the same place, it was voted to continue the services, and a system of pledges was adopted. On February 15, 1886, the first election of officers took place and the society took definite shape. On March 12th the name of Grace Church was decided upon, and the committee reported that they had hired G. A. R. Hall for Sunday services.

The society was first conducted as a mission, and Rev. Francis Gilliat, the first missionary, assumed charge May 4, 1886. The society grew and prospered, and on January 21, 1887, it was voted to purchase the land on Chelsea, at the head of Corey Street, for church purposes. It was conveyed to them April 23, 1887, at the price of \$6500. On the 14th of December, 1887, Mr. Gilliat tendered his resignation, and Rev. J. P. Pierce, of Dorchester, supplied the pulpit until April 22, 1888, when Rev. Percy Barnes succeeded Mr. Gilliat as missionary. On June 8, 1888, the society voted to build a chapel on the land belonging to the parish. This was commenced July 16, 1888, Norman C. Clark, architect. The new chapel cost, with furnishings, about \$5000. The first service in it was held December 23, 1888. On December 2, 1888, Mr. Barnes resigned and Rev. J. P.

Pierce again took temporary charge. On April 22, 1889, the society voted to request the appointment of Rev. T. B. Martin, of Pine Meadow, as missionary in the church, who commenced his labors July 7th. After having operated for upwards of four years as a mission, the society was organized as a parish with a governing power of the rector, two wardens, clerk, treasurer and eight vestrymen, on the 10th of April, 1889.

The youngest of the religious societies of Everett is the Advent Church, which was organized March 28, 1889, with eight constituent members. The date of the first meeting for public worship was March 31, 1889; the officiating clergyman was Elder L. Boutelle. The church has not yet had a settled pastor. The number of members now belonging to the church is 21. It has raised for church expenses during the past financial year about \$400, and \$25 for benevolent purposes. A Sunday-school was organized May 12, 1889, at a meeting of which R. S. Sidelinger was moderator, with 12 members, since increased to 40. John H. Murphy has been its superintendent since organization. The first officers of the church were: Elder, John H. Murphy; Deacon, A. A. Anderson; Clerk, Remly S. Sidelinger; Treasurer, Charles H. Weeks. The Sunday-school library numbers 225 volumes.

The Everett Young Men's Christian Association, which has been a living force for good in town during the past five years, was organized September 15, 1884, although a society for special work among young men had existed previously for about five months. The first officers were Francis Batchelder, president; William F. Moore, secretary; Benjamin F. Noyes, treasurer; the first two having held similar positions in the provisional organization, and having continued in these positions by subsequent re-elections until September, 1889, when, with all the other members of the board, they declined a re-election. Captain Noyes died in November, 1884. His place was filled temporarily until the following May, when George H. Small was chosen for the office. In 1885 the Executive Committee was increased to five, and A. N. Smith was chosen vice-president, and held office until September, 1889. Mr. W. B. Marshall was the first assistant secretary, but declined a further election at the end of two years, and Mr. W. B. Price was chosen in his place, being elected the following year. Thus only one change was made in the board during four years. The harmonious and efficient action of this first Executive Committee contributed in no small degree to the success attained by the Association. The present officers, elected in September, 1890, are Rollins A. Edwards, president; F. C. Danforth, vice-president; W. B. Marshall, secretary; F. Batchelder, treasurer, F. J. Harding, assistant secretary and E. E. Randall, assistant treasurer.

The first room occupied by the Association was the

banquet-room in Odd Fellows' Building, then known as Library Building, which was opened with appropriate exercises in the hall above on the evening of November 24, 1884. Rev. Phillips Brooks, of Boston, was the principal speaker, being followed by Rev. W. O. Ayer, and the president and the secretary of the Association. Later a change was made to the front room in the same building, and the Association being obliged to vacate this, another change was made to Everett Small Hall as the only available place. During the spring and summer of 1887 the demand for a building grew more and more pronounced, stimulated by the inconvenient quarters in which the Association was then located, and in October of that year the organ of the Association, the *Y. M. C. A. Star*, published the plans and elevation of the proposed building. This seemed to crystallize the movement. A canvass was begun soon after, and in 1888 the present lot of land was purchased, the corner-stone of the building was laid July 21, 1888, and the present commodious and convenient building was erected after much persistent and self-sacrificing work, at a cost of \$17,630, Brigham and Spofford being the architects and G. M. Coan, contractor. The seating and furnishing of the hall and other parts of the building cost about \$2500 more. The ladies of the town supplied the piano used in the building, and also raised enough money to pay for furnishing the members' parlor. After the Woman's Auxiliary was formed, they furnished seats for the large hall, besides making a gift of \$500 for the building fund. The Boys' Branch paid for fitting up their room and social hall. The Yoke Fellows furnished the room in the tower, and the Heartsease Band, the reception, reading and amusement rooms. The grand piano in the large hall was a gift from the Say and Seal Club. Mr. Herbert Loud and other friends have presented pictures. The building was dedicated with appropriate ceremonies, November 12, 1888, Rev. Phillips Brooks again being principal speaker, while Rev. W. O. Ayer, with Messrs. Batchelder and Moor, officiated in the same capacities in which they did almost exactly four years previously. The religious work has always been kept in the foreground, and the strong Monday evening meeting, for men only, has really been the backbone of the Association. The gymnasium was opened in December, 1888, and at once attained a deserved popularity among the young men. Mr. Walter C. Day volunteered his services the first season and is now engaged on a salary. In April, 1888, the Boys' Branch was formed, the first officers being Ellie H. Dorety, president; George D. Marshall, vice-president; Charles W. Hapgood, secretary; and Fred. N. Small, treasurer. Master Dorety took a great interest in the work and made an excellent presiding officer. His untimely death in the summer following was a great loss to the Branch. The Woman's Auxiliary was formed on May 1, 1888, and the assistance rendered has been invaluable in upbuilding the Asso-

ciation. The first board of officers was, Mrs. A. P. Potter, president; Mrs. A. Campbell, Mrs. J. W. Moore, Mrs. J. W. Masury, Mrs. J. S. Cate, vice-presidents; Miss Grace L. Batchelder, secretary; and Miss Carrie L. Stimpson, treasurer.

This Association has entertained the district convention on two occasions, and the first Woman's Auxiliary convention ever held in the world took place in Everett.

From a very interesting and valuable article in our enterprising local paper, the *Everett Herald*, on October 29, 1887, the following summary, showing the religious status of Everett, was furnished:

Church.	Church Service.	Average Attendance.		
		Sunday-School.	Sunday Evening.	Friday Evening.
Congregational,	235	230	150	75
Universalist,	140	130		
Methodist,	175	150	150	50
Baptist,	180	154	110	65
St. Mary's Catholic,	900	161		
Grace Episcopal,		90	100	
Glendale Chapel,		50	65	
Courtland St. Chapel,		59	45	

The foregoing figures, if brought forward to date, would undoubtedly show a marked increase.

During the past year some highly interesting information in regard to the religious condition of our town has been obtained by means of a religious canvass, taken under the auspices of the various churches. It is, of course, not entirely complete, but gives a fairly good idea of the religious condition of the town. The whole number of calls made was 1968, including 7606 persons. The church preferences of these persons were as follows: Congregational, including the Mission at the Line, 1399; Methodist, 1132; Baptist, 1109; Universalist, 943; Episcopal, 585—309 individuals expressed no preference, but claimed to be Protestants, and there were 257 persons included as Lutherans, Swedenborgians, Presbyterians, Spiritualists, Adventists, etc., making 5824 reported as Protestants, with 1782 noted as Catholics. The total population at that time was estimated at 10,000. On the basis of these census reports, it was estimated that the total number of Protestants was 7260, Catholics, 2380. It was found that there were attending churches out of town: Congregationalists, 150; Methodists, 85; Baptists, 27; Universalists, 7; Episcopalians, 15. The average attendance in the Protestant Churches was stated to be 2235, leaving, after deducting children under five years of age, 4476 who did not regularly attend public worship. Many of those, however, undoubtedly attend more or less frequently, and it would certainly be safe to estimate the church-going population at upwards of fifty per cent. of the total population. The foregoing facts were presented by Rev. F. T. Pomeroy at a Sunday evening mass-meeting, held in the Y. M. C. A. Hall, January 5, 1890.

The steady growth of the population in Everett has made it apparent for some time that a system of sewerage had become necessary. The matter was brought

up at a town-meeting held March 13, 1888, at which a committee of fifteen was appointed to consider the matter and report at a future meeting. This committee, by its chairman, Amos Stone, presented its report at a town-meeting held March 5, 1889, when it was voted, 267 in favor to one opposed, that the system of sewerage recommended in the report of the committee be adopted, and that the treasurer be authorized to borrow from time to time, with the approval of the selectmen, a sum of money not exceeding \$50,000.00, to pay for the same. The plan presented estimated that the existing streets requiring drainage had a total length of twenty-eight miles, and they estimated the cost of the proposed system of sewerage for these twenty-eight miles of streets as follows:

3 miles of 36 by 36 inches, at \$3.00	\$47,520.00
3 miles of 24 by 24 inches, at 2.00	\$1,680.00
3 miles of 18 by 18 inches, at 1.50	25,760.00
3 miles of 12 by 12 inches, at 1.00	15,840.00
16 miles of 10 by 10 inches, at .80	65,584.00

amounting to \$186,384.00, the average cost per mile being estimated at \$6657.00, and the average cost per foot at \$1.26. The actual construction of the sewer has recently been commenced.

It will, when constructed, connect with the system of metropolitan sewerage just laid out by the State Sewerage Commission, but until this is ready will have an outlet into Mystic River.

There was no local newspaper in Everett at the time of its incorporation, but soon afterwards the publisher of the *Malden Mirror* established an edition of that paper, called the *Everett Pioneer*, which he continued to publish until about 1875.

The first strictly local paper was the *Everett Free Press*, the first number of which appeared May 24, 1873, then a small sheet of four pages, each 11 x 14 inches, with four columns of reading matter. On the 10th of April, 1875, it was enlarged to seven columns, and on July 17, 1886, it was further enlarged to cover eight pages. The columns of the *Free Press* have been valuable not only for local news, but also as a permanent record of facts relating to our local history. The *Free Press* continued to be the only newspaper published in town until October 31, 1885. Its publisher from the first has been Mr. Benjamin F. Morgan.

On October 31, 1885, the first number of another local paper, *The Everett Herald*, appeared, published by Benjamin Johnson, publisher of the *Malden City Press* and the *New England Grocer*. It was edited for three months by Mr. C. G. Newcomb. In January, 1886, Mr. George W. Davies succeeded to the editorial chair, and has since held that position. The *Herald* is Republican in politics and independent in expression, and it is devoted to local interests. Its management is enterprising; it is neatly printed and has shown commendable enterprise in gathering news, which has been rewarded by a steady growth in its circulation. In April, 1890, Mr. George W. Davies

purchased of Mr. Johnson all his interest in the *Herald*, and became publisher as well as editor. Both of the local papers are issued on Saturday, at a subscription price of two dollars per annum.

In addition to the above, the Rev. T. C. Watkins, for a short time during his pastorate, published a small local paper devoted to the interests of the Methodist Society, called the *Sunbeam*, and the Rev. F. T. Pomeroy conducted a similar enterprise, called the *Friendly Hand*.

The Young Men's Christian Association has also issued a small sheet for several years past, called the *Y. M. C. A. Star*, established in April, 1886. The first four issues were published at irregular intervals, but from September, 1886, it was issued regularly once a month until recently, when the practice was resumed of issuing it at irregular intervals.

One of our latest local institutions is the Everett Savings Bank, which was incorporated March 1, 1889. The first meeting of the corporators was held April 11, 1889, and the corporation was organized with the following officers: President, Wilmot R. Evans; vice-presidents, Woodbury A. Ham, Robert M. Barnard; treasurer, Samuel P. Cannell; clerk, Henry K. Veazie; trustees, Woodbury A. Ham, Wilmot R. Evans, Robert M. Barnard, Samuel P. Cannell, George S. Marshall, Samuel M. Johnson, Isaac T. Winchester, Adams B. Cook, Daniel B. Fessenden, Thomas Leavitt, Cyrus S. Hapgood, John S. Cate, Nathaniel J. Mead, Henry K. Veazie, Joseph E. Nichols, James P. Stewart, Francis E. Dyer, Thornton A. Smith, Dudley P. Bailey.

The bank opened for business May 11, 1889, and the total amount of deposits received up to the close of business on June 30, 1890, was \$40,864, and the total number of depositors had been 331. At the same date there remained on deposit \$20,247, held by three hundred and sixteen depositors, showing an average to each depositor of \$64.07.

The Everett Co-operative Bank opened for business October 14, 1890; President, Samuel Freeman (2d), vice-president Charles B. Ladd, secretary and treasurer, Charles E. Jennings.

The following societies also exist in town besides those already mentioned:

American Legion of Honor.—Lincoln Council, No. 753. Established October 1, 1881.

Ancient Order of United Workmen.—Franklin Lodge, No. 51. Established November 11, 1883.

Order of the Sons of Veterans.—Gen. A. P. Martin Camp, No. 62. Established April 28, 1886.

Women's Relief Corps.—James A. Perkins Corps, No. 40. Established April 25, 1886.

Home Circle.—Comfort Council.

Improved Order of Red Men.—Assowonset Tribe, No. 56. Established December 13, 1887.

Knights of the Golden Eagle.—Longfellow Lodge, No. 609.

Knights of the Golden Eagle.—Halbpearl Castle, No. 66. Established February 8, 1887.

New England Order of Protection.

Order of Tents.—Bay State Lodge.

Royal Arcanum.—Palladium Council, No. 257. Established March 22, 1879.

Royal Clarendon of Knights and Ladies.

Sons of Temperance.—Golden Star Division, No. 81. Established December, 1884.

United Order Golden Circle.—Wendell Phillips Commandery, No. 279. Established February 26, 1885.

United Order of Pilgrim Fathers.—Gov. Bradford Colony, No. 78.

The following statistics of Everett will show its rapid growth:

	Pop.	School Children.	Valuation.	Tax Levy.	Rate.	No. of Dwelling Houses.
1870	2152	432	\$1,736,379	\$24,845 84	\$13 30	414
1871	2471	503	2,123,232	31,040 78	12 00	491
1872	2712	541	3,091,924	38,912 16	11 80	544
1873	3177	692	3,911,875	55,023 91	13 30	635
1874	3468	618	4,408,525	62,378 74	13 30	701
1875	3500	680	4,404,650	62,389 85	13 30	770
1876	3564	697	4,491,400	66,898 00	10 00	782
1877	3686	724	4,542,550	47,401 50	10 00	804
1878	3833	744	4,090,950	49,103 93	11 50	822
1879	3888	734	4,103,950	45,272 70	10 50	828
1880	4057	764	4,221,400	49,736 27	10 50	854
1881	4402	832	4,263,550	59,963 58	13 50	806
1882	4538	879	4,633,000	73,966 96	15 40	881
1883	4810	912	4,796,550	62,745 64	12 60	937
1884	5154	965	4,950,150	66,369 36	12 80	1000
1885	5640	1020	5,133,600	69,168 56	12 80	1114
1886	6275	1145	5,461,800	76,672 77	13 30	1259
1887	6905	1217	5,835,850	82,895 48	13 50	1320
1888	8115	1415	6,499,100	91,300 14	13 30	1624
1889	9202	1659	7,510,300	113,720 75	15 60	1848
1890	10,676	1847	7,889,650	120,585 92	14 50	2225

The foregoing statistics of population are those of the assessors. The census returns gave the population as 2220 in 1870; 3651 in 1875; 4159 in 1880; 5825 in 1885 and 11,043 in 1890.

With a remarkable record of progress during the first two decades of its history, Everett enters upon its third decade almost large enough to be a city, and with great possibilities for the future if its opportunities are rightly improved.

BIOGRAPHICAL.

AMOS STONE.

Amos Stone, third son of Phineas—a lineal descendant of Rev. Samuel Stone, who came to this country from England A. D. 1633—and Hannah (Jones) Stone, was born at Weare, New Hampshire, August 16, 1816, and lived there with his parents until 1824, when they removed to Charlestown, Middlesex County, Massachusetts. He was educated at the Charlestown Free School. At the age of fifteen he went to work in his father's grocery-store, and remained there until he was twenty-one years of age. He then engaged in the real estate business, and has continued in that business more or less down to the present time, and has become one of the largest real estate holders in Middlesex County.

Charlestown was incorporated a city in 1847; he was elected its first city treasurer and collector of taxes, which office he held eight years, till the close of 1854. The first two years the office was a trying

Samuel J. May

one; he followed an easy-dispositioned town treasurer and collector, who took no pains to enforce the prompt payment of the taxes assessed. Mr. Stone, being a systematic and prompt business man, proceeded in an energetic manner to collect the back taxes committed to him, and all others when they were due; many solid business men, who had been benefited by the former collector's indulgence, protested, but, finding Mr. Stone was in earnest, paid. One large railroad corporation repeatedly refused to pay its taxes; one afternoon, as an important train was about to leave the station, he attached the engine just before it was coupled to the train; the result was a check for the amount due, with the costs, was handed to him, and the train allowed to depart. After a few such instances taxes were paid reasonably prompt.

In the fall of 1855 Mr. Stone was elected treasurer of the county of Middlesex, and held that office for thirty years, until January 1, 1886, when he declined a re-election. The following will show the public appreciation of his services:

"Mr. Amos Stone, who has held the important office of County Treasurer for Middlesex for some thirty years, having decided to retire on account of advancing years, he being sixty-eight years of age, the County Convention for Middlesex, which was held this week, nominated for the office Mr. J. O. Hayden, one of the proprietors of the *Somerville Journal*. Mr. Hayden is every way qualified for the position and he will discharge the duties of the office with the fidelity and accuracy that has distinguished his predecessor for over a quarter of a century.

"The following resolution was unanimously passed by the Middlesex County Republican Convention, held in the city of Cambridge, October 7, 1885, as a testimonial to the long services of its retiring County Treasurer, Amos Stone. The resolution was offered by the Hon. Selwyn Z. Bowman, of Somerville:

"Resolved, That we, the Republican delegates in County Convention assembled, desire to place upon record our appreciation of the character and services of Amos Stone, Esq., who for thirty years has so ably and acceptably performed the duties of Treasurer of this County of Middlesex. His long term of service is the best evidence that he has performed those duties to the satisfaction of the people, regardless of party, and that he has had their confidence and esteem. We congratulate him upon his long and honorable career in so prominent and responsible a position in which he has always shown himself a courteous gentleman, an able financier and a clear-headed business man, and, as he voluntarily withdraws from the cares of public life, we can assure him that he takes with him the best wishes of the people that his remaining years may be full of happiness and prosperity."

In 1854 the Charlestown Five Cents Savings Bank was incorporated. He took an active and leading part in its organization, and was elected one of its trustees and its first treasurer, which positions he has continuously held.

It has proved one of the most prosperous and successful banks in the Commonwealth. For more than ten years he, as treasurer, with the assistance of the president, performed all the labor of the bank without any compensation to either.

In 1861 the Mutual Protection Fire Insurance Company was incorporated and organized, in which he took a leading part, and was chosen one of its directors, and soon succeeded to the presidency, which position he now holds.

In 1863 he was elected a director in the Monument National Bank, and, on the death of Hon. James O. Curtis, was elected its president, which position he now holds.

He was one of the original shareholders of the Mystic River Company, a large landed corporation, and for more than twenty years has been its clerk and treasurer.

In the several positions held by him as treasurer, he has administered the duties with signal ability, allowing no waste of the public funds, and has conducted the business as though it was his own private affair, allowing no monies to be paid out except duly approved by the proper boards or officers, and in strict conformity to law.

His attention to business, great executive ability and physical endurance, enabled him to work sixteen hours per day, and to perform all the duties in the several offices that he held at the same time, and during the thirty years that he held the office of county treasurer, never employing a clerk or assistant during the entire term. The writer of this has frequently heard him say that he never wanted more than six hours of sleep out of twenty-four.

His strict fidelity and clear head have enabled him to perform all the duties without loss to himself or the several treasuries committed to his trust.

With all his cares and close application to business, he was ever ready to hear and give judicious advice and council to aid the poor and unfortunate to overcome their difficulties and troubles, nor felt himself demeaned by so doing, some of whom to-day rejoice in the beneficial results of the same, and in possessing a good business position and property through his advice and assistance. He was generous, and gave freely to relieve the wants of the distressed poor, dispensing his charities mainly in person, so that he could see to whom, where and in what manner his money was given and the results thereof.

In politics he was formerly a Democrat—voted for Franklin Pierce—then he became a Republican and voted for John C. Fremont and has continued in that party since.

When the Rebellion was begun he was one of the first to come to the support of the Government; before the Government had made any provision for the soldiers enlisted, was one of the twenty-one persons who paid the expense of fitting out the first three companies from Charlestown to go to Washington to defend the Capital. Although exempt from draft by reason of age, he sent the first representative recruit from Charlestown at his own expense, also sent a colored recruit, and contributed hundreds of dollars during the continuance of the war for military pur-

poses. Early in life he joined the Free Masons and is quite prominent in the order, and is now treasurer of two Masonic organizations.

He remained a single man until after he was fifty years of age; he married Sarah E. Mills; they live in the town of Everett, Middlesex County, Massachusetts, where they have a beautiful and pleasant home. They moved from Charlestown to Everett in 1872.

Until recently Mr. Stone has not taken an active part in town affairs in Everett, though a liberal contributor to all matters of public interest. In 1888, when a committee was appointed to consider the question of sewerage, he was appointed a member and was chosen chairman. On March 5, 1889, this committee presented an able report, drafted by Mr. Stone, which was adopted by a vote of 267 to 1. A commission of five, of which Mr. Stone was chairman, was chosen to carry out the recommendations contained in the report. In March, 1890, to enable him more effectively to carry out these recommendations, he was elected one of the road commissioners of the town of Everett for three years, the first and only town office he has ever held.

JOHN C. SPOFFORD.¹

One of the younger residents of Middlesex County, whose successful professional career is worthy of mention, is John C. Spofford, of Everett, Mass. Mr. Spofford was born in Webster, Androscoggin County, Maine, November 25, 1854, where his early life was that of the American country boy: working on the farm in summer, and in winter attending the district school, where he first began to play with draughting tools, and to look forward to his present profession. Afterward, however, this education was considerably extended at Monmouth Academy, Monmouth, Maine, and at the Maine Wesleyan Seminary, at Kent's Hill. Following the time-honored custom of New England students, Mr. Spofford at this period taught school for several terms. He has always since taken an active interest in educational matters, having served on the School Committee in his native town, and having been for four years a member of the Everett School Board.

At about this time also, Mr. Spofford worked a good deal at the carpenter and the mason's trades, and thereby acquired an actual knowledge of building construction, which has since proved of great service to him.

In 1879 he entered the office of H. J. Preston, in Boston, and began in earnest the study of architecture.

In February, 1881, Mr. Spofford was engaged as a draughtsman by Messrs. Sturgis & Brigham, well-known Boston architects, and remained with that firm until 1886, having charge in that time of the construction of many important public buildings

and noteworthy private residences. Among these were the Commonweath building, in Boston, the residence of H. H. Rogers, of the Standard Oil Company, in New York City, and the Massachusetts Hospital Life Insurance Company's building, on State Street, Boston.

In March, 1887, Mr. Spofford formed a partnership with Mr. Willard M. Bacon, under the firm-name of Spofford & Bacon, but withdrew from this a year later and united with Mr. Charles Brigham, formerly of Sturgis & Brigham, in forming the present firm of Brigham & Spofford, who are well-known as the architects of the alterations and enlargement of the Capitol buildings of Maine and Massachusetts.

Of the less important work that has issued from their office the following buildings may perhaps be considered especially noteworthy:—The City Hall at Lewiston, Maine; the Town Hall at Fairhaven, Massachusetts; the Memorial Hall at Belfast, Maine; the Episcopal Church at Melrose, Massachusetts; the Union Square Baptist Church at Somerville, Massachusetts; a church at Roxbury; the residence of J. Manchester Haynes, at Augusta; that of B. D. Whitcomb, at Elm Hill, Roxbury, and that of C. H. Souther, at Jamaica Plain. The new stations at Cough-ton and Roxbury, on the Providence Division of the Old Colony Railroad, are also their work.

Mr. Spofford has taken much interest in Masonry and Odd Fellowship and in the work of various fraternal societies; among others in that of the Knights and Ladies of Honor of which he has been Grand Protector of Massachusetts.

In Aug. 1888, the subject of this sketch succeeded the Hon. Ainsworth R. Spofford (the librarian of Congress) as president of the "Spofford Family Association." At that time seven hundred members of this family gathered from all parts of the United States to commemorate the fact that 250 years before in the year 1638, John Spofford and Elizabeth Scott came from Yorkshire, Eng., and settled at Rowley (now Georgetown,) Mass. Mr. Spofford is also connected with the well-known Wentworth family, being a lineal descendant of that John Wentworth who held by Queen Anne's appointment the Lieutenant-Governorship of the Province of New Hampshire, from 1717 to 1730. Captain John Wentworth, Mr. Spofford's grandfather's great-grandfather fought on "the plains of Abraham," at the Battle of Quebec, and helped to carry Wolfe to the rock beside which he died.

The character of a certain eminent man was once summed up in these words:

"He could toil terribly."

The writer has known Mr. Spofford from his earliest childhood and feels sure that no one who has met him often, either in the hay-field, or in the school-room, or at the draughting table, will be disposed to dispute his ability to do, when necessary, two days' work in one, and come back next morning ready for another

¹ Contributed.

John C. Spifford

day of the same sort, and his friends, relying on the marked ability to withstand the wear and tear of life which his kins-people have shown, hope from his hand and brain in the future much good architectural work.

In the longevity below mentioned there is something curious.

How few of us can look back upon a childhood spent in a house wherein dwelt five generations of our own kin.

Some sneering foreigner once said that very few Americans could tell their great-grandfather's name. However that may be, it is very certain that there are not in any land many living who can call back, as a thing seen with their own eyes, the form and features of their grandfather's grandfather. At the age of fourteen Foster Wentworth, the great-great-grandfather of Mr. Spofford, entered the Revolutionary Army as a waiter for his father, the Capt. John Wentworth mentioned above. When he died, at the age of ninety-nine John C. was about 7 years old.

Mr. Spofford married, on the 7th of July, 1881, Miss Ella M. Fuller of Turner, Maine. Mr. and Mrs. Spofford soon after removed to Everett and made it their permanent home. They have one child, Mabel Fuller Spofford, born April 11, 1883.

CHAPTER XLII.

FRAMINGHAM.

BY REV. JOSIAH H. TEMPLE.

FRAMINGHAM is situated in the southwestern part of Middlesex County, midway and on a direct line between Worcester and Boston. The old turnpike between these cities ran through the Centre village; the Boston & Albany Railroad runs through the South village; the Old Colony Railroad, Northern Division, from New Bedford to Fitchburg, and to Lowell, runs through both the South and Centre villages.

When the act of incorporation was granted in 1700, the town was bounded easterly by Sudbury, Cochituate Pond and Natick lands; southerly by Sherborn and the Indian lands; west by Marlborough and north by Sudbury. Its present boundaries are, northeasterly by Wayland, easterly by Natick, southeasterly by Sherborn, southwesterly by Ashland, west by Southborough and Marlborough, and north by Sudbury.

As originally laid out, the Plantation contained about 20,500 acres. Subsequently several tracts, of greater or lesser extent, were transferred to other towns. Simpson's Farm of 500 acres was set to Hopkinton, when that town was incorporated in 1715. Holliston took off a point of the southern extremity of the town in 1724. In 1727 Southborough took in the long strip of land known as Fiddle Neck. The Leg was annexed to Marlborough in 1791. By these

subtractions the area of the township was reduced to 18,976 acres. In 1846 a tract of about 3000 acres was set off to form, with parts of Hopkinton and Holliston, the new town of Ashland. In 1871 a triangular piece of land was taken from the town of Natick and annexed to Framingham. The present area of the town is 15,930 acres.

The more striking natural features of the territory are the range of high hills on the north, near Sudbury line, known by the names of Nobscot, Doeskin Hill and Gibbs' Mountain; the four ponds lying in a cluster near the southern border; Cochituate Pond, on the eastern border; and the Sudbury River, which flows diagonally through the town from southwest to northeast. The view from the top of Nobscot is broad and diversified; and the prospect from the Normal School, on the westerly face of Bare Hill, is one of great variety and rare beauty.

English adventurers explored these lands as early as 1633, and became acquainted with the features of the country; but the Colonial government took no action intended to promote a settlement here till 1640, when a considerable grant, within its limits, was made to the widow of Rev. Josse Glover. In 1633 a company of four men started from Watertown to go to the Connecticut River. The party consisted of John Oldham, Samuel Hall and two others, who went to look out a place for a new settlement at that then distant point.

The only way from Cambridge to Hartford, where the path would not cross any considerable stream of water, was up the northern bank of the Charles River to Waltham Centre; thence to the northerly end of Cochituate Pond; thence, following a southwesterly course through the village of South Framingham, into what was the northwest part of Sherborn; then turning more west, through Hopkinton, and following the upper south slope of the water-shed of the streams that ran into Narragansett Bay and the Sound. The route was somewhat circuitous, but comparatively safe.

The Oldham party probably had a limited knowledge of the geography of the country, and followed, in the main, an old Indian trail. The chronicle of the time says that Mr. Oldham "lodged at Indian towns all the way." This trail was followed in 1636 by Rev. Messrs. Hooker and Stone, and their large company, on their journey from Cambridge to Hartford, and was known in contemporary records for two generations as "The Old Connecticut Path."

In the earliest notices of the territory now embraced in this town, it is described as *Wilderness Land* lying north of the path from Sudbury to Nipnox. Later (1662) it is called "The tract of waste lands belonging to Thomas Danforth, Esq., lying between Marlbury and the *Old Connecticut Path*;" and still later (1693), "A Plantation situated between Sudbury, Marlbury, Sherborn, and the Indian Plantation at Natick, and westerly is the wilderness." A con-

siderable part of these lands, viz.: those which lay on the easterly side of Sudbury River, was disposed of by the General Court to individuals and to the Natick plantation, between the years 1640 and 1660. In 1660-62 the Court granted to Thomas Danforth, Esq., the larger part of the lands on the westerly side of the river. To this granted land Mr. Danforth added, by purchase, the tract situated west and south of Farm Pond, extending as far as the old Sherborn line. The combined gift and purchase covered about two-thirds of what constituted the township; and the place was, for many years, officially designated as "Mr. Danforth's Farms."

No record has been discovered of any act of the General Court by which these lands were created into a plantation. Settlers came on slowly and were much scattered. Until 1675 all the adults were members of the church in Sudbury; and most of them had home-ties there, and did not desire and were not able to bear the burdens of separate civil and ecclesiastical charges. When Sherborn was organized into a township, the inhabitants living in the south part of our territory "had privilege and did duty" there, the statute providing that "for all such places as were not yet laid within the bounds of any town, the same lands: with the persons and estates thereupon, shall be assessed by the votes of the town next unto it; the measure or estimation shall be by the distance of the meeting-houses." A few families dwelling in the northwesterly part of the plantation went to meeting and paid taxes in Marlborough.

INDIAN OCCUPATION.—The natural features of the country included in the limits of the original town grant mark it as a desirable abiding-place of the native red man. The swamps abounded in beaver and other fur-bearing animals; the ponds were stopping-places of migratory fowl, and the breeding-places of shad and salmon; the several falls, and the mouths of the smaller streams running into Sudbury River and Stoney Brook, were excellent fishing-places; the higher hills sheltered the larger sorts of wild game, and were well covered with chestnut trees to furnish a store of nuts; and the plains supplied rich and easily-tilled planting-fields.

The Indian had a faculty of adapting means to ends, and uniformly pitched his tent, and chose his village site, with a view to take advantage of natural facilities for securing food, game and fish in their season, corn and nuts for the late summer and fall supply.

Looking at our territory, and taking the natural advantages of location as a guide, we should expect to find Indian villages of considerable size at three distinct points, viz., at the outlet of Cochituate Pond near the falls at Saxonville, and around Farm Pond. All the conditions requisite to Indian congregate life are found at these localities. And the probability arising from these natural indications, is made a certainty by the existence at these several points of unmistakable *Indian remains*, and by historical records.

THE INDIAN VILLAGE OF WASHAKAMAUG.—When Thomas Eames took up land, and built a house at the north end of Farm Pond in 1669, the lands to the east and southward were owned by John Awassamog; and most of the Eames farm was subsequently purchased of him, or his children. How this tract came into Awassamog's possession, is stated in legal instruments bearing his signature. In a paper duly executed, appointing his son his successor, and dated December 1, 1684, he recites:

"John Awassamog, of Naticke, not now like to continue long before his decease, and notable to look after the Indian title that yet do remain unpaid for by English proprietors, do hereby acknowledge Thomas Awassamog, my natural son, my natural heir, and bestrut and empower him in my stead to sell, bargain, and alienate any of that land the Indian title of which do yet belong to me, according to the sagamore title

His make.
John O Awassamog." 1

In a deed dated January 21, 1684-85, in which his sons and other blood-relations joined, conveying the title of his Framingham and other lands to the said heir and successor, John Awassamog recites as follows:

"Know all men by these presents, that we, John Awassamog, Samuel Awassamog, John Mooqua, Peter Ephraim, Eleazer Pegan and Joshua Awassamog, Indians of Natick, in the county of Middlesex, in New England, for reasons us thereunto moving, have given and granted, and do by these presents grant, aliene, enfeeble, assigne, make over and confirm unto Thomas Awassamog, Indian of the same town and county aforesaid, all that our whole native title, right and interest in that tract of land lying, situate and being between the bounds of Natick, Charles river, Mattabonick, and a point of Blackstone's river beyond Mendon—all of which said right, title and interest in the said land (that is not already legally disposed of) we, the said John Awassamog, Samuel Awassamog, Joshua Awassamog, John Mooqua, Peter Ephraim and Eleazer Pegan, do hereby avouch and declare to be, at the delivery of these presents, our own proper estate, and lawfully in our power to alienate and dispose of,—it being our natural right, descending to us from the chief sachem WUTAWUSHAN, uncle to the said John Awassamog, Sen., who was the chief sachem of said land, and nearly related to us all, as may be made to appear." 2

This deed carries the title and ownership of the lands in question back to "the chief sachem WUTAWUSHAN, uncle of John Awassamog, Sen.," and fixes approximately the time of his occupancy here. This date could not vary much from 1620-30.

At any rate, the records make it clear, that about 1630 the lands lying between Farm Pond and the Natick line, and indefinitely southward, were owned by the chieftain Wutawushan, and that the title descended to his nephew Awassamog, who was living on our territory in 1649-50, and till 1684, and through whom the title passed to the Eames family.

About the year 1635, Awassamog married Yawata, the daughter of Nanepashemet, chief of the Pawtucket tribe, whose possessions extended from Chelsea and Lynn on the coast, through Middlesex County to the Pawtucket Falls (Lowell) on the Merrimack River. The young couple lived for a time at Winnisimmet (Chelsea), where their oldest child Mumingquash (known afterwards as James Rumneymarsh) was born.

¹ Mass. Col. Records, v. 541. ² Mass. Col. Records, v. 541, 542.

Their other children were known as John Awassamog, Jr., Samuel Awassamog, Joshua Awassamog, Thomas Awassamog and Amos Awassamog.

When the apostle Eliot began his labors with the Indians at Nonantum, Awassamog appears to have been living at Mistick (Medford), and sometimes attended Mr. Eliot's preaching.

Awassamog died in the early part of 1685. That his last years were spent near his Framingham home is made evident from the recital in the deed given by his sons to the sons of Thomas Eames, of the fact, that "for sundry years until his death, he, the said Thomas Eames, did give relief to John Awassamog, chief proprietor of these lands."

His widow was alive in 1686, when she signed a deed of lands of her tribe in Salem. She probably died at the house of her son, James Rumneymarsh, in the bounds of Natick.

INDIAN VILLAGE AT COCHITUATE.—This word is spelled in official documents, Wachittuate, Coijchawicke, Catchchautit, Charchittawick, Katchetuit, Cochichawauke, Cochichowicke, etc. As is so common with Indian place-words, modern usage has changed the original application of the term. Neither the Indians nor the early English settlers applied the name to the pond, but to the high bluff just south of the outlet. The exact Indian use of the term is given by Thomas Mayhew, Peter Noyes and Edmund Rice, in their record of the laying out of Mrs. Glover's farm in 1644: "The southwest bounds are the little river that issueth out of the Great Pond at *Cochituate*."

The word signifies, "place of the rushing torrent," or "wild, dashing brook," referring to the outlet in time of high water.

Of the original native owners of the land at this point and the immediate vicinity we have no positive knowledge. This tract was included in the grant made by the General Court, under the right of eminent domain, to the Indians at Natick, after that plantation was established; and the deeds to the English purchasers, all of which bear date subsequent to this grant, are signed by Waban, Piambow, Tom Tray and others. These names and some other reasons favor the inference that these lands were included in the inheritance of the tribe which dwelt at the Falls below, to be noticed hereafter.

But fortunately for history, the village-site on the bluff was left untouched by the plow till a period within the memory of men now living; and the remains clearly indicate the permanent residence of a considerable clan. Mr. Joseph Brown, who was born near by, and was often on the spot, says, "I have been in the old Indian fort which stood on the highest point of the hill south of the outlet of Long Pond, a great many times. It used to include about an acre and a half of land. A circular bank of earth with ditch outside, the whole about four feet high, enclosed it; and there was a raised mound in the centre, made, I suppose, for a lookout. There were several cellar-

holes—'granaries'—inside the bank. It was woods all around; but this place was always bare. It was first plowed up by Col. James Brown, who leveled the bank, filled up the holes, sowed rye, and made it into a pasture. There was an Indian weir in the brook, at the foot of the bluff, a little way down from the outlet." To this clear statement nothing need be added.

Quite recently, two large mortars were found here; also abundance of pestles, gouges, spear-heads and fragments of steatite kettles, etc. Six or seven large granaries are still visible.

The size of the evidently strong fort indicates that the Indians regarded it as a place of importance, as well as a place of security. The land on the west slope of the hill was favorable for a planting-field. The height of the hill made it a good lookout-point. But the carefully constructed weir shows that the fisheries here were a prime factor in native estimation. The number of large granaries (which were lined with clay) shows that immense quantities of shad and salmon were caught, dried and stored here in the spring, for use in time of need.

INDIAN VILLAGE AT THE FALLS.—The following deed, executed before the General Court had made formal grant of the land in question, is pretty conclusive evidence of aboriginal ownership on the part of the grantors, and it goes far to establish a very early occupancy by the same parties:

"This witnesseth that William Boman, Captain Josiah, Roger, A James, and Keapnisan, Indians, now living at Naticke the Indian Plantation near Sudbury in the Massachusetts Bay in New England, for and in consideration of a valuable summe of Pence and other goodes teus in hand paid by John Stone of Sudbury aforesaid to our full content & satisfaction, before the signing and delivery hereof have given, granted, bargained & sold, assigned, enfeoffed & confirmed, and by this presents do give, grant, bargain & sell, assigne, enfeoffe and confirme unto the said Jno. Stone, his Heyres & Assignes, a parcel of Broken up and fencd in land, lying on the South side of Sudbury line, upon the Falls of Sudbury River, and bounded with the Common land surrounding. The said land conteyning by estimation about ten Acres more or lesse. To have & to hold the said land with the fences and all other the privileges and appurtenances thereof he the same more or lesse, to him the said Jno. Stone, his Heyres and Assignes forever, to his and their only proper use & behooffe. In witness whereof we the above named Indians have hereunto put our hands & scales this 15th day of May 1656."

A part of these names are known to be those of Indians belonging to the northward, at Stow and beyond. This fact, and other circumstances, lead to the belief that the place was under the jurisdiction of the Wamesitts, whose headquarters was at Pawtucket Falls (Lowell); and there is a probability that the Indian village at Cochituate belonged to the same tribe, before it was given to the Natick plantation.

The wigwams included within this lot stood where Mr. Simpson's cottage and garden now are.

The fort of this clan was on the east side of the river, on the point of the bluff opposite the Saxonville Mills. It had a bold front and sides, and was easily defended, and withal was handy to their fish-

ing-places and corn-fields. A spring of water came out near the southeast foot. The large granaries were where is now J. R. Entwistle's house-lot, and were plainly to be seen when he graded up the place.

Some Indian graves have been discovered near the spot, and remains indicating that the bodies before burial were doubled up by bringing the knees against the chin, and laid upon the side.

Many choice ornaments, as well as the common domestic utensils and implements of war, have been found along the top of the bluff.

NOBSCOT.—This hill was the residence of the noted Indians, old Jethro and his son Peter. The great stone-heap, evidently intended as a look-out, stands on the highest point of the hill. It is named in the records as early as 1654.

MURDER OF THE EAMES FAMILY.—The principal tragic event which happened in our plantation during King Philip's War was the murderous assault on the family of Thomas Eames, February 1, 1675-76.

The Eames house stood on the southern declivity of Mount Wayte, the nearest neighbor being distant one and a half miles. The family consisted of Mr. Eames, his wife and ten children, varying in age from twenty-four years to seven months. The father was absent, having gone to Boston for a guard, and a supply of ammunition. A party of eleven Indians, headed by Netus, came suddenly upon the defenceless family, burned the barn, cattle and house, killed the mother and five children, and carried off five or six children and such plunder as they needed.

The family tradition is, that the mother had expressed the resolution never to be taken alive by the savages; and that, true to her word, she bravely defended her home, using hot soap and such weapons as were at hand in the kitchen. According to the confession of one of the murderers, the party, comprising six of the former residents at Magunkook, had returned to that place for some corn which was left the previous autumn in their granaries, and finding that it had been destroyed, started at once, partly for food and partly for revenge, towards the nearest English farmstead. And it is probable that the stout resistance of the courageous woman so provoked them that they left nothing alive.

The children were carried to the neighborhood of Wachusett, and two of them to Menameset. Three of them found means to escape from their captors, and returned in the course of a few months. The two girls, one probably a daughter of Mr. Eames by a former marriage, were seen by Thomas Reed, at Turner's Falls, about the middle of May. They were heard of later, near Albany. The younger was redeemed, the elder never returned.

Of the Indian murderers, three were tried, convicted and hanged, two were sold into slavery, two died violent deaths, and two were pardoned.

NAME.—On the Colonial records, the place is offi-

cially designated as *Mr. Danforth's Farms, and Framingham*. In a single instance, on the Middlesex County records, where entry is made of the births of two children of Thomas Eames, and one child of Joseph Bradish, the name is written *Framlingham*. And in a petition drawn up by Peter Clayes in 1698, and presented to the Legislature, this spelling is used. Neither has anything more than a clerical authority; and both may have been clerical inadvertencies. In the records of the Middlesex County Court, under date Dec. 23, 1673, and elsewhere, the name is written Framingham, and uniformly so in the General Court records; and in Mr. Danforth's numerous leases, of different dates, and in his will, the name is written without the *l*. Mr. Danforth's own usage is, of course, final authority in the matter. Oct. 27, 1675, a tax was laid, "to meet the charges of the present war with the Indians," and Framingham was assessed £1. Dec. 28, 1675, Framingham is ordered to raise one soldier, as its proportion of a levy of 300.

But whether the word be spelled with or without an *l*, there is no doubt that the Plantation received its name from the birthplace of Thomas Danforth in England.

THE OLD CONNECTICUT PATH.—This traveled way was alluded to in connection with the early journeys of Mr. Oldham's party and the migration of Rev. Messrs. Hooker and Stone and their company from Cambridge to Hartford. At a later date this path—which is named on the Sudbury town records in 1643, and was formally laid out from Watertown to Mr. Dunster's farm (in the present town of Wayland) in 1649—became an important factor in the settlement of Framingham, and deserves special notice. It influenced the course of exploration hither, and most of the early land grant to patrons and settlers were located on this path.

Coming from Watertown to the northerly end of Cochituate Pond, thence it followed the present road to the house of Joseph Brown, where it turned more to the west, crossing Cochituate Brook at the fordway, where was afterwards the fulling-mill dam; thence by a southerly and southwesterly course to a point about thirty rods east of Hollis Hastings'; thence on nearly a straight line to the Pará rubber-works, and across the railroad, when it turned slightly to the west, going past the South School-house site, and from thence bearing to the left, over the Beaver Dam, nearly as the road now runs into Sherborn, and round the southerly side of the Quineh meadow, just shunning the marshy lands,¹ and turning more west, crossed Cold Spring Brook, about thirty rods above its junction with Hopkinton River; thence westerly to the cold spring on the Frankland place, in the west part of Ashland, and so through Grafton,² in this State, and Thompson, Conn.

¹ See Russell's Grant, Mass. Col. Rec., iv. pt. 1, p. 370.

² "Hassanamessit is near unto the old road-way to Connecticut." Mass. Hist. Soc. Coll., 1, 185.

EARLY LAND GRANTS—Mrs. Glover's Farm.—The earliest grant of land within our town limits, by the General Court, was made 1639-40, to Mrs. Elizabeth Glover, widow of Rev. Josse Glover.

This farm, laid out as 600 acres, was found on measurement to contain 960 acres; embracing all that land lying between Sudbury town-line (now Wayland) on the north, Sudbury River on the west, Cochituate Brook on the south, Cochituate Pond on the east, and from the northeast point of this pond to the nearest point of Dudley Pond, and so by this pond to its northeast corner, and from there north, direct to the old Sudbury line.

Thomas Mayhew's Farm.—"October 17, 1643, Mr. Mayhew is granted 300 acres of land in regard to his charge about the bridge by Watertown mill, and the bridge to belong to the country" [*Mass. Col. Rec.*, ii. 51]. In 1666, Mayhew assigned his grant to John Stone and Nathaniel Treadway.

"In obedience to this grant and assignment. Now laid out this 18th day of June, 1708, said 300 acres to the heirs of John Stone and Nathaniel Treadway: This land, lying between Marlborough, Magunkook and Framingham, and so bounded: This land is some good, some bad, some pine and some oak land, and some meadow in it, as may appear from the plat of the same surveyed by David Haynes."

Grants to Edmund Rice.—"October 23, 1652, Edmund Rice, of Sudbury, preferring a petition for the grant of three little pieces of meadow, containing about 20 acres, and 30 acres of upland, lying a mile from Cochituate Brook, hath his request granted."

In 1655 Edmund Rice petitioned the General Court for another parcel of land "near the path leading to Connecticut;" and June 3, 1659, is the record: "Laid out, the farm of Mr. Edmund Rice, of Sudbury, in the place appointed by the Court, that is, beginning at a hill, leaving Conecticott path on the north or northwesterly of it, and a brook on the south of it, and two hills and a little piece of meadow on the east of it, with five acres of meadow lying on the east side, being part of the same grant; also the said tract of land being bounded with the wilderness on the west, all of which said tract of land containeth eighty acres."

This eighty acres lay between Beaver Dam Brook, Gleason's Pond and Gleason's Hill; the southwest corner bound being a tree at the Beaver Dam.

Grants to John Stone.—In 1656 Mr. Stone bought of the Indians eleven acres of land at the Falls in Sudbury River, which, with fifty acres additional, was confirmed to him by the General Court in May the same year. Later he secured, by purchase, other considerable tracts of land upon the river below the Falls, and elsewhere.

Russell's Farm.—"May 15, 1657, Mr. Richard Russell having binn very serviceable to the countrie in his publique employment of Treasurer for many years, for which he hath had no annuall stipend, this Court doth graunt him five hundred acres of land, in

any place not formerly graunted, upon Nipnop River, at his choice." This grant was laid out May 6, 1659, and is thus described: "Laid out unto Mr. Richard Russell, Treasurer, five hundred acres of land, lying in the wilderness, upon both sides of the path that leadeth from Sudbury toward Nipnop, & is bounded on the northeast with Washakum Pond, and a swampe adjoining thereto, and on the west by a marked tree and the west side of an ashen swampe, and on the south with the upland adjoining to the southerly or southwest point of that meadow which lyeth on the westerly side of the aforesaid meadow, and on the north extending on the north side of the aforesaid path, and is surrounded with the wilderness. EDMUND RICE, THO. NOYES."

Wayte's Farm.—"May 25, 1658, In answer to the petition of Richard Wayte, one of those that were first sent out against the Pequotts, & for severall services, the Court judgeth it meete to graunt him three hundred acres of land."

The record of the laying out of this grant is as follows: "Laid out unto Richard Wayte, marshall, three hundred acres of land in the wilderness, between Chochituate and Nipnop, in manner following, viz. there being a necke of land about two hundred & twenty acres, more or less, & is surrounded with Sudbury River, a great pond, & a smale brooke that runneth from the said pond into the river, and from the southerly end of the said pond running to the river againe by a westerly line; and on the westerly side of Sudbury River to extend his bounds from the said river twenty pole in breadth so farre in length as his land lyeth against the said river; also, on the northerly & northeast of the said brooke & pond, he hath five patches of meadow, containing about twenty acres more or less, being all surrounded with wilderness land; also, on the northeast side of Washakum Ponds he hath sixty acres, being bounded with the said pond on the southwest, and an Indian bridge on the east, and elsewhere by marked trees, the wilderness surrounding."

"Oct. 20, 1658. THOMAS DANFORTH, ANDREW BELCHER."

Corlett's Farm.—"In answer to the petition of Daniel Weld and Elijah Corlett, schoolmasters, the Court, considering the usefulness of the petitioners in an employment of so common concernment for the good of the whole country, and the little encouragement that they have had from their respective towns, for their service and unwearied pains in that employment, do judge meet to grant to each of them two hundred acres of land, to be taken up adjoining to such lands as have been already granted and laid out, by order of this court."

Mr. Corlett was schoolmaster of Cambridge, and his farm of 200 acres was laid out within our bounds, May 28, 1661. It took in the Elisha Frost farm, and the land to the west.

Mr. Danforth's Farms.—"Oct. 16, 1660. Whereas,

at the request of this Court, Mr. Thomas Danforth hath attended the service of this Court in surveying the laws at the press, and making an index thereto, this Court judgeth meet, as a gratuity for his pains, to grant him two hundred and fifty acres of land, to be laid out in any place not legally disposed of by this Court." This lot was laid out adjoining Sudbury town-line, on the west side of Sudbury River.

"May 7, 1662. The Court judgeth it meet to grant to Mr. Thomas Danforth, two hundred acres of land, adjoining to same lands he hath between Connecticut path and Marlborough, and appoint Ensign Noyes of Sudbury, with old Goodman Rice and John How, to lay it out, with other lands granted to him by this Court; and the act of any two of them to be accounted valid, both for quantity and quality." This 200 acres was laid out adjoining to and west of the former grant of 250 acres.

On the same day, *i. e.*, May 7, 1662,

"It is ordered, that for and in consideration of Mr. Thomas Danforth his furnishing the Commissioners to York, *&c.*, Major General Denison and Maj. Wm. Hawthorn, with ten pounds money, shall have granted him as an addition to the two hundred acres of land granted him by this Court in 6th page of this Session, as much land lying between Whip-sawfrage and Connecticut path, adjoining to his farm, as old Goodman Rice and Goodman How of Marlborough shall judge the said ten pounds to be worth, and they are empowered to bound the same to him."

"Oct. 8, 1662. Laid out unto Thomas Danforth Esq. a parcel of land lying between Marlborough and Connecticut Path, and is bounded easterly by Sudbury lands-adjoined to that part of their bounds near Lannum, the land of John Stone, and a part of Natick Plantation, southerly by the lands of the said Thomas Danforth and Natick lands, northerly with the other part of Sudbury bounds towards Marlbury; and westerly with the country lands, the said west line being limited by a pine tree marked with D and standing on the north side of that branch of Sunbury river that cometh from Marlbury [stone brook] and on the west side of Angelico brook, and from the said pine continuing a southwest line unto the other branch of Sudbury river that is the bounds of Natick plantations [Hopkinton river]; and from the said pine tree northerly continuing unto Sudbury bounds, running by a tree marked in the highway that leadeth from John Stone's house to Marlbury; in which tract of land bounded as abovesaid is contained two hundred acres of land belonging unto John Stone [the Corlett Farm] and is excepted out of that laid out unto said Thomas Danforth; also four hundred and fifty acres of land granted by the General Court in two several grants to the said Thomas Danforth; and the remainder thereof is for the satisfaction of moneys disbursed by the said Thomas Danforth for the use of the country, by the appointment of the General Court. Given under our hands the 27th of May, 1662.

"EDMOND RICE,

"JOHN HOW,

"At a County Court held at Cambridge, Oct. 7, 1662, Edmond Rice and John How, appearing in Court, acknowledged this above written to be their act, according to the appointment of the General Court.

"DANIEL GOODIN,

"SEBASTIAN WILLARD,

"RICHARD RUSSELL,

"The Court allows & approves this return."

This grant covered most of the Framingham territory on the westerly side of Sudbury River, and between the river and Southborough line.

Thus it appears that for the ten pounds money paid out, Mr. Danforth received a tract of about 14,000 acres. Adding the 450 acres previously set off to him, and the Wayte and Russell farms, he held in all,

by gift and purchase, not less than 15,500 acres of land within the limits of the old Framingham plantation.

William Crowne's Grant.—A farm of 500 acres was granted, October 8, 1662, to William Crowne, "as an acknowledgment of the great paines he was at in behalf of this country when he was in England."

This farm lay on the southerly side of Hopkinton River, and covered what is now the village of Ashland—then reckoned Framingham territory.

Grants to Thomas Eames.—On his petition of October 17, 1676, the Court made a grant of 200 acres to Mr. Eames, which was laid out "in the wilderness adjoining to Lancaster."

Jan. 24, 1676-77, Mr. Eames asked the Court for a grant of the Indian lands at South Framingham, near his former home. The following deed recites all the particulars of this grant:

"WHEREAS in Court at Nohantun January 24th 1676 Thomas Eames propounded to have a parcel of land belonging to Natick that is encompassed by ye land of Mr. Thomas Danforth, John Death and John Stone on three parts, and the Indians then consented that in exchange of lands between Sherborn and Natick the above said parcel of land desired by Thomas Eames should be included in ye lands that Sherborn men have in Exchange from Natick, as attested by a copy of that Court record under ye hand of Major Daniel Gookin deceased: Also whereas in answer to a motion made by Thomas Eames to ye General Court held at Boston ye 28th day of May 1679 the Court did there allow and confirm the grant and Exchange made of ye lands above mentioned, as appeared by ye record of ye said Court: Also whereas Sherborn in ye Exchange by them made with Natick did omit to include the above said lands therein, so that to ye day of ye date hereof ye said Natick Indians have had no consideration in money or lands for their above said lands that was propounded by Thomas Eames as above: Also whereas Thomas Eames before his decease was peaceably seized of said lands, and did settle ye same by disposing some part thereof to his children that now are dwelling thereon with four families, and did also sell to others sundry parts thereof that are now dwelling thereon, all which to disposess would be very great injustice; *Now know all men by these presents*, that we Peter Ephraim, Thomas Waban, Daniel Tonawampa Minister, Jonas Mottahant, Joseph Tabamomoso, Indians of Natick with ye consent and by the order of the rest of ye Indians of that plantation, for and in consideration of the premises, as also not forgetting the great suffering of ye said Thomas Eames by those Indians that burnt his house, barn and cattle, and killed his wife and three children, and captivated five more, whereof only three returned, who are now dwelling on ye said lands, whome now to raine a second time by turning them off those lands we are not willing to be any occasion thereof: Also, we well knowing, that although the above said Thomas Eames by reason of his being impoverished as above said, did not procure a legal conveyance of ye said lands, yet for sundry years until his death did give reliefe to John Wansmaug Chief proprietor of those lands; We the above named Peter Ephraim, etc. for and on ye behalf of ourselves as also the rest of ye Indians, that can claim any right or title in ye above said tract or parcel of land; for and in further consideration of Ten pounds, current money, to us in hand paid before ye sealing and delivery hereof by John Eameson of ye above named Thomas Eames deceased, who dwelteth upon part of ye said lands, the receipt whereof we do acknowledge by these presents; as also for twelve pounds more current money for ye use of ourselves, and ye rest of ye Indians of ye said plantation to be by us disposed of as the Governor or Lieut Governor for the time being shall order, for ye true payment of which twelve pounds, the said John Eames hath given a specially under his hand and seal bearing date with these presents; *have given, granted, bargained, sold, enfeoffed, etc.*"

This farm was bounded north by Sudbury River from the point where the Eames Brook enters to a point near the north side of the Agricultural grounds, thence the line ran easterly to the northeast corner of the State Muster grounds; the east line ran from this

point by a southerly course to Beaver Dam Brook, which brook was its southerly bound; the west bound was the Wayte meadow and Farm Pond. The eighty acres already granted to Edmund Rice was excepted out of the grant, under the title vested in John Death.

Mr. Eames also received a grant from the town of Sherborn, of a home-lot of thirty acres. This was located on Chestnut Brook, about half a mile up the stream from the Hunt place, and adjoined the home-plot of Thomas Awassamog.

The Belcher and Lynde Farm of 150 acres, lying north of the Corlett grant, was a gift from Thomas Danforth, dated March 6, 1672-73, "to his loving kinsman, Andrew Belcher, Jr."

Gookin and How's Purchase was a tract of 1700 acres covering what is known as "Rice's End," and including the celebrated *Indian Head Farm*. These proprietors bought the tract of the Indians of Natick, May 19, 1682.

BUCKMINSTER'S LEASE.—Reserving the common lands at the southwesterly part of the town, and 600 acres on Nobscot and Doeskin Hill (the former for the use of all his tenants, and the latter for the benefit of his heirs), and excepting the farms of Winch and Frost, and the Mellens, Mr. Danforth in May, 1693, executed a lease for 999 years of the balance of his Framingham lands, to Joseph White, of Roxbury, and Joseph Buckminster, of Muddy River. Owing to failure on the part of the lessees to pay the annual rental, this lease was canceled, and another lease to Buckminster alone, was executed March 25, 1699, running 999 years, the annual rental being twenty-two pounds current money.

TWO CLASSES OF LAND TITLES. All the lands lying easterly of Sudbury River were held by right of grant from the General Court, or purchase of the Indians, and confirmation by the Court; while the title to the west side lands included in Mr. Danforth's grants, is derived from a lease running 999 years.

FIRST SETTLERS.—Only a part of the men who received grants of land within our territory became actual settlers. The first man to build upon our soil was John Stone, who removed from Sudbury (now Wayland), and put up a house at Otter Neck, on the west side of Sudbury river, in 1646 or 1647. By what right he held or claimed the land here is not known—probably that of squatter sovereignty,—but so far as appears, no one questioned his title.

The next settler was Henry Rice, who received a deed and built a house on his father's grant in 1659. John Bent bought land of Henry Rice, came on in 1662, and built near the fordway over Cochituate Brook, on the west side of the Old Connecticut Path. Thomas Eames settled near Mt. Wayte in 1669. Joseph Bradish was here at this date, but his location is unknown. Two of John Stone's sons, Daniel and David, settled near their father as early as 1667. And these were probably all the inhabitants living within our limits when Philip's War broke out and put a

stop to settlements. These families were all from Sudbury, and are denominated in deeds and other official documents, "Sudbury Out-Dwellers," or "Sudbury Farmers."

The first recognition of the place by the colonial government as in a sense a distinct plantation, is in 1675, when Framingham was taxed a country rate of one pound, and was required to furnish one soldier for the country's service.

The death of King Philip in 1676, and the killing in battle or hanging of the principal hostile chiefs, and the destruction of the Indian villages and strongholds, gave assurance of a permanent peace, and settlers began to come on in considerable numbers. But for twelve years the new-comers were Sudbury people, and (except the Stones) located on the east side of the river, and on the Eames, Rice, and Gookin and How grants. John Death bought one-half of the Benj. Rice land in 1673, but did not build till 1677. His house stood near the Beaver Dam. Thomas Gleason had bought the north half of the same land in 1673, and located near the pond which bears his name, in 1678. In 1676 or 1678 John Eames and Zachariah Paddleford took up lots on their father Eames' grant, and with their father became inhabitants. John Pratt and Thomas Pratt, Jr., settled on Pratt's Plain at the same date; and in 1679 Isaac Learned settled south of Learned's Pond.

About 1687, when Mr. Danforth had matured and made known his plans for disposing of his lands by long leases, settlers began to locate on the west side of Farm Pond, and on the west side of Sudbury River. The Whitneys and the Mellens, from Watertown, settled on Danforth land in 1687 or 1688; George Walkup, Stephen Jennings and John Shears were in possession of lands near Nobscot in 1689; the Havens, from Lynn, came on in 1690; Samuel Winch was here at that date; Thomas Frost built south of Nobscot as early as 1693; the Nurse, Claves, Bridges, Elliot and Barton families settled at Salem End in the spring of the same year. All these located on Danforth land.

And these last named, as well as the settlers for the next ten years, came on mostly in groups. The Salem End families came from Salem Village (Danvers); the Pikes, Winches, Boutwells and Eatons came from Reading. Bowen, the Hemenways, Seaver, Pepper, Heath, etc., came from Roxbury. John Town, the first to locate near the Centre Village, came from Essex County, and was allied by marriage to the Salem End families.

Settlers came on rapidly, particularly upon the west side lands, after 1690; so that at the date of Mr. Danforth's death, in November, 1699, there were in all about seventy families located in our territory, and a population of near 350 souls. Eleven houses had been built at Rice's End, fifteen on Pratt's Plain and Sherborn Row, ten on Mellen's Neck and southward, twelve at Salem End, seven on Pike Row and the

road to Southborough, and twelve at North Framingham, including Stone's End.

A romantic as well as tragic interest attaches to the colony that located at Salem End. As before stated, these families came from Danvers, then called Salem Village, where they were involved in the strange complications and sad results of the witchcraft delusion. Rebecca (Town) Nurse, the wife of Francis, and mother of Benjamin and Sarah (Town) Claves, the wife of Peter, were sisters, and were among the earliest of the accused victims and sufferers. They were committed to the prison in Boston, March 1, 1692. Mrs. Nurse was the mother of eight children and was an honored member of the old church in Salem. At her trial, the evidence against her was so weak that the jury twice failed to convict; but on a third return to court, because she failed to give satisfactory answers to certain questions which they proposed, they brought her in guilty. It was afterwards shown that from deafness, she had failed to fully comprehend the proposed questions. She was executed July 19, 1692.

The wife of Peter Claves was tried, and found guilty, and condemned to death. In August she was committed to the jail at Ipswich, to await execution. Her husband was allowed to visit her in prison, and spent much of his time there. And in some way she found means to escape, and was concealed by her friends till the removal to Framingham, the next spring. As the witchcraft frenzy abated in the fall of 1692, probably the authorities were not anxious to recapture the fugitive. Mrs. Claves was the mother, by her first husband, Edmond Bridges, of Benjamin and Caleb Bridges, who were of the Salem End Colony. It should be said to his credit, that Gov. Danforth was largely instrumental in allaying the witchcraft excitement, and stopping convictions by the court.

INCORPORATION OF THE TOWN.—The first movement of the settlers, looking to incorporation into a township, was made March 2, 1692-93. The names attached to the petition are of men dwelling at Rice's End, South Framingham and Park's Corner, i.e., east side settlers. The intention evidently was to have the centre village of the new town on Pratt's Plain (now the State muster grounds), and attain, by grant or otherwise, the "wilderness land," i.e., Danforth's farms, lying to the westward. But Mr. Danforth had already conceived the plan of bringing his large landed estate under settlement and into town privileges, and the east side scheme failed.

That first petition has important historical value, and is here inserted:

"The Petition of their Maj^{ties} subjects now Dwelling upon sundry farms granted in these Remote lands situate and lying between Sudbury, Concord, Marlbury, Natick and Sherborne, and westerly is the wilderness.

"Humbly Sheweth

"That your petitioners some of us have there dwelt near forty Yeeres, And have from time to time Increased our numbers, And more

especially of Late, Soe that now wee are about forty families, Some having built and some building, And wee hope may sincerely say that wee have endeavored to attend the Worship of God, Some of us at one Towne & some at another as wee best might, butt by Reason of our remoteness, four fives and some six miles from any Meeting-house, Are uncapable to carry our families with us nor yett to sanctifie God's Sabbath as wee ought besides many other inconveniencies (Inevitable) in our present circumstances. And there being Lands Adjacent that might well accomodate more families lying partly in Natick bounds, the Indians to whom it belongs being mostly gone some by death and others removed elsewhere, and our westerly bounds being the wilder-ness, Soe that wee have a prospect If this Hon^{ble} Court shall favour this our humble address, That our numbers will be further Increased, whereby wee may be enabled to carry on the worship of God & have the benefit of prudential order among ourselves

"The Petitioners Considered

"Vot petitioners doe therefore humbly request y^e favour of yor excellency and this Hon^{ble} Court, That by the authority of this Court we may be made a Township & have the order and privileges that have beene accustomed to others in our circumstances i.e. Some Easement in our Taxes that wee may the better bee enabled to carry on our publick Town charges; That some addition may bee granted us out of the wilderness adjacent, And in case the Hon^{ble} Court shall see reason to Licence Natick Indians to make sale of any part of their Large Plantation that wee may have liberty to purchase those Lands that will bee accomodable to this place."

Signed by John Bent, Benjamin Whitney, John Eames, Thomas Gleason, Isaac Learned, John How, Thomas Pratt, David Stone, David Rice, Thomas Drury, Nathaniel Haven and twenty others.

The next move was made by west side settlers in 1694-95. This was checkmated by Sherborn, which started a plan looking to the annexation of Rice's End and Pratt's Plain to that town.

In 1697 a petition—largely signed by both east-side and west-side inhabitants—was blocked by the Sudbury farmers living near Cochituate Pond.

These conflicting interests were hard to be adjusted. Sudbury had contributed some of her best men as settlers on these lands, and still exercised a *quasi* jurisdiction over the northeasterly portion, under the title of Sudbury Farms. Sherborn had naturally drawn the settlers who dwelt around Farm Pond towards her meeting-house, received them to her church and conferred civil and political privileges in consideration of taxes for the support of public worship. Her opposition to a new town here was most determined and persistent and potent. And when, after a struggle of seven years, it became evident that the new township was to be erected, she secured the insertion of a clause in the act of incorporation, "saving unto Sherborn all their rights of land granted by the General Court to the first inhabitants, and those since purchased by exchange with the Indians of Natick or otherwise." This clause gave rise to a legal contest of nine years' duration, the double taxing of several families, much bad feeling, and was only ended by the Legislature granting unto the town of Sherborn "4000 acres of wilderness country land where they can find it any way convenient for said town, in compensation for these seventeen families."

The act incorporating the town of Framingham bears date June 25, 1700.

At this time there were thirty-three houses on the westerly, and thirty-one on the easterly side of the river. The number of inhabitants was "above three hundred and fifty souls."

NO CENTRAL VILLAGE-SITE.—A peculiarity of our town is, that there is no central point marked out by nature as the *village-site*, to which all material and social interests easily gravitate. The geographical centre was broken, swampy land, inconvenient for roads and uninviting for settlement. The original meeting-house site, in the old cemetery, was pitched upon, because it accommodated the more thickly settled out-districts, viz., Rice's End, Pratt's Plain, Park's Corner and Salem End; and because it was nearer to Sherborn Row (now South Framingham) than the Sherborn meeting-house was, and thus would bring these families within the statute which required all settlers to seek civil and religious privileges in the town to whose meeting-house their residence was nearest. The site of the present Central village was selected as a compromise of conflicting interests, with which nobody was quite satisfied. The lands most eligible for homesteads and for cultivation were distant from this point, and were distant from each other. And what added to the difficulty of centralizing and uniting our early population was the fact that these detached clusters of settlers were each a little centre of its own in previous associations and social ties. The Stones were a power by themselves, and were given places of honor in Sudbury church and town, to which they were strongly attached. The same was true of the families at Rice's End. The Pratt's Plain settlers had received like favor from Sherborn church and town. The Bigelows, Learneds, Whitneys and Mellens had common associations formed while they lived in Watertown. The Havens were large land-holders, and were somewhat isolated. The Salem End families had been mutual sufferers from the witchcraft delusions and judicial trials at Danvers, and had taken refuge and found a peaceful home in this then wilderness land. The Reading and the Roxbury colonies, which located in the northerly part of the plantation, had each its separate interest and ties. The selection by Col. Buckminster of his homestead farm in the upper valley of Baiting Brook, naturally brought his old neighbors to locate near him, and to consult his wishes and follow his lead.

And the fact that the settlers on the east side of the river held their lands in fee simple, while the settlers on Danforth lands had only leases, was a circumstance, perhaps trivial in itself, but which had its influence in separating interests. The leased farms held several valuable rights in common, from which the east-side settlers were debarred. Mr. Danforth was a man of large views and well-defined aims. He planned to build up a township of enterprising men by leasing the land on easy terms, and securing to each tenant a right of pasturage and fuel in the reserved commons, which embraced a tract of about

5000 acres. In addition, Mr. Danforth set apart a large tract "for the benefit of the ministry."

The diverse social elements were slow in assimilating, were often agitated by disturbing influences, and once came perilously nearer a destructive explosion. The ministerial lands were the subject of unchristian contention, and the commons, which were intended to be a band of union and mutual advantage, became a field for individual avarice and over-reaching.

FIRST MEETING-HOUSE.—To meet the needs of the many families who could not go to the neighboring towns to attend public Sabbath worship, and to strengthen their appeal to the Legislature for an act of incorporation, our settlers proceeded, in the summer of 1698, to erect the frame of a meeting-house, and cover it in. This house stood on the high land in the east central part of the old cemetery. As originally built, it was in size thirty by forty feet, and two stories high, fronting the south. It was so far finished that Sabbath services were held in it the next year. It was boarded and clapboarded, but not painted. The windows on the front side were of uniform size, and in regular order; on the ends, and north side, they were put in where, and of such size, as individual pew-owners pleased—probably many of them without frames. Originally there was one large double door in front; but individuals were allowed, or took the liberty, to cut doors at the ends and north side, wherever most convenient to reach their respective pews.

Inside, the walls were unfinished. The pulpit stood on the north side, opposite the great door. A gallery extended across the ends and front side—the east end and half the front was called the "women's gallery," and reached by the "women's stairs," at the southeast corner; the west end and half the front was called the "men's gallery," and reached by the men's stairs," from the southwest corner. A "bar" across the centre of the front gallery indicated the dividing line, which was not to be crossed by either sex. Long seats of the rudest construction ran around the galleries, next the walls, and in front.

On the lower floor were two bodies of seats, or benches, separated by an alley—the east range allotted to the women, the west to the men. The deacons' seat was in front of the pulpit. Under the galleries were long seats, running parallel with the walls. By special vote of the town, individuals were allowed to take away portions of these long seats, and build pews, against the walls, six feet by four and one-half or five.

The site selected was "the most accommodable spot" on the ministerial land for the scattered population. It brought "the seventeen families" nearer to a place of worship than Sherborn meeting-house. The east side settlers gravitated to the Great Bridge by easy paths from Rice's End and Sherborn Row. The people from Nobscot and Stone's End had paths

to Pike's Row, and thence by the Edgell place on nearly a straight line to the meeting-house. A road from the Hemenways through Temple Street, met the road from Salem End on the present R. W. Whiting place, which then ran east past the house of C. J. Frost, about twenty rods east of which it received the path from the Mellen and Haven neighborhoods, and then led direct to the meeting-house.

THE FIRST MINISTER.—August 21, 1700. The town made overtures to Mr. John Swift, of Milton, then supplying the pulpit, to continue their minister, offering him, in case he should be settled "one hundred acres of land and ten acres of meadow." [The land comprised the tract, whose boundaries extended from the bridge by the old cemetery, southwesterly to Duck Pond and the southern declivity of Bare Hill; thence southerly to Sudbury River; thence as the river runs to the bridge aforesaid.]

May 22, 1701. The town "voted to give a call to Mr. John Swift to abide and settle with us, the inhabitants of Framingham, as our legal minister." Chose Abial Lamb, David Rice, Benjamin Bridges, John Town, John Haven, Peter Cloyce, Sen., Samuel Winch and Thomas Drury to give the call in behalf of the inhabitants.

"Voted, To give Mr. Swift, in addition to the land and meadow, £60 in money yearly, and find him in his wood (thirty-five cords); to fence in twenty acres, with a good ditch where it is ditchable, and where it can't be ditched to set up a good five-rail fence; and also to give £100 towards the building of a house, one-fifth of the same in money."

The church was organized, and a pastor ordained October 8, 1701.

Externally, the meeting-house was not attractive, nor was it very comfortable within. But all the people had helped to build it, and all loved it as their sanctuary, and as marking the "God's Acre" where their dead were buried. With a small enlargement in 1715, it met the wants of the first generation of settlers, but the second generation and the new comers demanded something better, and with great unanimity in 1725 voted to build a new house on the old spot. Through the opposition of a minority, actuated by ideas of location, and in part by a purpose of land speculation, the building was delayed, and the question of location came near splitting the town asunder, and actually rent the church in twain.

1733. A presentment was issued by the Superior Court against the town, for not having a decent meeting-house in said town.

THE SECOND MEETING-HOUSE was built in 1735. It stood at the northeast corner of the centre Common, (just inside the present fence), fronting south. Size fifty-five by forty-two feet, thirty feet between joints. Had three stories. Doors on south, east and west sides. £550 was granted to build the house, and finish (the outside—though it was not painted till 1772. £350 was granted, at different times, for finishing the inside of the house. The pulpit was on the north side, and double galleries extended around the other three sides. The committee was instructed to

build a pulpit, a body of long seats below, leaving an alley between the men's and women's seats, lay the floors, make seats in the lower gallery, and two pair of stairs (men's and women's) to said gallery. The space next the walls under the galleries was reserved for pews.

The new meeting-house, though standing literally "in the woods," and surrounded by swamps, became a potent factor in town affairs, and as a converging point for the town highways; and between 1735 and 1745 these were readjusted and laid out in the main as they exist at present.

The population had increased from 350 to 900. The appropriations for ordinary town expenses in 1745 were £735, old tenor—£200 for highways, £300 for preaching, £135 for schools, £100 for incidentals.

The first pastor, Mr. Swift, died April 25, 1745. His successor, Mr. Matthew Bridge, was ordained February 19, 1746. The town granted him a settlement of £600, old tenor, and a yearly salary of £260. The expenses of his ordination were £109 8s. 2d.; including £96 9s. 4d. for keeping the ministers and messengers two days; £3 18s.; for chickens, £10 2s. for beef and £6 3s. for tavern bills.

As a result of the contest about the ministerial land, growing out of the claim and seizure of said lands by the lessee of Mr. Danforth, a divided sentiment had obtained in the church, aggravated by difficulties with the first pastor. The settlement of a new minister was the occasion of the culmination of the alienated feeling. The majority was uncompromising, and the minority seceded and took steps which led to the organization of a second Congregational Church in October, 1746. A small meeting-house was built, and Mr. Solomon Reed was ordained pastor of the new church in January, 1747. The new organization numbered over eighty members, and maintained a separate existence about ten years, when a part returned to the old church and a part united in forming the First Baptist Society in Framingham.

EMIGRATIONS.—Framingham contributed largely of her enterprising inhabitants towards the planting of colonies at several new centres. A considerable number of our citizens became grantees of Oxford in 1713. Among them were Town, Barton, Elliott, Larned, Gleason, Lamb and Stone. Some Mellen, How and Haven families removed to Hopkinton between 1715 and 1720. The Bents, Stevenses, Stones and Howes were among the early settlers of Rutland. Others become incorporated with Holliston in 1724, with Shrewsbury in 1727, with Grafton near the same date and with Templeton a few years later.

IN THE WARS.—The following Framingham names are found on the rolls of the expedition to Canada in 1690: John Jones, Francis Moquet, Daniel Mack Clafelin, Joseph Trumbull, Caleb Bridges, Daniel Mixer, Daniel Stone, Jr., Samuel Wesson, Jacob Gibbs. They enlisted in the Sudbury company, and were sharers in the grant known as the Sudbury-

Canada Grant of 1741, which was located in Maine, embracing the present towns of Canton and Jay. The survivors of this company, while prosecuting their claim in 1741, met several times at Mr. Moquet's tavern in Framingham.

FORTS AND GARRISON-HOUSES.—The war known as Queen Anne's War came on soon after the incorporation of the town. It was declared in May, 1702, and terminated by the treaty of Utrecht, March 30, 1713. This was a period of general alarm, in which Framingham participated; though few of our men were drafted into the service. In the expedition to Port Royal, September 16, 1710, Joseph Buckminster was captain of grenadiers in Sir Charles Hobby's regiment, and sailed in the brigantine "Henrietta." Others from Framingham in this expedition were David Rice, died April 20, 1711; Jonathan Provender; Benjamin Provender, died January 21, 1711; Joseph Adams.

Ample precautions were taken to meet hostile visits from the Indians, who scoured the frontiers. A sentry was posted on the top of Bare hill, during the time of public worship, on the Sabbath, to give alarm, in case of the appearance of the savages. Several forts or garrisons were built in different parts of the town, by neighbors clubbing together for mutual protection. From the vote of the town in 1710, for distributing the ammunition, it is probable that at that date there were not less than four such garrisons. The location of three of them is known. One stood near the then house of Joseph Buckminster, a little to the southeast of the present house of E. F. Bowditch; another at Salem End, between the present houses of James Fenton and Dr. Peter Parker, on the north side of the brook; a third on Mellen's Neck, to the north of Joseph A. Merriam's. The fourth was probably located near the south end of Learned's Pond. The Salem End fort was built of logs, with a watch-box above the roof at the gable end, and was surrounded by long pickets firmly set in the ground. This outer defence had a heavy plank gate, hung on wooden hinges. There was a stoned-up cellar underneath, where food could be stored, and a well just outside the gate. When an alarm was sounded, all the families within reach hurried to the fort. It is a current tradition, that on a dark night, when the neighboring families were collected here, with two watchmen in the sentry-box, the dogs gave warning that an enemy was near. The sentries fired in the direction whence the sounds came, and the alarm ceased. The next morning, blood was discovered near the gate, and tracked across the swale to near the Badger farm.

Mr. Barry gives the following: "An aged inhabitant of this town relates an instance of narrow escape from death, on a like occasion, which occurred to his grandmother. Having gone alone to the yard to milk, about two hours before sunset, she carefully looked around to see if there were Indians in the

neighborhood. Supposing herself secure, she proceeded to her work, and while in the act of milking, an Indian (who, as was their custom, had disguised himself with brakes, and crawled along on his belly) suddenly struck her in the back with a knife. She instantly sprung, and by the effort twitched the knife from the Indian's grasp; and before he could rise, had advanced so far, that she succeeded in reaching the house, with the knife in her back. An alarm was immediately given, by three successive discharges of a musket, which soon brought a reinforcement from the neighborhood of what is now called the Silk Farm, where was a garrison well provided with powerful dogs and arms. On pursuing, however, they found no traces of the Indian. The woman survived her injury."

The farmers went to their work in the fields, carrying with them fire-arms for protection. The husband would go with his wife to the barnyard, and watch while she milked the cows. "An aged woman of this town heard, from her grandmother, an account of this practice in her day; the latter adding, that her husband's presence was, after all, of no great service, for instead of watching for Indians, he would throw himself upon his back, and sing loud enough to be heard through the neighborhood." (Barry.)

At this date, and for many years after, one or more dwelling-houses in every district was built so as to be arrow-proof and bullet-proof. A description of the Learned house, which stood where Mrs. Katherine Eames now lives, will answer for all. It was a two-story house without a lean-to. The frame, *i. e.*, the sills, posts, girds and plates, were of heavy timbers. Instead of studs in the lower story, logs split in half were set upright, face and back alternately, so as to match by overlapping the edges. The space under the windows on the back side was filled in with bricks; on the front side and ends with two-inch planks. The lathing was nailed to the logs on the inside, and the boards were nailed in like manner on the outside. The doors were of planks, and the windows were provided with inside shutters.

Some of these garrison-houses were lined with planks instead of split logs. The Dr. Stone house, which stood on Pratt's Plain, near the arsenal; the John Eames house, built where is now R. L. Day's house; the Nathaniel Haven house, which stood west of Washakum Pond (the Charles Morse place, now in Ashland); the original Nathaniel Eames house, late Jonathan Eames', were plank-lined garrison-houses. A similar house, built about 1730, by Nathaniel Haven for his son, and placed on the opposite side of the road from the father's, is still standing, as is the Nathaniel Eames house. The former is owned by Joseph Morse.

FATHER RAULIE'S WAR.—This war lasted from 1722 to 1726. Its principal theatre was in the province of Maine; but the French Indians from Canada made assaults on the infant settlements along the entire

northern border of Massachusetts; and all our towns were called upon to contribute their quota of men. Framingham shared in these levies. Colonel Joseph Buckminster, then in command of the South Middlesex Regiment, sent troops to the relief of exposed points. Jona. Lamb was employed to transport military stores from Boston to Rutland, then a frontier town. In Sergeant Thomas Buckminster's "Rutland Scout" were David Pratt, Philip Pratt, and Thompson Wood, of Framingham. Gideon Bridges, Jeremiah Belknap, Hackaliah Bridges, Simon Goddard, Jeremiah Wedges and Benoni Hemenway were out in a detachment from August 25th to November 28, 1722. Daniel How, Benjamin Hemenway, Mark Whitney and Daniel Rider, of this town, served in Captain Samuel Wright's Rutland Company, from November 10, 1723, to June 10, 1724. Jeremiah Wedges and Uriah Clark were in service at Fort Dummer, Feb. 1st to May 31, 1724. In 1725, June to November, Daniel How, promoted to be sergeant, Thomas Walkup, Benoni Hemenway, John Stone and Samuel Hudson, apprentice to Jonathan Ragg, were in Captain Samuel Wright's company.

Master Roll of Captain Isaac Clark's Company of Troopers, out from August 21st to September 18, 1725:

Capt.	Isaac Clark,	From	Phineas Rice,	From
Lt.	Jona Lamb,	From	Moses Haven,	From

FRENCH AND INDIAN WARS.—This town was not the theatre of any of the thrilling events of these wars, which were the final struggle of the French Government to secure control of New England, in which that power utilized to the fullest extent the savage tribes of our northern border. Our men, however, took an active and honorable part in the defence of the frontiers. Joseph Buckminster, Jr., was colonel in commission and command of the South Middlesex militia at this date, and was prompt in enlisting and forwarding troops as called for by the provincial authorities.

In the memorable expedition against Louisbourg in 1745, in Capt. Ephraim Baker's company, Sir William Pepperell's regiment, were Lieut. John Butler, (who died in the service), Philip Pratt, James Clayes,

John Nixon (then eighteen years old), John Seaver, Robert Seaver, the father, and his two sons, Joseph and Benjamin (one of whom died at Louisbourg). Jonathan Youngman, Jonas Gleason and Sheans Berry were out in the same expedition.

Capt. Josiah Brown (of Sudbury) and his troopers were ordered out on an alarm September 23, 1747. On the muster-roll are the names of Lieut. Thomas Winch, Corp. Daniel Gregory, Clerk Daniel Stone, Trumpeters Jonathan Belcher and Nathaniel Seaver, Centinels Samuel Winch, Phineas Gibbs, Jonathan Maynard, Isaac Read, Benjamin Eaton, William Brown, John Bruce, Elias Whitney, John Hemenway, Micah Gibbs, Samuel Frost, Joseph Brintnall, Matthew Gibbs, John Gould, of Framingham.

Daniel Brewer, John Harris, Isaac How, John Parmenter and William Hutson were in Lieut. John Catlin's detachment at Fort Shirley, December 10, 1747, to October 31, 1748.

Thomas Walkup was in service during the war; was with Capt. H. Hobbs' rangers in '48, and at No. 4 with Capt. P. Stevens in '49.

John Edgell, an apprentice to Jacob Pike, of this town, was impressed, and joined Capt. Josiah Willard, Jr.'s company at Fort Dummer, February 10, 1748. He was in a detachment of men under Sergt. Thomas Taylor, marching from Northfield to the fort July 14th, when they fell into an ambush of French and Indians. Two of Taylor's men were killed, and eleven taken prisoners and carried to Canada. Edgell was among the latter. He lost everything of arms and clothing; and during the march to the north was subjected to great hardships, by which he was incapacitated from labor. He, with the other captives, was sold to the French, and remained in Canada till the last of September, when he was released and returned home.

Jonathan Brewer was out in the campaign of '49; stationed at Fort Dummer. He and John Nixon, both of whom were distinguished officers in the War of the Revolution, took their first lessons in camp and field service in this war.

The old French War ended in 1749, and what is known as the *Last French and Indian War* began in 1754.

The active militia of Framingham at this date numbered about 170 able-bodied men, and 90 on the alarm list. Of our men, not less than 160 were out at different times during this war—some of them of course being counted more than once, as having enlisted or been drafted for successive expeditions.

In the opening campaign of this war, in 1754, the following men of this town enlisted in Capt. John Johnson's company, and were out three months, viz., Jonathan Brewer, Simon Learned, Joseph Butler, Phineas Butler, John How, Eliab Brewer, John Pierce, Simon Gleason, Phineas Gleason, William Dunn, William Graves, Phineas Graves, Michael Haven, Simon Pratt.

John Nixon enlisted March 27, 1755, in Capt.

Ebenezer Newell's Roxbury Company, and received a commission as lieutenant; but before marching he was transferred to Capt. Jonathan Hoar's Concord Company, and was promoted September 8th to be captain. The company was attached to the Crown Point expedition, and was in service till December 17th. Jonathan Gibbs was lieutenant in the same company; Amos Gates was sergeant; Ebenezer Boutwell was corporal; George Walkup was drummer, and in a short time was promoted to be drum-major. Jonathan Treadway was taken sick and sent home on furlough November 3d, and died December 17th. Other Framingham men enlisted in Capt. Newell's company at the same time as Lieutenant Nixon, and were in the Crown Point expedition, and discharged January 3, 1756: Sergeant Shears Berry, Sergeant Isaac Gleason, Corporal Jonathan Belcher, Abijah Berry, Eben. Darling, John Darling, John Edgell, Simon Edgell, Thomas Nixon, Joseph Sever, Benjamin Tower.

Four men from this town joined Capt. Stephen Hosmer's company, for the Crown Point expedition, one of whom, David Sanger, died at Albany, December 15th. Three of our men were in Capt. John Taplin's company, same expedition; and six others enlisted in different companies, making forty-four in all who took part in this first campaign of the war.

In 1756 thirty-eight of our men were in the service. Capt. John Nixon and his company were stationed at the camp near Lake George. His brother Thomas, aged twenty, was ensign, and Simon Edgell, twenty-two, was sergeant. Benjamin Angier, William Puffer, Jacob Townsend, Isaac Allard and Ensign John Stone died in the service this year. Daniel Coller was taken captive by the Indians near Lake George. Francis Gallot was taken prisoner at Oswego, when that fort was captured, August 14th.

Captain Josiah Stone, with his troop of horse, was in service at Crown Point, September 15th to October 30th.

The year 1757 was long remembered as the year of great preparations and great disappointments. The expedition against Crown Point and Ticonderoga was popular, and officers and men enlisted readily—to be balked in their expectations by the order of Lord London, who sent them on a fruitless expedition against Louisbourg.

The following characteristic letter will explain itself:—

"FRAMINGHAM, July 18, 1757.

"May it please the Hon^{ble} His Majesty's Council:

"In obedience to an order from your Honours of the 10th of May, 1757, I have taken effectual care and caused every person, both upon the Alarm List and Trained band List, in the Regiment of Militia under my command and also the respective Town stocks in said Regiment, to be furnished with Arms and Ammunition according to law, and now ready with my whole Regiment, to meet and confront the French in any part of the Province, at a minute's warning, even with seven days' provisions.

"I am, Your Honours most obt. servt.

"JOS. ROCKMINSTER."

The regular companies from this neighborhood, last year, remained in the service; and most of our militia were called for in one or other of the "alarms" about Fort William Henry. Timothy Pierce, son of Thomas, was made prisoner at the taking of this fort and carried to Canada.

In 1758 seventeen Framingham men were with Col. Ruggles' regiment, mostly in Capt. John Nixon's company, on the New York frontier; Ensign Thomas Trowbridge and fifteen men were in Capt. John Taplin's company, raised for the reduction of Canada, and ten men enlisted in Captain Aaron Fay's company for the same destination. Micajah Gleason was in the expedition against Louisbourg.

Ralph Hemenway enlisted and marched with his company, but was taken sick and lay in the hospital for some time. The General Court allowed him for his extra expenses, £3. 5. 0.

1759. Niagara was invested by Gen. Prideaux, July 6 and was taken on the 24th. Ticonderoga was reached by the division under Gen. Amherst, July 22, and after a siege taken; when Crown Point was abandoned by the French, who retired to the Isle aux Noix, at the northern extremity of the lake.

Capt. John Nixon, with many of his old officers and men, turned out March 31, and was stationed at Worcester, in Col. T. Ruggles' regiment, till April 30. At this date his company was reorganized, and attached to Col. John Jones' (of Hopkinton) regiment, which marched under Gen. Jeffrey Amherst, for the invasion of Canada. The company was in service till Dec. 20. The Framingham names are as follows:

Capt. John Nixon.

Lieut. Joseph Gibbs.

Lieut. Thomas Nixon.

Ens. James Mellen.

Jonathan Pierce, aged 25.

Silas Hemenway, aged 21.

George Lilly, aged 21.

Nathaniel Brown, aged 18.

Oliver Robinson, aged 19.

Caleb Drury, Jr., aged 23.

Bezaleel Wright, aged 49.

Ebenezer Cutting, aged 17.

Jona. Hemenway, aged 19.

Elijah Houghton, aged 20.

Thomas Kendall, Jr., aged 45.

Isaac Fisk, Jr., aged 22.

John Matthews, aged 40.

Joseph Stone, aged 37.

Dan. Tombs, Jr. (Hopk.), aged 19.

Gilbert Deuch (Hopk.), aged 17.

Ebenezer Haven, aged 22.

Isaac Northgate, aged 25.

Allen Flagg, aged 18.

Daniel Haven, aged 14.

Joseph Bigelow, aged 24.

John Gould, aged 38.

Phineas Graves, aged 24.

Elijah Drury, aged 22.

Isaiah Taylor, aged 25.

Micah Gleason, aged 17.

Peter Gallot, aged 24.

Daniel Haven, aged 20.

Isaac Fisk, Jr., served through the campaign. While returning home he was taken sick between Crown Point and No. 4, and with great difficulty got as far as Mt. Grace (in Warwick), seventy miles from home. His father went with a horse to fetch him to Framingham. But he was so ill that he could not get on or off a horse without help; and the father was absent seven days, and he was not able to do anything for about six weeks. Expenses allowed by the General Court, £1. 1. 4.

1760. Ten Framingham men enlisted for the reduction of Canada, and were assigned to Capt. William

Jones' Co. (of Holliston), and were in service from Feb. 14 to Dec. 26.

Capt. Nixon's company was in service from April 15 to Nov. 17, 1761. It was a popular company, and numbered thirteen officers and eighty-eight privates. Eight of the officers and twenty-three of the men were from Framingham.

The small-pox was very prevalent in Canada at this time, and many of the American soldiers took it.

"The petition of Ralph Hemmenway, of Framingham.

"To his Excellency Fra Bernard :

"Humbly sheweth that his son, John Hemmenway, enlisted in 1761 under Capt. Brigham, of Southborough, Col. Whitecomb's regiment, and continued in service till the army broke up; and in his return took the small-pox, and was taken down six days after his return home, and continued thirteen days, and died; by reason of which your petitioner was put to great trouble and cost: he had to move his family half a mile distant; and could not take them home in less than three months; and paid two nurses £3.4., besides 16 shillings for necessities. Prays the Court to allow him, as others are allowed in such cases."

The General Court allowed him £4.4.

MISCELLANY. —1754. The first four months of this year are made memorable by the prevalence of a fatal distemper, known as the great "sickness." The town records notice the death of seven persons as victims of the disease; but it is nearly certain that other deaths occurred, which were not recorded: The Goddard family, living on the place now of J. H. Temple, and the families living north of the Mountain, appear to have been the greatest sufferers. Rev. David Goddard, minister, of Leicester, while on a visit here, was taken down, and died January 19. His mother died February 4th, and his father, the Hon. Edward Goddard, died February 9. Others of the family were sick but recovered. Joshua Hemenway, Jr., died January 30.

The distemper broke out in Holliston about the middle of December, and between that date and March there were forty-six deaths in a population of four hundred. "Four families were wholly broken up, losing both their heads. The sickness was so prevalent that but few families escaped. For more than a month there were not enough well to tend to the sick and bury the dead: tho' they spent their whole time in these services; but the sick suffered and the dead lay unburied; and that, notwithstanding help was procured, and charitable assistance afforded by many in neighboring towns. In the height of the disease there were from two to five burials each day." [Journal of Rev. Mr. Prentice.] The selectmen applied to the Legislature for aid, and "the sum of £26, 13, 4, was granted and paid out the public treasury to the selectmen of Holliston, (in consideration of the calamitous circumstances occasioned by the late mortal sickness that prevailed there), to be applied for the use and relief of such poor, indigent persons as may most need the same."

The number of deaths in Sherborn was between twenty and thirty.

1755, Nov. 18. A terrible earthquake took place a little after four o'clock, in a serene and pleasant night,

and continued near four and a half minutes. The shock was the most violent ever known in the country. Its course was from northwest to southeast, and it extended entirely across New England and the Middle States.

1756-7. During this winter snow fell to the depth of nearly six feet. The following extracts from a journal kept by Henry Eames, indicate the progress of the storms: "Dec. 17, 1756, snow 15 inches deep. Snow 20th day, 15 inches more. Snow 23d day, 7 or 8 inches more. Cold rain, 26th day; 27th, warm three days, then some rain. Jan. 3, 1757, cold N. W. snow, about two or three inches. Jan. 9, about noon very hot fog, then rain. 17th, very cold N. W. wind. 22d, rain, and thaw very fast. 24th and 25th, snow to the value of 10 inches; the night after, eight inches more. 30th and 31st, thawed away most of the snow that came last; the whole depth above 4 feet and 4 inches. Feb. 2, snow and hail seven inches deep. 5th, snow seven inches deep more. 6th, rain most of the day. 7th, snow three inches deep. 10th, S. wind and rain, till the snow wasted the most of it."

POLLS AND ESTATES, 1760.—From an official return it appears that at this date Framingham had

Number of ratable polls	301
Number of non-ratable polls	30
Number of dwelling-houses	198
Number of work-houses or shops	28
Number of mills	8
Number of Iron foundaries	1
Number of acres for life	7
Trading stocks	660 13 0
Money at interest	£936 17 4
Number of horses	162
do of oxen	263
do of cows	724
do of sheep	886
do of swine 3 months old	35
do acres of cow pastures	1,024½
do bushels of grain raised	20,665
do barrels of cider made	1,716
do tons of English hay	417½
do tons of meadow hay	1,021½

SLAVES AND COLORED INHABITANTS.—The number of slaves returned in the preceding table is seven. Perhaps no better place will occur for giving a list of the Negro slaves (so far as is known) owned at different times by Framingham families.

In 1716, John Stone held as a slave, Jane, wife of John Jackson, of New London, Connecticut, who commenced a process to recover her freedom.

Jane, a negro girl owned by Col. Buckminster, was baptized in 1722.

October 9, 1733, Thomas Frost bought of Jonathan Smith of Sudbury, for £60 current money, a negro man named Gloster, aged about 30 years.

Plato Lambert, born December, 1, 1737, was taken when an infant by Mrs. Martha Nichols of this town.

Primus, owned by Aaron Pike, was baptized in 1744.

Mereah, owned by widow Samuel Frost, was baptized in 1746.

Jenny, owned by Lieut. Thomas Winch, and Vilot owned by Jonathan Rugg, were baptized in 1746.

Flora, owned by Deacon Peter Balch, was baptized in 1747, and is named in his will made in 1755.

Flora, Brill, and Titus, owned by Mrs. Ebenezer Winchester, were baptized in 1748.

Hannover a negro man owned by Nathaniel Belknap, was baptized in 1755.

Phebe, owned by Captain Simon Edgell, was baptized in 1767. The following bill of sale refers to this Negro girl, who was assigned by Mrs. Balch to Captain Edgell. It will show the mode of conducting such transactions :

"KNOW ALL MEN by these Presents, that I Josiah Richardson Jun. of Sudbury in the County of Middlesex, gentlemen, for and in consideration of the sum of one Pound six shillings and eight pence, lawful money, to me in hand well and truly paid at the encasing hereof by Elizabeth Balch of Framingham widow, the Receipt whereof I do hereby acknowledge, and for the consideration thereof, *Do Sell* to the said Elizabeth Balch and to her heirs and assigns forever, *A Negro female Child named Phebe*, of about two years old, with her wearing apparel she now hath. And I the said Josiah Richardson Jun. to and with the said Elizabeth Balch and her heirs and assigns, that the said Negro Child is my Slave for Life, and that I have good right to sell and convey her in manner aforesaid for the term of her natural life; and that by force and virtue hereof the said Elizabeth Balch shall hold her the said Phebe for a slave for the term of her natural life. In Witness whereof, I the said Josiah Richardson Jun., have hereunto set my hand and seal this 5th day of August 1764.

"In presence of
"SAMUEL JONES," "JOSEPH RICHARDSON JUN. [Seal]"

Dill, a negro woman, in the service of Deacon Daniel Stone, died December 13, 1767.

Rev. Mr. Swift owned five slaves, which were disposed of in his will, dated September 1743, as follows : Francis, negro man, to his son, Rev. John Swift, of Acton; Guy, negro man, to his son-in-law, Rev. Phillips Payson, of Walpole; Nero, negro man, to his son-in-law, Ebenezer Robie of Sudbury. His two negro women, Dido, wife of Nero, and Esther, her daughter, he left for the service of his wife until her decease, after which they were to be the property of his daughter Martha, wife of Major John Farrar. Nero, or Nero Benson, was trumpeter in Captain Isaac Clark's troop in 1725. He married in 1731, Dido Dingo. He was a member in full communion of Mr. Swift's church; and in 1737 transferred his relation to the church in Hopkinton, showing that his spiritual liberty was not restricted. He was admitted to Rev. Mr. Loring's church in Sudbury, November 9, 1746, and died at Sudbury, July 3, 1757. He left a wife and three children, one of whom, William, was owned for a time by Joseph Collins, of Southborough.

Cato Hanker was owned by Joseph Haven, Esq., and was born in his house (the David Nevins place). He was a shoemaker, and received his freedom; and April 10, 1721, bought for ten shillings, ten square rods of land of Daniel Haven, where he built a small house. The house stood on the north side of the road, a short distance to the eastward of the David Haven house, on land now owned by the Sturtevants. In

his old age he was accustomed to tell that he had many times stood in the road east of his house, and "fished both ways" in time of high water. He left a son, William.

A noted character of the class under consideration was Prince, sometimes called Prince Young, but whose name is recorded as Prince Yongey, and Prince Jonar, by which last name he is noticed in the town records in 1767. He was brought from Africa when about twenty-five years old, having been a person of consideration in his native land, from which circumstance, perhaps, he received his name. He was bought by Col. Joseph Buckminster, Jr., and was afterwards owned by his son, Dea. Thomas Buckminster. He married, in 1737, Nanny Peterattucks of Framingham, by whom he had several children, among them a son who died young, and a daughter Phebe, who never married.

Prince was a faithful servant, and by his honesty, temperance and prudence, so gained the confidence of his first master, Col. Joseph Buckminster, that he was left with the management of a large farm during his master's absence at the General Court. He occupied a cabin near the turnpike, and cultivated for his own use a piece of meadow, which has since been known as Prince's meadow. He gave as the reason for choosing this spot, that it resembled the soil of his native country. During the latter part of his life he was offered his freedom, which he had the sagacity to decline, pithily saying, "Massa eat the meat; he now pick the bone." Prince shunned the society of persons of his own color. He always appeared in public armed with a tomahawk; yet he was a favorite with children, and would bear great provocations from them. He learned to read, and possessed the religious turn of mind characteristic of his race. In his last sickness, he remarked with much simplicity, that he was "not afraid to be dead, but to die." He passed an extreme old age in the family of Dea. Thomas Buckminster, and died December 21, 1797, at the age of about 100 years.—Barry.

Cato Titus was in Framingham in 1770.

Brin, commonly called Blaney Grusha, was at one time owned by Col. Micah Stone. He is named in the tax-list of 1757. He was in the military service during the Revolutionary War; was at the battle of Bunker Hill. He died February, 1820.

Another noted character, still well remembered by many of our inhabitants, was Jim Riggs. He was a mulatto, born in St. Domingo; was owned as a slave at the South; escaped from slavery, and after many adventures, reached this town. According to his own account he was hostler to Gen. (then Col.) Washington in the campaign of 1755, and was then nineteen years old. He was in service, in the Revolutionary War. He built a shanty near Lawson Buckminster's grist-mill, back of Mrs. Newell's house. He did jobbing, and made baskets in the families of Buckminster, Belknap, Horne, and the families of How, Eames and

Haven at the south part. He died at the house of John Wenzell, Sen., in 1828, and was buried in the South Cemetery. He must have been about ninety-two at his death.

Other colored men of note who have lived in Framingham, were Crispus Attucks, Peter Salem and Cato Hart. Their biography properly belongs to the next chapter.

The strong race prejudice existed in this town as elsewhere. Pews in remote corners of the meeting-houses were specially assigned for the occupancy of negroes. As late as 1826, when the First Baptist Society built its meeting-house at the Centre, pews for the exclusive use of colored people, were constructed in a kind of attic gallery, reached by separate stairs.

PHYSICIANS.—Dr. Bezaleel Rice commenced practice here as early as 1720, and continued till 1743.

Dr. Joseph Nichols lived in Framingham from 1730 to 1752.

Dr. John Mellen is named in the town records in 1747.

Dr. Ebenezer Hemenway was in practice in this town from 1750 to 1784. He lived on the Loring Manson place (now W. B. Ward), and had a grist-mill on the stream.

Jeremiah Pike, a noted bone-setter, was contemporary with Dr. Hemenway.

Dr. John Sparhawk was in Framingham in 1757.

Dr. Richard Perkins, H. U., 1748, son of Rev. Daniel Perkins, of West Bridgewater, was in practice here in 1758.

The wife of John Trowbridge, Sen., practiced as a midwife.

TAVERNS.—Jonathan Rice kept a tavern and store, a little south of S. D. Hardy's, 1708, and for many years. Jona. Maynard had a house of entertainment before 1723, at the Aaron Bullard place, south side of Bare Hill.

Daniel How opened a tavern about forty-five rods southeast of the old Charles Clark place, in 1726, which he sold in 1736, or '37, to Samuel Gleason, who continued the tavern for many years.

About 1728 Hezekiah Rice opened a tavern at the Captain Uriah Rice place (now A. S. Furber's).

Francis Moquet kept tavern at the old Buckminster stand (near E. H. Warren's store) from 1729 to 1735. He afterwards bought the place next east of O. F. Hastings', where he had a tavern and store as late as 1749. After Mr. Moquet left the Buckminster stand, Col. Joseph Buckminster took it, and spent his days here, as did his son, Joseph, and grandson, Deacon Thomas.

—Nichols kept tavern at the Nathan Goddard place.

John Trowbridge, Jr., had a public house before 1757, and for many years thereafter. January 11, 1759, he sent the following petition to the General Court: "The Petition of John Trowbridge, Jr., of Framingham, sheweth, that he entertained Capt. Endicott's Company on their march from Boston towards

Albany, in the year 1757; that on application to him he cannot obtain payment, although (as he is informed) the said Endicott has received the billeting money for his whole company; that he apprehends he is left without remedy against the said Endicott, by reason of his not being present with his company when they received their entertainment at his house; praying for relief."

"Jan. 11, 1759. Josiah Drury, of Framingham, petitions for license by the General Court, as an Innholder in said town, the person who lives in his neighborhood who had for some time kept a Tavern, not having renewed his license, and the selectmen judging the place convenient for that business." The Court of Sessions were impowered and directed to grant the license prayed for. The tavern was at the east part of the town.

WAR OF THE REVOLUTION.—October 21, 1765, the town "voted to instruct their representative in the General Court: 1. To promote and readily join in such dutiful remonstrances and humble petitions to the King and Parliament, as have a direct tendency to obtain a repeal of the Stamp Act. 2. That you do not give your assent to any Act of Assembly that shall imply the willingness of your constituents to submit to any taxes that are imposed in any other way than by the Great and General Court of this Province, according to the institution of this Government."

September 26, 1768, Mr. Thomas Temple was chosen to join the Committee in Convention at Faneuil Hall, in Boston, "to consult such measures as may be for the safety of the Province."

Crispus Attucks.—The quartering of troops on the town of Boston, and the exasperation of the people at such an attempt to overawe and coerce them, prepared the way for the tragic scenes of the 5th of March, 1770, known as *The Boston Massacre*.

A principal character in the bloody affray was a Framingham man.

Crispus Attucks, who is admitted to have been the leader of the party, was a mulatto, born near the Framingham town line, a short distance to the eastward of the State Arsenal. The old cellar-hole where the Attucks family lived is still visible. He was probably a descendant of John Auttuck, an Indian, who was taken prisoner and executed at the same time with Capt. Tom, in June, 1676. Probably the family had intermarried with negroes who were slaves, and as the offspring of such marriages were held to be slaves, he inherited their condition, although it seems likely that the blood of three races coursed through his veins. He had been bought by Dea. William Brown, of Framingham, as early as 1747. But he thus early acquired some ideas of the value of manhood and liberty, as appears from the following advertisement in the *Boston Gazette* of October 2, 1750:

"Ran away from his Master, William Brown of Framingham, on the 30th of September last, a milatto Fellow, about twenty-seven years of age, named Crispus, 6 feet 2 inches high, short curled hair, his knees nearer together than common, and had on a light coloured Beaver-skin coat, plain brown fustian jacket, or brown all-wool one, new buck-skin Breeches, blue yarn stockings, and a checked woolen shirt. Whoever will take up said Runaway and convey him to his aforesaid Master, shall have ten pounds old tenor Reward, and all necessary charges paid. And all Masters of vessels and others are hereby cautioned against concealing or carrying off said Servant, on penalty of the law."

A descendant of Dea. Brown says of him: "Crispus was well informed, and, except in the instance referred to in the advertisement, was faithful to his master. He was a good judge of cattle, and was allowed to buy and sell upon his own judgment of their value. He was fond of a seafaring life, and probably with consent of his master, was accustomed to take coasting voyages. The account of the time says, 'he lately belonged to New Providence, and was here in order to go to North Carolina.'"

He was of huge bodily proportions, and brave almost to recklessness. John Adams, who defended Capt. Preston at his trial, says: "Attucks was seen about eight minutes before the firing at the head of twenty or thirty sailors in Cornhill, and had in his hand a large cord-wood stick. . . . He was a stout fellow, whose very looks were enough to terrify any person. . . . when he came down upon the soldiers by the sentry-box, they pushed him off; but he cried out, 'Don't be afraid of them! They dare not fire! Kill them! kill them! Knock them over!'" At the firing he was killed instantly, two balls entering his breast. He was about forty-seven years old.

May 28, 1770, the town, by unanimous vote, declared against "the pernicious practice of purchasing and drinking Foreign tea, and also of trading with the importers of English goods;" and March 25, 1774, it was endorsed, "That we ourselves, or any for or under us, will not buy any teas subject to duty; nor knowingly trade with any merchant or country trader that deals in that detestable commodity." And the declaration was made: "And since such means and methods are used to Destroy our Privileges, which were purchased by the Dearest Blood of our Ancestors, those that stand foremost in a proper Defence of our Privileges, shall have our greatest Regards; And if any shall be so regardless of our Political Preservation and that of Posterity as to Endeavor to Counteract our Determination, We will treat them in the Manner their conduct Deserves."

May 18, 1774, the town chose the following Committee of Correspondence: Joseph Haven, Esq., Capt. Josiah Stone, Dea. William Brown, Ebenezer Marshall, Lieut. David Haven, Joseph Buckminster, Esq., and Maj. John Farrar.

Capt. Josiah Stone, Joseph Haven, Esq., and Dea. Wm. Brown were appointed delegates to the Provincial Congress, which met at Concord in October. Capt. Stone, with Dea. Brown as his substitute, was sent to the Second Congress; and Joseph Haven, Esq., and Capt. Stone were sent to the Third Congress.

September 9, 1774, the town voted "To purchase, at the town's expense, five barrels of powder and 5 cwt. of bullets or lead, for an addition to the town's stock."

September 30, 1774, voted "to purchase a chest of 25 fire-arms and two field-pieces, of such size as the Committee shall judge proper." Joseph Winch, Daniel Sanger, James Glover and Captain Benj. Edwards were the committee. This meeting was adjourned for four days, and public notice was given requesting that "every person above the age of sixteen years shall attend, to consider and determine with regard to the Militia as the whole body shall judge proper." A very full meeting convened, and it was voted "that there be two Militia Companies besides the Troop in this town: and that each company choose such officers as they judge best to have command in this day of distress in our Public Affairs."

The Provincial Congress, which met in October, adopted a plan, providing that all able-bodied men should be enrolled, and that those should assemble immediately, and elect their proper officers, and that these company officers should assemble as soon as may be, and elect field officers: and that the militia, so organized, should be subject to the orders of the Committee of Safety.

At a meeting of the town, November 8th, "it was voted to accept the resolve of the Provincial Congress relative to the Militia." And this led to the formation of two companies of *minute-men*.

Fortunately the papers showing the method of organizing these companies are preserved, and are herewith copied:

"We, the subscribers, from a sense of our duty, to preserve our Liberties and Privileges; And in compliance with the Resolves of the Provincial Congress, together with the desire of our superior officers, voluntarily enlist ourselves Minute-men, and promise to hold ourselves in readiness to march at the shortest notice, if requested by the officers we shall hereafter elect."

This paper was signed by Simon Edgell, Thomas Drury, Samuel Abbot, James Claves, Jr., John Fisk, Moses Learned, Matthias Bent, Jr., John Eaton, Lawson Buckminster, Frederick Manson, and others, to the number of sixty-eight.

This company organized December 2d, as appears from the following certificate:

"Those may certify that in Framingham, on the second of December, 1774, a number of men enlisted as Minute Men, and was formed into a company; then made choice of Mr. Simon Edgell captain, Thomas Drury first lieutenant, Lawson Buckminster second lieutenant, officers for said Company according to the directions of the late Provincial Congress in their Resolve in October 26, 1774.

"Signed

"SAMUEL BOLLARD,	} Field officers of this Regiment.
"MICHAEL STONE,	
"ABNER PERRY,	
"JOHN THOMERIDGE,	

"N. B. Said company consists of 70 men, including officers."

At the same time a second company, comprising sixty men, was enlisted, and organized in the same way. The officers elected were: Thomas Nixon, cap-

tain; Micajah Gleason, first lieutenant; John Eames, second lieutenant; Samuel Gleason, ensign; Ebenezer Hemenway, clerk. Some of the other leading names were: Peter Claves, Abel Childs, Moses and Nathaniel Eames, John Farrar, Jr., Jona. Hemenway, Jona. Hill, Needham Maynard, Asa and John Nurse, Jona. Temple, Joseph Winch.

These companies at once put themselves in active drill in the manual and field manoeuvre. Each man was required to provide himself with a musket, bayonet, cartridge-box and thirty-six rounds of ammunition. The companies met as often as once a week, and squads of men, by arrangement, would meet at the houses of the officers, and spend evenings going through the manual exercise. Says one of them: "I have spent many an evening, with a number of my near neighbors, going through the exercise in the barn floor, with my mittens on."

These minute companies were in part composed of the young and adventurous spirits among us; but many of our most substantial citizens enlisted, and were faithful in drilling, and ready to "fall in" when the emergency came.

1775. "January 2, 1775. At a town meeting duly warned, it was *voted*, that there shall be a contribution for the town of Boston under their present Distress. And Maj. John Trowbridge, Gideon Haven, Daniel Sanger, Benjamin Mixer, Ebenezer Marshall, David Patterson, Deacon William Brown and Dr. Ebenezer Hemenway were chosen a committee for that purpose; and next Wednesday and Friday at 1 o'clock were appointed as the times when the people should assemble at such several places as the committee shall designate, to bring in their subscriptions."

Capt. Josiah Stone and Deacon William Brown were chosen delegates to the Second Provincial Congress, to meet at Cambridge the 1st of February.

Capt. Benjamin Edwards, Joseph Nichols, Daniel Sanger, Capt. Amos Gates and Col. Micah Stone were chosen a Committee of Inspection, "whose duty it shall be to see that the Association of the Continental Congress be duly carried into full execution."

The Battle of Lexington and Concord.—April 19, 1775. The news that the British troops were on the march for Lexington and Concord appears to have reached Framingham before eight o'clock in the morning. The bell was rung, and the alarm guns fired; and in about an hour a considerable part of the two companies of minute-men and one company of the militia were on the way to Concord, which place they reached about noon. Capt. Edgell went on foot the entire distance, carrying his gun. Those living at the extreme south and west sides of the town were a little behind the party from the centre and north side.

Soon after the men were gone, a strange panic seized upon the women and children living in the Edgell and Belknap District. Some one started the story that "the Negroes were coming to massacre

them all!" Nobody stopped to ask where the hostile negroes were coming from; for all our own colored people were patriots. It was probably a lingering memory of the earlier Indian alarms, which took this indefinite shape, aided by the feeling of terror awakened by their defenceless condition, and the uncertainty of the issue of the pending fight. The wife of Capt. Edgell and the other matrons brought the axes and pitchforks and clubs into the house, and securely bolted the doors, and passed the day and night in anxious suspense.

Our companies reached Concord, not in season to join in the fray at the North Bridge, but in season to join in the pursuit of the flying British column. From the evidence preserved, it appears that a part of our men participated in the daring assault at Merriam's Corner, and that all had arrived and were active in the more successful attacks in the Lincoln woods. Captain Edgell and Captain Gleason had seen service in the Indian wars; they were cool and daring, and kept their men well in hand, which accounts for the few casualties of the day among them. Captain Nixon and our two captains, who acted in concert, well knew the need of discipline in harassing a retreating enemy, and that most casualties happen on such occasions from rashness and needless exposure. A single deliberate shot, from a man behind a safe cover, is effective, when a dozen hurried shots are harmless.

Our captains kept up the pursuit till the British reached and passed Cambridge; and then the men disposed of themselves as best they could for the night.

The following incident shows the value of presence of mind in emergency. In the pursuit from Concord, when on the borders of Lexington, Noah Eaton (2d), of this town, fired upon the British, and squatted behind a knoll to reload, just as a regular came up on the other side of the knoll, and as it proved, for the same purpose. Eaton instantly brought his gun to his shoulder, and demanded a surrender. The soldier laid down his musket, when Eaton proceeded to reload. Seeing the state of the case, the soldier remarked, "My gun is empty, but I could have loaded in half the time you take, as I have cartridges." The soldier returned to Framingham with his captor the next day, and continued in his service.

Josiah Temple, then living at Lechmore Point, Cambridge, started with a detachment of militiamen to intercept the British, on their return, and in the severe skirmish which took place just on the line between Lexington and Cambridge, received a musket-ball in the shoulder, which he carried to his grave.

Daniel Hemenway, a member of Captain Edgell's company, was the only one of our minute-men who was wounded that day; but he kept on with his comrades to Cambridge, and remained in the service fourteen days.

Ebenezer Hemenway, of Captain Gleason's com-

pany, shot a British soldier named Thomas Sowers, near Merriam's Corner, and took his gun, which he brought home with him.

As will appear from the muster-rolls, all our Framingham men followed the British as far as Cambridge, and passed the night there. And only *eight* of the total of *one hundred and fifty-three* returned home the next day. The rest remained in the service for longer or shorter periods, as indicated below.

Captain Edgell took seventy-seven men to the scene of action, thirty-eight of whom returned at the end of four days; the others continued in the service from ten to nineteen days. Captain Edgell was out twenty-two days. The second company marched under Captain Micajah Gleason, Captain Nixon having been promoted. This company numbered forty-nine men, who were in service from three to twenty-eight days. Captain Jesse Eames took twenty-four men of the militia to Concord and Cambridge that day, most of whom were out ten days.

It was at the earnest entreaty of the Committee of Safety and the general officers, that Captain Edgell, Captain Gleason and Captain Eames, and so large a part of our minute-men and militia remained at Cambridge. The Executive Committee had summoned the Provincial Congress to meet April 22d; and they begged these minute companies to hold the ground till more permanent companies could be enlisted.

On the 23d the Congress resolved to call on Massachusetts to furnish 13,500 men for eight months' service.

On that day Captain Gleason resigned command of his minute company, and immediately raised from his own men, and other companies on the ground, a company of fifty men, and reported for duty. His commission is dated April 23d, and his company was that day mustered into service.

The next day, Lieut. Thomas Drury, of Captain Edgell's company, resigned his commission, and commenced recruiting a company for the eight months' service. On that and the few following days he enlisted sixty-three men. His commission as captain is dated April 24th, and his company drew pay from that date.

In all, eighty-nine Framingham men were enlisted for the eight months' service in 1775.

April 24th the Committee of Safety sent ten sets of beating papers to Colonel Jonathan Brewer, a native of Framingham, but who, since 1770, had resided in Waltham, on the border of Watertown. He promptly raised a regiment, composed of eight companies and 400 men.

The officers of the regiment, all of whom enlisted April 24th, were:

Colonel, Jona. Brewer, of Waltham, born in Framingham.
Lieutenant-Colonel, William Buckminster, of Barre, born in Framingham.
Major, Nathaniel Cudworth, of East Sudbury.
Adjutant, John Butler, of Peterborough.
Quartermaster, Charles Dougherty, of Framingham.

Surgeon, D. Townsend, of Boston.

The same day, April 24th, Captain John Nixon was tendered a commission as colonel of a regiment; and on the 27th the Committee of Safety ordered that he receive nine sets of "beating papers," which he was to send to such men of his acquaintance as were considered suitable to be commissioned as captains. The field officers of the regiment when organized were: Colonel, John Nixon, of Sudbury; Lieutenant-Colonel, Thos. Nixon, of Framingham; Major, John Buttrick, of Concord; Adjutant, Abel Holden, of Sudbury; Quartermaster, John White, of Haverhill; Surgeon, Isaac Spofford, of Haverhill; Surgeon's Mate, Josiah Langdon, of Sudbury. The officers of the regiment drew pay from April 24th, and it was recognized by General Ward, and sent by his orders on several important expeditions; though it appears not to have mustered into service, *as a regiment*, till June 5th.

April 24th, nine sets of beating-papers were issued to Colonel David Brewer, a brother of Colonel Jonathan, then a resident of Palmer. June 15th, the Committee of Safety reported that "Colonel David Brewer had raised nine companies, amounting, including officers, to 465 men, who are now posted at Roxbury, Dorchester and Watertown." This regiment was commissioned June 17th. The lieutenant-colonel was Rufus Putnam, of Brookfield; the major was Nathaniel Danielson, of Brimfield; the adjutant was Thomas Weeks, of Greenwich; with Ebenezer Washburn, of Hardwick, quartermaster, and Estes Howe, of Belchertown, surgeon. Micah Dougherty, of this town, enlisted for the eight months' service in Captain Jona. Danforth's company, in Colonel David Brewer's regiment.

Samuel Brewer, a native of this town (brother of Jonathan and David), but then living in Rutland, enlisted in the eight months' service, was appointed adjutant-general of the troops in Roxbury under General Thomas. He was wounded at Bunker Hill, June 17th. In 1776 he raised and commanded a regiment which served at Ticonderoga. He, with his regiment, was in the campaign of 1777, which ended with the defeat of Burgoyne.

Battle of Bunker Hill.—By returns dated June 17, 1775, it appears that Colonel Jonathan Brewer's regiment comprised eight companies, and numbered 371 men. Col. John Nixon's regiment had eight companies, and numbered 390 men. Both these regiments took a leading part in the Battle of Bunker Hill. Colonel Brewer was ordered by General Ward early in the morning to go to the support of Colonel Prescott. About half of his regiment was absent on leave or in camp at Brookline, so that he went upon the hill with only about 180 men. The regiment took a position at the left of the redoubt, in the open field, which it held through the day, leaving the line of battle only when General Warren, who stood at the head of the rail-fence breast-work—between the regiments of Brewer and Nixon—deemed it prudent to

retire. Colonel Brewer received a painful wound; Lieutenant-Colonel Buckminster, just before the retreat, received a dangerous wound from a musket-ball entering the right shoulder and coming out in the middle of his back, which made him a cripple for life. Adjutant Butler was wounded in the arm. Seven of the regiment were reported killed, and eleven wounded.

Colonel Nixon's regiment was sent to the support of Prescott about the same time as Colonel Brewer's. His men helped to build the hay breastwork, took position behind it next to Colonel Brewer, and held their ground till the British got possession of the gap. *Swett* states that Colonel Nixon marched upon the field with three hundred men. The two Framingham companies—Captain Drury's and Captain Gleason's—who were attached to the regiment, had respectively sixty-three and fifty men. A part of Captain Drury's men were sent to the redoubt to support Prescott just before the British charge. One of them, Peter Salem, who shot Major Pitcairn, was a member of this company. The rest of the company was at the head of the rail-fence. Sergeant Ebenezer Eaton, of this town, happened to have position near where General Warren stood during the action, started to leave the defences with him, was close to him when he received the fatal shot, and, with some comrades, attempted to carry him off the field; but the British onset forced them to leave the body. Colonel Nixon was severely wounded during the third attack and had to be carried off the hill. Lieutenant William Maynard, of Captain Drury's company, received a bullet in his hip, which he carried to his grave. Three of this regiment were reported killed and ten wounded. Most of these casualties happened after the men left the breastwork. The reason why the shots of the British did so little execution during the action is found in a statement made by Sergeant Eaton: "The British fired over our heads; the tops of the young apple-trees where we stood were cut all to pieces by their bullets."

After the 17th the several regiments went into camp at different points. Colonel David Brewer remained at Roxbury through the season, where he probably died late in the autumn. Colonel Jonathan Brewer's regiment was stationed at Prospect Hill. He remained here till November 16th, when, by some new arrangement of companies, he was requested to transfer the command of his regiment to Colonel Asa Whitcomb. For this graceful act he was thanked by the Provincial Congress; and General Washington issued an order the same day: "That Col. Jonathan Brewer be appointed Barrack Master untill something better worth his acceptance could be provided." He held this appointment till the army moved to New York the next year. Colonel John Nixon and his regiment went into camp on Winter Hill, where he remained until March, 1776, and probably held the post till the army moved to New York. He was com-

missioned brigadier-general August 9, 1776, and was put in command of Governor's Island. On the evacuation of New York City his brigade moved up the North River and took a leading part in the campaign of 1777 against Burgoyne; was at Stillwater September 19th, and at Saratoga October 11th. General Nixon was a member of the court-martial for the trial of General Schuyler October 1, 1778. Owing to ill-health, occasioned by his wounds and his long-continued service in camp and field, he felt compelled to resign his commission; and September 10, 1780, he received an honorable discharge.

On the promotion of Colonel John Nixon, his brother, Thomas Nixon, was put in command of the regiment. He took an active part in the campaign against Burgoyne, and was stationed at various important points on the North River from 1777 to the close of the war, when he was honorably discharged. Captain Micajah Gleason followed the fortunes of his colonel, and was killed at White Plains in the fall (October 28th), of 1776.

An order was issued by the Council of War, December 1, 1775, for raising 5000 men "to defend the fortifications at Cambridge and Roxbury." In response Captain Simon Edgell raised a company of thirty-three men and reported for duty at Roxbury, where he was in service six weeks. Immediately on his return he raised a company of eighty-five men, and served at Cambridge till April 1st. In command of a company of seventy-eight men, he marched for Ticonderoga, August 15, 1776, and was in service till December 4th. The company was attached to Colonel Samuel Brewer's regiment. Captain Edgell was in service in Rhode Island in 1778.

Sergeant Frederick Manson and a squad of ten Framingham men were in service at Noddle's Island from June 19 to December 2, 1776. As sergeant-major he and Drum-Major Joshua Eaton were in the battle of Stillwater, September 19, 1777.

Captain Joseph Winch raised a company of ninety men, and marched August 14, 1777, via Bennington, for service in the Northern Department, and was out till December 10th. This company took part in the battles of Stillwater and Saratoga.

Lieutenant Jonathan Temple, of this town, enlisted in Captain John Walton's company, Colonel E. Brooks' regiment, and was in service on the North River through the year 1776.

Captain John Trowbridge was in service "in the Jerseys" for three months, in 1777. Uriah Rice was a member of the company.

In the campaign of 1777 Framingham had, in the regular service (not including Colonel T. Nixon), nine commissioned officers, viz.: Captain John Gleason, Lieutenants Peter Claves, Charles Dougherty, Micah Dougherty, Cornelius Claflin, Samuel Frost, Nathan Drury, Jonathan Maynard, Luther Trowbridge.

The First Three-Years' Men.—By a resolve of January, 1777, the towns were required to furnish a quota

of men, enlisted or drafted for three years, to be attached to the regular army. Framingham enlisted fifty-three men under this call.

In Colonel Abner Perry's regiment of militia, ordered to Rhode Island on an alarm, July 27, 1780, were Lieutenant-Colonel John Trowbridge, Major John Gleason, Adjutant James Mellen, Jr., Quartermaster Frederick Manson, of this town. In addition, same service, were Captain Nathan Drury and thirty-six men, Captain David Brewer and twenty-three men, Captain Lawson Buckminster and forty-nine men. Lieutenant John Mayhew and thirteen men were in service in Rhode Island from June 3d to September 30th.

Lieutenant Peter Claves, promoted to be captain, and ten Framingham men served during the last years of the war in Colonel Thomas Nixon's regiment. Lieutenant James Mellen and thirty-four men were in Captain Staples Chamberlain's company, on a forty days' expedition to Tiverton, R. I., in the spring of 1781.

Lieutenant Joshua Trowbridge and seven Framingham men were in service July 5th to November 30, 1781.

Under the call of December 2, 1780, for "the last three-years' men," this town raised fifty-three men; of these twenty-seven were re-enlistments, or those who originally enlisted for the war. The difficulty of raising these men is seen from the fact that the town voted to raise £50,000 to hire soldiers. The committee was authorized to agree to pay the men in money or cattle, and to pay the advance wages before they should march. The following receipt shows the large bounties paid:

"We the subscribers having enlisted ourselves into the Continental Army for the term of Three Years, and do hereby acknowledge to have received of the Town of Framingham for that service, the sum of one hundred dollars hard money per year—We say, Received by us,

"April 16, 1781.

"ABEL BENSON.
"JOHN FREEMAN.
"JAMES DOSE.
"SOLOMON NEWTON.
"EPHRAIM NEWTON.
"NATHANIEL PRATT.
"JOHN PRATT.
"EPHRAIM PRATT."

1780. *Beef*.—"October 16. Capt. Joseph Eames, Lieut. Samuel Gleason, Jr., and Lieut. Joseph Mixer were chosen a committee to purchase the Beef now called for to supply the army; and the town granted the sum of £17,000 to pay for the same, which sum was ordered to be put into the next town rate."

"November 27. Another order for Beef for the army was issued. The amount required of Framingham was thirty-one hundred weight. And December 4th, a further order required 21,431 pounds. And the town granted the sum of £35,000 to purchase the Beef now called for."

1781. February 1st. The town was called upon to furnish a quantity of shoes, stockings, shirts and

blankets for the use of the army. The bill was as follows:

"The Selectmen of Framingham Dr.		
To 39 pairs of shoes @ £40 old tenor	£1560
To 39 pairs of hose	24' old tenor	936
To 39 pairs of shirts	40' old tenor	1560
To 19 blankets	85 old tenor	1805

Charges for collecting said clothing	£586 1
Charges for transporting the same	60

£6182

"Allowed £6182 old currency, which is equal to £154.11, new emission bills."

In June an order was received requiring the town to furnish 8854 lbs. of Beef for the army; and the sum of £220, new emission, was granted to pay for the same.

DEATHS.—The following is a list of the men from this town who died in service during the Revolutionary War. Probably it is not complete; for it is a singular fact that, with few exceptions, the company and regimental rolls, now preserved, contain no detailed record of casualties. The only reference to such is to give in figures the number of the dead, wounded and missing.

Cesar Boston, died; served 21 months and 2 days.
Rev. Matthew Bridge, died of dysentery.
Capt. Elijah Claves, died at White Plains, 1775.
David Cutting, wounded, and perished in a burning barn.
Samuel Eames, died of disease.
Cornius Fairbanks, killed at Bunker Hill.
Francis Gallot, died at Stillwater.
John Gallot, died of disease.
Charles Gates, died of disease.
Capt. Micajah Gleason, killed at White Plains, October 28, 1776.
David Haven, killed near Saratoga, October 8, 1777.
Isaac Hemenway, died January 31, 1778.
Job Houghton, died 1779.
Moses Learned, Jr., died September 17, 1782.
Daniel Maxwell, killed; served 27 months and 17 days.
Nathan Mixer, killed in battle at Bennington.
Solomon Newton, Sr., died in 1782.
Josiah Nurse, d. at Seaconk, R. I., September, 1778.
John Pike, Jr., died of disease.
Moses Pike, killed August 28, 1775.
Jonathan Rice, died of disease.
John Holbrook Rice, died at Danbury, Ct.
Peter Rice, Jr., died at Hackensack, September 15, 1780.
Joseph Temple, died of disease.
Josiah Waite, died of disease.
Ephraim Whitney, k. by accident, September 16, 1775.
Jonathan Whitney, killed in battle.

Captivity of Lieut. Jonathan Maynard.—Jonathan Maynard, of this town, then a student in Harvard College, enlisted in the eight months' service April 24, 1775, in Capt. Thomas Drury's company. June 17th, he was with his company at the battle of Bunker Hill. The next year he went with the army to New York, and was in the campaign of '76 and '77 on the North River, and in the battles of Stillwater and Saratoga. In 1778, he was lieutenant in one of the companies in Col. Ichabod Alden's Seventh Mass. Regiment, Gen. J. Nixon's brigade. While Alden's regiment was stationed at or near West Point, viz., May 30, 1778, Lieut. Maynard with a small party went out

on a foraging excursion to a considerable distance from the camp, when they were set upon by a scouting band of Indians, and after a sharp skirmish taken prisoners. They were conducted for a distance of several miles away from the American lines, when a halt was made, and all but the lieutenant were tomahawked and scalped. As he wore a sword, he was considered a great prize, and was conducted to the camp of Brant, their chieftain. The precise locality of this chief's camp at this date has not not been ascertained.

After a brief consultation, it was decided to burn the captive. The fagots were collected, and he was tied to a tree, and the fire was ready to be kindled. Though a stranger to all in the group, and ignorant of the fact that the Indian chief was a Free Mason, as his last hope, Lieut. Maynard gave the Master Mason's sign of distress. The sign was recognized by Brant, who was standing by; and he ordered the execution to be postponed. Maynard was put under guard; and in due time, with other prisoners, was sent to Quebec. He was held in captivity here till December 26, 1780, when he was exchanged.

Lieut. Maynard rejoined his company at West Point, January 4, 1781. His old colonel, Alden, had been killed by the Indians at Cherry Valley, November 11, 1778, and the regiment was in command of Col. John Brooks. Maynard received his lieutenant's pay of £8 per month for the full time of his captivity. A few weeks after his return, *i. e.*, January 25, 1781, he was promoted to the captaincy of his company (his commission is dated February 22d), and continued in the service at various points on the North River, and as recruiting officer, till November 19, 1782, when he resigned and received an honorable discharge.

Peter Salem.—He is sometimes called Salem Middlesex. He was a slave, originally owned by Capt. Jeremiah Belknap. He was admitted to the church under the half-way covenant Aug. 16, 1760. He was sold by Capt. B. to Major Lawson Buckminster, before the war. He served as a minute man in Capt. Edgell's company April 19, '75. April 24th he enlisted in Capt. Thomas Drury's company for the eight months' service. He enlisted for three years Jan. 1, 1777; and re-enlisted April 16, 1782, for a like term.

As no slave could be mustered into the army, his enlistment by consent of his master worked a practical emancipation. And there is no doubt, from the well-known patriotism of Major Buckminster, that he cheerfully assented to the enlistment.

Peter served faithfully as a soldier, during the war, most of the time in Col. Thomas Nixon's regiment, and as the colonel's body servant. He was in the battle of Bunker Hill June 17, 1775. During the action he, with others, was sent from Capt. Drury's company, as a support to Col. Prescott in the redoubt. He reached the redoubt just as Prescott's men had spent their last powder; and with a single

charge in his gun, and perhaps another in his powder-horn. Just then, in the language of Judge Maynard, "I saw a British officer . . . come up with some pomp, and he cried out, 'Surrender, you — rebels!' But Prescott . . . made a little motion with his hand, and that was the last word the Briton spoke; he fell at once." There is a concurrence of testimony which leaves no doubt that this shot was fired by Peter Salem. Major Pitcairn fell into the arms of his son, who bore him off to his boat, and thence to a house in Prince Street, Boston, where he died. The loss of so gallant an officer at this critical moment formed one of the most touching incidents of that eventful day.

At the close of the war, in 1783, Peter married Katy Benson, a granddaughter of Nero, and built a small house on land then owned by Peter Rice, on the exact spot where now stands the dwelling-house of Moses M. Fiske, near Sucker Pond. He lived here till 1792 or '93. But his marriage proved an unhappy one; and Peter left his native town and settled in Leicester.

On his return to Framingham, Peter was not treated in all respects like the common poor; but to the credit of his former masters be it recorded, that Maj. Lawson Buckminster and Capt. Jeremiah Belknap, together with Samuel Hemenway, gave a bond to the town "to support him during his natural life." He died at the house of William Walkup, Sen., Aug. 16, 1816, and was buried in the north central part of the old cemetery, where a suitable monument has lately been erected by the town to his memory.

It is a fact of interest, as illustrating the prevalent sentiment of the time, and as a contrast with the present, that the men who were trusted with the lead of public affairs at the opening of the Revolution had reached, or passed, the period commonly designated *middle life*. Thomas Temple, who was sent as a delegate of the town to attend the *first general Convention in Faneuil Hall*, to inaugurate resistance to the oppressive measures of the British ministry, was 54 years old at the time of his election. Joseph Haven, chairman of the first Committee of Correspondence and delegate to the first Provincial Congress, was 76; Josiah Stone, his associate in both trusts, was 50; Dea. William Brown, also associated with them, was 51. Ebenezer Marshall, 53; Joseph Eames, 55; Benjamin Eaton, 51; John Farrar, 56; John Trowbridge, 45; Dr. Ebenezer Hemenway, 65, were the active members of the more important committees. Joseph Nichols, the youngest of the political leaders, was 37. John Nixon was 48 when he led his minute-men to Concord in '75; Simon Edgell was 42; Thomas Drury was 40; Micajah Gleason, the junior among our military leaders that year, was 35.

Deaths by Lightning.—An incident occurred this year (1777) which made a lasting impression on the public mind. While Mr. Wheaton was supplying the pulpit, he negotiated for the purchase of a horse; and arranged with Mr. John Claves, who lived at Salem

End, where is now the L. O. Emerson house, to examine and try the animal. June 3d, a little after noon, some of the neighbors came together to witness the trial. Besides Mr. Claves, there were present Abraham Rice, Peter Parker, Simon Pratt and his son Ephraim. Mr. Parker mounted the horse, and had ridden to a considerable distance away, when a small cloud suddenly came up from the northwest. On his return, the company, who had been in the house during his absence, came out towards the road. A few drops of rain were at this moment falling. As Mr. Parker rode up, Mr. Claves stepped outside the gate, leaving the others leaning against the fence within; and just as he took the horse by the bridle, the lightning struck the party, and prostrated them all on the ground. Mr. Claves, Mr. Rice and the horse were instantly killed. Mr. Parker lay as if dead, but gradually recovered consciousness, though a long time elapsed before he fully regained his health. The boy, who was standing a short distance from the rest, recovered immediately. Mr. Pratt came to slowly, and suffered from the stroke for a long time. Mr. Claves was struck in the head, the fluid passing along the neck and breast and down both legs, leaving a well-defined mark, but not injuring his shoes. The horse was also struck in the head, and marks of the lightning were visible down both fore legs. The party all wore woolen clothes, and were all singed in body and dress. There was but this single flash of lightning from the cloud, and only a few drops of rain. Mr. Rice was in his eightieth year, and Mr. Claves was forty-one. The sad event was commemorated in an elegy written by Miss Lydia Learned, which was printed and widely circulated. Two stanzas are inscribed on the grave-stone, which may be found in the old cemetery.

Bounty Land.—By an act of the Massachusetts Legislature passed in 1801, 200 acres of land in the Province of Maine were granted to such officers and soldiers as enlisted in this State and served through the war. A large number of our men were entitled to this bounty land; and probably many of them received it. It is known that three men, then living in Framingham, received a title to land under this act, viz.: Cato Hart, John Harvey and Isaac How.

Cato Hart, a negro, enlisted for the war February, 1777, in the Framingham quota; was attached to the Seventh Continental Regiment, and was honorably discharged at the disbanding of the army. His residence in 1805 was in Mendon. He received a deed, dated August 6, 1805, of 200 acres of land, being Lot No. 12, in Mars Hill, near the boundary between Maine and New Brunswick, "for patriotic services rendered in the Revolutionary War." He assigned the deed to Jona. Maynard, Esq. The grant was included in the tract which was surrendered to Great Britain by the Ashburton Treaty of August 20, 1842. This lot, and the other granted lots and townships included within the said surrendered territory, were

recently surveyed and located, and the titles obtained in some way, by a sharp claimant, who received from the United States Government large sums of money in payment for the same.

John Harvey, then of Southborough, afterwards of Framingham, enlisted among the *First Three-Years' Men*, and served through the war. His deed of 200 acres bears date August 6, 1805; was assigned to Esq. Maynard; and full payment for the land was recovered of the United States Government, by the claimant above referred to.

Isaac How (wife Lois) sold his 200 acres, being Lot No. 68 at Mars Hill, in 1833, to Lawson Buckminster, for \$100.

The population of the town at the close of the war was about 1500, and from the loss of many of its young men, and the unsettled habits of those who survived, the increase was slow for the next twenty years. The heavy drain of money, though cheerfully borne, for payment of bounties to soldiers, and clothing and supplies for the army, in connection with the depreciation of the circulating currency, left most of our families in greatly reduced circumstances; and the main thought and anxiety was how to avoid expenses and repair damages, and get on one's feet again. The soldiers came home poor, many of them sick, most of them with plans of life deranged, and with discouraging prospects for the future. The State levied taxes; and the town levied taxes; and real estate owners were called to bear the heaviest burden of this direct taxation. The farmer could not conceal his farm from the assessor, or the tax-gatherer, or the sheriff. And this pressure upon the agricultural industry accounts for the distress, and disorders, and opposition to State taxes, which showed itself in the central and western counties, and ripened into open resistance. Demagogues and adventurers—always the product of "hard times"—took advantage of these unsettled and irritating conditions to stir up strife, and gain notoriety and influence. The culmination of affairs was what is known in history as the "Shays' Rebellion."

Our town records furnish only the following items in relation to this uprising: January 15, 1787, upon summons issued by the commissioned officers, the three militia companies of this town met, and enlisted the number of men called for. They rendezvoused at Weston January 20th; were with the forces under command of Major-General Lincoln, and marched as far as Worcester. Our men returned home February 27th. Framingham was called upon to furnish stores for this expedition, and sent 2296 pounds of bread, 1120 pounds of beef, and five bushels of beans, for which the State allowed the sum of £36 13s. 6d.

Among the losses suffered by this town in the war none was more seriously felt than that of the pastor of the church, Rev. Mr. Bridge. As before stated, he was ordained in 1746. Under his ministry religion

flourished, personal animosities were healed, sectional divisions were largely united, and all the best interests of society were nurtured. He was considerate and conservative, and a true patriot. Duty to his country, and duty to the large number of his people then in the army, induced him to tender his services to the Government, and he was appointed a chaplain to the regiments stationed at Cambridge in the summer of 1775. While in the discharge of his duty he was seized with an epidemic disease which prevailed in the camp, of which he died shortly after his return home, Sept. 2, 1775, in the fifty-fifth year of his age, and thirtieth of his ministry.

In the general disturbance and uncertainty of the times the pastorate remained vacant for several years. The town was ready to offer a minister a fair salary in the then currency, or in farm products; but the values of both currency and products were constantly changing; what was a fair salary to-day might be of little marketable value to-morrow. Mr. David Kellogg began his labors as candidate and pulpit supply in April, 1778, his pay for each Sabbath being "the price of eight bushels of Indian corn at market." He received a call to settle in the fall of that year, on a salary of 100 pounds per annum, a fifth part of which was to be paid in pork, and a large portion of the balance in beef, cider, sheep's wool and flax. In July, 1780, the call was renewed, 100 pounds being the stipulated salary, "to be paid in Indian corn at 3 shillings per bushel, and rye at 4 shillings." He was ordained January 10, 1781.

The peculiar terms of payment of Mr. Kellogg's salary made it a matter of nice calculation how much he should annually receive. Hence it was customary each year, at the annual town-meeting, to choose a committee to confer with the pastor, and determine the present prices of corn and rye, and how much more or less than £100 is equivalent to the original agreement. In April, 1809, such a committee reported: "That 250 bushels of rye at 6s. per bushel produced \$250, and 333½ bushels of corn at 5s. amount to \$277.78, making \$527.78, which quantities of grain are agreeable to the original contract, and with which sum Mr. Kellogg will be content." In 1821 a similar committee reported as follows: "That estimating rye at 75 cts. per bushel, and corn at 50 cts., Mr. K.'s salary, according to the terms of his contract, amounts to \$375.17. And in consideration that he, during a considerable part of the late war, when corn and rye were worth from one to two dollars per bushel, consented to receive a much less sum than was due by his contract, your committee have thought it reasonable to recommend a grant of \$450,"—which sum the town voted to appropriate.

The ministry was a power in society at that day; and one of the important influences which counteracted the attendant evils of war, and helped to tide over its effects, was the broad conservatism and high character and Christian labors of Mr. Bridge and his

successor. Always, but especially in the time of social crises and convulsions, the great facts and truths of our holy religion lift a man's thoughts above his earthly environments, and the godly life of its ministers points and leads the way to the better realities of heaven. Mr. Kellogg continued the only settled minister in town till 1807, when Mr. Charles Train commenced preaching for the Baptists, from which date the two held contemporary pastorates for about a quarter of a century. To these two men Framingham owes directly, in a large degree, her present high standing in intelligence, morals, and that general thrift which is not found except in connection with culture and virtue.

SINGING.—This part of religious worship had an important place in the Sabbath services in our fathers' time. In Mr. Swift's day few, except the pastor and deacons, had psalm-books; and it was customary for the minister to read the psalm in full, when the senior deacon would rise, face the audience, and repeat the first line, which would be sung by the congregation; and so on to the end of the six or eight stanzas. Before Mr. Bridge's day, an edition of the Psalms and Hymns was printed, containing a collection of thirty-seven tunes inserted at the end. Mr. Bridge was a good singer, and was accustomed to meet such of his people as chose to come for instruction and practice in music. July, 1754, a vote was passed by the church, "desiring seven brethren, viz., John Cloyes, Benjamin Pepper, John Farrar, Beza-leel and David Rice, Samuel Dedman and Daniel Adams, together with Mr. Ebenezer Marshall, to take immediate care to qualify themselves to set the psalm in public; and as soon as they are properly qualified, to lead the assembly in that part of Divine Worship."

The first attempt to form a choir was made in 1768, when a number of singers petitioned the town "to appropriate the front seat in the upper gallery for their use, that they might sit together."

Soon after the formation of the choir, stringed instruments were introduced, to set the tune and lead the voices. But it gave great offence to older people. On one occasion, when the violin was disabled, an old man, in terms more forcible than polite, gave thanks aloud that *the Lord's fiddle was broken!* Some years later, when Billings' Collection was introduced, and the choir, for the first time, sang the tune of "David the King," an aged man cried out, "Hold, hold!" and seizing his hat, left the meeting-house.

The custom of "lining the psalm" continued for a long time after the organization of a choir; but it was very annoying to them. It ceased about 1785, and on this wise: Old Deacon Brown, who, as senior deacon, had the right to perform the service, was rather slow in his movements, and had the habit of adjusting his glasses and clearing his throat before beginning to read. At the date in question, Col. David Brewer was chosen chorister. Taking advan-

tage of the deacon's well-known habit, on the first Sabbath of his leadership, the colonel (acting, no doubt, on a previous understanding with his choir) struck in singing so quick after Mr. Kellogg had finished reading, that the deacon had no chance to begin his work. He looked up in amazement—and so did a great many others in the congregation. After that there was no more attempt to “deacon the hymn.”

In 1798 the town granted thirty dollars to hire a singing-master. For several years the annual proceeds of the alewife fishery in Cochituate Brook were given to the singers, and hence received the name of the *singers' fish privilege*. The town was accustomed to choose annually a committee “to regulate the singing.” In 1805 the town “voted that the singers shall regulate themselves, so long as they shall continue to fill the seats assigned them, and behave with decency and order.”

VILLAGES.—As before stated, the geographical centre of the town possessed no natural advantages to make it desirable to settlers. The steep northerly declivity of Bare Hill, and the broken and swampy lands to the west and north, as well as eastward, were the reverse of attractive and convenient. It was an acknowledged rule to place the meeting-house where the whole people would be best accommodated; and roads were laid out from all out-districts, to the meeting-house as a centre. Such was the case as regards the first house of worship, which stood in the old cemetery. But this spot was wide of the true centre. The second meeting-house place (laid out in 1735, at the northeast angle of the Centre Common), chosen as a sort of compromise, was nearer the territorial centre; but it was equally inconvenient for building and business purposes. Once established, however, the roads were made to converge here, and the sanctuary became the attracting centre of religious interests, and hence to a large extent of social solicitude and plans for the public good. And the building of the academy here at a later date settled the question of the central village site; and business enterprises governed themselves accordingly.

1800.—THE CENTRE VILLAGE.—At this date the site of our village was mostly covered with wood and bushes, or given up to pasturage. The meeting-house, which stood in front of the Otis Boynton house, was surrounded with large forest-trees. The Academy occupied the site of the stone school-house. The work-house was about four or five rods northwesterly from the town hall, and the school-house stood on the road-side nearly in front of Mrs. Bean's. A small red store stood where is now Esty's Block. This was built in 1781 by Daniel Bridge, felt-maker and hatter. Mr. Houghton's tavern, just finished, occupied the site of the present hotel; Abner Wheeler's store, also just finished, stood on the site of Trowbridge & Savage's store. To the northward could be seen the parsonage of Rev. Mr. Kellogg, now W. H. Mellen's, and

the Capt. Simon Edgell farm-buildings. To the east were Buckminster's tavern, on the site of Geo. H. Waterman's house; Daniel Gregory's dwelling-house, now Orre Parker's; the tower-like hay-scales in front of the tavern; Gregory's store on the river-bank, where E. H. Warren's house now is; and a small house nearer the cemetery, with a shop behind it. Across the bridge were I. Warren's tannery and dwelling-house, Eli Bullard's house, at the angle of the roads, and Isaac Stone's house and barn, on the Abner Wheeler place. On the south side of Bare Hill was the old Swift house, then occupied by Nathaniel A. Jones, and the John Town house, then owned by Aaron Bullard. On the Salem End road, the first house was Ezekiel Rice's, known as the Amasa Kendall place. On what is now Pleasant Street, Wm. Maynard lived in a small house then standing in the corner of the garden west of Dr. E. H. Bigelow's; Jona. Maynard lived in the Charles Williams house; Timothy Eames, the mason, lived in a small house on the Richard S. Briggs place; and Lawson Buckminster's tavern stood where is now the dwelling-house of Moses Ellis.

1800.—SOUTH FRAMINGHAM.—This, now the leading village of the town, was then a dull place. Sanger's tavern and store, Rider's cider-mill and Torrey's shoe-shop comprised the business of the place. And families of Gleason, Learned, How, Eames, Rider, Haven and Pratt comprised the population. The impulse given to business by the coming in of the Clarks and others, and by the establishment of straw works on a large scale, the opening of the railroad with its natural accessories, and the starting of new and large business enterprises, will be narrated in their proper place.

SAXONVILLE IN 1800.—At this date “The Falls,” as the place was called, had importance chiefly because of its unfailing water-power, and its saw-mill, two grist-mills and fulling-mills.

The first corn-mill within the limits of the Framingham Plantation was built here by Elder John Stone, before 1659. A little later a saw-mill was set up on the same dam, probably by Daniel Stone, Sr., May 22, 1711, Daniel Stone, Sr., sold “one-fourth part of the stream, together with the corn and saw-mill standing thereon,” to Samuel How, Sr., of Sudbury. After the death of Mr. How his share was bought, February 15, 1714, by Deacon Stone and his son, John Stone. A fulling-mill standing on “an island which was part of the dam,” was in operation here as early as 1735, probably built by Micah Stone, who also had a clothier's shop. The privilege was held by the Stone family till 1824, when it was sold to the mill corporation. After the War of 1812, Isaac Dench bought the right to use the waste-water of the pond, and built a small shop on the rocks forming the north wing of the dam, where he put in a turning-lathe for the manufacture of wheel-hubs, bedsteads, etc. His son Gilbert owned it at the time of his

death, in 1828, when the water privilege was appraised at \$300.

The history of the Saxon Factory Co. and its successors properly belongs to a subsequent section.

Soon after 1748, Deacon William Brown put in a grist-mill on the privilege in Cochituate Brook, east of the road. This continued in use till 1813. His son Ebenezer built a saw-mill on the same dam about 1795. In 1811 the privilege was sold by Ebenezer Brown to Hopedill Leland and Col. Calvin Sanger, of Sherborn, who organized the Framingham Manufacturing Co., and erected a cotton-mill, which did a large business for many years. The property passed into the hands of I. McLellan, of Boston. In July, 1844, this privilege was sold to William H. Knight, who put in machinery for spinning woolen yarns. Mr. Knight sold to the city of Boston.

Before the Revolution Deacon Brown built a fulling-mill at the *old fording-place*, southwest of his dwelling-house. This came into the possession of his son Andrew—Major Andrew, he was called,—who carried on business here till his death, in 1803. The property then fell to Roger Brown, brother of Andrew, and through him to his son, Colonel James. Luther Rice occupied the fulling-mill for a time, and put in machinery for spinning cotton thread. In 1829, Colonel James Brown sold the privilege to William H. Knight. Mr. Knight changed the machinery, and immediately commenced here the manufacture of carpets.

At the date in question, besides Stone's and Brown's mills, there was Tucker's tavern at the north end of the Pond, the store on the corner opposite F. H. Sprague's, the blacksmith shop at Gleason's old stand, and another at the corners on the road to Latham, and Fiske's Tannery, all of which contributed to the importance of that end of the town as a business centre.

1800.—**PARK'S CORNER.**—At the date under consideration, Park's Corner was a busy place. The tavern (then kept by Jonas Dean) and the store attracted a large custom. Marshall's forge turned out farming tools in variety. Major Hale, who lived to the south, on the Royal Grout place, was a large manufacturer of wool cards. And this corner was then, and continued to be for a quarter of a century, the rallying-point of the First Baptist Society, which had an important influence in the ecclesiastical affairs of the town.

1800.—**BRACKETT'S CORNER.**—From the earliest settlement of the town this was a busy place. For many years Joshua Eaton's tannery and Trowbridge's tavern made the corner by School-house No. 7 a greater business centre. But Capt. Isaac Clark, carpenter, on the west, and Boutwell's tin-shop, on the east, naturally helped to draw business towards this corner; and David Patterson, blacksmith, and tavern-keeper, who came here in 1758, and built the Brackett House, contributed materially to its prosperity.

Josiah Winch, the brick-mason, commenced business here for himself in 1790. But the coming of Solomon Brackett in 1794, and Amos Parkhurst a year or two later, gave a new start to business enterprise. Mr. Brackett was a blacksmith, and took the old Patterson stand, which he carried on for a few years; and then, with the aid of Amos Parkhurst, set up a bakery which became famous, and flourished for a long term of years; and after his death was carried on by his son and son-in-law. In 1845 the number of hands employed was four; value of bread baked, \$8000.

MASONIC LODGE.—The "Middlesex Lodge" of Free Masons was instituted in this town in 1795. The original members were Jona. Maynard, Master; Peter Clayes, Senior Warden; Barzillai Bannister, Junior Warden; John Nixon, Samuel Frost, Thomas Nixon, Aaron Brown, Gilbert Marshall, Benj. Champney, Thomas Bucklin, Winslow Corbett, Samuel Haven. Lodge meetings were held first in the Academy Hall; then in the hall over Henderson's store; then in Esty's Block; then in its present hall over Eastman's store.

FRAMINGHAM ARTILLERY COMPANY.—This company was organized in March, 1799. The original members were Josiah Abbott, Elisha Belknap, John Bent, Eben^r Brown, Eli Bullard, Josiah Clayes, Joseph Eaton, Elisha Jones, John Nurse, Lawson Nurse, Artemas Parker, John Parker, Nathan Parker, Daniel Sanger, Zedekiah Sanger, David Stone, Purchase Stone, John Temple. The company paraded the first time July 4, 1799, under the following officers: Eli Bullard, captain; John Nurse, first lieutenant; Eben^r Brown, second lieutenant; Purchase Stone, pioneer; Elisha Belknap, fifer; David Stone, drummer. The gun-house was built in the fall of 1799, on the lot where the old town-house stood, now Otis Boynton's corner. In 1808 the town sold to the Commonwealth a spot in front of the present dwelling-house of James W. Clark, whither the gun-house was removed, and where it remained till 1834. The successive commanders of the company have been Eli Bullard, John Nurse, Lawson Nurse, Martin Stone, com. April 12, 1810, dis. March 13, 1813; John Temple, com. April 15, 1813, dis. November 25, 1814; James Brown, com. February 15, 1815; Adam Hemenway, Alex^r H. Jones, Leonard Arnold, Amos Johnson, Jr., Charles Trowbridge, dis. December 23, 1829. At this date the company disbanded; and the guns and other State property were returned to the arsenal at Boston. The gun-house and land were purchased by Rev. George Trask, March 26, 1834.

This company was ordered out during the War of 1812, and was stationed at South Boston, and at Commercial Point, in Dorchester. It was in service from Sept. 10 to Oct. 30, 1814. The officers in command were John Temple, captain; James Brown and Adam Hemenway, lieutenants; Leonard Arnold, Elisha Frost, Jr., Abel Eaton, Thomas Hastings, sergeants; Amasa Kendall, Thomas Arnold, Richard Fiske, Jr.,

Alex^r H. Jones, corporals; Horace Frost, fifer; William Belcher, drummer. The number of privates was twenty-seven.

A new era in the history of the Centre Village began with the building of the Brick School-house and establishing of the Academy, 1792-99. The young men and young women, who had had no occasion to go there except on the Sabbath, now gathered there every day in the week, and naturally began to take some interest in its surroundings and growth. And new names, and young blood from abroad, came in at this juncture. Dr. J. B. Kittredge, a well-educated and ambitious young physician, located here in 1791. Eli Bullard, the lawyer, came here in 1793. Timothy Eames, the brick-mason, and John Houghton, blacksmith, set up business in 1794. Isaac Warren commenced the tanning business in 1797. Abner Wheeler, trader, was here in 1798, followed three years later by his brother, Benjamin. Nathan Stone, carpenter, and Martin Stone, blacksmith, settled here in 1801; Asa Holt, the saddler, in 1802; William Larabee, shoemaker, occupied the old Red Store in 1803.

In 1805 a movement was made looking to the building of a new meeting-house in the near future. The three-story house of worship, which had stood seventy years, began to look old and antiquated, and a house more modern in its style and appointments was needed. June 2, 1806, it was voted to build a house of wood, sixty-five feet square, two stories high, with a tower, not a porch. Land was purchased of Martin and Nathan Stone and Captain Simon Edgell, lying north of the Common, on which to set the house.

May 4, 1807, the town "voted, that the selectmen dispose of the privilege of selling liquor on the Common, during the time of raising the new meeting-house," May 26th, "Began to raise the meeting-house; June 1st, finished raising it."

The house stood on the spot now occupied by the meeting-house of the First Parish. It had entrance-doors from the base of the tower only. Both outside and inside were fully finished. A gallery extended around the east, south and west sides, with square pews next the walls, and long seats on the slope in front. On the ground floor, square pews, raised one step, were built around the walls; and four ranges of slips, with centre and side-aisles, filled the body of the house.

The cost of the house was \$12,475.37. The bell, which cost \$437.64, was the gift of Colonel Micah Stone. The pews and slips were sold without reserve to the highest bidder. The amount received from the sale was \$14,884.

The meeting-house was dedicated February 24, 1808; sermon by the pastor, Rev. David Kellogg, from Hagai ii. 7.

1823.—Stoves for warming the meeting-house were set up. Hitherto, the men kept warm as best they could; the women were accustomed to carry foot-stoves, filled with coals from the fireplace at home.

The cost of the two stoves, pipe and chimney, and a blind for the large window behind the pulpit, was \$266.41.

Crying the Bans.—The custom prevailed till about 1830, of announcing in the public meeting-house, just before the opening of the afternoon service, all intentions of marriage, entered with the town clerk, during the preceding week. The said clerk would rise in his pew, and read in a distinct voice: "*Marriage intended*—between John Smith, of Boston, and Keturah Jones, of this town." As a rule, the lady found it convenient to be absent from meeting that afternoon.

THE WORCESTER TURNPIKE.—In the warrant for a town-meeting May 6, 1805, is an article: "To see if the town will approve or disapprove of a Turnpike road being made through any part of this town." No action was taken on the article. The movement, begun at this date, resulted in the incorporation, March 7, 1806 [act in addition passed June 10, 1808], of the Worcester Turnpike Corporation, to make a road to run from Roxbury to Worcester, *via* the Neck of the Ponds in Natick, thence near the house of Jona. Rugg in Framingham, thence to the house of Deacon Chamberlain in Southboro', etc., with power to erect four toll-gates. The old stage road between Worcester and Boston was *via* Northboro', Marlboro', South Sudbury, Wayland, Weston, Waltham. The new road considerably shortened the distance between Worcester and Boston. The steep hills kept off the teaming of heavy merchandise, but a stage route was at once established; and as Framingham was the central point for changing horses and making repairs it gave a great impetus to local business. The through travel rapidly increased; the stage lines were extended to Northampton and Albany; and the promptness of the service made this the favorite route; so that for a long term of years not less than seventeen stages passed through this town daily. The opening of the Boston and Worcester Railroad, in 1835, drew off the through travel, and, as a consequence, the corporation gave up the turnpike in 1841, and by the action of the county commissioners it became a county road. From 1810 to 1835 the stageman's horn was a signal as common and well known as the railroad engineer's whistle of to-day.

The Framingham Post-Office was established December 29, 1810, Jona. Maynard postmaster. The office was kept at Martin Stone's tavern, afterwards Henderson's and Gaines'. Mr. Maynard was succeeded by Samuel Warren, March 29, 1832; John Clark, April 30, 1853; S. B. Wilde, April 12, 1861; Mrs. J. H. S. Wilde, July 30, 1864; George F. Hartwell, September 15, 1876; Charles A. Hemenway, March 29, 1886.

NEW ENTERPRISES.—With the new meeting-house and turnpike came new professional men, and new mechanics and business enterprises, which gave a new impulse to life at the Centre. Josiah Adams, Esq., who was to take an important part in social as well

as civil affairs, came here in 1807; as also did the Rev. Charles Train, who was to be not less potent in whatever contributes to the town's well-being. William Henderson, an energetic business man, took Gregory's store in 1806; removed to the Square and put up a two-story building for a store and Masonic Hall in 1811. It stood where is now Wight's carriage barn. Asa Brigham, tailor, located here, on the old Kingsbury corner in 1809. His shop is remembered as 'Squire Kingsbury's office. Eustis & Simmons, carriage-trimmers and harness-makers, established business here, where is now Miss Moulton's Block, in 1810; John Ballard (2d) came the next year, and eventually bought out the business. Amasa Kendall, carpenter, was here in 1812. Josiah W. Goodnow, cabinet-maker, built a shop just west of Eustis & Simmons in 1812, and the house (known as the Goodnow house) in 1814. Captain Peter Johnson, builder; Isaac Stevens, tailor; Peter Coolidge, blacksmith, came to the village in 1813. Dexter Esty, builder, and Jesse Belknap, Jr., wheelwright, came in 1814; Nathan H. Foster, gunsmith, and John Kent, carriage-maker, in 1815. Foster's shop stood on the site of Lewis Stiles' market; and Kent built an addition to J. Ballard's harness-shop. Jesse Whitney, shoemaker, William K. Phipps, tailor, and Thomas Rice, Jr., carpenter, settled here in 1816. Mr. Phipps' shop occupied the site of G. Joyce's house; and Mr. Rice built on John C. Hastings' corner. Mr. Rice afterwards bought the Red Store, moved it up street, went into the grocery trade, and the same building is now the dwelling-house of Mrs. Eliza Haven.

Samuel Warren, who learned the cabinet-maker's trade of Stephen Rice, bought Goodnow's shop and started business in 1818. Dexter Hemenway, house carpenter, bought the old Gregory store by Warren's bridge, and began business for himself in 1820. Hollis Cloyes and George W. Mansir, house-painters, began business the same year, and were joined by Obed Winter, three years later. Otis Boynton, book-binder, came to town in 1822; Mitchell & Hunt, hatters, in 1823. The latter's shop is now Otis Childs' dwelling-house.

Dr. Simon Whitney began his long and successful professional career in 1822.

EDUCATION—Schools.—Fortunately for the town, there were, among the early settlers, men and women who had received a good common education, and were qualified to teach others.

The first mention in the town records of a public school is under date of September 3, 1706, when the town voted "that Deacon Joshua Hemenway should be our school master the year ensuing, and that Benj. Bridges and Peter Claves, Jr., should agree with him what he should have for his pains."

Previous to this whatever instruction was given to the children was on private account, and in the family. Probably the wife of Daniel Stone taught such

children as chose to come to her house at Stone's End; Thomas Drury did the same for the children at Rice's End; Isaac Learned for Sherborn Row, and Joshua Hemenway for Salem End and the north side settlers. And when appointed public school-master, Deacon Hemenway received the scholars at his own house, as no school-house was built till ten years after this date.

Writing-Master.—"April 3, 1710, voted that Deacon Joshua Hemenway shall be school master for to learn youth to write henceforward, and when he has a mind to lay it down, he will give the town timely notice to provide another school master."

School-Dames.—March 2, 1713, voted, "Lieutenant Drury and Ebenr Harrington to be school masters to instruct the youth of Framingham in writing; and the selectmen are appointed to settle school dames in each quarter of the town, which masters and mistresses are to continue until August next; and Deacon David Rice and Isaac Learned are chosen to agree for and with a school master for to serve from said August until the end of the year." Deacon Hemenway was engaged, and "paid out of the town treasury the full sum of ten pounds current money of New England."

Grammar Schools.—July 7, 1714, voted, "that 25 pounds be raised for defraying the charge of a grammar school in town." Edward Goddard was appointed grammar-master, and taught for a year.

Moving School.—Dec. 8, 1714, voted "that the school be kept the present winter season in 5 places in town, viz. 1 month each at the house of John Gleason, Thomas Pratt, Samuel Winch, Cort. Samuel How, and Benj. Bridges. The next year Abraham Cozzens proposed to keep school for one year, for 17 pounds, one-half to be paid before the middle of January, and one-half by the last of March: accepted. Voted that the school be kept nine weeks on the south side of the River, and eight weeks on the north side." In 1716, "voted to have a moving school kept in the four quarters of the town, at Edward Goddard's, Ebenr Winchester's, John Eames, Jr.'s, and John Stone's, four weeks at each place;" and Mr. Edward Goddard agreed to keep the school for 15 pounds, "provided that those that send any children to be instructed at my dwelling house to pay 6d. per head per week." The system of "moving schools" was kept up till 1750.

School-House.—Mar. 5, 1716. The town voted to build a school-house, and set it about 20 or 30 poll from the west end of the meeting-house. When built, the house was 22x16 feet, and 6 feet between joints. It had two large fire-places, one at each end. Cost, £17 10s.

Mar., 1717. The town was "presented" for not having a grammar school "according to law." The school-house was unfinished; and "suitable" masters were averse to the moving system. In Dec., 1717, a committee was appointed "to indent with a school

master (suitable) as by law is directed, for one quarter of a year." The committee reported Feb. 10th, "that they have used utmost diligence, but can find no master to be had as yet." Aug. 5, 1718, [the school-house was still unfinished] the town voted "that the committee, Jona. Lamb, and Nathaniel Eames, go forthwith to Mr. Edward Goddard, and see upon what terms he will serve the town as school master for a year; and if he will serve as cheap or something cheaper than another, then they are to make a bargain with him for a full year." Abraham Cozzens would serve for £13, and was hired for the year, and also for 1719.

1719. The school-house was finished, Mr. Ephraim Bigelow making the furniture, viz., "a table, and seats for the youth to sit upon," for which he charged 12s. School-dames were employed in the out-districts.

1720. Mr. Robert Pepper was employed to keep the grammar school, for 30 pounds. Voted, "that the school master may have the free use of the school house for himself and family to dwell in, the year ensuing. Voted that the school be kept in 6 distinct places in the several parts or corners of the town." Mr. Pepper was retained till the fall of 1724.

1724. July 21st, voted "that the committee to hire a school master shall first treat with a scholar of the College; that they treat with Sir James Stone (H. U. 1724), and acquaint him that the town is desirous to enjoy him as their school-master, in case he can comply with their custom, viz., to teach any small children of either sex that may be sent to him, and to remove into the several quarters of the town." He accepted the proposal on condition of receiving a salary of £45; which sum was granted. He continued to be employed for three years.

1727. Mr. James Bridgham (H. U. 1726) was employed to keep the school the present year; salary, £25; to be kept in six places, the school-house to be one of them.

1729. Mr. Noyes Parris (H. U. 1721) school-master; salary, £30.

1730. At this date our own sons began to graduate from college, and for a time were put in charge of the school, in preference to strangers. Mr. Phineas Hemenway, son of Dea. Joshua (H. U. 1730), kept the school this year and the next; salary, £50; school kept in six different places.

1732. Mr. Samuel Kendall, (H. U. 1731), a nephew of Thomas and Eliezer, was our school-master; salary, £48.

1733-34. Mr. John Swift, Jr. (H. U. 1733), school-master; salary, £55.

1735. Mr. Joshua Eaton (H. U. 1735), school-master, salary, £60.

1738. Mr. Chas. Gleason (H. U. 1738), school-master; salary, £70.

1739-40. Mr. Joseph Buckminster, Jr. (H. U. 1739); school-master; salary, £70; the school was kept in seven different places.

1749. *The District System.*—The town proceeded this year to divide the territory into nine wards or districts, viz., the Centre District, which took in all the families living within one and a half miles from the meeting-house, and eight districts in "the out-skirts," each of which was to have its own school.

This movement was a great innovation on the *moving school* system; and it gave so great satisfaction that measures were taken to make it permanent. An article was inserted in the warrant for the next May meeting, "To see if the town will choose a meet person in each District of the out-skirt schools in said town, to draw their respective parts of money out of the town treasury." And Messrs. Richard Haven, Ebenezer Gleason, Ebenr. Goddard, Joseph Nichols, Thomas Temple, Noah Eaton, Daniel Stone and Bezaleel Rice were chosen said committee, with power "to dispose of the said money in manner as each District shall order." The next step was to build school-houses in the several out-districts. This matter and a re-construction of the districts was referred to a committee, which reported October 22, 1750, as follows:

"1. We find it necessary that there be one school-house in the Centre of the town, or at the meeting-house, according to the former vote of the town:

"2. We find that the out-skirts of the town cannot be divided into less than four schools, and, all things considered, that it is not beneficial to divide them into more. Report accepted.

"Voted, the sum of £30 10s. 4d. lawful money, to pay for the school-house now built at the Centre.

"Voted the sum of £80 lawful money, to build the four new school-houses i.e., £20 for each; said houses to be 20x14 feet and 7 feet stud, to be finished work-manlike." District or prudential committees were appointed, viz.: Thomas Temple, Noah Eaton, Daniel Stone and Bezaleel Rice.

The town had failed, for some years, to support a grammar school, and this year was presented by the grand jury, and paid fine and costs, £11 7s.

1751-52. Mr. Benjamin Webb (H. U. 1743), grammar school master, with a salary of £35.

1755. "The town exprest their minds by a vote, that women's schools should be kept at the five school-houses in the summer season, to the amount of half the money granted for the school, and the other half for the support of a grammar school the other half year. Voted that the grammar school should remove to the several school-houses in manner as heretofore, until the town give instructions otherwise." Granted £30 for the support of the school.

1757. Dr. John Sparhawk, school-master.

1758. Mr. John Haven (H. U. 1757), was school-master, and continued to teach till 1767.

June 3, 1765. Voted that the town will improve five school-dames, eight weeks each, this year. Voted that the grammar schools be kept in the public school-houses; and the school be doubled, and that there be

two masters employed six months at one and the same time, in the winter half year: £65 granted for the support of schools. The same arrangement continued for the three following years.

1768. *Voted* that each squadron keep a woman's school sixteen weeks in the year, and £25 is granted for this purpose. *Voted*, that each squadron have the liberty to employ men instead of women to keep the schools above expressed, so long as their money will hold. Mr. James Parker (H. U. 1763), was one of the school-masters this year.

1769. No women's schools were kept this year; but each squadron was allowed to expend £4 for writing schools.

June 4, 1770. *Voted* to have one grammar school, to be kept in the several school-houses six months, beginning in October; and also a writing school for the same time. *Voted* that Dr. Ebenezer Hemenway open a grammar school at his own house the other six months; and that there shall be sixteen weeks women's school kept in each school-house at the same time. Major John Farrar and Thomas Temple were appointed a committee "to provide a grammar-master." £80 lawful money was granted for the support of the grammar and writing schools. This arrangement continued for three or four years.

In 1774 the town was divided into eight school districts. In some cases the old school-houses were utilized; in some they were moved to more central spots; in others, new houses were built.

May 10, 1790. "The committee appointed by the town to take into consideration the expediency of dividing the town into school districts agreeable to a law passed June, A.D. 1789, Report: that the district lines be hereafter the same that they have been for several years last past, reference being had to the town book for ascertaining said lines."

"*Voted*, that there be one writing school kept 12 months each year, as follows: in the district including Stone's mills, 8 weeks; in the north district, 7 weeks; in the southeast district, $5\frac{1}{2}$ weeks; in Salem End district, 8 weeks, 2 weeks of which to be kept on the Common, if the inhabitants there provide a house for the purpose; in the remaining 4 districts, 6 weeks each. And no scholar shall be sent out of one district to another, without the consent of such district. That a grammar master be immediately engaged for 12 months, and keep school as follows: one month in each of the districts; and no scholar to be sent from one district to another, except those that study English grammar, or the Greek and Latin languages. The remaining 4 months the grammar school to be kept in the Centre." £70 was granted for the support of schools.

April 2, 1792. "*Voied* to have 96 weeks women's schools; 48 weeks grammar school; and 68 weeks writing school, proportioned as they were last year."

The school districts held their annual meetings for the transaction of business, and chose a clerk who

kept a record of the doings of the meetings. The prudential committees, who were nominated by the district at the annual meeting, had charge of the school-houses, provided wood, hired school-dames and drew their respective proportions of school money out of the town treasury. Later, they hired school-masters as well as dames. By the rules adopted by the town in 1800 (see below), the power and duties of prudential committees were much extended. In more modern times the State law made the hiring of teachers the duty of the School Committee. But in this town the two committees commonly acted in harmony, and thus the preferences of each district were carried out.

The district system was abolished by vote of the town in 1866.

School Committees.—In early times the business of providing a school-master, or writing-master, or school-dames, was intrusted to special committees, or the selectmen. When the town was divided into districts, prudential committees were chosen in each ward. In 1798 the town "voted to choose a committee of five persons, to inspect and regulate the schools, viz.: Jona. Maynard, Esq., Capt. Peter Claves, Capt. John Trowbridge, Capt. Samuel Frost and Lieut. John Jones. In 1799 the committee consisted of Messrs. Maynard, Trowbridge, Eli Bullard, Esq., Elisha Frost and Ebenr. Eaton. But the duties of the committee were not clearly defined, and the relation of this committee to the prudential committees was matter of doubt. And in 1800, Capt. John Trowbridge, Dea. Thomas Buckminster, Col. David Brewer, John Fiske, Ebenr. Eaton, James Claves, Elisha Frost, Esq. Maynard and Esq. Bullard were appointed a committee to draw up by-laws for regulating the schools. Their report was as follows:

"1. That the committee-man of each school district be directed to visit the school the week after it opens, to consult with the teacher whether the scholars are furnished with books suited to the stage of learning in which they are.—And if any scholar is destitute of a book, whose parents are unable to furnish him with the same, said committee-man be directed to furnish him, and bring in his account to the town for payment; but if any scholar be destitute of a book whose parents are able to furnish the same, and shall continue without a book for one week after being visited as aforesaid, said child shall be excluded from the school until properly furnished.

"2. That it be the duty of the district committee-man to notify the chairman of the Visiting Committee, of the time when the school will close in order that said Committee may regulate their visits accordingly.

"3. That the Visiting Committee be desired to visit the women's schools, to see that the first rudiments of reading and spelling are properly taught.

"4. That it be recommended to the inhabitants not to send any scholar to the writing school but those who can read words of two syllables by spelling the same.

"5. That each master of a writing school furnish himself with a Bible, and that he read a portion thereof himself, or cause the same to be read in his school at least once a day.

"6. That no work be allowed to be done in women's schools, except the art of Lettering. [This meant working the alphabet, or moral proverbs, with the needle, on 'samplers,' which were then, and continued to be for the next quarter of a century, the pride of the girls.]

"7. That the committee-man of each district be directed to see that the foregoing articles be carried into effect."

In 1801 the town granted \$600 for the support of schools; and voted "that \$175 of the same be equally divided between the nine districts; that two-fifths of the whole sum be apportioned for the women's schools, and three-fifths for the master's schools; that no master or mistress be admitted to teach a school without first obtaining the certificates required by law; and that no scholar be admitted into a master's school unless they are capable of being classed."

By vote of the town in 1802, it was made the duty of the School Committee to examine school-masters and mistresses, and to visit the several schools.

The number of the superintending committee varied from three to nine, and they served without pay. In 1833, through the influence of O. S. Keith, Esq., a man of culture, common sense, thorough knowledge of schools, and devotion to the interests of common-school education—seconded by Rev. Charles Train—the town voted to reduce the number to three, and to pay each man one dollar per day for his services. This was afterwards increased to two dollars per day. The committee this year were Rev. Charles Train, O. S. Keith, Esq., and J. J. Marshall. In 1867, on the abolition of the office of prudential committee-man, the School Committee was enlarged to twelve. And in 1871 a superintendent of schools was appointed, on whom was devolved the supervision of the several schools, his compensation being a fixed salary. In 1881 the number of the School Committee was reduced to six.

In 1827 the town voted "that the vote passed in 1825, specifying the number of weeks' schooling to be kept in each district by a master, be abolished; and that each school district be at liberty to expend their proportion of money granted for schooling, as they think proper."

In those days the winter schools were always in charge of male teachers, sometimes undergraduates, who took this method to obtain means to pay college expenses; but they were largely our own boys, who were educated at the academy. This plan continued in all our districts till 1848. In 1849 the innovation was made of employing females to teach the winter school in Districts No. 1 and 5. The School Committee this year were Carleton Parker, B. G. Northrop and Jona. Aldrich. Other districts soon came into the arrangement, so that in 1855 the change was complete, except in No. 8, where Charles S. Whitmore continued to teach for the winter terms of 1855 and '56.

The Schools Graded.—The first attempt to introduce anything like gradation, depending on age or scholarship, into our schools, was made in 1831, when in the Centre and at Saxonville the districts voted to have a fall term of eleven weeks, to be in charge of a female, where all the children in the district under ten years might attend; and all over ten might go to the winter school. The movement proved a success. The number of pupils in the fall at the Centre was 65, in

the winter 63; at Saxonville the numbers respectively were 40 and 66. When the Town Hall was erected, in 1834, the lower story was divided into two large and convenient school-rooms, and two departments of the school permanently established. The division of the Saxonville territory into two districts obviated the difficulty of too many scholars, for a time; but eventually both these districts organized two departments.

The systematic grading of the schools in the Centre, at Saxonville and at South Framingham grew up with the necessities of each case.

The grammar school at Saxonville was organized in 1856, at the Centre in 1857, at South Framingham in 1869.

The high schools were established earlier. The one at Saxonville was opened in 1852. It was kept in one of the rooms under the town hall there till 1857, when the new school-house was erected. The high school at the Centre was established in the fall of 1852. As stated in another place, it was the legal successor of the Framingham Academy, and was kept in the academy building till 1857, when the present school-house was built.

The grading of the schools was completed, and a regular course of study for the Centre high school, comprising four years, was inaugurated in 1865, by the committee, consisting of Rev. J. H. Temple, Rev. S. D. Robbins and Rev. Geo. E. Hill. The same course, modified by circumstances, was introduced into the Saxonville high school. The School Committee in their annual report for this year, say: "All the schools of the town are now pursuing a uniform, simple and effective system of study—a system which is not a mere theory, nor a forced growth; but one that has silently and slowly taken shape, to meet the actual wants and the conditions of our schools. There is uniformity of text-books in all the schools of the town; and all the scholars are doing the same work, in the same way. The mixed schools in the outer districts have each its own classification, and a uniform grade. The village schools are graded by a common standard: and all of like capacity are working up in the use of the same text-books towards the high schools."

The growth of the town in population has required a corresponding enlargement of the means of education. New school-houses have been built, and more teachers employed, and the system of management has been changed to meet modern ideas and demands.

The following summary of the report of the School Committee and superintendent for the year 1888–89, will show the present condition of our public schools:

Number of persons in town, between the ages of five and fifteen, April 1, 1888	1620
Number of schools	37
Number of male teachers	2
Number of female teachers	38

Special teacher of music	1
Special teacher of drawing	1
Number of different pupils attending school during the year	1878
Average number belonging	1536
Average daily attendance	1424
Per cent. of average attendance	927.
Scholars by grades—	
Number in high schools	133
Number in grammar schools	290
Number in intermediate schools	394
Number in primary schools	858
Number in mixed schools	160
Number in Normal Practice	81

Evening School.—By vote of the town, \$1000 was appropriated for the support of an evening school at South Framingham. This was kept for a term of twenty weeks. Whole number in attendance, 147; average attendance, about 70.

The general plan or course of study in the schools of the lower grades covers a period of nine years. The high school course covers four years. Nominally there are two departments in this school, called the English course and the classical course, merged, however, into one, so far as the branches pursued are common to both. The English course is intended to fit pupils for business, for teaching in primary schools and for active life in the best society. The classical course, in addition to the common English branches, embraces the higher mathematics and the Latin and Greek languages, sufficient for admission to college.

Town Grants to Schools.—The following table shows the number of children of school age in town, the amount of money granted for the support of schools, and the cost *per capita*, at different dates. No return of the number of school children, before 1795, nor between 1801 and 1834, has been found:

Date.	No. Scholars.	Appropriation.	Per Scholar.
1795	618	\$100	3s. 2d. 3f.
1798	649	\$500	77 cts.
1801	655	\$600	93 cts.
1834	802	\$1300	\$1.60
1845	1030	\$2500	2.42
1857	853	\$6000	7.00
1867	900	\$6500	7.22
1877	977	\$15,650	15.91
1882	990	\$18,600	18.68
1888	1629	\$27,176	16.77

FRAMINGHAM ACADEMY.—Early in the spring of 1792, Rev. David Kellogg and twenty-two associates organized as The Proprietors of the Brick School-house in Framingham; and built a school house on the west side of the Training-Field, where is now the stone school-house. The house was two stories high, and cost £176 9s. 6d. The associates were: David Kellogg, Jona. Hale, David Brewer, Simon Edgell, Elijah Stone, Peter Claves, Ezra Haven, Joseph Bennett, Matthias Bent, Jr., John Trowbridge, Jr., Samuel Frost, Jr., Jona. Rugg, John Fiske, Ebenezer Eaton, Thomas Buckminster, Jona. Maynard, Elisha Frost, Barzillai Bannister, Lawson Buckminster, Lawson Nurse, Samuel Bullard and Andrew Brown. The object, as stated in the constitution, was "to disseminate piety, virtue and useful knowledge; and establish a

Grammar school in said town, as a school of liberal arts and sciences." The by-laws provided that "no person shall be admitted a member of the Society, unless he sustains a good moral character;" and that "no person shall be admitted as a preceptor in the school, unless he has received a collegiate education, and been endowed with a degree of Bachelor of Arts in some University." "Every branch of science shall be taught in said school, which is conducive to private benefit, or of public utility and importance; . . . a primary regard being had to the initiation of youth into principles of piety and virtue." "Children of both sexes shall be admitted upon equal terms." "The charges of the school shall be levied upon the polls (meaning the scholars)."

October 17, 1793, the Proprietors received deeds of one acre of land for the school-house site, *i. e.*, three-fourths of an acre of Thomas Buckminster, and one-fourth of Samuel Frost. The lot extended on the east to the line of the Common and Training-Field, which line was several rods easterly of the present highway. In 1822 two acres of land additional, and adjoining the other lot, was purchased of Thomas Buckminster, by the academy trustees, all together constituting what is known as *Academy Land*.

The school was opened November 27, 1792, under the instruction of James Hawley, afterwards tutor in Harvard University.

In 1798 the Proprietors petitioned the Legislature for an act of incorporation as an Academy; and the town voted to grant \$1000 to support the Academy school, *i. e.*, the interest of said sum to be paid annually, provided it will exempt the town from keeping a grammar school: and provided further that the Legislature will make a grant of half a township of land at the eastward, to the Academy. [The \$60 interest was annually paid till 1824, when it was ascertained that such a town appropriation was illegal; and it was discontinued.]

March 1, 1799, the Legislature passed "An Act for establishing an Academy in Framingham," and appointed the following persons a board of trustees, *viz.*: Rev. David Kellogg, Rev. Josiah Bridge, Rev. Jacob Bigelow, Artemas Ward, Jr., Jona. Maynard, Jona. Hale, Samuel Frost, Peter Claves and David Brewer. "And it be further enacted, that the said Academy be endowed with a tract of land equal to one-half of a township six miles square, of any unappropriated lands within the counties of Hancock and Washington." June 4, 1802, this half township, situated in Washington County, on the eastern boundary of Maine, was conveyed to the trustees, and was known as the "Framingham Grant." This tract of land, which contained 11,520 acres, was sold by the trustees, in 1803, to Jona. Maynard and Samuel Weed for \$5000, for which sum the grantees executed a bond, said bond constituting a fund, the interest of which was applied for the support of the school. Final payment of the principal of said bond was made May 15,

1833. This half-township was included in the land ceded to Great Britain by the Ashburton Treaty ; and has since been surveyed and located by a claimant, who has been paid for the same by the United States Government.

The academy thus established became an important factor in the social life, the educational standing and the material prosperity of the town. The varied and good fruits of the institution have been ripening for three generations, and are not yet all gathered. It numbers among its alumni hundreds of successful teachers and professional men, embracing the names of those well known in ecclesiastical, political and judicial departments in our own State and throughout the country.

In 1822 the trustees erected a dwelling-house for the preceptor, where is now the High School building, at a cost of \$3500.

In 1826 John Trowbridge devised by will a legacy of \$500 to the trustees, the interest of which has since been applied, agreeably to the directions of the donor, in aid of young men of this town preparing for college.

In 1837 the original brick structure was taken down and replaced by a stone school-house (now used by the primary school). The cost was \$3000.

In 1838 Micah Stone left by will a legacy of \$3000, the interest of which was to be applied to the reduction of the charge of tuition to pupils belonging to the town. This legacy was recovered by the heirs after the academy was merged in the town High School.

By acts of the Legislature, passed May 30, 1851, and March 15, 1852, the trustees of the academy were authorized to convey to the town all the property, belonging to said corporation, including all trust funds, provided the said town shall establish and forever maintain, upon the real estate so conveyed, a town High School. The School Committee were authorized to act as trustees, and the town treasurer to act as the corporation treasurer. The Supreme Court decided that this transfer of property to the town, and vesting the rights and powers of the trustees in certain impersonal officers, virtually dissolved the Academy corporation. Had the board of trustees continued in the exercise of their functions, and kept proper records, even though the same individuals should hold the two offices of trustee and School Committee, the trust fund would not have been forfeited.

State Normal School.—The first Normal School established in Massachusetts, and the first school devoted exclusively to the education of female teachers, was opened at Lexington, July 3, 1839. This school was removed to West Newton, September, 1844; and was transferred to Framingham, December, 1853.

In 1852 the Board of Education, finding larger accommodations necessary than were furnished at Newton, determined to build a new school-house, at Newton

or elsewhere, as eligibility of site, and offers of material aid, might afford the stronger inducement. A few of our public-spirited men made offer of a lot of land, which possessed singular advantages for such an institution, and the town granted a liberal sum of money in aid, and the board decided to locate here. The site selected was on the northwest slope of Bare Hill commanding a wide and varied prospect, sufficiently elevated to insure pure air, and protected on the north by a beautiful grove of native trees, the grove being the gift of Wm. M. Clark.

As appears from the deeds, James W. Brown conveyed to the Commonwealth two and one-quarter acres and ten rods ; Josiah Stedman, one and three-quarters acres and ten rods ; I. S. Wheeler, one acre and eighteen rods ; Wm. M. Clark, forty-four and one-third rods of land. These deeds bear date December 30, 1852, and are conditioned on the erection here and maintenance of a State Normal School.

The town voted to give to the State the sum of \$2500 towards the erection of the building, on condition that the school should be established and continued here. The Boston & Worcester Railroad corporation also contributed \$2000 for the construction of the building.

The school-house was erected in 1853, after plans prepared by Alex'r R. Esty. The whole cost of the building was \$12,552. The house was suitably dedicated December 15, 1853, and was immediately occupied by the school. Subsequently, three and one-half acres of land, adjoining to the first purchase, were bought by the State, and a commodious boarding-house erected.

In the fall of 1854 a plan was matured by Eben S. Stearns, principal of the school, and the School Committee of Framingham, for the organization of a model graded school, to comprise the pupils in the several schools in the Centre District, which should be under the joint superintendence of said principal and the School Committee, in which regular instruction should be given by the advanced pupils of the Normal School, free of charge to the town. The plan was sanctioned by a vote of the town, and was tried for a single term. But, before its advantages and disadvantages were fairly tested, it was abandoned.

In 1867 measures were taken for starting another model class, as a department of the Normal School work. In 1870 the building was enlarged, and a room fitted up expressly for a model school. The town furnished the room, and engaged to pay one-half the permanent teacher's salary. Each Normal scholar is required to give instruction here, for a certain part of the senior year. It is nominally a town school, and under town supervision ; but practically is in charge of the principal of the Normal School. The pupils range from the lowest primary to the highest grammar grades, and are received from our own districts and from the neighboring towns, by con-

sent of the School Committee. Tuition is free. Heretofore the town has paid \$200 annually, but it is now paying \$370 towards the support of the school.

The building occupied as a school-room since 1853 proving inadequate to the needs of the institution, the Legislature of 1888 made an appropriation for a new house. This was erected during the past year, at a cost of \$100,000. Externally and internally, it combines good taste, elegance, and adaptation to the wants of a model Normal School.

The principals of the Normal School, since its removal to Framingham, have been, Mr. Eben S. Stearns, 1849-55; Mr. George N. Bigelow, 1855-66; Miss Annie E. Johnson, 1866-75, and Miss Ellen Hyde, 1875—. The regular course of study comprises two years, with provision for an advanced course of two years additional. Tuition is free to all who intend to become teachers in the public schools of the State. Total number of pupils who have been connected with the school to the close of the school year 1888 is 2486; number of graduates, 1640.

Town Library.—Mr. Barry says: "The last of the Common Lands (about 40 acres) was sold about the year 1785, and the proceeds appropriated to the purchase of a public library." Of the history of this library little is known. The books were kept in 1809, in the house of Martin Stone. In 1815, Rev. David Kellogg, Rev. Charles Train, Josiah Adams, Esq., Benj. Wheeler, Nathan Stone, Maj. Lawson Buckminster, Jesse Haven, Col. Jonas Claves, and others organized (or re-organized) *The Social Library*. This was managed by a board of five trustees, a clerk, treasurer, and librarian: price of shares, \$4; annual fee, 50 cents. Each proprietor was entitled to take out two volumes for the term of 60 days. No. of volumes in the library, 443, which was increased by gift and purchase to about 600. This society flourished for several years. In 1834 the proprietors and others formed *The Lyceum Library*, on much the same plan as the preceding. This was succeeded, after a few years, by *The Framingham Library*, which continued till the formation of the Public Library. In 1851, Lorenzo Sabine, Col. Moses Edgell, I. S. Wheeler, Benj. Yeaton and others organized *The Reading Club*, and fitted up a room which was supplied with the leading American and English magazines.

In 1854, James W. Clark, George Phipps, Charles Upham, Francis Jaques, Col. Moses Edgell and others started a movement which resulted in the establishment, April 9, 1855, of the *Framingham Town Library*. The books owned by the Framingham Library, and the periodicals held by the Reading Club, were generously given as a nucleus of the new Public Library and reading-room. The original town grant to the library was \$1125. The books were kept in one of the lower rooms of the Town Hall. In 1857, Geo. Phipps made to the library a donation of \$350. In 1865, James W. Clark made a donation of \$300, and in 1873 a further donation of \$500, to the library.

In 1873 Mrs. Eliza B. Eaton left to the town a legacy of \$500, the income to be expended for the use of the library. Col. Moses Edgell, who died Feb. 8, 1875, in his will provided that the town should be the residuary legatee of his estate; and the sum thus accruing should be kept and known as the Edgell Library Fund, the income of which should be expended for the purchase of books for the library, works of art, and in defraying the expense of taking care of the same. This fund amounts to \$47,000.

The present Library Building (known as "Memorial Hall," to commemorate the soldiers who died in the late war) was erected in 1872-73, at a cost of \$28,500.

In 1887 a donation of \$3200 was made to the town by Mrs. George H. Gordon, and the Library building was enlarged by an annex to the book-room for the accommodation of new shelves, thus greatly increasing the capacity of the hall.

The annual appropriation by the town for the support of the library, for many years, was \$400, and one-half of the dog tax. Since the opening of the new Memorial Hall the appropriation has usually been \$1200, and one-half of the dog tax.

Branch agencies for the delivery of books at Saxonville and South Framingham were established in 1874.

In 1871, George Phipps gave the sum of \$3000, with which to purchase a bronze statue of "The Soldier," and 1881, George B. Brown donated \$250, being one-half the cost of the granite pedestal on which the statue stands.

Number of volumes in the library, January 1, 1889, 13,877.

GRADUATES.—The following is a list, substantially complete, of persons, natives or residents of Framingham, who have received a collegiate education:

- Phineas Hemenway, H. U. 1730, Cong. min., Townsend, Mass.
- David Goddard, H. U. 1731, Cong. min., Leicester, Mass.
- Elias Haven, H. U. 1733, Cong. min., Franklin, Mass.
- John Swift, H. U. 1733, Cong. min., Acton, Mass.
- Nathan Haven, H. U. 1737, died.
- Joseph Buckminster, H. U. 1739, Cong. min., Rutland, Mass.
- Amariah Frost, H. U. 1740, Cong. min., Milford, Mass.
- John Mellen, H. U. 1741, Cong. min., Sterling, Mass.
- John Wilson, H. U. 1741, physician, Hopkinton, Mass.
- Ebenezer Winchester, H. U. 1744, physician.
- Samuel Haven, H. U. 1749, Cong. min., Portsmouth, N. H.
- Jason Haven, H. U. 1754, Cong. min., Dedham, Mass.
- Moses Hemenway, H. U. 1755, Cong. min., Wells, Me.
- John Haven, H. U. 1757, teacher, Fram., Greenland, N. H.
- Eliab Stone, H. U. 1758, Cong. min., Reading, Mass.
- Moses Adams, H. U. 1771, Cong. min., Acton, Mass.
- John Reed, Y. C. 1772, Cong. min., West Bridgewater, Mass., D.D., M. C. 1794, six years.
- Solomon Reed, Y. C. 1775, Cong. min., Petersham, Mass.
- Jonathan Maynard, H. U. 1775, justice of peace, Fram.
- Samuel Reed, Y. C. 1777, Cong. min., Warwick, Mass.
- Moses Haven, H. U. 1782, died.
- Timothy Reed, D. C. 1782, lawyer, W. Bridgewater, Mass.
- Jacob Haven, H. U. 1785, Cong. min., Croydon, N. H.
- Joseph Bixby, H. U. 1791, died.
- Daniel Stone, H. U. 1791, physician, Sharon, Mass.
- Samuel Temple, D. C. 1792, teacher, author, Dorchester, Mass.
- Joseph Locke, D. C. 1797, lawyer, Billerica, Mass.

John B. Fiske, D. C. 1798, lawyer, New York.
 William Ballard, H. U. 1799, physician, Framingham.
 Moses M. Fiske, D. C. 1802, teacher, Nashville, Tenn.
 John Brower, H. U. 1804, physician, Philadelphia.
 Jones Buckmaster, H. U. 1804, teacher, ———, Tenn.
 William Haven, B. U. 1809, died.
 William Eaton, W. C. 1810, Cong. min., Fitchburg, Mass.
 John L. Parkhurst, B. U. 1812, Cong. min., Standish, Me.
 Dana Claves, M. D. C. 1815, Cong. min., Meriden N. H.
 Joseph Bennett, H. U. 1818, Cong. min., Woburn, Mass.
 Jeremy Parkhurst, Y. C. 1819, physician, Philadelphia.
 Edward Frost, H. U. 1822, physician, Wayland, Mass.
 Increase S. Wheeler, H. U. 1826, merchant, Framingham.
 John T. Kittredge, A. C. 1828, physician, Framingham.
 Joshua T. Eaton, Y. C. 1830, Episc. clerk, Ohio and N. Y.
 Peter Parker, Y. C. 1831, missionary to China, minister plenipotentiary, etc.
 Elbridge Bradbury, A. C. 1831, Cong. min., Sandisfield, Mass.
 Abner B. Wheeler, H. U. 1831, physician, Boston, Mass.
 Arthur S. Train, B. U. 1833, Bapt. min., Haverhill, Mass.
 Josiah Abbott, Y. C. 1835, physician, Hollis, N. H.
 Wm. J. Buckminster, H. U. 1835, editor, Boston, Mass.
 Edward Stone, B. U. 1835, Unit. min., Norridgewock, Me.
 Edward Brower, H. U. 1838, farmer.
 Oliver J. Fiske, B. U. 1837, Bapt. min., Tennessee.
 Charles R. Train, B. U. 1837, lawyer, M. C., Boston, Mass.
 Charles F. Johnson, A. C. 1839, lecturer, New York.
 James W. Brown, W. C. 1840, teacher, Framingham.
 Sumner Clark, A. C. 1840, Cong. min. in New Hampshire.
 Benj. A. Edwards, B. U. 1841, Bapt. min., Bolton, Mass.
 Horace D. Walker, Y. C. 1841, Cong. min., Abington, Mass.
 Addison Ballard, W. C. 1842, Presb. min., Prof. Lafayette Coll., Easton, Pa., D.D.
 Isaac F. Shepard, H. U. 1842, consul general, China.
 E. O. Haven, Wesl. U. 1842, Meth. Episc. min., bishop.
 Samuel W. Eaton, Y. C. 1842, Cong. min., Lancaster, Wis.
 Robert Gordon, H. U. 1843, lawyer, Framingham.
 Rufus F. Brower, H. U. 1845, teacher, Framingham.
 C. C. Esty, Y. C. 1845, lawyer, M. C., Framingham.
 John Edmunds, Y. C. 1847, librarian, Philadelphia.
 George A. Hoyt, D. C. 1847, physician, Framingham.
 Onslow Hemenway, B. U. 1848, died.
 David P. Temple, Y. C. 1851, teacher, York, Neb.
 Thomas G. Kent, Y. C. 1851, lawyer, Milford, Mass.
 F. C. Browne, H. U. 1851, ornithologist, Framingham.
 Abner H. Wenzell, A. C. 1853, lawyer, Marlborough, Mass.
 Frederick Wheeler, H. U. 1854, lawyer, Framingham.
 Dixie C. Hoyt, A. C. 1855, physician, Milford, Mass.
 George T. Hingle, A. C. 1857, lawyer, Ashland, Mass.
 Frederick A. Billings, A. C. 1859, farmer, Framingham.
 James H. Schneider, Y. C. 1860, teacher, Bridgewater, Mass.
 George Rice, Y. C. 1860, physician, Framingham.
 Harry B. Scott, H. U. 1860, colonel in late war, land agent Burlington, Iowa.
 Solomon H. Brackett, H. U. 1862, teacher, St. Johnsbury, Vt.
 George F. Bemis, W. C. 1862, jeweler, Framingham.
 Clark Carter, H. U. 1862, Cong. minister, Lawrence, Mass.
 Frederick L. Hosmer, H. U. 1862, Unit. min.
 Edwin T. Horne, H. U. 1864, teacher, Boston, Mass.
 Edmund S. Clark, T. C. 1865, merchant, Boston, Mass.
 Henry G. Blair, H. U. 1866, druggist, Omaha, Neb.
 Charles H. Parkhurst, A. C. 1866, Presb. min., New York.
 John K. Brown, H. U. 1869, missionary, Harpoon, Turkey.
 Sidney A. Phillips, D. C. 1869, lawyer, Framingham.
 Walter Adams, H. U. 1870, lawyer, Boston, Mass.
 Michael H. Simpson, H. U. 1871, died in Italy.
 George D. Bigelow, D. C. 1873, lawyer, Boston, Mass.
 Ralph Stone, H. U. 1873, lawyer, Buffalo, N. Y.
 Howard E. Parkhurst, A. C. 1873, professor of music.
 Arthur M. Clark, T. C. 1877, Rom. Cath. priest.
 Howard K. Brown, H. U. 1879, lawyer, Boston, Mass.
 Frederick H. Ellis, H. U. 1879, lawyer, Boston, Mass.
 Samuel E. Somerby, H. U. 1879, lawyer, Boston, Mass.
 Frank Simpson, H. U. 1879, manufacturer, Framingham.
 Elizabeth B. Root, Wellesley Coll. 1880, teacher, Philadelphia.
 Emma C. B. Gray, Smith Coll. 1880, teacher.
 Frank E. Rice, Y. C. 1882, civil engineer.

Wm. H. Thompson, A. C. 1882, teacher.
 George M. Richardson, H. U. 1882.
 Herbert A. Richardson, H. U. 1882.
 Charles F. Mason, H. U. 1882, burser of H. U.
 Arthur K. Stone, H. U. 1883, physician, Boston.
 George Pomeroy Eastman, A. C. 1884, Cong. min.
 Warren S. Adams, D. C. 1885.
 Theophilus Huntington Root, H. U. 1885, Cong. min.
 Gertrude Howe, Wellesley Coll. 1885, teacher.
 Osgood Tilton Eastman, A. C. 1886, clerk, Kansas City, Mo.
 Charles Albert Brown, H. U. 1886, merchant, New York.
 Frank Alexander Kendall, H. U. 1886, architect, Boston.
 John McKinstry Merriam, H. U. 1886, lawyer, Boston.
 Robert Hogg, H. U. 1886, merchant, Boston.
 William J. Fennessey, Montreal Coll. 1886, Cath. priest.
 Edward J. Harriman, H. U. 1888.
 Linie W. Bridges, class of 1891, Smith College.
 Frank F. Howe, class of 1892 in H. U.
 Fanny Bigelow, class of 1892, Mt. Holyoke Coll.
 Ethel D. Puffer, class of 1892, Smith College.
 Nettie M. C. Entwistle, class of 1893, Smith College.

ECCLESIASTICAL.—As stated in its chronological order, a church was organized in Framingham, October 8, 1701, and Rev. John Swift (H. U. 1697) was ordained the first pastor. He died April 24, 1745. His successor, Rev. Matthew Bridge (H. U. 1741), was ordained February 19, 1746, and died September 2, 1775. During his pastorate, *i.e.*, in the autumn of 1746, the Second Congregational Church was formed, and Rev. Solomon Reed (H. U. 1739) was ordained as pastor. He remained in office ten years, and soon after his dismissal the church disbanded. The successor of Mr. Bridge in the First Church was Rev. David Kellogg, (D. C. 1775; D.D. 1824). He was ordained January 10, 1781, and continued in the pastoral office till his death, August 13, 1843, at the advanced age of eighty-seven years, nine months.

In his views of church polity, Dr. Kellogg was a thorough Congregationalist. Previous to his ordination, on specific inquiries being put to him by the church, he announced his intention to conduct himself according to the Congregational principles of church discipline, as understood and applied by this church, from its earliest history, and gave his assent "to the Cambridge platform (eldership excluded), as the rule of ecclesiastical government, agreeably to the custom of these New England Churches."

"As a Congregationalist of the old school, he was settled in the Christian ministry; and, to the principles, usages and habits of thought of the times contemporaneous with his settlement, he adhered to the last."—*Barry*.

In personal appearance Dr. Kellogg was more than ordinarily prepossessing. In stature he was above the medium height; with a well-proportioned and muscular frame; a fresh yet placid countenance; strongly-marked features, expressive of an even temperament, good sense, decision and benevolence. His general bearing combined dignity with ease; his step was firm, his presence commanding. He had the air of one who to native refinement added true culture and knowledge of the world. It was evident that he was conscious of a truthful and manly spirit; and, with a sense of the high character of his profession, was

united a genial nature, which found expression in those courteous manners by which he was ever so distinguished. He was, in the best sense, a Christian gentleman of the old school.

Coming to this town towards the close of the Revolutionary War, he had the opportunity, and his character and talents and purposes fitted him for a large and beneficent influence in shaping the course of local events. Unselfish, conservative, of broad views and lively sympathies, he was a power for good in all departments of the town's life.

Owing to a division of sentiment between the church and the parish in regard to Christian doctrines, in 1830, Dr. Kellogg and the majority of the church withdrew from the old meeting-house, and built a new one which was dedicated September 15, 1830; and the same day Rev. George Trask (Bowd. Col. 1826), was ordained colleague pastor. Mr. Trask was dismissed April 6, 1836. The successive pastors of the church have been: Rev. David Brigham, (U. C. 1818), installed December 29, 1836, dismissed May 9, 1844; Rev. Increase N. Tarbox, D.D. (Y. C. 1839), ordained November 22, 1844, dismissed July 2, 1851; Rev. Joseph C. Bodwell, D.D., (D. C. 1833), installed June 30, 1852, dismissed November 5, 1862; Rev. John K. McLean (U. C. 1858), installed February 19, 1863, dismissed September 1, 1867; Rev. M. J. Savage, installed January 23, 1868, dismissed April, 1870; Rev. Lucius R. Eastman, Jr. (A. C. 1857), installed June 8, 1871.

At the separation in 1830, the parish held the meeting-house; and the church connected therewith has been known as The Church of the First Parish. The pastors have been Rev. Artemas B. Muzzey (H. U. 1824), ordained June 30, 1830, dismissed May 18, 1833; Rev. George Chapman (H. U. 1828), ordained November 6, 1833, died in office June 2, 1834; Rev. William Barry (B. U. 1822), installed December 16, 1835, dismissed December 16, 1845; Rev. John N. Bellows, ordained April 15, 1846, dismissed 1849; Rev. Joseph H. Phipps, ordained 1849, dismissed 1853; Rev. Samuel D. Robbins, installed 1854; dismissed 1867; Rev. H. G. Spaulding (H. U. 1860), installed 1868, dismissed 1872; Rev. Charles A. Humphreys (H. U. 1860), installed November 1, 1873.

First Baptist Church in Framingham.—The earliest denominational effort in this town by the Baptists, was made about the time when Rev. Mr. Reed resigned the charge of the Second Congregational Church, and by persons who had been connected with that church. This was probably in the spring or summer of 1757. Elders Whitman Jacobs and Noah Adams, from Connecticut, preached here; and in 1762, Mr. Jacobs administered baptism to four persons. A Baptist Society appears to have been organized that year, which supported preaching part of the time. Between 1762 and 1792 about thirty persons were baptized in Framingham; but there is no evidence that they were constituted into a church. In 1809,

there were but five Baptist professors here, viz., Rev. Charles Train, Benj. Haven, the wife of John Fiske, the wife of Moses Fiske, and the wife of Amasa How. In 1810, Elder Grafton baptized two persons; and in 1811 Mr. Train baptized five. August 4, 1811, a church was organized under the name of "The Baptist Church of Weston and Framingham." A powerful revival commenced in this church, and spread through the town in 1814-15, as the result of which about fifty were added to the church. In the fifteen years while this church continued a branch of the Weston church, the numbers added were 177 by baptism, and 32 by letter. May 3, 1826, this church became a distinct body, with 119 members.

The First Baptist Society in Framingham was incorporated June 22, 1812.

Preachers and Pastors.—Mr. Joseph Byxhe, Jr., who lived on the Hopkins (I. B. Wales, Jr.) place, was probably the first stated preacher. Others were, Nathaniel Green, who lived and died in Leicester; Simon Snow, of Upton, preached here and at Weston two or three years, afterwards became a Congregationalist, and died at Thomaston, Me.; Noah Alden, of Bellingham, was here in 1773; Elisha Rich, a gunsmith, lived in town for a time, and preached regularly on the Sabbath; removed to Chelmsford, and thence to the West; Edward Clark supplied the desk from 1780 to '90; removed to Medfield, but returned in 1801, and preached till the settlement of Mr. Train. Rev. Charles Train (H. U. 1805), was ordained January 30, 1811; dismissed September 1839. Rev. Enoch Hutchinson was installed August 24, 1840; dismissed January 8, 1841. He was a college graduate, and distinguished scholar in the Arabic language and literature. Rev. James Johnston preached from June 27, 1841, to August 10, 1845. Rev. Jona. Aldrich (B. U. 1826) commenced his labors September 27, 1846, and resigned April 3, 1851. In this time he baptized eighty persons. Rev. Wm. C. Child, D.D., a graduate of Union College, was pastor from May 1, 1851, to April 1, 1856. During his pastorate fifty-three persons were baptized. Rev. Joseph A. Goodhue (D. C. 1848), was here, 1859 to July 31, 1862. Rev. A. W. Carr succeeded, and remained till November 1, 1865.

Rev. Arthur S. Train, D.D. (B. U. 1833), was installed in 1866, and died in office January 2, 1872. Rev. W. P. Upham commenced his labors October 1, 1872, and resigned in 1877. Rev. George E. Leeson (B. U. 1874) was ordained July 29, 1877; died in office August 20, 1881. The present pastor, Rev. Franklin Hutchinson, was born in West Hoboken, N. J., August 26, 1853; educated at N. Y. University, and Union Theol. Sem., class of 1881; ordained June 18, 1882.

The First Methodist-Episcopal Church.—A movement to establish this denomination in this town was made in 1788.

Probably Lieut. Jona. Hill became acquainted with the tenets and methods of the denomination

when in the army near New York, in the Revolutionary War; at which time Francis Asbury, the first bishop of the church in the United States, was actively at work in that region.

The first class consisted of Jona. Hill (leader), Benj. Stone, Isaac Stone and their wives, and Matthew Stone. They first met for religious worship in the dwelling-house of Benj. Stone. This was one of the earliest—if not the earliest—church of the order, gathered in Massachusetts. The records of the old Needham Circuit do not extend back of 1791; and there is no doubt that the Saxonville Class helped to make up the reputed number of thirty-five members.

For several years the church in this town was visited by various preachers, viz.: John Hill, Bishop Asbury, Jesse Lee, Ezekiel Cooper and George Pickering, through whose missionary zeal Methodism was firmly established in New England.

For thirty-five years the growth of Methodism in town was slow, and confined to a few families. In 1825 Mr. Lewis Jones, who was an earnest man and a successful worker in the denomination for a third of a century, gathered a class at "The Corners," north of Saxonville, of which he was appointed leader. The names of the members of this class are as follows:

Lewis Jones, Sarah Stone, Catherine Hill, Persis Hill (afterwards Eaton), Joseph Potter, Jane Walker, Joseph Moulton, Olive Moulton, Hannah Stone, Betsey Eaton, Luther Underwood, Walter Stone, Eliza Stone, Pamela Hill, L. Dudley, Sallie Flagg, Eliza Belcher, Elbridge Bradbury, Betsey Bailey, Roxana Godenow, Elenor Godenow, Lewis Dudley, Patty Dudley, Ann Moulton, Abigail Bradbury, William Dudley, Susan Stone, Sally Underwood, Fisher Ames, L. Ames, M. Eaton and Jenny Eaton.

A meeting-house was erected at the Corner in 1833-34, and a society was duly organized during the last-named year.

A prominent and worthy member of the church during this comparatively early period of its history was Jotham Haven, a local preacher, father of the late Bishop E. O. Haven.

During the single decade that the society continued to worship in the church at the "Corners," it enjoyed only a scant prosperity. The Conference preachers who served it were C. Virgin, Peter Sabin, N. B. Spalding, Paul Townsend, Thomas W. Tucker, George Pickering and Willard Smith. The society, in the year 1842, considering themselves financially too feeble to support a Conference preacher, Rev. L. P. Frost, then teaching in Wayland, near by, was engaged to supply the pulpit, which he did most acceptably.

In 1844, for the better accommodation of people living around the factories, the church was removed to the village.

In 1880 the present tasteful and commodious house of worship was erected, at a cost, including the land, of about \$10,000. It was dedicated January 5, 1881.

The Saxonville Religious Society was incorporated February 22, 1827, and a meeting-house was built the same year. Religious worship was at first conducted by ministers of the Unitarian denomination, and subsequently for a time by the Methodists and others. A Congregational Church was organized May 26, 1833, which later took the name of the Edwards Church in Saxonville.

The first pastor of this church was Rev. Corbin Kidder (A. C. 1828), ordained July 30, 1834; dismissed October 25, 1837. His successors have been Rev. Isaac Hosford (D. C. 1826), ordained February 24, 1838, dismissed March 10, 1847; Rev. Birdsey G. Northrop (Y. C. 1841), ordained March 10, 1847, dismissed November 6, 1857; Rev. Henry Allen (D. C. 1849), installed November 6, 1857, dismissed October 1, 1859; Rev. John H. Pettengill (Y. C. 1837), installed April 16, 1860, dismissed 1862; Rev. George E. Hill (Y. C. 1846), installed October 15, 1863, dismissed 1870; Rev. Charles Jones (U. C. 1832), installed October 4, 1870, dismissed 1879; Rev. Samuel Bell (D. C. 1866), was stated supply 1880 and '82; Rev. Theodore L. Day (Y. C. 1867), commenced his pastoral labors in March, 1883, and continued in office till his death, in 1885. He was succeeded by Rev. Moody A. Stevens, the present pastor.

A Universalist Society was formed November, 1829, and built a meeting-house, which was dedicated September, 1832. The society employed ministers, who entered upon their pastoral duties without the form of a regular installation. After maintaining preaching for about twenty years, the society dissolved.

Catholic Churches.—Mission work was commenced at Saxonville by Rev. George Hamilton as early as 1844, which resulted in the organization of St. George's Parish and the erection of a church, which was opened for public worship September 14, 1845. The successors of Fr. Hamilton have been Rev. Edward Farrelly, Rev. John Walsh, Rev. Anthony J. Rossi, a graduate of St. Mary's Seminary, near St. Louis, Mo., and Rev. James E. Rogers.

In July, 1877, a new parish, known as St. Bridget's Parish, was organized, taking in Framingham Centre, South Framingham and Ashland.

This parish purchased the church edifice at the Centre, built by the Universalists, and later built a commodious church at the South Village, which is now known as St. Stephen's Church. Regular worship is maintained at both places. This parish is in charge of Rev. John S. Cullen.

The South Framingham Baptist Church was constituted March 17, 1854. A meeting-house was erected and dedicated March 15, 1855.

The pastors have been, Rev. Bradford H. Lincoln, installed March 30, 1854; dismissed Nov. 2, 1855. Rev. Samuel W. Foljambe, installed April 20, 1856; dismissed December 31, 1858. Rev. Theron Brown (Y. C. 1856), installed December 15, 1859; dismissed November 29, 1861. Rev. Samuel Brooks (B. U.

1852), was here about two years. Rev. A. M. Higgins (B. U. 1854), installed March 31, 1855; dismissed January 1, 1867. Rev. T. T. Fillmer (Roch. U.), installed January 3, 1868; dismissed —. Rev. George R. Darrow, installed February 1, 1874; preached two years. Rev. Henry G. Safford (B. U. 1858), installed December 12, 1875; dismissed 1885. Rev. E. S. Wheeler.

St. John's Church, Protestant Episcopal.—On application of Charles R. Train, George Eastwood, T. C. Hurd, J. W. Brown, A. R. Esty and others, the parish was duly organized December 21, 1860; wardens, J. W. Brown, A. R. Esty; clerk, T. C. Hurd. Services were held for a time in the town hall; then in the old Universalist meeting-house. In 1870 a tasty stone church was erected on the west slope of Bare hill, and first occupied on Easter Sunday, 1871. It was consecrated June 12, 1872.

A Methodist Episcopal Church was gathered at South Framingham in February, 1869, and formally organized at the Quarterly Conference held at the house of H. W. Carter, November 5, 1869. There were at this date about twenty members in full connection. Services were held in Waverley Hall till the autumn of 1873, when the Kennedy property was purchased by the society, and the hall since known as "Irving Hall" was fitted up for a place of worship. The dedicatory sermon was preached December 21, 1873, by Rev. William R. Clark, D.D. A new and handsome church edifice has lately been erected.

The South Congregational Church, composed largely of members dismissed from the church at the Centre for that purpose, was organized at South Framingham, January 2, 1873. The first meetings were held in Nobscot Hall. A commodious chapel was built and dedicated in 1874. A large and imposing church edifice was erected in 1883. The original number of members was 57; number January 1, 1889, 239. Rev. D. M. Bean (Y. C. 1858), was acting pastor, 1873-79; Rev. Wm. R. Eastman (Y. C. 1854) was installed February 12, 1880, dismissed 1888; Rev. Frederick E. Emrich was installed January 29, 1890.

The First Universalist Society of South Framingham was organized April 28, 1878; re-organized under the statute April 5, 1882. The original number of members was twenty-seven. A neat church edifice was built on Franklin Street, and dedicated Nov. 9, 1882.

A Presbyterian Church was organized at South Framingham two years ago, which has worshipped in a hired hall. A contract has just been made for building a church on the corner of Hollis and Winthrop Streets. Rev. J. W. Flagg is pastor.

CEMETRIES.—*The Old Burying-Ground.* As was customary in those days, the first burials of the dead were in the grounds immediately surrounding the meeting-house. And as these grounds were included in the "Meeting-house Lands" reserved by Mr. Danforth, there was a manifest propriety in using them for this sacred purpose.

This ground was fenced in with "a good four-foot wall" in 1805-06; but it was much neglected, and cows and sheep were pastured thereon. About the year 1850 a system of improvements, in charge of Mrs. J. J. Clark and Jos. G. Bannister, was begun, and has been carried on more recently by Dexter Hemenway. The walks have been graded and graveled; the head-stones righted up or buried on the top of the graves, and the grounds generally put in order. The expense of these improvements has been borne in part from the avails of the "May Festival," originally started by some public-spirited ladies as early as 1849, and continued annually to the present time.

South Burying-Ground.—This small plot of land, one-half acre, was set apart for burial purposes in 1824. January 24, 1824, Joseph Haven executed a deed of this land, to Levi Metcalf, Obed Daniels, Elias Grout, John Wenzell, and others, "proprietors of the South Burying Ground in Framingham." In 1874, the surviving proprietors deeded the land to the town.

In 1883, Willard Howe donated to the town the sum of \$250, to be known as the "Howe Cemetery Fund," the annual income of which is to be used "for the care of the South Cemetery in Framingham, and especially of Lot No. 14."

Saxonville Cemetery. This Burial Lot, then comprising one acre, was purchased by the town of Charles Fiske, in 1838. In 1865, Mr. Fiske sold to the town another acre, on the easterly side.

The Catholic Cemetery, consisting of about five acres, was consecrated in 1856.

Edgell Grove Cemetery.—June 27, 1846, the town appointed a committee, consisting of Moses Edgell, N. S. Bennett, Warren Nixon, Patten Johnson and Dexter Esty, to procure a lot of land near the Centre village for a new burial place. In 1848 nine and a half acres of woodland, lying northwest of the Common, was purchased of Colonel Edgell, and formally consecrated by appropriate ceremonies. In 1858 three acres additional, lying on the southwesterly side, were purchased of James W. Brown; and about three acres on the northerly and northeasterly sides, were by deed of gift, made over to the town by Colonel Edgell at his decease. April 30, 1862, James W. Clark donated to the town eight and a half acres, lying on the southwest side, and in 1876 gave a deed of the land lying upon the southeastern line of the original grounds. Other lands have been purchased, so that the present area is twenty-eight acres.

By his will, Col. Moses Edgell bequeathed the sum of \$20,000, a part of which is to be expended in building within the grounds, a chapel; and the remainder is to constitute a permanent fund, the income of which is to be expended in the care and improvement of the cemetery. George Phipps bequeathed the sum of \$500, the income of which is to be applied, 1, in the proper care of the donor's own lot; 2, for the

general benefit of the cemetery. There is also a fund of about \$500, the income of which is at the disposal of the trustees. There is also a fund, now amounting to \$6010, contributed by owners of lots, the income of which is to be applied to the perpetual care of the said lots. And it is worthy of record that from the avails of the annual "May Festival," organized May 1, 1848, and managed by the ladies, there have been expended for improvements in this and the old cemetery, not less than \$9500.

INDUSTRIES.—Such was the situation of the town, and such the character of the inhabitants and such the facilities of obtaining water power that the chief dependence of our people from the first, was on home productions and manufactures. Wool and flax for garments, corn and the smaller grains for food, grist and saw and fulling-mills, tanneries and most of the mechanical trades came with the early settlers, and grew in numbers and scope with the growth of population.

Stone's corn-mill at the Falls, built in 1659, and the saw and fulling-mills there before 1735, have already been noticed. Savil Simpson built grist and saw-mills on Hopkinson River in 1707; and Col. Joseph Buckminster put in a grist-mill on the brook near his house about the same date.

The mechanical trades essential to the wants of everyday life were introduced early. Most of the first comers had some practical knowledge of the use of carpenter's and shoe-makers' tools. Some men had a smattering of several trades. Thomas Eames, a settler in 1669, was mason and brickmaker. Isaac Learned, cooper, was here in 1679; John How, carpenter, 1689; Isaac Clark, carpenter, 1692; Caleb Bridges, bricklayer, Benjamin Bridges, blacksmith, the wife of Joseph Trumbull, weaver, were here in 1693; Jeremiah Pike, spinning-wheel maker, 1696; Joseph Buckminster, tanner, 1703; Jonathan Rugg, blacksmith, 1704; Jonas Eaton, carpenter, brick-maker and tanner, 1706; John Singletary, cooper, 1709; Dea. Moses Haven, shoemaker, 1710; Ebenezer Hemenway, weaver, 1711; Jonathan Maynard, weaver, 1713; Joseph Haven, shoemaker, and Ebenezer Boutwell, tinker, 1721. William Ballard, the tailor, and Thomas Temple, the cabinet-maker, came later, but before the old French War. Professional weavers made only the better class of dress goods, woolen and linen, and linsey-woolsey; the mother of the family usually had a spinning-wheel and loom, and made the common clothing goods.

Forges were established by Andrew Newton on Hopkinton River in 1745, and by Ebenezer Marshall on the same stream, at the site of Cutler's mills in 1747. These turned out axes, hoes, scythes and farming tools generally. Later a forge was put in on the river, north of Addison G. Kendall's.

Manufactures.—It was not till after 1800 that the water-power of Sudbury River and its main affluents was fully utilized for manufacturing purposes.

The Revolutionary War taught our people to depend on themselves for the necessities of life, and the rude machinery of the household and the fulling-mill met the demand. But the return of peace and prosperity created new wants which these primitive appliances could not supply. Immense importations from abroad were made, and foreign luxuries became home necessities. This state of things was suddenly arrested by the breaking out of hostilities between England and France, and the restrictions placed upon commerce by these governments aimed directly against each other, but indirectly affecting our country. The embroilment of our government led to the embargo act of 1807, and the interdict of commercial intercourse with England and France of 1809, and culminated in the declaration of war against Great Britain in 1812. This embroglio threw our people again upon their own resources for supplying the need of clothing and commodities. Extensive manufacturing establishments were started for almost every sort of merchandise.

The dams already constructed on the Hopkinton and Sudbury Rivers and Cochituate Brook were brought into use for new and more complicated ventures.

The first of the new enterprises was the cotton-factory on the Hopkinton River, at what is now Ashland Centre. January 23, 1811, Samuel Valentine, Jr., bought the privilege of Samuel Clark, and in connection with Aaron Eames, Elias Grout, Fisher Metcalf and others, organized the Middlesex Manufacturing Company. Buildings were erected and the manufacture of cotton goods commenced. The enterprise had a varied history till 1828, soon after which it came into possession of James Jackson, a man of energy and business tact, through whose influence the village of Unionville sprang up, which flourished and grew into an important centre. Mr. Jackson sold the property in 1852. It is now owned by the Dwight Print Company.

Cotton Factory at Saxonville.—The starting of this enterprise was only a few months later than the one at Unionville. In the same year Hopestill Leland, of Sherborn, bought the *Deacon Brown privilege* on Cochituate Brook, of Ebenezer Brown, and erected a cotton-mill. February 6, 1813, Calvin Sanger, Aaron Leland, Joseph Sanger, Leonard Dearth, Benjamin Wheeler, Luther Belknap, Hopestill Leland, Jr., Comfort Walker, Moses Adams, Lewis Wheeler, Micah Adams, Joseph L. Richardson, Phillips Clark and Elias Whiting were incorporated as the Framingham Manufacturing Company, for the purpose of manufacturing wool and cotton, with power to hold real estate to the value of \$30,000, and personal estate to the value of \$50,000. The next year, Mr. Leland sold six acres, with corn and grist-mills, to this company, and thirty-two acres to Calvin Sanger—all the interest of the new enterprise. Mr. Walker located here, and the company started with energy and soon

gathered a considerable number of families, having children old enough to work in the mill, opened a store in charge of Samuel Murdock, employed a blacksmith (Joseph Prichard) and did a large, though not profitable, business for a number of years. The property eventually passed into new hands represented by I. McLellan, of Boston. The factory building was burned in 1834. In July, 1844, this privilege was sold to William H. Knight, who put up a building and set up machinery for spinning woolen yarns. Mr. Knight sold to the city of Boston.

Woolen Factory at Saxonville.—April 5, 1822, the following persons, viz., Jere. Gore, John S. Harris, Stephen Gore, Jr., Ephraim Jones, all of Boston, and Abner, Benj. and Eliphalet Wheeler, of Framingham, bought of Charles Fiske, Isaac Dench, Josiah Stone, Abel Eaton, Abner Stone, and others, the land on both sides the river, together with the water privilege and buildings, dwelling-houses, etc., at the Falls in Saxonville, and the next year built the first woolen-mill. February 4, 1824, the parties above-named were incorporated under the name of the Saxon Factory Company, for the purpose of manufacturing wool in the town of Framingham, with power to hold real estate, not exceeding the value of \$100,000, and capital stock to the amount of \$200,000. May 8, 1824, Jere. Gore and his associates sold the entire estate and water rights, for \$20,000, to the Saxon Factory. The canal had been dug and a mill erected in 1823.

February 8, 1825, the Saxon Factory and the Leicester Factory were, by act of the Legislature, "made one corporation, for the purpose of manufacturing wool, cotton and machinery in Leicester and Framingham."

June 11, 1829, Joseph Head, Henry Gardner, Edward Miller, H. H. Jones and others were incorporated as the Saxon Cotton and Woolen Factory, for the purpose of manufacturing cotton and wool in the town of Framingham.

February 16, 1832, the name of the company was changed to that of the Saxon Factory. The statistics of this company April 1, 1837, were: Woolen-mills, 5; sets of machinery, 11; wool consumed, 744,000 lbs.; cloth manufactured, 268,640 yards; value, \$311,800; males employed, 105; females, 141; capital invested, \$415,000.

In 1837 the New England Worsted Company purchased the entire property of the Saxon Company and removed their worsted machinery from Lowell to Framingham. The main business since then has been the manufacture of worsted carpet-yarns and woolen-blankets. In 1858 this entire property was bought by M. H. Simpson and Nathaniel Francis, and the name changed to the Saxonville Mills. No change was made in the kind of goods manufactured. During the late Civil War the company filled large orders for blue Kersey army cloth. The statistics for 1865 were: Number of mills, 4; sets of machinery, 25; pounds of scoured wool consumed, 2,000,000;

gross value of stock used, \$800,000; yards of blanket-manufactured, 1,500,000; value, \$900,000; pounds of yarn manufactured and not made into cloth, 600,000; value, \$300,000; yards of army cloth made, 150,000; value, \$200,000; males employed, 393; females, 390. Statistics for 1875: Mills, 2; capital, \$800,000; value of goods manufactured, \$850,000; males employed, 263; females, 268. In 1878 the company commenced the manufacture of hair-cloth, in imitation of seal-skin; but the move was not a success. The mills were burnt in 1883, and re-built on a different plan—a large single story edifice.

Carpet Factory.—In 1829 Mr. Wm. H. Knight bought of Col. James Brown the old fulling-mill privilege on Cochituate Brook, changed the cotton-thread machinery and immediately commenced the manufacture of carpets. His means were limited, and not at all commensurate with his skill. At first he would purchase wool only sufficient for a single piece of carpeting, work it up, take the piece to Boston, and from the proceeds buy more wool. The business prospered, and in 1839 Mr. Knight bought the "bridge lot," eighty rods below the fulling-mill site, where he put in a dam, erected new buildings and started large carpet works. In 1844 he purchased the old cotton-mill privilege, where he put in machinery for spinning woolen yarn. Controlling and using these three water-powers, which embraced the whole fall of the stream, his business rapidly increased, so that in 1845—only fifteen years after his humble beginning—the returns show: Amount of wool annually consumed, 465,000 pounds; yards of carpeting produced, 199,037; value, \$149,530; males employed, 191; females, 41.

Mr. Knight sold all his property and water-rights on Cochituate Brook to the city of Boston, June 25, 1846. The buildings connected with the *bridge lot* works were burnt on the morning of March 20, 1847.

Paper-Mills.—In 1817 Dexter and David Bigelow erected a mill on the Hopkinton River, for the manufacture of writing-paper; and in 1828 Calvin Shepard and Son purchased the site of the Dench Mills, on the same stream, and put in paper-making machinery. These privileges are now in Ashland. In 1837 the stock manufactured was 278 tons; value of paper, \$46,000; males employed, twelve; females, eleven; capital invested, \$50,000.

Book-Bindery.—Otis Boynton established a book-bindery here in the spring of 1822. In 1833 John J. Marshall joined the concern, and a book and stationery store was opened. The business was carried on till February, 1864.

Hatters.—Daniel Bridge, felt-maker and hatter, built a shop in the Centre in 1781, and remained here a few years. In 1823 Silas Hunt and Ira Mitchell established a hat manufactory, where is now Otis Childs' dwelling-house. In 1845 four hands were employed, and the net income of the business was \$2500. The business was given up in 1852, Mr. Mitchell and Mr. Jones removing to Milford.

Tanneries.—Colonel Joseph Buckminster and Jonas Eaton built tan-works very early. Joshua Eaton, soon after 1723, established a tan-yard near School-house No. 7. David Stone and Jonathan Hill had a tannery north of Saxonville before 1769. They sold to John Stone, of East Sudbury, who sold March 17, 1788, to Elijah Clayes, who carried on the business till March 27, 1790, when he sold to Micah Fiske, by whom and his son Charles it was conducted for half a century.

Isaac Warren bought the John Fiske Tannery of Eli Bullard in 1797, and carried on the business till his death.

In 1780 Thomas and Ezekiel Williams of Roxbury, tanners and curriers, bought the Mixer Tannery, on Roaring Brook, near Southborough line, where is now the brick-yard, which they sold in 1790 to Benjamin Eaton, Jr., who continued the business, and died there.

There was a tannery north of the Albert G. Gibbs house, known as the Dench Tannery, but by whom started is uncertain. In 1809 Joseph Bennett sold it to his son Nathaniel S., who sold April 21, 1817, to Lewis Keyes and Francis Dana, who sold December 8, 1818, to Aaron and Henry H. Hyde, who carried on the business for many years. These tanneries were operated on the cold process, requiring at least six months to properly cure the hides. The introduction, elsewhere, of the hot liquor process, and modern machinery, broke up the business in this town.

Straw Braid and Bonnet Manufacture.—In 1799 or 1800, the wife of Joseph Bennett and her daughter, Betsey, commenced the plaiting of grass and rye straw, which material was made into hats and bonnets; and thus a profitable business was started, which continued for some years. The bonnets were trimmed around the edges with nipping braid made of three strands.

The following memorandum shows that Mrs. Mary Rice, wife of Capt. Uriah, started a like business at nearly the same time: "Oct. 2, 1800, we began to work on straw bonnets and trimmings; and cleared \$340." Mrs. Rice carried on the business for about fifty years. Her trade was principally in Boston, Salem, Gloucester and Portland.

Maj. Benj. Wheeler went into the straw braid and bonnet business in 1807. His trade was largely with the South, and amounted in some years to \$30,000. About 1813, Capt. J. J. Clark commenced the bonnet business, which he continued till 1830. The wife of Joseph Sanger was also engaged in the manufacture of straw bonnets.

The starting of this business in town created a new and profitable family industry. The braid was made by the girls and boys at home. The winter rye was cut in June; the straw scalded and cured. That part which grew within the sheath was cut in uniform lengths, and whitened by brimstone fumes, and split on a hand machine, coarse or fine, according to the

demand and the skill of the braider. The fine braid was known as "Dunstable." A smart girl would braid 10 to 12 yards per day of the fine, and 18 to 24 yards of the coarse. Fine braid was sold at 3 to 3½ cents per yard. Store-keepers took it in payment for goods. They sold their goods for two prices, *cash price* and *straw price*; the latter being considerably higher than the other.

The wife of Lovell Eames commenced manufacturing bonnets in 1825; and about 1830, her son Horace took charge of the business, and added a distinct department of bleaching and pressing, for himself and the bonnet makers in this and the neighboring towns. Franklin Manson commenced working for Mr. Eames in 1836; and in 1840, Mr. Manson took the business into his own hands. In 1844, Mr. Manson entered into partnership with George Richardson, for the manufacture of straw bonnets. Their straw shop (now Liberty Block) was built in 1845. The partnership was dissolved at the end of two years; and soon after Mr. Manson built a shop, and carried on business on his own account, till 1864.

Alexander Clark commenced the manufacture of straw bonnets, as a distinct business in 1838, and with his brother Newell continued till 1853, when he began the manufacture of palm leaf hats and shaker hoods, which he and his son kept up till a late date.

After leaving Mr. Manson, George Richardson and his brother Augustus carried on the bonnet business till 1860.

Augustus Richardson built a new shop, where he manufactured straw goods to a large extent, for some years; and was succeeded by George P. Metcalf and H. K. White.

Curtis H. Barber succeeded to the business of Mr. Manson in 1864, and now has a large manufactory of his own, near the Baptist meeting-house.

The statistics of this industry in this town, are: 1836. Straw bonnets manufactured, 2950; value, \$5350. 1845. Number of bonnets manufactured, 31,000; value, \$20,100. The cost of the braid was \$450. 1855. Number of straw bonnets made, 107,000; straw hats, 60,000; males employed, 25; females, 300. 1865. Number of straw bonnets made, 120,000; value, \$180,000. Number of straw hats made, 120,000; value \$12,000. Number of males employed, 50; females, 800. Number of palm leaf hoods manufactured, 230,000; value, \$65,000. Number of males employed, 6; females, 40. 1875. Value of straw goods manufactured, \$830,000. Capital invested, \$255,000.

Massachusetts Silk Company.—March 14, 1836, Thomas G. Fessenden, Geo. C. Barret and Wm. H. Montague were incorporated as The Massachusetts Silk Co., "for the purpose of raising, reeling, throwing and manufacturing silk, in the town of Framingham." Capital stock \$150,000. April 25, 1836, the directors bought, for \$7150, the home farm of Col. Nat. Fiske, containing 139 acres, with buildings, etc.

Eight or ten acres of land were planted with mulberry cuttings, which grew luxuriously. The company was taxed for two or three years.

A little before this date, Wm. Buckminster, Esq., planted what is now known as the old agricultural grounds, with mulberry cuttings, with a view to the feeding of silk worms. The trees flourished; but the worms were not a success.

Framingham India Rubber Company.—May 16, 1836, Wm. K. Phipps, Dexter Hemenway and Isaac Stevens were incorporated as the Framingham India Rubber Company, "for the purpose of manufacturing all articles consisting wholly or in part of India rubber, in the town of Framingham." Capital stock, \$70,000. Wm. K. Phipps was the originator of the project. He was of an inventive genius; and had discovered a method of dissolving rubber, and spreading it on cloth, etc. The company commenced work in the summer of 1835, in Mr. Phipps' shop. After incorporation, they bought three-fourths of an acre of land, and built a large shop where they manufactured large quantities of rubber-coated canvas for car-tops, cloth for aprons, using silesia for the base, and some rubber shoes. The price of the raw rubber was six or seven cents per pound. Besides the corporators, James Boyd of Boston, Samuel Warren, Micah Stone, John Ballard (2d), and Gardner Kellogg were stockholders. The company carried on business for three years; sold the real estate to J. J. Marshall, who converted the shop into a dwelling-house (now owned by Mrs. M. F. Tracy and Mrs. J. Hammond). The stockholders met with no loss, and made no gain.

Soon after Mr. Phipps' success in dissolving rubber was known, Dr. Simon Whitney commenced making experiments and discovered a new process. May 16, 1836, Simon Whitney, Geo. Bullard, W. E. Faulkner, and — Barker, of Weston, were incorporated as the Water Power India Rubber Company, "for the purpose of manufacturing all articles composed wholly or in part of India rubber, and also various kinds of machinery." Capital stock, \$130,000. This company erected a shop on Stony Brook, just below Bullard's Bridge, where they made men's wearing apparel, aprons, bonnets, etc. The name of the company appears on our tax-list 1836-42. The shop was removed to the William Moulton place, and is now W. C. Wight's livery stable.

The Gossamer Rubber Company began work at the South village in 1876, and removed to Park's Corner in 1877. *The Para Rubber Shoe Company* commenced business at the South village in 1884. The history of these last two enterprises belongs to a separate section.

Hastings' Carriage Manufactory.—Hollis Hastings commenced the manufacture of harnesses and carriages in 1832. In 1835, he bought the old Town House, and removed to the corner, south of his father's wheelwright's shop, where he carried on carriage and harness-making in all their branches, with success, for about thirty-five years.

Fire Department.—In 1818 a fire-engine was purchased by subscription; and the town appropriated \$70 to build an engine-house. It was placed directly back of Symmes' harness-shop.

Fire-wardens were first chosen in 1819. In 1823 a set of fire-hooks, a harness for the engine, twenty-four buckets, and poles for the wardens were purchased, at an expense of \$100. A fire-engine was procured at Saxonville in 1828 or '29; and an engine-house was built there in 1833. In 1835 the town voted to remit their poll taxes to all regularly enlisted firemen. In 1841 a new engine was bought for the Centre, and the old tub removed to the South village, and a company formed there. An act to establish a Fire Department in Framingham was passed February 3, 1847, which was accepted by the town, and the department organized in 1853.

There are now owned by the town two steam fire-engines, one located at the Centre and one at Saxonville. A hook-and-ladder company has been organized at the South village. There is also a well-appointed hose company. A system of fire-alarms has been established in each of the villages. The hand-engine was transferred to Nobscot, where a full and efficient company has been formed.

Railroads.—The project of building a railroad from Boston to Worcester was agitated as early as 1827. The charter was granted June 23, 1831. Two routes were surveyed, one where it is built, and the other through Framingham Centre. The route through the Centre was regarded as the most feasible; but the Wheeler brothers and others interested in the turnpike strongly opposed this plan, and their opposition led to the selection of the southern route. The road was opened for travel to Angier's Corner April 3, 1834; to Ashland September 30, 1834; to Worcester June 30, 1835.

The first train through this town consisted of an engine (the "Yankee," weighing six tons) and seven cars, of about the size of a stage-coach, with doors at the sides. The train stopped at the South Framingham station for a while, and then stopped at Farm Pond to take in water, which was passed up in pails. The fare between Framingham and Boston was seventy-five cents in summer and \$1 in winter.

The opening of the railroad gave a great impetus to the business life of the South village, and caused a declension as marked in the Centre.

The Saxonville Branch Railroad was opened in 1846. The Milford Branch was completed and opened in 1847. In 1850 a branch was built connecting the South and Centre villages.

The Agricultural Branch Railroad, from South Framingham to Northboro', was built in 1854; and purchased and extended by the Boston, Clinton & Fitchburg Company to Fitchburg, in 1865. The Mansfield & Framingham Railroad was completed and opened in June, 1870; and the Framingham & Lowell Road in August, 1871. The last three roads

are leased and operated by the Old Colony Road as its Northern Division.

BANKS.—The Framingham Bank was incorporated March 25, 1833; the persons named in the act as incorporators were Micah Stone, Dexter Fay, Sullivan Fay, Elijah Perry, Rufus Brewer, Moses Edgell and Josiah Adams. Capital stock, \$100,000; increased in 1846 to \$150,000, and in 1849 to \$200,000. It was changed from a State to a National bank in November, 1864. The successive presidents have been Josiah Adams, Micah Stone, Oliver Dean, Sullivan Fay, Francis Jaques, Moses Edgell, James W. Clark, I. S. Wheeler, J. J. Valentine. Cashiers: Rufus Brewer, William H. Foster, Edward Illsley, Francis Jaques, Francis T. Clark, James J. Valentine, Fred. L. Oaks. The first dividend was declared April, 1834; and in no instance since have the regular semi-annual dividends in April and October been passed.

This bank was removed to the South Village in 1888, having purchased the assets and assumed the liabilities of the bank established there.

The South Framingham National Bank was organized June 14, 1880, with a paid-up capital of \$100,000. President, James W. Clark; cashier, F. M. Stockwell. The succeeding presidents were Adolphus Merriam and Franklin Manson. Fred. L. Oaks succeeded F. M. Stockwell as cashier. In 1888 this bank surrendered its charter, and its business was assumed by the older bank.

Framingham Savings Bank.—This institution was chartered in March, 1846, and commenced business the following May. Col. Moses Edgell, in whose mind first originated the idea of a savings bank in this town, was chosen president at its organization, and held the office till 1871. He was succeeded by George Phipps, who remained in office until his death, February 19, 1876. Charles Upham succeeded Mr. Phipps, and died in office, March 10, 1880. Luther F. Fuller, Adolphus Merriam and F. E. Gregory have since held the office. The secretaries and treasurers have been Rufus Brewer, Edward Illsley, Lorenzo Sabine, Coleman S. Adams, L. F. Fuller. Amount of deposits November 1, 1846, \$4969; amount November 1, 1882, \$1,314,318.58.

A branch, for receiving and paying deposits, was opened at the South Village in March, 1883, and the bank removed there the next year. In August, 1885, an injunction was placed upon the bank, since which date its business has been confined to the care of its securities, adjustment of losses and bringing its affairs into shape for a full resumption of business.

The Farmers' and Mechanics' Savings Bank of South Framingham was incorporated April 23, 1883, and commenced business in May. President, Willard Howe; Treasurer, George E. Cutler. Amount of deposits, March 1, 1890, \$403,982.

The South Framingham Co-Operative Bank was organized in 1889; authorized capital, one million dollars.

BOSTON WATER-WORKS.—Cochituate System.—The act, authorizing the city of Boston to take the water of Long Pond was passed March 30, 1846. It conferred the right to construct a dam at the outlet, eight feet higher than the floor of the existing flume. In 1859 the Legislature gave the city power to raise the dam two feet more.

Aug. 13, 1846, the city received a deed from W. H. Knight, conveying all his right and title to Long and Dug Ponds, and the adjacent lands, which had been purchased by him of the Framingham Manufacturing Company, and of individual owners, and comprising, beside the water privilege, one factory building situated at the upper privilege, 83x33 feet, three stories high, and filled with worsted and woolen machinery, in full operation; also two large dwelling-houses and six acres of land adjoining; three dwelling-houses and one acre of land at the middle privilege; and at the lower privilege, one factory, 147x33 feet, three stories high, with ells, all filled with machinery in complete working order; also one other factory, 100x33 feet, three stories high, filled with carpet looms. The price paid Mr. Knight was \$150,000.

The works were so far completed that water was introduced into Boston Oct. 25, 1848.

The full capacity of Cochituate Pond in gallons is 2,011,165,000.

The original cost of the works, in and around the pond, including the conduit, was \$1,403,212.31.

Sudbury River System.—The act authorizing the city of Boston to take the water of Sudbury River, Farm Pond and their affluents, in and above the town of Framingham, was passed April 8, 1872.

The formal taking of Sudbury River under this act was done January 21, 1875.

A temporary dam across the river, below the mouth of Eames' Brook, to turn the water into Farm Pond, was built immediately; and also a trench was dug from the southerly end of the pond to Beaver Dam Brook, by which the water could be conveyed into Cochituate Pond.

In December, 1875, and February, 1876, the city of Boston made seizure of the lands bordering on Hopkinton River and Stony Brook, for the purposes of storage basins; and proceeded to construct three dams—No. 1, below the junction of Hopkinton River and Stony Brook; No. 2, on Hopkinton River, and No. 3, on Stony Brook. Reservoir No. 1 covers 126 acres; No. 2, 154 acres; No. 3, 285 acres; Farm Pond, 190 acres. The combined holding capacity is 4,847,552,989 gallons.

These basins and the conduit were so far finished that water was let into Chestnut Hill Reservoir February 13, 1878, though the dams and basins were not considered finished till the succeeding winter.

The original cost was:

Paid B. E. Butler and the Mill owners, including M. H. Simpson	\$443,140
Paid land damages	\$267,572

Paid building new highways	60,512
Paid cost of three dams and gate-houses	322,329
Paid cost of conduit	2,778,400
Paid cost of engineering, and miscellaneous	321,228
Paid temporary connection	75,611

\$4,008,842¹

These figures do not include the cost of Chestnut Hill reservoir, and the distributing service below, nor the cost of land, construction of dam and basin No. 4, completed at a later date.

NEWSPAPERS.—The first newspaper established in this town was the *Framingham Courier*, a good-sized folio, printed and published weekly by George Brown. It was started in April, 1835, and was continued for less than a year. The *Framingham Gazette* was established in June, 1871, by Pratt & Wood. The *Framingham Tribune* was established in October, 1883, by Charles J. McPherson.

SAXONVILLE POST-OFFICE.—This office was established March 5, 1828, Francis A. Bertody, post-master. He was succeeded by Charles Fiske, January 4, 1830; Henry F. A. Richardson, February 28, 1854; Samuel P. Griffin, June 22, 1855; Samuel S. Danforth, August 15, 1859; John R. Clark, August 15, 1861; Luther F. Fuller, May 30, 1865; Patrick Hayes, Jr., 1885; J. W. Parmenter, 1889.

THE SOUTH FRAMINGHAM POST-OFFICE was established February 12, 1841, Joseph Fuller, post-master. He was succeeded by Edward A. Clark, April 1, 1844; Samuel O. Daniels, July 7, 1849; Willard Howe, July 1, 1853; John B. Lombard, 1885; Edward F. Phinney, March, 1890.

THE NOBSCOT POST-OFFICE was established June 18, 1878, Josiah S. Williams, post-master.

PROVISION FOR THE POOR.—By his will, dated 1728, Abraham Belknap left £10 for the support of the poor of the town. In 1736 the town granted £5 for the relief of a poor family. And the custom prevailed for many years to take up a contribution on Thanksgiving and fast days, and to pay for the board and clothing of the sick poor out of the town treasury. Overseers of the poor were first chosen in 1741. In 1757 the overseers hired the house, built by Rev. Mr. Swift for a study, for a work-house. A work-house, 32 x 16 feet, was built in 1771, on the Centre Common, a few rods northwesterly from the present town hall, where the able-bodied poor were placed and kept at work. It was taken down or removed about 1805. In 1813 Col. Micah Stone left to the town a legacy of about \$10,000, the annual income of which was to be applied to the support of his own needy descendants, if any, and the balance to the general poor. For many years the custom prevailed of letting out the town's poor to the lowest bidder for terms of five years. In 1823 Col. James Brown took them; in 1828 John Wenzell was the lowest bidder. In 1832 the town purchased the farm of Mrs. Solomon

Fay, enlarged the buildings, procured stock, etc., at a total cost of \$4964.17. The house was burnt in 1841, and the present more commodious one erected. In 1868 George Phipps gave to the town the sum of \$10,000, "To be held as a perpetual fund, called the Phipps Poor Fund, the annual income of which is to be distributed by the selectmen, at their discretion, for the support of the worthy poor of the town out of the almshouse." In his will Mr. Phipps left the additional sum of \$10,000, the annual income of which is to be expended under the same conditions as the first gift, said fund now amounting to \$20,000.

WAR OF THE REBELLION, 1861-65.—The action of Framingham on the breaking out of the Rebellion was prompt and decisive. Upon the first tidings of an attack upon the Government of the United States many of our young men enrolled themselves in the active militia; and by the end of April, 1861, nearly a full company was raised and ready for organization and equipment.

May 6, 1861, a town-meeting was held to act on the following articles: First, "To see if the town will appropriate money to constitute a fund to provide a suitable outfit for such military companies as may be organized in this town and accepted by the State, and to furnish all necessary aid to the families of members of the companies, residents of the town, during such time as they shall be absent in the service of their country." Article second, "To see if the town will choose a committee to receive and expend said fund."

Under these articles the following preamble and votes were passed:

"Whereas a grave and extraordinary emergency now exists; whereby the security of our beloved government is threatened by a portion of the people who are bound and sworn to support, defend and obey it: And whereas, in the prosecution of its designs, the rebellious portion have resorted to the employment of armed force; have unlawfully and forcibly seized and do now hold much property belonging to the common government, and do generally disown and act it at defiance; And whereas, we, the citizens of this town, do profess, and are ready to maintain our unswerving loyalty to the government obtained by our fathers by the sacrifice of their blood and treasure, and handed down to us as a sacred and inestimable gift, under which we have enjoyed these blessings which make life happy:—We have assembled together this day, to take such measures as are in our power, to assist in preserving and maintaining for ourselves and our children, this goodly heritage.

"Voted 1. That the town appropriate the sum of \$8000, to constitute the proposed fund.

"Voted 2. To choose a committee of nine, to take charge of and expend the said fund; and C. C. Esty, Oliver Bennett, Wm. H. Carter, David Fiske, Joseph Fuller, George A. Trowbridge, Francis Jacques, Wm. Hastings and Henry Cowles were chosen that committee."

It is worthy of notice that the above provision for aid to the families of soldiers is seventeen days prior to any action by the Commonwealth.

The militia company proceeded to perfect its organization, and continued in active drill till the 24th of May, when it was ascertained that it would not be received into any existing regiments. And the Legislature, in extra session, having made provision for

¹ These figures are taken from the printed Reports of the Boston Water Board.

the maintenance of the militia at the expense of the Commonwealth, the town's aid was suspended, and the company disbanded. Most of its members, however, enlisted for the war in existing or projected regiments.

Upon the 4th of July, 1862, the President issued a call for more volunteers for three years' service. The quota of this town was forty-four. At a meeting of our citizens a committee was chosen to obtain subscriptions for a fund to pay a bounty of \$100 to each volunteer who should enlist under this call. Forty-eight subscribers contributed the sum of \$4700, and the same was paid out in bounties.

In August, 1862, a call was issued by the President for volunteers for nine months' service.

September 1, 1862, at a town-meeting it was

"Voted To reimburse from the town treasury to the contributors the sum of \$4700, already advanced to pay bounties. Voted, that there be paid from the town treasury, \$100 to each volunteer, when mustered into service, as a bounty. Voted, that the sum of \$18,000 be appropriated for the purposes above named, to be expended under the direction of the selectmen."

The contributors of the \$4700 fund held a meeting September 3, 1862, and voted that the said sum of money now reimbursed by the town, be placed in the hands of a committee, to be called the Citizens' Military Committee, to be expended at their discretion, for the promotion of enlistments, and for the relief of soldiers and their families.

At the March meeting in 1863 the town "voted, that the selectmen be instructed to bring home and inter the bodies of such soldiers as may die in the service, at the town's expense;" and directed the trustees of the Edgell Grove Cemetery to set apart a suitable lot for that purpose, to be called the Soldiers' Lot.

As authorized by statute, at various times the town raised and paid the bounties for men to fill all our quotas.

Total amount expended by the town in bounties and recruiting expenses	\$33,828.86
Amount paid by the town as aid to families of soldiers, most of which has been reimbursed by the State	\$20,456.87
Amount of individual subscriptions to the various recruiting and bounty funds	29,142.50
	\$83,428.23

In addition to the above-named money expenditure, the Ladies' Association, Auxiliary to the Sanitary Commission, were active and generous in preparing and forwarding boxes filled with articles of necessity and comfort, for the sick and wounded soldiers, in the barracks and hospitals. Such associations were organized at the Centre, at Saxonville and at South Framingham. These blessed ministries of love were above all price.

The number of soldiers of all grades enlisted and sent into the field by Framingham during the war was as follows :

One hundred days' men	2
Nine months' men	89

One year's men	8
Three years' men, cavalry	43
Three years' men, heavy artillery	26
Three years' men, light artillery	42
Three years' men, infantry	169
Men enlisted in United States Army	4
Men enlisted in United States Navy	21
Total	404

Number of men killed in action or died of wounds, twenty. Number of men died of disease while in service, eleven.

DISTRICT COURT.—The Southern Middlesex District Court was established in 1874. It meets daily at the court-room in South Framingham. Justice, C. C. Esty; Special Justices, L. H. Wakefield, Walter Adams. Judge Esty was succeeded by Willis A. Kingsbury in 1885.

CAMP-MEETING ASSOCIATION.—October 2, 1871, Rev. W. R. Clark and E. D. Winslow purchased forty-five acres of land, including Mt. Wayte, at the northerly end of Farm Pond, and laid out the ground for preaching-stand, tents and cottages. The first "camp-meeting" was held in August, 1872. The Chautauqua Assembly now holds its annual sessions on these grounds.

STATE MUSTER GROUNDS.—These grounds, situated on Pratt's Plain, at the junction of Eastern Avenue and Concord Street, were purchased by the Commonwealth in 1873. The lot covers about 115 acres.

THE UNION STREET RAILWAY COMPANY was organized in 1888. The track extends from the Centre to the South Village, and from there to Saxonville.

PROFESSIONAL MEN.—*Lawyers.*—In early times our people sought legal advice, and put their suits in charge of lawyers located at or near the county-seats. Rev. Mr. Swift was often employed to draw up wills, as was his successor, Mr. Bridge. Thomas Drury, Joshua Hemenway, Edward Goddard, Col. Buckminster, senior and junior, held the office of justice of the peace, and wrote deeds and other official papers. Mr. Goddard was well educated, and understood the principles of law, as well as the forms of legal proceedings, and was often employed by the town in the prosecution and defence of suits. The same was true of Joseph Buckminster, Jr. Joseph Haven, Josiah Stone, Jona. Maynard severally held commissions as justice of the peace, and did a large official business. Mr. Stone was appointed special judge of the Court of Common Pleas in 1782.

Eli Bullard, (H. U. 1787) opened a lawyer's office in Framingham in 1791, and was in practice till his death. Josiah Adams, (H. U. 1801) admitted to the bar 1807, was here till his death. William Buckminster, (class of 1809 H. U.) admitted to the bar 1811; at Vassalboro', Me., till 1822, then in this town till his death. Lawson Kingsbury, (D. C. 1808) was here from 1814 till his death. Omen S. Keith (H. U. 1826,) was in practice here 1830-38; removed to Boston. Charles R. Train (B. U. 1837), in practice

here 1840-63; removed to Boston. C. C. Esty (Y. C. 1845) commenced practice in 1848; appointed judge of the District Court 1874. Robert Gordon (H. U. 1843) opened an office here in 1862, and remained till his death. F. F. Heard, H. U. 1848, had an office in this town, 1851-56. Coleman S. Adams, studied law in Baltimore, Md.; opened an office in Framingham, 1858. Theodore C. Hurd, U. C. 1858; in town 1860 till he was chosen clerk of the courts of Middlesex County. E. W. Washburn had a law office at South Framingham, 1870-78. Those who have recently entered the profession here, are Sidney A. Phillips, D. C. 1869; Walter Adams, H. U. 1870; George C. Travis, H. U. 1869; Ira B. Forbes, Charles S. Barker, Fred. M. Esty, Willis A. Kingsbury, H. U. 1873; judge of District Court, John W. Allard, D. C. 1854; John M. Merriam, H. U. 1886; J. L. O'Neill.

Physicians.—John Page, 1712-23; Bezaleel Rice, 1720-43; Joseph Nichols, 1730-52; John Mellen, 1747; Ebenezer Hemenway, 1750-84; Jeremiah Pike, a noted bone-setter, was contemporary with Dr. Hemenway; John Sparkhawk, 1757; Richard Perkins, H. U. 1748, was in practice here 1758; Elijah Stone, 1765-1804; Daniel Perkins, 1785-92; Richard P. Bridge, 1789; John B. Kittredge, 1791-1848; Timothy Merriam, 1791-1835; Ebenezer Ames, 1812, 13, removed to Wayland; Simon Whitney, H. U. 1818, was in practice here 1822-61; John T. Kittredge, A. C. 1828, was in practice with his father till his death, 1837; Edward A. Holyoke, 1838-43; Otis Hoyt 1838-47; Enos Hoyt, 1847, till his death, 1875; John W. Osgood, 1842-67; George A. Hoyt, D. C. 1847, 1852-57; George M. Howe, 1862-82; Alston W. Whitney, 1852-67; O. O. Johnson, 1850-82; Henry Cowles, 1852 till now; Edgar Parker, 1866-70; E. L. Warren, 1870-78; George Rice, Y. C. 1860, physician and pharmacist; George Beard, eclectic physician, has lately died; Z. B. Adams, H. U. 1853, completed a course in the Harvard Medical School; studied in Paris; surgeon in the army 1861-64; located in Framingham 1868; E. A. Hobbs, J. J. Boynton, L. M. Palmer, J. J. McCann, O. W. Collins, Anna M. Wilkin, L. B. Holbrook, have recently located at South Framingham. George Holman *died*, Marcus Ide *died*, Walter N. Sharp, at Saxonville. Enos H. Bigelow at the Centre.

MEMBERS OF CONGRESS.—Lorenzo Sabine, Thirty-second Congress; Charles R. Train, 1859-63; C. C. Esty, 1872-73.

STATE SENATORS.—Captain Josiah Stone, 1780, five years; Jona. Maynard, Esq., 1801, seven years; Rev. Charles Train, 1829-31; Josiah Adams, Esq., 1841; Joseph Fuller, 1852; Abial S. Lewis, 1856; James W. Clark, 1871; Edward J. Slatterly, 1887.

CHAPTER XLIII.

FRAMINGHAM (Continued).

BY C. J. McPHERSON.

IN attempting to speak of South Framingham, the writer asks the considerate judgment of those of his neighbors who are natives of the town and who, consequently, must be better posted upon the condition of things here a quarter of a century ago and more. No attempt is made in this chapter to treat of the earlier days, that portion of the history of the whole town of Framingham being left in the well-qualified hands of the Rev. J. H. Temple. This chapter deals only with the more modern developments, and a picture of the place as it is to-day, and is written by one of her busiest toilers, an adopted son whose love for and pride in the old as well as the new town, is scarcely second to any.

Twenty-five years ago South Framingham had already shown signs of an ambition to be something more than the unpretentious farming village of earlier days. The Boston & Worcester (now the Boston & Albany) Railroad had been opened in 1835, the branch to Saxtonville in 1846, the branch to Milford in 1847, the branch to Framingham Centre in 1850. Thus more than ten years before the war the village had become a point of some size on the railroad map of the State. But it was destined to become at an early day one of the greatest of New England railroad centres. The value of a railway running north and south, across the several main lines east and west, was early seen, for such a line would be a great distributing road for ports to the south, like New Bedford, Fall River and Newport, besides being a feeder to the roads with which it intersected. So it was that in 1865 the railroad from South Framingham to Fitchburg was completed; that from South Framingham to Mansfield in 1870; and that from Framingham to Lowell in 1871. The last three named roads form a part of the Old Colony system; the first three named are owned by the Boston & Albany. Still another road is projected by the Old Colony Company, this being a direct line from South Framingham to Boston, by way of Dedham or West Roxbury. The last annual meeting of the Old Colony stockholders authorized the directors to proceed with this construction. To-day there are living in South Framingham about 250 railroad employees, besides their

families. There are over one hundred trains daily, passenger and freight, arriving and leaving here. The elegant stone Boston & Albany passenger station was built at a cost of over \$60,000. The freight-yards of both systems are large ones, that for the Old Colony being an especially busy place, as trains are broken and made up here for all Southeastern Massachusetts. The Old Colony brick round-house contains twelve locomotives, and is already too small for the business here. These unrivaled railroad advantages account very largely for the wonderful growth of the place, and promise great things for its future. The Boston & Albany management is now rapidly pushing its four parallel tracks westward from Boston to South Framingham. The agent in charge of the Boston & Albany interests here is C. T. Boynton; the Old Colony agent is G. F. Amadon.

Years ago South Framingham was a favorite picnic resort, but with the exception of charming Lakeview, most of its attractive groves have had to give way to modern improvements and growth. To-day the town is one of the most beautiful to be found anywhere. With the exception of the business section, most of its surface is undulating, and through it like great silken threads wind the Sudbury River and its tributaries. Nestling within its borders are four beautiful great ponds, named respectively Farm, Waushakum, Learned's and Gleason's. From the first two the city of Boston takes part of its water supply. The town has been as healthful as beautiful. A few years ago the Water Board of the city of Boston, building a conduit across Farm Pond, drained off the pond, leaving the bottom exposed to the sun all summer. The consequence was a small epidemic of malaria, which lasted for two years or so, but with that brief exception good health has been the rule here. This, with the natural attractions of the place, brought many people to reside here, even before the development of the place as a business centre.

THE PUBLIC SCHOOLS have been excellent and with excellent supervision, having had a superintendent for many years, Dr. O. W. Collins filling that position at present. The School Committee consists of six members, two being elected each year for three years. The number of scholars in town in 1880, between the ages of five and fifteen years, was 1114, and that number has gradually increased from year to year, until for the school year ending April 1, 1890, the number was 2009. The rapid growth of the town the past eight years, consequent upon the establishment of several factories here, brought in some who had not had the advantages of an early education, and for these an evening school has been maintained the past three winters, the average attendance nightly being about fifty. In addition to the high schools, the State Normal School at Framingham Centre offers excellent advantages to our young people.

NEW VILLAGES.—With the coming of the new industries came busy little settlements around them.

Hastingsville, just beyond the State muster-field, on the road to Saxonville, taking its name from the Hastings family, who lived and did business there, was one of the older settlements. After the coming of the Pará Rubber Factory came the dwellings in what is known as the Pará District. About a mile away, on the broad acres of Loker Brothers, has grown up, since the beginning of 1884, what is known as Lokerville, with over 100 handsome cottages, a chapel, school-house and store. Just over the Sherborn line, near the "Pará," is Sherbornville, a collection of new houses, accommodating about 300 people, all on account of the Pará business. Around the boot-factory has grown up a bustling centre, with a school-house and store. This is called Coburnville, named for a member of the boot manufacturing firm, Mr. N. P. Coburn. Around the three new rattan industries is growing up a handsome settlement called Prattville, in compliment to Mr. Wellington N. Pratt, who owned most of the land and is enterprisingly developing it. Mr. R. M. Everit, of New Haven, Conn., has laid out many acres into handsome streets and house-lots, and so has Mr. T. L. Sturtevant and Mr. John H. Goodell. The sections owned by them are being rapidly built upon.

South Framingham has gained rapidly in population and valuation during the last ten or fifteen years. The growth of South Framingham practically measures the growth of the town, for, substantially, the whole of the gain has been in this village. In 1875 the population of the town was 5167; in 1880 it was 6235; in 1885 it was 8275; by the census of 1890 it is nearly 10,000, and very few towns in the State are growing faster. By the census of 1885 it was shown that South Framingham's ratio of gain, taken by itself, would place it at the head of the list of towns in the State in the percentage of gain. In eight years following 1880 the ratable polls had increased 1000. The number of cows in town is just about the same as ten years ago, but the gain in horses is 300. The gain in real estate valuation for the past ten years, consequent on the great amount of building, has averaged over \$250,000 yearly, the gain for the past year being \$325,000. The gain in personal property has been nearly \$100,000 yearly, making the total gain in South Framingham for the past ten years about \$350,000 yearly. For this time the average of the tax rate is \$11.60 on \$1000, and this, notwithstanding the building of several new school-houses, a new engine-house, a very complete new Fire Department, new stone-crusher, many new streets and bridges, the grading of streets for the introduction of the street railroad, the introduction of electric street-lights and a hydrant service, evening schools, new police station, etc., all of which have been paid for in full.

The census of 1890 shows Framingham to be, with one exception, the largest town in Middlesex County, only the eight cities in the county being larger. The Legislature of 1890 passed a bill allowing the annex-

ation of a part of Sherborn, bordering on South Framingham, to this town; but the town, fearing the possibility of a large expense in draining that territory on account of its contiguity to Boston's water supply, declined to accept the act. Had the territory been annexed, Framingham's population would thus have been increased from three hundred to four hundred; but to all intents and purposes, except for voting, this population is now a part of South Framingham, doing its trading and working here, and being situated over two miles from Sherborn Village.

The last Representative to the State Legislature from this village was Joel C. Clark, who served in 1879. The town has sent a Representative every year, but he has always come from one of the other villages. The Hon. Edward J. Slattery was elected to the State Senate from here, serving in 1887 and 1888. The town selectmen elected from this village since 1860 have been: O. W. Livermore, '60-61; Gilman Fuller, '62-64, '74-76; Andrew Coolidge, '65-70; Willard Howe, '71-72; E. L. Sturtevant, '73; Eleazar Goulding, '77-81, '83; B. T. Manson, '81-82; B. T. Thompson, '82; George E. Cutler, '84-85; J. H. Goodell, '86-89; C. N. Fuller, '86, '88; A. M. Eames, '87; George O. Bent, '88-89; R. M. French, '90; C. P. Knowlton, '90.

The present Senatorial district comprises the city of Marlboro' and the towns of Framingham, Natick, Hopkinton, Holliston, Ashland, Sherborn, Sudbury, Wayland, Weston, Maynard.

The Representative district, entitled to two Representatives, includes the towns of Framingham, Holliston, Wayland, Sherborn.

The town is in the Ninth Congressional District and the Sixth Councillor District. On account of its central location and easy accessibility by railroad, many of the political conventions are held here. The working committees of the two principal political parties in town have usually been large, with sub-committees in the different villages. As a rule, the citizens have not adhered strictly to party lines in their selection of town officials, although occasionally this rule has been departed from. At the present time the Republican and Democratic parties in town are of nearly the same size, while the Prohibitionists have a modest representation. When the State Legislature authorized large towns to establish the precinct system of voting in fall elections, Framingham adopted the change in 1886, and found it a most agreeable one. The town has four precincts.

In 1889 the Australian ballot system of voting was first tried, and it proved to be popular at once.

For a number of years a slight effort had been made to abolish the board of three road commissioners, who had full charge of the work upon the roads and bridges of the town, but it was not until the present year—1890—that this movement was successful, and the provisions of the statute enacted by last year's Legislature, allowing the selectmen to appoint a sup-

erintendent of streets, was accepted and the road commission abolished. The selectmen appointed Mr. William H. Walsh superintendent of streets, he having been one of the road commissioners for some years past. Within two years the town officers' headquarters have gradually been removed to South Framingham, and now they are all located here. The time is looked forward to as being not far away when Framingham will apply for a city charter, and many of her most conservative citizens believe that the time has come when that form of government is best adapted to her needs. From time to time the agitation for a division of the county, or the formation of a new county out of two or three others, has been agitated, and Framingham has been designated as the most convenient place for the county-seat. The new county may never materialize, but South Framingham will continue to be the natural centre of many miles of territory in this vicinity.

The property in town exempted from taxation, by the report of the assessor in 1888, is appraised at \$125,200. This amount is made up of the churches, grounds of the Camp-Meeting Association, Middlesex South Agricultural Grounds, and Home for the Aged. In addition to this is the property owned by the Commonwealth, including the State Normal School property and the State Muster Field.

The property owned by the town, as appraised by the assessors, exclusive of cemeteries, amounts to about \$150,000. This does not include the sewerage system, which cost \$150,000, and which is bonded. With the exception of the latter, the town is practically free from debt, beside having several funds left by public benefactors. The Col. Moses Edgell fund for the benefit of the Public Library amounts to \$47,000, while the Joseph Phipps fund for the worthy poor of the town is \$20,000.

Considerable attention has been paid to caring for shade-trees on our resident streets, and the result repays well the care expended.

The Sherborn Reformatory Prison for Women may be said almost to be one of the institutions of this town, since it is located upon the dividing line between this village and Sherborn, a part of the property being each side of the line. The South Framingham railroad and mail facilities are used, but the institution will probably be referred to at more length by Dr. Blanchard, in his chapter on Sherborn.

The town has had a Board of Health for years, although that board has had comparatively little to do. Special attention has been paid to vaccination, to drainage, to infectious and contagious diseases that might be spread through the schools, and regulations have been maintained and circulars issued concerning small-pox, scarlet and typhoid fevers, measles, diphtheria, etc. Until within four months the board for the past few years has consisted of Dr. Z. B. Adams, Dr. J. J. Boynton, F. H. Sprague.

The Western Union Telegraph office is open night

and day, and so is the telephone exchange, as well as on Sunday.

A Free Public Reading-Room is maintained by the town, being located now in Nobscot Block. This is well supplied with magazines and papers, and from it books are distributed from the main Public Library at the Centre Village, which is one of the oldest free public libraries in the world, and which contains about 15,000 volumes.

The town is lighted by electric lights, both arc and incandescent, the latter being deemed the more satisfactory upon streets much shaded by trees.

The public buildings owned by the town are not as a rule conspicuous for size or elegance. Some of the school-houses are well adapted to the demands upon them, as are the engine-houses. At both the Centre and Saxonville villages there is an old-fashioned town hall, comfortable for ordinary gatherings, but both totally inadequate to accommodate the voters of the town at town-meeting times. From time to time the project of building a large town hall at South Framingham has been discussed, but the wise view has been that it were better to wait a little while longer, when the rapidly increasing population should make a city of the town, for then a city hall will be required—a building altogether different in size and arrangement from a town hall.

BUSINESS BLOCKS.—*Waverley Block* was built in 1851, and for that time it was an especial credit to the town, containing stores, offices, and a public hall. An addition was afterwards built. The block had a slated pitched roof, with cupola, but in the summer of 1889 fire nearly consumed it, and it was rebuilt with a flat roof. It stands in a conspicuous position, opposite the railroads, on the south side, and on the corner of Irving Square. It is owned by Henry Bullard, of Holliston.

Nobscot Block, a commanding wooden structure, was built in 1871 by P. G. Rice for Wm. A. & George Rice, and is now owned by E. C. Rice, these all being brothers. It is located near the railroads on the north side, contains stores, offices, the District Court-room, and two banking-rooms. During the present year it has been much improved.

Union Block, situated opposite the railway station, on the south side, was built in 1870 by Geo. W. Bigelow and C. C. Esty, principally for the wheel business. It was afterwards let for other purposes, and finished off for stores, offices and other business apartments, in which way it is now occupied.

The *Odd Fellows' Building Association* set the example of building with brick when it erected its handsome block on the south side of Irving Square in 1876. Besides the Odd Fellows' apartments, which have also been let to other societies, the block contains stores and offices.

In 1882 Mr. H. Gardner Eames built *Elmwood Block*, just south of Odd Fellows' Block. This is a wooden structure with stores on the street level, and

the Opera-House overhead. It is now owned by Mr. Wm. H. Trowbridge.

The old *Liberty Block* was remodeled in 1884 by the owners, Messrs. Cutler, Ranney and Clark, and a handsome new brick annex was built. This is on the north side of the railroad and at present the post-office is located there, besides Pythian Hall, stores, offices, club-rooms and banking-rooms.

David Eames built *Central Block* in Irving Square, of wood, in 188-. It contains stores and offices.

Reardon's Block, on Howard Street, was built of wood in 1884. It has stores below and tenements overhead.

Within a year past a new era in the construction of business blocks has been ushered in, in the building of some handsome new brick blocks of modern arrangement.

Joshua Smith took the initiative by building the largest block in town, a substantial four-story brick structure with brown-stone trimmings. It faces the railroads, on the south side, overlooking Irving Square. In it are six large stores, Masonic Hall and banquet hall, club-rooms and offices. It is heated by the hot water system and lighted with gas and electric lights. It has just been finished.

The *Tribune Building* followed close after the Smith Block, and is nearly completed at this writing. It is of four stories, of brick with brown-stone trimmings, and overlooks Irving Square. Besides the *Tribune* newspaper quarters, there are four large stores, the largest public hall in the place, next to the Opera-House, offices, club-rooms, photograph studio and public bath-rooms. It is heated by steam and lighted by gas and electric lights.

The *Manson Building Company* is now building on the north side of the railroad, opposite Nobscot Block, a handsome brick block of four stories, also to have brown-stone trimmings. This block will have four large stores, two public or society halls, banking-rooms and offices, one of the features being a first-class fire-proof and burglar-proof vault.

Besides the blocks above enumerated, there are many smaller ones where stores and offices are located.

PUBLIC HALLS.—Of these there is no lack. Largest in size is the Opera-House, and following in the order of their size comes Union Hall in the *Tribune Building*, Masonic Hall in Smith Block, Odd Fellows' Hall in Odd Fellows' Block, Pythian Hall in Liberty Block, Hibernian Hall on Howard Street, the two new halls in the Manson Building, Nobscot Hall, used as the District Court-room, G. A. R. Hall in Irving Block, St. Stephen's Hall in Liberty Block.

HOTELS.—These may be enumerated as follows: Old Colony House, Winthrop House, South Framingham Hotel, Everit House, Coburn House, Procter House, Grant House.

FIRE DEPARTMENT.—It was in 1841 that the old Framingham Centre fire-tub was brought to South

Framingham. It was then called "Franklin No. 3." Along in the forties it was exchanged for a new tub of the S. & D. Thayer make, and this new accession was dubbed "Niagara No. 3." This tub was run until 1859, when it was exchanged for another new tub of the Hunneman build, and this was also christened "Niagara No. 3." The company which manned the "Franklin" numbered thirty, but there were forty-five members in the last "Niagara" company. When, in 1885, the street water hydrant service was completed for use, the old Niagara hand-tub was sent to Nobscot (North Framingham), and out of the old company two new companies were organized—one the hose company, the other the hook-and-ladder company, which was named after Willis M. Ranney, one of South Framingham's enterprising citizens. For the hose company a reel-carriage was bought, but this has recently been superseded by the more modern hose-wagon, in which the hose is folded. A handsome and well-equipped hook-and-ladder truck of the Gleason & Bailey make was the next purchase. Since 1885 two handsome steam fire-engines of the Silsby build have been bought for the other villages of the town,—one each for Framingham Centre and Saxonville, the last one arriving in April, 1886,—while a fine new engine-house for the Centre village was dedicated a few months ago. Before the close of 1886 the town was supplied with the Gamewell fire-alarm system. To-day there are twenty-one boxes, and in addition to ringing the bells of the town, a large steam-gong is blown,—this latter being located upon the water company's pumping-station.

THE FRAMINGHAM WATER COMPANY was organized in 1883, after more or less discussion in town as to the benefits to come from street water and the duty of the town to provide it. The incorporators were Messrs. Willis M. Ranney, Charles F. Cutler, George E. Cutler, Sidney A. Phillips, William C. McLellan. The Holly system was the one adopted, the water being drawn from galleries in Farm Pond, one of the sources of the city of Boston's water supply. The water is forced directly through the mains by means of two large pumps, one high pressure and the other a compound pump. While but one of them is used at a time, both are kept ready for instant service. The works were completed ready for use in the early summer of 1885, and an exhibition of their working was given on the occasion of the July 4th celebration of that year. There are now thirteen miles of pipe in the system, and the plant is competent to do twice the volume of business required of it, with the present pumps. Willis M. Ranney is president of the company, George E. Cutler, treasurer, and Sidney A. Phillips, clerk and counsel. Thus far only South Framingham has been piped, but the service is now being extended to certain portions of the Centre, notably the Normal School district. Within the past two years a strong feeling has been expressed in town that the town should itself own and operate the water-

works, and a committee was appointed, in the spring of 1889, to examine into the matter, confer with the company and report. The report, while making no definite recommendations, appeared to favor town ownership of the works. There are about eighty fire hydrants in South Framingham, and about eighty pounds pressure is constantly maintained at the pumping station.

DISTRICT COURT.—"The First District Court of Southern Middlesex" was established here in 1874, with one justice, two special justices and a clerk. The court meets every day in the year except Sundays and legal holidays. The court-room is in Nobscot Block. At the organization of the court, the Hon. C. C. Esty, of Framingham, was appointed justice, with L. H. Wakefield, Esq., of Hopkinton, and E. C. Morse, Esq., of Natick, special justices. The towns in the district originally included Framingham, Ashland, Hopkinton, Natick, Sudbury, Wayland, Holliston and Sherborn, but Natick and Hopkinton were afterwards set off from the district. Justice Morse's last service on the bench of the District Court was on April 19, 1881, and Natick being set off April 28, 1881, Mr. Morse was made a trial justice in that town. Mr. Wakefield has remained to the present time the first special justice of the court. His residence is now South Framingham. Judge Esty retired in December, 1885, and Willis A. Kingsbury, Esq., then of Holliston, but now of South Framingham, was appointed in his place in January, 1886, and assumed his office for the first time on February 9, 1886. He still holds the position. When Special Justice Morse retired, in April, 1881, Walter Adams, Esq., of Framingham, was appointed to the vacant position, which he still holds. He first held court on June 22, 1881. At the organization of the court, Sidney A. Phillips, Esq., was appointed clerk, which position he held until 1878, when he retired, and Ira B. Forbes, Esq., was appointed. He held the office until 1880, when the present clerk, Joseph H. Ladd, Esq., was appointed on August 30. In this court there are from 600 to 900 criminal complaints issued in a year, and from 100 to 125 civil entries made.

TELEPHONE BUSINESS.—South Framingham men were among the pioneers in the telephone business. A Mr. Hardy had a license from the American Bell Telephone Company to build a telephone line from Boston to Worcester. This right was bought by three South Framingham men in 1880—Messrs. Charles F. Cutler, who was in the grain business; Willis M. Ranney, who at that time was bookkeeper for Cutler & Co., and Joel C. Clark, who was in the printing business. These three organized The Central Massachusetts Telephone Company, with C. F. Cutler, president; J. C. Clark, secretary; W. M. Ranney, treasurer. They built the line from Boston to Worcester, with local exchanges in about all the towns on the line. In about two years these same gentlemen went to the western part of the State and brought out the Spring-

field Company, consolidating it with the other, under the name of the Consolidated Massachusetts Telephone Company. In 1884 the company sold out to the Lowell telephone syndicate. Messrs. Cutler and Clark remained in the telephone business, going to New York, New Jersey and Pennsylvania, where they now have large interests. Mr. Ranney engaged in the lumber and wood and coal business in South Framingham, and became president of the Framingham Water Company.

THE POST-OFFICE.—The South Framingham post-office was established February 12, 1841, Hon. Joseph Fuller being appointed postmaster, and retaining the position until April 1, 1844, when Edward A. Clark was appointed. Mr. Clark's term of service expired in July, 1849, and S. O. Daniels was then postmaster until July 1, 1853. From the latter date Willard Howe served as postmaster until July 1, 1885, when he resigned after a service of thirty-two years in the position, to a day. John B. Lombard assumed the duties of the office on July 1, 1885, holding it nearly five years, or until April 1, 1890, when Captain Edward F. Phinney assumed the office. When Mr. Howe took the office, in 1853, his salary based on the commissions, was \$125 yearly, and out of this came all the expenses of rent, fuel, lights, clerk hire, etc. To-day the office is one of the second-class, with \$2000 salary for the post-master, while the government pays the expenses above named.

Following is the report of the count of the number of pieces and weight of matter, with amount of postage thereon, mailed during the seven consecutive days beginning at 6 o'clock A.M. Monday, May 5th, and ending at 6 o'clock A.M. Monday, May 12, 1890, at the post-office at South Framingham, which was taken, in common with other offices throughout the country at the same time, for statistical purposes, and by order of the Postmaster-General:

DOMESTIC.		No. of	Weight	Am't. of
FIRST CLASS MATTER.		pieces.	lbs. oz.	postage.
Letters mailed to other offices	3807	116	7	\$18.91
Local letters	973	13	4	10.24
Postal cards to other offices	630	3	5	6.30
Local postal cards	233	1	3	2.31
SECOND CLASS MATTER.				
Mailed by publishers to other offices, 1c. per lb.	70	35		..
Mailed by publishers for local delivery	769	63		..
Mailed by publishers in county, free	70			..
Newspapers, 1c. per 4 oz., to other offices	168	34	7	1.76
THIRD CLASS MATTER.				
Mailed to other offices	47	32		1.94
FOURTH CLASS MATTER.

Other matter	12	2	8	..
Official matter	115	2	3	..
	9662	317	15	\$100.24

AMUSEMENT HALLS.—Waverley Hall was built in 1851, by Elias Howe. For a long time it was the only hall in the village. Subsequently Irving Hall and Nobscot Hall were built, but it was not until Elmwood Hall was erected by H. Gardner Eames, in 1882, that any attempt was made to provide scenery for theatrical performances. Elmwood Hall seated nearly 900 people. The first real scenery was used in it in March of 1883. During the roller skating craze,

Messrs. F. H. Hunt and Edgar S. Twichell built Alpha Rink on South Street, in the summer of 1883, and the following year Mr. Eames built Elmwood Rink, in the rear of the hall. Mr. Eames sold the hall and rink to Wm. H. Trowbridge in 1885, and the following year Mr. Trowbridge greatly enlarged and altered the building, changing its name to Elmwood Opera-House. It is now one of the cosiest little theatres in the State outside the large cities, seats about 1100 people, has a horse-shoe balcony, large stage with machinery, scenery and properties, abundance of dressing-rooms, electric lights, is handsomely frescoed, and withal a most attractive place.

LAKEVIEW.—South Framingham has had some particularly handsome and inviting picnic resorts, made so largely by the several small lakes or large ponds in the town. For many years Harmony Grove, on the easterly banks of Farm Pond, was a popular place. In 1871 Rev. Wm. R. Clark, D.D., and E. D. Winslow purchased forty-five acres at the northerly end of Farm Pond, for the South Framingham Camp-Meeting Association. This land, which included Mt. Wayte, was improved and laid out for the purposes intended, and has ever since been a popular resort. Methodist camp-meetings are held here yearly, but the grounds have gained their principal fame during the past ten years, from being the gathering place of the New England Chautauqua Sunday-school Assembly. During the ten or twelve consecutive days of the "Assembly," many thousands of people visit the grounds, and the reports of the meetings are widely published. The superintendents of instruction have been Bishop John H. Vincent, and Rev. Drs. Jesse L. Hurlbut, of New York, and Albert E. Dunning, of Boston. Hon. B. B. Johnson, of Waltham, is president of the Assembly, which has become incorporated within a year, and of the Camp-Meeting Association, which owns the grounds, Rev. Dr. W. R. Clark is president of the Board of Directors, and ex-Gov. Wm. Claflin, LL.D., is chairman of the Land Committee. Samuel Cochran is superintendent of the grounds. There are about 100 handsomely painted and well kept cottages on the grounds, besides the tents which are used in the summer time. In addition to the large covered auditorium, with seats for four or five thousand people, there is a large dormitory, dining-saloon with steam-boiler and other accessories, stables, etc. The Public Assembly buildings are the Hall of Philosophy, or Hall on the Hill, Normal Hall, the C. L. S. C. Alumni headquarters building, and handsome and convenient buildings, each for the Methodist, Baptist and Congregational headquarters. A sample program of the ten days' meetings is the one just held, which consists of twenty lectures upon literature, history, travel, science, art, political economy, ten lectures on temperance, two monologue entertainments, or character impersonations, eight concerts, with a chorus of 200 trained voices, besides soloists and instrumen-

talists, sermons, normal and children's classes, chorus trainings, C. L. S. C. round tables, camp-fires, athletic games, illuminations of the grounds and fireworks, and many special features. It is not strange that such a program, with some of the best talent in this and other lands, should make this place popular. These meetings are held in July.

THE STATE MUSTER-FIELD comprises about 115 acres and is kept in good order for the annual encampment of the State militia. These grounds were bought by the Commonwealth in 1873, and are admirably adapted to the purpose for which they are used. Captain Luke R. Landy is superintendent. Besides his residence there is an arsenal in which are placed various military stores; there are the guard-houses, brigade headquarters, cook-houses, fort, rifle-targets and butts, stables, etc. Two brigade musters are held annually, with about 2500 of the State militia present each time, and besides these there are meetings for rifle practice and other drills. The street-cars from South Framingham to Saxonville run by the field, which at muster-time is, with the exception of the parade-ground, white with tents.

THE SEWERAGE SYSTEM.—South Framingham has a sewerage system of which it may well be proud, both from the fact that it is practically the pioneer system of its kind in the country, with the possible exception of Pullman, Ill., and on account of its thorough construction and complete adaptation to the needs of the place. It is probable that no other city or town in the country of its size has a sewerage system approaching this in completeness, and the question is asked: Why has South Framingham so expensive a system? The cause dates away back to the time when the city of Boston was permitted to take the waters in this vicinity for her water supply. Having once taken these waters, it was necessary to preserve their purity for domestic purposes, and so the big city early began a crusade against the people in the towns along her water supply, to compel them to discontinue all pollution of these streams.

So important was this matter deemed that the Legislature of 1884 provided for the appointment of a State Drainage Commission to inquire into and report upon the protection of water supplies, the methods of sewage disposal, and the application of such methods to the towns and cities in the Commonwealth which seemed most to call for it. This commission, reporting upon the Sudbury and Cochituate basins, said that in the case of some small towns, interference was unnecessary, "but in respect to Natick and South Framingham the present need of sewerage relief is crying." A joint system was proposed by this commission, substantially as it stands to-day, to include the Sherborn Woman's Reformatory, if desirable. They recommended that Boston pay \$20,000 towards the cost of such a system, and the Commonwealth \$15,000, the estimated cost being \$135,000. But the town of Natick would take no steps in the

matter, and Framingham eventually felt compelled to do it alone, in order to preserve her manufacturing industries, for it was these latter, chiefly, which polluted the tributaries to Boston's drinking water.

Early in 1885 we find Boston instituting a suit against the town of Framingham for the abatement of nuisances and pollution of her water supply.

In February, 1886, the legislative Committee on Drainage gave a hearing to the Framingham Board of Health, for authority to build an open drain from South Framingham to Saxonville, beyond the watershed of the Boston water supply. It was designed to drain certain low, wet sections of the village through this drain, rather than to provide for sewage from the houses and factories of the whole village. It was a good scheme in itself, but did not go far enough.

A town-meeting on November 29, 1886, had for its special business the discussion of the proposition to petition the next Legislature for leave to construct a system of sewerage for the town, and the meeting instructed its selectmen to so petition, and they were constituted the town's Committee on Drainage. Hearings were then held from week to week to ascertain the ideas and desires of the citizens, and at the hearings the claims of the several methods of sewage disposal were advanced. Some favored the open drain to Saxonville; some advocated a trunk sewer from Worcester to Boston, with opportunities for the towns along the way to enter; some believed in the precipitation idea, and this system of disposal, by means of chemicals, was illustrated by experiments by a German chemist; the intermittent filtration and broad irrigation methods were discussed. Meantime the town's Drainage Committee had busied itself gathering information, and finally it secured the services of Civil Engineer S. C. Heald, of Worcester, for preliminary investigations, surveys and estimates, and \$1500 was appropriated by the town for this purpose. A draft of a bill, representing the needs of the town, was prepared by Town Counsel, Walter Adams and Hon. William Gaston, of Boston, and presented to the Legislature. Upon this bill legislative hearings were held, the legislative Committee on Drainage visited the town and examined the premises thoroughly, and in spite of the active opposition of Natick's Representatives, the bill passed the Legislature almost unanimously, and was signed by the Governor. Engineer Heald recommended the adoption of the irrigation system, which was also the recommendation of the State Drainage Commission, and it was this system which the town adopted. The city of Boston offered to pay \$25,000 towards the cost, and on February 20, 1888, the town appropriated \$140,000 to construct the system, bonds for that amount being issued, to run for twenty years. The town chose as a committee to have in charge the construction of the system, Messrs. Walter Adams, John H. Goodell, Charles H. Fuller, Patrick Hayes, Jr., William H. Hastings, Franklin E. Gregory, James R. Entwistle,

Edward J. Slattery, Henry L. Sawyer. The town chose as a Bond Committee, to act with the town treasurer, Messrs. James J. Valentine, Francis C. Stearns, Thomas L. Barber. For Commissioners of the Sinking Fund, the town chose Clifford Folger for one year, Franklin H. Sprague for two years, Franklin E. Gregory for three years. The plan was approved by the State Board of Health, and thus everything was made ready for construction. The act of the Legislature gave the town the right to take a suitable tract of land just over the Natick boundary line, belonging to Framingham parties, for a sewage farm.

Engineer Heald, in his report, reviewed the mechanical filtration, chemical precipitation and irrigation systems, and strongly advised the adoption of the latter, and his recommendations were adopted. He was employed as the engineer, but, going to Europe shortly after, he left the whole work of preparing the plans, specifications, etc., to Engineer John J. Van Valkenburg, who superintended the construction throughout, and afterwards became the town engineer. The work was most thoroughly done, and to-day stands far ahead of any other system of the kind in the United States, the system at Pullman, Ill., being after the same idea, but not nearly so complete.

Of the 24x36 inch brick sewer in our streets there is over 3100 feet, and of the sewer-pipes of various sizes there is over 22,000 feet additional, with 135 man-holes. The sewage runs by gravity through the streets to the pumping-station. At this place the main 24x36 inch sewer delivers the sewage into a man-hole ten feet in diameter, and from this it flows in either of three directions: first, if desired, directly to the pumps, or to either of two large subterranean reservoirs, each with a capacity of 200,000 gallons. The Davidson Compound Condensing Pumping Engines lift the sewage from these reservoirs and forces it through about 10,000 feet of 12-inch iron force-main to the filtration field of 70 acres. From the large manhole which this force-main enters, the sewage flows by gravity along the fields, being conducted wherever desired by the use of gates, each field containing about an acre and being surrounded by embankments. This system is receiving many visitors from towns and cities which have to face the problem of sewage disposal. Its management is in the hands of a Sewer Committee of three, one of whom is elected each year for three years. Messrs. John H. Goodell, Russell M. French and Patrick Hayes, Jr., comprise the committee at present, and Major J. M. Wiswell is the superintendent.

STREET RAILROAD.—One of the modern improvements is the street railway, connecting this village with Framingham Centre and Saxonville. For years the coach run between the South and Centre villages by William C. Wight had been deemed a sufficient conveyance, oftentimes running empty. The establishment of the Pará Rubber Shoe Works at South Framingham brought many employees from Saxon-

village, and these were conveyed morning and night in coaches and barges. The many special occasions, like town-meetings, hearings, caucuses, entertainments, conventions, which brought the people of the three principal villages of the town together, as well as the necessities of the factory operatives and the conveyance of the South Framingham High School students to the school at the Centre, inspired the idea that a street railway might be made to pay, and this matter was taken up by the local newspapers and so agitated that at length several schemes were advanced for the construction of such a road. One of the first of the schemes was that of the Suspension Transportation Company, which petitioned the selectmen for the right to construct and operate a line between the South and Centre villages. The idea was to plant a line of posts on which, upon side brackets, would be strung two heavy cable wires, one at the top, and one about eight feet below. Between these two wires a car holding perhaps twelve persons was to be operated by an electric current passing over one, through the car motor, and returning to a central station upon the other wire. Obvious objections were raised to this scheme, and the petition was dismissed. Meantime, by the continued agitation, people were becoming convinced that some kind of a road would soon be a necessity. Early in February of 1887, certain gentlemen in town, prominent among whom were Charles H. Emerson, Samuel B. Bird, Clifford Folger, L. F. Fuller and Ira B. Forbes, together with the Haines Brothers and others of New York, associated themselves together to form a corporation known as the Framingham Street Railway Company. The capital stock was placed at \$35,000, and the length of the road was to be four miles. From the South Framingham terminus near the Boston & Albany passenger depot, the road was to run through Framingham Centre to the Old Colony railroad station. One branch was to run to the State muster-field on Concord Street, and another short branch to the Para Rubber Works.

The very next week a rival association was formed, many of the gentlemen interested in it being those who had been for some time intending to ask for a franchise, but who were not disposed to hurry matters, until awakened by the prompt action of Haines Brothers and their allies. The last corporation was to be known as the Framingham Centre Street Railway Company, and differed from the first-named company in that while that was to be controlled by outside parties, this latter company was composed of a long list of stock-holders, all of whom, with two exceptions (and they only owning three shares), were citizens of Framingham. The capital stock of this latter company was to be \$20,000, and the number of miles of road two and one-half, the route being the same as that of the other company without the Para and muster-field branches. The leading spirits in this enterprise were Sidney A. Phillips, William C.

Wight, William H. Hastings, C. C. Stevens, George H. Waterman.

With petitions for location from both of these companies before the selectmen, the latter were forced to carefully examine their respective merits. The competition was warm and close, and it began to put the Haines Bros. at a disadvantage. To reinforce their position, these gentlemen and their associates supplemented their first association with another one, to be called the Saxonville and South Framingham Street Railway Company. Its route was to be from Saxonville to the State muster-field, connecting with the Concord Street terminus of the "Framingham Street Railway Company." This last bit of stratagem proved a wise move, for it secured the active co-operation of Saxonville citizens, who had no direct rail communication with the other villages of the town. After much investigation by the selectmen, the two companies in which the Haines Bros. were interested were denied the franchise asked for. A new association was at once formed to take their place. This last association was named "The Framingham Union Street Railway Company," and it was organized with a capital of \$60,000. It was a virtual consolidation of the two companies which had been given leave to withdraw, and provided for building a road from South Framingham to the Centre and Saxonville, as well as the branch to the Para factory. It included more citizens of the town on its list of stock-holders than any of the other companies, there being sixty-eight Saxonville names alone. With the home capital, practical railroad men from Fall River and New Bedford were associated, and on July 20, 1887, this new company was granted a franchise. Work went rapidly forward. Charles H. Emerson was chosen president, and Samuel B. Bird treasurer, and they, with Clifford Folger, L. F. Childs, James R. Entwistle, L. F. Fuller, E. F. Sprague, of this town, and Charles F. Shaw, of New Bedford, acted as directors, but Mr. F. W. Brightman, of Fall River, was one of the moving spirits of the whole enterprise. The construction and equipment were of the very best, four miles of the road being paved the entire length, and the total cost being much more than the capital stock. Stables and car-houses were built, both at Framingham Centre and Saxonville. The formal opening of the road occurred on May 29, 1888, the day before "Memorial" day. Three cars, trimmed with flags, loaded with invited guests, made the initial trip, 'Uncle Dexter' Hemenway, the oldest man in town, and who had driven the first pick into the ground for the construction of the road, riding on the first car. The railroad has been of great value to the town in bringing the different villages together, and, under the careful and efficient management of President Emerson and his associates, has from the first proved a good investment. It is now in contemplation to replace the horses at an early day with an electrical system of propulsion.

Within two months of the time of writing (July, 1890) a franchise has been granted by the selectmen for an electric street railway through the village from the Natick to the Ashland town lines. This road, if built, it is presumed is to form part of a road running through Wellesley and Newton to Boston.

NEWSPAPERS.—The newspaper business in town has been comparatively uneventful. *The Framingham Courier*, started at Framingham Centre in 1835, lived less than a year.

Edgar Potter started *The Framingham Enterprise* in Feb., 1874, consolidating in 1875 with *The Gazette*.

The Framingham Gazette was established at South Framingham in 1871, by Pratt & Wood, of Marlboro'. It was bought of them by C. M. Vincent in the fall of 1873. About one year later, in September, 1874, Messrs. W. W. Pease and F. M. Jernegan formed a partnership with Mr. Vincent, with the firm-name of C. M. Vincent & Co. In the fall of 1873 Edgar Potter had purchased *The Ashland Advertiser*, starting *The Framingham Enterprise* the following February. The Middlesex Newspaper Company was formed December 14, 1875, with C. M. Vincent, president; J. C. Clark, clerk and treasurer, and these two, with George C. Travis, directors. The new company not only bought *The Gazette* of C. M. Vincent & Co., but it also bought of Mr. Potter *The Enterprise* and *The Ashland Advertiser*, merging the former into *The Gazette*. The company also started *The Holliston Transcript* and *The Hopkinton News*, the latter of which was discontinued in 1880, the former still being published. Mr. Vincent was made editor, serving as such for one year, when Mr. Potter became editor for one year, from January 1, 1877. About January 1, 1878, Rev. L. B. Hatch, having bought a controlling interest in the stock, became editor and manager, with Walter W. Pease as assistant manager. Mr. Hatch was president of the company and Mr. Pease a director. The latter was also foreman of the office. Judge C. C. Esty was a director in 1879, and when Mr. Hatch resigned as president in October, 1880, Judge Esty succeeded him in that office. On January 9, 1883, Mr. W. W. Pease became president; F. N. Oxley, of Ashland, treasurer; and they, with Hon. Joseph T. Pease, directors. Mr. Oxley sold his interest in a few weeks to W. W. Pease, and from that time Mr. Pease was president and treasurer, as well as editor and manager, with Jos. T. and H. M. Pease associated with him as directors. On January 11, 1889, the stock of the company was bought by Ora O. Davis and Walter F. Blake, who had worked in the office. About two months afterwards, March 18, 1889, the business was sold to the J. C. Clark Printing Company, the whole concern then taking the name of *The Lakeview Printing Company*. *The Gazette*, which had been a seven-column folio (four pages, of seven columns each), was enlarged, in 1883, to eight columns to the page, and in 1889 it was further enlarged to nine columns to the page. Ora O. Davis is

now manager of the paper, Mr. Blake being treasurer and general manager of the company. *The Gazette* has paid but little attention to politics, taking a neutral stand and aiming to make an acceptable home paper, free from offence on this score.

The Framingham Tribune was started October 27, 1883, by Charles J. McPherson, in a small office in Union Block. The type-setting was done here, but the paper's forms were sent out of town for the press-work at first, as the publisher had no presses. Mr. McPherson started the *Sherborn Tribune* at the same time, doing the work at the same office. In addition to these he had for some time, and still continued to publish *The Walpole Star* and *The Norwood Review*, which he had printed at Mansfield. The latter were eight-column folios, but the two *Tribunes* were seven column folios. But seven numbers of the latter were printed before more room was taken in the same block and a new Cottrell cylinder press was put in, on which No. 8 of Vol. I was printed. This was on December 14, 1883. A small steam-engine followed the press. No. 8 was an enlargement, the paper being eight columns to the page, instead of seven. Mr. Walter H. Davis, who had been doing a small job printing business in town, entered into partnership with Mr. McPherson, under the firm-name of McPherson & Davis, and a small job printing business was added to the newspaper business. The partnership had lasted but a few weeks when another enlargement came. A stock company organized under Massachusetts law with \$5000 capital was formed, Messrs. McPherson and Davis owning a majority of the stock. "The Union Publishing Company" was the style of the new organization, and it owned and printed at the start *The Framingham Tribune*, *Sherborn Tribune*, *Walpole Star*, *Norwood Review*. A little later *The Medfield Bulletin* was bought and published for two or three years, being afterwards sold again. Still later *The Ashland Tribune*, *Southboro' Tribune*, *Sudbury Tribune* were started and are still published by the company. The first number of the *Tribune* under the Union Publishing Company was on April 25, 1884, being No. 27 of Vol. I. This number marked still another enlargement, the paper now appearing as a six-column quarto (eight pages of six columns each.) Mr. McPherson became general manager of the new company, and Mr. Davis, clerk, while both of them were directors. The former has been editor and manager from the beginning to the present time. At the time of the organization of the new company Wm. B. Jones, since deceased, became, associate editor for a short time. On June 19, 1885, the *Tribune* took on the form of an eight-column folio again. One half the paper had heretofore been printed in Boston, and was known as a "ready print," but by this last change all the printing was done at the home office, although a considerable quantity of stereotype plate general matter was used. From January 1st to June 4, 1886, the paper was a seven-column folio, then an eight-column folio again until October

29, 1886, when it again took the eight-page, or quarto form which it has ever since retained, except when, as is often the case, it appears as ten pages. In March, 1886, after having twice previously outgrown and enlarged the office quarters, a removal was made to the new brick Liberty Block, where the third floor was taken, and a new boiler and engine put in. This, in turn, has been outgrown and other room in the building gradually taken, until now a removal has been made to specially prepared and convenient quarters in the new four-story brick "Tribune Building." The *Tribune* has been independent politically, striving to be first of all a first-class local newspaper. Its circulation is over 2000 copies.

On November 1, 1890, *The Daily Tribune* was launched, with a fair share of advertising patronage and support. The size of the daily is four pages of six columns each, the price being two cents a copy. It covers all the neighboring towns for news, and is independent politically. It is an offshoot from the *Weekly Tribune*, and is under the same management.

THE BANKS.—*The Framingham Savings Bank* was chartered in 1846, and did business at Framingham Centre until 1884, when it removed to South Framingham. Its presidents have been Moses Edgell, Geo. Phipps, Charles Upham, Luther F. Fuller, Adolphus Merriam, Franklin E. Gregory. Messrs. Phipps, Upham and Merriam died in office. The treasurers have been Rufus Brewer, Edward Ilsley, Lorenzo Sabin, Coleman S. Adams, Luther F. Fuller. Walter Adams, Esq., is the bank's solicitor. The statement May 1, 1890, shows \$1,860,734.14 deposits, and it is undoubtedly one of the strongest banks in the State. At present the officers are: President, Franklin E. Gregory; Vice-Presidents, Samuel B. Bird, J. Henry Robinson, Franklin Manson; Treasurer, Luther F. Fuller; Trustees, F. E. Gregory, S. B. Bird, J. H. Robinson, F. Manson, L. F. Fuller, John S. Cullen, Adrian Foot, Walter Adams, Francis C. Stearns, Geo. C. Travis, Edward F. Kendall, Clifford Folger, Simeon H. Williams.

The Farmers' and Mechanics' Savings Bank was organized April 23, 1883, and opened for business June 4, 1883. Willard Howe has been president, George E. Cutler treasurer, and Stearns G. Davenport clerk, from the start. To-day the deposits amount to \$430,000. The bank has never lost a dollar, and has paid dividends of from four to five per cent since the start. The vice-presidents are A. C. Blanchard, D. T. Bridges, J. R. Entwistle. The trustees are Willard Howe, H. L. Sawyer, James Fennessy, Jos. W. Bulard, Chas. D. Lewis, S. G. Davenport, Geo. E. Cutler, Franklin Ensline, Willis M. Ranney, Sidney A. Phillips, James R. Entwistle, Patrick Hayes, Jr. Sidney A. Phillips, Esq., is the bank's solicitor.

The South Framingham Co-Operative Bank was chartered April 18, 1889. The deposits now amount to over \$28,000. A dividend of six per cent. was declared at the end of the first year's business. Charles

J. McPherson is president; Alfred M. Eames, vice president; Harrie L. Davenport, secretary and treasurer. Willis A. Kingsbury, Esq., is solicitor. The directors are R. M. French, E. Goulding, J. J. McCann, Joshua Smith, W. A. Kingsbury, Alvah T. Bridges, R. L. Everit, F. H. Fales, J. H. Goodell, J. B. Johnson, G. L. Whitney, J. H. Conway.

The Framingham National Bank was incorporated as a State bank in 1833, and changed in 1864 to a national bank. Up to 1864 it had paid out in dividends a little more than \$383,000. Since 1864, the time when the institution became a national bank, the dividends have considerably exceeded \$500,000, and in all its history no semi-annual dividend has ever been passed. The capital is \$200,000. The bank had always been located at Framingham Centre until 1888, when it removed to South Framingham, having bought out the business of the South Framingham National Bank. James J. Valentine, who for twenty-six years had been clerk and cashier in the bank, is president; Franklin E. Gregory is vice-president, and Fred. L. Oaks is cashier. The directors are J. J. Valentine, F. E. Gregory, John B. Walcott, W. M. Ranney, Walter Adams, S. B. Bird, T. L. Barber.

The South Framingham National Bank was organized June 14, 1880, and began business in July of that year, with a capital of \$100,000. Although the bank did a good business and was prosperous, certain of the older stockholders looked with favor upon a proposition of the Framingham National Bank to assume their business, paying a good premium for the stock, and, although the bank had \$150,000 on deposit, and \$200,000 worth of good loans, it went into liquidation in August of 1888, receiving from the old bank about \$114 for each share of stock. The presidents of the bank were James W. Clark, Adolphus Merriam and Franklin Manson. The cashiers were F. M. Stockwell and Fred. L. Oaks.

CHURCHES.—In South Framingham there are seven churches,—Roman Catholic, Congregationalist, Baptist, Methodist, Universalist, Episcopal, Presbyterian, while at the other villages of the town most of the above denominations are represented, as well as the Unitarian. Brief sketches are given of the churches at South Framingham.

The Baptist Church is the oldest one in the village. Previous to the last month of 1851 the inhabitants of the village attended church at Framingham Centre, but the growth of the South village consequent to the establishment of the straw hat and bonnet industry demanded a place of worship nearer home. Occasional meetings had been held at the various dwellings and in the village school-house, and for some time a Bible class had been conducted on Sunday evenings by Alexander Clark, and on week-days some portion of the Bible was read aloud in his straw shop. This was early in the forties. Not long after Revs. Appleton Belknap, of Framingham, and B. F. Bronson, of

Ashland, and other ministers preached for a few Sundays in Mr. Clark's shop, seventy-five persons or more attending these services. The writer is indebted to an historical address delivered on March 16, 1879, by Rev. H. G. Safford, for most of the information concerning the growth of the Baptist Church. He tells us that in 1844 Rev. I. N. Tarbox became pastor of the Centre Congregational Church, and in 1846 Rev. Jonathan Aldrich, of the Centre Baptist Church, and that soon after there was a revival of religious interest in town. A considerable number of the young men and women connected with the straw shops at South Framingham became interested and were converted. In 1851, Elias Howe, then of Boston, built Waverley Hall in the central part of the village, and during its building he spoke of holding meetings in it, and upon its completion, previous to the dedication ball, he invited Rev. Mr. Olmstead, a Baptist minister, and editor of the *Watchman*, then residing in Framingham, to preach upon a Sunday evening early in November. Mr. Olmstead, being unwell, came with a substitute in the person of Rev. S. S. Cutting, another Baptist minister, associated with Mr. Olmstead on the *Watchman's* editorial staff, also a temporary resident of Framingham, and he preached to a large and attentive company. At the close of this meeting a call was issued, inviting all who were interested in having stated religious services in the village to meet to consider the matter. This meeting was held in the depot on the evening of November 18, 1851. Hon. Joseph Fuller was chosen chairman, and it was voted to have stated religious meetings. The nearness of Newton Theological Seminary, where pulpit supplies could be easily obtained, was one principal reason why it was unanimously voted at this meeting that the preaching should be of the Baptist faith. Waverley Hall was hired for the meetings, and Messrs. Olmstead and Cutting were engaged to preach half the time, alternating with students from Newton Seminary. In two days the sum of \$281.50 was pledged for these meetings, and the first service was held on Sunday, December 7, 1851, Rev. S. S. Cutting preaching to a large and attentive congregation. On December 21st, a Sunday-school was formed, having thirty-nine scholars at the start. During these nearly forty years this Sunday-school has continued with but one brief interruption one summer. Elbridge Gale was the first superintendent, with Alexander Clark for assistant. The office of superintendent has since been filled by Alexander Clark for twenty-eight years, and for shorter terms by Deacons Edwards and Phillips, and Messrs. J. C. Clark, G. C. Travis, E. F. Phinney, Rev. E. S. Wheeler, A. M. Lang, Mr. Lang holding the office at present. The membership of the school at present is 200.

Preaching was continued in Waverley Hall during the first year, but on account of an advance in rent the regular services were then given up, but some months afterward Richardson's (afterwards Liberty, now Py-

thian) Hall was secured for one year. The services had thus far been carried on by the South Framingham Baptist Society. On March 17, 1854, the South Framingham Baptist Church was organized with twenty-two members. On Sunday afternoon, March 26th, the church was formally recognized by a council of the Baptist churches from the neighboring towns. Rev. B. H. Lincoln, of Bordentown, New Jersey, was the first regular pastor, commencing his labors on Sunday, April 9, 1854. In April, 1855, the deed was secured for the present church location, the lot costing \$1500. Subscriptions to the proposed new church edifice were generous, and a committee, consisting of A. Clark, F. Manson, Newell Clark and J. Hemenway, was appointed to go ahead with the erection of a church edifice. A. R. Esty, of Framingham, was selected as the architect, and in December of 1854 the vestry of the present building was ready for dedication, and this service was performed on the Saturday evening preceding the first Sabbath in January, 1855. The whole house, upon its completion, was dedicated on Thursday afternoon, March 15, 1855.

In the spring of 1867 a bell costing \$800, and weighing 1600 pounds, was put into the belfry. Early in 1869 a few of the families connected with the church aided in starting the new Methodist Church, and in January, 1873, the organization of a Congregational Church drew still further from this church. Early in 1878 the organization of a Universalist Church drew still a little more from the attendance; but all these years the growth had been more than commensurate with the drains upon the church by deaths, removals and the formation of new ones. The pipe-organ was put into the church by Alexander Clark and son Willard, in 1861, and for nearly thirty years Mr. Willard E. Clark has served as organist.

The pastors of the church have been: Rev. Bradford H. Lincoln, 1854-55; Rev. Samuel W. Foljambe, 1856-58; Rev. Theron Brown, 1859-61; Rev. Samuel Brooks (acting), 1862-64; Rev. Alexander M. Higgins, 1865-67; Rev. Thomas T. Filmer, 1868-73; Rev. George R. Darrow (acting), 1874-75; Rev. Henry G. Safford, 1875-84; Rev. Edwin S. Wheeler, 1884-90, still pastor. The present church membership is 221. Connected with this church is the new Hills Chapel Mission at Lokerville, the handsome little chapel having been erected in that rapidly-growing section of the village in 1888, largely through the gift of the late Mr. Samuel Hills and wife. A Sunday-school is also maintained at Hills Chapel.

Connected with the Baptist Church are the Young Christians' Association, Ladies' Missionary Society and the Ladies' Social Circle. The latter circle was organized in 1851, even before the church was organized, and has been a powerful factor for good. Through it the church was originally furnished, the bell was bought, and many works of benevolence have been carried out.

Methodist Episcopal Church.—It was in February of

1869 that some people of the Methodist persuasion first got together here with a view to forming a society. Meeting from house to house, they were formally organized at the house of Horace W. Carter on November 5, 1869, the Quarterly Conference being held there. Besides the other attendants there were at the start twenty members in full communion. Waverley Hall was used as a meeting-place until 1873, when the Kennedy property, adjoining, was purchased by the society, and Irving Hall became the place of meeting. Rev. William R. Clark, D.D., preached the dedicatory sermon December 21, 1873. By degrees, as the society grew, it was found that the hall was too small for its meetings, and the project of building a church was agitated. The Kennedy purchase had grown more valuable as the town grew, the hall was in demand for other purposes, and there was land enough adjacent to the Irving building, but a part of their original purchase, for a suitable church building. Under these favorable conditions the idea of building a meeting-house grew rapidly, and in 1883 Mr. H. W. Corson, of Natick, was employed to prepare plans and build the present meeting-house, which has a capacity for seating 250 in the auditorium, with parlors in the rear which can be made a part of the auditorium by raising the sash partition, which is hung on weights. Other rooms are provided above and in the basement. The new church was dedicated February 21, 1884, and so much has the society since grown that it is often tested to its full capacity. Within a month of the time of writing, a handsome pipe-organ has been put into the church. The full church membership is now 135, besides twenty-five probationers. The Sunday-school now numbers 160, and is steadily growing under the superintendency of Mr. C. T. Boynton, who has been superintendent the past four years. The pastors who have been stationed here since the society's formation are: Rev. F. B. Hampton, who died after preaching two Sabbaths, and Rev. J. M. Avann, 1869; Rev. Seth C. Carey, 1870-72; Rev. John H. Mansfield, 1873; Rev. Joshua Gill, 1874-75, and 1879-81; Rev. D. K. Merrill, 1876; Rev. Phineas Sloper, 1877; Rev. John H. Emerson, 1878; Rev. Almon F. Hoyt, 1882; Rev. William Full, 1883-85; Rev. George E. Sanderson, 1886-87; Rev. A. J. Hall, 1887-88; Rev. E. W. Virgin, 1890.

Grace Congregational Church.—The first steps leading to the formation of this church were taken July 11, 1872, when, by appointment, a prayer-meeting was held in the ante-room of Nobscot Hall, at which thirty persons were present. These meetings were continued week by week and increased in attendance and interest. Nov. 5th it was decided to organize a Congregational Church in South Framingham, and committees were chosen to take the necessary preliminary steps for the formation of the church and society or parish, also to see if funds could be raised to meet the expense of the first year.

On Dec. 1, 1872 the first regular Sabbath service was held in Nobscot Hall, at which Rev. L. R. Eastman, Jr., pastor of Plymouth Church, Framingham Centre, preached. This hall, afterwards the District Court-room, continued to be the place of meeting of the church until the completion of the chapel in January, 1874.

The church was organized January 2, 1873, as the South Church of Framingham, with fifty-seven members, and recognized by a council of the neighboring churches held that day. Of those thus uniting, thirty-four were from Plymouth Church, Framingham, which may be called the mother church, both from this circumstance and from their active sympathy and help. The Home Missionary Society was represented on the council, it being supposed that the church would need the help of this society; but it did not, as it was self-supporting from the start.

In April, 1873, the church and society extended a call to Rev. David M. Bean to become their pastor. This call was accepted and he began the duties of the pastorate May 4th, without installation.

In July of that year the society purchased of Franklin Manson the lot of land on which the church and chapel are situated, and steps were taken at once to erect a chapel. Jan. 29, 1874, "The Chapel" was dedicated, Rev. E. K. Alden, D.D., preaching the sermon. The cost of building and land was about \$8100, fully two-thirds of which was raised before dedication, and the balance during the two years following. The chapel was thirty-six by sixty feet, and would seat about 250 persons.

The pastorate of Rev. Mr. Bean was a very important period in the history of the church. It continued until August 1, 1879, for a period of a little over six years. During this time the church enjoyed a steady and healthy growth. It increased in membership from 67 to 133, 54 being received during this time on confession of faith.

In January, 1880, the place adjoining the church property on the east was purchased with the intention of remodeling the house for a parsonage. The total cost of the parsonage property when these changes were made was about \$5,500.

February 12, 1880, Rev. William R. Eastman was installed as pastor.

Soon after the establishment in the place of the Par  Rubber Shoe Company it was apparent that the chapel was too small, and about the 1st of January, 1873, the first steps were taken toward the building of a church. At this time the church had been organized ten years and had a membership of 144. Mr. L. B. Valk, of New York, was employed as architect. The corner-stone of the building was laid August 31st, and it was completed in the following March and dedicated the 2d day of April, free of debt, the cost being about \$10,000. The bell, costing about \$500, was the gift of Mr. George M. Amsden. The church is about sixty by seventy feet and seats 490

persons. The floor is bowled, and seats are arranged on circular lines.

In November, 1886, the property adjoining the church on the south was purchased by Elbridge E. Rice for \$5500. An extension was added to the church in the rear of the pulpit and a pipe-organ placed therein at a total cost of about \$3800.

May 20, 1888, Rev. W. R. Eastman presented his resignation as pastor, to take effect September 1st. He was regularly dismissed by a council held July 9th. During the eight and a half years of his pastoralate seventy-four persons were received on confession of faith and the church increased in numbers from 132 to 245.

The Rev. Frederick E. Emrich commenced his labors as pastor February 7, 1889, the church having extended him a call to become their pastor for one year. December 19, 1884, the church incorporated as Grace Congregational Church, and the property of the society was soon after transferred to the new organization. January 29, 1890, Rev. F. E. Emrich was installed by council as the pastor of the church. As the result in part of a series of special meetings forty-one persons were received into the church on confession of faith from January 1, 1890 to the July communion, and the total membership has increased from 251 to 313. The attendance at the church services has so increased that there is a great demand for more sittings, and a movement is now on foot (July, 1890) for enlarging the church and providing better accommodation for the Sunday-school, for which purpose it is proposed to raise \$10,000.

The seats in the church have always been free (that is, not sold or leased), and the expenses have been met by a system of voluntary offerings. Four-fifths of the seats have been assigned to those desiring regular seats, the balance being reserved for strangers.

The following have served the church as deacons: Andrew Coolidge, 1873-80; Simeon H. Williams, 1873-81; Benjamin T. Thompson, 1878-80, '82-85, '87; Charles H. Emerson, 1880-82; Edwin A. Freese, 1880-83; Fred. L. Oaks, 1881-84, 86, '89; Frederick J. Stevens, 1883-86, '88—Fred. W. Taft, 1884-87, '89—Sampson Bridges, 1885-88, '90.

The Sunday-school was organized as soon as the church was started. Its present membership is over 450. The average attendance in 1889 was 244, and for the first half of 1890 over 280. The present superintendent is Dr. George Rice. A full list of those who have held the office is as follows: Wm. W. Wood, 1873; Geo. L. Clapp, 1874-75; Frank A. Day, 1876 and January to September, 1880; Geo. B. Overhiser, 1877; Dr. George Rice, 1878-79, 1889-90; Fred. L. Oaks, September to December, 1880, 1881-82, 1887-88; Frederick J. Stevens, 1883-86. Other societies connected with the church are as follows: the Ladies' Association, a social and home missionary organization, formed April 14, 1874; the Ladies' Foreign Missionary Society, organized February 10,

1875; the Young People's Society of Christian Endeavor, organized December 4, 1883; the Junior Society of Christian Endeavor, organized October 27, 1884; the Gleaner, a children's missionary society, organized in 1884.

Roman Catholic.—St. Stephen's Roman Catholic Church is the largest and handsomest in the village. The first movement to provide a place of worship in this village for Roman Catholics was in 1876, when meetings were held in Waverley Hall, Rev. A. J. Rossi, of St. George's Parish, Saxonville, being in charge of the movement. As a result, the old Saxonville Parish was divided, and St. Bridget's Parish was established in July, 1877, the church edifice at Framingham Centre, built by the Universalists and afterwards used by the Episcopalians, being purchased. This still left South Framingham Catholics without a local place of worship, all attending St. Bridget's Church at the Centre. In 1878 Rev. John S. Cullen, who was rector of St. Bridget's, started a mission in Waverley Hall, the Catholic population then in the village numbering about 300 souls, including infants. The meetings were well sustained, and as the village grew, so did the parish. The establishment here of the Pará Rubber Shoe Co.'s business in 1882 had an electrical effect upon this parish, as indeed it had upon the whole village, and the hall accommodations were soon inadequate to the demands upon them. The new St. Stephen's Parish was set off from St. Bridget's, and formally organized by itself in May, 1883. A centrally located church site was purchased of Augustus Richardson, on Concord Street, and plans were made for a new church edifice. The corner-stone was laid December 16, 1883, in the presence of 1000 people, the stone being blessed and laid by Vicar-General Wm. Byrne, D.D., Archbishop Williams being at the time in Rome. The sermon was preached by Rev. P. A. McKenna, of Hudson.

On Christmas Day, 1884, the new building was occupied for the first time. It was built by A. Fales & Sons, of this village, P. W. Ford, of Boston, being the architect. It seats about 1000 people. A deep-toned bell was afterwards put in the tower, and a very fine pipe-organ was put into the church in 1887. A new cemetery, consisting of twenty-four acres, beautifully situated between this village and Saxonville, was prepared in 1888-89, and consecrated on November 8, 1889. A lot of land has been bought on Clinton Street, near the church, upon which a handsome parochial residence is to be erected at once, the plans being already prepared. There are now about 3000 parishioners, and a flourishing Sunday-school has an attendance of about 450. The church has a large and well-trained choir. Connected with the parish is the Ladies' Sodality of the Blessed Virgin, with about 75 members, the League of the Sacred Heart, the St. Stephen's Cadets, an organization of about 240 children, who are pledged to total abstinence from intoxicating liquors until they reach their majority, and

who are also pledged to avoid profanity, and respect God's name. Father Cullen's assistants have been Rev. J. J. Nilan, for three years from 1879; Rev. J. A. Donnelly, for nine months following; Rev. E. P. Allen, D.D., for two years; Rev. J. W. Galligan, for five years, until July, 1889; and Rev. D. C. Riordan, the present assistant rector, from that time. Besides the large St. Stephen's Parish, Fr. Cullen also has charge of St. Bridget's at Framingham Centre, he and his assistant dividing the work between them, and they also conduct religious services each Sunday at the Sherborn Reformatory for Women, which is partly in South Framingham. It is probable that a second assistant will soon be needed.

Universalist Church.—The First Universalist Society in South Framingham was started in November, 1877. For one year it worshipped in Nobacot Hall (now the District Court-room) and then removed to Liberty Hall, where it worshipped two years. The pretty little church edifice now occupied by the society was built and dedicated by this people, the services of dedication being on November 9, 1882. The church, built of wood, with a tower and steeple containing a bell, has a seating capacity of about 250. The "First Universalist Parish of South Framingham" was organized April 28, 1878, with twenty-seven members, choosing as officers: Moderator, Adolphus Merriam; Clerk and Treasurer, S. G. Daveaport; Standing Committee, Daniel Hewes, John Hemenway, F. P. Stearns—"these five officers to constitute the trustees of the parish." Rev. W. A. Start, of Cambridge, secretary of the Massachusetts Universalist Convention, was the founder of the society, and he supplied the pulpit until Rev. Albert Hammatt came, he being ordained October 13, 1880. Rev. W. W. Hayward was settled over the parish December 11, 1883, and the present pastor, Rev. W. F. Potter, took charge of the parish in May, 1889. The Sunday-school was organized soon after the society, and for nine years Mr. B. F. Merriam has been its superintendent. Its membership is about 100. Connected with the society are a Ladies' Association, a circle of King's Daughters, and a circle of Sisters of Bethany among the children.

Episcopal Mission.—St. Andrew's Episcopal Mission was started in the Methodist Church in 1884, preaching services being held at first once a month, with Sunday-school every Sunday afternoon. Rev. Frank S. Harraden, rector of St. John's Church, Framingham Centre, was in charge of the movement. Meetings were subsequently held in G. A. R. Hall, then in Liberty Hall, and early in 1887 the mission began to hold its meetings in the Universalist Church, arrangements being made with the latter society for the use of the church for a part of each Sunday. About 1886 there was an agitation in the mission for a church edifice of their own, and Mr. R. M. Everit, of New Haven, a large land-owner in this village, made the people a present of a good building lot for

a church, but the movement for building has been abandoned for the present. Mr. Harraden departed for another field in 1889, and October 1st, of that year, Rev. Arthur Hess became rector of St. John's Church at the Centre, with the same charge over the mission at South Framingham. The mission now has about seventy-five adherents, with a membership of forty in the Sunday-school. There is a Ladies' Aid Society, and a social circle among the young people called The South Framingham Guild.

The Presbyterian Church.—It was on June 13, 1886, that the first Presbyterian services were held in town, the place being Grand Army or "Irving" Hall, in this village, where both the Methodist and Episcopal missions had previously worshipped. Rev. Edward Hunting Rudd, a Princeton student, took charge of the work for the first three months, starting the first meeting, and showing marked ability for his work. That the movement had the endorsement of the other churches in the town may be judged from the fact that at this first service the Methodist organist played the organ, and the Baptist choir led the singing, while at subsequent meetings the pastors of most of the other churches participated in the services. One week after this first service a Sunday-school was started. After Mr. Rudd's departure the pulpit was filled from time to time by Rev. W. L. Cunningham, of New Jersey; Rev. S. E. Lane, D.D., of South Framingham; Rev. James W. Flagg, of Vermont; Rev. J. A. McDonald, of Nova Scotia, and others. The church was formally organized on December 8, 1886, with twenty-three members, when the commission appointed by the Boston Presbytery for that purpose was present. It took the name of the "First Presbyterian Church of South Framingham." On June 11, 1887, the church called Rev. James W. Flagg, of South Ryegate, Vermont, to be its pastor, and Mr. Flagg was installed over his new charge on October 12, 1887. Under his guidance the church has grown steadily, having now a membership of eighty-five. The Sabbath-school numbers seventy-five scholars and ten officers and teachers, and has had Mr. Charles W. Weller for its superintendent from the first. Up to July 1, 1887, the society worshipped in Grand Army Hall, but at that time removed to larger quarters in Pythian Hall in Liberty Block. In July of 1889 a movement was started looking to the building of a new church. Over \$1000 was subscribed on one Sabbath by the members, and Messrs. T. L. and E. L. Sturtevant presented the society for a church site a fine corner-lot on the corner of Hollis and Winthrop Streets. On that site the foundation and under-pinning is all completed for a comfortable edifice, having the main auditorium raised a few feet above the street, with vestry, parlors and other rooms below. It is expected the new edifice will be built before winter. There is a Young People's Christian Endeavor Society connected with the church, which is doing good work.

SOCIETIES, ASSOCIATIONS AND CLUBS.—South Framingham, like most other large towns, does not lack for representatives of the many fraternal, benevolent and social societies. Among these societies the Masonic is the oldest. Middlesex Lodge, at Framingham Centre, was organized in 1795, and all through the dark days of the persecutions of the order never missed holding a meeting. It still holds in its membership many South Framingham men, and under the present Master, Walter Adams, Esq., has been particularly prosperous; but as the latter village grew, and before the days of horse-cars in town, it was found inconvenient for a large body of men to go two miles to the Centre to the meetings, and so it came about that

Alpha Lodge, A. F. and A. M., was instituted in South Framingham, in 1875, the first meeting for organization being on September 28th of that year, the place being Irving, (since known as G. A. R.) Hall. There were 25 charter members, and the membership now is 107. The Past Masters have been W. H. Phipps, by dispensation, and the following by election: Chas. P. Knowlton, Chas. F. Cutler, L. M. Butler, N. L. Sawtelle, Alexander Hoyt, F. M. Pratt, L. M. Palmer, and the present Worshipful Master is Fred. L. Oaks. Edgar Potter is secretary. Meetings have been held the past few years in Odd Fellows' Hall; but Masonic Hall, in the new Smith Block, has just been fitted up by the lodge. The regular meetings are held the second Wednesday evening of each month.

Concord Royal Arch Chapter, A. F. and A. M., was organized at Concord in 1826, but removed to Framingham in 1852. It is made up to-day of Masons from both Middlesex Lodge, at Framingham Centre, and Alpha Lodge, at South Framingham. Joseph Drew Thomas, of South Framingham, is the present Most Excellent High Priest, and Edwin Moulthrop, of Framingham, is secretary. The Chapter is noted for its fine work. It meets at South Framingham.

A Chapter of the Order of the Eastern Star, a ladies' auxiliary to the Masonic bodies, has recently been formed, and has 48 members. It has been named Orient Chapter. Mrs. Ann M. Hooker is Worthy Matron, and A. J. Heath, Secretary.

Framingham Lodge, No. 45, I. O. O. F., was chartered August 29, 1844, first meeting in Saxtonville, but gave up its charter June 1, 1853. It was re-instituted in South Framingham, February 24, 1875, since which time it has held regular meetings every Wednesday evening. It now has 180 members. Wright Summers is Noble Grand, and Charles E. Mather, Recording Secretary. The lodge has fine quarters in Odd Fellows' Block, the handsome brick block being owned by the Odd Fellows' Building Association.

Wauashakum Encampment, No. 52, I. O. O. F., was organized May 3, 1877, having then eight members. It now has 115 members, and meets in Odd Fellows'

Hall the first and third Fridays of each month. F. W. Bridges is Chief Patriarch, and C. H. Bridges, Scribe.

Fidelity Degree Lodge, Daughters of Rebecca, auxiliary to the Odd Fellows, was instituted May 14, 1886, with a membership of 60. It now has 202 members, and a very fine paraphernalia. It meets the second and fourth Friday evenings in the month, in Odd Fellows' Hall. Mrs. E. H. Martin is Noble Grand, and Mrs. J. B. Robie, Secretary.

Pericles Lodge, No. 4, Knights of Pythias, was instituted in Odd Fellows' Hall, on Nov. 5, 1885, with 25 charter members. It afterwards removed for a time to G. A. R. Hall, and in 1887 leased and fitted up Pythian Hall, in Liberty Block, which it now occupies and controls, and sub-leases to other organizations. Albert A. Jackson is Chancellor Commander, and H. F. Hamilton, Keeper of Records and Seal. The lodge now has a membership of 110 in good standing.

Mizpah Assembly, No. 6, Pythian Sisterhood, was organized March 14, 1889, with 12 charter members. At present the membership is 23. It holds meetings twice a month in Pythian Hall. Mrs. J. H. Safford is Chancellor Commander, and Miss E. L. Kittredge, Keeper of Records and Seal. This Assembly is auxiliary to the Knights of Pythias.

Plymouth Rock Council, No. 37, Order of United American Mechanics, was instituted November 26, 1888, with 45 members, and now has 90 members, meeting every Monday evening in Masonic Hall, in Smith Block. E. A. Temple is Councilor, and H. E. Miller, Recording Secretary.

Netus Tribe, No. 43, Independent Order of Red Men, was instituted June 13, 1887, with 20 charter members. It was instituted in Odd Fellows' Hall, where for some little time it held its meetings, afterwards meeting in Pythian Hall for three years. Since July 1, 1890, it has met in the new Masonic Hall, in Smith Block. The tribe has already shown steady growth, and now has a membership of 128. It has a good paraphernalia, and does good work in the exemplification of the degrees. Otis Cutting is Sachem, and David H. Durand, Keeper of Records.

Wauweta Council, No. 29, Degree of Pocahontas, an auxiliary to the Red Men, was instituted November 14, 1889, having then forty-seven members. The membership is now seventy-five, and it meets twice a month, first and third Fridays, in Masonic Hall. Mrs. A. D. Leland is Worthy Pocahontas, and Mrs. Mary E. Porter, Secretary.

Gen. J. G. Foster Post No. 163, G. A. R., was instituted March 25, 1884, with thirty members. It now has a membership of seventy, all well uniformed, and maintains a cosy G. A. R. Hall, which it sublets to other societies. It meets the second and fourth Tuesday evenings in the month. Capt. E. F. Phinney is commander, and Maj. J. M. Wiswell, adjutant. Previous to the organization of Foster Post, D. Brigham Eames Post,

No. 142, existed at South Framingham. It was started in the winter of 1869-70, but afterwards moved to Saxonville, and its name was changed to Burnside Post.

Gen. J. G. Foster Camp 59, Sons of Veterans, was organized March 5, 1886, with thirteen members, and at the present time has forty-five. It meets the second and fourth Thursday evenings in the month, in G. A. R. Hall. Wm. O'Callahan is captain, and S. Fred. Wilson, first sergeant. The Camp is well uniformed and well drilled.

Gen. J. G. Foster Woman's Relief Corps was organized May 16, 1884, with twelve members, and now has seventy-five. It is an independent corps, and has been a power for good in its chosen work, and a most valuable auxiliary to the "boys in blue." It meets the first and third Tuesdays in G. A. R. Hall. Mrs. E. F. Phinney is president, and Mrs. M. E. Porter, secretary.

Garfield Council, No. 857, Royal Arcanum, was instituted in G. A. R. Hall, September 25, 1884, with fourteen charter members. The membership is now thirty-nine. It meets the second and fourth Friday evenings in the month in Pythian Hall. C. J. McPherson is Regent, and E. S. Twichel, Secretary.

Trimount Lodge, No. 670, Knights of Honor, was instituted June 15, 1877, with fourteen members and now has twenty-six members. Meetings are held the first and third Mondays in the month in G. A. R. Hall. E. A. Johnson is Dictator, and W. M. Ranney, Reporter.

Framingham Council, No. 1163, American Legion of Honor, was instituted September 19, 1883, with thirty-two charter members, and now numbers seventy-eight members. It meets the second and fourth Monday evenings of the month in G. A. R. Hall. A. A. Jackson is Commander, and W. K. Ephlin, Secretary.

Framingham Commandery, No. 400, United Order Golden Cross, was instituted July 17, 1889, with thirty-one members, the membership at present being twenty-eight. Meetings are held in G. A. R. Hall the first and third Wednesday evenings of each month. O. A. Hemenway is Noble Commander and H. F. Nichols, Keeper of Records.

Lakeview Colony, United Order of the Pilgrim Fathers, was instituted September 13, 1888, with twenty-seven members and now has thirty-five. Meetings are held in G. A. R. Hall the first and third Thursday evenings in each month. Mr. F. F. Stacey is Governor, and Mrs. M. E. Newton, Secretary.

Local Branch, No. 979, Order of the Iron Hall, was instituted February 13, 1889, with thirty members. It has since had sixty members, but the membership now is forty-eight. George M. Farrar is Chief Justice, and Asa D. Forbes, Accountant. Meetings are held the first and third Friday evenings in the month in G. A. R. Hall.

Gen. Nixon Commandery, No. 33, People's Five Years' Benefit Order, was organized in October of 1889. It

had then, and still has, forty members. W. F. Richardson is Worthy Commander, and Edward F. Phinney, Worthy Secretary. It meets monthly in G. A. R. Hall.

Linden Lodge, Independent Order of Good Templars, was organized September 16, 1889, with twenty-seven members, and now has ninety, with an ambition to be the best lodge in the State. Meetings are held in G. A. R. Hall every Saturday evening. J. A. C. Hamil is Chief Templar, and E. B. Parsons, Secretary.

Division 30, Ancient Order of Hibernians, was organized June 11, 1884, with twenty-three members, and now has eighty-five. Meetings are held on Sundays, in A. O. H. Hall. James W. Burk is President, and W. O'Mally, Secretary.

Morning Star, Temple of Honor, No. 28, was organized in October, 1884, with twenty-five members, and now has thirty. It meets in G. A. R. Hall, the second and fourth Friday evenings of the month. Geo. C. Blades is Worthy Chief Templar, and Geo. L. Clapp, Worthy Recorder.

The Woman's Christian Temperance Union was organized March 1, 1878. It has seventy-five members. Mrs. S. J. Wakefield is president, and Mrs. W. A. Bailey, secretary.

The Loyal Temperance Legion, comprising children of from ten to sixteen years old, was organized in March, 1889, with thirty-eight members. The membership is now 240, and meetings are held every Tuesday afternoon, except in vacation time. Henry Hilton is president, and Miss Evelyn Stearns, secretary. Mrs. W. W. Pease is chorister.

St. Stephen's Total Abstinence Society was organized Jan. 6, 1885, with thirty members and now has one hundred. Meetings are held Sunday afternoons in their hall in Liberty Block. David T. Flynn is president and John J. Gannon, secretary. An off-shoot from the society is the company of St. Stephen's Cadets, a handsomely uniformed and well-drilled company of young men.

The Union Associates were organized in November, 1883, with twenty members for social purposes. The membership now is fifty, and new rooms are being prepared in the *Tribune* Building. The regular business meetings are held monthly, but the rooms are open for members every day and evening. William O'Callahan is president and Arthur Miller, secretary.

The Catholic Union was organized for literary and social improvement in February, 1890, with thirty members, and now has forty. Meetings are held on Thursday evenings in St. Stephen's Hall. James J. McCloskey is president, and Thomas R. Hill, secretary.

The Framingham Club, the leading social organization of the town, was organized about the first of 1890, being incorporated on March 11th, with ninety members. The membership now is 114. Chas. E. Haberstroh is president and Chas. Bulle, secretary. The

club-rooms are in Smith Block, and are open to members every day and evening in the year.

The Commercial Club was organized in February, 1888, its membership being limited to twenty-five. Thomas L. Barber is president, and R. L. Everit is secretary. The club's room is in Liberty Block.

The Framingham Historical and Natural History Society was organized March 31, 1888, with twenty members, and now has eighty. C. A. Belknap is president, Willard Howe, secretary, and Edgar Potter, curator. The object of the society is the collection and preservation of articles relating to and illustrating the history of Framingham and vicinity; natural and scientific curiosities; specimens of natural history; recording and preserving items of passing events that may become items of interest in the future, and the erection of a building as a safe repository of the same. The society's quarters, with its collection, are at the residence of Willard Howe on Concord Street.

The Framingham Dramatic Club is an association formed in May, 1890. Austin W. Phipps is manager and Miss Fleda Brown, secretary. The object is the presentation of local dramatics, and the club meets in Elmwood Opera-House.

The Framingham Medical Society was organized December 29, 1887, with ten members. It is an association of physicians from this and surrounding towns, the membership, at present, being fourteen. Meetings are held monthly on the first Tuesday at the houses of members.

The Framingham Hospital is the result of some years of agitation, and the society is now incorporated under a charter from the Legislature of 1890, with the right to hold \$50,000 worth of real and personal property. Active steps will soon be taken to make the organization of practical benefit to the community.

The Framingham Drill Club is an organization of young men and boys, most of whom are students in the schools of the town, and the object is chiefly physical improvement. The club comprises about eighty members, and is divided into two companies, making a small school battalion. Out of compliment to Supt. Luke R. Landy, of the State muster-field at this place, who was chiefly instrumental in organizing them, the boys voted to be known as "The Landy Cadets." The boys are uniformed, have regular drills, and are allowed under the school law to carry arms. Their drill-master has been Lieutenant Hunter, of Company L, of the Ninth Regiment, of Natick, and under his instructions the boys have come to a high degree of proficiency in drill, with a corresponding improvement in their general carriage.

The Woman's Club was organized in May of 1889 with twenty-three members, and now has thirty-five. The object is mutual improvement along an intellectual line, and it meets fortnightly on Tuesday afternoons. Mrs. Sewell Fisher is president and Mrs. C. F. Beard, secretary.

The Framingham Art Club was organized May 1, 1890, with thirty members, and now has forty. Mrs. C. F. Beard is president and Mrs. C. U. Fuller, secretary. The studio is in Smith Block and lessons are given three times a week. At present instruction is chiefly confined to drawing and painting, but other branches of art will be taken up in time. It is designed to give exhibitions from time to time, and to establish an evening art school.

Waushakum Brass Band was formed in the spring of 1888, and is finely uniformed. The membership is twenty-eight. Ed. S. Hemenway is leader. The band-room is in Union Block.

Elmwood Bugle, Fife and Drum Corps was organized Oct. 20, 1886, and numbers fifteen musicians, well uniformed. W. E. Walters is captain. Meetings are held in Alpha Rink.

The South Middlesex Driving Association was organized in May, 1890, and its track is at the grounds of the Middlesex South Agricultural Association, in this village. The track is kept in good condition for practice, and occasionally trotting races are held, with liberal purses to the winners. C. J. Fillmore is secretary of the association, L. P. Sleeper is track manager. The directors are H. S. Drake, J. H. Jordan, E. L. Deschamps.

The Middlesex South Agricultural Society, which was organized in 1854, formerly held its fairs at Framingham Centre, but in 1869 twenty-five acres were bought on Union Avenue, in this village, and convenient exhibition buildings established there, as well as a half-mile trotting track, the whole at a cost of \$16,000. Since then a few acres have been sold, but the grounds and buildings are in excellent condition, and the annual exhibitions in September are largely attended. Each year \$600 is received from the State for premiums, nearly twice that amount being offered exhibitors. The annual meetings are held the first Monday in December. N. B. Douglas, of Sherborn, is president, and Samuel B. Bird, of Framingham, secretary.

The Firemen's Mutual Relief Association was organized January 21, 1889, among the firemen of the town for the objects which its name implies. William H. Burke is president, and George T. Fuller, secretary. There are about 40 members. Quarterly meetings are held on the first Monday evenings of January, April, July and October.

The South Framingham Base Ball Association, maintains grounds on Concord Street, which are fenced in, and on which base ball and other athletic sports are held. Frank E. Farrar is manager of the association, and Russell M. French, treasurer.

A Nationalist Club has been started, July, 1890, with C. A. Simpson, president, and W. D. McPherson, secretary.

The Industrial Unions.—The industrial unions of the town are quite well organized, and hold regular meetings. Among these unions in the village are the

Carpenters' and Joiners', Painters' and Decorators', Lasters' Protective, International Leather-Workers', Rubber-Workers', Brotherhood of Railroad Brake-men, Trainmen's Protective Association.

Among the organizations which have lately gone out of existence in the village are:

The Citizens' Association, a body of gentlemen seeking to improve the growth and prosperity of the town, was organized February 8, 1886, but died after two years, although accomplishing much good in that time.

The Literary Society was started in March, 1875, with fifty members, and had over one hundred members afterwards. It was very prosperous for ten years, but in 1886 surrendered, giving the money in its treasury—about \$50—to the Choral Union.

The Choral Union, organized in 1884, existed between four and five years, and had a marked effect upon the musical culture of the town. Concerts were given from time to time, but, like many another good thing, it finally succumbed to lack of interest.

BUSINESS INTERESTS.—As a business centre, South Framingham has already achieved considerable distinction. It is the natural centre of a circle of twenty-five or thirty miles, within whose radius are a score or more of thriving towns. We have seen that it is on two main lines of railway with their branches; being situated twenty miles west of Boston, twenty miles east of Worcester, twenty-five miles south of Fitchburg and Lowell and thirty miles north of Taunton. Most of the village is of level land, and the business part is considerably cut up with railroad tracks, affording numerous sites for manufacturing establishments. Unlike many towns, this one is not tribute to any other town or city, but is an independent community, rapidly growing from its own resources. Previous to 1840 there were but a few straggling houses each side of the Boston and Worcester Railroad track. The development of the straw-hat and bonnet industry in the "forties" drew outsiders in, until in war time we find that business flourishing in town, and there was practically no other manufacturing business here.

The bonnet business which had been begun by Mrs. Lovell Eames in 1825, and enlarged by her son, Horace, who took charge in 1830, was purchased by Franklin Manson in 1840, and carried on until 1864 by him, when it was sold to Curtis H. Barber, who subsequently took his son, Thomas L., in with him. To-day this large business is carried on by T. L. Barber & Company, at a finely appointed factory on Park Street, which year by year has been extended and improved. In the busy season about four hundred employees are kept at work, one hundred and forty of whom are men, the rest women. The product is ladies' straw-hats in different styles, and the firm has a very high reputation for fine work. The sales-rooms are with Messrs. Gotthold & Company, 561-563 Broadway, New York.

Mr. Temple, in his "History of Framingham," has told of the connection of Alexander and Willard E. Clark in the business, also of Augustus and George Richardson, George P. Metcalf and H. K. White. The firm which succeeded these latter gentlemen was (A.) Richardson & Crafts. This firm was succeeded by the new firm of Crafts, Emmons & Billings; this in turn by Emmons & Billings, with a change later on to H. O. Billings & Co., and still later, in 1888, by the present firm of Staples & Smalley. These latter gentlemen came from Westboro', leasing the factory of Mr. Billings. About the 1st of December, 1887, a large part of this factory was burned, but Mr. Billings, with great enterprise, set about rebuilding, and by dint of hard work on the part of a large force of men, night and day, in about two weeks a large and better factory than any of its predecessors stood finished. Messrs. Fales & Sons, belonging here, were the builders. This great speed was necessitated on account of the busy season at the factory. In recognition of Mr. Billings' enterprise and his determination to keep the business in town when outside parties had offered him inducements to remove elsewhere, 250 of the business men of the town tendered him a complimentary banquet, which probably has never been equaled by any other similar event in the town. This factory now employs in the busy season about 250 hands.

The largest industry in the town to-day is that of the *Para Rubber-Shoe Company*, of which A. L. Coolidge, of Boston, is president, and J. L. Stickney, treasurer. It was in 1881 that this company was formed in Boston with a capital stock of \$800,000, increased a few months afterwards to \$500,000, and still later to \$1,000,000. Certain enterprising gentlemen here saw the opportunity to secure the industry for the town, and shortly the terms were arranged. By these terms a company known as the South Framingham Manufacturing Company was formed in town to put up the buildings and lease them to the Para Company. The total cost of the land and buildings was \$101,000. They were completed early in 1882 and occupied. The officers of the building company are: Franklin Manson, president; Sidney A. Phillips, Esq., clerk; Willard Howe, treasurer. The plant is well located, but a few minutes' walk from the post-office and railroad station, covers fifteen acres, and is on the line of the Boston and Albany Railroad, from which a spur track runs into the factory yard and by the large store-houses. The average number of employees is about 1000, divided between both sexes. Joseph D. Thomas is superintendent, and he has had a large experience in the rubber business in this and foreign countries. Until recently the company made rubber clothing as a part of its product, but this branch of the business has been discontinued and attention paid wholly to footwear. The product embraces all grades, from the heavy lumbermen's boots to the finest and most highly-finished ladies' rubbers.

Some of these latter are finished with fancy cloth, silk or satin and fur-tipped tops. The ordinary arctics and rubbers are made, as well as a line of fine tennis shoes. Messrs. Houghton, Coolidge & Co., of Boston, are the selling agents. The Par   pay-roll amounts to about \$10,000 per week, and about 14,000 pairs of boots and shoes are made daily. There are over five acres of floor space in the establishment. The largest steam-engine is of 1000 horse-power.

The Gossamer Rubber Clothing Company began work here in 1875, their plant—all brick buildings—being located on the line of the Boston & Albany Railroad. Messrs. Ira M. and Wm. H. Conant, of Boston, comprise the company, and T. H. Videto is superintendent. The Boston office is at 300 Federal Street. The South Framingham plant is valued at about \$75,000. The Messrs. Conant were the pioneers in this business, and this is believed to be the oldest gossamer company in the country, and the facilities are such that a larger product can be turned out than from any other rubber clothing mill. All qualities of rubber cloth for clothing are made, from the common cotton to the richest silks. About twenty hands are employed in the coating department, and some 300 girls are employed in the Boston department, making the cloth into clothing.

Gregory & Co.'s Boot Factory, which is the second largest industry in town, and one of the largest boot factories in New England, was established here in 1832. At that time the firm was known as Bridges & Co., and it was only on January 1, 1890, that Mr. D. T. Bridges retired from the head of the concern, after having been connected with it for forty-three years, and being a partner for thirty-three years. The business was originally located in Hopkinton, and had twice been burned out before it was finally decided to locate at South Framingham on account of its superior business facilities. On April 24, 1885, the new factory was half destroyed by fire, a brick partition wall saving the rear half. The burned part was immediately rebuilt. The factory stands on high ground, but a few rods from the Boston & Albany Railroad, from which it has a special track; 240x40 feet is the ground size, and four stories above a high basement, the height. Store-houses and other buildings afford additional facilities. The goods made are mostly of the heavier kinds, although many of them are handsomely finished. The firm comprises N. P. Coburn, of Newton; ex-Gov. William Claflin, of Newton; James A. Woolson, of Cambridge; D. T. Bridges, W. F. Gregory, Oliver B. Root, of Framingham. Five of the foremen have been with the concern an average of over thirty-five years, and many of the employees have worked for the firm a long time. The usual number of employees is about 400, although more can be accommodated, and are employed at times.

Williams' Box Factory was located in the "Old Stone Mill," on Howard Street, in 1870, the firm-name then being Fales & Williams. The firm car-

ried on a general building and wood-working business, but dissolved partnership in 1875, when Mr. Abner Fales continued the building business, and Mr. S. H. Williams the mill business. The box business finally outgrew the "Old Stone Mill," and Mr. Williams erected a model plant a short distance away, the Old Colony Railroad, beside which the mill stands, putting a spur track into the mill yard. This new mill, three stories high, was built by A. Fales & Sons in 1886, and occupied in January of 1887. It is fitted with the most modern machinery for sawing the logs into boards, planing them, and manufacturing packing-boxes for the rubber boot and shoe and other factories in the neighborhood. About thirty men are employed, and 12,000 to 15,000 feet of boards are made into boxes daily. The mill is run by steam-power.

The Framingham Box Company was started in February of 1889. Previous to that, about the 1st of August, 1888, Mr. S. G. Damren started a paper-box factory here, being located on the third floor of S. H. Williams' box factory. After running it for a few months he was obliged to go to Maine on other business, and the box business was sacrificed. It had been shown, however, that such a business could live in town, and so a company was incorporated with \$5000 capital, all paid in, and Mr. J. W. Jones, who had been Mr. Damren's foreman, was secured as general manager, being also a stockholder. J. J. Valentine is president of the company, and W. M. Ranney, treasurer. The company, which started with ten hands, now keeps thirty constantly employed, making 5000 boxes daily. While shoe-boxes are a specialty, almost every variety of paper-boxes are made, some of them being very handsome. Mr. Jones is one of the most progressive box-makers in the country, and the business is rapidly growing under his management.

A. M. Eames & Co., wheel manufacturers. Alfred M. Eames began making wheel-hubs in the basement of Union Block in 1871, and continued that business until 1877, when he enlarged the business, going into the manufacture of wheels. His brother, Edwin A., had, in company with Geo. W. Bigelow and C. C. Esty, been manufacturing wheels in Union Block, under the firm-name of Eames, Bigelow & Co., their business being transferred to the Framingham Wheel Co. in 1874, the latter company discontinuing business in 1882. Edwin was a very fine wheel-maker, and is to-day, and became superintendent of Alfred's business, which in 1877 employed but three men but now employs about twelve, making all sizes of wheels, but making a specialty of the highest grade of light carriage wheels, supplying the best carriage-makers in New England. A large business is also done in rims, spokes and hubs. The buildings include two three-story factories, boiler and engine-house and several store-houses. Both brothers have been in the wheel business constantly from boyhood. Edwin went to

Worcester at the age of nineteen, and in four years was foreman of the shop, in which capacity he remained seven or eight years, coming to South Framingham and starting the firm of Eames, Bigelow & Co. in 1870. Alfred was superintendent of the Toledo Wheel Co., coming here in 1870 and starting business. About 1874 Edwin went to West Chester, Pa., where he was foreman for one year, then going to Elizabeth, N. J., where he was foreman for five years. In 1881 he went to Paris and fitted up with the latest improved machinery one of the largest wheel concerns in Europe.

The Framingham Electric Company is now an important factor in the town's economy. Mr. S. O. Daniels, a native of this town, but afterwards a business man of Natick, had established an electric lighting plant in the latter town, and on December 23, 1886, Mr. Daniels started work on a small plant for South Framingham. The lights were started on January 15, 1887, with a power of seven arc lights. When once the utility of the system had been demonstrated, and more customers had been secured, Mr. Daniels bought of Gov. Wm. Claflin a lot of land in the centre of the village on the Milford Branch Railroad track, and erected a fine plant there. March 28, 1888, Mr. Daniels suddenly died at his home in Natick of apoplexy, and the electric business was left in charge of H. W. True, who had been Mr. Daniels' superintendent. The business having been put into a stock company, the controlling interest was purchased by the Thomson-Houston Electric Company, and Mr. True was installed as manager. Under his wise and energetic management the business of the company has been very much extended, and the town now uses electricity exclusively for its street lights. Improvements have been made at the generating station from time to time, and at this time the capacity of the station is 125 arc lights and 2500 incandescents, while there are actually in use about 100 arc lights and 2000 incandescent lights. There are two engines and several dynamos, all of the latest type.

Ordway's Reed-chair Factory.—It was in February of 1888 that Mr. A. H. Ordway, attracted by the fine railroad facilities, removed to this place from Mattapoisett a comparatively small chair-manufacturing business. Temporary quarters were secured in the Dunn Building, on Howard Street, but in the fall of the same year a convenient factory of three stories above the basement, 40x100 feet on the ground, was erected on land secured of Wellington H. Pratt. This factory was finished and occupied in November, 1888, and this business has proved one of the most desirable in the town. Mr. Ordway confines his manufactures chiefly to one or two patterns of a base-rocker arm-chair of reed-work, and these are shipped all over the country. About forty hands are employed, and the factory is equipped with all the necessary conveniences. Besides the chairs, an elegant line of bent-wood and plush-upholstered foot-rests is made.

Marston's Rattan Factory.—Attracted by Mr. Ordway's business and the inducements held out by the place, Mr. H. A. Marston, of Wakefield, moved his business here in the fall of 1889, building himself a model four-story factory, 40x100 on the ground, besides a brick boiler and engine-house, bleach-house, etc. He located his factory directly opposite Mr. Ordway's, and between them there is a branch of the Old Colony Railroad. Mr. Marston's business is the importation of rattan from Singapore and other foreign points, and the splitting of it up into a fine class of cane, leaving the pith or reeds for chair-manufacture, like Mr. Ordway's. Mr. Marston's machines are of his own manufacture and patent, and he maintains a machine-shop in his factory for building them. He lights the factories from his own electric plant, and heats them from his steam-boilers. Beside the cane and reed manufacture, Mr. Marston is a large dealer in wooden chairs of Western manufacture. There are about fifty employees.

New England Rattan Company.—Mr. A. H. Ordway was chiefly instrumental in securing the location here of Mr. H. A. Marston's business, and Mr. Marston in turn, aided by other citizens, induced the New England Rattan Company to move their business from Wakefield to this place, and the latter company was not slow to see the superior opportunities for transacting business here. So it followed that in March, 1889, a fine four-story factory with high basement, was finished for their occupancy, just opposite those of Messrs. Ordway and Marston. The company manufactures an elegant line of rattan and reed chairs of many patterns and styles of finish, besides tables, easels and other parlor furniture in bamboo work. The officers of the company are: President, W. E. Ryan; Secretary and Treasurer, Mathias Hollander; Directors, H. Ryan, L. S. Mansfield, R. M. French, H. Leuchtman, Richard Cuff. About forty-five hands are employed.

The Union Publishing Company was formed and began business here in April, 1884. From fifteen to twenty hands are employed. Rooms were first taken in Union Block and successively enlarged until March of 1886, when the third floor of Liberty Block was taken. These quarters having become too small, the company has now moved into the new Tribune Building on Irving Street. The company does a general job printing and newspaper publishing business, the papers published being the *Framingham Tribune*, *Ashland Tribune*, *Sherborn Tribune*, *Southboro' Tribune*, *Sudbury Tribune*. C. J. McPherson is president and manager, and A. P. McPherson, treasurer.

The Lakeview Printing Company was organized early in 1889 to succeed the J. C. Clark Printing Company, which was established here in 1872, occupying quarters ever since in Union Block. The company employs from fifteen to twenty hands, and does a general job printing and newspaper publishing business, besides being agent for certain specialties.

The papers published are *The Framingham Gazette*, *Ashland Advertiser*, *Holliston Transcript*. C. F. Cutler is president, and W. F. Blake, treasurer and manager.

The Last-Factory of E. D. Stone was established about ten years ago, Mr. Stone coming from Auburn, Me. A superior grade of shoe-lasts is made, its principal customers being the Pará Rubber-Shoe Company, near whose works it is located, and the shoe-factories in this and vicinity towns. It is well equipped with steam machinery and employs about ten hands.

A. Fales & Sons have a well-equipped steam-power plant, on the line of the Old Colony Railroad, for the manufacture of builders' finish and materials. They are large builders themselves, erecting many railroad stations and other large buildings. They employ, on an average, from forty to fifty men, although sometimes having many more.

Leather Goods.—In 1886 William D. Higgins started in the village the manufacture of leather music-rolls, collar and cuff-boxes, toilet-cases and similar work, keeping a small force of men at work. Recently he has sold out to H. F. Twombly & Co., who now conduct the business. George H. Eames started in the same business last year, and has made it so successful that he has recently built and moved into a new factory off Union Avenue.

T. L. Sturtevant, who is an inventor of some note is now building steam-yachts here on the shores of Waushakum Pond. His latest invention is a steam-boiler with a wonderful capacity to generate steam. Its fuel is gas or petroleum, and its great generating power allows of its being of very small size. Thus a thirty horse-power engine is put into a thirty-foot boat, and the result is a remarkable speed. Among Mr. Sturtevant's other inventions are the Sturtevant Stone-Crusher and Pulverizer, a rifle and cartridge. Mr. Sturtevant has also been a large owner in the Bowker Fertilizer business, starting it with Mr. Bowker about twenty years ago.

The Ice Business.—The local trade has been well supplied from the ice-houses of C. C. Stevens, C. L. Foster and John Willis, but in the summer of 1889 immense ice-houses, with all the attendant machinery, stables, dwelling-house, etc., etc., were built near the shore of Waushakum Pond by the Drivers' Union Ice Company of Boston. This plant, which is situated on the Milford Branch Railroad, cost about \$50,000, and in it can be stored 50,000 tons of ice, which is gathered here of purest quality.

The Framingham Gas Fuel and Power Company, which holds a franchise from the town, was organized in 1888, under Massachusetts law, with \$75,000 capital. It proposes to furnish gas for all domestic and manufacturing purposes, such as for illuminating, heating, cooking, for gas-engines, making steam, forging, etc. Land has been bought on Irving Street, and at this writing the construction of the system is

nearly completed. C. J. McPherson is president of the company and H. S. Jackson treasurer.

Grain Elevator.—Sprague & Williams, who, in addition to their grocery business, have done a large grain business, erected in the spring of 1890 a grain-mill and elevator, on Hollis Court, adjacent to Milford Division of the Boston & Albany Railroad track. It is supplied with every requisite labor-saving convenience.

The Beef Refrigerator of Geo. E. Fitch & Co. was established in the village in 1884, being connected with Armour & Co.'s great Chicago establishment. The next year a convenient new building was built with a large ice capacity and overhead railroads for handling the more than \$100,000 worth of annually dressed meat which comes to it in refrigerator cars and is disbursed. John J. Anderson manages the business, another branch of which is cared for at Westboro' by Mr. Fitch.

H. L. Sawyer, in addition to his large tin, piping, stove, hardware and plumbing business, has for several years manufactured japanned powder-flasks and fish-bait boxes at his Howard Street factory.

Thomas Wise & Co., machinists, manufacture the Wise steam motor, which has been used somewhat in the United States Navy. Mr. Wise is also the maker of a storage system of incandescent electric lights.

E. E. Crandall & Co. manufacture and deal in all varieties of carriages, besides conducting a general repair-shop for all branches of the business.

F. F. Avery manufactures an extensive line of mattresses for shipment to other cities as well as neighborhood trade.

N. B. Johnson makes a superior grade of harness dressing under the name of the Perfection Harness Dressing. He employs a number of selling agents.

A. H. H. Warren & Co. conduct the book-bindery which was moved here from Cambridgeport in the summer of 1889. Excellent work is turned out, customers coming from other towns and cities.

Express Business.—With the business growth of the place, the express companies have kept pace. Of these there are now seven, all well equipped for business. These are the Adams, American, New York and Boston Despatch, Boston & Worcester, Farrar's, Davis, Dart & Co's.

Among the industries conducted here the past few years may be mentioned the Sterling Rubber Works, manufacturers of gossamer rubber clothing, which were removed to Readville about four years ago; the Framingham Wheel Works, Charles E. Bradley's carriage-works, the J. M. Anthony machine-shop, the three latter concerns going out of business.

Cutler & Company's grain mills did a good business until about 1879, when they were destroyed by fire, and the business removed to their mills at North Wilbraham, although the business office is still retained at South Framingham. A spring-bed business, conducted by a Mr. Frail, of Hopkinton, employed about

fifteen men. The factory was located off South Street, but was burned about ten years ago, and the business was discontinued.

PROFESSIONAL MEN.—In addition to the clergy-men, mentioned among the churches, there are—

Physicians: J. J. and J. S. Boynton, L. M. Palmer, J. J. McCann, E. A. Hobbs, O. W. Collins, F. W. Patch, Anna Wilkin.

Dentists: C. F. Beard, George F. Beard, W. I. Brigham, W. C. Chamberlain, J. A. Hayes.

Lawyers: W. A. Kingsbury, Sidney A. Phillips, Walter Adams, L. H. Wakefield, George C. Travis, C. C. Estey, Ira B. Forbes, F. M. Esty, John W. Allard, Charles S. Forbes, J. L. O'Neil, John M. Merriman, T. W. Barrele.

Civil Engineer: J. J. Van Valkenburg.

Architects: J. W. Patston, George L. Nichols.

EMPLOYING MECHANICS.—The following individuals and concerns are all in business in the place, and some of them employ quite a number of hands:

Builders: A. Fales & Sons, Wells & Tuttle, James Daisley, Avery Daisley, John P. Kyte, J. R. & R. P. Clark, James H. Combs, James McMahan, N. T. Abbott, John Butland, Edward Damon, W. E. Fay, Rice Brothers, C. R. Harding, Edward P. Simpson, all carpenters; and A. D. Swan, C. P. Haskell, masons.

Plumbers, Gas and Steam Pipes: H. L. Sawyer and James Sheldon; Thomas Wise, piper.

Wheelwrights, Blacksmiths, Carriage-builders and Horse-shoers: Thomson Brothers, W. J. Arbuckle, E. E. Crandall & Co.; M. McNamara, shoer.

Painters: Gilman Fuller, H. R. Mockler, J. E. Vollmer, Joseph Hamil, J. F. Roach, E. E. Crandall & Co., W. T. Wright, Robt. McCann, J. H. Randall.

Roofers and Concrete-pavers: French Brothers, M. E. Balcome & Co., Drury & Co.

Stone-masons: John Gallagher, D. McLaughlin, Peter Teabeau, Jesse Bryant, William Green.

Lather: Edwin Hamblin.

Shoe-makers: Thomas Rimmer, John Slater, John J. Slattery.

Harness-makers: D. C. York, Joshua Smith.

Hair-cutters: John A. Morse, Alonzo Sackett, Geo. Gaudig, Henry Taylor, Frank Farnsworth.

Marble and Granite-worker: J. B. Whalen.

Granite-worker: James O'Connor.

TRADESMEN.—*Dry Goods:* Clifford Folger & Co., A. M. Lang, A. J. Wood & Co.

Clothiers: E. B. McIntyre & Co., F. C. Hastings, C. H. Whitcomb & Co., The Wardrobe.

Boots and Shoes: Geo. E. Fowler, Geo. A. Carr & Co., J. F. McGlennan, A. J. Hemenway, Clifford Folger & Co.

Gentlemen's Furnishing Goods, other than those named: O. S. Buttolph.

Furniture: A. R. Newton & Son, J. J. McCloskey.

Grocers: Sprague & Williams, Stearns Brothers, Adams & Morse, Slattery & Flynn, C. S. Oaks, M. E. Hamilton, Whitmore & Daboll, Robt. McGlory.

Marketmen: E. H. Kittredge & Co., L. F. Eames, F. H. Hunt, Coburn & Hooker, W. H. Greeley, W. F. Ward, Hawkes & Hemenway.

Fish-Markets: Fitts Brothers, Bennett & Gerrish.

Butter, Eggs and Cheese: Wellington H. Pratt, Geo. M. Amsden.

Junk-dealer: Samuel Falkner.

Bakers: Wm. Stratton, T. H. Abbott, J. G. Klier.

Coal and Wood: Willis M. Ranney, H. C. Kingman, Otis Cutting.

Lumber and Building Material: W. M. Ranney, Fales & Sons.

Lime, Sand, Cement, Hay, Etc.: H. C. Kingman.

Grain and Flour: Cutler & Co., Sprague & Williams, Eastman Brothers.

Milliners: Mrs. E. E. Teague, Miss A. J. Wood, Miss Grace Lee, Miss E. B. Fuller.

Dressmakers: Mrs. Withington, Mrs. A. Page, Miss Hill.

Jewelers and Watch-makers: Cyrus N. Gibbs, W. W. Haynes, J. M. Bacon, A. W. Edmonds.

Druggists: Charles L. Curtis, G. W. Cutler, Geo. Rice, I. A. Lombard.

Confectionery: F. M. Wilbur, Geo. J. Masterson, besides grocers and druggists.

Hardware and Paints: W. E. Harding & Co., H. L. Sawyer.

Toys, Pictures, etc.: Geo. E. Watkins & Co.

Newsdealers: Allen Robie, G. W. Cutler, G. J. Masterson, Armstrong's Restaurant.

Restaurants: H. C. Bowers, G. W. Armstrong, S. S. Given.

Florists: W. S. Phelps & Sons, C. J. Power.

Real Estate Agents: B. Judd, W. F. Richardson, A. H. Tucker.

Local Teamsters and Expressmen: Geo. H. Davis, A. J. Sullivan, Edwin Stone, E. E. Ramsdell, Ira L. Dunaver, D. McLaughlin, John Horr, A. Saucier.

Livery Stable Men and Hackmen: Joshua Smith, D. J. Cooney, A. W. Fay, C. J. Fillmore, Lawrence Flynn, Jr., W. A. Flynn, F. E. Brooks.

Tailors: M. Cotter, K. Ryan, C. D. Bates, J. M. Morrissey.

Carriage Dealers: E. E. Crandall & Co., Thomson Bros., Rock & Young.

Fruit Dealers: S. & G. Garbarrino, E. T. Yon.

Undertakers: W. T. Gove, P. N. Everett, M. Underwood.

Laundries: L. E. Russell, Sun Kee & Co., The Charlie Company.

Photographers: J. L. Sweet, F. J. Williams.

Billiard Parlor: F. E. Deming.

Insurance Agents: W. E. Clark & Son, J. S. Adams, Burtis Judd, F. M. Esty, A. H. Tucker, S. G. Davenport.

Auctioneers: H. W. Cotton, J. H. Eames, Edgar Potter, W. F. Richardson.

Milkmen: A. P. Houghton, L. Gould.

Dog Kennels and Breeders: J. R. Teague, J. A. Morse.

Bill Poster: Manager of Elmwood Opera House.

M. H. Simpson.

BIOGRAPHICAL.

MICHAEL H. SIMPSON.

Michael H. Simpson was emphatically an Essex County man, although much of his long and active business life was spent in Suffolk and Middlesex Counties, where he brought into a high state of development the well-known industries connected with the "Roxbury Carpet Company" and "Saxonville Mills." He was the son of Paul Simpson, Esq., a wealthy ship-owner of Newburyport, during the days when a phenomenal success sometimes attended the sending of cargoes of merchandise to foreign ports. Deciding early upon a business career, young Simpson entered into it with that energy and keen insight which distinguished him in after-life. Before they were of age, he, with Charles H. Coffin, of Newburyport, and George Otis, son of Harrison Gray Otis, of Boston (afterwards partners), made a highly successful venture by sending a ship and cargo to Calcutta, they being sole owners. This may, perhaps, be considered the basis of the fortune which Mr. Simpson afterwards acquired. His business career soon showed that to a fine physical constitution he united a keen sagacity in adapting means to ends, unusual executive ability, and an indomitable will. By the connection of his firm with the wool trade of South America his attention was drawn to the necessity of freeing Buenos Ayres wool from burrs to enhance its value. His inventive brain soon grasped the situation, and he produced a machine for this purpose which proved of great value, the modern burring-machine, now in general use, being the outgrowth of this invention. In the various industries with which his name was connected, for him to discover a need or necessity for improvement was to give himself no rest until he had devised a way for the accomplishment of the desired end. His extensive career as a manufacturer and employer of labor also gave scope for the development of those finer qualities of mind and heart which characterized the man. It was his delight to lay out parks and drives, in connection with his estates, which he always opened to the public. In order to give employment, he would purchase tracts of waste land and convert them into richly productive fields. As a friend and companion he was genial and charming. He possessed a mind well stored with the resources of history and philosophy.

He ever recognized a beneficent, over-ruling Providence in all the ways of life, and sought by precept and example to inculcate the principles of a high morality in all those with whom he was brought in contact. His love for his native town manifested itself in his generous benefactions to the Public Library, towards town improvements, a fund for keeping the streets watered and in various other ways. Mr. Simpson was twice married. His first wife was

Elizabeth Rilham, of Boston, by whom he had several children. His second marriage was to Evangeline E. Thurston Marrs, of Framingham, who survives him. His death occurred at his residence in Boston, December 22, 1884.

HON. PETER PARKER.

Peter Parker, one of the most honored and most successful of the early missionaries who went to China from the United States, was the third son of Nathan and Catherine (Murdock) Parker, and was born June 18, 1804, in Framingham, Massachusetts. When he was four years of age his father had a severe attack of illness, from the effects of which he never fully recovered; and, as his two older brothers had died in infancy, Peter was very early obliged to assist in the support of his parents and of his three sisters. At the age of fifteen he taught the common school in the adjoining town of Holliston, and for some years was employed as a teacher in the different school districts of the neighborhood. In a short memoir of himself, which he wrote, he says that while thus employed he never failed to put into the hands of his father all the money that he received, "not reserving a single dollar" for his own use. Before leaving home to teach in Holliston, he had made a public profession of his determination to lead a religious life, and it was not long before he informed his friends that he wished to prepare himself to enter the Christian ministry. But the ill health of his father, and the dependence of the family on his labors, interposed difficulties, which for some years prevented his beginning the necessary studies. At last, when he had attained the age of twenty-one, his father was able to make arrangements by which he could be assured of a support for himself and family for the rest of his life, and friends having offered to provide Peter with the pecuniary assistance he might need while obtaining a liberal education, after he had exhausted the few hundred dollars that he had of his own, he entered Day's Academy, in Wrentham, and began in March, 1826, in his twenty-second year, to fit for college. In September, 1827, he entered Amherst College, as freshman. There he remained three years, till he gained the consent of his friends to go to Yale College, in New Haven, where he received the degree of Bachelor of Arts, graduating with the class of 1831, in which were a large number of men who afterwards became distinguished in the different walks of life. After graduation he began the study of theology in the Yale Divinity School.

About this time the officers of the American Board of Commissioners for Foreign Missions were considering the possibility of doing something for the evangelization of the great Empire of China. The difficulties in the way seemed insuperable. The restrictive policy which characterized the government of that country made anything like full and intimate intercourse with the people well-nigh impossible.

But it had been found that the Chinese were very ready to avail themselves of the services of the physicians of the East India Company, and that these benevolent men had been very successful in obtaining the confidence of those whose maladies they had healed. It therefore occurred to the friends of missions in the United States, that a missionary who should also have had a thorough medical education might be able to use his ability as a physician to gain access to the people, and thus introduce Christianity among them. With this object in view, it was proposed to Mr. Parker, who was known to be ready to devote his life to missionary work among the heathen, to fit himself to go to China as a medical missionary. Accordingly, while pursuing his theological studies in the Yale Divinity School, he at the same time studied medicine in the Yale Medical School, and in March, 1834, received the degree of Doctor of Medicine. Having also completed his theological studies, he was ordained as a Christian minister in Philadelphia, the following 16th of May, and sailed from New York for Canton, June 4th, which city he reached October 26th, in the same year.

After spending some time in the acquisition of the language of the people, Dr. Parker opened in Canton, November 4, 1835, a free hospital for persons affected with diseases of the eye, of the treatment of which the native practitioners were particularly ignorant. The success which he at once attained surpassed all that the most sanguine hopes of the friends of missions had anticipated. The first day, though previous notice had been given, no patient ventured to come. The second day, a solitary female, afflicted with glaucoma, presented herself. The third day half a dozen persons appeared; and after this those who were suffering began to come in constantly increasing numbers. At the end of a year the aggregate of patients who had been relieved amounted to 2152; and, according to the Report which was published at the time, "had the object been to swell this catalogue, and were the strength of one individual sufficient for the task, the number might have been increased by thousands." The success which had at once attended the labors of Dr. Parker made it evident that he had proved himself admirably fitted for the work which had been entrusted to him. Perhaps, much of this success was due to the rare qualities of the man. Possessed of an imposing physique, with a manner which was naturally dignified and composed, there was, in addition, something so benevolent, so kindly, and so truthful in the expression of his face, and the tones of his voice that he irresistibly inspired every one with whom he came in contact with confidence in the honesty of his purpose and his readiness to extend sympathy and assistance. While working for the relief of the sufferings of those who came to the hospital, it should also be stated that he sought in every way in his power to commend to all the value of the Christian religion.

The doors of the hospital continued to be open to all comers till June, 1840, when, in consequence of the disgraceful and persistent efforts of the British Government to force the Emperor of China to alter the laws of the country, so that Englishmen could sell opium without let or hindrance to the Chinese people, ensued war. The port of Canton was threatened with blockade by the English fleet, and it became necessary to close the institution. From the time that it had been opened, in 1835, during a period of a little over four years, upwards of nine thousand persons had received treatment and relief. Dr. Parker said: "Patients from all parts of the Empire had availed themselves of the benefits of the hospital. The applicants during the first years of its establishment had been confined to the lower and middle classes; now persons of all ranks—military, naval and civil—were among the number; the Nanhoe hien, or district magistrate, the custom-house officer, salt inspectors, provincial judges, provincial treasurer, a Tartar general, Governors of Provinces, Commissioner Linn himself, and a number of the imperial family, had sought relief of the foreign physician." The account of what Dr. Parker had done, and his successful and repeated performance of many very difficult surgical operations, had attracted the attention and admiration of medical men in the United States and Great Britain, and a high place had been accorded to him in the profession.

It certainly was a great misfortune that at this time he was obliged to withdraw from Canton. What he had already done was felt by all persons who were interested in the cause of missions in China to have been of inestimable value, by disarming the prejudices of a great multitude of influential people against the foreigners, whom they had been taught to think of as "outside barbarians."

During the years of his first residence in China, in addition to his work in the hospital, Dr. Parker on several occasions rendered valuable assistance in the general work of missions. The most important, perhaps, of his services of this kind was in connection with the expedition, undertaken in 1837, by several of the missionaries in China, which had for its object the establishment of a mission in Japan. That expedition proved to be a failure as far as the immediate object in view was concerned; but, on his return to Canton, Dr. Parker published an account of the voyage, and of a visit which was made to the Loo Choo Islands.

The closing of the hospital in 1840 gave Dr. Parker an opportunity of returning to the United States for a visit. Having started from China in July, he reached New York in the following December, and spent the next eighteen months in unwearied efforts to diffuse information through the country respecting China, and to interest Christian people everywhere in the cause of missions among the Chinese. In addition, he had interviews with Presidents Van

John (Jr.)

J. Harrison

Buren, Harrison, and Tyler, and with the Secretary of State, Mr. Daniel Webster, before whom he urged the importance of sending a United States minister to China, as soon as the war then waging should come to an end, for the purpose of arranging a commercial treaty with that government, and of giving protection to American citizens resident in the country. It was owing to the representations which he made, that the Hon. Caleb Cushing was sent to China in the following year as American Minister. Dr. Parker also made a hurried visit to England, for the purpose of calling the attention of English Christians to the advantages which might be obtained by sending out medical missionaries to China. He was successful in bringing the subject to the attention of the Archbishop of Canterbury, the Duke of Wellington, the Marquis of Lansdown, the Bishops of London and of Durham, and a large number of other distinguished men. He made the acquaintance of Sir Benjamin Brodie, Dr. Holland, Sir Henry Hallford, and other prominent English physicians and surgeons. He was presented in Paris to Louis Philippe, the King of the French, and had the opportunity of a long conversation with him on the condition of affairs in China.

Having returned from England to the United States in June, 1842, he sailed a few months later from Boston for Canton, having previously been married in Washington, March 29, 1841, to Miss Harriet C. Webster, daughter of Mr. John O. Webster, of Augusta, Maine. Mrs. Webster accompanied him, and was the first foreign lady to reside in China.

On reaching Canton he re-opened the hospital, and was even more successful than before. But it was not long before Hon. Caleb Cushing arrived, in February, 1844, as Envoy Extraordinary and Minister Plenipotentiary of the United States to China, who at once requested Dr. Parker to become Chinese Secretary and Interpreter of the Legation. After careful consideration, and with the hope that he might have wider opportunities of usefulness, he accepted Mr. Cushing's offer. He gave up his connection with the American Board, but with the help of native assistants, whom he had trained, he was able to continue his oversight of the hospital till in 1855, finding his health impaired, he resigned his secretaryship, and returned to America. During these years he repeatedly acted as *Chargé d'affaires ad interim*.

A few months after reaching home, at the special request of the government, he returned to China as United States Commissioner and Minister plenipotentiary, for the purpose of revising the treaty of 1844. On his way to China, passing through London, he had a consultation with the Earl of Clarendon, in order that the policy of the two governments they represented might be concurrent. In Paris, also, he had an interview for the same purpose, with Count Walewsky, the French Minister for Foreign

Affairs. His duties as Commissioner occupied Dr. Parker for two years, when he felt obliged to resign and to return to America, his health having been somewhat enfeebled owing to the effects of a sunstroke. He fixed his residence in Washington, with his paternal homestead in Framingham as a summer resort. His later years were spent in retirement, the only public office which he held being that of Regent of the Smithsonian Institution, to which he was elected in 1868. After several years of infirm health he died in Washington, January 10, 1888, in his eighty-fourth year.

ADOLPHUS MERRIAM.

Adolphus Merriam was descended from a pioneer family of the town of Concord, Mass. His ancestor, Joseph Meriam, came from the county of Kent, England, in 1638 and settled in Concord. From that early date until the death of Joseph Merriam, the father of Adolphus, in 1856, through five generations, the family name was prominent in the history of that town. The Meriam settlement became known as "Meriam's Corner." It was at this spot that the first vigorous attack was made on the retreating British as they left Concord on the memorable 19th of April, 1775. Josiah Meriam, the grandfather of Adolphus, was one of the men at the North Bridge, and used an old flint-lock which his ancestor had brought with him from England. It was his house that the British entered on the retreat, and in it exercised freely their spirit of mischief and plunder. This house, by the way, is not the Meriam house which is now standing, but was an older one, all trace of which is gone, that stood nearer the corner of the Bedford and Lexington roads.

Joseph Merriam, the father of Adolphus, when a young man moved from Meriam's Corner to a farm on the Virginia road, near the Lincoln line. Here Adolphus was born August 23, 1820. He was the youngest of ten children. His early life was that of a farmer's boy, with its usual amount of hard work and limited advantages. In addition to the few years of study in the district school he enjoyed a term in the Framingham Academy.

When he was seventeen years old he went to Southbridge, Massachusetts, and entered the office of the Hamilton Woolen Company, in which his brother, Charles, was interested. For several years he served what may be called a term of apprenticeship in the business of woolen and cotton manufacture. His master and model was Samuel L. Fiske, whom he faithfully served and ardently admired, and whose influence had a marked effect in strengthening his own natural habits of thrift, of promptness in discharging obligations and of honesty and honor in business affairs.

In 1846 he married Caroline McKinstry, daughter of John McKinstry, of Southbridge. Mr. Merriam remained in Southbridge twelve years. During this

time he was steadily promoted until he was entrusted with the superintendency of large interests connected with the Hamilton Woolen Company. In 1850 he purchased a small mill in Springfield, Vermont, which he operated successfully for four years. He then returned to Southbridge and entered into a partnership with Joshua and Gayton Ballard in the manufacture of woolen goods.

Mr. Merriam was very active in all public matters in Southbridge. He was one of the leaders of the Lyceum. When a young man he identified himself with the temperance movement, to the principles of which he strictly adhered during his life. He corresponded with Rev. Adin Ballou and George Draper, with reference to the social community which they founded at Hopedale, and seriously contemplated joining it. He served the town as assessor and selectman, was connected with the National and Savings Banks of the town, and during the war was active as selectman in filling the town quota and in advocating the Federal cause.

In 1864 he moved to South Framingham, where he lived until his death. He became interested in the manufacture of woolen goods in Millbury, where he was associated with Peter Simpson; and in Cordaville, in company with Hubbard Willson. He was also a director of the Hamilton Woolen Company, and clerk of the corporation, and a director of the Aetna Mills at Watertown. In addition to these interests he was for many years a director and president of the American Powder Company, and president of the Gunpowder Trade Association of the United States.

When the Framingham Savings Bank became embarrassed, it was the demand of the community that Mr. Merriam accept the presidency of the reorganized board of trustees. He was at the time the president of the National Bank, and was very reluctant to add to the business cares which already demanded close attention. The duties involved in the reorganization, and in the restoration of the credit of the Savings Bank, were very exacting and subjected the president to much annoyance and anxiety. He endeavored to perform them with the same care that he expended in his own affairs. He often expressed his confidence in the final restoration of credit and resumption of business by the bank, and his calm confidence and patient work did much to assure depositors, and to bring about the successful termination of the bank's misfortune.

In addition to discharging this public trust, Mr. Merriam, in the course of his life, cared for many private trusts, all of which were scrupulously managed and settled.

Mr. Merriam avoided prominence in public affairs in Framingham. His influence, however, was exerted quietly toward the promotion of many worthy political, social and moral causes. He was the first president of the South Framingham Literary Society, and

was one of its most constant workers during the ten years of its life. For a short time in his school-days in Concord, Theodore Parker had been his teacher. In later life he was an earnest student of Parker's sermons and writings, which he felt were in accord with his own religious convictions. When the movement to establish a society of liberal Christians in South Framingham was initiated he gave it his hearty support. Later he was made the moderator of the First Universalist Society, and worshiped with that society constantly until his death.

Mr. Merriam died November 27, 1888, after an illness which had incapacitated him for active work for several months. The summary of his character which appeared in the *Framingham Tribune*, at the time of his death, is so just that it may well conclude this sketch: "The death of Adolphus Merriam brings a loss to Framingham that will be keenly felt. In all matters where his interest was enlisted his course was marked by keen insight and sound judgment. Perhaps his distinguishing trait was his plain and simple manner, wholly devoid of the ostentation affected by some men when they achieve a small part of the success that was his. Always genial and approachable, it was his lot and pleasure often to advise other men, and his advice was always worth seeking. His presence will be sadly missed, but his influence will be felt for a long time to come."

JOHN BALL KITTREDGE, M.D.¹

Doctor Kittredge was a descendant of John Kittredge, who settled in Billerica as early as 1660, where he died October 18, 1676. He was a considerable land-owner in Billerica, and received a grant of sixty-four acres in the limits of what became Tewksbury, on which some of the later generations of the family have resided.

The eldest son of John, Sr., was named for his father, settled in Billerica, studied medicine, and was the first of a long line of noted physicians. Dr. John (3d), the eldest son of Doctor John (2d), called his eldest son John (4th), whose eldest son was John (5th). The brothers of John (5th) were Simeon and Benjamin. Benjamin was born March 7, 1741. He was a well-known physician of Tewksbury and Andover, and was the father of eight sons, all physicians, viz: Benjamin, of Exeter; Henry, of Tewksbury; John Ball, of Framingham; Jacob, of Billerica and Ohio; Rufus, of Portsmouth; George, of Epping, N. H.; Theodore, of Kittery; Charles, of Watertown.

John B., the subject of this sketch, was born October 8, 1771; studied with his father, as was the custom of the time, came to Framingham in his twenty-first year, and probably entered the office of Dr. Daniel Perkins, and took his practice when he moved West the next year.

Hollis Hastings

Framingham was then in a kind of transition state. The Revolutionary War had changed the social order and business conditions, as well as the inhabitants. The older men were striving to repair the wastes of war; the younger men were planning new enterprises and taking the lead in municipal affairs. The population of the town was much scattered, and the centres of trade and enterprise were at several points near the outskirts. Aside from the meeting-house, there had been little to attract people to the territorial centre. The minister, Rev. David Kellogg, was, however, strong in the regards of the people, and, by his talents and high ministerial character, was a power for good in all social and religious and business affairs. And the signs all pointed to the site of the present village as the coming centre of town activity and influence.

The young physician wisely located at this point, and allied himself with the new movement and with the pastor of the church.

He was a man of fine presence, and affable, though dignified manners, and every way calculated to make a favorable impression.

The inception of the plan for the establishment of a grammar-school of high order at the Centre—which soon was transformed into the Framingham Academy—gave Dr. Kittredge the opportunity of ingratiating himself with the leading families, by furthering in every wise way the new educational institution and drawing in pupils. He gave a hearty support to the movement; and his interest in the Academy and the public schools continued through his active life.

Undoubtedly the reputation of the family as physicians predisposed the public in his favor; but he was a born doctor, and started with the determination of achieving success. He gave his time and his best work and leading interest to his profession, and made everything else subsidiary. And he had broad sympathies, which prevented favoritism. A family in humble circumstances was sure of receiving his kind attention and the most considerate treatment.

Technically, as judged by present standards, his medical education was defective. But practically, he was well equipped—by natural taste, by quick perceptive powers, by the habit of close observation, by the logical faculty of tracing cause and effect, as well as careful reading of the works then extant.

Perhaps his *forte* lay in his accurate diagnosis of disease. It may have been partly intuition; but his careful analysis of symptoms, and study of temperaments and habits of living, and family predispositions, aided the natural perception.

And his cheery and hopeful demeanor in the sick-room was a powerful adjunct to the medicine he prescribed. "We'll have you out again in a few days!" was the inspiring assurance with which he was wont to bid good-bye to his patient.

His large practice brought fame and wealth. And

after his means became ample, he was greatly helpful to young men of good character and habits—particularly mechanics just starting in business on their own account—by loaning them money on their individual note. It was done not grudgingly, but willingly. The debtor felt that the lender took an interest in him and his success, and had confidence in his honesty and ability; and thus the loan was a powerful motive to diligence and economy, as well as a working capital.

Dr. Kittredge died February 29, 1848. He married Mary Kellogg, daughter of Rev. David Kellogg, pastor of the church in Framingham. Their children were: 1. *Ellen*, who married Dexter Stone, a merchant of Philadelphia, and had two daughters, Mary, and Ellen K.; 2. *John T.*, who graduated at Amherst College 1823, studied medicine with his father, began practice in his native town, and died at the early age of twenty-six.

HOLLIS HASTINGS.

The subject of this sketch is descended from Thomas Hastings, who, at the age of twenty-nine, with his wife, Susanna, came to New England in the summer of 1634 and settled in Watertown. He embarked at Ipswich, England, April 10th of that year, in the "Elizabeth," William Andrews master, and probably arrived in May. He was admitted a freeman May 6, 1635, and was a selectman of Watertown from 1638 to 1643, and again from 1650 to 1671. He was town clerk in 1671-77 and '80, and Representative in 1673. His wife died February 2, 1650, and in April, 1651, he married Margaret, daughter of William and Martha Cheney, of Roxbury. His children—all by the second wife—were Thomas, born July 1, 1652; John, March 4, 1654; William, August 8, 1655; Joseph, September 11, 1657; Benjamin, August 9, 1659; Nathaniel, September 25, 1661; Hepzibah, January 1, 1663, and Samuel, March 12, 1665. He died in 1685, at the age of eighty.

Of the children of Thomas, John, born as above, in Watertown, married, June 18, 1679, Abigail, daughter of John and Abigail Hammond, of Watertown, and died March 28, 1718, only a few days before his wife, who died on the 7th of April following. He left eight children: Abigail, born December 8, 1680; John, baptized December 4, 1687; Elizabeth, baptized December 4, 1687; Hepzibah, baptized at same date; William, baptized July 13, 1690; Samuel, born 1695, and Thomas and Joseph, baptized July 10, 1698.

Of these children, Joseph married, October 2, 1716, Lydia, daughter of Abraham and Mary (Hyde) Brown, of Watertown, and had fourteen children: Elizabeth, born March 4, 1717; Lydia, November 26, 1718; Grace, April 2, 1720; Joseph, June 1, 1722; an infant unnamed, 1724; Lucy, April 9, 1726; Josiah, February 28, 1728; Jonas, September 15, 1729; Susanna, May 26, 1731; Eliphalet, October 10, 1734; Thank-

ful, October 12, 1736; Sarah, November, 1737; an infant, 1739, and Lois, May 4, 1742.

Of these, Eliphalet, born in Waltham, as above, married, August 20, 1761, Susan, daughter of Samuel and Anna (Bemis) Fiske, of Waltham. He was in the French and Indian War, and present at the capture of Quebec, in 1759. He was also a soldier in the Revolution and died in Framingham in 1824. His children were Lucy, born September 30, 1761; Elias, February 13, 1763; Susanna, baptized in February, 1765; Louisa Ann, born April 19, 1767; William, September 12, 1769; Anna; Eliphalet, November 22, 1774; Charles, September 22, 1776; Thomas, June 19, 1780; Samuel, November 14, 1782, and Susan, October 18, 1786.

Of these children, Thomas was born in Waltham, and married, April 3, 1803, Nabby, daughter of Samuel and Martha (Jennings) Abbot, of Framingham. He died August 22, 1864. His children were Samuel Abbot, born October 3, 1803, William, June 15, 1805; Hollis, May 8, 1807; Thomas, April 18, 1809; Eliphalet, July 31, 1811; Josiah, July 25, 1813; John Kittredge, March 17, 1816; Otis Fisk, November 18, 1818, Dexter, August 4, 1822.

Hollis Hastings, one of these children, is the subject of this sketch. He was born in Framingham, and received his education in the public schools of that town and of Weston. He learned the trade of harness and carriage-making, with Marshal Jones, of Weston, and during thirty-five years carried on that business in his native town. With sufficient means, the fruit of his industry and skill, he retired from active business, and has since occupied his time in the care of his property, and in satisfying his desires to see the world and learn something of his brother men in their varying conditions of climate, of government and social life. To this end he has visited every State in the Union, including those recently admitted when they were Territories, and has twice visited the Old World. The information acquired in his travels has expanded and strengthened a naturally active and receptive mind, and enables him to discuss with unusual intelligence the questions which on both sides of the ocean agitate the public mind. His independence of thought enables him to freely think out the problems of the day, and reach conclusions untrammelled by the shackles which too often keep men in old ruts after the purpose for which they were made has disappeared. In politics originally a Webster Whig, more recently an independent voter, he weighs questions as they rise, and votes with this or that party which the most readily meets in his opinion the demand of the hour. He believes that parties should be organized solely to subserve the interests of the country, and not to perpetuate themselves, and that when a party begins to act solely for itself it is time for it to die. Brought up in the orthodox Congregational Church, he has continued a member of that faith. While in Europe

his letters, written for the *Waltham Sentinel*, of which his brother was the editor, were full of interesting matter, and marked by intelligence and thought in the discussion of foreign affairs. His interviews with Lord John Russell and others, in which he forcibly presented what are called the Alabama Claims, were especially interesting.

Mr. Hastings has never been a seeker for office, and, with the exception of a term on the School Board of Framingham, his life has been spent outside of the active political field. He married, May 2, 1832, Abigail White, daughter of Dr. Norton, of Framingham, who died March 8, 1880. His children have been, George, born January 31, 1833; Horatio Carter, March 11, 1834; Dexter, November 24, 1835; Emily Carter, December 31, 1836; Nancy Dean, August 10, 1839; Samuel Dean, March 15, 1841; Josiah, July 2, 1844; Richard Briggs, January 12, 1846, and Jane Elizabeth, January 29, 1848.

Mr. Hastings is still living at the age of eighty-three, with mind and body unimpaired, and in the management of his affairs exhibits no abatement of the shrewdness and skill which have characterized him through life.

REV. JOHN S. CULLEN.

Rev. John S. Cullen was born in the town of Oldcastle, County of Meath, Ireland, on Christmas Day, December 25, 1848. He came to this country with his parents in the early part of 1852, settling at Blackstone, Mass., where he attended the public schools until about eleven years old, when he was sent to St. Joseph's College, in Susquehanna County, Pa. There he stayed from the fall of 1860 to 1863, when he entered Holy Cross College, Worcester. He remained there three years. From there he went, in 1866, to Nicolet College, near Three Rivers, P. Q., staying there one year and graduating. In 1867 he went to Grand Seminary, Montreal, to study theology, remaining there until December 31, 1871, and being ordained there as a priest. On Jan. 15, 1872, he came to Hopkinton, Mass., as assistant pastor, and remained in that position six years, when he was appointed to take charge of the missions at South Framingham and Ashland. He lived in the latter town about eight months, removing to South Framingham in May, 1879. About this time St. Bridget's Mission was established at Framingham Centre, and added to his care. During his ministrations the uncompleted church at Ashland was finished, and in January of 1885 that town was made an independent parish and given to Rev. M. F. Delaney. The work grew so at South Framingham that an assistant was soon necessary, for in addition to the growing St. Stephen's Parish there, the mission at St. Bridget's was maintaining in addition to the regular Sunday services at the Woman's Reformatory at Sherborn. The cornerstone of the new St. Stephen's Church edifice was laid in December, 1883, and the structure was occupied on

John A. Allen

James R. Lintworth

A Clark

Christmas of 1884. The parish now numbers about 3000 souls and Father Cullen is sincerely beloved by all. During his residence in Hopkinton he served four years on the School Committee of the town, and he has been a member of the Framingham School Board as well as one of the trustees of the town library for nearly six years, usually receiving the hearty support of all parties and a unanimous election. He has been a trustee of the Framingham Savings Bank for about ten years, and has served on various town committees. His interest and labor in the work of total abstinence from intoxicating liquors has been a power for good among the people of his parish and of the town generally. Among the young people and children he has especially loved to promote pure living and abstinence from profanity and other bad habits. It can truly be said that he is respected by all his townsmen and beloved by many besides his own people. He is now building a handsome and comfortable parochial residence, and all wish him many years of comfort and usefulness in it.

JAMES R. ENTWISTLE.

James R. Entwistle was born in the village of Saxtonville, town of Framingham, in 1845, and here he has ever since made his home, with the exception of two years spent in the West. He was educated in the town schools, and at an early age worked in the Saxtonville Mills, and also in the store of Hunt & Fuller in the village. In 1863 the young man went to Boston to work in the jobbing shoe trade, but the following two years he spent in the West, being located at Evansville, Ind., and Cincinnati, Ohio. Returning to Boston, he entered the employ of Hosmer & Winch, boot and shoe jobbers, and since 1875 has been a member of the firm of Hosmer, Codding & Co., of that city, jobbers in boots, shoes and rubbers. This firm is enterprising and well-known and is doing a large business.

Mr. Entwistle's business capacity has been recognized in his selection as president of the Framingham Electric Company, which supplies the town with light, as a secretary and a director of the Framingham Union Street Railway Company, and it is not too much to say that he has been a prominent factor in the success of that company. He was an incorporator and is a trustee of the Farmers' and Mechanics' Savings Bank of South Framingham. His church affiliations are with the Congregationalists, being a contributor to the support of that denomination. He is also a member of the Edwards Parish at Saxtonville. He is a prominent member of the Masonic Fraternity and has been for years a member of the Royal Arcanum. That his capacity for good service has been appreciated by his townsmen is shown by the fact that he was for several years upon the School Committee of the town, was chosen the first auditor of the town's accounts, served on the

Board of Selectmen of the town in the years 1877 and 1878, and represented the town in the Legislature in 1882 and 1883. He was a member of the Sewerage Committee which had in charge the construction of the town's sewerage system, and has been for some years chairman of the Board of Registrars of Voters. In politics he is a Democrat, and in 1888 he was a delegate to the National Convention at St. Louis, which nominated Mr. Cleveland for President. Self-made, popular, in the prime of life, any biography made of Mr. Entwistle at this time must be incomplete.

ALEXANDER CLARK.

Alexander Clark, Jr., was born in Framingham, November 7, 1811. His father was the village blacksmith and the son worked for him in the same business, afterwards engaging in it for himself, and later, in company with his brother Newell, starting a shop in South Framingham, where now is the drinking fountain in Irving Square. This was about 1831; but when the square was opened, the shop was removed to the site on which afterwards grew up Charles E. Bradley's carriage-manufacturing business. Selling their business, Alexander and Newell went into the manufacture of straw bonnets in 1838, under the firm-name of A. & N. Clark. This firm was succeeded later by that of A. Clark & Son, Alexander's son, Willard E., being associated with him. From bonnets this firm went to making palm-leaf hats and Shaker hoods in 1853. These had an immense sale all over the country and the firm cleared many thousand dollars, but the hoods afterwards went out of style, and shop and machinery lay idle. The firm then fitted up a factory for the manufacture of shoes, but soon gave up the business. Alexander retired from active business some fifteen or twenty years ago, since which time until his death, which occurred August 11, 1890, his attention has been given to the care of his real estate, of which he possessed considerable. In 1853-54 when the town Fire Department had just been organized, Mr. Clark was third assistant engineer of the Department, being in charge of the South Framingham Division. He lived to see the tiny village grow almost to the dimensions of a small, bustling city.

Mr. Clark was always deeply interested in religious work. Before 1840 there was no church at South Framingham, and he conducted Bible readings at his house on Sundays, and read the Bible aloud in his shop on week-days. Sunday services were afterwards held in his shop, with preaching by neighboring ministers. He was foremost in starting the Baptist Church in 1851, was its first treasurer, and assistant superintendent of the Sunday-school at the start. When the church edifice was built he was chairman of the building committee, and for thirty years he was superintendent of the Sunday-school, being for

many years also a member or leader of the choir. For years he officiated as undertaker in the village.

Mr. Clark was three times married,—on June 23, 1835, to Nancy Daniels, who died December 5, 1838; on April 7, 1840, to the widow Abbie Blake Adams, to whom was born one son, Willard E.; on April 17, 1889, he took for his third wife Nettie Ashbrook Steeves, of Moncton, New Brunswick, who survives him.

CHAPTER XLIV.

BELMONT.

BY THOMAS W. DAVIS.

It was said, somewhat irreverently, by an earnest advocate of the Hoosac Tunnel, before that wonderful triumph of modern engineering had become an accomplished fact, that the finger of God marked the valleys of the Deerfield and Hoosac Rivers for the location of a great railroad, and the full force of the remark is readily grasped by any one who, standing on the ridge which separates those streams, observes the line of deeper green which indicates the descent of the hills on either hand to the course of the waters below. The objection was at once offered that, to make this argument avail, the finger should have pierced the mountain, and thus have made the route complete. Human enterprise has now supplied that which was lacking, and from the Atlantic plain of the Mystic and the Charles, across the valleys of the Nashua and the Connecticut with its tributaries, under and between the highlands of the Green and Taconic Ranges, the iron horse makes his regular journeys to meet the waters of the Hudson at Troy. It is interesting to note how, in its advance from one river system to another, the railroad has seized upon a depression here in the mountain wall of separation, a sloping upland there, and to observe again how communities spring into being all along the lines that help to tie the opposite ends of the land together. No town in New England, unless it be a railroad centre, owes its existence as a distinct municipality more directly to railroad enterprise, than does the town of Belmont. Its struggle for birth ended happily in the same contest that determined the completion of the Hoosac Tunnel, and there was a peculiar fitness in the union of the friends of the town and the advocates of the Tunnel in their efforts.

In the gradual growth of the ice trade, which was for so long a period of years an important factor in the development of Boston as a leading port of commerce, a railroad had been built from Charlestown to Fresh Pond, for the purpose of carrying its ice to tide-water. An extension of this road to the westward was projected. To pass from the valley of the Mystic to that of the Charles the most feasible route was found

to be between Fresh and Spy Ponds, and thence along the southern border of Wellington Hill. At the western extremity of the hill, a slight elevation turns Beaver Brook from a southerly to a westerly direction, and causes it to empty its waters into the Charles River at Waltham, and the location of the railroad followed the brook in its westerly course. Aside from the advantages of this route, as determined by the topographical survey—advantages so great that another highway to the West has since taken the same outlet—it was an additional recommendation that the valley at the base of Wellington Hill was sparsely populated. It formed the outskirts of two old towns, Watertown and West Cambridge (now Arlington), and was, by reason of its remoteness from the centres of those towns, occupied exclusively by a farming population. In 1843 a charter was obtained for the Fitchburg Railroad, and it was opened to Waltham in December of that year. At the crossing of Concord Turnpike was placed the station of Wellington Hill, destined to make the centre of the charming suburban town of Belmont. At this time there were about one hundred and twenty-five families residing upon the territory now included within the limits of the town. Improved facilities for communication with the neighboring metropolis led to a steady growth in numbers. The increase was not rapid. There was no place of public worship nearer than West Cambridge or Watertown, no store, post-office, nor public hall. The policy of the railroad in respect to train accommodations and rates of fare was a fluctuating one, as, indeed, it continued to be for many years. The roads and the schools were not such as to offer special attractions to those seeking a residence.

Believing that they could govern themselves and provide for their needs as citizens more satisfactorily than was possible while they continued in the towns of which they formed a comparatively unimportant part, a large majority of the residents near Wellington Hill and in the village which had been begun around the station at Waverley, applied in 1854 to the General Court for an act of incorporation as a town. This petition was signed by Charles Stone and 127 others. Remonstrances were presented by citizens of Waltham, from which a few acres were asked; of Watertown, which would lose half of its already circumscribed territory; of West Cambridge, whose "Flob den" suddenly acquired new value, and a few voters in the proposed new town; the land companies, two in number, owning real estate in Waverley and at Strawberry Hill also opposed the petition, and by concurrent vote of the two Houses of the Legislature, the petitioners had leave to withdraw.

In 1855 petitions, headed by Jacob Hittinger, David Mack, Albert Higgins and Leonard Stone were received in the Senate and referred to the Committee on Towns. Remonstrances from the towns, whose territory was affected, were also presented, and from citizens of Watertown whose residences were in

the proposed town. After several hearings a bill was reported, which did not go beyond the house first taking action upon it, being refused a third reading in the Senate by a vote of nine to four.

Immediately after the adjournment of the Legislature, measures were taken by the appointment of committees and subscription of money for expenses, to keep alive the interest of the people in the project, and a petition from Jacob Hittinger and 101 others was presented to the Legislature of 1856. Remonstrances were also presented. The Committee on Towns reported leave to withdraw, but a bill was substituted, which passed the Senate and was defeated in the House. In 1857 a petition was presented, signed by Jacob Hittinger and 129 others, the usual remonstrances being offered. After a careful and exhaustive examination into the merits of the enterprise, the Committee on Towns were unanimous in reporting a bill, which was defeated in the Senate.

The petition of 1858 was signed by Jacob Hittinger and 201 others. The remonstrants, like the petitioners, were more numerous than in previous years, as the possibility of favorable action upon the petition became greater. Leave to withdraw was reported, and a substitute bill was introduced in the Senate only to meet with defeat. In 1859 the petitioners, again headed by Jacob Hittinger, were 203 in number. The usual remonstrances were presented. A majority of the Committee on Towns reported a bill which, after long and careful consideration, passed the House, and the struggle was at last ended by the favorable action of the Senate and the approval of the Governor, Hon. Nathaniel P. Banks, which was given March 18, 1859.

The town, as incorporated, took from Waltham 429 acres, from West Cambridge 1773 acres, and from Watertown 1446 acres, making a total of 3648 acres, or 5.75 square miles. Arlington bounds it upon the north, Cambridge upon the east and Watertown on the south. Its western boundary touches Lexington, Waltham and Watertown. Its town-hall is six and a half miles W.S.W. from the State-House. The population in 1853, when the first petitions for incorporation were circulated, was 1004, which was increased to 1175 at the date of incorporation. The valuation in 1859 was \$2,036,077.

The first town-meeting was held March 28, 1859. At this meeting the act of incorporation was accepted, and Mansur W. Marsh, Jacob Hittinger, J. Varnum Fletcher, Jonas B. Chenery and Joseph Hill were elected selectmen, and Mr. Marsh was subsequently chosen chairman of the board; J. Oliver Wellington, Josiah Bright, Edwin Locke, William J. Underwood and H. R. Fillebrown were elected assessors; Samuel P. Hammatt, town clerk, and George S. Adams, treasurer and collector of taxes. The first town tax was \$12,500.85, which was raised by a levy of \$5.11 on \$1000, and a poll tax of \$1.50 on 325 polls. One hundred and twenty-six regularly called town-meet-

ings have since been held, and thirty-six adjourned meetings.

The second meeting of the new town was held April 13, 1859. Under the fourteenth article of the warrant, "to see if the town will defray the expenses necessarily incurred in procuring their act of Incorporation," etc., the town voted to pay the expenses, and the treasurer was authorized to borrow, upon the notes of the town, a sufficient sum for the purpose, not exceeding \$9000, and to pay the same over upon such vouchers as were approved by the sub-committee of the petitioners for incorporation. Bills were immediately presented and paid, amounting to \$8779.20. A suit in equity was thereupon brought by Jonathan Frost and others, to obtain a decree compelling a restoration of the money to the town treasury, the note having been paid in due time from moneys obtained by the tax levy of 1859. The case was heard before the full bench of the Supreme Court in March, 1862, and an order was issued requiring the treasurer to restore to the town treasury the sum paid out with interest, the whole amounting to \$10,681.14, but deducting \$478.68, which was allowed to the plaintiffs in equity, for counsel fees and other expenses incurred in bringing the suit for the benefit of the town. Mr. Adams, the treasurer, was reimbursed by a subscription. Later decisions have gone further than this, in forbidding a town to raise by taxation money to be expended in opposing its own dismemberment.

For much of the early history of the territory now included within the limits of Belmont, one must look to the town from which it came. There was but little common interest among its scattered inhabitants until they united in the struggle for corporate existence. Ecclesiastically, politically and socially, they were identified with the towns in which they dwelt. In the latter part of the year 1855 the need of a suitable building for public worship became felt to such a degree that January 1, 1856, a paper was put in circulation upon which the sum of \$7000 was pledged in amounts ranging from \$100 to \$500. At a meeting held January 3d, of that year, the following committee was chosen to build a "meeting-house." David Mack (chairman), Samuel O. Mead, Charles Stone, Edwin Locke, Albert Higgins, John L. Alexander and J. M. Hollingsworth. In September, Mr. Mack resigned his position and J. Oliver Wellington was elected chairman in his stead. The church was located on Concord Turnpike, near the railroad station. It was built by John C. Sawin from plans by Enoch Fuller, and was completed in the fall of 1857. Its total cost was about \$13,000. The church was dedicated December 2, 1857, and was occupied as a place of worship by the Belmont Congregational Society (Unitarian) until February 12, 1890, when it was destroyed by fire. At the time of the fire it had become the property of J. V. Fletcher. Nearly two years before it had been decid-

ed to erect a new building under the leadership of the ladies of the Arachne Club; subscriptions were secured, and entertainments in aid of the enterprise were given, prominent among the subscribers being the firm of J. V. Fletcher & Co. and Edwin F. Atkins, who gave \$5000 each. The building committee consisted of J. Henry Fletcher, William E. Stowe, H. O. Underwood, Mrs. J. M. Hernandez and John F. Richardson. A site having been selected, nearly opposite the old church, the new building was erected in 1889, at a cost of upwards of \$26,000. Hartwell & Richardson were the architects of the new church, and the builder was E. Atwood, Jr. The walls are of field stone, the gables and tower of wood, covered with cement plaster. The tower, at the northerly corner of the building, contains the bell from the old church and a clock provided by the town. Within, the finish is of cypress, the roof of the auditorium being of hard pine. Beautiful memorial windows are placed in this room. The vestry and ladies' parlor are upon the same floor as the large audience-room, and can be made a part of it when required, and a well-appointed kitchen and dining-room testify to the fact that the modern church supplements its work as a factor in Christian civilization by ministering to the social needs of humanity. The church was dedicated April 9, 1890, with appropriate services, including an original hymn by the pastor, and the dedicatory sermon by Rev. Brooke Herford, of Boston.

The pastors of the Society since its organization have been Rev. Amos Smith, from October, 1857, to March, 1872; Rev. Harvey C. Bates, October, 1873, to September, 1876; Rev. Ivory F. Waterhouse, March, 1877, until his death, at the age of fifty years, March 2, 1882; Rev. J. Bradley Gilman, May, 1883, to March, 1886; and Rev. Hilary Bygrave, from November, 1886, to the present time. Rev. Mr. Smith continued to reside in Belmont after his resignation, until his death, September 12, 1887, at the age of seventy years.

The first steps to provide for regular public worship at Waverley were taken at a meeting held May 27, 1861. There were present at this meeting Daniel Deshon, John Taggard, John Sylvester, — Harrington, Samuel Greene, William Lowry, Frank Cottle, W. A. Blodgett and Seromus Gates.

A committee was appointed to solicit subscriptions to an amount "not less than five hundred dollars," for the support of worship for one year from June 1, 1861. At an adjourned meeting held Saturday, June 1st, the committee reported that they should be able to secure the necessary funds, and it was voted to extend an invitation to Rev. Charles Jones to preach for one year in Waverley Hall, at a salary of four hundred dollars. The call was accepted. The following year an attempt was made to substitute the Episcopal for the Congregational form of worship and two subscription papers were, under the direction of a committee,

presented to the inhabitants of the village. The canvass which followed resulted in a larger support, both in money and numbers, for Congregational worship, and at a meeting held May 12, 1862, it was voted to continue that form. An effort made at a subsequent meeting to reconsider this vote was not successful.

Rev. Hubbard Winslow was now invited to become the pastor of the little society, and he filled that office until June 1, 1863. For more than a year following the pulpit was supplied by various preachers. September 1, 1864, Rev. Josiah W. Turner assumed the pastoral charge at a salary of eight hundred dollars per annum. July 11, 1865, an ecclesiastical council of the neighboring (Trinitarian Congregational) churches was held, for the purpose of recognizing "The First Congregational Church of Waverley." The original members of the church were: Rev. Josiah W. Turner, Mrs. Almena W. Turner, Rev. Daniel Butler, Mrs. Jane D. Butler, Daniel Deshon, Mrs. Eunice Deshon, John Sylvester, Mrs. Lucy J. Sylvester, William Jewett, Mrs. Lois M. Jewett, Seromus Gates, Mrs. Lemira H. Gates, William Lowry, Miss Frances M. Grant, J. Douglas Butler, Miss Mary F. Turner. William Lowry was the first deacon of the church, in which office he has been succeeded by Solymann W. Grant and William Jewett.

Rev. Mr. Turner was installed as pastor February 1, 1866, and was dismissed July 1, 1873. His successors have been: Rev. John L. Ewell, December 10, 1874, to March 16, 1878; Rev. William H. Teel, July 3, 1878, to August 1, 1883; and Rev. George P. Gilman, from November 16, 1883, to the date of writing.

The society supporting the church was legally incorporated Feb. 29, 1868, as the "First Congregational Society of Waverley." Active steps were at once taken under the leadership of the pastor for the erection of a house of worship. A lot at the northeast corner of White and North Streets was donated by the Waverley Company, subscriptions were pledged and the corner-stone of a church was laid August 12, 1869. The building was erected from plans drawn by Hammatt & J. E. Billings, and was dedicated January 13, 1870. The style of the church is Early Gothic. Its plan is a quadrilateral with a bell-tower in the corner and is divided into church and vestry in connection. The church proper has an open timber roof and windows of painted and stained-glass of simple design. All the finish and pews are of oak, and the pulpit and furniture are of black walnut. The seating capacity is about two hundred and twenty. It may be remarked in passing, that the Sabbath-school at Waverley antedates the church by several years.

The Waverley Christian Union was organized in December, 1882. Its membership consists of those who contribute to the support of the union and subscribe to the following covenant:

"In the love of the truth and in the spirit of Jesus Christ, we join for the worship of God and the service of man."

The society has held a regular preaching service and a Sabbath-school in Waverley Hall since the date of its organization. The pastor of the Belmont Congregational Society has thus far been the pastor of the union. Thirty-four persons were baptized by Rev. J. B. Gilman at a service held November 1, 1885. Additions have been made to the society from time to time, and the erection of a house of worship has been contemplated, and will be accomplished in the not far distant future.

All Saints' Guild (Episcopal) was organized on All Saints' Eve, October 31, 1887, at the home of Miss Lucy A. Hill, Waverley. For nearly two years previous to its organization, Rev. Edward A. Rand, of Watertown, conducted occasional cottage services, the first of these being held at the residence of Mr. H. A. Scranton, Waverley, on Good Friday evening, April, 1886. Sunday afternoon services were held during the summers of 1887 and 1888 at Miss Hill's residence; evening cottage-service has been held once a month on a week-day since the formation of the Guild, and latterly, Rev. Mr. Rand, assisted by Rev. Thomas Bell, of Arlington, has conducted a Sunday afternoon service once a month at the Town Hall, Belmont. The present officers of the Guild are: Rev. Edward A. Rand, president; Mrs. H. A. Scranton, vice-president; Miss E. J. Woodward, secretary; Mrs. A. A. Adams, treasurer, and an executive committee of eight members.

The families in the northeast part of the town have very largely continued to find their church-home in the town of Arlington. A mission enterprise in the Mount Auburn district of Watertown has also received liberal support from residents of Belmont.

The Roman Catholics in the town, although maintaining a Sabbath-school for a number of years, have been connected with parishes in Arlington, Cambridge and Watertown until a very recent date. After holding regular services at the Town Hall for some months, a site was selected for a church on Common Street, near School Street, and subscriptions were begun for the expenses of erection in May, 1886. The work was pushed forward rapidly under the supervision of a building committee, consisting of Edward Quigley, James Hart, W. J. Reed, J. F. Leonard and C. J. McGinniss. The first Mass in the church was celebrated June 5, 1887, and it was dedicated March 31, 1889, by Right Rev. John J. Williams, Archbishop of Boston, assisted by a large number of the clergy of the diocese. The dedication sermon was by Rev. D. O'Callaghan, of South Boston, and an address was given by Rev. Robert J. Fulton, of Boston College. The pastor of the church, which bears the name of St. Joseph's, is Rev. Thomas H. Shahan.

Upon the territory incorporated into the town of Belmont were three school-houses, one on Brighton

Street (still standing on the same location), one on Washington Street and one at the corner of Beech and North Streets, at Waverley. In the building on Brighton street were two schools, the higher of which, the North Grammar, was taught by Mr. Arthur P. Smith. The other buildings each contained a primary school. A fifth school, called the South Grammar, was at once organized in the Washington Street school-house and placed under the charge of Mr. David Mack. The reputation of both of these gentlemen as instructors testifies to the educational advantages enjoyed at even this early day in our history by the youth of the town. Arrangements were also made by which pupils already admitted to the High Schools might complete, without change of school, the course of study they had entered upon. Another school-house, on Grove Street, was at once provided for, the scholars in the southeast portion of the town remaining until the completion of this building in the schools of Watertown. Mr. Smith resigned his position in the North Grammar School in 1864, and the school was, a few months later, reduced to an intermediate grade upon the establishment of a new Central Grammar School. Ill health necessitated the retirement of Mr. Mack in September, 1861. His successors were Rev. James Thurston, 1861; William W. Colburn, 1861-62; Augustus W. Wiggin, 1862-63, and De Forest Safford, 1863-65, when the school was merged in the Central Grammar School, of which Eben H. Davis became the first principal. In the following year this school took the name of the High School, which it has since retained, although in 1869 it was, for a few months, reduced to a grammar grade. Mr. E. H. Davis resigned in 1870 to accept a superintendent's position. His successor was Thomas W. Davis, who was directed, in taking charge of the school, to restore it to its higher grade. Mr. T. W. Davis resigned in 1881 to engage in teaching in the city of Cambridge, but has continued to reside in Belmont. Charles L. Clay was principal in 1881, and in December of that year was succeeded by the present principal, Henry H. Butler. The liberality of the town in educational matters is illustrated by the fact that this school has been maintained for so many years with no requirement therefor under the laws of the Commonwealth. Its sessions for two years were held in the vestry of the Congregational Church. The High School building on School Street was erected in 1867 at a cost of \$15,000, and was dedicated December 2d of that year. The hall in its lower story was occupied by the town for its meetings until 1882, after which both stories were devoted to school purposes. The Washington Street building was moved to the same enclosure as the High School in 1867, and is still in service.

The school-house at the corner of Beech and North Streets was burned in 1872. A new brick building was erected the next year in a more central location at the corner of North and Waverley Streets, the cost

of building and land being about \$16,000. Meanwhile, the school was accommodated in the vestry of the Waverley Congregational Church.

A school-house on Cushing Street, in the Mt. Auburn District, was built in 1871. This and the building on Grove Street were purchased by Cambridge in 1880, when the territory adjacent to Fresh Pond was annexed to that city. The teachers whose services to the town have continued through the longest term of years are Miss Hannah B. McGinniss and Miss Harriet A. Hill, who were appointed in 1870, and Miss Etta C. Leonard in 1871. The labors of the teachers in the schools have been, with but slight exception, faithful and self-denying, and it is pleasant to record that they have been appreciated. An unusually large proportion of those employed have been persons of successful experience elsewhere. Skilled superintendence of the schools began with the school year of 1890, the first incumbent of the office of superintendent being I. F. Hall, who also superintends the schools of Leominster, devoting to each town a fixed amount of time per week. A vote of the town at the annual meeting of 1890, was favorable to the erection of a new building, to embody the advanced ideas of the day, in respect to ventilation and general sanitary arrangements, and to provide accommodations for a largely increased number of pupils, but the measure has as yet failed to be carried into effect, motions to appropriate the money necessary for its erection not having received the two-thirds vote which is required when payment is to extend through a series of years.
